North Plainfield Weekly Review.

VOL. 3—NO. 43. NORTH PLAINFIELD, N. J., SATURDAY, JANUARY 10, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

Unity Lodge, No. 102, Knights of Pythias, installed officers Thursday evening.

Wetumpkah Tribe, No. 229, I.O.R.M., elected officers at their meeting, Thursevening.

Ten candidates were initiated in Oriental Court, No. 14, Jr. O. U. M., last evening.

The Plainfield Medical Society gave a banquet at Hotel Rosell Wednesday evening.

The second number of the Plainfield High School paper, the Oracle, is out this week.

Dunbar Wright will lecture this evening at the Casino for the benefit of Muhlenberg Hospital.

Court Watchung, Independent Order of Foresters, installed their recently elected officers Thursday evening.

According to the new State law, pupils can enter the High Schools during the first week of the various terms.

The First and City National Banks and the Plainfield Trust Company will hold their annual elections Tuesday afternoon, January 13.

Freedom Commandery, No. 5, K. G. E., of N. J., was instituted in I. C. T. Hall last evening by Assistant General A. L. Clark and staff, of Trenton.

A package sociable will be held in the Parish House of the Grace Episcopal Church this evening under the auspices of the Swedish Lutheran members.

An organ recital will be held in Grace M. E. Church, this borough, Tuesday evening, January 20. A silver offering will be received to be applied to the church fund.

The Sunday Schools of the First M. E. Church and of Monroe Avenue Church, of Plainfield, united [illegible]

Under the [illegible] Society of the First M. E. Church, of Plainfield, Prof. Edward Howard Griggs will give six lectures on Goethe's Faust, in February and March. The date of the first lecture is February 19, at 3.45 p. m.

Mayor Jenkins of Plainfield has made the following appointments for the year: As members of the Board of Health, Charles J. Frisk and Dr. B. Van D. Hedges to succeed themselves, and Charles H. Dunham to succeed H. A. Weber whose term had expired. Albert H. Atterbury was appointed as commissioner of appeal for three years, to succeed himself, and Craig A. Marsh was reappointed Corporation Counsel for one year. Leonard Waldo was appointed director of the Public Library and Reading Room to fill out the unexpired term of the late E. C. Perkins, and Dr. C. B. Lufburrow was appointed city physician to succeed Dr. J. H. Carmen.

NEWS FROM WATCHUNG.

Gerald Underhill has about ten men employed cutting 200 cords of wood.

The Progressive Euchre Club will soon re-organize.

A party of young people from this place attended a progressive euchre party at George Wykoff's, Netherwood. First ladies prize was won by Vinna McCord. Gentleman's prize by F. Gunn, and the booby prizes by Mrs. McCord and J. Kinney.

North Plainfield High School Boy Honored.

At a meeting of the Pastime Athletic Club of Jersey City, last Saturday, H. C. Brose, a High School boy of this borough was elected vice-president of the club.

To Observe Forty Hours Devotion.

The forty hours devotion will be observed in St. Joseph's Roman Catholic Church, this borough, commencing tomorrow morning, at 10.30 o'clock, when a solemn high mass will be chanted. Rev. Father Miller, priest of the church, will be the celebrant, Rev. Father Breman, of Trenton, will be the Deacon, and Rev. Father Turrell will be sub-deacon.

The choir will render [illegible] with Mass and other music.

Negro Candidate Turned Down.

A Plainfield news item to the Newark Evening News says that in the appointment of Dr. Charles Lufburrow as city physician, keen disappointment was caused to the nergo Republican voters in Plainfield, who, backed by friends of Senator John Kean, presented a petition to Mayor Olin L. Jenkins, asking that one of their number be named. Dr. Jesse Anderson was the negro candidate. He was the president of the colored organization which lined up for Joseph Cross, of Elizabeth, as against W. N. Runyon, of this city, in the campaign for the State Senatorial nomination. The local administration follows the leadership of Congressman Fowler.

MILKMEN MUST HAVE PERMITS.

North Plainfield Borough Board of Health Pass Ordinance.

At a meeting of the North Plainfield Borough Board of Health last Monday night a supplement to the Code of Ordinances as revised January 7, 1901, concerning milk supply was adopted, and will be known as Ordinance XVI. The ordinance will be found in full elsewhere in this week's issue or the REVIEW.

Hereafter all milkmen selling or delivering milk in this borough must first obtain a permit for such sale or delivery, and pay the sum of two dollars. They must also have the name of the person, firm, association or corporation selling or delivering the milk plainly lettered on each side of their wagon, also the number of the permit.

For a violation of this ordinance the sum of thirty dollars, and costs of suit, will be demanded for each offence.

Library Institute to be Held Next Month.

Under the auspices of the New Jersey Library Association, a library institute will be held in Plainfield, February 6.

The committee to arrange the program consists of Miss E. C. Adams, librarian Public Library, Plainfield; J. C. Dana, librarian Public Library, Newark; and Miss J. M. Campbell, librarian Public Library, Passaic.

Jerusalem Masons Install.

Jerusalem Lodge, No. 26, F. and A.M. installed the following officers Tuesday evening: Worshipful Master, James Stafford; senior warden, R. A. Osman; treasurer, C. H. Rugg; secretary, Edw. Nelson; senior deacon, George J. Caskey; junior deacon, Robert Reif; chaplain, Garfield Pike; senior steward, Joseph Blimm; junior steward, Stephen Van Horn; tiler, Caspar Boisterte.

Installation of Veterans and Their Wives

Antietam Camp, Union Veterans U[illegible] on and the auxiliary, the Woman's Veteran Relief Association, held a joint installation of officers Wednesday evening [illegible] dent, Mrs. Hancock and staff.

Music and refreshments followed the installation.

Knights of the Golden Eagle Install and Hold Reception.

At the installation of officers of Freedom Castle, No. 42, Knights of the Golden Eagle, Tuesday evening, delegations from Castles in New Brunswick, Somerville, Annandale and Philadelphia were present.

District Grand Chief F. W. Powelson and staff, of Somerville, officiated at the installation.

Items From Proctor's.

James R. Wilson, who resigned as leading man of the Fifth Avenue Stock Co., to assume the leading role in "Audrey," will return to the F. F. Proctor fold as leading man at the One Hundred and Twenty-fifth Street, in company of which Adelaide Keim will continue as leading lady. Ned Howard Fowler will be transferred to leading business at the Fifty-eight Street Theatre.

Many celebrated plays are scheduled for revival by the Proctor Stock Co., during the first months of the new year. Among the number may be mentioned "Fredora," "Cleopatra," "La Tosca," "Under Two Flags," "Hearts Are Trumps," "Around the World in Eighty Days," "The Cherry Pickers," "Blue Jeans," "The Still Alarm," and several of the most successful comedies in the repertoire of the late Roland Reed.

The New York Tribune Review.

The Tribune Review is a handsome sixteen page weekly issued by The New York Tribune Association. It costs five cents a copy, but may be had for a whole year for $1. There is no other such publication sold anywhere for the money. It gives the essence of the week's news with clean cut, sane and intelligent comment, and it keeps you up to date on everything worth knowing in politics (domestic and foreign) and in literature, art and music. For free sample copy send a postal card to THE TRIBUNE, New York.

A Romantic Wedding.

The law of New Jersey, which exacts a license before marriage, brought about a romantic wedding on Sunday evening when Harry J. Smith, a young soldier in full uniform was married to Helena Rundow, a pretty young brunette, on the little ferry-boat Arthur Kull, plying between Elizabethport and Staten Island. The soldier awakened the Rev. John W. Trout of the First Methodist Church and asked him to marry them. Mr. Trout asked to see the license, but they said they had none. The dominie told them that the only way he could see out of the dilemma was to board the ferryboat and he would wed them when it touched the New York shore. When the craft was moored to Staten Island side the preacher quickly tied the knot which made the couple man and wife.

A VERY NARROW ESCAPE.

Dr. Richard Moldenke, While in Mexico, had an Adventure with a Bucking Broncho.

Dr. Richard Moldenke, of Watchung, returned from Mexico, Wednesday, where he had been inspecting some silver mines in which he is largely interested. The mines are near Chihuahua and are among the oldest of the old mines for which Mexico is famous. He found everything in a prosperous condition, but contemplates extensive improvements calling for the expenditure of half a million dollars.

Doctor Moldenke had quite an adventure with a bucking broncho, while absent, and only his peesence of mind and agility, saved his life. He attempted to ride the animal from Chihuahua to his mines, about eight miles distant, but the broncho objected and tried to throw the doctor, but failed. He then started to run, and stopping suddenly reared up and fell backward. Doctor Moldenke stuck to him up to this point, and then concluned to part company with the horse. As it was, the doctor succeeded in getting far enough from the animal so that only one of his legs caught under it, but had the horse been a heavy one, the chances are the doctor would have been killed. He escaped with a few bruises and scratches.

Death of Mrs. Martin.

Mrs. Adeline P., wife of James B. Martin, of Manson Place, Plainfield, passed away early Monday morning.

Mrs. Martin had been ill for some time and, although her death came suddenly, the attending physician had notified the family several weeks before that she might be taken from them at any moment, thus the sad event was not unexpected.

Mrs. Martin is survived by a husband and five children, Miss Annie Martin, Mrs. Edward Stoeckle, of Brooklyn, Britt, John C. and Charlotte Martin.

The funeral was held from the [illegible] Rev. [illegible] in the Methodist cemetery.

Chairman Somerset County Executive Committee.

It is reported that [illegible] Shurts, of the Somerset County Democratic Executive Committee, will resign his resignation as head of that [illegible] at the next meeting to be held during the present month. Sheriff Calvin D. McMurty, of Somerville, is mentioned as a candidate to succeed Mr. Shurtz, and it is said that he is backed by Alvah A. Clark. He is not a member of the committee, and some protest to his candidacy is made on this ground, particularly in North Plainfield. At present the Democrats are the dominant factor in Somerset County, the Senator, Assemblyman, and almost all the county officers being of that political faith. David J. Carney, of North Plainfield, formerly secretary of the committee, in speaking of the present condition, said to a NEWS correspondent:

"The Somerset County Democratic Executive Committee is a howling farce. There is a power behind the scenes which desires it to be so. It is too much to expect of our party leaders to allow the committee to select a fearless and aggressive leader. It would make interesting reading if the true reasons were known why Chairman Shurts will resign. The committee has power to go outside its own members in selecting a chairman, but when they do such names should be included as Joseph W. Ballantine, Major Nelson Y. Dungan, J. J. Bergen and Charles Squibb." — *Newark Evening News.*

Washington in Winter.

Washington is a typical [illegible] cation resort and its bustle is p[illegible] al and political. These are gat[illegible] the C[illegible] ital representatives of [illegible] tion [illegible] country, and their co[illegible] going are of no little interest [illegible] the doings of the Senate and H[illegible] features every tourist delights [illegible] wing, and these features togeth[illegible] e visits the numerous public [illegible] s keep busy all the while [illegible] Washington. The Royal Blue Li[illegible] ch the Jersey Central is th[illegible] road to operate an exc[illegible] Washington January 15th, an[illegible] tickets days excursion i[illegible] is $12.00. Train l[illegible] m., and arrives W[illegible] If you want to k[illegible] a postal to C. M. [illegible] assenger Agent, New [illegible] our book. Free for the [illegible]

The New [illegible] ice was entered last Sat[illegible] and the safe which cont[illegible], was blown open. The burg[illegible] were masked, continued th[illegible] tions into Dunellen, adjoinin[illegible] ey drove the proprietors of [illegible] undry into a rear room and r[illegible] of $23.

MAYOR JENKIN'S MESSAGE.

Synopsis of the Principal Points in the Annual Message of Plainfield's Mayor

The Mayor of Plainfield, Olin L. Jenkins, in his annual message, states that never before in the history of the city was there found at the beginning of the fiscal year so large a balance in the general fund. After taking up and commenting on taxes, school taxes, bonds, etc., he says, in regard to the purchase of land and the erection thereon of a new High School, that if the constitutionality of the new school law be conceded, it is now incumbent on the common council to appropriate the sum of $125.000 for said land and school.

In touching on the water supply contract, the message reads: "By reference to the correspondence between the Plainfield Water Supply Company and the city, on file with the City Clerk, and the action taken thereon by the Common Council, it will be observed that the city has the option at any time [illegible] the present and the first day [illegible] next, to renew the present [illegible] with the Plainfield Water Supply [illegible] for the period of nine years [illegible] and day of May next. This [illegible] the serious consideration [illegible] Common Council, and is [illegible] pt attention from the [illegible] Council, to the [illegible] seemed wise to elect [illegible] referred to, no [illegible] be prompt[illegible] if [illegible] conclu[illegible] reached, [illegible] should [illegible] ensue loo[illegible] he prot[illegible] e city at the [illegible] of t[illegible] contract on the [illegible] The last com[illegible] Plainfield Water Supply [illegible] orth that unless the [illegible] ice to the company on [illegible] t day of April, 1903, of [illegible] not to renew the existing [illegible] same should be considered as [illegible] for nine years. It recommend[illegible] he city take some affirmative [illegible] rather than [illegible] ow the city's rights [illegible]

[illegible] police telephone signal service, [illegible] hing of twelve or fifteen [illegible] opriate places thro[illegible] [illegible] telephone [illegible] cation [illegible] [illegible] each box a[illegible] nal buttons: one [illegible] for citizens and one for [illegible]

The Mayor also recom[illegible] public parks for Plainfield and [illegible] be acquired for such purposes [illegible] rapid development of the ci[illegible] make it impossible to secure s[illegible] out the purchase and removal [illegible] ings.

The Mayor also recommended [illegible] sections of the city where prope[illegible] ers do not have the benefit of t[illegible] age plant, that the city supply [illegible] facilities for connection with t[illegible] rge system.

After commenting on the [illegible] work done by the department [illegible] work, the Mayor says: "I still [illegible] the views already communicate[illegible] Common Council that recou[illegible] method of making perman[illegible] provements by the issue [illegible] ever temporary in charac[illegible] quently raising the m[illegible] bonds by assessment [illegible] sioners appointed [illegible] ought not to be [illegible] those rare inst[illegible] ry method p[illegible] wholly im[illegible]

The de[illegible] of [illegible] city co[illegible] and [illegible] local[illegible] ut an[illegible] vi[illegible] skill.

SEWER CONTAMINATION LOCATED.

Comes From Using Petroleum in Making Gas at Gas Works.

Complaints having been made to the North Plainfield Boasd of Health by citizens of Plainfield and North Plainfield of the contamination of Green Brook, the secretary of the North Plainfield Board, Rev. W. E. Honeyman, and Inspector Pangborn, made an investigation last Tuesday.

They found a large quantity of sludge flowing from the sewer on the Plainfield side at Watchung avenue, into the Brook, and immediately notified Dr. B. Van D. Hedges, secretary of the Plainfield Board of Health, who accompanied Mr. Honeyman to the sewer. They concluded the stuff originated at the gas works, and went to the Superintendent of said works, who admitted that they were responsible for the contamination, and said his company was powerless to prevent it so long as they used petroleum in the manufacture of gas. He promised, however, that no more of the sludge would be turned into the sewer emptying into the brook, and that he would endeavor to get it into the Plainfield sewer.

While it has been known for some time that this nuisance existed, it was not known where it came from.

The effect of this contamination is plainly noticeable for a long distance down the stream, and complaints came from half a mile below where it emptied into the brook.

Both the North Plainfield and Plainfield Boards of Health are in earnest now and unless the nuisance is abated forthwith, trouble may be looked for.

Death of General Long.

Brigadier General Eli Long, an officer of the Civil War, died in the Presbyterian Hospital, New York, following an operation. His body was brought to his home, in Plainfield, where the funeral took place. Besides a widow, he leaves five children. Though several times wounded while leading charges, he served throughout the Rebellion and won the [illegible] was graduated from a military school [illegible] Frankfort, in that State. He made [illegible] record in the expedition against [illegible] epennes, and at the outbreak of [illegible] ebellion was a second lieutenant of [illegible]. He distinguished himself by [illegible] g a company of rebels heading [illegible] ouri, while he was stationed at [illegible] n. Later he was promoted first [illegible] d then to a captaincy. He [illegible] eral Buell at Louisville. [illegible] eral Rosecrans at Stone [illegible] was seriously wounded wh[illegible] arge in December, 1862. [illegible] mendation of Generals Rosecrans and Sherman, he was made colonel of the 4th Ohio Volunteer Ca[illegible] by Secretary Stanton.

[illegible] battle of Chickamauga, Mac[illegible] and Framingham, he took an [illegible], being wounded in the last [illegible] gements. He subsequently de[illegible] ed the Knoxville and Chattanooga [illegible] road and joined Sherman at Knox[illegible]lle, Tenn. Later he routed General "Joe" Wheeler at Calhoun and defeated General Roddy at Moulton, Ala. He was again wounded seriously at Lovejoy. In August, 1864, he was brevetted brigadier general of volunteers. Before the close of the war he was again wounded in the head. In March, 1865, the government brevetted him major general of volunteers. He was reduced to the rank of brigadier general by the act of March 3, 1873. He was retired after the close of the rebellion.

Fish on Tap at Trenton.

All that the inmates of Lincoln Building, Trenton, have to do when they want fish is to turn their water faucets, and out come the fish. Word came to the owner of the building that the water was not running on the third floor. He went to investigate and sure enough there was not a drop of water to come out of the faucet. Inquiry was made on the other floors and water was reported running all right. A plumber was sent for. Before he arrived a complaint arrived that the water had stopped running on the second floor. The investigation here led to some one going on the third floor and he returned saying that the water had commenced to flow there. Soon word came that the water had been shut off on the first floor. It seemed to be a case of spooks. The plumber's investigation [illegible] matters. He found an eel [illegible] inches long in the water pipe [illegible] oving about caused the shutting [illegible] rning on of the water on the [illegible] oors. A week before one of the [illegible] found a two inch fish in a glass [illegible] drawn from a faucet in his office.

[illegible] Scott, an employe of undertak[illegible] DeMott, of Somerset street, [illegible] is home, on East Third street, [illegible] evening. Funeral will be [illegible] noarow.

HIGH SCHOOL NOTES.

Fun and Facts by One Who Knows.

School reopened on Monday after two weeks of Christmas vacation.

On New Years Day the Hockey Team played its first two games with the Orange Field Club, defeating them in both by the scores of 6 to 1 and 3 to 1.

Oscar Crite, '01, is studying in the Medical Department of Cornell University.

Ed. George has started to book games for next season's baseball team.

The baseball candidates will be called out as early as possible this year.

George Conover has left school and is trying to do the sporting act.

The hockey game with the Orange Field Club which was to have been played today was cancelled by the O. F. C. management on account of disbandment.

Ed. Adams has just returned from Chicago and is telling what a fine time he had.

Handford Miller is sporting a new pair of gloves.

Harold Hegamen is attending the Chester (Pa.) Military Academy.

Ernest Powlison must be burning a lot of midnight oil these days

"How to play Third Base." by Handford Miller, formerly of the local nine.—Squedunck Gazette.

Shorty Martin is still wearing that same old cap that he bought three years ago.

"Bug" Hamilton has given up teasing Gyp.

Lucky Webster is growing a lot of brush on the side of his face.

Miss Ella Pearson is taking a Post Graduate course in the High School.

Ray Stevens is still trotting down to Westfield after he has finished his work.

Leonard Mantz must have the Hen that laid the Golden Egg. He is sporting [illegible] of Bob Hand's horse medicine to wake him up.

Ed Adams is still wearing that Ping Pong walk of his.

Pete Emmons has been named "Pete the Ripper," he is at his old game of ripping.

John McCullough says he is raisiug the dickens in the Eighth Grade, but we doubt him.

Ed George is still eating the fudge that was sent to him by a member of the Plainfield High School.

Otto Muelk still has a large number of his stale jokes left. They are for sale.

Frank James has turned out to be a quite respectable citizen, instead of a pirate which was his choice.

The prospects for a good baseball team are unusually bright. Five members of last year's team are yet in school: Owens, Humble, Armstrong, Adams and Emmons. These with the large amount of new material will undoubtedly make a fine team.

The Firm of Heath & Ward, Infant Astronomers, are doing quite a business with their milk from the milky way.

Arthur Humble is wearing a new necktie.

Marshall Ward has taken to wearing a pair of new trousers. He has forgotten to use his Shakespearian vocabulary lately.

Deacon Brokaw is attending Mr. Leal's school.

Hollis Powers is working in New York.

Grover Kipsey is giving quite some attention to the girls.

Nellie Bauersachs is attending the State Normal School.

Wesley Messersmith is a draughtsman in Singer Manufacturing Company's establishment at Elizabethport.

Elmer Acker has accepted a position in New York.

Edward Overton, '02, is working in New York.

Harry Woodland is a clerk in Woolston and Buckles paint store.

To shave your face and brush your hair,
And then your new, best suit to wear—
That's preparation.

And then upon a car to ride,
A mile or two to walk beside—
That's transportation.

And then before the door to smile,
And thank you'll stay a good long while—
That's expectation.

And then to find her not at home,
And homeward you will have to roam—
That's thunderation.

—*Ex.* (*Olla Podrida.*)

Mrs. C. Monteith has been sworn in as postmistress at Stirling, N. J., succeeding J. Ruegg, who was appointed by the late President McKinley.

PRESIDENT'S TRUST POLICY

The Attitude of the Administration Officially Voiced.

LEGISLATION IS RECOMMENDED

It is Urged That All Discriminatory Practices Affecting Interstate Trade Be Made Offenses to Be Enjoined and Punished—The Formation of a Trust Commission Suggested—Official Statement.

Washington, D. C.—President Roosevelt has made an official declaration as to what he wishes in the way of anti-trust legislation.

The following abstract of Attorney-General Knox's recommendations regarding trusts and combinations, which were made public at some length, was given out at the White House. It represents the general attitude of the Administration on this subject, and was authorized by the President. It is as follows:

"Preliminary—The people do not desire the business of the country to be interfered with beyond the regulation necessary to control combinations where they act improperly and to correct any tendency toward monopoly. In this country, where money is cheap and abundant and within the reach of keen and capable men, monopoly will be impossible if competition is kept free.

"Small enterprises have certain advantages over large combinations, and will live and thrive if assured of all open and fair field. Rebates and discriminatory rates constitute one of the chief restrictions on competition. They unjustly swell the earnings of favored concerns, and, supporting a vast volume of capital stock which represents nothing but unfair advantage over rivals, contribute largely to the upbuilding of monopoly.

"Individual industrial experience, with the certainty of securing employment of capital, may be trusted to compete effectively with such selfish combinations as are not formed for sound economic reasons, but merely in order to capitalize the country's prosperity for the benefit of their promoters. The existence of most of these combinations has not increased the productive capacity of the country; they have merely acquired the ownership of pre-existing industries.

"Recommendations for immediate legislation—That all discriminatory practices affecting interstate trade be made offenses to be enjoined and punished.

"Such legislation to be directed alike against those who give and those who receive illegal advantages and to cover discrimination in prices as against competitors in particular localities resorted to for the purpose of destroying competition.

"In order to [illegible] merely beyond national control, a penalty should be imposed upon the interstate and foreign transportation of goods produced by them, and Federal courts should be given power to restrain such transportation at the Government's suit.

"Such legislation is necessary because the existing interstate commerce law does not give an effective remedy in this class of cases against either shipper or carrier.

"The casus omissus in the interstate commerce should now be supplied by imposing a penalty upon carrier and beneficiary alike, and by giving to the courts the right to restrain all such infractions of the law.

"Provision should also be made to reach corporations and combinations which produce wholly within a State, but whose products enter interstate commerce. This provision should relate, first, to concerns which fatten on rebates; second, to concerns which sell commodities below the general price in particular localities or in any other way in particular localities seek to destroy competition.

"There should be a comprehensive plan to enable the Government to get at all the facts bearing upon the organization and practices of concerns engaged in interstate commerce, not with a view to hampering any legitimate business or such concerns, but in order to be in position to take action if necessary.

"To this end a commission or a special bureau in the proposed Department of Commerce should be created, whose duty it should be to investigate the operations of concerns engaged in interstate or foreign commerce, and to gather information and data enabling it to make recommendations for additional legislation to report to the President.

"This would be a first step in securing proper publicity. This commission should have authority to inquire into the management of any concern doing an interstate business whenever it becomes necessary or desirable; it should have the authority to call for reports from them, to compel testimony from all witnesses and by the production of books, papers, etc.

"These recommendations are based on the central thought that the first step should be taken by a law aimed at what are certainly known to be unreasonable practices directly restrictive of freedom of commerce, and by a law securing some governmental supervision, as outlined above. A special act should be passed at once to speed the final decision of cases pending or to be raised under the present anti-trust law, providing for the hearing of such cases by a full bench of Circuit Judges, and for a direct appeal from the Circuit Courts to the Supreme Court of the United States."

Servian King's Papers Stolen.

There is great excitement at Nish, where the Servian Court is staying, owing to the fact that the notes which King Alexander made in regard to the mission of Count Lansdorff, the Russian Minister of Foreign Affairs, have been stolen from his writing table.

Detroit Buys Coal For the Poor.

Mayor Maybury, of Detroit, Mich., has approved a resolution of the Council providing for the purchase by the city of 850,000 worth of coal, which will be sold to citizens at cost.

Mayor Vetoes Increase in His Salary.

Mayor Edward F. Fletcher, of Worcester, Mass., has vetoed the order increasing the salary of the Mayor from $2500 to $4000. He holds that the performance of public duty is not a matter of dollars and cents, and that the salary of the office of Mayor should not be large enough to be tempting as a money prize.

Another German Cruiser to Venezuela.

The cruiser Sperber has sailed from Kiel to reinforce the German squadron in Venezuelan waters.

SENATOR HOAR ON TRUSTS.

He Makes His Speech in Explanation of His Trust Bill.

Washington, D. C.—In the Senate Senator Hoar made his promised speech in explanation of the elaborate Trust bill which he introduced. Although taking his bill as the text of his remarks, the Senator admitted that it was imperfect, being tentative and experimental in character.

Mr. Hoar pointed out the following evils of trusts:

Destruction of competition.

The management of local industries by absentees in the interest of absentee capital.

Fraudulent capitalization.

Secrecy.

Management for the private benefit of officials.

The power to corrupt elections, and in some cases to corrupt the courts.

The absence of personal liability for contracts of wrong-doing.

The proposed Hoar bill provided in general for only such regulations of trusts by the Federal Government as were familiar in the legislation of all well-ordered States. These regulations were:

Publicity in the conduct of their business.

Power to stop their business altogether if they violate the laws.

Strict penalties on their officers for violation of laws.

Personal liability for debts and wrongs.

GENERAL STAFF BILL PASSED.

House Votes to Create a New Corps in the Army.

Washington, D. C.—The House has passed the bill for the creation of a General Staff for the Army by a vote of 153 to 52. By the terms of the bill it becomes the duty of the General Staff to prepare plans for the national defense and for the mobilization of the army in time of war, to investigate and report on all questions affecting the efficiency of the service, and to render professional aid to the Secretary of War and to general officers and other superior commanders.

The bill also provides that the Chief of Staff, under the direction of the President, shall have supervision of all troops of the line, and of the Adjutant-General's, Inspector-General's, Judge Advocate's, Quartermaster's, Subsistence, Medical, Pay and Ordnance departments, the Corps of Engineers and the Signal Corps.

YOUNG HUNTER ACQUITTED.

Minister's Son Who Killed an American in Guatemala Goes Free.

New Orleans, La.—A letter received here from W. Godfrey Hunter, son of the former Minister to Guatemala and Honduras, whose shooting at Guatemala City of William Fitzgerald, an American and Chief of the Secret Service of Guatemala, caused international complications to arise, announces his trial and acquittal.

Young Hunter says that a conspiracy was laid against his life, in which several [illegible] who, he says, stated publicly that Hunter should not leave Guatemala alive. He asserts that thirty-six witnesses testified under oath to having heard Consul-General McNally make the statement.

CARNEGIE PRESENTS $1,500,000.

Philadelphia Gets It For Thirty Libraries—Some Opposition Expected in Councils.

Philadelphia, Pa.—Andrew Carnegie has offered $1,500,000 to the free library of Philadelphia to establish thirty branch libraries in this city. The conditions attached to the gift are that $50,000 is to be expended for the erection of each building, the sites to be provided by Philadelphia or by private individuals. The branches are to be equipped by the city and a provision of an annual appropriation of $5000 is to be made by the municipality for the maintenance of each branch. A number of sites have already been offered. Councils, by an unwillingness to do its share, however, may block the scheme. The thirty libraries would cost the city $150,000 a year to maintain.

AGED COUPLE TORTURED.

Husband Ninety-five Years Old and Wife Eighty-five Made to Give Up $235.

Connellsville, Pa.—Seven masked men broke into the house of Levi Eicher and tortured him and his wife to make them confess where they kept their money. The Eichers live in an isolated spot on Laurel Mountain. Levi is ninety-five years old and his wife is eighty-five.

The men knocked the aged man senseless with an iron bar, bound his wife and held her feet over a burning lamp. Mr. Eicher became conscious and was bound. He told his wife to tell where the money was. The thieves got $235 in gold, stole a horse and wagon from the barn and drove toward Connellsville. The team was found in the morning on the road.

RICH MAN WEDS SECRETARY.

W. H. Bradley, Worth $40,000,000, Marries While Stricken With Fatal Illness.

Milwaukee, Wis.—While sitting in a chair with what was believed to be a fatal illness, William H. Bradley, the wealthiest man in Wisconsin, was married to his secretary, Miss Mary Hannemeyer. The former Mrs. Bradley died on November 13 last. Mr. Bradley is said to be worth $40,000,000 and is associated with J. J. Hill in many railroad deals in this part of the country.

Judge Halsey went to Mr. Bradley's house and in the presence of a few relatives united the lumberman and his bride. His friends refused to discuss his illness, but it was said he could not recover. He is sixty-six years old.

SENOR SAGASTA IS DEAD

Famous Leader of the Spanish Liberals Suddenly Passes Away.

THE KING PROFOUNDLY GRIEVED

Etiquette Barred the Monarch From Paying a Visit to His Sick Adviser—Senor Sagasta Was Prime Minister During the Spanish-American War—He Had a Stormy Political Career.

Madrid, Spain.—Former Premier Sagasta died after an illness of only a few days, suffering from bronchitis, complicated by a gastric trouble.

Sagasta's intellect was unimpaired until his last hours. He talked to his daughter, the Presidents of the Senate and of Congress and to the Archbishop of Toledo. His family was with him when he died.

Senor Sagasta's death created a painful impression throughout Madrid. King Alfonso displayed profound regret when he heard the news. His Majesty had desired to visit Senor Sagasta during his illness, but was told that to do so would be contrary to etiquette.

Senor Sagasta was seventy-six years old. He was born in Logrono, Spain, and was educated in the College of Engineers. The first notoriety he gained was in 1856, when he fought O'Donnell in the streets of Madrid at the head of a regiment of militia. His

SENOR SAGASTA.

[illegible] were killed and he fled. In his absence he was condemned to death. For the next ten years he lived in [illegible] which ended in driving Isabella from the throne. When Topete [illegible] fleet had been won over [illegible] army had been [illegible] of the insurrection [illegible] was given. Sagasta and [illegible] who was a pure a patriot as [illegible] fired, but too honest and consistent to be a successful Spanish politician, sailed under [illegible] names in the steamship Delta from London to Gibraltar early in September of that year. They were accompanied by another compatriot, Prim, dressed in the livery of a servant. Their subsequent conquests are now history.

General Weyler and Sagasta became bitter enemies early in life. The two men clashed for years, and Sagasta dismissed Weyler and put Blanco in his place as Captain-General of Cuba.

Of all the Prime Ministers Spain has had it is undoubtedly true Sagasta was the most merciless. He was quite as unpopular with Americans as is Weyler, "the butcher."

Sagasta, after Spain had been defeated in Cuba in the war with the United States in 1898, tried his utmost to obtain a delay in the final negotiations for peace in the hope that the European powers would intervene in behalf of Spain at the eleventh hour. Sagasta always had an unfailing belief in "manana"—to-morrow. He believed that time gained was always half way to victory.

More like a parent was Sagasta to the boy King Alfonso XIII.—than his chief adviser. They were inseparable. Nothing could have been more charming than the fondness which existed between them, and it was only a few years ago that the youthful King used to climb on the old statesman's knee to play with his eye-glasses. Several times when Sagasta had differences with the Queen he deliberately resigned, and bade her trust the direction of affairs to Canovas, whom he said Sagasta was a Grand Master of Freemasonry in Spain.

His true character might have been clearly read in this way: An [illegible] by training, a soldier by profession, a journalist by profession, a politician by circumstances and a Premier by [illegible] fortune.

SULTAN'S RUSE SUCCEEDS.

Release of His Brother Brings Out Strict Tribes to His Support.

Tangier, Morocco.—The Sultan's brother, who by his Majesty's order was released from prison a few days ago and had all the honors due to his rank restored to him, has been appointed Governor of the Province of Fez. When this fact became known to the tribes in the Fez district they rallied to the Sultan, swearing to support him against the pretender. This, it is believed, has removed the danger of an attack by the rebels upon Fez.

TEMPTED BY A JEWEL EXHIBIT.

Pathan Thieves Try to Steal the Cut Display at the Delhi Exhibition.

Delhi, India.—A group of Pathan thieves attempted to rob the room at the Arts Exhibition [illegible] gems exceeding in value $1,250,000 are displayed. The attempt was made in daylight, but the police and [illegible] officials frustrated the raid.

The Pathans resisted arrest and a [illegible] ensued. They were finally [illegible] Nobody was seriously hurt.

PRESIDENT ON CARNEGIE

Roosevelt Speaks at Dedication of Washington Public Library.

Donor Says He Has Applications For Over 800 Libraries, Most of Which Will Be Granted.

Washington, D. C.—"I am in the library manufacturing business," said Andrew Carnegie at the dedication of the Washington Public Library.

Mr. Carnegie after the dedication said that he was so well pleased with the new library and the use made of his gift of $350,000 and the provision for the support of the library that he would donate another $350,000 for the erection of branch libraries on the same condition as the original gift, namely, that the city provide the sites and arrange for the support of the libraries.

Mr. Carnegie said that he had given, chiefly within the last two years, 730 library buildings. In the month of July last, 276 applications were received by him from all parts of the English-speaking world. When he arrived in New York last month from Europe he found awaiting him applications for 450 additional buildings. Today he has on hand 385 new applications, making in all under consideration now more than 800, "the great majority of which," he said, "will no doubt be given."

Mr. Carnegie said no success in life came without concentration, and he begged to be permitted to continue to concentrate his mind on the library business. He said it was not a charity, he was merely helping people to help themselves. He paid a tribute to Theodore Roosevelt, who was present, both as President and as an author.

Mr. Roosevelt thanked Mr. Carnegie for his gift. He said it was "equally far from the two prime vices of our civilization—hardness of heart and softness of head." Continuing, the President said:

"Mr. Carnegie, neither you nor any one else can make a man wise or cultivated. All you can do is to give him a chance to add to his own wisdom or to his own cultivation. The only philanthropic work that counts in the long run is the work that helps a man to help himself. The men who will submit or demand to be carried isn't worth anything."

The library building is a beautiful white marble structure occupying the centre of Mount Vernon square, in the very heart of Washington. For its construction Mr. Carnegie gave $350,000, and as an architectural ornament to the capital it is quite equal to the Government buildings. A throng of distinguished persons attended the dedication ceremonies.

COACHMAN KILLS A BABY.

Crime and Suicide [illegible]

[illegible] daughter of Mr. and Mrs. [illegible] residents of the Corcoran [illegible] this city, was murdered [illegible] of her parents by a coachman who had been in the employ of Mr. Finlay. Robert King, the murderer, after he had almost severed the child's head, went into another room and shot himself in the head. The murderer and the child were alive when the neighbors and police entered the house, but died soon afterward. According to testimony at the Coroner's inquest the coachman had been very fond of the child.

King had been forcing his attentions on Lizzie Hannen, who had been employed for several years by Mrs. Finlay as a nurse for Marion, and, therefore, he was discharged about four months ago. Frederick Sutherland taking his place. King continued to visit the nurse, and they had several quarrels. He had proposed marriage to her several times, and she had positively refused him. It is believed that he went into the house to kill the girl, but not finding her took his revenge by killing the baby, whom he found asleep in a room, and then shot himself dead.

Mr. Finlay is one of the managers in a department store in New York City, and he received there the news of the death of his daughter, but the details were not related to him until after he returned here on the 11 o'clock train.

SEVEN KILLED IN COLLISION.

Freight Train Struck by a Passenger Train Near Duquesne, Pa.

Pittsburg, Pa.—As a result of a collision between a passenger train and a freight train on the Monongahela Division of the Pennsylvania Railroad at Cochrane station, just above Duquesne, seven men are dead, one is dying and five others are injured.

The passenger train was the West Elizabeth accommodation, which left Pittsburg at 3.20 p. m. It was on time and, according to the signals displayed, had a clear track. At the siding at Cochrane it ran into the rear car of an extra freight train which had taken the switch, but failed to clear the main line.

The officials of the railroad attribute the disaster to the failure of Patrick Quinn, the rear brakeman of the freight train, to see that his train had fully cleared. Quinn has disappeared.

The caboose of the freight train overlapped the main track sufficiently to catch the tender of the passenger engine which was forced back upon the combination baggage and smoking car. The thirteen passengers were jammed against the rear end of the car.

Fire from the stove in the smoking car communicated to the wreckage, and the imprisoned victims were badly burned. James Stewart and four foreigners were the passengers who were killed. The baggagemaster and a brakeman also died.

Devery's Removal Sustained by Court.

The Court of Appeals at Albany, N. Y., has handed down decisions affirming the constitutionality of the Police Reorganization Law of 1901, which legislated out of office the "Bipartisan" Police Commission of New York City, and W. S. Devery, then Chief of Police. The court affirmed the judgment of the court below in the action of Devery to secure reinstatement as Chief of Police of New York City. The decision of the court sustains the removal of Devery from office.

MEAT PACKERS GUILTY

Commissioner Says the Existence of the Beef Trust is Proved.

The Testimony Introduced by the Missouri Attorney-General in Ouster Proceedings is Sustained.

Jefferson City, Mo.—I. H. Kinley, the Special Commissioner who was appointed by the State Supreme Court to take testimony in the ouster suit of Attorney-General Crow against the meat packers for violation of the anti-trust laws, has filed his report of the facts as developed from the testimony taken.

The Commissioner finds the companies guilty of fixing and maintaining prices, but says the contention of the Attorney-General that impure meat was sold is not sustained. Mr. Crow announced that he would file an exception to the report on that point. The case will be heard on the report on January 26.

The Commissioner states that he finds "that the Armour, Hammond, Swift and Cudahy Packing companies, with Nelson Morris & Co., at St. Joseph, between August 21, 1899, and May 9, 1902, by their managers and agents, who had charge of their coolers, entered into an agreement, confederation, combination and understanding between themselves and with each other to fix, regulate and control the prices of dressed beef and fresh pork."

He also finds that the managers and solicitors of the companies would advise their customers that they had better purchase dressed beef before certain times as the price would be advanced on a certain day, and that the price for such beef and fresh pork would be advanced on that day.

It was proven in many instances, the report states, that the cooler managers and agents of the dressed beef companies to secure trade or induce purchasers would agree to give rebates in money or in pounds of meat. In the latter instance the bills for such meat would be made out to the butcher at the fixed price, and subsequently the rebates were given, as agreed, and the purchaser requested to maintain secrecy in regard to them.

In one or two instances where it was discovered that rebates had been given by one of the companies, the solicitors of the company were proven to have stated in conversation with a customer that it would cause the company which he represented to be fined.

It was also shown, says the report, that when meat had been hanging a certain length of time in the coolers, [illegible] conceded by some person, seemingly to have authority among the packers, that the beef might be sold at less than the fixed or agreed price. All of these facts declares the Commissioner [illegible]

[illegible] beef to the butchers were [illegible] these cooler managers for the companies.

The report, therefore, finds that the Armour Packing Company, Nelson Morris & Co., Swift & Co., the Hammond Packing Company, the Cudahy Packing Company and the Schwartzchild & Sulzberger Company are guilty of entering into an agreement to fix and maintain prices for the sale of dressed beef and pork in Missouri.

The Henry Krug Packing Company, of St. Joseph, was found not to have been in the combination, and consequently the report will release it from legal proceedings.

BANK PRESIDENT A SUICIDE.

Head of Silverton (Col.) Institution Found Dead in the Woods.

Silverton, Col.—James H. Robbin, the missing president of the Bank of Silverton, which was closed on account of his disappearance, was found dead in the woods three miles from town. He had shot himself in the head. It is supposed financial troubles caused him to commit suicide. He was about forty-five years old and leaves a wife and three children in Denver.

Mr. Robbin was principal owner of the Iowa-Tiger mine and chief promoter of the Scamp Bird Extension Company, and was heavily interested in many mining ventures. He was reputed to be worth $5,000,000.

The liabilities of the bank are said to be about $300,000; assets unknown. It is generally believed the bank is in sound condition.

OIL TRUST TO PAY PENSIONS.

Half Salary For One Year and One-Quarter Afterward.

New York City.—The Standard Oil Company has inaugurated a pension system. Under its provisions any employe of the company who has been in the service for twenty-five years, and who has reached the age of sixty-four, may retire on half pay for the first year. After that he will draw one-quarter the amount of his salary at retirement.

The plan applies to every employe of the Oil Trust, from laborer to President. One of the higher officers is said to have notified the company of his intention to take advantage of the plan, and a number of others are expected to do so in the near future.

Punishes a Southern Town.

President Roosevelt has directed that the postoffice at Indianola, Miss., be closed, not to be reopened until the people in that district are ready to accept as postmaster Mrs. Minnie M. Cox, colored. The President has also directed that the Attorney-General proceed against certain residents of that town, who have, it is alleged, made threats against Mrs. Cox.

Dumb Girl Speaks at Death.

Miss Clara Ware, aged ten, died in Madison County, Tenn. Miss Ware was deaf and dumb and was never known to have uttered an intelligible word until a few hours before her death, when she called upon members of the family to come to her.

Nordau in a Prophetic Mood.

M. Max Nordau, in a historical review, deplores the growth of militarism in America, and predicts a great struggle for the Pacific Ocean and Eastern Asia.

GIRL OPENED A JAIL

Love-Stricken Sheriff's Daughter Liberated Prisoners and Eloped.

Young Woman Always Had Borne an Excellent Reputation—Case Similar to That of the Biddle Brothers.

Oneonta, Ala.—Some time during the night Miss Etta Aldbridge, daughter of the Sheriff of Blouty County, unlocked the jail and liberated two prisoners, Louis Gurley, charged with murder, and Mayburn Murphree, held on a sentence involving his promise to marry a girl.

Miss Etta accompanied the prisoners in their flight, or at least one of them. The cause of her act is supposed to be love of Mayburn Murphree, who is an exceedingly handsome man of good address. For some months he had been an inmate of the jail, and it had been noticed that the comely daughter of the Sheriff often lingered at the bars to talk to him.

A few nights ago the Sheriff was away in the country on business. His daughter, Miss Etta, had charge of the keys. She retired as usual to sleep with a younger sister. About 4 o'clock in the morning the little girl awoke and missing Etta gave the alarm. Investigation showed that two of the four prisoners in the jail had escaped.

Miss Etta was not to be found and then the full significance of the conversation through the bars with Mayburn Murphree became apparent.

Notice to apprehend the fugitives has been telegraphed to the various towns and cities of Alabama.

Louis Gurley, charged with murder, who was the beneficiary of the Sheriff's daughter's love for Murphree, is accused of one of the most brutal crimes in the history of Oneonta. About a year ago the dead body of Mrs. Vaughan, an old woman, was found in her residence one morning weltering in her own blood. The head had been scalped and the body bore evidence of brutal mutilation.

Charged with her murder Gurley was arrested and his case is pending trial. Mayburn Murphree, the attractive prisoner, who seems to have bewitched the fair keeper of the jail, had already been convicted and fined $700. His case was appealed to the Supreme Court, where it is now pending.

Miss Etta Aldridge is twenty-two years old and a handsome woman. She has borne an excellent reputation and enjoyed the admiration of a large circle of acquaintances. It was thought that Murphree and the girl were making for some town where they could get married and then go to Texas.

There were four prisoners in the jail at the time of the escape, but Murphree and Gurley departed so quietly that the other two were not aroused. The [illegible] Mrs. Boyer, the wife of the Pennsylvania Sheriff, who liberated the Biddle brothers last spring.

PLAGUE PANIC IN MEXICO.

Scientists Dispel All Doubt as to Character of the Disease.

Mazatlan, Mexico.—There is no longer the slightest doubt that the disease now afflicting this city is genuine Asiatic plague, for microscopic investigation proves that bubonic pest bacilli are in the blood of those afflicted with the disease.

The plague has grown virulent and the people are fleeing from the city at the rate of 300 per day. More than fifty per cent. of the persons attacked are women. The news of the recrudescence of the plague here has reached the interior, and is causing a panic. Sanitary cordons of armed men have been placed around the towns to prevent the entrance of any one from this place.

PLAGUE NOT IN CALIFORNIA.

Surgeon-General Wyman Returns With Reassuring Reports.

Washington, D. C.—Surgeon-General Wyman, of the Marine Hospital Service, has returned from California, where he went to investigate the alleged existence of bubonic plague in San Francisco. The trip of General Wyman was undertaken because of the attitude of several States, which insisted upon a conference of the State Boards of Health being called to decide whether there should be a general quarantine against California, that State taking the ground that there is no bubonic plague in San Francisco.

General Wyman, after investigating the matter for himself, is of the opinion that there is no need for such a conference.

CIGARETTE CAUSED HIS DEATH.

Miner Threw It Carelessly Into a Keg of Powder.

Williamsport, Pa.—Michael Dunn, a miner, threw a cigarette stump into a keg of powder from his bed on the second floor of a boarding house at Winber. The upper part of the house was destroyed and Dunn was burned to death.

The house was occupied by four families and twenty boarders, all the men being miners. There were twenty-six kegs of powder in the house. Several men who were working near by rushed to the house and rescued [illegible] One of the men carried of powder out of the burning

Newfoundland's Revenue Grows.

The revenue of Newfoundland for last year was the largest on record. It reached a total of $1,200,000, being $20,000 in excess of receipts for the corresponding period of 1901.

Cattle Disease Stamped Out.

The Cattle Bureau of the Massachusetts Board of Agriculture expressed its belief that the foot and mouth disease is now fully under control from the fact that no new case had been found or no additional premises had been quarantined for a week.

New Chinese Minister to Marry.

Sir Laing Cheng, the new Chinese Minister to the United States, will before starting for his post marry the daughter of the Chinese Minister at Paris, Yu Keng.

350364

AP SHOTS IN THE FAROE ISLANDS.

By Mrs. L. F. K. von Thiele.

W[illegible]ew people in England [illegible] to have any idea where [illegible]aroe Islands are situated, [illegible]ugh they are, without doub[illegible] of the most interesting islan[illegible]rope. Being only thirty-six h[illegible]rney from England, they are v[illegible]h a visit. The islanders, being [illegible] from the rest of the wo[illegible]ring only among themselv[illegible]toms which must at one [illegible] universal in the Nort[illegible]hich have gradually

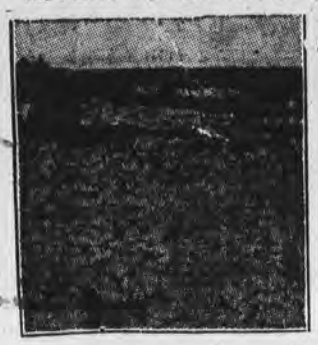
Th[illegible]gnificent—wild [illegible] of feet high[illegible]t while [illegible]dashes furi[illegible]scipitous [illegible]ing the appe[illegible]f terraces r[illegible] the [illegible]overed with gra[illegible]utiful waterfa[illegible] stre[illegible]d-locked fjords, and fish[illegible]es nestling in the hol[illegible]—a[illegible]e in kaleidoscopic variety to charm and arrest the eye by their novelty and beauty.

So narrow are many of the channels through which our steamer passed that we could almost touch the cliffs on either hand. Some of the islands are uninhabited except for the sheep grazing on the short, thick herbage, and these become so wild that they have to be stalked and shot like game. On some of the islets you may see a solitary farmhouse perched aloft on a height like an eagle's eyrie. Many of the farmers with their families live on these wild, inaccessible spots year in, year out, never seeing a human face except for the yearly visit of the priest, who comes to baptize any children born in the preceding twelve months, or in the spring and autumn when a fine day presents itself and the sea calms down sufficiently to allow of a boat being lowered to carry the sheep to the capital in exchange for the necessaries of life.

There was scarcely a ripple on the water, the blue of the sky reflecting itself in the deeper blue of the sea, as we came to anchor in the spacious bay on the southeast of Stromo, with the houses of Thorshavn, the capital of the islands, clustered irregularly on the hills around, looking as if a good push would send them tumbling down into the harbor. Farther on these hills give place to lofty cliffs rising to a height of 1000 feet, and covered with green grass, with here and there gray ridges of stone cropping through. Nowhere can one discover trees of any sort, not even a bush or shrub, but in spite of this there is no monotony in the scenery, for the variety of coloring and form of the islands and the brilliant atmosphere more than compensate for their absence. The whole harbor was alive with the long, narrow boats of the Faroese, their gunwales rising high out of the water and the slender oars flashing in the sunshine as they dipped in and out, the fine, well-knit forms of their occupants silhouetted against the sky as they propelled their craft with vigorous strokes towards our ship, keeping time by chanting a wild saga, whose haunting melody pursued us long after the singers had passed out of sight.

HARBOR.

The Faroese are magnificent fellows,



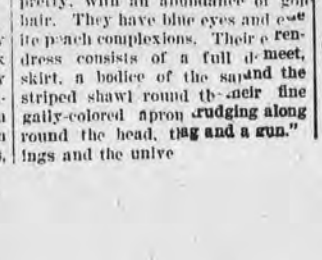
"WE SAW WHAT WE TOOK TO BE IMMENSE QUANTITIES OF LINEN"—AS A MATTER OF FACT IT WAS FISH LYING IN THE SUN TO DRY.

with [illegible]e eyes, corn-ripe yellow hair, [illegible] complexions, and thick beard[illegible]heir dress is particularly becoming. [illegible]eir short trousers, reaching [illegible]e, are made of homespun [illegible] by the Faroese women [illegible] long winter evenings, adorned with several brass buttons, a short woolen coat fastened down in front with buttons, striped cloth square jelly-bag cap, generally red and blue,

A VIEW OF THORSHAVN—THESE LITTLE WATERCOURSES ARE USED FOR A VARIETY OF PURPOSES.

gray stockings as thick as cloth, and shoes of yellow tanned skins resembling moccasins, formed from a single piece of skin wrapped closely round each foot, gathered at the top and heel by stitches which give them a puckered-up appearance, and fastened round the ankles with a bright-colored woolen string, furnishing a costume which is both picturesque and practical. All the men carry a grinda knivur, a knife for killing whales, stuck in a leather girdle round their waist.

As we were being rowed ashore we saw what we took to be immense quantities of linen lying out on the rocks to dry; in fact, the whole town seemed to have chosen the day of our arrival as its washing day. The curi-



THE CURIOUS LITTLE PARLIAMENT HOUSE

ous part of the whole affair was the size of the articles. They looked too large for handkerchiefs and yet too small for sheets. What could they be? When we got closer, however, we discovered that it was not washing, but codfish, drying in the sunshine; and everywhere we went we came across cod in various shapes and forms, either being washed or dried, or piled up in great stacks covered with tarpaulins, waiting to be transported to the South of Europe as stock fish.

The town is most picturesque and quaint. The houses are of all sizes and shapes, planted down higgledy-piggledy wherever a few square yards of comparatively level ground can be found among the rocks; and so mixed up are the houses and rocks that it is often very difficult to discriminate between the two. This resemblance is further heightened by the nature of the houses themselves, for they are mostly hewn out of the rocks or have a foundation of unhewn stone, on which is placed a wooden hut from one to two stories high, thatched with turf, where brilliant emerald-green grass grows in great luxuriance, and is used as a browsing ground for the goats and sheep of the neighborhood. The windows are of glass, neatly hung with lace curtains and adorned with flowering plants.

The Faroese women are remarkably pretty, with an abundance of gold hair. They have blue eyes and delicate peach complexions. Their every-day dress consists of a full dark woolen skirt, a bodice of the same material and the striped shawl round the shoulders, their fine gaily-colored aprons trudging along round the head, the bag and a gun." lings and the unlive

Our first visit was to the church, a wooden building of fairly large dimensions, with plain exterior and narrow windows ranged on either side, the only outside ornament being a wooden spire with a globe on top, the whole structure reminding one irresistibly of a toy Noah's Ark.

Running through the town are several little streams flowing over large blocks of stone lying in irregular masses at the bottom. The water comes down from the hills in great force and strength, and after a heavy rainfall the channels are filled up to the brim and overflow their banks, carrying away all obstacles. They seem to be used for many purposes—for the supply of drinking water and for laundry work, besides being the favorite feeding-place of the ducks. As we passed by we noticed a little girl helping her mother to wash the clothes; they knelt on the ground beside the stream, holding the articles to be cleansed in the water with one hand, while with the other they beat them with a wooden clapper, something like a cricket bat.

We next went to the Parliament House, which, although open, was not in session, so we didn't hear a debate. The Faroese are certainly most economical in the way they house their worthy representatives, for the august chamber consists of one small room with six long benches at one end, taking up the whole width of the room. These were evidently for the Ministers and officials, the rest of the members seemingly having to content themselves with standing in the body of the hall. The only ornamentation is a fine crystal chandelier, a print of the King of Denmark, and a Royal coat of arms. The Faroese are also economical in the payment of their members, who receive two kroner (about fifty-five cents) per day for six weeks, the time the Parliament is in session.

The Faroe Islands were once captured by the English in the commencement of the nineteenth century. I say "captured," although, as a matter of fact, there was very little capturing about it. When England and Denmark were at war a ship was sent to seize the Faroes, and when it arrived—the guns at the tiny little fort evidently not having considered it necessary to take any notice—the captain went on shore and interviewed the Governor, asking him which he preferred, to be annexed or bombarded. The Governor never hesitated for a moment. He said that if the English had taken such a violent fancy to the Faroes they were quite welcome to have them; but of one thing he was quite sure—he didn't want any bombarding. So the islands were duly annexed, and the man-o'-war sailed off. Some time after, when peace was declared between the two [illegible] philosophically, evidently thinking all foreigners were mad and the English the maddest of all.

On our way back to the ship we passed several patches of potatoes and barley and women busy making hay. Under the eaves of the cottages hung disgusting-looking strips of flesh, a few inches in width and several feet in length, the inside purple red and covered with what appeared to be scaly black leather. They turned out to be strips of whale's flesh drying in the sun ready for winter consumption.

The week before there had been a big catch of whales numbering several hundreds, the harbor at Thorshavn being filled with the great fish brought from the place where they had been caught to furnish meat for the community. When fresh the flesh is described as being delicious—a cross between tender beefsteak and liver—but after it has been kept some time [illegible]mes anything but palatable to [illegible]ers, although the Faroese delight in it. The whales average from [illegible] feet to thirty feet in length [illegible]gh over a ton.

Faroese are most generous in [illegible]ealings with those less fortunate [illegible]emselves; for after the whales [illegible] up pieces are distributed not [illegible]mong the population of the district [illegible]here the catch occurred and

THE FAMILY DEVOTIONS THE LONG WINTER NIGHTS TO SPINNING.

those who had all the hard work and danger of driving the whales into the shallow bays where they were slaughtered, but the church and the widows and orphans also receive a share, and as whale's flesh constitutes to a great extent the meat supply of the inhabitants, this generosity is most praiseworthy.

The Faroese eat scarcely any vegetables, their diet being almost entirely composed of fat of every sort and fresh fish, and strangely enough they do not suffer from leprosy or other kindred skin diseases.—The Wide World Magazine.

German Plan to Cure Kicking Horses.

A novel way of curing horses of the kicking habit is practiced in Germany. A bag of sand or gravel is hung from the ceiling of the stable in such a manner that the bag will be a little distance behind where the refractory horse is standing. Whenever he

upon the mind that he will always be rewarded for his unmannerly conduct in this manner, says the New York Herald, but unless he is exceedingly stupid he will quickly learn the lesson, and then the bag may be removed. It is asserted that a horse once cured in this manner will never again think of kicking, but whether this is true or not time alone can tell.

Bulgaria has issued three postage stamps to commemorate the defense of the Shipka Pass in 1877, and the artist has compressed into his drawing incident enough for a stirring story, there being at least a dozen figures of men, pistols and rifles, stones and rocks, etc.

The atmospheric pressure on the body of the average man is 32,400 pounds. The ordinary rise and fall of the barometer increases or decreases this pressure 2500 pounds.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "NO DIFFERENCE."

The Rev. Dr. J. Wilbur Chapman Explains For the Benefit of Our Degenerate Man One of the Most Difficult Statements in All the Bible.

NEW YORK CITY.—The following timely and interesting sermon is one of a series prepared by the famous evangelist, the Rev. Dr. J. Wilbur Chapman. It is entitled "No Difference," and was preached from the text: "For there is no difference." Rom. iii: 22.

This is one of the most difficult statements to receive in all the Bible, and I can well understand how the unregenerate man would resent its application. I can hear him say, "What! no difference between the man who has fallen to the very lowest depths of sin and wretchedness, and the man who, boasting of his morality, has swerved only a little from the path of duty and the law of God?" And the answer to this question is both "yes" and "no."

There is a difference in heinousness and degradation wide as the poles, but "no difference" so far as guilt is concerned, for both have rejected the Son of God, and this is the sin of sins.

If two men were before the court, one charged with a great offense and the other with one of less degree, it would point the latter man but little to say, "But, Your Honor, I am not so great an offender as my companion in misery." The judge might well reply, "You are both guilty; in that there is no difference," and this is the teaching of my text.

God's word declares—"He that offends in one point is guilty of all;" not meaning, of course, that he has of necessity broken every law, but he has broken away from God by his transgression. If I am held a prisoner by a chain it is not necessary that I should break every link in the chain that I might go free, but only one and that the very weakest, and so he that offends in one point is guilty of all and nothing less, while he that offends in all points is guilty of all and nothing more. "All have sinned and come short of the glory of God."

Three important questions grow out of this text as I have considered it. First, I do not ask if you are a sinner, for as we ordinarily use this word, we think of one who is lawless, wild and profane. But I ask:

HAVE YOU OFFENDED IN ONE SINGLE POINT?

If so, "There is no difference." Man would not say it, I know, but God says it, and it is written in the book, and by the book we shall be judged.

Look at the prodigal. He was as truly a prodigal when he had taken the first step over the threshold of his father's house as when afterward you see him sitting in the midst of the swine, and trying to fill his belly with husks which the swine did eat.

He is more degraded in the second picture, but not more guilty.

Look at the leper. He is just as truly dead when the first sign of the dread disease appears, small though it may be, as when afterward you behold him, a loathsome object, sitting outside the city gates, with bandaged mouth, crying, "Unclean! Unclean!" He was a leper, however, from the first, and by the law dead. This is the teaching of the text. If you have rejected the Son of God, whatever your position, "There is no difference"—all are alike lost.

It is not even a question of great sin[illegible] [illegible]nance," and another reads that "All things are naked and open before Him with whom we have to do." In the light of this who can stand?

Not long ago in one of the school buildings of Chicago a picture of an eye was placed upon the blackboard as an illustration, and in a little time by order of the school board it was painted out, for it had been so perfectly painted that whatever position a child might be in in the room that eye was upon it. The effect was disastrous. But there is one eye which never slumbers and can never be painted out. "Thou God seest me." The sin was at midnight. He saw it. It was in New York or London or Paris. He saw it. Thus to the charge of "secret sin" you must plead guilty, and "there is no difference."

SINFUL THOUGHTS.

2. But the charge is even closer. We are responsible for the sinful thought which tarries in the mind by the consent of our will. Who can stand in the light of this?

A distinguished scientist has made the statement, which wise men receive, that if a man stands out in the sunlight and acts, his act, good or bad, flashes away to the sun and a picture which is never lost is made. And if he speaks, the sound bounds away, up and up, far beyond his reach, and makes its record forever. And if he refuses to step into the light, or in the darkness speak a word, this scientist declares that by the very thoughts of his mind certain physical disturbances occur which make a record lasting as time.

I remember sending a telegram in a western city, and shortly after realizing that my message had been wrong I made my way to the office to recall it. "Why," said the operator, with a smile, "it is gone, and is flashing over the wires now, beyond my recall." So with your sinful thoughts. They bound away, and no man can recall them when once they go.

The answer to this charge must be—"guilty."

BEGINNING IN SIN.

3. Some are beginning now. He'd be the fascination of the evil one and lured on by his charms they are rushing on to hell. On one of the busiest streets of the gay city of Paris stands a building famous for its beauty. Over the magnificent doorway you may read these words, "Nothing to pay." The admission is free, the entertainment within is fascinating, and hundreds of young men pass through the portals, the rank and file of them taking their first or last step to hell.

All sin is dearly bought, for it has hell back of it. It blights the life, wrecks the character, and blasts the fondest hopes of the soul. And when that awful day comes and situation is gone and character lost, and the hearts of loved ones broken, and you are cast a stranded wreck on the shores of time, you will cry out in terror, "O wretched man that I am, who shall deliver me"—and there will be no [illegible]ance. You will be more [illegible] not more guilty [illegible] of sin [illegible] God pity you.

[illegible]

Do you know the Bible description of the end of a career of sin from the world [illegible] point? "Weeping, wailing and gnashing of teeth." "Without are dogs, and sorcerers and whoremongers, and murderers, and idolaters, and whosoever loveth and maketh a lie." God save us from such a company. A minister could never lead a man to serious thought until he quoted the text: "The wicked shall be turned into hell, and all the nations that forget God."

Great sin, humanly speaking, is not necessary, but only forget Him and "There is no difference."

If you had read that remarkable book, "Robert Falconer," written by Geo. MacDonald, you will remember the dream of the wife of Andrew Falconer. He was a drunkard and after her death the dream being told him, resulted in his conversion. She said in her letter, which she had written him:

"I thought, Andrew, that the resurrection morn had come, and I was looking every[illegible]re for you. Finally in my wanderings I came to a great abyss. It was not so very wide, but it was very deep and was filled with blue, like the blue of the sky. On the other side I saw you, Andrew, and I gave a shriek which all the universe must have heard. Something made me look around. Then I saw One coming toward me. He had a face—O, such a face! fairer than all the sons of men. He had on a garment which came down to His feet, and as He walked toward me I saw in His feet the print of the nails. Then I knew who He was. I fell at His feet and cried, 'O, Lord, Andrew, Andrew.' 'Daughter, would you go to him?' I said, 'Yes, Lord.' And Andrew, He took me by the hand and led out over the abyss, and we came nearer and nearer, until at last we were united, and then He led us back to be with Him forever." O, my friends, not in the next world, if not in this, but here and now we may be made one in Him, one for time and eternity, but failing here, all hope is gone and there is before us only the blackness of darkness of despair. "For there is no difference."

The second question is of the greatest importance:

DO YOU COME UP TO GOD'S STANDARD?

It is not enough to be simply a member of the church. "Many will say to Me in that day, Lord, Lord, have we not prophesied in Thy name, and in Thy name have cast out devils? and I will profess unto them, I never knew you."

We have such a way of measuring ourselves by ourselves that we may feel well satisfied with the result. But now about God's standard? Upon my return home at one time my wife placed in my hands a piece of paper, written all over but only two words were intelligible. At the top of the page was the word "carriage," plainly written, the next word was the same, only not so well written.

It was my little daughter's first copy-book. The teacher had written the word at the top of the line, and she had done fairly well so long as she had looked at the copy. But she had fallen into the serious error of copying the line just above her work, and the word at the bottom of the page as nearly spelled "man" as "carriage." Thus people measure themselves by those around them, forgetting that He said—"Look unto Me and be ye saved."

You may be better than the members of the church, but what doth it profit? You may be the best man in your community, but that does not save.

How about God's standard?

Her Majesty, the Queen, issues frequently, I am told, an order for soldiers to compose her guard. Every man must be at least six feet tall. I can imagine some young Englishmen measuring themselves by themselves, until at last one man in great delight exclaims, "I will surely get in, for I am the tallest man in town." And so he is, but when he stands before Her Majesty's officer he is rejected, for he is three-quarters of an inch under the mark.

His being taller than his fellows profited nothing; they had all fallen short some more, some less. But "There was no difference."

And so you turn my question upon myself. I suppose that I am quite correct in the high standard of truth and purity in my own life, for from it, not in Christ, for "Christ is the end of the law for righteousness to every one that believeth," and wherein I fail, He makes up.

It is no point as to whether Adam or Eve were the more sinful; they were both guilty, and "there is no difference."

The chiefest of all sins is not drunkenness, although that is horrible; it is not licentiousness, although that is vile; it is the rejection of God's mercy—or the [illegible] of unbelief. "He that believeth not is [illegible] condemned, and "there [illegible] no difference."

The third and last [illegible] question is this:

WHAT IS THE REMEDY?

There is another "no difference" which answers the question. "For there is no difference * * * for the same Lord over all is rich unto all that call upon Him, for whosoever shall call upon the name of the Lord shall be saved." Romans x: 12, 13.

1. It is useless to try by any amount of exertion, or feeling, or even prayer, to bring about faith. I have had my own experience in this. God says in His word, "Faith cometh by hearing and hearing by the word of God."

This is a sure way. A college student was greatly troubled spiritually, and was in conference with one of the professors until midnight. Just as he was leaving the house, going out into the darkness, the professor placed in his hands a lantern saying, "Take it, George, it will light you home a step at a time." And this is what the Bible does.

That lantern did not light up the forests, nor make luminous the landscape; it was not meant that it should, but it made every step bright.

Man was lost by hearing Satan. He can only be saved by hearing God. Plant your feet firmly by faith on one single promise, and God will begin at once to make clear the way if you will only believe Him.

2. To the Philippian jailer's question, "What must I do to be saved?" Paul's answer was, "Believe on the Lord Jesus Christ and thou shalt be saved." And there is no respecting of persons, for "whosoever shall call upon the name of the Lord shall be saved."

A friend of mine told me that when he climbed the Matterhorn he was besieged by men, waiting at the base of the mountain, ready to guide him up the difficult way, but the most of them would have never brought him down in safety, for they were simply men out of employment. He very easily, however, secured a safe guide when he said, "Show me your papers." Then the men who were without them stepped back, while the real guides stepped forward and holding out their papers he read something like this:

"We, the undersigned, have climbed the Matterhorn under the care of such a guide (giving his name), and we commend him to our friends"—and then followed the names of people of great renown at home and abroad, a member of Parliament, a member of Congress, and your personal friend, and my friend at once felt secure because others had made the trip in safety.

It is like that when under condemnation you ask, "What must I do?"

Infidelity attempts an answer; philosophy make a vain effort to reply, and Jesus Christ, the Son of God, comes with the rest. Let me suggest to you the real test. Ask them each, "What have you done?" Demand of each that their papers be shown. Then will He come whose garments are dyed red, whose hands were pierced, and whose heart was broken, who died and rose again that He might become the justifier of all that believe, and on the very palms of His hands you read the names, John Bunyan, John Newton, Jerry McCauley, and brighter than them all—Charles Haddon Spurgeon.

"He hath saved us, and kept us, and in His presence we rejoice with a joy unspeakable and full of glory."

And this is enough—I for one will say, "Blessed Lord, if Thou canst save others, and I know that Thou canst, Thou canst save me; and I will let Thee do it now." Will you join me in this now?

3. To sum it all up, if you would escape condemnation you need simply to

HAVE A WILLING MIND ABOUT SALVATION.

Then by faith accept what He in grace offers you. I have heard Christian workers say to earnest inquirers, "Give your heart to God and you may be saved." But this is unscriptural—at least the order is wrong. Accept first the gift of eternal life, then give yourself, out of gratitude for His goodness.

The first saves you; the second is the first fruit of your salvation.

North Plainfield Weekly Review

ISSUED EVERY SATURDAY BY
HARRY H. WEBB
AT NORTH PLAINFIELD, N. J.
39 Somerset St. Telephone 217

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, JANUARY 10, 1903.

MYSTERIOUS PEAPACK.

Peapack comes to the front this week with a wolf-killing story.

According to the report, the wolf had a collar around its neck to which was attached a chain. Now this circumstance might arouse suspicion in the minds of most people that a mistake had been made in the species of the quadruped, but not so with the Peapack people.

The wolf attempted to assist in a hog-killing match on the farm of George Howell, but was discovered and pursued by Mr. Howell, who mounted upon a horse and armed with a double-barreled shot gun, caught up with the dangerous animal and discharged one barrel of the gun at the beast. The animal turned on his pursuer and through the presence of mind of Mr. Howell in discharging the second barrel of the gun at close range, and thus killing the beast, a desperate conflict, and perhaps death to the pursuer was no doubt avoided.

Peapack, oh, Peapack! Thou land of mystery, with the underground caverns, thy mighty rivers of unknown depths, thy peerless press, agent, ever on the alert to boom thy industries! Peapack, we take off our hat to thee and acknowledge that there is no other like thee in this broad land, and we are glad it is so, for without thee, what startling news would the newspapers find to write about when the copy hooks are empty and the compositors are calling "copy"?

LOCAL OPTION BILL.

A local option bill will be introduced in the next New Jersey Legislature, which provides that, upon application of not less than one-fourth of the legal voters, the judge of the Supreme Court of the circuit shall order an election to decide whether or not a community shall have licensed saloons.

The act provides that when a community votes in the negative on the saloon question, that section shall be geographically defined and called "anti-saloon territory." Any person selling or otherwise disposing of spirituous liquors within the boundaries so defined shall, upon conviction, be fined $200 or given six months in the penitentiary, or both.

The taking of orders for delivery to houses is considered an evasion of the law. Druggists will be allowed to fill physician's prescriptions for spirituous liquors.

Local option seems to work satisfactorily wherever tried. It is in accord with American principles.

One objection to this bill is that it calls for a special election. There are too many elections held in New Jersey, now and an increase in the number shouldbe discouraged. Inthis particular case it would be an easy matter to have the local option settled at the regular municipal election, and thus obviate one of the most serious objections.

CHURCH MEMBERSHIP

The New York *Sun*, of Thursday, contained an article regarding church membership, written by Dr. H. K. Carroll, of this borough, which states that the church membership gain last year was 1.5 per cent., while the population has been increasing at the rate of 2.6 per cent. a year. The total church membership in all religions he puts at 28,698,028, a gain of 403,743 over a year ago.

Dr. Carroll says it is the Roman Catholic showing that pulls the figures down. The regular Roman Catholic growth for 1901 was twice that of last year. There are eight different Catholic bodies and in all of them the increase in communicants was 120,634. The Protestant growth Dr. Carroll says, was 1.7 per cent., or more than twice the regular Roman Catholic growth. Dr. Carroll's estimate of the Roman Catholic communicant list is 1,575,000 less than the figures given by the Catholic directory.

TRAVELING LIBRARIES A FAILURE.

The system of traveling libraries, which was established by the State of New Jersey at the solicitation of the State Federation of Women's Clubs, has in its brief existence proved an almost complete failure. In the report just made by State Librarian Buchanan it is shown that but twenty-three of the sixty-two libraries are now in use, against forty-two a year ago. There is at present no demand whatever for the libraries and it is the expectation that the Legislature, realizing the uselessness of trying to force the books upon an unwilling public, will make no further appropriation to keep them in circulation.

LOCK STEP ABOLISHED.

The lock-step at the State Prison at Trenton has been abolished, and on Monday, for the first time, the prisoners were marched in military order. This change in discipline is made to promote the self-respect of the prisoners and shorten the time in going to their labor. New Jersey was about the last State to do away with this barbarous custom.

THE Thank-offering Fund called for by the Methodist Episcopal Church three years ago, has been wholly raised in money and pledges. The fund is to be used for religious and educational work.

STATE SENATOR Elijah B. Hutchinson, who has been selected to preside over the upper branch of the Legislature at the coming session, is one of the very few Senators who opposed the annexation bills at the last session.

IN NEW YORK, the other day, a man selling newspapers was arrested and fined for crying false news. This is all right as far as it goes, but the editors who write false news, and the publishers who deliver their "6 o'clock editions" at Plainfield about noon should also be brought to law.

DR. H. H. WILEY, chief of the division of chemistry of the United States Department of Agriculture, warns the public against the use of colored butter, as well as the numerous adulterated foods which have been discovered to an alarming extent.

THE State Legislature begins its annual session next Tuesday. At present there appears nothing of importance on the horizon, so it may be expected that the game laws will be amended once more. How would it do to repeal all the game laws in force and begin all over?

IT IS reported that a daily newspaper, to be supplied with telegraphic news by wireless telegraphy, will soon be published on board an Atlantic steamship. Those tired business men who are in the habit of taking ocean voyages to get away from the "maddening whirl" will now have to look elsewhere for a retreat.

THE House of Representatives, in December, passed a pure food bill. The bill prohibits the introduction into any state or territory, from any other state or territory or from any foreign country, or the shipment to any foreign country of any article of food or drug which is adulturated or misbranded. The bill defines form of adulteration, and provides for the confiscation of prohibited articles.

THE COMMISSION appointed by Governor Murphy a year ago to draft a bill for a primary election law to be submitted to the incoming legislature has completed its work. The bill as drawn provides for the conducting of primaries at public expense by the regular election officers on the first registry day. Official ballots are to be used, to be prepared by municipal clerks. Names are to be arranged upon the ballots in alphabetical order. Any person's name may be placed upon such ballots, either as a candidate or for delegate to a convention, on petition of ten persons. Persons deciding to vote in such primary elections shall declare their politics to the election board and may swear their vote in whenever it is challenged.

NO MORE logical statement was ever made than the following from the editorial columns of the New ... Tribune of yesterday: "After ... should be borne in mind that ... question whether or not alcoho... be considered in any sense a... any degree and in any circumst... as useful or beneficial to the h... race, or whether it should w... exception be regarded as a p... will be determined finally by ... erate scientific investigation an... by pulpit oratory. Neverthel... is generally admitted by sensibl... intelligent persons that total ab... ence from alcoholic stimulants from the cradle to the grave is best for the great majority of mankind."

LEGAL NOTICES

North Plainfield Board of Health ORDINANCE.

A supplement to the Code of Ordinances of the Board of Health of the Borough of North Plainfield as revised January 7th, 1901, concerning "Milk Supply," and to be known as Ordinance XVI.

The Board of Health of the borough of North Plainfield do ordain and enact as follows:

ORDINANCE XVI.

SECTION 1. That no person, firm, association, or corporation shall sell or deliver, or have in possession for sale or delivery, in the Borough of North Plainfield, any milk or cream, without first obtaining from the Board of Health of the Borough of North Plainfield a permit for such sale or delivery.

SECTION 2. That no permit as required in the section preceding, shall be issued by the Board of Health until there shall be paid to the said Board of Health for the issuing thereof and for a proper inspection and supervision of the sale of milk, the sum of two dollars.

SECTION 3. That each permit to be granted as set forth in the two sections next preceding shall continue for the term of one year from the date of granting the same; provided, that if any person or persons, firm, association, or corporation to whom a permit has been granted, or any of his, her or their employees, servants, or agents shall violate any ordinance or rule of the Board of Health relating to the sale, distribution, or inspection of milk, such permit ... at the discretion of the ... Board ... be revoked.

SECTION 4. That every person, firm, association, or corporation engaged in the sale of milk, within the Borough of North Plainfield shall notify the Board of Health in writing immediately upon changing the source of supply of the milk so sold by him or them within said Borough, of such change, and said notice shall also state the name or names of the person or persons supplying said milk and the locality from which said milk is procured.

SECTION 5. That every person, firm, association, or corporation selling or delivering milk in the Borough of North Plainfield by means of a wagon or other vehicle shall have the name of such person, firm, association, or corporation and the number of permit plainly lettered on each side of the said wagon or vehicle.

SECTION 6. That every person, firm, association, or corporation violating any of the provisions of this ordinance shall forfeit and pay the sum of thirty dollars and costs of suit for each and every offence.

ANDREW LOVE, President of
N. Plainfield Board of Health.
North Plainfield, N. J.,
January 5th, 1903.
Attest: W. E. HONEYMAN, Secretary.

SHERIFF'S SALE,
IN CHANCERY OF NEW JERSEY.

Between The First National Bank of Plainfield, New Jersey, complainant, and Nelson Runyon, Administrator et al., defendants. Fi. Fa. for sale of mortgaged premises.

By virtue of the above-stated writ of Fi. Fa., to me directed and delivered, I will expose for sale at public vendue, on

MONDAY, THE SECOND (2) DAY OF FEBRUARY NEXT,

between the hours of twelve and five o'clock, in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All those tract s or parcels of lands and premises, situate, lying and being in the borough of North Plainfield, in the county of Somerset and State of New Jersey:

The First Tract—Beginning at a point in the center of Green Brook Road, opposite the center of Maple avenue; thence along the center of said Green Brook Road in a course of south sixty-seven degrees and fifty minutes west two hundred and eighty-four feet to a point in the center of said road and corner of lands of R. W. Cadmus; thence along line of lands of said Cadmus north forty-two degrees and fifty-five minutes west three hundred and twenty-two and three-tenths feet to a point; thence still along line of said Cadmus' lands north forty-two degrees and forty minutes west and eighty and nine one-hundredths (80.09) feet to a stake and point; thence, in a course of north forty-six degrees and thirty minutes east two hundred and sixty and eight one-hundredths (260.08) feet to a point in the center of Maple avenue; thence in a course of south forty-three degrees and thirty minutes east five hundred and five and sixty-eight one-hundredths (505.68) feet along said center of Maple avenue to the place of beginning. Being the same premises conveyed to said Runyon by deed of the executors of Isaac Scribner, deceased, dated Sept., 30, 1895, recorded in Book B No. 8 of Deeds for Somerset county, on pages 248, etc.

The Second Tract—Beginning at a point in the center of Willow aveuue, distance two hundred and fifty-eight and seventy-five hundredths (258.75) feet, in a northeasterly direction along the center of said avenue, from a point in the center of Sycamore avenue, and is a corner of Lot No. Eleven (11); Thence along the rear line of lots No. Eleven (11), Ten (10), and Nine (9), in a course of north sixteen degrees and twenty minutes west one hundred and eighty-five and twenty-five hundredths (185.25) feet to a point and is a corner of Lot No. Six (6); thence along the line of that lot in a course of north eighty-one degrees and forty-seven minutes east eighty-five (85) feet to a corner of Lot No. Thirteen (13); thence along the line of that lot in a course of south sixteen degrees and twenty minutes east one hundred and sixty-seven and fifteen hundredths (167.15) feet to the center of Willow avenue; thence along the center of the same south sixty-eight degrees and forty-four minutes west seventy-seven and seventy-five hundredths (77.75) feet to a point; thence still along the center of the same south sixty-six degrees and twenty-five minutes west six and ninety-five hundredths (6.95) feet to the place of beginning, be the measurement more or less. Being the same premises conveyed to the said Runyon by deed of William J. Roome and wife, dated July first, 1874, recorded in Book F No: 4, of Deeds for said county of Somerset, on pages 298, etc.

The Third Tract—Situate, lying and being in the borough and township of North Plainfield, county of Somerset and State of New Jersey: Beginning at a stone planted for a corner on the center line of Maple avenue as now laid out and opened, said stone being the northeasterly corner of lands belonging to E. P. Gavin; thence running along the center line of said Maple avenue in a magnetic course of north forty-three degrees twenty-eight minutes west, a distance of eleven hundred and ten (1110) feet more or less to a point and corner of lands sold to Robert Rushmore; thence in a southwesterly course along the line of lands of the said Rushmore, and also lands of ———— and binding thereon, a distance of eight hundred and seventy-six and eighteen one-hundredths feet, more or less, to a point in line of lands of ———— Debele; thence south forty-three degrees thirty minutes east along the line of lands of said Debele, and binding thereon, being down the mountain a distance of eleven hundred and eight and forty-seven one-hundredths (1108.47) feet, more or less, to a point in line of lands of the aforesaid E. P. Gavin; thence along the line of lands of the said E. P. Gavin northeasterly a distance of two hundred and eighteen and eleven one-hundredths (218.11) feet to an angle point in said line; thence still along the line of lands of the said E. P. Gavin north fifty-three degrees twenty-nine minutes east a distance of six hundred and sixty-nine and sixteen one-hundredths (669.16) feet to the aforesaid first mentioned stone and place of beginning. Containing twenty-two and six-hundred and sixty-five one-thousandths (22.665) acres of land. Being the same premises conveyed to the said Runyon by deed of John H. VanWinkle, Executor, etc., of Isaac Scribner, deceased, dated June 24, 1896, recorded in Book H No. 8 of Deeds for Somerset county, on pages 160, etc.

And the Fourth Tract—Situate in said borough: Beginning at a point in the center of Duer street said point being distant one hundred and forty-five (145) feet northwesterly along said center of Duer street from its intersection with the center of Emily street; thence in a magnetic course of north forty-six degrees and forty-five minutes east and at right angles with said Duer street, a distance of eighty-six and eighty-seven one-hundredths (86.87) feet to a point; thence north twenty degrees and four minutes west, a distance of forty-one and ninety-two one-hundredths (41.92) feet to a point; thence north forty-six degrees and forty-five [illegible] Duer street, a distance of seventeen and fifty-two-100ths (17.52) feet to a stake in John Thickston's line; thence along said Thickston's line south forty-six (46) degrees and forty-five (45) minutes west, a distance of one hundred and eighteen and three-tenths (118.3) feet, to a point in the center of Duer street aforesaid; thence along said center of Duer street south forty-three (43) degrees and fifteen (15) minutes east, a distance of fifty-six (56) feet, to the point and place of beginning. Being the same premises conveyed to said Runyon by deed of William H. Shotwell and wife, dated December 11, 1894, and recorded in Book W No. 7 of Deeds for Somerset county on pages 20, etc.

CALVIN D. McMURTRY, Sheriff.
WM. M. STILLMAN, Solicitor.
Dated Dec. 27, 1902 [$29.70]

NOTICE OF ORDER TO LIMIT CREDITORS

Somerset County Surrogate's Court.

Estate Of Katharina Kirch, Deceased.

Notice is hereby given, that on the Fifth day of January, A. D. 1903, on the application of the undersigned as Executors of the will of Katharina Kirch, deceased; an order was made by the Surrogate's Court, requiring the creditors of the said Katharina Kirch, deceased, to bring in their debts, demands and claims against the said decedent, under oath or affirmation, and present the same to the subscribers within NINE months from the date of said order; and in default thereof any such creditor should be forever barred of his or her action therefor against the subscribers.

JOHN D. KIRCH, } Executors,
WILLIAM KIRCH, }
March 5. North Plainfield, N. J.

NOTICE OF SETTLEMENT.

NOTICE is hereby given, that the accounts of the subscriber, Executor of the will of Ellen Hughes, deceased, will be audited and stated by the Surrogate, and reported for final settlement to the Orphans' Court of the County of Somerset, on Friday, the SIXTEENTH DAY of JANUARY next.

Dated RICHARD A. BOYCE,
December 11, A. D., 1902. Executor.

NOTICE OF SETTLEMENT.

NOTICE is hereby given, that the accounts of the subscriber, Sole Surviving Executrix of the will of Sarah S. Line, deceased, will be audited and stated by the Surrogate, and reported for settlement to the Orphans' Court of the County of Somerset, on Friday, the SIXTEENTH DAY of JANUARY, next.

MARGARET F. VAIL,
Dated Sole Surviving Executrix.
December 11, A. D., 1902.

NOTICE.

The creditors of John C. Haberle, deceased, and others interested, are hereby notified that a report of the several claims and demands exhibited against the estate of said decedent, and of the personal and real estate, will be made to the Orphans' Court of the County of Somerset, on Friday the sixteenth day of January next, and that the accounts of the subscriber will be presented at that time for settlement and allowance, and thereupon application will be made for leave to sell real estate decreed insolvent.

REVIEW, 39 Somerset Street

THE AMERICAN MONTHLY REVIEW OF REVIEWS

How Can I Keep Up with the Times?

IT is pretty hard to keep well informed on the political news, the scientific news, the literary news, the educational movements, the great business developments, the hundreds of interesting and valuable articles in the hundreds of excellent magazines. About the only way it can be done by the average busy man and woman is to read a magazine like "The Review of Reviews," and, as it is the only magazine of the sort, it is a good thing to send $2.50 for a year's subscription.

PRESIDENT ROOSEVELT says:
"I know that through its columns views have been presented to me that I could not otherwise have had access to; because all earnest and thoughtful men, no matter how widely their ideas diverge, are given free utterance in its columns."

EX-PRESIDENT GROVER CLEVELAND says:
"I consider it a very valuable addition to my library."

The Review of Reviews Co.
13 Astor Place, New York

Read The Review of Reviews

THE REVIEW REACHES NEARLY EVERY HOME IN NORTH PLAINFIELD.

Hence it is the best medium for advertisers in this part of Somerset County.

NEW YORK TRIBUNE FARMER.

A NEW ...OLD ... death, of the fi...

Nord... M. Max ... view, deplores ... ism in Asia, a... struggle fo... the Eastern Asia.

For sixty years the NEW-YORK WEEKLY TRIBUNE has been a national weekly newspaper, read almost entirely by farmers, and has enjoyed the confidence and support of the American people to a degree never attained by any similiar publication.

THE NEW YORK TRIBUNE FARMER

is made absolutely for farmers and their families. The first number was issued November 7th, 1901.

Every department of agricultural industry is covered by special contributors who are leaders in their respective lines, and the TRIBUNE FARMER will be in every sense a high class, up to date, live, enterprising agricultural paper, profusely illustrated with pictures of live stock, model farm buildings and homes, agricultural machinery, etc.

Farmers' wives, sons and daughters will find special pages for their entertainment.

Regular price, $1.00 per year, but you can buy it with THE WEEKLY REVIEW one year for $1.25.

Send your subscriptions and money to THE REVIEW, Plainfield, N. J.

Send your name and address to the NEW-YORK TRIBUNE FARMER, New-York City, and a free sample copy will be mailed to you.

ORDEAL BY FIRE

By Martha M'Culloch-Williams

Copyright, 1902, by the S. S. McClure Company

Miss Morris sprang from bed and darted to the back door, aroused from sleep by stealthy knocking. A slim, prim, upright, faded gentlewoman, she did not forget to huddle herself in a shawl before flinging open the shutter.

"Marthy! What on earth—is the house afire?" she gasped to the fat black woman who stood upon the steps.

Marthy chuckled, though she tried hard to look properly subdued as she said:

"Not sactly, Miss El'nor, but hit's des Gawd's mussy hit ain't. You know how las' night my ole man Ben took en snook out de little circuit rider's white breeches fer me ter wash"—

"Don't tell me anything's happened to them—don't, for the Lord's sake!" Miss Morris said, almost staggering.

Marthy drew down the corners of her mouth. "I washed en I'oned um all right," she said. "Den I took en hung um 'fore de kitchen fire so dee'll git bone dry by dis mawnin'. Ben he went ter git des now ter git um en snake um back, en, 'fore de Lawd, dee ain't none on um left 'ceptin' hit is de buttons. Sparks must er popped out, en dee would 'a' set us all afire hadn't hit been I had sense ernough ter leave dat cheer dee was on right spang on de h'arth"—

"What shall we do?" Miss Morris moaned. She had drawn Marthy with her into the shelter of her own chamber. The circuit rider in the guestroom at the other end of the house might well be awake conning over his sermon. It was Sunday morning. He was due to preach the 11 o'clock sermon at Horeb church, ten miles away. Horeb congregation was the richest, the most nearly fashionable, of all in the circuit. Moreover, Miss Morris knew that young Brother Brandon was deeply in love with Nelly Riggs. Her father, Horeb's leading steward, looked askance at the young minister's suit. He was ambitious for his daughter and heiress. Naturally, therefore, Brandon would want to show himself at his best.

He had come to stay all night at the Morris house, with no more than a change of linen in his saddlebags, clothed in flannel coat, white duck trousers and leather belt. A summer shower had splashed and stained the trousers very badly, hence the washing, the burning. Now the young man lay in bed trouserless upon a plantation that was a sort of Adamless Eden. Miss Morris and Miss Marina had lived alone since their father died, twenty years back, with black Marthy and Ben for servants.

Miss Marina was stout and rosy, as Miss Morris was thin. She sat up, rubbed her eyes hard and said sleepily: "What you fussing about, El'nor? Here's what you can do—ask Ben to lend Brother Brandon that last pair of pa's trousers we gave him. He hasn't worn them out, has he, Marthy?"

WHEN HE GOT UP TO SPEAK, IT WAS WITH A TONGUE OF FIRE.

"No'm-m," Marthy said, with a throaty giggle. "He been a-savin' dem las' breeches, he is; say he spects he got ter grow three-fo' more years 'fore he can fill um up, dee so odacious big up round de waist parts."

"Well, they'll be long enough if Brother Brandon is so tall," Miss Marina said philosophically, settling back on her pillow. "Go and send Ben in with 'em, Marthy, and tell him to tell Brother Brandon we are sorry and that we'll go with him to preaching, though we didn't mean to. I don't intend," this vigorously to Miss Morris, "that anybody shall ever have it to say we were ashamed to see another man standing in his father's clothes."

* * * * * *

Perhaps young Brother Brandon was ambitious of martyrdom. Certainly no martyr at the stake ever showed a finer courage. He took to march up the aisle ten minutes late, feeling the focus of curious, even hostile eyes and conscious that he looked more like a cross betwixt a circus clown and a scarecrow. The late Squire Morris had been truly a man of girth. His black cloth broad falls, threadbare and shiny along the seams, stood in folds and puckers within the saving circumference of a yellow leather belt. And in the trim gray flannel ridiculously shrunken. The breeches were a bit at the knees and sat very close around the foot. But after one long, agonized whistle over his own appearance Dick Brandon had set himself to make his hostesses forget them, and so successfully that, though they had been on the verge of tears, in five minutes he had them laughing.

The Riggs contingent was another matter. If only Nelly would be mercifully hindered! Brother Riggs was a certainty. Nothing short of an earthquake or sudden death could have kept him away. Brandon caught the brother's measuring eye fixed upon him in disapproving scorn, but he kept his head high. All through the kneeling minutes of silent prayer his petition was for strength and light.

He got up trembling, but read the chapter and gave out the hymns in a clear, hard voice. Through the singing there came to him a breaking silver strain, Nelly's voice, freighted with the sweetness of compassionate love.

Somehow the note melted him, softened, strengthened. He lost the hampering sense of earthly vestures, earthly things. When he got up to speak, it was with a tongue of fire that searched and soothed equally, carrying all before it.

Rapt, transfigured, intent only upon the King's business, he went from height to height, arguing, persuading, until rugged men sobbed aloud or shouted praises. The church was smallish, with bare, brown wooden walls and high, narrow windows. Maybe it was the play of light through the whispering leaves outside, but more than one believed that upon this memorable day there was visible in Horeb church the fluttering of angelic wings.

Brother Riggs sat hard eyed and critical until near the end. The spirit took him when he least thought, and took him hard. He made a leap across bench and altar space and flung himself into the pulpit, crying, "The Lord gave me my daughter; the Lord takes her away to be your wife in spite of me and the devil!" and hugging Brandon as though he meant to break his ribs.

Then somebody raised a hymn, an old camp meeting chant, full of militant faith. Everybody sang and sang until at last the congregation brought itself to the level of Sunday uninspired.

Brother Brandon rode straight to his boarding place, although he was hard pressed to go on and dine with Brother Riggs. But he came next day, clothed in his right mind, to propose properly for Miss Nelly and be accepted in due form.

As she nestled in his arms he said, smiling a tender, whimsical smile, "I cannot feel that I deserve you, darling, not even though I have won you through ordeal by fire."

What a Bad Digestion Does.

A doctor has been comparing the state of mind of a man before dinner and after who suffers from indigestion. Before dinner the patient's thoughts are something of this kind:

"What a jolly thing life is! How grand it is to breathe the pure air, to revel in the glorious sunshine, to laugh and be merry! With friends all around, a prosperous future before one, all one's hopes and plans turn out well. It may safely be said that we live in a good country and that life is the most enjoyable state imaginable."

But after dinner, when the salmon and the cucumber and the lobster salad have begun to do their deadly work, the same man thinks something like this:

"Life is a fraud. Those who say life is worth living are humbugs. We go about the world with a heavy load of care, and from morning till night our time is spent in battling with new annoyances. Bills pour in on every side, failure stares us in the face, every cherished hope is dashed to the ground. Bah! The whole thing is humbug!"—London Tit-Bits.

Origin of College Slang.

"In every university," said a collegian in the Philadelphia Record, "there is a slang word, 'bone,' that means to study. Do you know how this word originated? It came from 'Bohn'—from the 'Bohn' books that are so familiar to students—and in the beginning it was spelled 'Bohn,' and its significance was easily understood, but now that it is spelled 'bone' the significance is lost. The derivation of other pieces of college slang is not so easily traced back. Thus there is the word 'pole,' 'poler,' 'a greasy poler,' which at Lehigh means a hard student. It would be hard to say whence that word comes. There is 'rush,' to 'rush a freshman,' a Cornell phrase, which means to seek to induce a freshman to join fraternity, another hard word. To 'bust' at Cornell means to fail or flunk. 'Cow juice' means milk. A 'pony' means a device for cheating at examinations. A 'dog wagon' means a lunch wagon. Those words have their derivation patent on their face, but where, I wonder, can 'to gray' have come from? 'To gray' at the University of Virginia means to get drunk."

Hunting and Hunting.

A good shot and an entertaining story teller, Tom Nast was welcome during the shooting season at a number of country houses in England. But his first invitation was a bitter lesson to him simply because he failed to observe the sharp differentiation between hunting "as she is known" in England and in this country. On board ship Nast made the acquaintance of a Hertfordshire man, a master of the hounds near St. Albans. Nast received and promptly accepted an invitation to hunt.

"I never felt quite so insignificant in my life," he used to say in telling the story, "as when I arrived at the rendezvous and saw that brilliant meet, the men in their scarlet coats and the jolly looking women on their fine mounts, and there was I trudging along the road with a game bag and a gun."

Sciatic

Trouble From Sprain of Back.

Dizzy, Dull, Nervous, Constipated.

Dr. Miles' Nervine Completely Cured Me.

A frequent complication of rheumatism and sciatica is constipation. The use of Dr. Miles' Nerve and Liver Pills in conjunction with Restorative Nervine makes an ideal treatment for such cases. The Nerve and Liver Pills, by their tonic influence upon the nerves of the stomach, liver and bowels, cause them to act naturally. Thus the system is readily cleansed of the impurities which cause the trouble and the nourishing and soothing effect of Nervine is allowed to do its wonderful work of restoration without hindrance from the complication.

"About ten months ago I sprained my back. This ran into sciatic trouble from which I have suffered more or less ever since. This was complicated by chronic indigestion. I had sick headache every day with a dizzy, dull feeling, also quite a little confusion. Was extremely nervous and suffered much from constipation. I was influenced to try Dr. Miles' Remedies and decided to give them a trial. I procured a bottle of the Restorative Nervine and a box of the Nerve and Liver Pills. I used them as per directions and received much relief. I continued the Nervine until I had used several bottles of the same and I am glad to state that it has cured me completely and permanently. I now enjoy good health, relish my meals and can eat any kind of food without fear. I take pleasure in recommending Dr. Miles' Remedies to the public."—REV. A. B. MOWERS, Taneytown, Md.

All druggists sell and guarantee first bottle Dr. Miles' Remedies. Send for free book on Nervous and Heart Diseases. Address Dr. Miles Medical Co., Elkhart, Ind.

Notice! to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the REVIEW free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled. write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed but it is necessary to have them properly vouched for.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address.

Poverty is Neither a Crime Nor a Credit

By Ina Brevoort Roberts.

ABOVE all else, poverty is interesting. There is a certain sameness about wealth, but poverty is never twice alike. One day you go without butter, the next you have butter on your bread but no sugar in your tea, or maybe you have the sugar and no tea to put it in.

Poverty has its drawbacks. The poor man hasn't as much time as the rich one in which to make love to his neighbor's wife, nor do the married couples among the poor find it easy to secure leisure in which to learn that their tempers are incompatible. It may occur to them sometimes that the domestic machinery doesn't run as smoothly as it might, but they are too busy to take it to pieces to see where the trouble lies, so they just pour on a little of the oil of forbearance and let it go at that; consequently their lives are apt to lack the eclat furnished by divorce.

The rich, on the other hand, have plenty of time to "watch the wheels go round," and the minute there's anything wrong with the mechanism of their domestic happiness they straightway set to work to get at the why and the wherefore. But, as everyone who has experimented with clocks knows, it is easier to take a machine apart than it is to get it together again.

After all is said, it remains that povery is neither a crime nor a credit, neither a curse nor an unmitigated blessing, while wealth, on the other hand, is monotonous but convenient, and enervating but pleasant.—Brandur Magazine.

The Men Who Make America

By the Rev. Dr. J. F. Carson.

THERE is a notion, perhaps nowhere formulated into definite statement, but everywhere pervading the thought of the day, that the strength and permanency of national life can be built on the basis of material forces. But if the history of nations proves anything it proves that the strength and permanency and solidarity of the State do not lie in such forces. Alliances with material forces have always and everywhere been covenants with death. Not in physical resources, not in martial prowess, not in diplomatic shrewdness lies the strength of the Nation, but in the character of its people.

We want in America to-day men who are free from self-interest in their thought and plan for the Nation. As the complexity of our life grows the opportunities for manipulating affairs for personal interests multiply. When our personal interests become intertwined with our political relations, we carry a warped mind into the discussion of public affairs and into the discharge of civil duty; we are apt to conclude that the measures which conduce to our own personal interests are the best measures, and so we favor that party and that policy which will be most likely to bring about the result which we desire. We must get back to the spirit of the fathers and put political duty before personal interest.

Materialism grips the Nation. The people have no vision, and where there is no vision the people perish. These are the men whom America needs; dreamers, poets, seers who will bring into life a saving vision. Our poets are not listened to because their song is too much like the common shout. It has about it a metallic ring. Our prose writers are doing little more than painting for us a portrait of our common life. This is not enough. We want a vision. We do not want in poem or in novel, in opera or in drama, simply a graphic representation of life as it is. We want an unveiling of life as it might be. Only thus can our life be saved from the mean and the material. The men who give us these visions are as rivers of water in dry places, springs break forth wherever they go and the air becomes fresh. These are the men who make America, the men who cause the life of the whole people to throb with heaven-filled impulses and heaven inspired movements.

Value of University Training

By Justice Oliver Wendell Holmes.

I HAVE listened with interest to able business men when they argued and testified that a university training made men fitter to succeed in their practical struggles. I am far from denying it. No doubt such a training gives to men a larger mastery of the laws of nature under which they must work, a wider outlook over the world of science and of fact. If I could give to every student a scientific point of view, if education could make men realize that you cannot produce something out of nothing and make them promptly detect the pretense of doing so with which at present the talk of every day is filled, I should think it had more than paid for itself. Still more should I think so if it could send men into the world with a good rudimentary knowledge of the laws of their environment.

But, besides prosperity there is to be considered happiness, which is not the same thing. The chance of a university to enlarge men's power of happiness is at least not less than its chance to enlarge their capacity for gain. I own that with regard to this, as with regard to every other aspiration of man, the most important question seems to me to be what are his in-born qualities? Mr. Ruskin's first rule for learning to draw, you will remember, was, be born with genius. It is the first rule for everything else. If a man is adequate in native force, he will probably be happy in the deepest sense, whatever his fate. But we must not undervalue effort, even if it is the lesser half. And the opinion which a university is sure to offer to all the idealizing tendencies—which, I am not afraid to say, it ought to offer to the romantic side of life—makes it above all other institutions the conservator of the vestal fire.

But, gentlemen, there is one department of your institution to which I must be permitted specially to refer—the department to which I am nearest by profession, and to which I owe the honor of being here. I mean, of course, the Department of Law. It was affirmed, I believe, by the late Chief Justice Cooley, that the law was and ought to be commonplace. No doubt the remark has much truth. It is better that the law should be commonplace than that it should be eccentric. It seems to me that for men as they are the law may keep its everyday character, and yet be an object of understanding, wonder, and a field for the lightning of genius.

Clinging to the Old Farm.

By E. L. Vincent.

I KNOW a man now in his eighty-fourth year, and his wife, somewhat past seventy-five, who are carrying on a farm of a hundred and forty odd acres of land. They keep three or four cows, and not far from twenty-five sheep. The milk from the cows they make up at home, setting the milk in the old fashioned pans and churning with an old fashioned dash churn. The present season the old man has gathered nearly 300 bushels of apples from his orchard, and sold something like half of them in a city ten miles away, taking a few bushels at a time and peddling them out to private customers. This old man is not compelled to follow this strenuous life, being in comfortable circumstances, but he prefers to keep up the habits of life which have brought him so much of happiness and success. He has raised a large family of children, all of whom are now settled on farms of their own, so that he has no one to help him save as he hires now and then a day's work with the plow or in haying.

"I have been told a great many times that I ought to stop work now and settle down in town or somewhere else where I would be able to take life easy the rest of my time; but I tell them that I am going to carry on my business as long as I have any. I am now my own boss. Why should I give up and let all I have done go to the dogs? The farm is my own. I hewed it out of the woods with my own hands. All I have got I have earned by the little. If I should give up the farm what would I do? Nothing? Then I would soon be through with this world. I am happier here running my own farm than I would be anywhere else. I eat well and sleep well; folks call me young for my age and are surprised when I tell them that I am past eighty-four. I can hire done what I can't do myself, and nobody can dictate to me how I shall do it."

There was fire in the old man's eye as he said this that told of a vigor and strength of character far from ordinary. And no one who knows the annoyance of renting a farm to the ordinary tenant and the constant deterioration of property after one once turns his back upon it himself will for a moment argue with him on the point that he is happier than he would be in any other way. In these days when so many farmers are laying down the implements of their whole life's work and going away to end their days speedily in the city, the simple story of this old man who clings to his farm with such pathetic tenacity is commended. It may be said that not every man possesses the strength to do as he has done. That may be true, for he undoubtedly started out with a reserve of physical power somewhat beyond the average; but more than one man has shortened his days by giving up the farm and settling down to the unnatural life of the town or city when he might have lived many years longer by staying on the farm with its everyday exercise and fresh air and sunshine. So I think our friend and his good wife are after all quite sensible. Do not you?—New York Tribune.

New York City.—Evening waists made with deep box-pleated falls are exceedingly smart and generally becoming. This very attractive May Manton model is suited to all the season's soft, pliable fabrics, but, as shown, is of cream Lierre net and lace with bands of black velvet and drop ornaments of pearls. The draped sleeves make a feature and are graceful in the extreme, but can be omitted and the elbow or full length ones, shown in the small sketch, substituted

EVENING WAIST.

when the yoke is added and the waist made high at the neck.

The waist consists of a fitted lining, that closes at the centre front, the front, back and the box-pleated fall. The front proper is simply gathered and with it the pleated falls close at the under-arm seam. The back is laid in box pleats that are graduated in width to give a tapering effect. The short sleeves are gracefully draped and the shirred shoulders give the desired continuous line with the neck. The long sleeves include snug upper portions and deep cuffs that match the yoke, with full drooping puffs between that form elbow sleeves when the lower portions are omitted.

The quantity of material required for the medium size is for waist two yards eighteen inches wide, with three and three-quarter yards of lace for fall and sleeves; or three and one-quarter seven-eighth yards twenty-seven inches wide, or two and three-eighth yards forty-four inches wide.

Circular skirts made with circular flounces that provide flare at the lower portion are much in demand and suit some figures and materials better than any other sort. The smart model illustrated is shown in biscuit-colored canvas and is trimmed with folds of silk stitched on with corticelli silk, but all skirting and suit materials are appropriate and the trimming can be varied in any way that may be preferred.

The quantity of material required for the medium size is seven and a half yards twenty-seven inches wide, five yards forty-four inches wide, or four and a half yards fifty-two inches wide.

Flat Hats Popular.

Just now the tendency is to wear hats more off the face, showing a considerable amount of forehead and coiffure. The desired effect is easily arrived at by means of a high bandeau. Otherwise the hats are flat, and the most chic are those with very little trimming. The best headgear is that which is difficult of achievement, and the hats with little decoration must be perfect in curve, with clear, bold outlines—in fact, exact copies of the old masters. Milliners, as a class, are most artistic, as may be gathered from the fact that Gainsborough and Romney hats always hold their own.

Passing of the Crepe Veil.

Except for widows in their first mourning the crepe veil is being gradually eliminated. It grows shorter and shorter each year, and is confined more and more closely to the immediate back of the hat or bonnet.

Girl's Tam O'Shanter Caps.

Tam O'Shanter caps are exceedingly becoming to little girls and are much worn for school, play and the like. These excellent models show the latest designs and are suited to cloth, camel's hair, zideline, velveteen and all the fabrics used for caps. As shown, however, the plain cap is made of gray camel's hair felt, the full gathered one of fancy woolen plaid.

The plain cap consists of a round crown that is pleated at the edge and joined to the band that fits the head

BLOUSE WAIST AND CIRCULAR SKIRT.

yards twenty-one inches wide, two and one-quarter yards twenty-seven inches wide, or one and a half yards forty-four inches wide, with one and a half yards of all over lace when high neck and long sleeves are used and the full and waist are of one material.

An Attractive Costume.

Simple waists always possess an inherent charm and are essentially smart. The attractive May Manton model illustrated in the large drawing is shown in peau de cynge, in reseda with stitchings of corticelli silk in a darker shade, is trimmed with drop buttons of openwork silver and makes part of an entire gown; but the design suits all gown and waist materials, the odd bodice as well as the costume.

The foundation lining is smoothly and snugly fitted and closes at the centre front. The waist proper consists of a plain back and deeply tucked fronts and closes invisibly beneath the tuck to the left of the centre, in conformity with the accepted style of the season. The back is drawn down at the waist line but the fronts blouse slightly over the belt. Over the shoulder seams are applied pointed straps that fall over the sleeves and give the long-shouldered effect. The sleeves are full and are finished with pointed cuffs. At the neck is a stock that is cut to a point at the centre front.

The quantity of material required for the medium size is four yards twenty one inches wide, three and comfortably, the left side being held by a rosette and two quills.

The full cap is gathered up closely at the centre and held by a large flat round button that forms the crown, then gathered at the outer edge and joined to the band, which is finished with a flat bow of black velvet ribbon.

The quantity of material required for the medium size is for plain cap five-eighths of a yard in any width; for full cap seven-eighths of a yard twen-

TAM O'SHANTER CAPS.

ty-one inches wide, three-quarters of a yard twenty-seven inches wide, or three-eighths of a yard forty-four inches wide.

SCIENTIFIC & INDUSTRIAL

A late British investigation has shown that thirteen per cent. of manganese makes iron practically non-magnetic. Alloys more magnetic than commercial iron may be produced with nickel, silicon and aluminum.

The Journal de L'Electrolyse, Paris, contains an article describing the Keiler system of manufacturing steel directly from ore. Two furnaces are employed; in the first the ore is reduced, the molten cast-iron collecting on the hearth of the furnace. When a sufficient quantity has thus collected, it is run into a second furnace, and here subjected to a heavy current which reduces the cast-iron to steel.

The Board of Naval Engineers appointed to examine into the merits of oils as a fuel instead of coal have arrived at the determination that it cannot compete with coal for naval uses. Fourteen different devices presented by American inventors for tests were tried, but, it is said, that not one of them would burn oil under a naval boiler in competition with coal, even with the oil at a cost of $1 per barrel.

The first large vapor motor applied to navigation is to be placed on the fishing boat of M. Emile Altazin, now being built at Boulogne. The vessel, which is ninety feet long and is designed to carry three hundred tons, will be provided with a 200 horse-power motor, together with sails, and will also have a twenty-five horse-power motor for operating nets. The motors will use either gasoline or alcohol, of which the tanks will contain 8000 gallons.

A flexible metal hose is made at Phorzheim, Germany, by rolling up a metal band like a screw thread, the joints being made tight by a cord of rubber or asbestos. The material is galvanized steel or phosphor bronze. The hose is very flexible. Its tendency to untwist when roughly handled is overcome by making it double, with opposite windings. It is intended for mining purposes, is eight inches in diameter and will stand a pressure of 200 atmospheres.

A series of experiments at the Bethlehem, Pa., Steel Works has resulted in the perfection of a process for the manufacture of steel wheels for freight cars. Heretofore the cost has been too great, and the freight-car wheels now in general use are made of cast iron, with the tread or wearing surface chilled. The car-wheel problem has become more and more important as the capacity of freight cars has been increased. Should the pressed-steel wheel prove successful, it will mean a sweeping but welcome innovation in rolling stock.

Astonishing effects as a tonic and blood-former are claimed by Dr. Naugier, of Paris, for balloon ascensions. He states that an air trip of two hours gives a marked increase in the red corpuscles of the blood, this increase continuing to be noticeable for at least ten days afterward, and that five ascensions within six or seven weeks impart more benefit to an anaemic person than three months in the mountains. The good results begin almost immediately, prolonged stay in the upper air being of no advantage and possibly harmful. He urges that the city should give poor people the benefits of a change of climate by providing a large balloon capable of taking fifty patients daily on an aerial outing.

Gibraltar's Story.

One hundred and ninety-eight years ago the rock of Gibraltar fell into the hands of the British by assault. The Prince of Hesse Darmstadt commanded the troops, and Sir George Rooke the fleet, and in the remarkably short time of four days the stronghold surrendered. Many times the Spaniards attempted to get back the key to the Mediterranean, but without success, though on one occasion they got 500 men within the fort, but failed to reinforce them. In 1726 it was in the mind of ministers to give back the rock to Spain, but so great an agitatation arose against the step that it was abandoned. There followed a siege by Spain and France, which lasted from 1727 to 1783. On September 13, 1782, no fewer than 40,000 men constituted the besieging army, and in the grand attack delivered on that day 200 heavy guns, forty-seven ships of the line and ten battering ships were employed, and upwards of 5000 red hot shots were fired at the fortifications. Since then the possession of Gibraltar has remained undisputed.

Smiles and Their Meaning.

Some one has suggested that words were invented for the purpose of concealing thought, but there are situations when words are unavailing and it is necessary to have recourse to another method for concealing thought. This is where smiles are useful. Now, there is nothing worthy of remark about a smile when the natural result of a pleasant thought, but the climax of art has been reached when one has learned to smile under circumstances when language—if a true expression of thought—would be decidedly objectionable.

Smiles have a peculiar charm. They can accomplish wonders in an argument, especially if the smiler possesses rosy lips and pearly teeth. "Smile for the lady" is familiar nursery parlance, and when baby smiles it is genuine. But, once beyond the years of babyhood, one can never be perfectly certain of the true value of a smile.—New York News.

THE PINKHAM CURES.

ATTRACTING GREAT ATTENTION AMONG THINKING WOMEN.

Mrs. Frances Stafford, of 243 E. 114th St., N.Y. City, adds her testimony to the hundreds of thousands on Mrs. Pinkham's files.

When Lydia E. Pinkham's Remedies were first introduced skeptics all over the country frowned upon their curative claims, but as year after year has rolled by and the little group of women who had been cured by the new discovery has since grown into a vast army of hundreds of thousands, doubts and skepticisms have been swept away as by a mighty flood, until to-day the great good that **Lydia E. Pinkham's Vegetable Compound** and her other medicines are doing among the women of America is attracting the attention of many of our leading scientists, physicians and thinking people.

Merit alone could win such fame; wise, therefore, is the woman who for a cure relies upon **Lydia E. Pinkham's Vegetable Compound.**

Interesting Experiments.

Interesting to scientific minds are the experiments recently conducted by the Geological Survey to determine the underground flow of rivers and investigate the rate of movement of the underflow. To explain this puzzling question measurements have been made in the river gravels of streams whose surface flows have ceased, and from such measurements more or less trustworthy results have been obtained. One of the most accurate and interesting of these is a series of experiments conducted by Professor Slichter along the valley of the Arkansas River, in Western Kansas. The method is an electrical one. A double row of inch and a quarter driven wells is sunk across the channel of the river whose underflow is to be tested. The up-stream wells are then charged with a strong electrolyte, which dissolves and passes down the stream with the moving water. The passage of the electrolyte toward the lower well is shown by the gradual movement of the needle of an electrical instrument, and the final arrival at the well is shown by a sudden and strong deflection of the needle. It is exceedingly interesting to watch the gradual movement of the water, which can be traced from the beginning of the experiment in this indirect way. By this method the rate of flow ten feet below the bed of the Arkansas River was found to be two and one-half feet a day. Other experiments in the beds of the Hondo and San Gabriel rivers, in Southern California, gave rates of three and one-half, four, five and one-half and seven feet a day.—New York Tribune.

That Old, Familiar Sign.

A Frenchman recently propounded through the columns of the Liverpool Post a problem which may not be without interest for Americans. At any rate it involves a principle of rhetoric which ought not to be disregarded.

"I am in Liverpool since a month," writes the French gentleman, "and I saw many things the which I stupefy, but of these this most amaze me. On your tramcars one writes, 'Passengers are requested not to board or leave the car while in motion.' 'Board' I comprehend not. My friend say it is 'aborder,' to go on ship, therefore one me demanded not to go on car and not go off whilst in motion.

"How can that be? I see thousand passengers since four weeks go on and go off a car, but they all go whilst in motion. Shall one explicate how passengers whilst not in motion have power to go on and off a car?"

Coughing

"I was given up to die with quick consumption. I then began to use Ayer's Cherry Pectoral. I improved at once, and am now in perfect health."—Chas. E. Hartman, Gibbstown, N. Y.

It's too risky playing with your cough. The first thing you know it will be down deep in your lungs and the play will be over. Begin early with Ayer's Cherry Pectoral and stop the cough.

Three sizes: 25c., enough for an ordinary cold; 50c., just right for bronchitis, hoarseness, hard colds, etc.; $1, most economical for chronic cases and to keep on hand.

J. C. AYER CO., Lowell, Mass.

GOOD ROADS

A Link in the Chain.

REGARDING the route of the proposed State road from Elmira to Horseheads there is some difference of opinion as to the most desirable route. To the Lake street route many farmers object because of the street-cars. On Grand Central avenue there are two crossings of the Lackawanna Railroad, one at Hawley street, in Elmira Heights, the other at the northeast entrance of Eldridge Park. These are but a short distance apart, and the Lackawanna Railroad will oppose the maintaining of so important a thoroughfare, when two such crossings are needed. To obviate the latter difficulty it has been suggested that Grand Central avenue be changed so as to follow the east line of the railroad from Hawley street, south to the park, without crossing the tracks. This proposed route was yesterday inspected by the Highway Committee of the Board of Supervisors—Chairman John J. Crowley, Supervisors Crowley, Chamberlain, Welles, Van Order and Holleran.

The road, when completed, will form a link in the great national thoroughfare from New York to Chicago.

The special reason given against the use of Grand Central avenue is that the road is about sixty feet wide between the gutters, and while the State roads are constructed only sixteen feet wide in the driveway, it would be placed in the middle of the road and with the soft roadway on each side, would be of little use to drivers. The Lake street road is narrower, and it is understood the Elmira Water, Light and Railway Company is willing to set its tracks over on one side of the road the entire distance of the way between Elmira and Horseheads, giving the entire two-thirds of the road to the macadam driveway.

Another point is given in the statement that the State Good Roads law will not allow the construction of one of the State macadam roads inside the limits of a city or village, but only in the open country. In that case the road could not be constructed through Elmira Heights village, but would begin at the northern limits of Elmira Heights on Grand Central avenue, and extend only about two and a half miles to the village limits of Horseheads. If the proposed macadam road is placed on Lake street, it would be extended from the northern limits of the city of Elmira to the Horseheads village limits, a distance of about four miles.

It is understood there is $30,000 balance unused in the State Good Roads Fund, which is available, and that "the powers that be" who are in touch with the State Government, are in favor of the Lake street road.—Elmira (N. Y.) Star.

Good Country Roads.

The Pennsylvania Road Drivers' Association proposes to appeal to the Legislature of Pennsylvania to do something at this session for public road improvement. New Jersey, Massachusetts and New York have ceased to agitate for good roads and are enjoying those already built and industriously building more. We have a good roads law on the statute book several years old whose efficacy has never been tested because its going into operation is made contingent on the Legislature appropriating $1,000,000 for it, and that provision has proved thus far only a good way to put it to sleep.

The Legislature of 1899 provided for the appointment of an expert commission to get data and make a report on the general subject of good roads, and a very competent commission was appointed, of which President A. J. Cassatt, of the Pennsylvania Railroad, was Chairman. The commission did its work and reported at the last session, with no corresponding result in legislation. The State now is prosperous. It will have for its Governor a practical farmer, who understands the economic value of good roads. It has the example of several States before it, which have successfully grappled with the good roads problem, and it will have the Pennsylvania Road Drivers' Association spurring it to action. All this ought to result in some practical good roads legislation.

The Federal Government has built sample roads in Maryland, West Virginia, Ohio and North Carolina. In co-operation with the Southern Railway Company, it has carried on a campaign of education in Virginia, North Carolina, Tennessee, Alabama and Georgia. The railroad company assisted in this because of its conviction that good roads develop the country round about, and it is therefore helpful to the business of a railroad to have good country roads leading to its stations. If that idea should find lodgment in the breasts of the very efficient management of the Pennsylvania Railroad there would be in- ed hope for the early construc- improved roads in this State.—elphia Press.

Better Roads vs. Better Schools.

One of the most beneficial results of road improvement is the facility it gives to consolidate country schools and thus concentrate our children into central buildings, so making graded schools possible in our country districts. In traveling around the State we have noticed that where improved roads exist the children, by means of bicycles, easily go long distances to central schools; thus graded roads possible graded schools, the improads working in harmony with the State education law, giving the children of the rural districts the same advantages as those residing in cities. In one year forty-four Connecticut towns, by means of improved roads, were enabled to give free transportation to a large number of their pupils. Eighty-four small schools were closed and 849 children rode to the central schools. The cost of transportation was about $12,000, but a gross amount of some $20,000 was saved, leaving a net saving of some $8000. This saving was only a small part of the benefit derived, for it resulted in a better attendance and better schools. This close co-ordination between improved roads and education cannot be too strongly impressed upon the public attention.—New York Tribune.

CAPITOL "WHISPERING GALLERY."

What Causes Its Remarkable Peculiarity —Attempts to Remedy It.

The "whispering gallery" of the old Hall of Representatives in the National Capitol, now known as Statuary Hall, has long been an object of interest, and, to the uninitiated, of curiosity. In an apparent erratic manner, but with actual mathematical accuracy, the voice of a speaker, even when uttered in a whisper, echoes with remarkable distinctness from one place to another, and a person standing in the gallery on the extreme east may express a whispered remark, audible only at the opposite side of the chamber 110 feet away. From a scientific standpoint this phenomenon may be easily explained. The chamber is in the form of a quarter of a sphere, the centre of which would come five or six feet below the floor. Sound waves projected against the spherical ceiling rebound as a billiard ball carroms.

While this peculiarity is interesting and curious it always seriously interfered with the use of the chamber for legislative purposes, and numerous expedients were resorted to with the hope of remedying it. At one time a canvas false ceiling was stretched across the room and the objectionable acoustic properties of the hall were destroyed. In recent renovations the old wooden ceiling has been replaced with fireproof construction, but the echoes may still be heard. When the chamber was renovated last summer, in painting the columns to resemble marble the artist worked into the marbleizing excellent likenesses of Presidents McKinley and Roosevelt, but their presence, in form similar to the newspaper picture puzzle, was deemed inappropriate and they were subsequently removed. Although not generally known there are many curious pictures in the real marble columns of Statuary Hall which cannot be removed, for they are in the natural veins of the marble, which is known as pudding stone. An Indian, a deer, a girl's head and some emblems are clearly discernible once they have been pointed out.

There are other echoes in the Capitol, notably in the Supreme Court room and the various committee rooms, and even in the rotunda, but they can be heard only when perfect quiet prevails.—New York Tribune.

WORDS OF WISDOM.

The plainest face blossoms into real beauty when the heart is the home of love.

Whenever we lift at another man's burden, we gain more strength to carry our own.

Do not confine your children to your own learning, for they were born in another time.

As a rule of life, one finds that the truth lies somewhere between first impressions and final decisions.

The moment past is no longer: the future may never be: the present is all of which man is the master.

The source of all passions is sensitiveness—it is the errors of imagination that transform them into vices.

A man should never blush in confessing his errors, for he proves by his avowal that he is wiser to-day than yesterday.

There are three who are especially beloved by God: he who is forbearing, he who is temperate and he who is courteous.

A man who talks constantly has a thousand ways at hand in which to make a fool of himself. A silent man has but one.

We do not grow away from our beginnings, nor from any of our successive stages of growth; we simply keep adding, inch by inch, to our mental and spiritual as well as to our physical stature, but we never grow away from any part of it—we can only "add on."

Worry is the dominance of the mind by a single, vague, restless, unsatisfied, fearing and fearful idea. The mental energy and force that should be concentrated on the successive duties of the day is constantly and surreptitiously abstracted and absorbed by this one fixed idea.

Worry must not be confused with anxiety, though both words agree in the meaning originally, a "choking," or a "strangling," referring, of course, to the throttling effect upon individual activity. Anxiety faces large issues of life seriously, calmly, with dignity. Anxiety always suggests hopeful possibility; it is active in being ready and devising methods to meet the outcome. —New York News.

The Way It's Done in Turkey.

Turkish methods are usually arbitrary, often contradictory. Mr. Morawitz, the author of the Finances of Turkey, has received from the Sultan the Grand Cross of the Order of the Medjidie in recognition of the excellence of his work. At the same time the Turkish censor has prohibited the circulation of the book in Turkey, and has ordered the police to seize any copies which have come under their notice.

The Funny Side of Life.

WOMANLIKE.

She sits beside the window all the day,
But never sees the people who go by;
Her look is very, very far away
And now and then she draws a gentle sigh.

She waits for one to come who never will,
For one who bade her wait for him one day;
And if he came she'd spurn his touch, but still
She waits for him and grieves her life away.

—Chicago Record-Herald.

DISINHERITED.

"Remember, my daughter, that 'the meek shall inherit the earth,'"

"Yes! But some chesty individual will always smash the will."—Puck.

THE REGULAR THING.

Cleverton—"You've been pretty ill, haven't you?"

Dashaway—"Yes, sir! So ill that several doctors had to be called in disagreement."—Puck.

WHY ASK?

"And what does your son intend to write—historical novels or literature?"

"As I said before, he expects to get rich from the work of his pen."—Chicago Record-Herald.

A SURE THING.

Flubdubbe—"Do you suppose that girl Bilkins is to marry is as rich as she is said to be?"

Pinhedde—"No question about it—I know Bilkins."—The Smart Set.

A STUDY OF A RICH MAN.

"I wonders how a rich man feels?"

"Well, I'll tell you. He feel disaway: Now dat he got it he can't keep it; en ef he do keep it somebody else will sho' git it!"—Atlanta Constitution.

HIS BADLY CHOSEN PHRASE.

"Don't you think that young Hunker wants to marry Miss Dollyers for her money?" asked Hojack.

"I think so," replied Tomdik. "I heard him say that he loved her for all she was worth."—Judge.

POSITIVELY RUDE.

Miss Cutting—"I'm surprised to see you here, Mr. Softleigh. I thought you were traveling in Europe."

Softleigh—"Weally, I—aw—did think of going, doncherknow, but—aw—at the last moment I changed me mind."

Miss Cutting—"Indeed. But I am sure you couldn't have lost anything by making the change."—New York World.

RESPONSIBILITIES.

"Remember," said the serious citizen, "that wealth has its responsibilities."

"Yes," answered Mr. Cumrox. "So long as you are humble and obscure you can say 'I seen it' and 'I done it' and eat with your knife all you want to."—Washington Star.

HE KNEW.

Mrs. McCaul—"Isn't this little Johnny Gadaway?"

Johnny—"Yes'm."

Mrs. McCaul—"I was just going to call on your mamma. Is she at home?"

Johnny—"No'm! She's just went down on the next block to look for me."—Philadelphia Press.

JUST THE SIZE.

The silver moon peeped up behind the hills of Lake Roland.

"What is the height of your ambition?" she asked, more to break the monotony than anything else.

"Oh, about five feet two inches!" he replied, gazing into her dark eyes.

The cards are out.—New York Herald.

THE COMMON ENEMY.

Captain Hull was recounting the glorious victory of the Constitution.

"And so," he concluded, "we were plainly one too many for the Guerriere."

"Yes," interrupted his officer; "we were a Hull lot."

Throwing bouquets at each other, they then retired to fight the Secretary of the Navy.—New York Times.

ITS BRIEF CAREER.

In an evil hour the Association of Kitchen Ladies, numbering forty, decided to hold a cookery competition.

Five prizes were to be given.

The affair came off, and the five prizes for excellence in cookery were awarded.

Whereupon the thirty-five kitchen ladies that had failed to win any of them indignantly resigned and broke up the organization.—Chicago Tribune.

Hunting Musk Oxen in the Arctic.

Hunting musk-oxen in Northern Greenland and Grinnell Land, though entailing a great deal of work is not difficult, and seeing the animals is tantamount to securing them. Either from natural stupidity or as the result of their freedom from molestation in their Arctic fastnesses, they are comparatively tame. A large herd, on the approach of men and dogs, leisurely forms in a bunch, rails together, heads radiating, calves, if any, under their mothers, and the big bull leader standing outside of the bunch, head down and pawing the ground, ready for a charge in any direction. Single animals, or two or three together, run only to the nearest rock, ledge, hill-top or other natural feature, which may afford them some protection in the rear, when they turn and face the enemy, falling an easy prey to the rifle.

If there is not much skill required in killing musk-oxen, it frequently requires a quick eye and trigger to save a dog from being crushed or tossed, mangled, into the air.

As will easily be seen this peculiarity means their extermination in any locality within a very few years after man gains a foothold.—Commodore Robert E. Peary, in Leslie's Monthly.

Father of Stories About Doctors.

Dr. W. W. Keen, of Philadelphia, the surgeon who wrote recently to Senator Gallinger a striking open letter in defense of vivisection, has the hobby of collecting anecdotes of physicians. These anecdotes he preserves in scrapbooks and in costly extra-illustrated volumes, and sometimes he reads selections from them at medical festivals.

"The most common medical anecdotes," said Dr. Keen recently, "suggest that the physician is a murderer. All such stories are as old as the hills in their fundamental idea, though your modern writer puts them in new clothes. And they look ghastly in their new clothes: as ghastly as though you should array a corpse in fancy dress.

"A lawyer and a doctor were conversing. The doctor said, 'Your profession doesn't make men angels, sir.' The lawyer answered, 'No, it is yours which does that.'

"This anecdote, which is 2000 years old," said Dr. Keen, "is reputed to be the parent of all the myriad of medical anecdotes that now exist."—New York Tribune.

The Creation of a New Man.

The successful fancier breeds for beauty and utility combined. If he desires to create a new strain he must be an imaginative soul. He must erect in his mind's eye an ideal fowl and then persevere in his endeavor to produce one like it. He jots down a description of his visionary bird from beak to toenail. If he prefers to go by the standard he will find that very exacting; every detail is looked to scrupulously; length and color of comb, arch of neck, length and style of tail, depth of breast, length and color of legs, design and color of plumage, etc. Having decided upon an ideal he mates his birds and starts his strain, picking from each brood the most perfect specimens and gradually working toward this ideal through generation after generation. It is a sort of partnership arrangement with providence; the fancier attends to the matings and sees that they are properly cared for, while providence does the rest. — Leslie's Monthly.

Indigestion, congested liver, impure blood, constipation, these are what afflict thousands of people who do not know what is the matter with them. They drag along a miserable existence; they apply to the local doctors occasionally, and sometimes obtain a little temporary relief, but the old, tired, worn-out, all-gone, distressed feeling always comes back again worse than ever, until in time they become tired of living, wonder why they were ever born, and why they are alive unless to endure constant suffering. To such sufferers there is a haven of refuge in Dr. August Koenig's Hamburg Drops, which was discovered more than 60 years ago, and which is a wonderful medicine. One trial will convince the most sceptical that any or all of these difficulties may be removed, and a perfect cure effected by taking Dr. August Koenig's Hamburg Drops. Get a bottle at once before it is too late.

The fellow who still has the first dollar he ever earned is pretty apt to hold on to the last.

Catarrh Cannot Be Cured

With local applications, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surface. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

PROMINENT PHYSICIANS USE AND ENDORSE PE-RU-NA.

C. B. Chamberlin, M. D., writes from 14th and P Sts., Washington, D. C.:

"Many cases have come under my observation, where Peruna has benefited and cured. Therefore I cheerfully recommend it for catarrh and a general tonic."—C. B. CHAMBERLIN, M. D.

Medical Examiner U. S. Treasury.

Dr. Llewellyn Jordan, Medical Examiner of U. S. Treasury Department, graduate of Columbia College, and who served three years at West Point, has the following to say of Peruna:

Dr. L. Jordan.

"Allow me to express my gratitude to you for the benefit derived from your wonderful remedy. One short month has brought forth a vast change and now consider myself a well man and I after months of suffering. Fellow-sufferers, Peruna will cure you."—Dr. Llewellyn Jordan.

Geo. C. Havener, M. D., of Anacostia, D. C., writes:

The Peruna Medicine Co., Columbus, O.:

Gentlemen—"In my practice I have had occasion to frequently prescribe your valuable medicine, and have found its use beneficial, especially in cases of catarrh."—George C. Havener, M. D.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Among the 5000 tramway car drivers and conductors in Vienna there are stated to be 400 knights, fifty barons and four counts, beside other noblemen.

The Church of England bishopric of the Mackenzie River covers 600,000 square miles. That is five times the size of the whole United Kingdom.

Some people are fond of looking for a needle in a haystack, while others are too lazy to even look for a haystack.

$3.00 W. L. DOUGLAS SHOES $3.50
UNION MADE

W. L. Douglas makes and sells more men's $3.50 and $3.00 shoes than any other two manufacturers in the world, which proves their superiority; they are worn by more people in all stations of life than any other make.

Because W. L. Douglas is the largest manufacturer he can buy cheaper and produce his shoes at a lower cost than other concerns, which enables him to sell shoes for $3.50 and $3.00 equal in every way to those sold elsewhere for $4 and $5.00.

W. L. Douglas $3.50 and $3 shoes are worn by thousands of men who have been paying $4 and $5, not believing they could get a first-class shoe for $3.50 or $3.00.

He has convinced them that the style, fit, and wear of his $3.50 and $3.00 shoes is just as good. Placed side by side it is impossible to see any difference. A trial will convince.

Notice Increase (1899 Sales: $2,203,883.21 in Business: 1900 Sales: $5,024,340.00 A gain of $2,820,456.79 in Four Years.

W. L. DOUGLAS $4.00 GILT EDGE LINE, Worth $6.00 Compared with Other Makes.

The best imported and American leathers, Heyl's Patent Calf, Enamel, Box Calf, Calf, Vici Kid, Corona Colt, and National Kangaroo. Fast Color Eyelets.

Capsicum Vaseline

PUT UP IN COLLAPSIBLE TUBES.

A Substitute for and Superior to Mustard or any other plaster, and will not blister the most delicate skin. The pain allaying and curative qualities of this article are wonderful. It will stop the toothache at once and relieve headache and sciatica.

We recommend it as the best and safest external counter-irritant known, also as an external remedy for pains in the chest and stomach and all rheumatic, neuralgic and gouty complaints. A trial will prove what we claim for it, and it will be found to be invaluable in the household. Many people say "It is the best of all your preparations."

Price, 15 cents, at all druggists, or other dealers, or by sending this amount to us in postage stamps we will send you a tube by mail.

No article should be accepted by the public unless the same carries our label, as otherwise it is not genuine.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

Volunteer firemen of North Bergen, N. J., have come to the relief of Mrs. Charles Bennett, widow of one of the town's best remembered firefighters, whose home was to be sold to satisfy a mortage of $1,000. The volunteers raised the money to pay off the mortage, and have notified the widow that her home is her own again.

John Kirke, a Philadelphian, and the horse he drove had a narrow escape from death last Monday morning at the Washington-St. crossing, Camden. A Bridgeton train struck the wagon. The wagon was impaled on the pilot of the locomotive and carried a block. Kirke remained in his seat and sustained a single slight cut on the head. The horse was dragged by a trace a hundred feet, but escaped injury.

George Kennedy, president of Butchers' Union No. 209, and an employe of Joseph Igoe, of the National Beef and Grocery Company of Jersey City, while cleaning a goose for a customer last week, found a diamond ring in the bird's gizzard. The ring was put in Mr. Igoe's possession. A local jeweller today appraised its value at $125. The goose was one of a lot purchased from Baltimore, Md. If not claimed within thirty days Mr. Kennedy will claim it as his own.

Rev. David H. King celebrated the sixteenth anniversary of his pastorate over the First Presbyterian Church Vineland, last Sunday. Souvenirs were given to members of the church. Dr. King is known as the "marrying minister," who promotes *matrimony* among his flock. The first year he married four couples, and the past year twenty-eight. During the sixteen years he has married 250 couples, preached 1,757 sermons, made 9,102 pastoral calls and led 765 prayer meetings.

Isaac Smick, a farmer near Belvidere, has been the victim of milk thieves for a long time, and, although he chained a ferocious dog near the cow stables, the thieves were not frightened away. Last week Mr. Smick went to the barn and remained on guard, where he could observe everything in the cow stable. After a few hours he was rewarded by discovering the thieves. The pigs were kept in a sty ajoining the cow stable, and two of the young swine had formed a habit of geting in the stable and doing the work of the milkmaid.

Thomas Thompson, a negro who lives in a little hut near the Snake Hill Penitentiary at Secaucus, N. J., celebrated the 101st anniversary of his birth, Sunday. "Black Tom," as he is known throughout Hudson county, was born in slavery at Moonachie, N. J., in 1802. Tom doesn't know the exact day of his birth, and has been in the habit for many years of celebrating it on the first Sunday in January. When quite young "Black Tom" was sold to an ancestor of the present District Court Judge, Abel I. Smith, but bought his freedom before slavery was abolished in New Jersey in 1830.

About twenty years ago a society of women was organized in the First Presbyterian Church, in Upper Rahway, called the Sharon Missionary Band. One of its objects was to look after the inmates of the almshouse every Sunday afternoon, to read to them from the Bible and hold a prayer service. On Christmas Day the inmates were to be provided with a turkey dinner, and good, solid, substantial repasts of roast beef, chicken or lamb on Thanksgiving and other holidays. The original members of the band have dropped out or died, but the younger ladies of the church have carried on the work regularly ever since, and rain or shine, mud or snow, two of them trudge out to the farm every Sunday afternoon, where they are anxiously looked for and welcomed by the poor unfortunates who are ending their days there. Every appointed day the holiday dinner reaches them, too, all right.

Officers of Major James H. Dandy Post No. 43, Grand Army of the Republic, Perth Amboy, received word Saturday of the death in Brooklin of Fred C. Shumway. Mr. Shumway was a veteran of the Civil War, through which he served as a member of the First Regiment of Connecticut Cavalry. He was a printer and claimed his residence in Perth Amboy for nearly thirty years. For a long time he had been known as "Shum" and he was a frequent visitor to the printing offices of northern New Jersey. In 1894 he fell from the loft of a stable in this city and broke his hip. The next year he obtained a pension and received $500 as the first payment. He quit work until the money was all gone. Mr. Shumway never married and he always claimed that it was because the sweetheart of his youth died of pneumonia after being immersed as a Baptist convert in a Connecticut river in midwinter. Their home was furnished, ready for the wedding, which was to have taken place on the day upon which the young woman was buried. Mr. Shumway gave the house and all it contained to his brother and all his life was a wanderer. Major Dandy Post will bury the old printer.

In his annual address to the City Council Monday night, Mayor C. K. Seaman called attention to the antiquated features of the city charter, which was adopted in 1870, when Perth Amboy was a city of 3,500 people. The population is now over 20,000 and Mayor suggested that it might be well to consider having the charter set aside and taking advantage of the State laws governing cities.

In Loving Memory of our Sister and Friend Annie Newman (wife of Wm. T. Newman) who Died Christmas Day, 1902.

GONE HOME.

A noble life has reached its end,
With Christ Eternity to spend;
The cross so meekly borne, laid down,
From Him received the promised crown.

She suffered much, and suffered long,
Is singing now the great, new song;
With millions of redeemed declare
"A pleasant place fell to her share."

A widow, and a pilgrim here,
She leaned on Christ her heart to cheer:
And through her suffering days and nights,
Would dwell on heavens glorious sights.

We gaze across to heaven's pier,
And get a glimpse of heaven here:
We see our dear departed there,
Where robes of white the ransomed wear.

—SOPHIE STABL.

The Legislative Session.

The old-established and favorite journal, the Trenton *State Gazette*, offers new and attractive features to the New Jersey reading public. The *Daily* has recently been enlarged to the extent of ten columns upon its former size, is now supplied with full telegraph news service, and has been improved by the addition of new type. Those of our readers who want to be thoroughly well informed in regard to the approaching Legislative session, which promises to be one of the most exciting and interesting, as well as important, of recent years, cannot do better than take the *Gazette* for the session. It has an established and unrivaled reputation for the accuracy, completeness and impartiality of its reports of Legislative proceedings. The *Daily* for the ensuing session of the Legislature will be furnished for $1.50, postage prepaid; for the *Daily* for the session and the *Weekly* for the balance of the year, $2.25, postage prepaid. This offer applies to both the old subscribers of the *Weekly* and those who may become new subscribers. The *Weekly State Gazette* has also been reduced in price to $1.00 per year, improved by new type, greater care and discrimination in the preparation of its reading matter, the latest news and new market reports, making it altogether the the most interesting and cheapest newspaper in this State. Send for a specimen copy. Address the

WHAT ALL THE WORLD THINKS
on all live questions of the day, Political, Scientific, Religious, Literary, Sociological, can be found week by week in the most accessible form in

THE LITERARY DIGEST

Issued weekly. 32 pages. Illustrated.

It is ALL PERIODICALS IN ONE, and gives you in two hours each week the gist of every side of question in controversy, with absolute impartiality. It tells just what busy men and women want to know, and stops there. You can't trip a LITERATY DIGEST reader on facts.

Circulation Doubled Every Year

Reasons Why: It is of "immense assistance" (SENATOR FRYE), and "no similar Publication could take its place" (SENATOR FAULKNER). It is "always read with great vidity" (DONALD G. MITCHELL), since it is "the most valuable periodical of its kind" (PRESIDENT FAUNCE). It is "the best periodical of its class" (JOSEPH COOK), "invaluable" (ex-GOVERNOR ALTGELD), and "an absolute necessity" (Rev. Dr. E. P. POWELL), hence "a time-saver, a money-saver and a worry-saver" (EDWIN MARKHAM).

TRI-WEEKLY TRIBUNE.

DEAR SIR:

You were formerly a reader of The New York Weekly Tribune. We now want to introduce to your notice a new edition of THE TRIBUNE.

The Tri-Weekly

and to offer you special inducements for a trial subscription.

THE TRI-WEEKLY TRIBUNE

has taken the place of the former SEMI-WEEKLY TRIBUNE and is an outgrowth of the imperative popular demand for more frequent issues. It is printed before sunrise Monday, Wednesday and Friday, and mailed at the same time as the Daily. In effect,

The Tri Weekly Tribune

is a fine, fresh, every-other-day newspaper, each issue of which is as good as a daily of the same date, and in which, every week, much space is devoted to pictorial, literary and humorous features. It has, furthermore, all the special features of the Weekly

In typographical appearance THE TRI-WEEKLY is the handsomest edition printed in this office, with its fine headings attractive make-up, and great variety of half-tone illustrations. We are often able to publish in this edition THE TRIBUNE'S special War Cables from Europe, sent from London before daybreak of the mornings of issue.

THE TRI-WEEKLY

has one half more issues per week than the old Ssmi-Weekly, and costs half a dollar less a year. It is probably the best substitute yet found for a metropolitan daily, and will meet the wants of every reader, who does not depend upon receiving the paper every day. We think you will be delighted with THE TRI-WEEKLY, and will never regret the experiment of a Trial subscription.

THE TRI-WEEKLY TRIBUNE
$1.50 a Year.
SPECIAL TRIAL SUBSCRIPTION
for old Weekly subscribers for five months, 50 cents.

☞ Those who take advantage of this offer will find it a bargain.

THE TRIBUNE,
NEW YORK

By Special Arrangement we are able to furnish the Tri-Weekly Tribune and the Weekly Revie —both for One Year—for $1.50. Address The Review, Plainfield N. J.

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

The foundation is laid for A. V. Searing's, Jr.'s new house on Westervelt avenue.

Annual meeting of the North Plainfield Board of Education, Tuesday night, March 17 in High School.

Hope Y. M. A. will give its second minstrel performance on Tuesday, Wednesday and Friday evenings of next week.

The Independent Fife and Drum Corps attended the dance of the Liberty Corps, of Elizabeth in full uniform Tuesday night.

J. W. Cabart, decorator and paperhanger, will remove from his present location to 43 Somerset street, in the Thorn building.

The King's Daughters of Grace M. E. Church will have a cake sale in the church Saturday afternoon and evening March 14.

Wm. R. MacClymont has resigned his position as choirmaster at the Church of the Holy Cross. Resignation will take place May 1st.

The Independent Fife and Drum Corps gave a reception and ball at Steingerbund Hall last evening which was largely attended.

A missionary social was held in Warren Chapel Tuesday evening. The program was composed entirely of musical numbers, and was greatly enjoyed.

Dr. Jesse H. Holmes, of Swarthmore College will be present at the Friends Meeting House, Watchung avenue, tomorrow morning at 11 o'clock.

The Original Florodoras of Plainfield will give their annual masquerade ball in Bound Brook, Friday evening, April 17. Music will be furnished by Suhr's imperial orchestra.

Rev. H. Johnson will hold a Swedish Lutheran service every Sunday afternoon at 3:30 o'clock in the German Luth- [illegible]

[illegible] field Common Council Monday evening it was decided to enlarge the sewer system of the city and install a pumping plant the entire cost to approximate $65,000.

John Schenck, of Manning avenue, who was injured three weeks ago by coming in contact with a live wire which caused him to fall from a ladder, is now able to sit up, and was removed from Muhlenberg Hospital to his home Monday.

At the regular session of the Plainfield Common Council Monday evening the Gamewell police patrol system was unanimously adopted and with the signature of the city officials to the contract the work will be started in a few weeks. The cost of installing the system is given as $6,025.

Dr. Thomas C. Hall, who is supplying the pulpit of the Crescent Avenue Presbyterian Church will speak to men at the Y. M. C. A. Hall on Sunday afternoon at the Y. M. C. A. Hall on Sunday afternoon at 4 o'clock. Dr. Hall is an especial favorite with men. Charles L. Lewis, baritone of the famous Lotus Club, will sing.

At the annual meeting of the Watchung Spring Water Company, Tuesday evening, the following officers were elected: President, Dr. P. J. Zeglio; vice president, F. Sandford; secretary, Clarence E. Teel; treasurer, John A. Staats. Directors, Dr. P. J. Zeglio, John A. Staats, Fred Sandford, A. I. Smalley and S. B. Wheeler.

The first of a series of five entertainments to be given by the Y. M. C. A. in their supplemental course was given last Monday evening when the Park Sisters assisted by Miss Pike, an elocutionist, treated the audience to a very enjoyable program. The program was varied in the different kinds of instruments used, which consisted of cornets, mandolins and zither. Miss Pike was also enthusiastically received.

Notice to Voters.

A meeting of the Somerset County Board of Registry will be held at Somerville today, so if any residents of this borough neglected to register here last Tuesday they now have another opportunity.

Lost His Right Hand and Arm.

Fred Childs, of Basking Ridge, a brother of Senator Childs, caught his right hand in a feed chopper Thursday, and before the machine could be stopped his arm had been drawn in up to the elbow.

Police aid summoned by telephone in residence. The New York & New Jersey Telephone Company.

Former Trolley Schedule Resumed.

The old schedule of running the trolley cars was resumed Monday. For months the public, when transferred from one car to another, has been annoyed by having to wait at the station on Watchung avenue for any of the cars going in different directions. Now this has been changed and the change is welcomed, and if now conductors can be allowed to furnish transfers again, the company will still further please the public.

Members of Church Give Liberally to Missions.

At the annual missionary service held in Grace M. E. Church last Sunday, Rev. H. K. Carroll preached at the morning service and Rev. E. L. Earp, pastor of the church preached in the evening. In response to the eloquent appeals made a collection amounting to $200 was taken up.

Board of Health Elect Officers.

The regular monthly meeting of the Board of Health was held Monday evening.

Election of officers resulted in the re election of Andrew Love, president; Rev. W. E. Honeyman, secretary and treasurer, and William N. Pangborn, inspector.

The question of dumping in places other than that prescribed by the Mayor was brought up and Burke, Mrs. John Brown's agent being present, positively denied ever dumping any refuse except in prescribed limits.

Mrs. Sisson Laid Away.

Mrs. T. A. Sisson, of 41 Somerset street, passed away Sunday morning after an illness of several months. The funeral was held from her late home Tuesday evening, Rev. J. O. McKelvey, officiating. Interment was made in Hillside Cemetery Wednesday morning.

Mrs. Sisson leaves a husband, daughter and three sons.

Supplemental Course.

At the Y. M. C. A. Hall Monday night, the second of a series of five entertainments in the Y. M. C. A. supplemental course, will be given by Charles E. Underhill who will present Sheridan's Great Comedy "The Rivals." Mr. Underhill will [illegible] is one of the fixed stars in the Association Course. His appearances on our course have been so numerous that we have lost the count; and we hope to have him many times in the future. He is an accomplished reader of remarkable versatility, a genial man and a general favorite."

Blame Engineer Davis and Railroads.

The Grand Jury of Union County which has been investigating the Westfield railroad disaster in its report to Judge Vail finds Engineer Davis primarily responsible for the wreck in that he ran his train past five danger signals set against him, and that as his engine was enveloped in steam caused by a leaking steam chest or faulty injector, he should have shut off steam or stopped the engine until he found out whether or not the track ahead of him was clear.

They feel that while the engineer was the one person directly to blame the railroad companies employing him should not escape some censure for the laxity that appears to exist in the examination of the running condition of the engines and in the use of passenger cars of such weak construction as to be incapable of resistance in case of collision and which are heated with stoves.

Plainfield Pastor Scores City Council.

Rev. John McMurray, pastor of the Monroe Avenue Church, in his sermon Sunday evening spoke strongly against the action of the Plainfield Council last week in granting a new saloon license for West Third street. He claimed this license was granted in the face of conclusive evidence of illegality in securing the needed number of signers for an application, and against the protest of some of the most respectable business men of that part of the community. He praised Messrs Tyler, Pray, Garrigues and Douil, who voted against the granting of the license and thus "by their votes expressed their conscience in the matter and their freedom from political bossism and saloon domination."

Here is the Ticket in Full.

The following ticket has been selected by the Borough Democrats:

For Mayor, William J. Conroy; for Councilmen, Lambert B. Bodine and Charles W. Haaden; for Commissioner of Appeals, John T. Case; for Justice of the Peace, Leander W. Hammond.

The Somerset County Board of Freeholders will meet at the Court House in regular session Wednesday, March 11.

Keep in touch with your doctor by telephone. The New York & New Jersey Telephone Company.

WILLIAM J. CONROY, Candidate for Mayor.

The subject of this sketch was born in Peapack, Somerset county, in 1857. He received his early education at that place and learned his trade there. He lived at Peapack until twenty years of age, when he went to Chester and engaged in business there. From Chester he went to Newark, and from Newark to Westfield, being engaged in business at those places. He came to North Plainfield in 1890 and opened a general blacksmithing shop in connection with the sale and manufacture of carriages, wagons, etc. From a modest beginning his business has steadily grown until he now employs twelve men most of the time. He owns considerable property in North Plainfield, and is one of the most successful business men in the borough—due to his business ability, strict honesty in all his dealings, perseverance and pluck.

Mr. and Mrs. Conroy have six children, the eldest, a daughter, is a graduate of North Plainfield High School and a member of the 1903 class of the State Normal School at Trenton.

Mr. Conroy is a charter member and a trustee of the Grace M. E. Church of North Plainfield. He is devoted to the church and takes an active interest in the Sunday School.

His personal habits are such as becomes any sincere man occupying the same position in life.

Mr. Conroy is not, nor has he ever been an active politician, although he has always taken an interest in Democratic politics.

Mr. Conroy when interviewed by a representative of the *Review* said that as he is in the race he will strive by all fair and honorable means to become the winner. He promises if elected to do his very best for the people and that he will not be extravagant in conducting the borough affairs.

He stated that he voted against annexation last fall and has no reason for changing his opinion on the question as expressed by him at that time.

On the high license question he believes that as the government recognizes the saloon keepers as legitimate business men, these men should be entitled to some consideration. Personally he has no use for the saloon.

He believes that some day it will become necessary to have a sewer system here, but that no undue haste in the matter is necessary.

MAYOR SMALLEY'S "LOYALTY."

Following is a stenographic report of Mayor Smalley's speech before the Senate Committee at Trenton on Tuesday, February 10, 1903, in which he argued in favor of the annexation movement.

"The election, was carried by misrepresentation and a bundle of money. We know we could carry it the other way if we had another chance. We want to get into the city, and if we have another chance we will win. We are going to leave Somerset County. The men who are in this movement are as determined a band of men as any in the State. We may not get what we want now, but we will some time. No power on earth can stop us. We are up against it in Somerset County. Over on one side of the county, as we are, we can't get our rights, financially or otherwise. All we want is to be left alone in this thing and we will decide the matter very positively."

Why Republicans Should Vote for W. J. Conroy for Mayor and why all Good Citizens, Regardless of Party, Should Support Him.

Because, if elected, he would be Mayor, and not a "Boss."

Because, if elected, he would be content to be Mayor, and not try to run the whole county.

Because, if elected, he would not use the people to [illegible] his own political ambition.

Because, if elected, he would not manoeuvre and intrigue to become Mayor of Greater Plainfield.

Because, if elected, he would not use his position to build up a machine.

Because, if elected, he would not "bull doze" office holders and citizens of the Borough who did not happen always to agree with him: this is a free country. Because, if elected he would be satisfied with one or two terms, and not force himself on his party for a third term, as the people of the Borough, generally, are oppposed to a third term. Because, he is a man of [illegible] interested in the welfare of the Borough, and can always be found t[illegible]

Be[illegible]

"Fair Play" Springs a Good Point.

EDITOR OF REVIEW:

Mayor Smalley went into office with the promise that he would reduce taxes, and that was the great point he made. How has he done it? The tax rate in 1898, the year before he was elected was $2.20 on the $100, and the rate in 1902 was $2.58, an *increase of 38 points*. This is a big reduction, to be sure! Of course some one else is to blame—always is. Old Adam threw the blame on Eve, and Eve threw it on the serpent, and so it always has been, but the fact remains that the promise to reduce was made, and the opposite has occurred. At that rate it will soon be "reduced" to $2.80 or $3.00. Still further, the Borough report just issued shows that they propose to raise for the ensing year $20,800, or $1200 more than was asked for last year, and that too after cutting down the poor fund $500. The *poor must get on with $1,000 instead of* $1500 as before and yet $1200 more is desired for the coming year. Marvelous reductions we are having!

FAIR PLAY.

Taxpayer Wants Disturbing Element Removed.

EDITOR OF REVIEW:

On Tuesday next two voters of this formerly peaceful and quiet community will be called upon to select a Mayor and other officers to serve the public in their respective capacities and for the peace, quiet and welfare of all parties it goes without denial that a change is desirable. The untruthful, slanderous and malicious stories that have been published broadcast about North Plainfield does not help the town nor tend to make the place preferable as a place of residence to the outsider in search of a suburban home. The methods adopted by those who cannot have things all their own way are detrimental to property and society and the borough voter must choose the course that is to [illegible] determine[illegible] he borough in the future next Tuesday.

A vote to continue the present Mayor at the head of the borough government means as nearly everybody knows, but few care to publicly express, a personal endors[illegible] mind [illegible] cials in [illegible] own ac[illegible] the case of Chief of Police Campbell, who for the past two years has been seen exercising the Mayor's horses and acting as his driver or hired man.

A change is needed. A change is demanded and the voter must be blind indeed who will not see the necessity of a prompt return to peaceful ways and an unselfish manner in the transaction of the public business. Smalley as Mayor has run everything and everybody connected with the borough with the sole eye to Smalley.

Two years ago when he was re-elected he immediately made room for the tax collector in his building on Somerset street and also rented one of his houses to the Chief of Police. He has always had an eye on the business end of the office. "Oh, he's smart", is what his cronies say to any one who does not see as they see.

There must be an improvement in North Plainfield if the place is to keep pace with the times and that improvement cannot ever take place with Smalley at the head of affairs.

Voter, do your full duty on Tuesday next. Vote away the disturbing element that is depreciating the property. Vote *into office men* who will attend only to the public business and who will do that, which without discordant strife, reflects not only on the citizens at large, but which casts an unjust discriminative on the borough at large.

TAX PAYER.

Says There are Others.

EDITOR OF REVIEW:

It is boldly asserted that Mayor Smalley has made the best Mayor that North Plainfield has ever had. It is well to look at the records of those who have preceded Mr. Smalley, and see if they have not made as good Mayors as he, and that they are men who have served the Borough as faithfully and as well.

The first Mayor was John H. Van Winkle. He was chosen as a non-partisan, and had a hand in formulating the first ordinances, as at that time the demands came to the Borough, and were authorized by Statute. No body ever served the Borough better than he.

The second Mayor was Dr. J. H. Cooley, a thoroughly conscientious man, and during his administration, the affairs of the Borough were thoroughly cared for. It was during his administration the Borough began its growth in a remarkable manner. He served three terms of one year each, and would have been continued, had he consented to run again.

The third Mayor was Mr. Charles Place. During his administration, after much opposition on the part of the Electric Light Company then just started in the city, an Electric Light plant was

[*Continued on Last Page.*]

CONCERNING CAMPAIGN

Mr. Conroy Comments on the Political Situation.

EDITOR OF REVIEW:

Dear Sir—I have read in a Plainfield newspaper an interview with Mayor Smalley concerning campaign matters. Will you allow me a little space for a few final words at this the close of the campaign.

I said in the beginning that I knew I had a hard man to beat, but that I would undertake the task; and I would now say that I still have my eye fixed on the prize. I will use the plural and say that I have both eyes fixed on the prize, and am pressing forward with all patience, and hope to continue onward until the polls are closed on election day.

Having inside information on the subject I can say to my friends in the borough that there have been no appointments made. If I am elected Mayor of the borough I expect to share such appointments with my associates in the Council.

Finally, I am glad that Mayor Smalley can boast of the support of a few very excellent Democrats and that he is able to use their names for advertising purposes. It would have been a pleasure to me to have had their support, but I may say that I am not lacking in the support of a large number of very excellent Republicans, but think it rather delicate to publish their names, although I am proud of their support; and in the event of my election I will endeavor to conduct my part of the responsibility of the affairs of the borough in a manner that will prove my supporters did not make a mistake.

Yours very truly,

WILLIAM J. CONROY.

This Correspondent Says "Too much Smalley."

EDITOR OF THE REVIEW:

With faith in procuring an honest hearing from borough taxpayers I present a [illegible] of the [illegible] [illegible] Men of criticis[illegible] honest voter to cast his [illegible] The proposition that confronts the voter of North Plainfield today is easy to discern, provided one will sufficiently interest himself to dissect the subject in an honest manner. The first and most important question to discuss is whether we shall continue at the head of our local government a man who poses before the public as a selfish officer-seeker in such a manner that he becomes the subject of public comment. That is the first and foremost question that the voter must answer. The issue is Smalley—"*too much* Smalley." That must be the understanding at the beginning if the voter is to be enlightened on Borough affairs; or whether the Borough is to be governed by strict business officials who command respect in their deportment. The issue must be fairly met and openly discussed. If the voters of the Borough desire to further the selfish aims of this politician they should come right out in the open and not attempt to escape responsibility for their assistance in the transaction. The Borough voter should meet this issue squarely from an unbiased standpoint. The failure of the present administration to fulfill its ante-election pledges to keep the tax rate down is sufficient in that instance alone to warn the voter. The high tax rate in the Borough of North Plainfield is far beyond that of any other place of its population in the state of New Jersey. This Borough started off with a tax rate of 171. The rate today is 258. Mayor Smalley was elected four years ago on the sole issue of guaranteeing a reduction in the taxes. Unless abler minds guide the course of the Borough's financial policy that tax rate will continue to mount skyward. We appeal to all fair minded citizens to set aside any partisan views he may entertain and take a cool business view of the condition of Borough affairs. This election means a great deal more to taxpayers than appears on the surface.

BOROUGHITE.

Woodmen Resume Meetings.

Robin Hood Camp, No. 7 W. O. W. after several months' suspension, resumed its meetings again Wednesday evening. The officers elected and installed were: Past Commander, A. Foss; Council Commander, H. J. Martin; advisor lieutenant, A. C. Hoagland; clerk, Charles Holstein; banker, A. R. Vail; escort, M. Kolb; watchman, C. Beerman; sentry, W. E. Cranston; manager, three years, W. B. Heideloff; manager, two years, A. Stiglitz, manager, one year, H. DeMott; camp physician, Dr. Dundon.

The next meeting will be held March 18, when a delegation from Elizabeth will be present.

THE CONGRESS ADJOURNED

Usual Closing Scenes Attended the Last Daily Session.

AN OVATION FOR HENDERSON

But the Unanimous Thanks of the House Were Refused the Retiring Speaker—President Congratulated Congress on the Work Accomplished—Some of the Measures Which Were Passed.

Washington, D. C.—The Fifty-seventh Congress has come to an end. The deadlock in each wing of the Capitol died only with the Congress. The Fifty-seventh Congress accomplished a good deal in the way of legislation. In his room at the Senate end of the Capitol the President, with his Cabinet, expressed his satisfaction in the work that had been done. He had hoped for more, but with what had been done he was satisfied. The President was at his post in the Capitol at 10 o'clock, prepared to give consideration to any act which might in the last minutes of the session be laid before him. The existence for a week past of a deadlock in both houses had, however, lightened his duties, and he had an easy escape from the usual peril of hasty examination of legislative acts.

In the number of special acts that have been passed the session just closed was marked by diligence. In the neighborhood of 1200 private (mostly pensions) and 150 general acts were passed and approved by the President since December last.

Among the latter, exclusive of general appropriations, are a number of measures of more than ordinary importance. Included in the public acts are:

Act establishing a Department of Commerce and Labor.

Acts to regulate trusts and combinations in restraint of trade.

Act creating a staff corps for the army; reorganization of the militia.

Act providing a Philippine currency; revision of the Bankruptcy act.

Act requiring automatic couplers on railway trains.

Act regulating immigration.

Act authorizing the erection of a large number of public buildings in various sections of the country.

Act providing for a considerable increase in the Navy.

Taking the outcome of the two sessions of the Fifty-seventh Congress it is doubtful if any previous Congress for a number of years made a better record in respect to work that was required by the public interests. The President was sincere in presenting his congratulations to Congress upon having accomplished so much good work.

[redacted]

closing scenes of every Congress are pretty much the same, but there has not been in many year such a demonstration in the House as occurred on the retirement of Speaker Henderson, not only as presiding officer, but as a member. The Democrats prevented the Speaker from receiving the unanimous approval of the House when the usual resolution of thanks was offered. More than this, the resolution had to come from the Republican side, whereas the custom is for it to be introduced by the opposition party. The usual resolution of thanks to President Pro Tempore Frye was unanimously adopted in the Senate.

When Speaker Henderson entered the House it was the signal for an enthusiastic demonstration. The Republicans applauded and Democrats joined. As the applause continued the Republicans arose and cheered vociferously, Democrats contenting themselves with handclapping.

Mr. Cannon, standing on the clerk's dais, read the resolution expressing the thanks of the House for Speaker Henderson's service.

Speaker Henderson then addressed the House.

"An age spent under this dome must give opportunity for forming many and strong ties," he said.

"Constituted as I have been from childhood, friendship is an essential element of my life's food, and whether on the floor or in the chair I have found a bountiful supply in this hall. I have seen beautiful and instructive things on this floor, sharp, able, feeling debate, and debate, gentlemen, is the foundation and sustaining power of American liberty.

"But I have seen another beautiful thing. When the flag was raised in war I have seen both sides of this chamber, as one man, put $50,000,000 into the hands of the Chief Magistrate and say 'Lead on!' without a dissenting voice. I say from that hour I have believed that there was no future moment when the disintegration could come to this republic. And when I saw the young men from every State in the Union touching elbow to elbow and rushing into the ranks of war, there was absolute confirmation of that belief."

Money Spent by Congress.

Washington, D. C.—Senator Allison made the usual statement in regard to the total of appropriations made at the session of Congress just closed, the total at the first session, and the aggregate of the appropriations made by the Fifty-seventh Congress. The total at the session just closed is placed at $753,484,018, against $800,624,496 at the first session, making an aggregate for the Congress of $1,554,108,514. These figures include the permanent annual appropriations, which amount to upward of $132,000,000.

Last of Venezuelan Warships Returned.

The British cruiser Pallas arrived at La Guayra, Venezuela, towing the gunboat Bolivar, the last Venezuelan warship in the possession of the allied powers. The Pallas saluted the fort, which replied.

Body of Strangler's Victim Found.

The body of Hannah Knapp, the last victim of the strangler, was found in the Ohio River at New Albany, Ind., it having been carried 180 miles from where it was thrown into the Miami River.

HITS MONROE DOCTRINE

A German Professor Says Some Hard Things.

He Terms It "An Empty Pretension Behind Which is Neither Energetic Will Nor Actual Power."

Berlin, Germany.—"The Monroe Doctrine is an empty pretension, behind which is neither energetic will nor actual power." Thus Professor Adolph Wagner, the celebrated political economist of Berlin University, begins his reply to two questions submitted by a correspondent whether the Monroe Doctrine was in a moral sense as binding as international law, and what action seems dictated, first, in the interest of the German people and then in the interest of the European nations.

"Scarcely could such a doctrine be forced upon a conquered people after extraordinary victories," continues the professor. "But not even the United States' predominant interests are behind this unheard-of assumption. South America is neither geographically nor historically so allied with North America and the United States as to justify such a pretension, even from a North American viewpoint."

Answering the second question, Professor Wagner says:

"From the viewpoint, too, of the wider Germanic races a simple recognition of the Monroe Doctrine would be a false step, even if it were settling the world question whether the Germanic or Romanic elements should dominate the world. As a member of the Germanic race I do not want to see the Romanic element pressed to the wall, because it is indispensable to the world's civilization and is a necessary complement to Germanic culture.

"We really have no interest in furthering the preponderance of the United States or England or both. The world's civilization would hardly be advanced thereby. Aside from some technical and business spheres, what has the United States yet done of importance for the real civilization of the world? What has it done that has deserved to be named in the same breath with the achievements of Italy and France?"

Baron von Zedlitz und Neukirch, a member of the Prussian Diet and editor of the Berlin Post, wrote:

"The Monroe Doctrine is, from a viewpoint of international law, a non-binding monologue, whose enforcement is purely a question of force."

Professor Hans von Delbrueck, of Berlin University, discussing Venezuela in the Treussische Jahrbuecher, refers to the "perfidious nature" of the American policy, and advocates an alliance between Great Britain and Germany.

LORENZ SAYS NICE THINGS OF US.

POPE LEO'S ANNIVERSARY

Twenty-fifth Year of the Pontiff's Reign Brilliantly Celebrated.

SAYS HE NOW CAN DIE HAPPY

A Vast Crowd at St. Peter's Cry "Long Live the Pope"—"This Will Be Pleasant to Dream Over," He Says, While Viewing Rome Illuminated in Honor of His Jubilee—A Magnificent Scene.

Rome.—The papal mass in observance of the twenty-fifth anniversary of the coronation of Pope Leo XIII. was celebrated amid the greatest enthusiasm. His Holiness was carried to St Peter's in the Sedia Gestatoria in the midst of a group of forty-four Cardinals.

Many ecclesiastics from all parts of the world had assembled at the entrance of the church. The approach of the Pontiff was heralded by the blowing of silver trumpets. There was a faint sound of singing, which gradually swelled until His Holiness came into view, held high above the crowd. He was followed by the famous choir of adult male trebles.

The crowd at the Basilica of St. Peter's was estimated at 30,000. This enormous crowd greeted the Pontiff with cries of "Long live the Pope!"

Immediately after the ceremony the Pope returned to the Vatican. The pageant was marred somewhat by a downpour of rain.

Forty-four Cardinals and 315 Bishops were present at the ceremony. A notable feature was the English delegation, headed by the Duke of Norfolk and several other Catholic peers. All the bells of the 493 churches in Rome were rung for half an hour.

The Pope appeared to be in good health, although he was pale and his voice was hoarse. He showed no sign of weakness otherwise. Before leaving his apartment he said, with evident emotion, "After to-day I can die happy."

All Rome was illumined at night. The Pope, from his windows in the Vatican, beheld seven miles of brilliant lights. He turned to a Cardinal and said with emotion:

"This, indeed, will be a pleasant thing to dream over."

It is interesting to note that the flabelli, the immense feather fans carried immediately behind the Pope, were the gift of an American, Mrs. Drexel, who obtained the old ones for a museum in Philadelphia. The flabelli have been carried in papal processions for at least 1000 years. Their primitive use was to dust the altar.

Congratulations to Pope by Wireless.

New York City.—A wireless message of congratulation to Pope Leo XIII. from Cardinal Gibbons, of Baltimore, was flashed across the Atlantic from the Marconi station at Glace Bay, Cape Breton, 2400 miles from Poldhu. The message read:

"Baltimore.

"Pope Leo XIII., Rome, Italy:

"American hierarchy, clergy and laity send congratulations on your jubilee. JAMES, Cardinal Gibbons."

PREFERS BRIDE TO MOTHER.

Boston Society Man Refuses to Give Up Chorus Girl He Married.

Boston, Mass.—Charles Edward Maltby, whose hasty marriage to Miss Helen Tudor Danziger, a chorus girl, created a sensation in Back Bay society circles a week ago, when called on to choose between his mother and his wife, chose the latter. Mrs. Edward B. Maltby, his mother, refuses to recognize her daughter-in-law, or to admit her to her magnificent Beacon street residence.

Every effort has been made to induce the young man to relinquish his bride, but without avail. Friends believe that the mother will insist on relinquishment of the bride before a reconciliation is possible.

HARDWARE STOCK IN STOMACH.

Sufferer From Indigestion Had Swallowed Tacks, Knifeblades and Other Things.

Buffalo, N. Y. — Physicians at the Erie County Hospital report that as a result of an operation 453 carpet tacks, forty-one small knifeblades, 142 screw nails, forty pin points resembling the points on a shoemaker's awl, six and a half ounces of ground glass and a wire chain about three inches in length were taken from the stomach of the patient Claude Trimble, twenty-four years old, who says he is a cook.

He went to the hospital complaining of indigestion and dull pains in the stomach. The physicians report that the patient is in a fair way to recovery.

SECURE $1,000,000 VERDICT.

Heirs of an Indian Recover Valuable Lands From Packers.

Kansas City, Mo.—A jury in the case of Annie B. Wood and other heirs of Silas Armstrong, an Indian, to recover Missouri River bottom land in Kansas City, Kan., valued at $1,000,000 and occupied by Armour & Fowler, the packers, and others, has returned a verdict in favor of the plaintiffs.

The attorneys for the defense have filed notices of appeal. If the decision of the lower court shall be sustained the Armour packing companies will probably be the heaviest losers. The portion of the tract claimed by Armour is valued at nearly $100,000.

Maddened by Loss of Savings.

Maddened by the loss of his savings, Joseph A. Fritz, of San Francisco, Cal., seriously injured Miss J. Yardell and then killed himself.

Confesses Counterfeiting.

Jed Kisendin, of Bracken County, Ky., arrested by a United States Marshal on the charge of counterfeiting has confessed, and is said to have implicated a big band of confederates operating in Bracken and adjacent counties.

Britain at St. Louis Fair.

Prime Minister Balfour announced at London that the British Government had accepted the invitation of the United States Government to participate in the St. Louis Exposition.

CROWNINSHIELD RETIRES

Rear-Admiral Objected to a Cruiser as Flagship.

Deprived of the Illinois, He Now Surrenders Command of the European Station.

Washington, D. C.—Rear-Admiral Arent S. Crowninshield, who was Chief of the Bureau of Navigation in the Navy Department during the war with Spain, has asked for immediate retirement from the Navy. Admiral Crowninshield is now in command of the European Station. It is known that he was dissatisfied because he was deprived of the battleship Illinois and given the cruiser Chicago for his flagship.

Lieutenant Henry M. Ward, Naval Secretary to Admiral Crowninshield, following the example of his chief, has resigned his commission in the Navy.

The communications from the two officers were received at the Navy Department. Secretary Moody later cabled an acceptance of the Admiral's application for retirement, and expressed his regret at the loss the Navy would sustain. Rear-Admiral Cotton, Commandant at the Brooklyn Navy Yard, was immediately assigned to command the European Station, and will start as soon as possible to relieve Mr. Crowninshield.

The battleship Illinois was taken away from the European Squadron by the General Naval Board, of which Admiral Dewey is head. This board decided upon the creation of a strong squadron of ironclads of the first type to constitute the Home Squadron, guarding the Atlantic and Gulf Coasts, as the British Channel Squadron forms a first line of defense for that country.

It was necessary in the judgment of the board to include the Illinois. Moreover, such battleships are neither effective nor economical as cruisers, and the Illinois was doing that sort of duty in Europe. So the department assigned Admiral Crowninshield to command the Chicago. This cruiser is a fine vessel of ten years ago, but not so imposing as the Illinois.

Admiral Crowninshield did not care to go back to the Mediterranean and the ports of Northern Europe, where his flag had floated over the battleship, in an inferior craft, so he protested. That protest was made during the maneuvres, and it was given due consideration, but the original plan held.

Admiral Crowninshield retires under that section of the Personnel act which permits him to do so at an advanced grade in consideration of at least forty years' creditable service. He will have a place in the first grade of Rear-Admirals, with an allowance of $5625 per annum.

AMERICAN MUST QUIT SAXONY.

Dentist Expelled Because of His Association With the ex-Crown Princess.

Dresden, Saxony.—L. A. O'Brien, an American dentist, has been ordered to leave the kingdom on account of his supposed relations with former Crown Princess Louise.

He will leave Dresden and sail with his wife and four children for America. The police at first ordered him to leave Saxony within twenty-four hours, but the court extended the time so as to permit Mr. O'Brien to settle up his affairs.

The Saxon Government has notified the other Governments of Mr. O'Brien's expulsion, making it, under royal courtesy, impossible for him to reside in Germany or Austria.

Providence, R. I.—Lewis A. O'Brien is a Providence man. He married the daughter of Leander Belcher, a business man here, and lived for a time in this city.

$5500 FOR A LYNCHING.

An Ohio County Settles With Family of Man Killed by Mob.

Cleveland, Ohio.—The famous case brought against the County of Champaign by the family of "Click" Mitchell, who was lynched at Urbana several years ago, will be settled on payment of $5500.

Action was begun under the anti-lynching law, which gives the family of a person subjected to mob violence right to recover damages from the county in which the violence occurs.

In the trial court a verdict for $5000 was given. The case was carried through all the courts in the State, and the county was beaten each time. Now the county has agreed to pay the judgment with $500 interest, as well as the costs in the case, and it agrees furthermore not to prosecute the case on error proceedings in the Supreme Court of the United States.

MOVES TO ANNEX CANADA.

Resolution Introduced in Congress by Representative De Armond.

Washington, D. C. — Representative De Armond, of Missouri, introduced a concurrent resolution providing as follows:

"That the President be and is hereby requested to learn and advise the Congress upon what terms, if any, honorable to both nations and satisfactory to the inhabitants of the territory primarily affected, Great Britain would consent to cede to the United States all or any part of the territory lying north of and adjoining the United States, to be formed in due time into one or more States and admitted into the Union upon an equality with the other States, the inhabitants thereof in the meantime to enjoy all the privileges and immunities guaranteed by the Federal Constitution."

Elected President of Uruguay.

Jose Batele Ordonez has been elected President of Uruguay.

Warships Not Bought by Britain.

In answer to a question in the British House of Commons Premier Balfour said that Great Britain had refused to purchase the Chilean and Argentine warships, under construction in Europe. The Admiralty had carefully considered the matter, and had concluded that these vessels were not suitable for the British Navy.

Russian-Turkish War Feared.

Fears are expressed in St. Petersburg of a war between Russia and Turkey in the spring.

DELAWARE'S TWO SENATORS

Allee, Addicks Man, and Ball, Regular Republican, Elected.

THE LONG DEADLOCK BROKEN

The Result Regarded as an Addicks Victory—He Says He is Pleased and Will Try Again in 1904—His Man Gets the Long Term and Congressman Ball the Short Term—History of Long Fight.

Dover, Del.—The Union and Regular factions of the Republican party reached an agreement which resulted in the election of two United States Senators by the State Legislature, and for the first time in four years the State of Delaware has secured full representation in Congress. The successful candidates are State Senator J. Frank Allee (Union Republican), elected to the Senatorship which expires in 1907, and Congressman L. Heisler Ball (Regular Republican), elected to fill the term expiring in 1905. The election is regarded here as an Addicks victory.

Congressman Dick, Secretary of the Republican National Committee, was largely instrumental in persuading the warring factions to accept the compromise which ended the long fight over the Senatorships.

The deadlock of months in the Legislature was broken when the thirty-sixth and final ballot for United States Senators was taken, with the following result:

Long Term—Allee, 30; Saulsbury, 17; J. H. Hughes (Dem.), 1; Woodburn Martin (Dem.), 1; A. E. Sauborn, 1; E. W. Tunnell (Dem.), 1.

Short Term—Ball, 31; Kenney (Dem.), 19; B. A. Hazell (Dem.), 1; E. R. Cochran, Jr., (Dem.), 1.

Necessary to a choice, 26.

There was much shouting and general rejoicing when the result was announced. Mr. Addicks was the first to congratulate Senator Allee, and he was followed by a long procession of legislators and spectators, all of whom were anxious to shake the hand of the successful candidate.

"I am very happy," said Mr. Addicks, subsequently. "It gratifies me to make one of my best friends, J. Frank Allee, United States Senator. He deserves the place from a party view-point and greatly strengthens the Union Republicans and myself in making the fight to carry the State in 1904 for the President. I propose to help elect a majority of the Legislature of 1904 favorable to my candidacy for the United States Senate."

"I have only to say," said Senator Allee, "that I sincerely regret that I have to fill the place that belongs to Mr. Addicks."

John Edward Addicks began his long struggle for a seat in the Senate in 1889, when [redacted] was elected [redacted] he obtained some backing, but when the Republican Legislature met in January, 1889, the caucus nomination went to Anthony Higgins. In 1892 Mr. Addicks again entered the Senatorial field, but the Democrats carried the State, and George Gray was elected to the Senate.

In 1894, when Mr. Higgins's term was about to expire, Addicks made his third essay for the Senatorship. Six votes were cast for him. A protracted deadlock ensued, lasting from January 14 until May 9. Colonel Henry A. Du Pont was formally declared elected by Speaker McMullin, of the House, but he actually lacked one vote of a majority. Speaker Watson (Dem.), of the Senate, and Acting Governor of the State, declared the joint convention adjourned sine die without an election—a position in which he was sustained by the Senate at Washington.

From that time dates the split of the party into the two factions styled Union and Regular Republicans. Each faction put a State ticket in the field in 1896, which threw the election to the Democrats and sent Richard R. Kenney to the Senate. Addicks returned to the fight in 1898, when there was another deadlock, lasting until the adjournment of the Legislature, in March, 1899.

Then came the great campaign of 1900, in which two Senators were to be elected—one for the term which began in 1899 and another for the term beginning in 1901. Addicks was nominated by his followers for both the long and short terms. On February 19 four of the Regulars went over to Addicks for the short term, and on March 1 two others followed them, increasing the Addicks vote to twenty-two, but leaving him still five short. The vote for the long term remained unchanged, and the session came to a close March 7 with the two seats still unfilled.

Last year the two Republican factions united on a State ticket, which was elected. When the balloting began, on January 20 of this year, Addicks again turned up as a candidate for both terms, receiving twenty-one votes for the long term and nineteen for the short term. The lines remained practically unbroken until the two Senators were elected.

PHENOMENON IN SALVADOR.

Presidency Transferred Peacefully For First Time in Fifty Years.

Panama.—A dispatch from San Salvator says that General Regalado handed over the Presidency to General Pedro Jose Escalon, who was declared elected on February 19.

This was the first peaceful transfer of the Presidency in fifty years, and has caused great rejoicing throughout Salvador.

Mr. Holt Appointed Judge.

President Roosevelt sent to the United States Senate the appointment of George C. Holt as United States Judge in the district recently created in Southern New York. Mr. Holt was indorsed generally by the bar of New York City.

Justice Day Takes Oath of Office.

William R. Day, the new Associate Justice of the United States Supreme Court, at Washington, has taken the oath of office. He sits at the extreme left of the Chief Justice.

CONVICT "SALTED" $50,000

Just Finished a Sentence For Robbing an Express Company

Only $70 of the Loot Has Been Recovered, While the Thief Has Maintained a Complete Silence.

Houston, Texas.—Charles A. Beeler, who robbed the Wells-Fargo Express Company of $52,000 at San Antonio four years ago, has been released from the State Penitentiary, after having served out his sentence of five years, with time allowed for good conduct deducted.

Beeler ought to have about $50,000 of the stolen money on hand, or should know where it is concealed.

Only $70 of the large sum stolen was found on his person at the time he was arrested, but this was the sum total of all that was recovered. The money is supposed to be safely hidden, or resting in the hands of some unknown accomplice, who is expected to turn a large portion of it over to Beeler when he regains his liberty.

It is known that the defrauded express company has engaged detectives to watch every movement of Beeler, from the time he leaves the prison doors, with a view to locating the stolen money, or at least some portion of it. After Beeler was convicted the company sued him and obtained judgment for $50,000.

Charles A. Beeler had been with the Wells-Fargo Express Company for many years, working up from an insignificant post.

The funds referred to, amounting to $52,000, consisted of a shipment of cash from Houston to San Antonio, and was to be used in paying off the employes of the Southern Pacific Railroad west of that city. It was consigned to the paymaster there.

Beeler took the money package from the office safe, duly receipted for it, and drove away, ostensibly to deliver it to the paymaster, whose car was to go west later in the day.

It was early in the morning when Beeler left with the $52,000 in his custody. That was the last seen of him. At first it was supposed that the delivery had been made. Toward the middle of the afternoon the paymaster called up the express office and asked that the money be sent over immediately, as his car was ready to proceed on the westward trip.

At dusk the wagon and team of the defaulting and trusted employe were brought to headquarters by an old negro who had found the horses still attached to the vehicle, quietly grazing in a chaparral thicket west of the city.

After a long search on the part of the officers Beeler was located and arrested in Mexico, duly extradited and landed in jail in San Antonio. Excepting the $70 mentioned above no trace of the enormous sum of money that disappeared with Beeler was ever found.

When the trial came up Beeler took [redacted]

After donning the stripes Beeler continued to keep his own counsel, discharged the arduous duties put upon him without a murmur and secured all the commutation time possible on the contingency of good behavior. The demands of the criminal law have been met, and the prison doors gave exit to a rich man.

Beeler has steadfastly refused to even discuss the theft of the money with officials of either the express company or the law, and has returned threats and entreaties alike with smiles of derision and with an indifference that has been tantalizing.

SIX KILLED; A SCORE HURT.

Explosion Wrecks the Edison Cement Plant in New Jersey.

Stewartsville, N. J.—An explosion in the Edison Portland cement plant, at New Village, two miles east of here, killed six persons and injured a score of others. Property valued at $100,000 was destroyed.

The explosion occurred at 5.40 o'clock, just as the shifts were changing from day to night forces. The plant employs about 350 men on each force. The cause of the disaster is unknown. The explosion was in the coal blower house, where the coal is ground to dust to be fed to the burners which transform the chalk into cement clinker ready for grinding into cement. It may have been caused by spontaneous combustion. The flying timbers and machinery injured many persons after the explosion had ended.

As soon as the news spread the workmen's families rushed to the plant, women and children screaming, and calling for their husbands and fathers, who were supposed to be in the wreckage. Messages were sent to this place and Washington for physicians, and the Fire Department of the latter place was called out. It was carried to the scene on a special train. A special train was run from Easton to take the injured from the wreck to the Easton Hospital. Coroner L. N. Shrope, of Warren County, engaged an undertaker to care for the dead.

The scene about the wreck was horrifying. Men whose faces were burned to a crisp were crying piteously for help, and the bodies of the dead could be seen where the flames were gradually creeping toward them. The following are the names of some of the dead:

Al. Bryant, of Washington, employed as mixer; Robert Broadhead, colored, of Washington, laborer in the coal blower house; James Myers, of Stewartsville, night foreman of the coal plant; Daniel Smith, of New Village, and Nathan Tompkins, night foreman of the clink fine grinder.

Six Drowned in the Mississippi.

Two women and four men, in attempting to cross the Mississippi River near Hickman, Ky., were drowned. Their boat was carried under a pile of driftwood and capsized. A third woman escaped by jumping on the drift.

Alfonso Receives American Minister.

United States Minister Arthur S. Hardy, accompanied by the staff of the Legation, presented his credentials to King Alfonso, at Madrid, Spain. The King received and conversed with him in a gracious manner.

Prettiest of Human Birds-Nests.

The prettiest human birds-nest of all is in Marin County, California, built on the erect stem of a redwood much as a spool might be thrust on a pencil. Its walls and roof were of redwood thatch, the necessary woodwork of saplings with their bark left on, so that the sense of fitness was not shocked. The house was at least thirty feet from the base of the tree, but the steep side-hill on which it stood made a drawbridge to solid earth practicable as well as enchanting. This was let down in the morning when the inmates went ashore to cook their breakfast, and remained hospitably stretched across the chasm all day; but at night it was drawn up, and those in the redwood bunks within could feel the soft stir and quiver of tree through the still nights, knowing that they were as out of reach as though in a balloon. When the wind blew the cradle would rock—but always with the steadfast dignity of a redwood. There could be no fear with that staunch trunk passing up through the center of the little cabin.

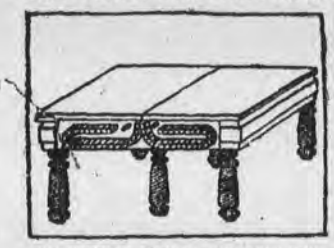
On the outer side of the house was a balcony, looking through tree tops down a wonderful valley and on to blue hills beyond. If there was other habitation, it was mercifully hidden; one found only a wilderness of trees, silence and odor. For one long summer it was the home of a bridal couple, a runaway couple at that, very young and innocent and courageous, with an offended father in the background—everything the romantic heart could wish. Perhaps they had cares and worried about the father; it may even be that she longed for a proper cooking stove in place of a green bank, and sighed at the lack of neighbors; perhaps it is true that romance is always "all on the other ship." But to the casual observer, it was the perfect idyl, all the shimmering dreams of youth come true.—Outing.

HOUSE IN A CALIFORNIA REDWOOD.

LEAFLESS DINING TABLE

Flexible Arrangement of Slats Takes Their Place.

When company comes to dine it is customary to insert an extra leaf in the table to provide the additional room necessary for the convenience of the guest but at other times the box of leaves are somewhat of a nuisance around the house, and must be stored away wherever there is room, which generally means in the garret or basement. A much better plan is shown in the illustration below, the idea of Samuel Dusenbery. Instead of having a set of large leaves to be held in storage, with their well-known propensity to warp and refuse to fit smoothly when needed, the inventor provides a series of narrow slats, secured together by webbing, much after the manner of the roll-top to a desk. One of these slat curtains is attached to each of the inner edges of the separable top sections of the table, and when the top is closed the curtains slide underneath into slotted guides, as shown in the picture. To increase the size of the table to any desired length it is only necessary to separate the two top sections, when the slats will rise from the bed and arrange themselves level with the top. As the arrangement works automatically, there is nothing to be done but draw the ends as far apart as desired, or close them up altogether, the curtains arranging themselves accordingly.



SLATS FOLD INSIDE THE TABLE TOP.

Temperature of Furnaces.

The temperature of a furnace may be determined by means of a small carbon filament incandescent lamp, fitted inside a telescope mounted on a tripod some distance from the furnace, and pointing at an aperture, says Electricity. When no current is passing through the filament it appears as a black line against the background of white-hot firebrick. As more current is sent through the filament becomes brighter, until when it attains the same color as the glowing furnace it is invisible. By a further increase in current it becomes visible again. The value of the current is read on an instrument, and a comparison with a table gives the corresponding furnace temperature.

Can Collapses.

Novel in form [illegible] vessel which can be used either as a bucket or watering pot. It differs from an ordinary vessel in the fact that when not in use it can be taken to pieces a great advantage, since the parts of which it is composed occupy very little room.

A bucket is an unwieldy and cumbersome vessel, and so is a large watering pot; consequently much is gained by combining the two in one vessel.

In Germany, they say, it is especially likely to become popular among those who are in the habit of taking watering pots to cemeteries for the purpose of watering the flowers on the graves of their relatives.—New York Herald.

Polar Difficulties.

The reason why the North Pole has not been discovered and why the accounts of expeditions in search thereof are so meagre and misleading is that the intense cold dims the intelligence of all who venture among the Arctic ice packs. I do not at this moment recall a single Arctic explorer who was not "nutty" after the first or second trip.—Victor Smith, in the New [illegible] Press.

The number of leaves on a sixty-foot-high oak tree has been counted and found to exceed 6,00[illegible]

PRESENT HEAD OF THE HOUSE OF ROTHSCHILD.

ROTHSCHILD is a name with which to conjure riches. It has been the talisman of wealth for nearly a century. It has exercised an influence in the world's financial centres far greater than that of political kings and potentates.

If the Rothschilds wished, they could cause the wreckage of most of the financial institutions in the world. Their influence over wealth must be figured not by millions, but by billions of dollars.

The present head of the Rothschild family is Lord Rothschild, who succeeded his father, Baron Rothschild, in 1879.

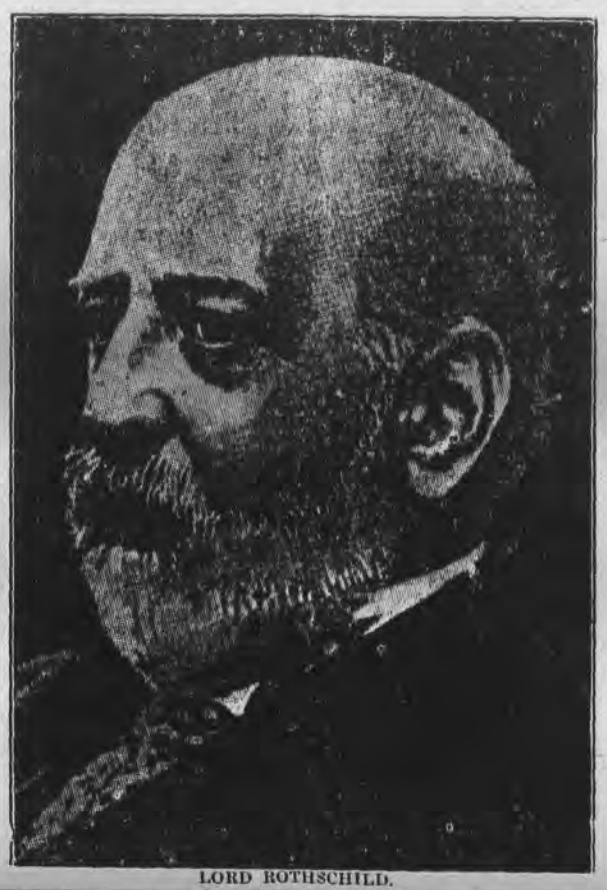
The home of the Rothschilds is in England, though they are represented in all European capitals.

Lord Rothschild, the present head of the house, personally supervises all its business affairs, while the eldest son, the Hon. Lionel Walter Rothschild, is his chief aide. Lord Rothschild's two brothers, Alfred and Leopold, take an active interest in all the affairs of the great concern.

The Rothschilds have intermarried among some of the most influential families in Europe. They are connected with the Roseberrys, Flowers and others.

The Rothschilds have taken up their home in the County of Bucks, controlling practically all the land in the district. The beautiful residence of Lord Rothschild—one of the most magnificent in Europe—is at Tring Park. At Manor Farm, Cublington, Leopold Rothschild has splendid estates, where there are some of the most famous horses and packs of hounds in Europe. Hon. Lionel Rothschild's principal delight is driving a team of zebras, which he has trained in a marvelous manner.

The personal habits of the Rothschilds are those of simple, wealthy English gentlemen. Their pastimes are driving, golfing and outdoor sports. None of the Rothschilds have ever greatly cared for yachting.



LORD ROTHSCHILD.

Improved Horseshoe Pad.

A new rubber horseshoe pad is described in the Rubber World. A special point about it is that the horse can be shod with a toe calk and still have the foot stand level. This gives the animal a footing on icy pavement or on asphalt. The cushion lessens the concussion of the hoof with the ground, so injurious to the joints and muscles.

Very few people's noses are set properly on their faces. Ninety-nine out of every 100 turn to the right.

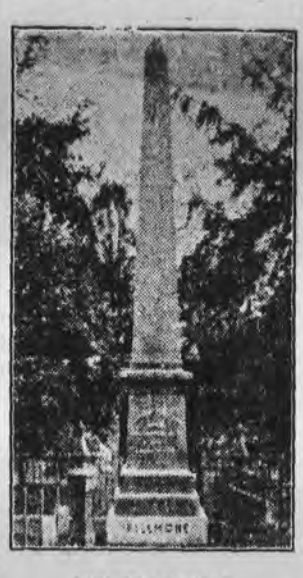
FILLMORE FAMILY EXTINCT

None of the President's Relatives Now Survive in Buffalo.

The Fillmore family of Buffalo has passed out of existence, but the memory of some of its members is among the most cherished possessions of the oldest citizens of the Queen City.

Buffalo abounds in relics and other reminders of Millard Fillmore and his family. Two houses in the city are pointed out to the youth as the mansions of the former President, while on the walls of the Historical Society's Art Gallery are several paintings of the President and members of his family. In the office of the society is an old mahogany desk he once used. In another corner is the iron cradle-like basket in which the usually cautious Fillmore, accompanying a daring young woman of Batavia, was swung across Niagara's gorge on a cable.

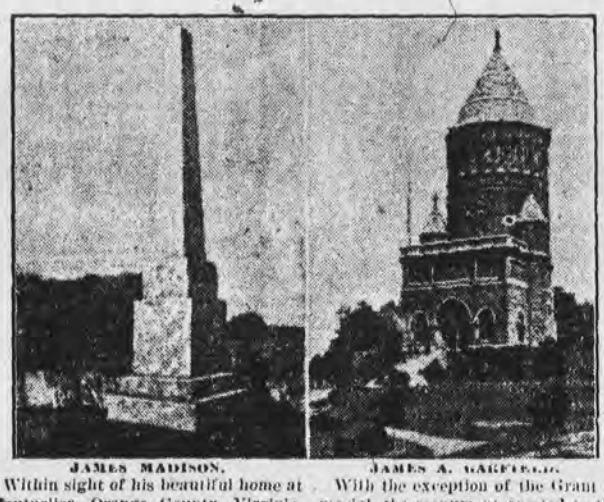
Among the most valued articles in the collection of the Buffalo Historical Society is a manuscript autobiography of the late President. It was not unsealed until after his death.



TOMB OF FILLMORE.

President Fillmore's son, Millard Powers Fillmore, or Powers Fillmore, as he was more generally known, was a familiar figure on the streets of Buffalo up to the time of his death on November 15, 1889. He was the last of the Buffalo Fillmores.—Buffalo Courier.

Tombs of Madison and Garfield.



JAMES MADISON.

Within sight of his beautiful home at Montpelier, Orange County, Virginia, where he died in 1836, James Madison was buried with his beloved Dolly, whose sunny ways made her so great a favorite during his administration of national affairs.

JAMES A. GARFIELD.

With the exception of the Grant memorial, the monument erected to General James A. Garfield, in Lakeview Cemetery, Cleveland, Ohio, is the finest of all the President's tombs. It was erected with the proceeds of a national subscription.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "POVERTY AND PIETY."

The Rev. James Alexander Jenkins Says That the Preaching of the Gospel to the Poor Is an Evidence of Far-Reaching Mercy of God.

NEW YORK CITY.—"Poverty and Piety" was the subject of this sermon delivered by the Rev. James Alexander Jenkins, pastor of Immanuel Congregational Church. His text was chosen from Matthew xi: 5: "The poor have the gospel preached to them."

The words of our text constitute part of the reply of Jesus to John when He sent two of His disciples with the anxious question, "Art Thou He that should come or do we look for another?" In this reply the Master assumes that John is familiar with the character of the work of the expected One, so He sets before the messengers His own work as meeting the requirements. "The blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised up, "the poor have the gospel preached to them."

The preaching of the gospel to the poor may be regarded as only an evidence of the far reaching mercy of the great God, but it may also be regarded as testifying to the preparation of the poor for receiving and spreading the good news from God. If we believe in the fitting of means to ends in the world of nature, if we are upholders of the great law of design, may we not with reason insist that the Father through the course of the ages prepared certain of the sons of men for the reception of the truth. If we concede this we behold in the preaching of the gospel to the poor an arrangement of providence, a far reaching plan of God.

The pages of the gospels reveal Jesus as the preacher to the poor. The rich He regarded as being for some reason less fitted to be chosen as pioneers in the work of establishing His kingdom. Of the rich men of the New Testament, not Dives, not the rich fool, but the young man who came to Jesus with eager inquiry, may be regarded as typical in the mind of Jesus of the hosts of the rich and powerful. Thinking of him Jesus said: "It is easier for a camel to go through the eye of a needle than for a rich man to enter into the kingdom of God." From this statement we naturally infer that the absence of wealth or poverty is most favorable to the reception of saving truth, to the entering of the kingdom.

Jesus Himself, coming as the founder of the kingdom of God, chose the material upon which that kingdom shall be built. He did not preach to the poor because others would not hear Him. The influential He could have commanded, strength of arms He could have enlisted, wealth would have served Him. But He chose, desired, determined, to preach the gospel to the poor. Says Dr Bushnell, speaking of the character of the ministry of Jesus: "He adheres to the poor and makes them the object of His ministry. And what is more peculiar, He visibly has a kind of interest in their society, which is wanting in that of the higher classes, perceiving, apparently, that they have a certain aptitude for receiving right impressions which the others have not. They are not the wise and prudent, filled with the conceit of learning and station, but they are the ingenuous babes of poverty, open to conviction, prepared by their humble lot to receive thoughts and doctrines in advance of their age." With equal acumen does this great writer recognize the fundamental and distinguishing nature of the choice of Jesus, as contrasted with the teachings of the statesmen and philosophers who had gone before Him. They began at the top, He began at the bottom. They addressed themselves to the classes, the rich and the poor. Civilization has crept onward, changing many things, but it has not removed the distinction between wealth and poverty. The distinction may be less brutal, less crude, but it still exists, and the very refinement of the classification of men is often the cause of added bitterness. So to-day the student of men and events, whether he be sociologist, economist or preacher, is confronted by the difficulty of adjusting one part of society to another. We are constantly asking certain questions and clamoring for a reply. Can the poor man secure a just share of the good things of earth? Is it possible for him to get an education? Will society receive him? And now, it seems, another question presses upon us. What is the relation between poverty and piety?

It would seem that the world, in answering this question, has lost sight of the teaching and practice of Jesus, for the conclusion usually arrived at is that the poor man is at a disadvantage in his struggle for the soul culture which every human being should desire. Many, listening to the reasoning of the world, have, because of their poverty, surrendered their religion, deserted the church and rejected the Christ. To them the Christian worker has come to seem the advocate of impossibilities, but this attitude of mind is not confined to the simple and unthinking, for we are reminded that even thoughtful writers seem to assume the existence of a natural hostility between poverty and piety.

Let us keep in mind the attitude of the Lord Jesus toward the poor as He delivered His message, and let us, remembering that, ask ourselves what that piety is, the relation of which to poverty we are to determine. Let us ask whether there is in piety any element to the producing of which poverty is hostile, and let us find, on the other hand, whether it may not be possible that poverty assists the soul in its endeavor to become the possessor of true piety.

Piety is not, primarily, something in the atmosphere; it is the rather something in the heart of man. Among the elements which enter into it, a few of the principal ones may be mentioned: Sensitiveness of things true, beautiful, good; receptivity, or the ability to appropriate the good that appeals to the soul; power to apply the principles of truth; recognition of love as the great animating, sustaining, God-knowing principle. Let us see whether poverty may not be an aid to the soul in its development along the lines indicated.

We may, I think, claim with justice that poverty renders the soul supremely sensitive to the best things. Poverty is too frequently regarded as synonymous with pauperism, and pauperism is the embodiment of grim, unfeeling heedlessness. Pauperism is cold, indifferent, dead, but poverty is warm, alert, alive. Poverty needs its every faculty, its every power. It must fight battles and anticipate the onslaught of unseen foes. It must read the signs of the morrow in the evening sky and adapt itself to sun and shower and storm. "The man with the hoe" is not the poor man, for poverty neither deadens nor brutalizes. Were I to choose my illustration of honest poverty I should find it in the humble toilers of "The Angelus." Clad in the rough garb of workers in the fields, holding in their hands the cumbrous instruments of their daily toil, they are, nevertheless, keenly alive to the beauty, the poetry, the suggestiveness of the sounds wafted upon the gently stirring summer breezes. Truly typical are they, as with bowed heads they stand, of the succeeding generations of God's poor, as, amid toil and tribulation, they seek to find the good, to know God.

The sensitiveness of honest poverty! I see it in the little children of the rabble as they followed Jesus through the streets of Jerusalem, and I see it in the children who to-day clutch the flowers carried into the homes of the poor by sweet charity. I see it in the zeal, the devotion of the slaves who first heard the Gospel message, and I see it in the enthusiasm of the multitudes who caught the inspiration of the Renaissance. I see it in the faces of the "common people" who "heard Him gladly," and I see it in the faces of the lowly as they listen to a Chrysostum or a Moody.

Disguise it as we may, deny it if we will, the soul of poverty has been the one attuned to catch the messages sent from heaven out of the heart of God. Wealth can do no more than furnish the material for an Angelo; it can only create the opportunity for a Savonarola; it can but provide Jesus with the stage for His sublime activity.

Again, is it not apparent that poverty tends to the development of the power of receptivity? Rightly understood poverty is a wonderful aid to clear vision, enabling man to distinguish between the essential and the unnecessary. It enables its possessor (not its victim) to develop self rather than to collect "things." It enables him to see the difference between "having" and "being." Wealth shouts: "I have;" but poverty whispers, "I am." Poverty comes to know that only spiritual appropriation gives real ownership. This is one of the messages of the old Eden story of Genesis, for God placed Adam in the garden as a poor worker. He was to till and to keep the place and only to enjoy so much of it as he made his own. The supreme joy of his position was that through toil he was able to look upon God and the good and make them his own. In his sin he filled his heart with substitutes for God, and thus shut Him out of his soul. The return to Eden is the return to simplicity and receptivity. It is the becoming sensitive once more to the good and the taking in of truth, beauty, holiness.

It is a false theory which assumes that the activity of poverty is due to recklessness, that the poor may choose any course of action, disregard any existing order, because they have "nothing to lose." Even for the poor it is true that "life is more than meat and the body than raiment." The true cause for the activity of poverty is found in the rugged strength developed by adversity, in the constant need for adaptation to the demands of the passing days, and, finally, in the undying belief cherished that there is "a good time coming" in the golden future.

It is the tendency of wealth to be satisfied with things as they are, industrially, socially, morally. Truth's cartoon, "An English Board Meeting," is startlingly suggestive when applied to morals, as well as when applied to money. "Why," the aged and wealthy directors of the great railway are made to ask, "why must the public interfere with our business? Why must inventors suggest new devices? What's the good of these innovations?"

The great labor saving ideas of the age have come into the minds of the poor; they have been developed amid suffering and stress, and they have been forced upon a reluctant world by men who cared more for progress than for ease. So it is with the men and women who, hungering and thirsting after righteousness, have become possessed of great moral ideas. The grasp of these ideas upon their own souls renders them unrestingly eager to see them enthroned in the heart of the race. They are willing to fight seemingly hopeless battles, to champion despised principles, to advocate unwelcome truths. They know what they have believed, and their knowledge gives them willingness to utilize their hard earned strength for the education and advancement of mankind, and these champions of the principles of piety have been from the days of Jesus and from the apostolic times the sons of poverty. When in the days of primitive Christianity the gospel spread from Jerusalem, it was carried by the poor; when it laid siege to hostile lands, poverty fought for it; when it grew corrupt through the machinations of a wicked priesthood, poor men purified it, when in these last days it has become ready for world conquest, humble servants of the King have been called to carry it.

But we have said that piety has as one of its important elements the recognition [illegible] livered sermons to multitudes of the needy; we have the implied declaration of a condition of understanding of sympathy, between His soul and theirs. Men who were dominated by selfish principles did not understand Him, for they were incapable of recognizing love as the supreme motive of a soul. Action, for them, was always dictated by policy, and they suspected a hidden motive behind the activity of Jesus.

The Master declared that for a rich man to enter the kingdom is difficult. What did He mean? He doubtless considered the increasing danger of basing action upon false motive. He knew that it is the tendency of wealth to render action mechanical, careless, and, too frequently, heartless, that the rich man may give his gold to "charity," while his heart is as flint; that he may support the gospel with his money while his heart feels no joy in its message. But he knew that poverty rightly conceived tends to keep the life normal and true to the true springs of action. He knew that the poor who heard Him when they gave their mites gave them because of love, for no other power could cause that to be sacrificed which represented bread, shelter, life. He knew that they were familiar with the ministry of poverty to poverty, and that they were able to grasp the significance of a ministry based upon simple, unselfish love. So He preached to them, unfolding His conception of the approaching Kingdom of God, the kingdom of love. Calmly He revealed to them a life which needed for its realization neither might nor money. Sweetly He discoursed to them of the inward nature of the kingdom, of the hunger, the thirst, the meekness, the poverty necessary in order that men might possess it, and they understood.

Serenity of Character.

Who does not love a tranquil heart, a sweet-tempered, balanced life? It does not matter whether it rains or shines, or what misfortunes come to those possessing these blessings, for they are always sweet, serene and calm. That exquisite poise of character which we call serenity is the last lesson of culture; it is the flowering of life, the fruitage of the soul. It is precious as wisdom, more to be desired than gold—yea, than even fine gold. How contemptible mere money-wealth looks in comparison with a serene life—a life which dwells in the ocean of truth, beneath the waves, beyond the reach of tempests, in the eternal calm! How many people we know who sour their lives, who ruin all that is sweet and beautiful by explosive tempers, who destroy their poise of character by bad blood! In fact, it is a question whether the great majority of people do not ruin their lives and mar their happiness by lack of self-control. How few people we meet in life who are well balanced, who have that exquisite poise which is characteristic of the finished character!

Righteousness Creates Happiness.

A life of unselfish devotion to God and to righteousness is the unfailing secret of happiness. He who lives for himself alone will dwindle into miserable and petty insignificance. He who lives to glorify God and to make the world better and happier is sure to be happy. No one can prevent it. Usefulness is true greatness and true gladness. If we wish this to be a happy year we must love God and work His holy will.

Think Before We Speak.

Let us think before we speak, since the words we must speak must enter into the life of the world and make it worse or better, and it we err on either side, err in gentleness and tenderness and love.—The Rev. Dr. Savage.

Happiness Lasts.

Misery will not last—happiness will, it only in remembrance. No pure joy, however fleeting, contains any real bitterness, even when it is gone by.—D. M. Craik.

North Plainfield Weekly Review

ISSUED EVERY SATURDAY BY
HARRY H. WEBB
AT NORTH PLAINFIELD, N. J.
39 Somerset St. Telephone 217

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, MARCH 7, 1903.

UNTRUE TO HIS PARTY.

When such men as Charles Arthur Reed, Newton B. Smalley, Peter A. Emmons and others belonging to that coterie, endeavor to pose in North Plainfield as Republicans, they are attempting to carry too heavy a load.

These are the men who conducted the primary at Sangerbund Hall last Friday evening and nominated Newton B. Smalley for Mayor.

Of Mr. Reed, we will have but little to say. He is dead politically; not only here at home, but throughout the State. Two years ago he had within his grasp almost any office in the State. To-day he could not be elected to the smallest office in the smallest township in Somerset county, but is repudiated by every true Republican in Somerset county—a man who was publicly accused of selling out and betraying his county [illegible] and made no denial of it. He is the man directly responsible for N. B. Smalley's renomination.

Referring to N. B. Smalley we have a man who has openly bolted regularly nominated Republicans six times in the past few years.

These facts are so well known in North Plainfield that it is almost unnecessary to restate them here. Honest Republicans—men who have learned that the minority governs in primaries where these men are in control—have become so disgusted that it is almost impossible to get them out to the primaries. And last week, knowing that the Reed-Smalley coterie would nominate N. B. Smalley and that they held the whole political machinery in their hands, and realizing further that no matter how many might turn out that it would avail them nothing—they did the best thing possible, and kept away from the primary.

There was still another reason why they did not turn out that evening, namely: It was understood and agreed among them that they would remain away, and thus be free to vote next Tuesday for whom they pleased. These gentlemen argued that if they went to the primary they would be obliged, as honorable republicans, to support the nominees, and knowing that N. B. Smalley would be nominated with or without their presence, they chose the only honorable course and stayed away. They will be on hand all right next Tuesday, however, with their votes.

Last fall when the Republicans nominated their regular county ticket, consisting of a State Senator, member of Assembly and Surrogate—*three of the most important offices* in the county—Mayor Smalley openly bolted the ticket and worked with all his might against these candidates, knowing that their defeat would, more or less, affect the chances of the election of a Republican United States Senator and turn the county almost completely over to the Democrats. His work and that of his followers, be it said to their lasting disgrace, succeeded; and Somerset county, a Republican county, is now almost entirely under the control of Democrats, for which N. B. Smalley is responsible.

Nor is this all: at Trenton this "boss" went so far that he threatened to repeat this result if the Legislature passed certain Bills which do not suit him. See the following paragraph from the Newark *Evening News* of February 11, 1903:

> During the afternoon Mayor Smalley threatened to repeat the result of last fall's election if the Legislature passes the repealers. 'Do you mean that as a threat?' asked Senator Hutchinson. 'Take it as you like,' sharply retorted the Mayor.

For these reasons, and because Mr. Smalley has not been loyal to the borough and to Somerset county, and because he is not a Republican in fact, all Republicans are advised to vote for William J. Conroy for Mayor—a man who will do all in his power to advance the interests of North Plainfield—a good, honest, christian man, and one who deserves and will receive the support of all the loyal, fair-minded people in the Borough irrespective of party.

Republicans are under no obligations to support Mr. Smalley, because he has never been true to the ticket except when the nomination was made by him or met with his full approval.

SOME OF HIS "BOLTS"

Lest there might be some question about Mr. Smalley's record as a political bolter, we have looked up his record and find that the first time his friend, Charles Arthur Reed, ran for Senator in 1890, Mr. Smalley worked against him, with the result that Keys, democrat, received a majority of 30 in the borough, and Reed was defeated in the county by 394—about the usual Republican majority of the borough.

In 1895, Reed ran for Assembly and received 607 votes in the borough, while Hoagland, democrat, received 255. The hand of Mr. Smalley does not appear to have worked very strenuously against him this time. Possibly the Reed-Smalley combine was formed then. And in 1896, the combine was in full working order, when Mr. Reed again ran for Senator and received a majority of 395.

We now turn to the several occasions when Mr. Smalley bolted good and true Republicans, namely: when E. L. Bonny ran against W. L. Saunders, for Mayor; when Dr. Cooley ran against E. M. French for Assessor; when he defeated George D. Hallock for Councilman; when Mr. Smalley led the bolt against Charles Place for Mayor; and last fall when he worked against the entire county ticket.

These are some of the occasions when he came out openly and worked against the Republicans.

REASONS FOR A CHANGE.

When a published statement was made, and not denied, to the effect that in case the present Mayor fails to secure a regular nomination at the primary from the party with which he is allied, he will stand as an independent candidate on a Citizen's ticket, and thus force himself upon the people, is it not time to call a halt? Are our citizens willing to have a perpetual candidate? Must we acknowledge there is only one man in the Borough who is qualified for the office? Is it not time for the thinking and independent citizens of our Borough to give this their careful consideration, and decide whether it is for the best interest of the Borough to continue a man in office, when he has developed such objectionable manners and methods? It is not a question of annexation or consolidation, as we have abundant evidence written and otherwise, that many who favored and voted for annexation are opposed to the present administration.

The prominent Antis of the borough resolutely declined to have the annexation question brought into this fight. On the contrary, they are opposed to the nominee of the Republican party because of his objectionable methods as a party leader, and in common with many other independent citizens, believe the time and opportunity have come to break up the clique that has been running the Borough for some time—failing to represent the people, and caring more for their own selfish interests and power.

The citizens who are back of the movement for a change of administration have no axes to grind, no political ambitions to serve, but are simply striving to elect a Mayor who will not continually care more for perpetuating his own power and enhancing his future political prospects than for the welfare of the Borough.

Mr. Conroy is a successful business man and the Borough would be safe in placing its affairs in his hands.

BETTER PRIMARY LAWS.

We are pleased to give below a most excellent article from the Elizabeth *Journal* on the need of better primary election laws, which we heartily endorse in every particular.

It is not necessary to go away from home to see the need of new primary laws. It is demonstrated right here in the borough every time an election is held.

> The primary election bill, prepared by the committee appointed last year by Governor Murphy, may or may not provide exactly the reform that is needed in our methods of conducting primary elections. That it is a carefully prepared measure cannot be questioned, and it appears to be the results of the first thorough study given to this subject by any competent men in this state. A few papers have commented upon it generally, and a few others have criticised and condemned some of its features. In the legislature, where it should be given the fullest and fairest consideration, it seems to be pigeonholed, with little or no prospect of ever being brought out.
>
> And yet, if there is any subject, in the state of New Jersey, of more importance than good, equitable, just and effective primary election law, the people generally are not cognizant of it.
>
> What are the primaries as they are held today? Very rarely are they representative meetings, and very rarely do their acts conform to the judgment and the desires of the people.
>
> Who wants to go to a primary in these days? Not the reputable citizen—or at least very few of them—but rather the ward heeler and the men who have some personal purpose or motive in going.
>
> Who would want to attend, for example, the primary held in Camden last year, where Joe Goddard, the ex-pugilist, was shot and fatally wounded? Or who wants to attend a meeting purposely packed, in a stifling room with men, whose only interest in the primary is in the amount of money they get for voting certain tickets?
>
> Last year the primaries in Union county were thronged because there was a hot factional fight in progress. But this was an exceptional time. Nothing like it can be recalled for twenty-five or thirty years past.
>
> The customary ward primary is easily pictured. A small room, a smaller attendance. Scarcely enough voters present to fill the offices. A chairman and secretary appointed; nominations perfunctorily, and, unless the law compels the session to last an hour, all is over in ten minutes, the place closed up, and the voters gone home.
>
> And yet the primary is the very foundation stone of our government. It is the most important feature of our election system, for it determines, almost irrevocably, the character of the local, county and state government, for from one to three years to come.
>
> And unless an adequate primary reform law is enacted the condition of affairs described will continue, and the voters will not go to the primaries. A new primary law cannot be made to meet every possible objection; but a beginning should be made, and it cannot be made too soon.

PART OF THE INCREASE.

A number of boroughites have called attention to the fact that there has been no reduction in the borough tax rate, that it has increased instead. It will be well if they look up the facts connected with that increase and see that it is due to the increased cost of the borough schools, not to any part of the borough administration that is in the control of Mayor Smalley and the Borough Council. As a matter of fact, the actual borough tax has been reduced. It is but fair that this explanation should be made so that Mayor Smalley and the members of the Borough Council should not be held responsible for that for which they are not to blame.—Daily Press.

In 1901 at the annual school meeting held in North Plainfield, the PEOPLE voted an appropriation of $2,000 for school purposes. Through neglect of the Assessor this amount was not assessed, and consequently was not available, so in 1902 it was necessary to double the appropriation, which was done. This made an increase of 19 points on account of school taxes.

We are not disposed to look on this neglect of the assessor as wilful; but as he owes his election to Mayor Smalley, and the *Press* disclaims any responsibility by the Mayor for this increase of the tax rate, it is only fair that the PEOPLE should understand who is responsible in part for this increase whether same was the result of oversight, carelessness or whatever it may be.

It is also proper that the PEOPLE should know that the appropriation which will be asked for this year for school purposes is $1550 less than was asked for last year.

Mayor Smalley says "All we want is to be left alone." That is all the Southern people wanted in regard to the slavery question. It is all that Tammany asks for. That is all the St. Louis politicians want; but the people think otherwise, especially when the minority try to run the majority.

The repealer of the annexation law was reported to the senate Monday and passed on second reading. The impression in Trenton and elsewhere seems to be that the bill will be passed. The consolidation bill is still in the hands of the committee of revision of laws.

In 1902 the Mayor and Council of North Plainfield in their annual report, called for $19,600 for expenses of the Borough for ensuing year. This year they ask for $20,800—an increase of $1200.00.

The Legislature will adjourn sine die March 20. The Senate will endeavor to follow the action of the house.

LEGAL NOTICES

U. S. MARSHALL'S SALE

U. S. Circuit Court, District of New Jersey } ss

Between

Execution { WILLIAM H. COONROD, Complainant, and MARSHALL C. KELLY, et als., Defendants

By virtue of the above-stated writ of Fieri Facias to me directed, I shall expose for sale at Public Vendue, on Wednesday April 8, 1903 Between the hours of twelve and five o'clock in the afternoon of said day, to wit at 2 o'clock, at the Court House in Somerville, Somerset County, New Jersey, All that tract or parcel of lands and premises situate, lying and being in the borough of North Plainfield, in the County of Somerset and State of New Jersey; and being known and designated as lots numbered 15, 16, 17, and a part of lot numbered 20, in Block B, as the same are laid down on a certain map entitled, "Map of Villa Sites in Washington Park, North Plainfield, N. J., J. R. Dunham, Surveyor", dated May 1, 1872, and which map was filed in the Clerk's office of Somerset County.

Lot No. 15 is thus described: BEGINNING at a point in the centre of Rockview Avenue, distant three hundred and twenty-five feet in a southwesterly direction along the centre of said Avenue from a point in the centre of said Avenue opposite the centre of Sycamore Avenue, and is the corner of lot No Sixteen as laid down on said map; thence along the division line between lots number fifteen and sixteen in a course of south forty-one degrees and twenty-one minutes East two hundred feet and fifteen hundredths of a foot to a point in the line of lot number twenty thence along the line of lot No. twenty in a course of South forty-three degrees and fifty minutes West twenty-six and ninety two one hundredths feet to a point and is a corner of lot number fourteen thence along the line of lot number fourteen in a course of North fifty four degrees and fifty minutes West two hundred and one and four one hundredths feet to a point in the centre of the aforesaid Rockview Avenue; thence along the centre of said Rockview Avenue in a course of North thirty-seven degrees and fifty-seven minutes East fifty feet; thence still along the centre of the same in course of North fifty-four degrees and twenty-two minutes East twenty-four and five tenths feet to the point or place of Beginning. Be the said measurements more or less.

Said lots numbered Sixteen seventeen and a part of lot numbered twenty taken together are bound and described as follows: Beginning at a point in the centre of Rockview Avenue distant one hundred and seventy-five feet in a Southwesterly direction along the centre of said Rockview Avenue from a point in the centre of said Avenue opposite the centre of line of Sycamore Avenue and is a corner of lot Number Eighteen, thence along the line of that lot in a course of South eighteen degrees and fifty-two minutes East and extending across lot number Twenty two hundred and sixty-two and fifty-eight one hundredths feet more or less to a point in line of lot number twenty-one; thence along line of that lot South seventy-five degrees and thirty minutes West Ninty-nine and five tenths feet more or less to a corner of lot number Twenty-one; thence North twenty degrees and five minutes West along line of lot number fourteen thirty-five feet to a corner of lot number fifteen thence North forty-three degrees and fifty minutes East along line of lot number fifteen twenty-six and ninety-two one hundredths feet to a corner thereof, and also a corner of lot number sixteen; thence North forty-one degrees and twenty-one minutes West along line of lot number fifteen two hundred and fifteen one hundredths feet to a point in the centre of Rockview Avenue; thence along the centre thereof North fifty-four degrees and twenty-two minutes East seventy five feet, thence still along the centre thereof North sixty-nine degrees fifty-eight minutes East seventy-five feet to the place of BEGINNING.

Being the same premises conveyed to the said Ella Booth by Benjamin M. Day and wife by deed dated December 9th 1898, and recorded in the Clerk's office of Somerset County, New Jersey, in Book X-8 of Deeds on pages 390 &c.

Seized as the property Marshall C. Kelly, et als. defendants, taken in execution at the suit of William H. Coonrod, Complainant, and to be sold by

THOMAS J. ALCOTT,
COULT, HOWELL & TENEYCK United States Marshall, District of Solicitors, New Jersey.

NOTICE OF ORDER TO LIMIT CREDITORS

Somerset County Surrogate's Court.

Estate Of Katharina Kirch, Deceased.

REVIEW, 39 Somerset Street

NEW JERSEY'S LEADING NEWSPAPER.

Newark Evening News

AND

Newark Sunday News

THE ONLY PAPER WHICH COMPLETELY COVERS THE HAPPENINGS OF THE STATE.

ALL who wish to keep in touch with the news of New Jersey will find in the NEWARK EVENING and SUNDAY NEWS the best medium for attaining their desire. The NEWS is not only a paper for Jerseymen, made by Jerseymen, but it is a newspaper in the widest sense of the term. It contains each day more news of the world in general than any afternoon paper printed in New York or Philadelphia, in addition to making a specialty of all matters of importance in the State.

BETTER THAN EVER IN 1903. The facilities of the NEWS for the production of a great newspaper have been largely increased in the past year and many improvements have been made. But in the coming year greater progress than ever before is promised. New features are being added constantly, which make the NEWS more and more attractive as a newspaper for the home.

INDEPENDENT IN POLITICS. The NEWS is absolutely independent in politics, and is always the champion of every measure which has for its object the greatest good to the greatest number.

Its reports of the Legislature are full, but discriminating. Uninteresting details of the routine work are eliminated, and attention is devoted to the important bills presented, and the bearing of all these measures as related to the welfare of the people is made public. A special study of the political situation is made and unbiased reports are given. The enviable reputation that the NEWS has held in the past in this regard will be maintained in the future.

TERMS OF SUBSCRIPTION:

The EVENING NEWS, by mail, $5 a year, or 50c. a month.
The SUNDAY NEWS, by mail, $1.50 a year.
The EVENING NEWS and SUNDAY NEWS, by mail, $6.50 a year, or 60c. a month.

The **News** is delivered by newsdealers and carriers in all towns in Northern New Jersey and all along the Jersey coast, at 10 cents a week for the evening paper and 3 cents a copy for the Sunday edition.

Circulation of the NEWS Over 50,000 a Day.

POLLY

By Nancy V. McClelland

Copyright, 1902, by the S. S. McClure Company

"Wait just a minute, please," begged Polly. "I'll have these two ready to *mail*."

She sat down at her tiny desk and began dropping a little more ink on a half written page while she talked to me over her shoulder. No wonder Polly's letters are hard to read!

"It's a very hot day," I observed.

"M-m-m-*melting*!" she agreed. (She looked as cool as a flower.)

"And two letters as heavy as yours," I added, "mean a great deal of extra weight to carry back into town."

Polly nibbled the end of her pen—that's the reason I gave her a silver one last Christmas—and looked at me a moment reflectively.

She saw clean through me, I know. Polly's mind has a sweet way of its own; nobody but Polly knows what guides it, but it goes racing straight to the point like a little wild pony. When I have *come puffing across a big* thought and get to the gate that's going to lead me out, I usually find Polly there ahead of me waiting; she's over the bars and off again before I've had time to draw breath.

"Well," she said finally, turning away with a demure little curl to the corner of her mouth "don't stop for them then. I can send them later when

SHE BLEW ME A KISS FROM THE DOORWAY AS SHE DISAPPEARED.

James goes to the station. I'd—I'd hate to burden you, especially on such a hot day."

"Oh!" I hastened to explain, "it's not that I mind being burdened—by you—but I feel that I ought to get something for it."

Polly scribbled furiously. I couldn't see her face.

"How would a 'ricky' do before you start?" she asked temptingly. "I'll call"—

"You'll do nothing of the sort," I said with dignity; "I've sworn off."

"A cigar, then," she suggested and went toward the smoking table. Her father's cigars are good.

But I stopped her again. "No," said I; "I've got to be paid in the coin of the realm."

"Dollars or dimes?" asked Polly briskly, hunting out her little purse.

"Neither," said I, waving my hand magnificently. "I'm living in a bigger, sweeter, better country than the United States."

"Oh!" said Polly, smiling innocently, but blushing a little. "Why didn't you say so before?"

She tossed the letters at me. "One for each," she laughed.

I looked at the addresses.

"This," said I, "is to Harold Brown. And you know perfectly well that I shall ask at least ten for it."

"Two," she bargained.

"Ten," I repeated firmly.

She shook her head. "It's positively"—when Polly says "positively" that way there's an end of it—"it's positively not worth more than five."

"Very well," said I hastily, "we'll call it off at five. I suppose it's all right for you to be writing to Harold Brown like this"—

"Silly!" she cried. "Of course it is. I'm *thanking him for some flowers.*"

I felt unhappy, and I'm sure I looked it, for Polly laughed.

"Now, you," she said thoughtfully, "haven't sent me any flowers for at least a week."

I took up the other letter.

"Polly!" said I. "He was the man, wasn't he?"

"Yes," she nodded—"before you came."

"Really," I protested.

"He is sailing for Europe tomorrow," said Polly, "and—this is goodby."

She was looking out of the window with a farawayness in her eyes. Polly's eyes were like deep, deep lakes, fringed round with wonderful things. When you were saying something and she looked up at you unexpectedly, you promptly forgot what it was all about and fell in. Then you tried to clamber out, holding on to the fringe on the edge, and the more you tried the more hopeless it grew. But somehow you didn't at all mind drowning this way.

"Twenty-five for this one," I demanded suddenly.

She laughed. We came to terms on ten. Then I held out my arms to her.

Polly's eyes instantly began to bubble with mischief. She slipped out of the room and only blew me a kiss from the doorway as she disappeared.

"I didn't say when," she cried. "I didn't say when I'd pay."

I confess I was in a temper—it may have been the day. Deliberately I took the two letters out of my pocket, laid them back on Polly's desk, went out under the trees where my horse was standing and drove off in the little red wheeled runabout—not so much as a glance behind me at the crisp white curtains where I knew Polly must be peeping.

Thick hedges of wild roses and honeysuckle, brimming with sweetness, ran on both sides of the lane. The warm air was noisy with humming bees.

I drove quietly along the dusty road, flicking the trees with my whip and wondering— Suddenly my horse stopped short.

"Good morning," said Polly's voice calmly. "It is a hot day, isn't it?"

She was leaning over the honeysuckle hedge, hatless, her hair shining in the sun. Her face was a little flushed—I think maybe she had been running. Goodness knows how she got there even then. But it is the angels' secret how they use their wings.

I looked at her sternly without speaking.

"Do you know," she went on, "you drove away and forgot my letters?" She broke off and looked at me critically, with her head on one side. "Why, I do believe," she cried to the bees, "I do believe the man's angry with me! He didn't forget my letters at all. He left them on purpose!"

"Did you forget anything?" said I severely.

"No," she answered cheerfully; "that is the reason I'm here. It was fifteen."

I smiled, but I don't think she saw it.

"You'll have to come through the hedge," I said discouragingly.

"There's a gate," she answered. And she was in the road.

"And climb into the runabout," I cried.

"There's a step," she laughed.

"Somebody may see us," I objected.

"And what if they do?" said Polly as she put her arms around my neck, and her big blue eyes were close to mine. I saw tears trembling in them.

"Polly," said I, when I had forgiven her, "I *shall* have to drive you home."

"Yes," said Polly comfortably, "and stay to luncheon."

"And then take the letters into town," I added.

"Bother the letters!" said Polly.

How to Judge Cheese.

Most housekeepers quail before that part of the family marketing which relates to the purchase of cheese and wish the man of the house, who is usually the chief consumer as well as the connoisseur, would always buy it. Such may find the words of an authority of value:

"A cheese with an indication of goodness will stand square on the shelf and will have an even colored not mottled rind. The moment you press your finger tips on the rind you can begin to judge of the inferior makeup of a cheese. If it yields readily to the pressure of the fingers and the rind breaks or does not spring back readily when the pressure is withdrawn, you have struck a soft article, caused by the slack cooling of the curd, a want of acid or both. At best it will have an insipid flavor and will 'go off' as it ages. Cheese which feels so hard that you cannot press it on the rind is either sour, salted too heavily, cooked too much, skimmed or suffering from a touch of all these complaints.

"A good cheese will be mellow to the touch, yet firm. Its rind will be of an even tint, elastic and free from puffs, and the sample will reveal firm, close grained, buttery cheese of a nutty flavor."

Geographical Knowledge In 1492.

But very little was known in regard to the extent of the world in Aristotle's day, in the foruth century before Christ, and but very little more was known about it 1,800 years later, in the time of Columbus. In 2,000 years the world had in reality retrograded rather than advanced.

It was the popular belief in the time of Columbus that the world was flat, though many contemporary scholars thought differently. The great civilizations of the world at that time were grouped around the Mediterranean sea, although England was a considerable power and the Scandinavians were a great maritime people. But Europeans at that time knew but little of Asia and but little of Africa, and America of course was undreamed of.

Even after Columbus had discovered the latter continent he was perfectly *oblivious of the fact*. He thought Haiti was Cipango or Japan, and for a long time regarded Cuba as a part of the mainland of Asia.

The Other Wouldn't Care.

Maurice Barrymore, the actor, once journeyed from a hunting camp where he was a guest to a small Maine town for the purpose of seeing "Hamlet" acted by a company of barnstormers. The performance was so bad as to be fascinating, and Barrymore and his friends remained until the very end. As they made their way to the village hotel one of the party asked the actor how companies of the kind managed to exist.

"Don't know," said Barrymore, "but *they serve an educational purpose.*"

"They do? How?"

"Well, if I had the time and money, I am sure I could decide the Shakespeare-Bacon controversy after seeing tonight's performance."

"Why, Barry, what was there tonight to make you think so?"

"My dear fellow, if the bodies of Shakespeare and Bacon were disinterred, you'd find that the real author of 'Hamlet' had turned in his grave."—Philadelphia Times.

Nails

Had Turned Blue—Limbs Bloated.

Lay in a Stupor From Heart Disease.

Dr. Miles' Heart Cure Cured Me.

The nails turning blue is a sign of defective circulation as is the bloating of the arms and legs. Other common symptoms of heart disease are shortness of breath from slight exertion, pain in or near heart, smothering spells, palpitation or fluttering, weak, tired and hungry spells, dreaming and nightmare, sudden starting in sleep. In severe cases the brain, stomach, lungs, etc., may become so disordered as to mislead the physicians as to the nature of the disease. If you suffer from any or all of these symptoms your heart is diseased and treatment should not be postponed a single day. Dr. Miles' Heart Cure is guaranteed to help you as it has helped thousands of others.

"I owe my life to Dr. Miles' Heart Cure. After four doctors met in consultation on my case, their verdict was that I had suffered from heart disease so long that they could do nothing for me and I would surely die. My brother said, 'While there is life there is hope, we will try Dr. Miles' New Heart Cure.' When I began taking it my nails had turned blue and my arms and legs were bloated to twice their natural size, and I lay in a stupor most of the time. After the first few doses the dizziness went away and after three bottles I was able to go around the house and do my work. Both my family and my nurse think I would have been in my grave had it not been for Dr. Miles' Heart Cure."—MRS. ROBERT MORRIS, Sackets Harbor, N. Y.

HAPPY AND HEALTHY.

A Beautiful Canadian Girl Saved From Catarrh of the Lungs by Pe-ru-na.

MISS FLORENCE KENAH.

Miss Florence E. Kenah, 434 Maria street, Ottawa, Ont., writes:

"A few months ago I caught a severe cold, which settled on my lungs and remained there so persistently that I became alarmed. I took medicine without benefit, until my digestive organs became upset, and my head and back began to ache severely and frequently.

"I was advised to try Peruna, and although I had little faith, I felt so sick that I was ready to try anything. It brought me blessed relief at once, and I felt that I had the right medicine at last. Within three weeks I was completely restored and have enjoyed perfect health since.

"I now have the greatest faith in Peruna." F. E. KENAH.

WOMEN should beware of contracting catarrh. The cold wind and rain, slush and mud of winter are especially conducive to catarrhal derangements. Few women escape.

Upon the first symptoms of catching cold Peruna should be taken. It fortifies the system against colds and catarrh.

The following letter gives one young woman's experience with Peruna:

Miss Rose Gerbing is a popular society woman of Crown Point, Ind., and she writes the following:

"Recently I took a long drive in the country, and being too thinly clad I caught a bad cold which settled on my lungs, and which I could not seem to shake off. I had heard a great deal of Peruna for colds and catarrh and I bought a bottle to try. I am pleased that I did, for it brought speedy relief. It only took about two bottles, and I *considered this money well spent.*

"You have a firm friend in me, and I not only advise its use to my friends, but have purchased several bottles to give to those without the means to buy, and have noticed without exception that it has brought about a speedy cure wherever it has been used."—Miss Rose Gerbing.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Some Buddhistic Laws.

Professor Maxwell Sommerville was discussing the other day the Buddhist faith, for which he has a profound respect. Some of the striking tenets of Buddhism that he quoted were:

Use not perfume about thy person.

To cough or sneeze in order to win the notice of a group of girls is a sin.

Eat no animal food.

Drink no intoxicating beverage.

Care for the aged and infirm.

It is sinful to think one way and speak another.

It is a sin to pass judgment on the acts of other men.

Give no flowers to women, and sing no gay songs.

Keep neither silver nor gold.

When you eat make not a noise like a dog.

It is a sin to eat of the flesh of man, elephant, horse, crocodile, dog, cat, tiger or serpent.

A priest may not wash himself in the twilight or dark, unless he should unknowingly kill some insect or other living thing.

Lend nothing on interest.—Philadelphia Record.

Sugar-coated compliments are often bitter inside. N. Y. 10.

Miss Alice Bailey, of Atlanta, Ga., tells how she was permanently cured of inflammation of the ovaries, escaped surgeon's knife, by taking Lydia E. Pinkham's Vegetable Compound.

"I had suffered for three years with terrible pains at the time of menstruation, and did not know what the trouble was until the doctor pronounced it **inflammation of the ovaries,** and proposed an operation.

"I felt so weak and sick that I felt sure that I could not survive the ordeal. The following week I read an advertisement in the paper of **Lydia E. Pinkham's Vegetable Compound** in such an emergency, and so I decided to try it. Great was my joy to find that I actually improved after taking two bottles, and in the end I was cured by it. I had gained eighteen pounds and was in excellent health." —Miss Alice Bailey, 50 North Boulevard, Atlanta, Ga.—*$5000 forfeit if original of above letter proving genuineness cannot be produced.*

The symptoms of inflammation and disease of the ovaries are a dull throbbing pain, accompanied by a sense of tenderness and heat low down in the side, with occasional shooting pains. The region of pain sometimes shows some swelling.

The Black Hole.

A little paragraph published recently relates to the unveiling of a monument at Calcutta by the Viceroy to the memory of Mr. Holwell, who, with 145 other persons, were confined in the Black Hole in June, 1756. The hole was a room about eighteen feet square and lighted by one small window only. The [illegible] people left to struggle and [illegible] air in this space is truly horrifying, comments the *London Chronicle.* When the doors were opened 123 were found to be dead or dying, and of the twenty-three survivors several were subsequently cut off through the disease induced by the experiences of that terrible night. The statue is erected on the site of the Black Hole. The case reminds one of recent experiments in ventilation. It has usually been estimated that air containing more than six or eight volumes of carbonic acid gas in 10,000 is unfit for breathing. But nowadays we are told that this amount of carbonic acid gas—one of our waste products—may be increased without injury to health. That which affects us in bad air is therefore the combination of this gas with other waste products, and most notably, the organic matter given off from lungs and skin. This last consists of the worn-out cells of our frame and is putrescent. It is amid air loaded with this material that the germ of typhus fever (the old "jail fever" of John Howard's days) breeds and multiplies. The prevention of typhus fever is a matter of ventilation, and doubtless the deaths in the Black Hole were due to a rapid form of blood poisoning induced by the breathing of air contaminated by the debris of the unfortunate bodies imprisoned therein.

Deer Hunt Through London.

A deer hunt in the streets of London is so unusual that the spectacle of a fine buck dashing through the crowded thoroughfares of Hampstead Kilburn and Kensal Rise on Wednesday fairly upset those suburbs. The animal was first seen near Golgers Green. It made for Jack Straw's Castle, with a crowd of men in pursuit. Policemen, milkmen, cabmen and crossing sweepers *joined in the hue and cry, but the deer,* though greatly distressed, rushed through or leaped over all obstacles, got clean away from the panting crowds and overturned a milk cart.

An adventurous policeman tried to stop the runaway, but the animal showed his contempt for the majesty of the law by promptly rolling its representative in the dust. The deer was finally captured after a chase of several miles. The animal belonged to one of the stag hunts which meet some distance from London.—London Correspondence New York Herald.

A Bunch of Hard Luck.

O. S. Taylor, a farmer living four miles west of Arcola, has good reasons for believing that there is a hoodoo connected with the number thirteen. On the thirteenth thirteen stray geese made their appearance at his farm. He had a notice inserted in the local paper that the owner might have the geese by calling for them. Strange to say there were just thirteen lines in this notice. Since these thirteen geese have invaded his premises the family cow has gone dry, the hens have quit laying, the canned fruit has soured, the youngest daughter has been taken sick with the measles, and the hired girl has left.—Chicago Inter-Ocean.

The Sanatorium Treatment of Tuberculosis

By Dr. Herbert M. King.

THE climate must be neither very cold nor very warm for the treatment of the consumptive. It must be dry, but not dry enough to hold dust suspended in the air. The air must be stimulating and the elevation should be more than 1000 feet above the sea level.

Two things are needed in the successful treatment of the consumptive—hyperaeration and increased nutrition. There should be systematized feeding to the limit. Exercise in the open and rest in a reclining position are needed. The weight is increased by rest and "stuffing," but if the weight is increased above the normal it is at the expense of the well-being of the patient. Take as an analogous example stall-fed animals, which are prone to tuberculosis.

The laboratory of a consumptive sanatorium should be equipped for medical research; there is little research at these institutions except at the one at Saranac Lake.

The minimum time for an incipient and uncomplicated case in a sanatorium is three months; for a more advanced case, six months or more. If they have clean homes and wholesome occupations, they may then go home.

In acute cases liquid food should predominate. As pulse and temperature fall, more proteids should be given. Baths, according to the ability of the patients to stand them, should be indulged in, and light outdoor exercise is beneficial. Games, such as croquet, outdoor bowling, archery and modified golf may be pursued, but not until the patient is tired.

Clean and Unclean Money.

By the Rev. Dr. P. S. Grant.

IS the man who has done some wrong to be denied the right to do some good? All these big gifts to institutions proceed either from motives of contrition or else the man is not so bad as we think him. I think it is pretty generally understood that all those gifts are in a sort of way an expiation, a sop to relieve the conscience. The more public the gift the more fully it is understood that the man is sorry.

Some man to-day consolidates a few railroads and demands and gets a few millions of dollars for his pains. Are we going to refuse the gift of the man who has made his money in this way, saying that it is tainted money? We must not be too squeamish about these gifts under the present industrial situation. We see the college professor who is giving his best so inadequately paid that he well-nigh starves. Out of all this giving we may arrive at a state of society when we will not try to wring the last cent *out of our neighbor but rather enjoy the blessed pleasure of giving.*

Great gifts from tainted fortunes are acts of restitution. Judas's money was not put in the treasury of the temple but devoted to the use of the community as it was "blood money." That is the only use for these vast fortunes. There is no fear that gifts to educational institutions from such sources will result in the elimination of free thought in those colleges and the substitution for them of views peculiar to the donor. Let us take all the money we can from such sources. They cannot restrict education or act in any way harmful to the public weal.

The Law and the Penalty.

By George Harvey.

TO such of the students of evil as wish to understand its nature rather than to practice it, there has been nothing more dismaying than the apparent uncertainty and even inability of the law in the case of many offenders against it. Not only the law which is supposed to be administered in what are drolly called the courts of justice is of this faltering and erring effect, but the law by which a man of bad conscience judges and punishes himself, when there is no statute made and provided for his misdemeanor, is equally inoperative. It has been noted by those who have much to do with criminals that remorse is apparently more the effect of temperament than of responsibility, and that those feel it most who need feel it least. The guilty man is said to be more concerned in getting off than in lamenting his misdeed; and this fact, if it is a fact, has been turned to account by the agnostic science of a period which seems now closed, in disestablishing the notion of a moral government of the universe. That science discarded the old idea of Comeuppings in the affairs of men, and left the strongest to survive, without regret, by whatever means he would. It concerned itself with the physical and intellectual evolution of the race, and allowed the individual to wander in darkness as to what would happen to him if he did wrong, even what would happen to him from himself, or from the god within him. But there are signs that this sort of science has had its day, and there is an obvious return to some of the former ideals, especially among the psychological inquirers. These find it their business not only to ascertain new facts, but to revise the conclusions of science in regard to the old ones. The soul is once more having a chance and conscience is coming back to its own, at least in the interest of the spectator. Whether it will come back a chastened and instructed conscience, or the sick and crazy thing it too often was, a Bourbon that has learned nothing and forgotten nothing, remains to be seen. What is certain is that it is meeting the recognition as a moral force which has been largely denied it for a generation past, and that it is being studied with an intelligence freed from theological preoccupations to fresh activity.—Harper's Weekly.

Success---Its Cause and Effect

Merit and Work, Not Luck, Are the Watchwords.

By Emily Elsnor.

SUCCESS! Is there a brighter word in our entire dictionary? Does it not scintillate with all the good things of life? Is it not Success, or even an approach to it, that entices the weary traveler into dark and unknown paths, buoyed up by the hope that this beacon light may cast its rays o'er the end of his journey?

When you hear of a successful man, you instantly conjure up visions of a pompous, self-satisfied gentleman, leaning back in his office chair and toying with his watch chain, while, complacently, he looks from the high pedestal of success down on the toiling mob at his feet. He entertains royally, his dinners are the talk of the town, his wife's gowns and jewels are the *envy of the women of her set, and the finest tutors of the gentle arts and* graces are engaged to teach his children the very latest foibles in culture. Take it all in all, the petals of roses are cast in thick, soft profusion in his path, while the thorns are thrown into the road that the unlucky ones may tread thereon.

"Luck—that's the thing," you grumble, enviously. Jealousy rankles in your breast, and you shuffle along, cursing the fates that deal thus fortunately with one man and harshly and ungenerously with another. "What's the good of starving?" you say. Luck is against you and you might as well give up. "Down with the rich!" you cry, striking the universal chord of the unfortunate. Instead of studying the science of accumulating money, you study the evils of accumulated wealth.

Thus you go through life, bemoaning your own fate, and in your heart envying and hating the successful man. You like to tell the story of so and so, the successful man, who in your boyhood days was proud to be seen playing marbles with you; and you like to wind up dramatically: "See him to-day. He is rich—I am poor; we are farther apart than the poles. He scorns me. His money separates us. The fates will it so!"

As a matter of fact—the fates had nothing to do with it. The man of sound mind and body, the man of will, energy, perseverance—the man of good heart and spirit is master not only of his destiny, but of destinies! The qualities I have enumerated are the heritage, the birthright of every man! He who allows any of these, his natural faculties, to wither for want of exercise, is not and cannot hope to be the successful man!

With the perversity of human nature you study only the effect of success. Why not study its cause? Therein, and therein only, lies your chance. Remember, while you are talking and moaning the other man is doing! Don't blame things to luck! It is work, work, work—faithful, persistent, unceasing work that wins success.

Could you but see the successful man produce his success a little admiration and wonder might join and possibly precede your ire and envy. Day after day and far into the night, he toils with body and brain, often putting in three times as much work as the meanest and most ill-paid of his employes—and does his work cease when success crowns his efforts? No! While it means hard work to gain success, it is none the less hard work to keep it!

I could cite thousands of living examples of this living truth—success means work, and work means success!

New York City.—Tasteful negligees are essential to comfort and become economies at the same time, inasmuch as they are apt to save the wearing of

TASTEFUL HOUSE COAT.

gowns suited to more formal use. The very pretty May Manton one illustrated is a modification of the Japanese model which has grown so familiar and is so much liked. In common with all Eastern garments it is loose and flowing, but the half-fitted back renders it somewhat more shapely than the original model. As shown it is made of white China silk, showing a design of pink flowers, with banks of pink with white, but various combinations might be suggested. Simple cotton crepes are charming with bands of contrasting color in the same material or of silk. Albatross makes up most satisfactorily with silk bands, and numberless cotton fabrics are available.

The house coat is made with loose fronts, that are gathered at the upper edge and joined to yoke portions, backs and side backs. The neck and front edges are finished with double bands that are shaped to give the correct outlines. The sleeves are in bell shape with applied bands at their lower edges.

The quantity of material required for the medium size is four and one-half yards twenty-one inches wide, three and three-eighth yards twenty-seven inches wide, two and three-fourth yards thirty-two inches wide, or two yards forty-four inches wide, with one and one-fourth yards of silk for bands.

Effective and Smart.

Shirt waists made with slot seam effects are exceedingly effective and eminently smart. The stylish May Manton example in the large drawing is shown in cream white brilliantine with stitchings of black corticelli silk and large pearl buttons, but the design suits all the season's wool and silk waist materials as well as the heavy and fleece lined cottons that are so much liked.

The lining, that can be used or omitted as preference and material may decide, is snugly fitted and closes at the centre front. The waist proper consists of back and fronts only, that are laid in slot seams from the shoulders and a central box pleat. The sleeves are in the new bishop style and fall in soft puffs over the pointed cuffs. The collar also is novel and is pointed at the front to match the cuffs.

The quantity of material required for the medium size is four and one-eighth yards twenty-one inches wide, three and seven-eighth yards twenty-seven inches wide, two and one-half yards thirty-two inches wide, or two and one eighth yards forty-four inches wide.

"Slot seams" make the feature of the latest skirts, and promise to gain in favor both this season and next. Many of the advance models show them both in skirts and jackets, and all indications point to an extended vogue. The stylish skirt illustrated is of checked tweed in light weight showing lines of varying shades of gray, and is trimmed with bands of plain gray held by cut steel buttons and stitched with corticelli silk, but all suiting and skirt materials are appropriate.

The skirt is cut in seven gores and is laid in inverted pleats at each seam and in the centre of each front and side gore that are stitched to flounce depth at tuck width from their edges and so form the "slot seams" which conceal all seams and whose fulness provides the graceful flare at the lower portion. The back is stitched flat in habit style, the pleats providing graceful fulness where they fall free.

To cut this skirt in the medium size ten and one-half yards of material twenty-one inches wide, nine and one-fourth yards twenty-seven inches wide, or five and one-half yards forty-four inches wide will be required.

White Mohair to Reign.

White mohair, with a silky surface, is to have an unprecedented reign this spring. Entire gowns, separate waists, and short and long coats are made of this material, and are trimmed with embroidery, lace and fancy braid; for the plainer models machine stitching braid and many pearl buttons are used. The dust-resisting, non-creasing qualities of mohair render it an admirable material for traveling and general utility gowns. These gowns are smart in the brown shades, dark blues, grays and black, and are bound to be leading favorites.

Beautiful Evening Wraps.

Beautiful evening wraps seem always to introduce somewhere a glow of pink, which serves well to brighten the complexion. Lining or trimming furnishes the color, and sometimes the whole garment is built of the softest pink satin. One of these is combined with chiffon of a blush rose tint merging into mauve, and a cobwebby lace of white, with fairy outlines of black. There is a wide collar of ermine, and the ermine tails used as fringes are combined with festoons of pink roses.

Beautiful Chiffons.

Beautiful chiffons in the painted effects are being heralded, and over the interlining of plain white or black

"SLOT SEAM" SHIRT WAIST AND "SLOT SEAM" SKIRT.

chiffon grounds they show floral designs of exquisite softness and delicacy of coloring. Blossoms and foliage appear as usual in many of the patterns, but there are also the conventionalized designs and nondescript effects, some of them kaleidoscopic. The loveliest of all is probably the moire chiffon, which is seen in dainty pinks, greens and blues, as well as cream.

Misses' Shirt Waist.

Plain shirt waists are always smart and always in vogue for young girls as well as for grown-ups, however much the fancy ones may vary from year to year. This very excellent model is shown in blue mercerized cheviot with large pearl buttons, but is adapted to silk and wool waistings as well as to cotton and linen fabrics. The lining is optional but is to be commended for all waists of the non-washable sort.

The waist consists of the fitted lining, the full fronts and plain back. The fronts are gathered at the neck edge and again at the waist line and *blouse slightly over the belt, but the* back is arranged in gathers at the waist only and is drawn down snugly. The sleeves are in shirt style, with straight, narrow cuffs, but are full at the lower portions, in conformity with the latest style. At the neck is a pointed stock.

The quantity of material required for the medium size is three and one-half yards twenty-one inches wide,

MISSES' SHIRT WAIST.

three and one-fourth yards twenty-seven inches wide, two and three-fourth yards thirty-two inches wide, or two yards forty-four inches wide.

National Aid.

COLONEL BROWNLOW, of Tennessee, is just now one of the busiest men in Congress. In addition to looking after affairs immediately affecting his district he has to attend to an immense correspondence resulting from the widespread interest in his road bill. In response to a request for an interview he said:

"Well, I am pretty busy, but I never get too busy to say something on the good question. Still, it doesn't appear to be necessary for me to say much regarding my bill, as the people and press of the country all seem to be talking for it. Before introducing the measure I never dreamed that it would meet with such universal favor. It is supported not merely by the rural and agricultural press, but by the great daily papers, whose circulation and support is found almost entirely in the cities. Look at this, for instance, from an editorial in the Atlanta Constitution, the leading Democratic daily of the South and one whose conservatism is well known:

"'While national improvement of public highways may seem something of a departure, it is, nevertheless, but a return to one of the early policies of the Federal Government. Before the railroad was thought of the infant republic laid out and improved roads between important commercial centres, Congress voting appropriations and regulating the plan of work. After the railroad came there was no further aid of the kind for wagon roads, but Uncle Sam did not hesitate to help build a transcontinental railroad. It will not be forgotten, in this connection, that the Government expended a million or more in building the Chesapeake and Ohio Canal.

"'It is a lamentable fact that road building as conducted by the average local supervisor is about as effective and lasting as water poured in a sieve. The first prolonged rain puts the wayfarer back into the same old slough of despond, hub deep, and in the spring the taxpayer proceeds as before. Macadam and other permanent roads are enormously expensive, though it is true that the average country township, where road working is respectably prosecuted in the course of years pays more for its treacherous dirt roads than it would have paid for a serviceable pike. However, the same argument will apply to the luckless individual who has to pay for a necessity on the installment plan. The rub is in getting together the funds to have done with the whole business at once.

"'The Federal Department of Agriculture has already done good work along the line of road improvement, though mainly in an instructive way. It has constructed sample pieces of good roads for the edification of backward communities, and the "good roads train" sent into the South last year was a valuable start of the educational propaganda. Representative Brownlow now proposes to extend the idea and clothe the department with some real authority in the premises. The Government is not only to instruct, but to foot half of the bills, the State, county or individuals to pay the other half. For purposes of construction the bill carries with it an appropriation of $20,000,000, of which no State shall receive in aid of construction a greater proportion than its population bears to the total population of the United States. The public interests seem to be properly safeguarded and every provision of the measure carefully thought out.

"'The Brownlow bill has much to commend it, and it stands for a sound, worthy principle of Government, designed to benefit not a class, but the whole people. The good roads agitation is beginning to show results.'

"Of course," resumed Colonel Brownlow, "the South is especially interested in my bill because of its retarded development along the line of highway improvement. Nevertheless, the idea of national aid seems to be equally popular in other sections. Here is an editorial from a leading Republican organ of the Buckeye State, the Cleveland Leader. In Ohio, it should be remembered, great progress has been made in the building of improved roads. The Leader says:

"'It is nothing new to have efforts made in Congress to interest the Federal Government in the improvement and construction of roads in various parts of the country. That is naturally an old story, in a land deficient as the United States is in well made highways. But it is worthy of note that the pressure in the direction of national aid in road building is becoming stronger from year to year.

"'This change will grow more important with the filling up of the country, especially with the increase in the number of city people who maintain rural or suburban homes. The necessity of calling upon greater resources than those of the strictly agricultural population for the development of an adequate system of good highways is certain to be more clearly perceived as the statistical side of road building receives more careful attention.

"'To make good roads such as can fairly be counted on to resist the action of frost, intense heat and all the changes of the American climate, requires greater expenditures than rural taxpayers can properly be asked to make. The cities send an increasing army of pleasure seekers into the country every year, and such roads as are needed for their automobiles, horse vehicles and bicycles cannot be constructed without some use of the wealth accumulated in great centres of trade industry.

"'It is difficult, of course, to arrange a satisfactory division of authority and financial responsibility between the nation, the States, and local governmental bodies in the building and maintainence of roads, but it is easier to solve that problem than it is to discover any way of making the United States what the leading countries of Europe are in the matter of public highways without help from the national treasury.'"

A FOOL PROOF CONTROLLER.

To Prevent Damage to the Trolley Car Equipment.

The tendency in modern design is to make all apparatus and methods of operation as nearly "fool proof" as possible. So much has either been damaged or destroyed, owing to the incompetency of operators, that it has been found expedient to surround apparatus, especially electrical appliances, with all possible safeguards.

Almost everything about an electric car is now fool proof, excepting, perhaps, the controller movement; but there has been recently introduced a device which renders this immune from injury by preventing motormen from abusing and reducing the efficiency of the equipment of an electric railway. This device, which is known as the automotoneer, is mechanical in its action, and is placed in each controller for limitnig to a predetermined time-limit the rate at which the controller can be advanced from one point to another. In principle, the automotoneer, says the American Electrician, is very simple. The movement of the control handle to consecutive points on the controller raises a piston which drives air out of an air dash-pot. The raised position of the dash-pot locks the controller handle against further advance, until sufficient time has elapsed for the piston to resume its normal position by the flow of air into the dash-pot. The rate at which this air flows can, of course, by the adjustment of the size of the inlet, and this adjustment determines the time that must be taken between points on the controller.

WORDS OF WISDOM.

He that can have patience, can have what he will.—Franklin.

Contentment gives a crown where fortune hath denied it.—Ford.

All cruelty springs from hard heartedness and weakness.—Seneca.

The great man is he who does not lose his child's heart.—Mencius.

Good manners and good morals are sworn friends and fast allies.—Bartol.

Sin has many tools, but a lie is the handle that fits them all.—Oliver W. Holmes.

We carry happiness into our condition, but cannot hope to find it there.—Holmes.

Prosperity is no just scale; adversity is the only balance to weigh friends.—Plutarch.

The more one speaks of himself the less he likes to hear another talked of.—Lavater.

He who will not take advice gets knowledge when trouble overtakes them.—Kaffir.

There is no tyrant like custom, and no freedom where its edicts are not resisted.—Bovee.

Ennui is one of our greatest enemies; remunerative labor our most lasting friend.—Moser.

The chief constituents of what we call manhood are moral rather intellectual.—J. S. Kieffer.

The more we do, the more we can do; the more busy we are, the more leisure we have.—Hazlitt.

A Chocolate Drop Famine.

"Several weeks ago I had a letter from a lively young girl who is abroad," said a business man of great social talents, "and she bemoaned the fact she could not find chocolate drops on the other side. You can imagine how such an unhappy state of affairs, on the part of that American young woman, would appeal to the heart of any chivalrous man; so I made immediate preparations to relieve the chocolate famine across the water.

"Of course I could send her boxes of all kinds of chocolate creams, but I wanted to make the arrival of these longed-for confections a somewhat insidious surprise; so I took a brand new, great big trashy novel, well bound, which a designing clerk had foisted on me at the bookstore—'Frazzled Edges' was the name of it, I believe—and I had all the reading matter cut neatly out, leaving a broad, firm margin, which formed a nice box. This I packed full of fine chocolate drops, closed the covers of the book over them, and tied it with silver ribbons. I wish I could see that girl's face when she opens the express package. In a few days I am going to send her a larger consignment—to follow up the pleasant impression made by those packed in the book. When an American girl abroad wants American chocolate drops she ought to have them."—Detroit Free Press.

Old-Time Journalism.

Herbert Asquith paid a pretty compliment to the press at the London Newspaper Society's dinner in regard to its rapid collection of news. Nowadays the editorial task is winnowing rather than gathering. It was otherwise in the eighteenth century, when the Leicester Journal, for instance, had to send all its copy by coach to London for printing, so that its news was at least a week late when it appeared. It was sometimes later. For in one dry season the editor was reduced to printing the Bible as a serial and had reached the tenth chapter of Exodus before any news more recent than the Pentateuch had reached the office.

According to a German patent the toughness and durability of aluminum can be much increased by the addition of phosphorus. The addition of seven to fifteen per cent. makes the metal extremely hard and tough, and well adapted for forgings. Three per cent. produces a good horseshoe metal, and with a two per cent. addition it can be easily rolled.

A smoke stack which is said to be both sparkless and smokeless has been invented by a Virginian. This feature is secured by the introduction into the interior of the stack of a number of tiny water-jets which are said to thoroughly purify the smoke by throwing down all particles. The streams of water are said to give no interference to the draft whatever.

Two coats of hot oil, carefully applied after thorough cleaning of the metal, are recommended by a Canadian artisan as an improvement over any process now in use for preventing rust of structural iron and steel. The oil would fill crevices, cracks and holes where paint cannot enter. It would cover rough places often imperfectly coated in ordinary painting, and it would be a fine preparation for subsequent painting or covering with cement coating.

While much has been said and written about the sprinkling of oil on roads, principally as a means of preventing dust, the use of the oil in the same way on river levees in some parts of the United States is said to have been found to be an excellent protection against the burrowings of gophers and ground squirrels, which threaten the security of the barrier raised against the encroachment of the flood waters. Crude oil is so distasteful to these that they shun the ground covered with it.

It is reported from Germany that an experimenter there has found aluminum an excellent substitute for a whetstone in giving a fine, keen edge to blades. When examined with a microscope, the edge of a knife that was sharpened on the metal appeared much straighter and smoother than one sharpened on a stone. One peculiar effect of the honing is that the surface of the aluminium becomes coated with a greasy substance with a great power of adhesion to steel, and to this is attributed the fine edge produced.

The great increase in the utilization of water power is one of the notable signs of the times. Waterfalls are now running factories, driving tramcars, lighting cities, irrigating farms and doing various other kinds of service, in many cases at a distance of miles from the fall itself. Italy is conspicuous for the progress it has made in this way, the Alps and the Apennines abounding in waterfalls. Now it is proposed to make use of the Doogh Sagar River, in India, to produce fifty thousand horse-power.

A very striking instance of the deterioration of leather, produced under conditions demanding quicker tanning by the use of various chemicals, thus decreasing the durability of the material, is afforded by the fact that the British Museum expends $20,000 a year in rebinding books in leather. Modern leather is widely different from the material produced by what is now regarded as an effete process, its life being limited to fifteen years. In the search for cheaper and quicker processes of making leather, large quantities of sulphuric acid are used, and this chemical, in combination with others, causes the material to decompose rapidly in the course of a few years.

A Feat of Memory.

Some light is thrown on the possibilities of memory culture by an interesting recital contained in the autobiography of Robert Houdin, the famous conjurer. He taught his son to glance at, say a shop window, and to memorize accurately, as in a brain picture, the window's contents. Then he would ask him to describe the contents, checking and correcting him as he went on. On one occasion Houdin was commanded to the Tuileries to give a performance before the French court. As he passed through an anteroom to the salon he bade his son note the arrangement of the rooms and the contents of the bookcases. Then at the close of the entertainment Houdin astonished his audience by giving what he called a "second sight" test. Declaring his unfamiliarity with the Tuileries, Houdin, blindfolding his son, asked him to send his gaze through the wall of the room to the chamber beyond, to describe the arrangement of the chamber and to read the titles of the volumes on the shelves of the bookcases. This feat the young lad accomplished to the astonishment of the court.—Chicago News.

Foiated Paragraphs.

No man is so wise that he can't learn from a fool.

Love is blind, especially the brand known as self-love.

But few men exhibit their bravery until after the danger is past.

Man is born with a character, but he has to make his own reputation.

A lazy man is always anxious to get busy when there is nothing to do.

The truth would seem less brutal if people were acquainted with it.

It may be hard for some people to be poor, but for others it is the easiest thing in the world.—Chicago News.

On the Verge of Bright's Disease.—A Quick Cure That Lasted.

CASE NO. 30,611.—C. E. Boles, dealer in grain and feed, 505 South Water street, Akron, O., made the following statement in 1896; he said: "Ever since the Civil War I have had attacks of kidney and bladder trouble, decidedly worse during the last two or three years. Although I consulted physicians, some of whom told me I was verging on Bright's disease, and I was continually using standard remedies, the excruciating aching just across the kidneys, which radiated to the shoulder blades, still existed. As might be expected when my kidneys were in a disturbed condition, there was a distressing and inconvenient difficulty with the action of the kidney secretions. A box of Doan's Kidney Pills, procured at Lamparter & Co.'s drug store, brought such a decided change within a week that I continued the treatment. The last attack, and it was particularly aggravated, disappeared."

Three Years After.

Mr. Boles says in 1899: "In the spring of 1896 I made a public statement of my experience with Doan's Kidney Pills. This remedy cured me of a terrible aching in the kidneys, in the small of my back, in the muscles of the shoulder blades, and in the limbs. During the years that have gone by I can conscientiously say there have been no recurrences of my old trouble. My confidence in Doan's Kidney Pills is stronger than ever, not only from my personal experience, but from the experience of many others in Akron which have come to my notice."

A FREE TRIAL of this great kidney medicine which cured Mr. Boles will be mailed on application to any part of the United States. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

"Catatypy."

Herr Oswald, a German professor, has evolved a new process of photography, which has worked its way into publicity under the designation "photography without light." Such a description is, however, only half of the truth, for the negative is produced in the camera in the usual way. The process is named "catatypy," which signifies a process for reproducing without light photographs and other pictures whose picture substance consists of those bodies which chemists call "catalyzers," that is, bodies which decompose others without themselves being decomposed. "Catatypy" may be termed Germany's New Year's present to the photographic industry.—London Globe.

Semaphores are to be used at Woolwich, England, arsenal to signal to the employes when it is time to leave off work.

This Will Interest Mothers.

Mother Gray's Sweet Powders for Children, used by Mother Gray, a nurse in Children's Home, New York, cure Constipation, Feverishness, Teething Disorders, Stomach Troubles and Destroy Worms; 30,000 testimonials of cures. All druggists, 25c. Sample FREE. Address Allen S. Olmsted, Le Roy, N. Y.

It's easy enough to be good-natured when you always have your own way.

$100 Reward. $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address

MRS. RATH'S BABY

Tired Mother's Touching Story of Anxiety and Suffering.

Cuticura Brings Blessed Cure to Skin Tortured Baby and Peace and Rest to Its Worn Out Mother.

It is no wonder that Mrs. Helena Rath was taken sick. Single-handed, she did all the housework and washed, cooked and mended for her husband, Hans, and their six children. After a plucky fight to keep on her feet, Mrs. Rath had to yield, and early in 1902 she took to her bed. What followed she told to a visitor, who called at her tidy home, No. 821 Tenth Ave., New York City.

"I hired a girl to mind the children and to do whatever else she could. I couldn't stay in bed long. Sick as I was, it was easier for me to crawl around than to lie and worry about my little ones. So I got up after a few days, and let the girl go. I had noticed that she had sores on her face, hands and arms, but I paid no attention to that until Charlie, my youngest, began to pick and scratch himself. He was then ten months old, and the girl had paid more attention to him than to any of the others. Charlie was fretful and cross, but as he was cutting teeth, I didn't think much of that. Even when a rash broke out on his face I wasn't frightened, because everybody knows that that is quite common with teething babies. Several of my others had it when little, and I thought nothing about it.

"But the rash on Charlie's poor little face spread to his neck, chest, and back. I had never seen anything quite like it before. The skin rose in little lumps, and matter came out. My baby's skin was hot, and how he did suffer! He wouldn't eat, and night after night I walked the floor with him, weak as I was. Often I had to stop because I felt faint and my back throbbed with pain. But the worst pain of all was to see my poor little boy burning with those nasty sores.

"I believed he had caught some disease from the girl, but some of the neighbors said he had eczema, and that is not catching they told me. Yes, I gave him medicine, and put salves and things on him. I don't think they were all useless. Once in a while the itching seemed to let up a bit, but there was not much change for the better until a lady across the street asked me why I didn't try the Cuticura Remedies. I told her I had no faith in those things you read about in the papers. She said she didn't want me to go on faith nor even to spend any money at first. She gave me some Cuticura Ointment—I think the box was about half full—and a piece of Cuticura Soap. I followed the directions, bathing Charlie and putting that nice Ointment on the sores.

"I wouldn't have believed that my baby would have been cured by a little thing like that. Not all of a sudden, mind you. Little by little, but so surely. Charlie and I both got more peace by day, and more sleep by night. The sores sort of dried up and went away. I shall never forget one blessed night when I went to bed with Charlie beside me, as soon as I got the supper dishes out of the way and the older children undressed; when I woke up the sun was streaming in. For the first time in six months I had slept through the night without a break.

"Yes, that fat little boy by the window is Charlie, and his skin is as white as a snow flake, thanks to the Cuticura Remedies. I think everybody should know about the Soap and also the Ointment, and if it is going to help other mothers with sick babies, go ahead and publish what I have told you."

MRS. HELENA RATH.

The agonizing, itching, and burning of the skin as in eczema; the frightful scaling, as in psoriasis; the loss of hair, and crusting of the scalp, as in scalled head; the facial disfigurements, as in pimples and ringworm; the awful suffering of infants, and anxiety of worn-out parents, as in milk crust, tetter and salt rheum,—all demand a remedy of almost superhuman virtues to successfully cope with them. That Cuticura Soap, Ointment, and Resolvent are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy have made them the standard skin cures, blood purifiers and humour remedies of the civilized world.

CUTICURA REMEDIES are sold throughout the civilized world. PRICES: Cuticura Resolvent, 50c. per bottle (in the form of Chocolate Coated Pills, 25c. per vial of 60); Cuticura Ointment, 50c. per box, and Cuticura Soap, 25c. per tablet. Send for the great work, "Humours of the Blood, Skin, and Scalp, and How to Cure Them," 64 pages 300 Diseases, with Illustrations, Testimonials and Directions in all languages, including Japanese and Chinese. built, and the Borough was supplied with Electric Lights. Also during the administration of Mr. Place, the water for the use of the fire department was placed in the Borough, and very soon the citizens began to put the water in, because Mr. Place and the Council had made it possible for them to do so.

Also through the efforts of this Mayor and Council, Watchung avenue was put in its initiative condition, and was eventually put through.

Following Mr. Place was Mayor Saunders, who did his share of keeping up the improvements of the Borough, and during his administration, the Street Railroad was put on Somerset street, as well as other improvements which he inaugurated in the Borough.

Then came Mr. Needham, who was efficient in his administration of the affairs of the Borough, and following him came Mr. Hegeman, who also did much to enhance the Borough's interests.

After Mr. Hegeman came John F. Wilson. During his administration there *was laid the foundation for putting Duer* street through to Front street in the city. Mr. Wilson changed very wisely the manner of keeping the books of the Borough and did very many things in which his friends boasted he had made the best Mayor the Borough ever had.

Then came Mr. Smalley. His friends are now taking great pride to assert that he has made *the only great or good Mayor* the Borough has ever had. True, he finished the work began by Mr. Wilson *of putting Duer street through*, but it was a work which he could not very well have hindered if he had felt so disposed. Then came the widening of Somerset street. That he originated and after much opposition it was widened. That was a good thing to do, but it must be remembered that Mr. Smalley had a stone crushing plant on the Watchung Hills, and he wanted better facilities for getting his cracked stone to market, and by widening that street, while the Borough was benefitted, Mr. Smalley was also benefitted by it.

Now in justice to Mr. Smalley, let us give him full credit for what he has done, but to contend that he has made *the best Mayor* the Borough ever had is absurd on its face. He has only done his duty as did his predecessors.

REPUBLICAN.

Then and Now.

EDITOR OF REVIEW:

In thinking over the situation which confronts the voter in North Plainfield in its Municipal Election, my attention is particularly directed to the spectacle of unmitigated nerve which is presented by the present Mayor in permitting himself to be a candidate for re-election. One is not obliged to impose upon his memory to any great extent to see Mayor Smalley on September 19th, last, working with untiring energy to disrupt our borough, and thus contemptuously to throw away the office of Mayor with which the people had seen fit to honor him. And now behold, we see him again, as candidate for Mayor of the same borough and the presumption is he will work just as hard to obtain it. Now does he want to be Mayor of the Borough or not, or does he merely desire to be at the head, so that he can control political affairs and have greater prestige? I think that it is quite clear from all his actions, that the latter is the correct view.

And this is not all, during the annexation campaign the Mayor was perfectly silent, notwithstanding all of the charges made as to the depreciated value of borough property and of the unpropitious condition of the municipality, standing and taking these speeches derogatory to his efficiency like a man, for a purpose, but in his speech before the caucus Friday evening he is reported in the Daily Press, a paper devoted to his interests, as having said "that never before has the town been in a better financial condition." "*Strange* such a difference *there* should be."

VOTER.

Assemblyman Swackhammer Defeats the Newcorn Bill.

A bill introduced in the Legislature by Newcorn, of Plainfield, whereby the city of Plainfield would escape from threatened suits for damages due to its sewage disposal beds, was defeated through the influence of Swackhammer, of North Plainfield so that the measure only received one vote to 42 against, Newcorn himself not voting. Mr. Newcorn in his bill endeavored to have an amendment stricken out, which, as it now stands, gives property owners the right to bring damage shits. Mr. Swackhammer earnestly protested against the measure and emphasized the fact that the Legislature was not there for the purpose of legislating for municipalities alone, but also to protect property rights. Mr. Hale of Union County, was the only one who voted for the bill.

New Publication.

"*The Suburbanite*" is the name of a new monthly magazine which will shortly make its appearance, published by the Central Railroad of New Jersey. It will epitomize "the suburban idea" and contain much matter for those who are, as well as those who ought to be, interested in suburban homes. The first issue will contain articles on "Jersey, the Automobilists' Paradise" by Winthrop E. Scarritt, President of the Automobile Club, of New Jersey, "A Suburban Home Garden" by Joel Benton, "Picturesque Cranford" by Jas. Rodgers. Advertising Manager of Harper's Publications, "Building a Suburban Stable" by John Irving Romer, editor of "*Equipage*," "City versus Suburban Life," "Social Life in the Suburbs," "A Suburbanite to Some Purpose—a True Story," "Atlantic City at Easter," "Advantages to the Children of a Suburban Home," etc. The new magazine will be handsomely illustrated with engravings from photographs of suburban scenes taken specially for it, and will contain useful data concerning distances of various suburban points from the city and cost of commutation. A feature will also be a department of light gossip, entitled "In The Smoker" by The Commuter. Sample copies may be had as soon as issued by application to C. M. Burt, General Passenger Agent, Central R. R., of New Jersey, New York.

NEWS FROM WATCHUNG.

The stork has just visited our prospective Freeholder, Wm. Demler, and left a ray of sunshine to gladden the hearts of his household. It's a girl.

The Ladies Aid Society of St. Peter's Lutheran Church met at Mrs. J. H. Koch's residence last Wednesday. The meeting was largely attended.

Dr. Richard Moldenke delivered a lecture before the Philadelphia Foundrymen's Association at that city Wednesday. The doctor is in great demand as a lecturer, and in Boston, recently, after giving a lecture to the New England Foundrymen's Association he was kept on the platform four hours answering and explaining knotty questions relative to the steel and iron interests.

S. Beeching is confined to his bed with a severe attack of the grippe.

H. Gunnard is cleaning up his farm and will soon enclose it with a substantial wire fence.

Members of the German Lutheran Church of Grove street are requested to meet at the church next Wednesday evening, at 8 o'clock, to adopt a new constition.

We are pleased to learn that G. Demler, who has been sick in bed for the last five months is improving.

Pursuant to a call made by the chairman of the last citizens' ticket, a primary was held Thursday evening and nominated the following ticket:

For Freeholder,
WILLIAM M. DEMLER,
for three years.

For Town Clerk,
JOHN CLARK,
for unexpired term of two years.

For Town Committee,
ALBERT BROKAW,
for three years.

For Collector,
EPHRAIM S. ACKOR,
for three years.

For Overseer of the Poor,
MICHAEL J. DUFFY,
for three years.

For Constable,
(three years each.)
FRANCIS BARTEL,
EMILE CLEMENTZ,

For Commissioners of Appeal,
(one year each.)
DANIEL ACKOR,
J. W. CODINGTON,
WILLIAM TITUS.

For Surveyors of Highways,
(one year each.)
HIPPOLYTE TEXIER,
GOLDSON SMALLEY,

For Pound Keepers,
(one year each.)
CARL RUPPENSTEIN,
CHARLES WILLIS.

Appropriation for Roads	$1500 00
Poor Fund	600 00
Salary Town Committee (each)	50 00

Concerning Proctor's Attractions.

One of the most important moves recently announced in New York theatricals is the change of policy at Proctor's Fifty-eighth Street Theatre, which is to occur on Monday, March 16, when that handsome and spacious New York playhouse will become a first class combination theatre. For many years the East Side from 14th Street to 125th has felt the need of a theatre devoted to those which have so successfully played at the Grand Opera House, on the lower West Side. To fill this "long felt want" Mr. Proctor has decided to change the policy of his Fifty-eighth Street house laying aside the Stock Scheme, which has been very successful and which will be resumed during the Summer months only. The inaugural attractions under the new plan will be announced in a few days. The prices will range from $1.00 to 25 cents for reserved seats, and the entire house at the Matinees Mondays, Wednesdays, Thursdays and Saturdays will be 25 cents.

The one-act play written by Roland B. Molineux while in his grewsome death-cell at Sing Sing contains six characters, and is said by all who have read the Manuscript to be an uncommonly clever effort for a novice. The story is a love tale, told with simplicity and directness, and the character of the heroine is especially lovable and winsome. The play will be acted for the first time March 9 at Proctor's Twenty-third Street.

Shake off the Wintry Blasts.

The months of January and February are the most disagreeable to the Northerner and delightful are they for the Florida tourist. The trip to Jacksonville is through a section as historic as it is picturesque, and the service to that point via the Royal Blue Line is the best. The New Jersey Central is going to run an excursion to Jacksonville on Tuesday, March 10th. Train leaves New York, Liberty Street, at 8:30 a. m., arrive Washington at 2.10 p. m. same day; leave Washington at 3.16 p. m. March 11th, and arrive Jacksonville at 12.45 noon March 12th. The round trip rate from New York and vicinity is $50.00, and includes also sleeping car berths, meals en route, transfer and hotel accommodations in Washington. The arrangements are such that the care and worry of the journey are in the hands of the railroad company, and the tourist has the entire time for enjoyment. The New Jersey Central has issued "A Little Yellow Book" on this Florida trip; if you want it send a postal to C. M. Burt, General Passenger Agent, New York. Its free for the asking.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Harry L. Horton to John W. Coddington, $200.

Daniel W. Teller et ux to Emma Spencer $1400.

Freeman J. Shotwell et ux to James R. Blair, $3000.

John Valiant et ux to Herbert L. Bown, $1.

To CONSUMPTIVES
The undersigned having been restored to health by simple means, after suffering several years with a severe lung affection, and dispair, wishes to make known to his fellow sufferers (those who desire it, he will (free of charge) a copy of the prescription which they will find a sure cure for ASTHMA, CATARRH, BRONCHITIS and all lung MALADIES. Those desiring his remedy, as it is given in the prescription, will find it effective and may prove a blessing. Address Rev. EDWARD A. [illegible], Jamaica, L.I., N.Y.

A LIBERAL OFFER

As an Inducement to secure New Subscribers, and for Old Subscribers to pay up, we will, until MAY 10th, 1903, give each subscriber to the REVIEW, absolutely Free, a year's subscription to the Tribune Farmer; or the REVIEW and the Tri-Weekly Tribune for the single price of that paper.

Read Our Combination Offers Below.

Most Liberal Offer Of The Year

The New York Tribune Farmer

is a national illustrated agricultural weekly for farmers and their families and stands at the head of the agricultural press. It is a practical paper for practical farmers, helping them to secure the largest possible profit from the farm through practical methods.

It is entertaining, instructive and practically useful to the farmer's wife, sons and daughters, whose interests it covers in an attractive manner.

The regular price is $1.00 per year, but for a limited time we will receive your subscription for THE NEW YORK TRIBUNE FARMER and also for the REVIEW, Plainfield, N. J.,

Both Papers One Year for only $1.00

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRIBUNE FARMER, New York City, will bring you free sample copy.

Almost As Good as a Daily News-Paper

THE NEW YORK Tri-weekly Tribune

is a metropolitan newspaper for busy people, almost as good as a daily.

It is published on Mondays, Wednesdays and Fridays, and contains all the most important news of The Daily Tribune, which is a guarantee of its value.

If you live in the borough or on a farm and have not time for a daily newspaper you may be kept in close touch with all important news of the world at a very low cost.

The regular price of THE NEW YORK TRI WEEKLY TRIBUNE is only $1.50 per year, but you can secure it with the REVIEW, Plainfield, N. J.,

Both Papers One Year for $1.50.

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRI-WEEKLY TRIBUNE, New York City, will bring you a free sample copy.

Remember, this offer holds good only until May 10, 1903, after that date the price will be raised.

VOL. 4—NO. 3. NORTH PLAINFIELD, N. J., SATURDAY, APRIL 4. 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

Arbor Day, April 17.

Good Friday, April 10.

Easter Sunday, April 12.

April 17 has been named as Arbor Day Governor Murphy.

There will be a special meeting of the Board of Education Monday evening.

C. O. Smith, the milk dealer, is driving a new, handsomely painted rubber tired delivery wagon.

Rev. Dr. C. R. Barnes, who has resigned as pastor of the Centenary M. E. Church in Plainfield.

Calvin H. Rugg, J. W. Jackson and Henry A. McGee have been re-elected trustees of the First M. E. Church.

C. O. Smith opened his milk, cream and butter store on Watchung avenue and Fourth street, last Wednesday.

The Plainfield Yale Club will hold its annual dinner at the Yale Club in New York Tuesday evening, April 14

A few shad have already been caught in New York Bay, and the indications are that this will be a big shad season.

Emerson Brothers who have been in the tobacco business for thirty-five years have sold out to Miller Brothers of Newark.

The eels are out of the mud and preparing to ascend the streams. Some good catches were made last week in Newark Bay.

Rev. Dr. Robert L. Paddock, formerly curate of the Pro Cathedral, New York, preached at the Lenten service in Grace Church.

John McMurtry of Manning avenue was painfully injured Wednesday night by a wheelman running into him on Somerset Street.

Eva Carter, Maria Matthews and Walter Britton were brought before the Recorder Tuesday evening for being disorderly and fined $20.

Rev. Theodore Duensing will preach at St. Peter's German Lutheran church on Grove street, Sunday 10.30 a. m. Sunday School at 9.30.

The consistory of Trinity Reformed Church has elected H. E. Gale and Robert Clark, Jr., as delegates to the classis which meet at Newark April 15.

Theodore J. Shirley and J. S. Johnson have formed a partnership and will open the store corner of Front and Madison formerly occupied by Woodhull and Martin.

Continental Chapter, Daughters of the American Revolution, has changed the date of its proposed celebration of the Battle of Lexington to Friday, April 17. The affair will be held at the home of Mrs. P. V. R. Van Wyck.

The funeral of Miss Nellie Udelle Smith took place from the home of her sister, Mrs. Charles Lewis, of Belvidere avenue, Wednesday morning. Rev. J. W. Richardson, of Stamford officiated. Interment was made in Hillside Cemetery.

Masons Entertain.

Anchor Lodge, No. 149, F. and A. M., entertained about two hundred masons from New York, Brooklyn and Plainfield Tuesday evening.

James E. Turrill, the retiring treasurer was presented with a silver loving cup.

A special program was rendered after which followed a collation.

Annual Election and Dinner of Doctors.

At a dinner of the Plainfield Medical Society, Wednesday night, at Hotel Grenoble, a paper was read by Dr. Norman Probasco. This was followed by the usual discussion and dinner.

As this meeting was the annual one the following officers were elected:

President, Dr. Lufburrow; vice president, Dr. P. B. Cregar; secretary and treas. Dr. N. W. Probasco.

Spring Time in Washington.

Washington is a typical Spring resort and its bustle is purely social and political. There are gathered in the Capital epresentatives of every nation and country, and their comings and goings are of no little interest. Then the doings of the Senate and House are features which every tourist delights in following, and these features together with the visits to the numerous public buildings keep one busy all the while one is in Washington. The Royal Blue Line of which the New Jersey Central is the initial road is going to operate an excursion to Washington on April 9th, and cost of tickets for the 3 days' excursion including al expenses is $2.00. Train leaves NewYork at 1 p. m., and arrives Washington at 6.10 p. m. If you want to know about the trip drop a postal to C. M. Burt, General Passenger Agent, New York City, for our book. Free for the asking.

PEAPACK IN SORE DISTRESS

The Famous 34-Foot Hole has Mysteriously Disappeared.

Lost, strayed or stolen.—A thirty-four foot hole or underground river. The mysterious deep hole or underground river has disappeared as mysteriously as it appeared. This monstrous hole, containing water to the depth of thirty-four feet, which caused considerable excitement and interest, seems lost forever. The finder will please crate it and send it to us at our own expense. He may have the water, but return the hole. We have our suspicions aroused that it has been secretly stolen by some curio seeker, or out of town reporter, although the usual run of reporters do no such things. It might be well to search brother Webb, of the North Plainfield REVIEW as he has been wishing that North Plainfield could own some of the mysteries of Peapack. Anyway we shall keep an eye on the cave. —*Weekly* (Peapack) *Exponent.*

In our many trips in search of geological and mineralogical specimens, and for quaint and curious items for the REVIEW, we have had many epithets hurled at our head, but this is the first time we have ever been accused of stealing—and to make matters worse (if such thing could be) of stealing a hole! But we are glad of one thing, we are not suspected of stealing the water that was in this thirty-four foot hole. It is bad enough to steal a hole, but thirty-four feet of water is something awful!

This proposition is preposterous on its very face! What in the wide world do we want of a hole here in North Plainfield? If the legislature had failed to pass the repealer bill, such a hole as that could have been utilized to bury all the assemblymen and Senators in, but they did pass it with a vengeance, so that chance has perished!.

No, no; editor Shampanore—we have no use for your mammoth cave, your underground river, your thirty-four foot hole, nor your ghost; because North Plainfield has had all the advertising it desires through this annexation matter, but if in our rambles over old Somerset, we should happen to run across your lost hole, we shall arrest it immediately and telephone for Peapack's press agent to come and take it home again.

Borough Board of Education Holds Open Meeting.

At a meeting of the Board of Education Monday evening, the president of the Board, James R. Joy, named the following committees:

Finance, Messrs. Valiant, Townsend and Fountain.

Teachers and text books, Messrs. Joy, Valiant and Honeyman

Supplies, Messrs. Woodruff, Cooley and Fountain.

Grievances and truancy, Messrs. Townsend, Overton and Burtis.

Auditing, Messrs. Valiant and Woodruff.

Building and grounds, Messrs. Cooley, Overton and Burtis.

The report of school physician Dr. J. Hervey Buchanan was read and in the report Dr. Buchanan stated that during the past year he had examined 628 cases, and found as a result of the examination, eight pupils with enlarged tonsils, 22 with imperfect sight and three with defective hearing. In closing his report he said that contagious diseases had been prevented in the school, because of the watchfulness of the teachers in detecting the first indications of such trouble.

The janitor was assigned an assistant at a salary not to exceed $20 per month.

NEWS FROM WATCHUNG.

Work has begun in Bartle's quarry.

Henry Kelm recently lost a valuable horse from pneumonia.

The Junior Christian Endeavorers will elect officers at the next meeting, Friday afternoon.

Stephen Beeching who has been very ill for six weeks with the grip is able to be out again.

Chas. Ralph has left the employ of Dr. Richard Moldenke and gone into business with his brother-in-law Arrow Reed.

Edward Cantwell is erecting a large pigeon house. D. E. Ackor is doing the work. The house will accommodate 300 pairs.

The Board of Education held a meeting last week and made a permanent organization by re-electing J. M. Duffy, president, and Geo. A. Schmidt, clerk.

Mrs. John L. Shank has gone to the Muhlenburg Hospital to be treated for a severe attack of muscular rheumatism. She underwent an operation last Saturday. Her many friends hope for a speedy recovery.

Miss Salina Bender, Miss Carrie Schick, Richard V. Colton and Arnold Challett of New York and Staten Island, have been visiting at Mr. Geo. A. Schmidt's.

NO ANNEXATION TO UNION COUNTY

Bill Repealing Annexation Law Applying to North Plainfield Passes the House by vote of 34 to 15

Charles Arthur Reed, our former Senator, set up a political monument last year which killed him off effectually in Somerset county, and that monument was razed on Wednesday afternoon, when the House of Assembly, after a lively debate, passed the Hutchinson bill repealing the North Plainfield annexation law last year. The Hutchinson bill wipes off the statute books the measure allowing North Plainfield to continue to vote indefinitely on the proposition to join itself to Union county. The Senate previously passed the bill by a vote of 15 to 4.

In the House the bill was referred to the Committee on Municipal Corporations, of which Assemblyman Leavitt, of Trenton, was chairman. That committee was unanimous for reporting it, but the Annexationists, headed by ex-Mayor Saunders, appealed for another hearing (in order to secure delay) and Mr. Leavitt gave it on short notice. The hearing was attended by Mr. Saunders, Mayor Smalley, Samuel Townsend and Capt. Wm. C. Smith, for the Annexationists; and by Wm. W. Howland, A. V. D. Honeyman, ex-Mayor Cooley, and Rev. W. R. Honeyman, for the Antis, from this borough; also by Judge Schenck and ex-Assemblyman Hoagland from the county. Before and after the hearing the Saunders' delegation tried to capture Assemblyman Swackhammer by both praises and threats, but the Assemblyman was not game for them. He said he was sorry to disappoint them, as he realized that they aided to elect him, as did the whole local Annexation party, but that his duty was clear to stand on the platform of his party, which had denounced "the crime of 1902." "Duty" said he, "first, and politics and self-interest afterward."

At the hearing ex-Mayor Saunders first spoke and said that the repealer should not be passed, because the people ought to be allowed to say what they want and this cut them off from further opportunity; that while one election had been held there was a change in sentiment, for since then Mayor Smalley had been elected and three of the best members of the local Board of Education had been bounced, and both things were accomplished by Annexationists. He also said the repealer had not been advertised, and therefore might be unconstitutional, and he wanted the committee to get the Attorney General's opinion before repealing the bill.

Mayor Smalley said this repealer was bad because of a change in sentiment and because annexation would come anyhow. "We are going to have it," he said, "whatever you gentlemen do, we shall agitate and agitate until we get it." He called on Wm. C. Smith, whom he said was a rabid Anti-annexationist and a convert. Captain Smith said he was as hard as anybody against going to Union county, but he had seen the error of his ways. He said it might at some time be advantageous to go, and he wanted the bill to stand. He had some 76 names of people on a petition to let it stand. He did not produce the list to the committee.

A. V. D. Honeyman responded to the argument advanced. He said that there were four good reasons why the bills should pass and pass quickly, and they were unanswerable: 1. The Legislature had called for a popular vote, intending it to be one vote, and that was obtained. The people said "No!" That vote must be respected. The purpose of the law was fulfilled, and now should be repealed and thus prevent costly litigation. Mayor Smalley wanted to continue agitation indefinitely by holding elections under the act, but this would create turmoil and lawsuits and now was the time to end both. 2. The example set for carving up a county for political and private ends was so bad a one that the quicker the Legislature undid the bad work of 1902 the better. 3. The present act was a menace to all improvements by the Somerset County authorities. 4. The repealer did not need any advertisement, and it was not unconstitutional.

He elaborated on these points and also said there was no change in sentiment, except by Capt. Smith, the reasons for which were probably well understood.

William W. Howland followed, denying that there was any change of sentiment in going to Union county. He said the people now demanded peace on a question which had been settled. He spoke with great force and evidently with effect.

The committee arose and agreed to report the bill at three o'clock, which was done.

When the repealer came up on second reading, Assemblyman Newcorn, of Plainfield, raised the question of constitutionality, because notice of intention of the introduction of the bill had not been advertised. "The bill has not been advertised and there is no necessity for it being advertised," declared Mr. Leavitt. "No repealer has ever been advertised. This repealer is intended to remedy an injustice done last year to the county of Somerset, by the passage of an unjust bill, passed in a peculiar way, taking from it some of its best territory."

Mr. Newcorn renewed his objection and wanted an opinion on the constitutionality of the measure secured from the attorney-general.

Mr. Leavitt replied that Mr. Newcorn did not represent Somerset county, but did represent Union, which was to be the beneficiary of a thieving scheme to rob Somerset of domain.

The Union man was challenged by Mr. Swackhammer to produce a single precedent in which any repealer had ever been advertised, but the challenge was not accepted.

"I never saw weaker effort to delay action on a bill," declared Mr. Scovel. "It is too weak to deserve consideration. At this late date we don't want to put a nickel in the slot and get a ham sandwich in the form of an opinion from the attorney-general."

The bill passed second reading by an almost unanimous vote. Then Mr. Newcorn tried to have the measure tabled and failed, after also failing in an attempt to have the measure amended by striking out the repealer section.

On third reading Mr Leavitt advocated the passage of the repealer and Mr. Newcorn made a lengthy plea to have the bill left as it was. The latter said there had been a change of sentiment since the special election, that most of the boroughites now favored annexation, and to repeal the Reed bill would be to make again on annexation," suggested Mr. Leavitt, "let them come here next year, introduce another bill and pass it honestly. But don't leave this blot on the Legislature's record. The Senate has voted to wipe it out. Let us do the same. Why, last year orators ran up and down in Somerset county denouncing the law as the crime of 1902. Don't let orators next fall talk of the crime of 1093.

The Mercer man told of the plan as a scheme for dismembering Somerset county. If it was allowed to stand, he asserted, it might be the beginning of an epidemic for changing county lines.

Mr. Swackhammer replied at length to Mr. Newcorn's argument. "I want to refute," said he, "the statement of the gentlemen from Union in regard to the election of the Mayor of North Plainfield and to say that Mayor Smalley was elected on his merits as a man, as an official of executive ability, and not on the question of annexation. The people of the borough, by a majority of 161 in a vote of more than 1000, declared against this annexation proposition. And the gentleman from Union comes to this House and asks permission to take from the county of Somerset our crown jewel and place it in Union's crown. The platforms of both parties at the election last fall declared against annexation. We owe it to the people who sent us here to wipe this act of last year from the books. If there is honor in politics, if any politician can be trusted in a henroost—and I put in the interrogation point right there—we should pass this repealer. The Senate has already asked and received an opinion from the Attorney-General as to whether the act of last year is still operative. And that astute gentleman, one of the brightest in the State, the legal oracle of the State, said that he did not know. If the Attorney-General doesn't know—and he says he doesn't—then it is for this Legislature to wipe it off the books and remove the doubt."

Mr. Newcorn referred to Mr. Swackhammer in some uncomplimentary way, and then the latter got off the anecdotes (reported in another column) which brought laughter from everybody and squelched the Union man so that he was not heard from again.

The repealer was then put to vote, and passed by a vote of 34 to 15.

Church Quartettes Second Musicale.

A large audience greeted the quartette choir of the First Presbyterian Church Tuesday night when it gave its second musicale. Miss Etta Raybert, Mrs. Stephen H. Tugwell, Elmer D. Cutting and S. R. Titsworth compose the quartette. They were assisted that evening by Miss Elsie R. Giles. Miss Jessie Haynes, Maxwell Honeyman; R. W. Derby. Miss Annie Louise Emmons recited.

The program was pleasing and the audience appreciative.

The silver offering which was taken will be used for the music fund.

S. S. SWACKHAMMER'S WIT.

Two of His Anecdotes Which Brought Down the House.

FROM A SPECIAL CORRESPONDENT.

TRENTON, APRIL 2, 1903.—Your borough Assemblyman, Mr. Swackhammer, has taken, within the past month, a prominent position in the legislative halls at Trenton. He awaited his time, so as to be sure of his ground, and began his speeches against bad bills about two weeks ago. With a fund of anecdotes and a strong voice, great earnestness of manner and a clear, concise style, he succeeded at once in securing attention, and before he knew it his speeches were looked for with zest by Republicans as well as Democrats, and always "brought down the house." The newspapers have been printing a number of his anecdotes.

On Wednesday afternoon Assemblyman Newcorn tackled the tall member from Somerset on the bill to repeal the act annexing North Plainfield to Union county. He soon spread his full length on the ground, amid the laughter of the House, which lasted many minutes. Newcorn intimated that Swackhamer was not standing by the Annexation crowd that elected him and might not get returned another year. In his reply the Somerset Assemblyman said: "The intimation may be correct. I may not be here a year hence. Nor my friend from Union. He may be in the fix of Deacon Jones of Buffalo. When President McKinley died the newspapers were greatly excited over it. Each day the heading was 'McKinley Better,' 'Worse,' 'Failing,' 'Recovering,' 'Better,' 'Dead,' etc. When it was over, it wouldn't do not to keep up the excitement, so one newspaper began: "Deacon Jones in a Bad Way," 'Jones Better,' 'Jones Relapses,' and finally 'Jones Dead.' The next day the heading was: 'Great Excitement in Heaven! Deacon Jones Not [illegible] Newcorn Not Arrived!'

When the laughter that followed this anecdote had subsided, Newcorn did not have the good sense to be silent, but retorted that "he knew the Somerset man meant, when he referred to the 'crown jewel of Somerset county,' not North Plainfield but himself." Mr. Swackhamer straightened up and said: "Mr. Speaker, I know I'm handsome; was always told this and now believe it. But my friend's claim to being handsome is not founded on what I saw a few minutes ago on the street. A newsboy was drawing a picture of this Assembly Chamber He had mapped out the desks accurately and there was one very noticeable one, but it had no man behind it. I asked the little fellow whose desk that was with no man behind it. 'Newcorn's,' he replied. 'But where is the occupant himself? You haven't drawn him.' 'Ah!' he said, 'I've tried, but I've been unable to scrape up enough dirt around this desk to make a man!"

It was a long while before the House recovered its equilibrium and the Union Assemblyman relapsed into a state of innocuous desuetude.

Company K's Second Anniversary.

The second annual dinner of Company K held at the Hotel Rosel Monday evening was a great success. Captain Martin was the toast-master of the evening.

Among the speakers of the evening were Mayor O. L. Jenkins, Col. Collins, of Elizabeth, William A. Westphal, J. F. Buckle and R. L. Lee.

Markmen's decorations were presented to the following who won them at Sea Girt last summer:

Experts—Captain W. B. Martin; Captain W. K. Browning; Sergeant, A. I. Littell; Corporals, A. R. Phillips and Eugene Searing.

Sharpshooters—Sergeants, Charles A. Peterson and Edgar K. Pearsall; Corporals, G. Harold Whitney, Nathaniel Hort, Elias Giles, (deceased); Privates, J. Kenneth Anderson, A. E. Galloway, C. B. Pope, Walter Sampson and Howard Terhune.

Marksmen—Lieutenants, John M. Lewis and Harry Kitchell; Sergeants, P. B. Cregar, Asa Randolph, A. M. Seiders; Corporals, Oliver Pearson, George Apgar, Clarence Bilyeu; Privates, Conklin, Harry Bogert, Charles Bowden, Clayton Coon, Stanley Emmons, Robert Goldsack, Charles Glaentzer, W. B. Harsel, J. S. Johnston, Richard LaTourette, F. M. Letson, Harry Manning, W. B. Messler, W. B. Mosher, Edward Mosher, A. G. Niles, J. L. Niles, Charles Overbaugh, Nelson Peterson, Stephen Stover, Nathaniel R. Titsworth, John Turner, Percy Vail, Elmer Walker, Vernon Waters, Frank Wikoff, Harry Wyckoff, W. E. Stewart. The last named is in the honorary class.

Those who received 100 per cent. for attendance at drills and who were presented with medals were Sergeants A. I. Littell, Corporals G. Harold Whitney, A. R. Phillips, Clarence Bilyeu, Trenchard, First Sergeant C. A. Peterson, First Lieutenant J. M. Lewis and Private J. L. Niles.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

Charles Hills, aged fifty, of Dunellen, boss painter of the Jersey Central, was killed by an express train while at work on the Clinton avenue railroad bridge, Monday morning.

As a result of a conference last week between Elizabeth and Jersey Central Railroad officials, the latter's engineers will submit plans for the elevation of its tracks throughout Elizabeth and the abolishing of a score of dangerous grade crossings. The project contemplated the expenditure of about $1,250,000, and the railroad wants the city to bear part of the expense.

James Meagher, the sixteen years old boy, of Bayonne, was hit by a drill engine Friday night on the Central Railroad. The locomotive crushed his hip and ran over his left foot. The boy wrapped his handkerchief around his foot tying it tight to prevent bleeding to death. He then crawled to the 22nd street station and was removed to the hospital. He will recover.

The indications are that there will be an abundant crop of peaches in Hunterdon, Warren, Somerset and Sussex counties this year. In anticipation of a big crop the different peach basket manufacturing plants throughout that section have begun operations much earlier this year. One manufacturer alone has orders booked for 90,000 baskets to be delivered before the first day of June.

School superintendents in and about the Oranges are hustling for new teachers to fill vacancies. Superintendent Vernon L. Davey, of East Orange, has gone to Connecticut in search of new material, Bloomfield.

A colored man, who confesses to having committed fifty burglaries in the city, who he is James Jones, was held without bail at Camden last Monday. Many robberies have been committed in that city in the last three weeks. He acknowledged, the police say, that he had committed a dozen robberies in this city, and declared he had that day entered fifty places where windows had been carelessly left unfastened over night.

As the direct result of being hit in the abdomen with a snowball last winter, Wm. Jones, a Spanish-American War veteran, is lying in a precarious condition with appendicitis in St. Francis's Hospital. The snowball was of the "socker" variety—that is one having a stone inside. When it hit him, Jones said that he preferred being among Spanish bullets to being exposed to the unerring aim of the American youth armed with that kind of snowballs.

The management of the large Singer plant here has begun a crusade against peripatetic bookmakers who have secured employment in the factory from time to time and found a pretty good thing among its 6,000 employees. Last week one man was summarily discharged, proof having been secured that he made books instead of sewing machines. It is said the Singer management has been induced take the present step by the Chief of Police.

The new steamboat, Asbury Park, to run for the Central Railroad of New Jersey between Rector street and Atlantic Highlands was launched Saturday at the yards of William Cramp & Sons, Philadelphia. She is larger than the Monmouth and the Sandy Hook and is faster than the Monmouth, which covers the 19 5-7 statute miles from the Hook to Rector street, N. R. in about 1 hour and 8 minutes. She is a 20-knot boat and can carry 3,000 persons.

Ground was broken last week on a tract of land at Russell Place, East Summit and is said to be first step in the work on the New Orange railway that has been proposed to connect Summit and Elizabeth by direct route. The men engaged in the work claim that the road is to be pushed rapidly now to completion but this statement is viewed with incredulity in Elizabeth. The route for the road has been outlined for the entire distance to Elizabeth and rights of way secured for pretty nearly the entire line.

The prank of two practical jokers, who last Sunday drove through Hasbrouck Heights in a buggy yelling "Fire," may cost the life of Robert Elias, 9 years old, who was on the rope of the hosecart on its way to the supposed fire. "The house of Elmer E. Williams is on fire," said the

PRESIDENT IN ENGINE CAB

Views the Pennsylvania Horseshoe Curve With Grimy Trainmen.

FIRST SPEECH AT HARRISBURG

Roosevelt Praises the Report of the Coal Strike Commission—The Good-Byes at Washington — German Envoy Among Those Who Saw Him Start on His Two-Months' Trip—His Engine Ride.

Pittsburg, Pa. — President Roosevelt viewed the scenery around the famous Horseshoe Curve from a seat in the cab of a locomotive attached to his special train, and after a ride of about fifty miles expressed himself as delighted with his experience. When his special reached Altoona the President alighted from his car and walked rapidly to the front of the train. Two engines were coupled to it, ready to pull the heavy cars over the Alleghany Mountains, and the President shook hands with the crews of each. He then climbed into the cab of the rear engine, No. 2408. In the cab with him were Secretary Loeb, Trainmaster A. Keiser, Special Engineer Robert McLaren, the regular engineer, H. T. McCormick and Fireman H. W. Hunter. As he took his seat the President remarked that, being a member of the Brotherhood of Locomotive Firemen, he thought he ought to take his turn at feeding the furnace, but he did not do so.

When Gallitzen, at the crest of the mountains, was reached, the front locomotive was detached from the train and the run to Seward was made with one engine. Here the President climbed down from his lofty seat, and after shaking hands with the engineers and firemen, went back to his car, rather dusty and grimy, but enthusiastic over his novel ride.

Outside of his ride on the engine the President passed an uneventful day, devoting a large portion of it to reading.

Brief stops were made at Baltimore, Harrisburg and Altoona; but only at Harrisburg did the President make a speech. A large crowd met his train at Harrisburg, and although no speech was scheduled for this place, Mr. Roosevelt appeared on the rear platform of his car and delivered a short address, which was received with many cheers.

He was greeted by a great crowd, including the members of the Pennsylvania Legislature and city officials. Senator Focht, of Union, on behalf of the Senate, presented greetings to the

[illegible] was nominated for the Presidency.

The President showed evidence of surprise at the reception. He spoke for [illegible] minutes, saying:

"I am very greatly touched and pleased by this greeting—a wholly unexpected one. I had not supposed that my speechmaking would begin before to-morrow. There is not much for me to say to you. I feel rather when I come here like sitting at the feet of Gamaliel and learning.

"The prosperity in which you of this State, you of this city, have so abundantly shared must come primarily from two sources—the individual skill and efficiency of the individual man, capitalist, or wageworker, working for himself as a foundation, but with upon it the superstructure of the men who, working not merely for themselves, but for one another.

"The President of the Senate was kind enough to speak of what has been done for the wageworker, and therefore the citizens as a whole, in this State. I go away from Washington with a light heart, very largely because of the admirable work done by the gentlemen on the Anthracite Strike Commission. And surely no publication by any association designed purely to teach a moral lesson to our people can be better worth scanning and learning than the document containing the conclusions of those men, and if as a people we will take to heart the lessons taught therein it will be the better for all of us.

"Fundamentally our interests are the same. Fundamentally you hurt or help some of our people and inevitably you hurt or help others. Fundamentally the most important lesson to be learned in our National life is the lesson of our solidarity of interests, and that every man of us, if he is fit to be a citizen of this Republic, must pull his own weight and must also do his best to help his brother at the same time."

Departure From Washington.

Washington, D. C.—With an enthusiastic farewell to the German Envoy and a facetious warning to Secretary Cortelyou to beware of the trusts, the President set off in high spirits for his two months' swinging around the circle. The special train left at 9.05, but the President was there and waiting for it ten minutes ahead of time. He found Secretaries Wilson, Hitchcock and Cortelyou there. Baron Speck von Sternburg also came to say good-bye to him. The train pulled out, followed by the cheers of a small crowd of people, who waved their handkerchiefs at the President and the other members of the party. There were several city detectives in the crowd, and on the train were four Secret Service men.

Prominent Merchant a Suicide.

Despondent because of ill-health, Francis T. Luqueer, Jr., of New York City, killed himself.

Can't Bar Unvaccinated Children.

Judge Stimson, of the Superior Court at Terre Haute, Ind., decided that the Boards of Health have no power to exclude unvaccinated children from public schools. This is the first decision on the constitutionality of the law passed two years ago at the request of the anti-vaccinationists. The case will be appealed.

Bookwalter Renominated For Mayor.

Republicans of Indianapolis, Ind., have renominated Charles Bookwalter for Mayor.

AN ALBANIAN OUTBREAK

Many Christians Murdered and Russian Consul Shot in the Back.

Severe Fighting at Mitrovitza, in Which the Rebels Were Repulsed—The Sultan Greatly Alarmed.

Vienna.—The rebellion in Macedonia is considered to have begun already and the situation is expected to become worse. The Albanian movement is regarded as specially dangerous, because the Sultan will hardly dare to suppress it, he being surrounded by Albanian guards at the Yildiz Kiosk. It is therefore thought that the reform plan will remain a dead letter in Old Servia.

The report is confirmed that M. Stcherbina, the Russian Consul in Mitrovitza, was shot in the back by Albanian soldiers. It is estimated there are 20,000 Albanians under arms, and a general rising would be extremely serious.

Salonica, European Turkey.—Special trains with troops on board proceeded from Monastir and other places to Vucsteen, where severe fighting recently occurred. It is reported here that there were 200 casualties. Sixteen battalions of Anatolian Redifs have been ordered to Salonica.

Constantinople.—Details of the disturbances in North Albania show that the revolt which has broken out there against the reform scheme of the Powers is serious. Several thousand armed Albanians surrounded the town of Vucsteen, on the Mitrovitza-Uskub Railroad, and demanded the surrender of eleven Servian gendarmes who had been enlisted in agreement with the reform plans. The Governor surrendered the Servians, who were bound and taken to Pristina, after having been maltreated. A large number of the Servian inhabitants and bands of Albanians later surrounded Mitrovitza and serious fighting ensued with the Turkish garrison, consisting of 3000 troops. The fighting continued for two days, when the Albanians finally were repulsed with great loss.

The Albanian rising has caused a panic among the Christians of Old Servia. In Prilep, in consequence of the growing fanaticism of the Albanians, the Christians have closed their shops and schools and are preparing to seek refuge at Monastir. Many Christians have been murdered in the Prilep district in the last few days.

The outbreak made a great impression at the Palace. The Sultan was intensely exercised, and measures were immediately taken to watch the two Albanian battalions belonging to the Imperial Guard, on duty at the Yildiz [illegible] to prevent disorder in

sian Consul-General in Mitrovitza. The Palace and the Foreign Office also conveyed their regrets to the Ambassador. The Sultan's Albanian body guard is jubilant at the attack on Mitrovitza.

RAILWAY MEN MAY STRIKE.

Judge Adams Dissolves the Injunction Granted to the Wabash Road.

St. Louis, Mo.—Judge Elmer B. Adams, of the United States District Court, dissolved the temporary injunction which he issued on March 3 at the instance of the Wabash Railway Company restraining the Brotherhoods of Railway Trainmen and Firemen from ordering a strike on that system. Thus the Wabash employes have won a big victory.

The keynote for an amicable settlement was sounded by Judge Adams himself in handing down his decision. He said:

"I cannot conclude this opinion without expressing the sincere wish of the Court that if the parties are unable to adjust their differences by such mutual concessions as are necessary to that end the offer made in open court by defendants' counsel to submit the question in dispute to the Board of Arbitration, provided for by the Act of Congress of 1898, will be speedily accepted and another instance of a rational and intelligent adjustment of a business difficulty be exhibited to an expectant public."

Judge Adams' decision, which contained more than 7000 words, occupied forty minutes in its delivery.

Judge Adams announced that his court would be in session and retain jurisdiction of the case, if desired, so that in the event of any interference with interstate commerce or the mail service all its lawful powers might be invoked.

MASSACRE BY TURKS.

Macedonian Committees Report a Whole Village Wiped Out.

Sofia.—The Macedonian committees report a fight, which they represent as a massacre near Istib. They say that Turkish troops attacked a band of thirty revolutionists in the village of Abalitche. They surrounded the village, razed every house with artillery and massacred all the inhabitants without distinction.

Nevertheless, according to the report, they themselves lost more than the insurgents.

Honduras Battles Won by Treachery.

Fuller details of the capture of Puerto Cortez and San Pedro in Honduras by the Revolutionists give some interesting stories of the revolution there. Puerto Cortez and San Pedro both fell through treachery, the troops mutinying and killing their superior officers. The Revolutionists had been working among the garrison at Puerto Cortez and had won over most of the men when General Mulla, representing the Bonilla forces, appeared.

King to Meet French President.

A statement was obtained from an authoritative quarter at Paris, France, to the effect that official negotiations now in progress make it practically certain that King Edward will visit President Loubet, about the only question remaining open being whether the meeting will occur before or after the President's voyage to Algeria.

Bulgarian Cabinet Resigns.

The Bulgarian Cabinet has resigned. Prince Ferdinand accepted the resignation.

VERDICT IN BURDICK CASE

Judge Murphy Virtually Accuses Arthur R. Pennell.

HE HAD MOTIVE FOR MURDER

The Verdict Softened Somewhat by Saying Pennell, If Alive, Should Be Presumed Innocent Until Proved Guilty—Mrs. Hull and Mrs. Burdick Blamed by Judge—All Others Exonerated.

Buffalo, N. Y.—Police Judge Thomas Murphy handed down his decision in the Burdick murder inquest. While stating that the inquest had failed to prove the identity of the murderer the decision in referring to Arthur R. Pennell declared:

"Altogether the facts would in my opinion constitute just ground for suspicion on which a warran could be issued were he alive."

The evidence against Pennell was summed up by Judge Murphy as follows:

"Where is the motive for this awful crime?

"Mrs. Burdick loved Pennell and he apparently became infatuated with her. A few years ago Burdick learned the truth. A separation ensued. Because of love for his children, however, he took back his wife at that time and forgave the author of his wrong upon his promise to leave Buffalo. This promise and the promise which Mrs. Burdick made to her husband were shamelessly broken. Mr. Burdick finally told her that she must leave his house.

"This was in the early days of last December, and immediately thereafter he applied for a divorce. She was constrained to defend the suit by Pennell and issue would be joined in a very short time. Burdick had, which fact was known to Pennell, a batch of letters written by Pennell to Mrs. Burdick of such a gushing, lovesick, importuning nature that their publication meant complete humiliation and social ruin to their author. His, of all others, was the motive strong enough to incite a desperate mind already steeped in wrongdoing to so foul and cruel a murder.

"Did he do it? He returned from the dead man's wife the day before the murder. He was here that night. He was very much excited the next morning, and purchased a revolver. In one of his letters to Mrs. Burdick there is an express threat that he would kill her husband. The cashier and the bartender of a New York hotel have testified that he said he would kill a certain man. His wife had written Burdick

"That would not mean, however, that he was guilty. He can never be placed on trial here, nor can his case ever be judicially determined. Let us be fair, then, to the dead as the law presumes us to be to the living. He must be presumed innocent until proved guilty."

Regarding Burdick the decision had this to say:

"The theory that Burdick had a woman guest in his 'den' that night has not been sustained by the evidence. It has not disclosed a single immoral act on his part. It portrays him as a loving father and a more than magnanimous and forgiving husband."

Mrs. Paine and Miss Marion Hutchinson, whose names have figured in the investigation, are exonerated in the opinion.

Regarding Mrs. Hull and Mrs. Burdick, Judge Murphy wrote:

"The actions of Mrs. Hull on that morning are inconsistent with a perfect want of knowledge of what had actually occurred. So little apparent feeling for the dead man, such an evident desire to cover up the crime and no disposition whatever to aid the authorities may be explainable, but has not been explained. The opening of the window from the inside would indicate a desire on the part of some one to give this crime the appearance of a burglar's work. It is our duty to censure Mrs. Burdick, but great as her wrong has been, great is her punishment."

While friends of Pennell criticise Judge Murphy's findings, the verdict has met with the warmest approval of disinterested citizens generally. The police say that they will continue to search for further evidence. District Attorney Coatsworth said:

"Judge Murphy's findings are well borne out by the testimony. I will not present the evidence to the Grand Jury."

DR. CRUM TAKES OFFICE.

Colored Man Assumes Charge of the Charleston Custom House.

Charleston, S. C.—W. D. Crum has taken charge of the Custom House as Collector of the Port. The Chief Inspector of Customs immediately resigned. There has been some talk here of possible application to the courts for a restraining order against Crum's exercise of the duties of his office.

It is said the feasibility of such action has been brough tto the notice of the Mayor, and it is said he has referred it to the Corporation Counsel for consideration and will report, but it is not thought anything will be done about it.

Arkansas Negro Lynched.

Frank Robertson, a negro, has been lynched at Bradley, Ark. Robertson was in jail. He confessed to the crime of arson. A party of twenty-five men rode into Bradley, overpowered the jailor, took possession of the negro and rode away with him.

Mayor and Chief of Police Indicted.

The Grand Jury of Seattle, Wash., has returned all the indictments which it had voted during the last two weeks, including those against the Mayor for malfeasance in office, the Chief of Police, Justices and other prominent men in the community. In all, nineteen indictments were returned.

Salary Wanted to Die.

A discouraged French dramatist, Gustave Salary, attempted suicide by shooting in the foyer of the Theatre Francais, Paris.

SHAMROCK III. IS SPEEDY

The New Cup Challenger Shows Superiority Over Shamrock I.

Beats Sir Thomas Lipton's First Yacht at All Points—Light Breezes Prevail in Five-Hour Sail.

Gourock, Scotland.—The Shamrock III. and the Shamrock I. went for a trial spin. Sunshine and a light, steady breeze had succeeded wild weather, and no time was lost in getting the two Shamrocks off.

Though the breeze was light it was decided not to risk anything, and the cup challenger's working topsail was accordingly set. The Shamrock I. followed suit.

The challenger was the first to leave her moorings, and looked the picture of a racer as she headed off shore.

Out in Gourock Bay the wind was so light that the motion was more drifting than sailing. The Shamrock III. slipped through the water without leaving a ripple and carrying her head well up.

The first time the challenger broke tack it was apparent that by shortening her fin Designer Fife had produced a boat which was fast on her heel, even compared with cup racers.

She carried her way right through turning and was off on her new course while the older boats would have been still looking at it, thus showing herself free of the greatest weakness of Shamrock II.

There was no attempt at a set race. The Shamrock III. went off over a mile ahead, and then the sheets were trimmed on both boats and a course was laid down channel.

Both yachts were close hauled while crossing the mouths of Holy Loch and Loch Long, as the wind was squally and uncertain. Both sailed faster as they got a better breeze, and the challenger showed herself to be a little tender in squalls. But she sailed with her lee rail just clear of the water.

She traveled fast and closed steadily upon the Shamrock I. Under the mountainous Cowal Peninsula the land breeze came true and fairly fresh, and the yachts went fetching down the channel on what looked like real racing tests, in which the Shamrock III.'s greater speed was demonstrated.

Sailing in the same water and no better served by the wind, the challenger pulled up on her rival like hauling in a rope as the boats fetched down channel, until off Wemyss Bay the Shamrock III. lay better to the wind and sailed faster.

During this eight miles she had closed on the Shamrock I. by fully a mile, and at the same time had edged quite a quarter of a mile further to windward.

Experts consider this performance alone sufficient to stamp the Shamrock III. as being, under the conditions prevailing during the spin, by far the fastest racer built on this side of the Atlantic to compete for the America's Cup.

London.—The Times' report of Shamrock III.'s trial says it was all light weather sailing at a pace scarcely sufficient to cover the America's Cup course within the specified time; but under these conditions Shamrock III. is undoubtedly much faster than Shamrock I. on almost every point of sailing. The other papers make similar comments.

SIX KILLED IN A FURNACE.

White-Hot Dust Drops Upon Workmen at Braddock, Pa.

Pittsburg, Pa.—An accident at Furnace I. of the Edgar Thomson plant of the Carnegie Steel Company, at Braddock, is expected to prove one of the worst in the history of the plant. Twenty men are injured, six of whom are dead, and ten are not expected to recover. The other injured went to their homes and are suffering from painful burns.

The accident was caused by a "hang" in the furnace dropping and forcing large quantities of white-hot dust down a large pipe into a pit where the men were at work. The victims were caught like rats in a trap without means of escape.

Their cries of agony as they writhed in the lava-like stuff, from which they were vainly trying to excavate themselves, could be heard for nearly a block away. Hundreds of workmen from other portions of the plant rushed to the rescue of their fellows, and as quickly as possible pulled them from the pit and carired them to the Emergency Hospital.

GIRL CLOSES THIRTEEN SALOONS.

Her Revenge For the Loss of Her Situation in a Clothing Store.

Kokomo, Ind.—Miss Carrie Styer is waging war, single-handed, against the thirty-four saloons in Kokomo. In the last three weeks she has put thirteen of them out of business, and is now after the others.

The fight began a month ago when Miss Styer, who headed a slumming party among the saloons, lost her place as cashier of a clothing store at the demand of the saloonkeepers. Since then she has been making a house-to-house canvass, securing the signatures of voters to a remonstrance under the Nicholson law.

At the current sitting of the Commissioners' Court Miss Styer put the thirteen applicants in the Third Ward out of business.

English Queen in Denmark.

Queen Alexandra arrived at Copenhagen, Denmark, from London, and was received at the station by King Christian, the Dowager Empress of Russia and all the members of the Danish royal family.

Six Men Killed by Mine Explosion.

The lives of six men were snuffed out by an explosion of gas in the coal mine at Sandoval, Ill. Five men are suffering from terrible burns received at the same time. The dead are: Lafayette Lamay, Frank Deyro, Joe Threbescoe, John Giancino, Frank Bianco and William Newhouse.

Urging Diaz to Run Again.

Largely attended meetings are being held in various States of Mexico urging President Diaz to accept the candidacy again.

MORGAN ON PROSPERITY

Financier Believes the Good Times Will Last a Long While.

HE IS AN ENTHUSIASTIC BULL

He Thinks Many New Securities Still Undigested Are Essentially Sound and Any Difficulty Because of Them Will Disappear—Cites the Steel Industry as a Barometer of the Country's Stability.

New York City.—J. Pierpont Morgan, in an interview with a representative of the New York Times unequivocally declared himself to be a bull on the country and its future.

Nearly two years ago Mr. Morgan declared—then also in the columns of the Times—not only that he believed in the country's prosperity, but that he looked for even better times. That he has not abated one whit his enthusiastic belief is disclosed by his statement following—the first utterance of such a kind in many months.

Mr. Morgan said:

"It seems to me that the general pessimistic talk indulged in not alone in foreign but in local circles is in no sense justified by the facts. It may be true, as some of the captious critics declare, that at the present moment there are in the market many undigested securities, but ought not the character of these securities to be taken into consideration in a broad or comprehensive view of the situation? Are these securities sound or are they unsound; do they represent value or do they not; for what purposes have they been issued—those are the questions.

"To my mind and in my judgment these new securities are essentially sound and stable, and those who have them are in no wise alarmed because of their holdings. Beyond all this, they are issued not to build competing lines but largely for the purchase of rolling stock and motive power and for the extension of other facilities necessitated by the necessary movement of the products of the country.

"You will find that in due time this phase of the difficulty—growing out of these new securities—will disappear.

"As for the general situation you may state emphatically and unequivocally that it is most promising, with the country unqualifiedly prosperous. In the iron and steel trade, for example—the barometer of the country's growth, stability and business activity—there never was so great or so profitable business. Orders on hand run far ahead and the outlook is decidedly encouraging.

"In short, summing the situation up, not only is there prosperity everywhere, but the promises are of a continuation of that prosperity for a long time to come."

UNION SYMPATHIZERS ARRESTED.

Waterbury Police Hope to Clear Up Mystery of Policeman's Murder.

Waterbury, Conn. — Eighteen men placed under arrest on the charge of assault with intent to kill was the record of activity on the part of the police a few days ago in their efforts to discover the authors of some of the outbreaks of violence which have occurred since the beginning of the strike of motormen and conductors of the Connecticut Railway and Lighting Company eleven weeks ago.

The men arrested are charged in the warrants with assault on William T. Merner and George Morrisette on the night of February 26. These two men were the non-union employes of the trolley company who had charge of a car which was attacked at a lonely spot on the Waterville Line. Both men were assaulted, and one was beaten into insensibility and left lying on the rails in the path of the cars.

This disturbance occurred a little more than a week before an attack of a similar nature on a car at Forest Park, when Policeman Paul Mendelssohn was killed by a bullet from a mob of masked men. Since the murder was committed, detectives, attracted by the large rewards offered, have been quietly at work. While the arrests are nominally for the assault of February 26, the officials do not deny that they hope from this action to learn something that will clear up the mystery of Mendelssohn's death.

LIEUTENANT FAULKNER ARRESTED.

Son of Former Senator Accused of Financial Irregularities.

Seattle, Wash.—A dispatch from Skaguay, Alaska, says under orders of Major Pitcher, commanding the Eighth Infantry, Lieutenant Charles Faulkner, Company M, has been placed in close confinement on charges of financial irregularities.

Lieutenant Faulkner is a son of former United States Senator Faulkner, of West Virginia, and has a brilliant military record. He was the first officer to enter the city of Pekin with his command when that city was attacked. A court-martial will be held.

FUNNY MAN IN THE BOAT.

Season Begins Early — He Succeeds in Drowning Himself and Three Others.

Ogdensburg, N. Y.—Particulars of a drowning accident at Bass Lake by which four young men lost their lives reached here. William Nichols, James McLellan, Hugh McCallum, Harry Bolton and a man named Smith, who had been working during the winter in a bush camp near Bass Lake, were crossing it in a small boat to attend a wood bee at Thomas Lumblin's. Smith, the only survivor, says that Nichols rocked the boat, which filled and sank. Smith was the only one who could swim. He reached the shore exhausted.

Indemnity For Lynching of Two Italians.

Signor Mayor des Planches, the Italian Ambassador, has received from Secretary Hay, at Washington, a treasury draft for $5000 as indemnity for the lynching of Giovanni and Vincenzo Srio, the Italian subjects, at Erwin, Miss., July 11, 1901, and for the infliction of injuries at the same time upon Salvatore Liberto, also an Italian subject. Congress appropriated the money. The heirs of each of the men lynched will receive $2000, and Liberto will receive $1000.

LIONESSES IN THE STREET

Lively Hunt For the Escaped Animals at Pittsfield, Mass.

One Killed a Horse Before Keeper Shot Her—The Other Retaken, Wounded —Caused Wild Excitement.

Pittsfield, Mass.—Two savage lionesses, loose in the streets of Pittsfield, caused wild excitement. They were being lowered from the third story of the Academy of Music, where a trained animal show had been giving exhibitions. The cable parted when some feet from the ground, letting the cage fall. It broke and set the animals free.

The largest of the lionesses immediately sprang at the throat of a horse, and clung to it until dispatched with shots from the revolvers of the keeper and a number of members of the local militia company. She killed the horse, terribly mangling it. The other wild beast attacked the mate to this horse, but the frightened animal tore itself away, with the loss of large pieces of flesh from its neck and flank.

The lioness then ran furiously up North street, pursued by the keepers and a crowd of men with revolvers. Finding the doors of the Central Automobile Station open she ran in. When the doors were closed, and after she had been shot at through the windows, the lioness finally became subdued, and the keeper drove her into a cage. It is thought the second lioness will die from her wounds.

The two animals were valued at from $2500 to $3000. It is considered remarkable that no persons were attacked by the infuriated beasts, the horses probably first attracting their attention. The lioness which was killed had been troublesome all the week, and it was with difficulty that the woman trainer was able to go through all her tricks.

BANDITS FIGHT TO THE DEATH.

Robber Killed and Comrade Captured in Running Fight.

Cleveland, Ohio.—A desperate battle was fought between three robbers on one side and officers and citizens on the other, at Bedford, a suburb, resulting in the death of one of the robbers and the wounding and capture of another.

Late at night three masked men entered the town of Garrettsville, twenty-five miles east of Cleveland, seized the night policeman, bound and gagged him and attempted to blow open the postoffice safe. Then they entered the store of F. E. George, where they secured a small sum of money.

Meantime the authorities had sent telegrams to Bedford. The three burglars jumped from the train as it drew up to the station and a running fight began. One of the pursued men dropped to the ground dead. A second was so badly wounded that he threw up his hands in surrender. The third man escaped. The captured man gave his name as James Bradley, twenty-five years old, of St. Louis, Mo.

MADE TO KISS THE FLAG.

Abusive Tar, Who Had Called It a Rag, Disciplined in an Odd Way.

Boston.—An unusual scene was enacted on the United States revenue cutter Seminole, lying in this harbor. One of the seaman, a veteran tar, broke out in the forecastle one day in violent abuse of pretty nearly everything. He proceeded in his vituperation without being molested until he called the United States flag a dirty rag and indulged in other unpatriotic sentiments.

A quartermaster standing near reported this language to Captain Rogers, commanding the Seminole, and the latter took prompt action. All hands were called to general muster, and when they were lined up the Captain addressed them on the enormity of the offense committed by one of their number. Then he compelled the culprit to kiss the flag six times and to repeat after him an obligation never to speak disrespectfully of it or to allow any one else to do so in his presence. The name of the offender is not made known.

"WOMAN" THIEF WAS A MAN.

Masquerader Had Been a Terror to the Town For Years.

Westfield, Mass.—In the arrest of Joseph Wheel in women's clothes the police think they have a man who for several years has been causing terror in the town.

When Robert Grant returned home he found the knob fastened on the inside. Entering by another way he was confronted by an intruder in woman's clothes. The two grappled and a rough and tumble fight followed. Neighbors came to Grant's aid and subdued the stranger. At the police station the disguised man was found to be Wheel, a mechanic, who has lived in Westfield twenty years and has a family. As part of his disguise he wore a wig, with the hair done up in the latest style worn by women.

SAW CHILDREN DIE OF OLD AGE.

Mrs. Buisineau, 105 Years Old, Has Lost Eight of Her Offspring in This Way.

Lancaster, Mass.—Mrs. Jennie Buisineau, aged 105 years, has left the home of her youngest daughter, Mrs. Joseph Bachant, where she has been living twenty-two years, to go to Norwood, R. I., for a visit. Then she will go to other relatives in the Province of Ontario to pass the remainder of her days. Mrs. Buisineau can see without spectacles, has knitted stockings and has baked bread during the winter. Her mind is clear and she is quite active.

Eight of her fourteen children have died of old age. The youngest daughter is fifty-five. She has more than 100 descendants, including two great-great-great-great-grandchildren.

Yale Student Kills Himself.

Because he thought he was incurably afflicted with consumption Herman Bowman Esher, twenty-five years old, of Chicago, a student at Yale University, committed suicide by shooting himself through the head in a hotel at New York City.

Republican Outbreak in Spain.

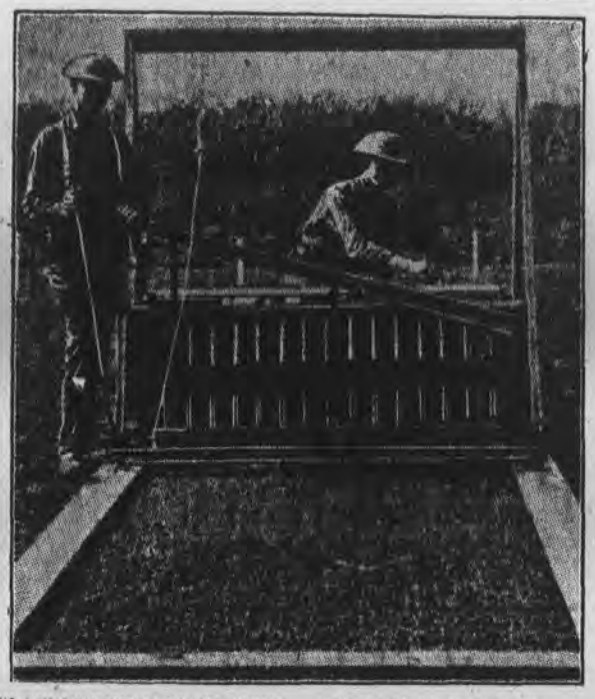
It is reported that serious Republican outbreaks have occurred at Valencia, Spain. The troops are confined to barracks and street meetings in Valencia are forbidden.

IMPROVING WHEAT.

Testing Many Varieties to Select the Most Profitable---Experiments in Cross Fertilization.

By O. H. Barshill.

THE improvement of wheat is a very important matter, and it is only natural that the work should be undertaken by the experiment station of the leading wheat State of the Union, Minnesota. The station is located at St. Anthony Park, which is between the cities of St. Paul and Minneapolis. The proximity of the great flouring mills of the latter city gave excellent facilities for testing the milling qualities of the various wheats with which experiments were made. All the variety tests were not made at St. Anthony Park, however. A large number of experiments were made at the March & Spalding farm, in the northwestern part of the State, near Warren, in the famous Red River Valley; at Glyndon, in the southeastern part of the Red River Valley; at the Northwest Experiment Farm, near Crookston, Minn., and at the Northeast Experiment Farm, near Grand Rapids, Minn. Extensive tests made at the North Dakota Station were also taken into consideration in drawing conclusions. The average results of tests made at all these widely separately points cannot help but be comprehensive and conclusive.



PLANTING TEST PLOTS WITH A PLANTING MACHINE.

SELECTED TREES TIED UP TO PROTECT FROM BIRDS.

The variety tests were begun in 1888. The method of making the field tests is interesting. The land at the university farm is divided into plots eight rods long and one rod wide. A shoe drill a half rod wide is used, so that one round will plant a plot. After one variety is planted the seeder is cleaned by hand, and then every remaining seed blown out with a bellows and rubber tube. An alley two feet wide is left between the plots of grain. As wheat is nearly always self fertilized, there is little cross breeding of varieties. After the grain heads out, the plots of newly secured varieties are gone over, and all plants not of that variety are removed.

The different varieties are planted in the order of their ripening season, beginning at one side of the field. The earliest variety can thus be cut first, and each succeeding plot as it ripens. The binder is carefully cleaned after each plot, and the varieties are marked by placing a stake beside each shock. The separator used in thrashing is constructed so that it will clean itself thoroughly when run a few minutes after the feed is stopped.

To further guard against the admixture of varieties, the first half bushel of a variety is placed in a large sack, and then a half bushel is caught and placed in a small sack and saved for seed. The remainder is placed in a large sack. The vitality of the seed is tested in a germinating chamber, in which the temperature is as low as that of the soil at sowing time. Where necessary the seed is treated for smut.

Many of the Russian wheats were found to be badly mixed, although they were samples of the best varieties grown in that great wheat country. Some contain from two to four distinct kinds.

In 1897 the 200 original varieties had been so closely culled out that only eight of the best were still retained for further testing. In order to still further decide among these, small amounts of each kind were made into flour and were subjected to careful tests, known among milling experts as the "color test," "gluten test" and the "baker's sponge test."

The gluten test is made by mixing water withm one ounce of flour and then kneading it into dough, which is held under a stream of water and pulled and worked until the starch has all been washed out. The wet gluten is weighed and then dried and weighed again, in order to ascertain its moisture holding power. It is stretched into long threads and the ductility is noted. Lastly it is moulded into a round ball and laid upon a card. The better the flour the better the gluten ball will retain its shape. The poorer the gluten the more it will flatten out and spread over the card.

In the baker's sponge test the volume and time of rising of the dough are noted. Gluten from Bolten's Blue Stem produced sixty times its volume of loaf, while Rio Grande only produced fifty times its bulk of bread, though it contains one per cent. more gluten than the Blue Stem.

In 1890 the work of improving wheat by selecting the best individual plants was begun. In 1892 400 kernels of each of eight varieties were planted singly in hills twelve by eighteen inches, and the best plants were selected from each variety. In 1898 1200 of the largest hard kernels of Bolton's Blue Stem were selected and planted by hand, four inches apart each way. As the grain approached maturity the poorest stalks were removed. Successive cullings reduced the number of stalks to seventy-five. These were carefully saved and used for succeeding trials. Other varieties were tested in a similar manner.

Another method of improving is that of hybridizing or cross pollenating. The grain is planted with a machine which places each two kernels four inches apart. One hundred seeds are planted in a plot, which is called a "centgener."

Cross fertilizing, or pollenating by hand, is an interesting and delicate operation. The best stalks are selected, and when the flowering period approaches the upper and lower spikelets are removed, leaving six or eight on each head. The anthers are withdrawn with sharp-pointed tweezers to prevent self-fertilization. Pollen grains from another plant are placed upon the stigma and the head wrapped in tissue paper to exclude pollen from other plants.

The hybrids produced in this way generally show a great variation in type. A cross between Blue Stem and Fife produced over a dozen different varieties. In this way many new varieties have been originated, though few are equal in value to the parent plants. Comparatively few true crosses are obtained, and only four to twenty-five per cent. of the experiments in artificial fertilization are successful.—New York Tribune.

CROSS FERTILIZING BY HAND.

and have been patiently continued until the present time. Nearly 200 varieties or samples were secured in the beginning from Minnesota and various other States, as well as from Russia, Hungary and other European countries and from Canada.

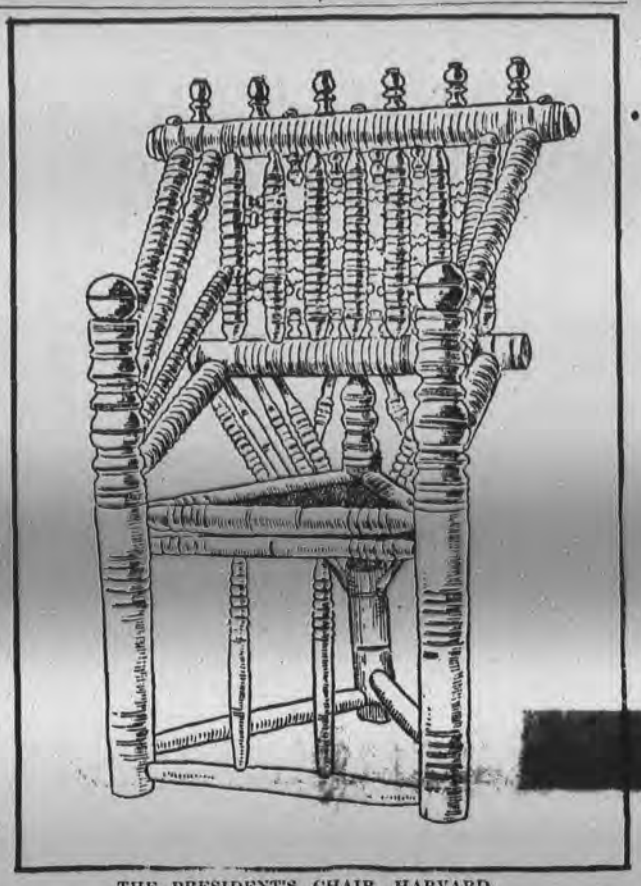
AN ODD OLD CHAIR.

Used by the Presidents of Harvard For Many Generations.

ONE of the most interesting pieces of ancient Colonial furniture in this country, says the Boston Herald, is the chair used by the President of Harvard University during the annual commencement exercises in June. Aside from the fact that it is very old, the chair has the distinction of being almost the only one of its kind in America, so far as collectors have been able to discover.

The President's chair, as it is always called, has been used by thirteen Presidents of the college and university. It is stoutly constructed of oak, in the style known as "thrown," or turned, and dates back to the sixteenth century, so that it was already something of an "antique" when it was brought over to this country by some early Puritan or Pilgrim. Oliver Wendell Holmes has described it thus:

"Funny old choir with a seat like a wedge,
Sharp behind and broad front edge—
One of the oldest of human things—
Turned all over with knobs and rings—
But heavy and wide, and deep and grand—
Fit for the worthies of the land."



THE PRESIDENT'S CHAIR, HARVARD.

For Shooting Poisoned Arrows.

Indians who use poisoned arrows do not trust alone to the venom with which they anoint their darts. In addition, they often apply poison to the bow itself and utter certain spells over it, with the idea that it would launch death with the arrows it shot. The head of one of these Indian bows for shooting poisoned arrows is shown above. It will be observed that rattlesnake rattles form an important part of its decorations.

China Fiddles.

The latest invention in the domain of ceramics is the manufacture of violins and mandolins from porcelain. A well-known manufacturer of the Meissen ocarinas and porcelain organs has invented a process for the manufacture of violins and mandolins from clay. Some violins have already been completed, and the inventor has applied for letters patent for the same in different countries.

Under this process the violins are cast, and every violin is guaranteed a success and to be unexcelled for producing music. The latter quality constitutes precisely the chief value of this invention. The porcelain body, it is claimed, is better able to produce sound than a wooden one, since it co-operates in the production of sound, making the notes soft and full.

CARRYING THE BABY.

Head and Spine Troubles Caused Where Incorrect Ways Are Used.

The accompanying suggestions and illustrations, for which we are indebted to Leonard's Illustrated Medical Journal, are worthy of attention:

HOW TO CARRY BABY.

"The child should always be lifted with both hands, held lightly, but firmly, the entire length of the back and the head being carefully supported. One of the most common and dangerous errors is leaving the back of the head unsupported. When this is done, the movements of the body of the mother or nurse in walking, or, indeed, the sudden lurching of the baby itself, may seriously affect the head and spine."

HOW NOT TO CARRY BABY.

The mortgage is always looking for somebody to give it a lift.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "CIRCUMSTANCES OF LIFE."

The Rev. Dr. Frank Oliver Hall Says We Must Learn How to Face the Prosperity as Well as the Hard Conditions of This World.

NEW YORK CITY.—The Rev. Dr. Frank Oliver Hall, pastor of the Church of the Divine Paternity, preached Sunday morning on "Facing the Circumstances of Life." He took his text from Philippians iv: 12: "I know how to be abased, and I also know how to abound. I have learned the secret." Dr. Hall said:

In other words, Paul said, "I have learned the secret of how to be independent of circumstances. I know how to face humble circumstances, and I know how to face prosperity."

That is a great lesson, and one which few men ever do learn. But it is a lesson which we all need to learn in order to preserve happiness, the integrity of character and to make the most of life.

First—Let us look first for the secret of how to face humble circumstances. Every one stands in danger of being reduced to poverty. No matter how much you may possess to-day, on the morrow it may be all swept away. If you put your money in a bank the cashier may abscond with it and leave you with nothing but a book with certain hieroglyphics scribbled therein to indicate that you were once affluent. If you put your money in mining stocks, the ore may give out, or bad management may ruin the enterprise. If you invest in a railroad, a rival line may get all the traffic, or some unscrupulous speculator may wreck the business for his own enrichment. If you buy real estate, it may depreciate upon your hands, or a fire may sweep away your holdings in a night. If you conclude to wrap your treasures in a napkin and hide it in a hole, some thief may discover and steal it. So no matter how rich you may be, to-morrow you may be as poor as any. Proverbially, riches take to themselves wings and fly away. It is, therefore, extremely important that one learn the secret of how to face humble circumstances. What is the first step to be taken in this direction?

(1) My first word of advice is this: Train yourself to work. Learn to be useful in some specific way. Learn to perform some service of importance so that you might be dropped down in any portion of the civilized globe absolutely without resources, and yet be able at once to command at least the necessities of life from the community in which you find yourself, in return for the service which you are able to render.

I take it that this was one of the great reasons for the contentment of the man who wrote the words of our text. He was independent because he was a skilled workman, and knew how, by the use of his hands, to command in any community the necessities of life. The Jewish people were extremely wise in many directions, and their wisdom was nowhere more manifest than in the rule which they made as to the education of youth. Every Jewish boy, no matter what the circumstances of his life, must be taught a trade. The boy Saul, although probably from an early age predestined by his parents to become a scholar, a teacher, a religious leader, was nevertheless taught to make tents. That is, he knew how to weave camel's hair and other material into the fabric of which tents were made. Thus, after his conversion to Christianity, when his worldly prospects were ruined, and he had cast in his lot with the poorest and humblest people in the community he at once sought work, and found it because he was skilled in making something which that community needed. He earned his bread by the work of his hands, and spoke his message because he loved it. And when the people to whom he spoke came to him out of gratitude and wanted to contribute toward his support, he accepted their humble gifts on the principle that the laborer is worthy of his hire, and thanked them, but repeatedly declared that such gifts were not necessary to his life. "For I am not in want," he said. "I can earn the necessities of life."

In what an enviable position such a man stands. How much better it would be if every religious teacher of our time had been taught some useful occupation by which he could command the necessities of life. He might never be called upon to use his ability in that direction, but the possession of it would mean liberty. He would no longer be haunted by the fear that if he did not conform his opinions to those of the church authorities the bread would be taken from the mouths of his children. The knowledge that he had power to command bread for his family by the toil of his hands would give to him entire freedom in search for truth and in uttering it.

And if this is true of religious teachers it is just as true of people in other departments of life. Liberty is but a dream for any man who must conform his political opinions to those of his employer unless he would see his supply of food cut off. Many a man in the business world works for and votes for measures in which he does not believe, or becomes a party to trickery and dishonesty, because these are for the interest of the employer, and unless he works for the interest of his employer his family will lack food. Many a girl marries a man she distrusts, or even despises, because she must marry or become a pauper.

Therefore let those who would find the secret of independence in the face of humble circumstances first learn to work, learn to command some useful occupation by which they may win from the world the necessities of life in return for honest and worthy service.

2. But this is not the whole of Paul's secret. For one who has known prosperity to be obliged to face humble circumstances, to maintain courage and cheerfulness, is extremely difficult. How shall he be able to do this?

Let him meditate upon the relation of values. Paul had been a man of great promise, and was on the high road to wealth and exalted position, but he lost it all and came to associate with slaves and people held in social contempt; he went back to tent-making, and from being a religious leader became a common laborer. But his courage, instead of being diminished, was increased. No braver man ever lived. His cheerfulness was constant. When they had scourged him and placed him in the torturing stocks he sang. No pessimistic word ever escaped him, no gloomy reflection can be found in his letters. How did he escape gloom and despair under such circumstances? He had learned the relation of values. "All things which once stood to my credit I have now, for Christ's sake, come to reckon as loss. More than that, I reckon everything else as loss, on account of the exceeding value of knowing Jesus Christ my Lord. And for His sake I have lost everything, and reckon it all as the merest refuse if I can but gain Christ, and be found in union with Him." Here was a man who counted wealth, position, country, home, everything as so much refuse if only he could feel that he possessed a true, honest Christ-like character.

3. But that is not the whole of the secret. Listen: "I have learned the secret both to be filled and to be hungry, both to abound and to be in want." How? Because I have discovered that "I can do all things in Him that strengtheneth me." To the person who really believes in God, that God watches over him and loves him, there can be really no such thing as adversity. If some man of immense wealth and proved generosity, some man in whose honor you implicitly believe, were to seek you out and say, "Come, serve me. I need you. Go to work in my shop, or my vine yard; take up your residence in my house; what is mine shall be yours, and it shall be my care that you and yours do not suffer want." If you really believed in that man and trusted him, there could be no further anxiety on your part. Only as far as you disbelieved in him, only as far as you distrusted his honor or his generosity could you be anxious. Now the richest being in the universe, God who owns it all, has laid Himself under obligation to us by bringing us into the world. God has duties, as every moral being must have. If a father or a mother has duties toward an offspring God must have duties toward us. He has invited us to come and live in His house, yea, has brought us here whether we would or not, and He has said in effect that if we will do as well as we can He will care for us. It is only as far as we distrust the providence of God, or disbelieve in His providence, that anxiety can find a place in our lives. "Why are ye anxious?" asked Jesus. "If God clothes the grass of the field and cares for the birds of the air, shall He not much more care for you, O ye of little faith?"

But this is only one-half of Paul's secret. He had learned how to be abased, but he had also learned how to abound. He had learned to face adverse circumstances, and he had also learned to face prosperity. We must all have known people who came unscathed through adversity, and were afterward ruined by prosperity. Under the influence of good fortune they become conceited, arrogant and selfish. More people have been spoiled by wealth than by poverty. I have come to feel that no greater evil can befall a young man or woman than to be rich through the effort of father or grandfather, and so be freed from the blessed necessity of winning one's own way. Those who struggle from poverty to affluence by learning first how to be abased afterward learn how to abound. But those who begin in abundance are frequently spoiled by possessing without effort what we are apt to call the blessings of life. Wealth may be a blessing, but poverty is oftener so. Jesus said: "Blessed are the poor." Now a poor man is not blessed because he is poor. If that were so how easy for any one of us to secure blessedness. But poverty urges to effort and effort opens the door to large attainment.

How, then, may one cultivate and preserve such admirable qualities of character, the true riches of the soul, while facing prosperity?

(1) Let him in the first place take a lesson in humility. We are apt to say of a wealthy man, "He is independent." It is a false saying. No man who lives in a civilized community is independent. The only really independent being is the savage man who lives by himself in the wilderness, dressing in the skins of wild beasts and eating roots. The moment he exchanges his bear skin for a blanket he places himself under obligation to the man who raises the sheep, the man who cuts the wool, the man who spins the yarn, the man who weaves the blanket. The moment he exchanges his diet of roots for one of bread he places himself under obligation to the farmer who raises the wheat, the reaper who cuts it, the miller who grinds it, and to thousands of others whose busy brains and hands have constructed the instruments which make these processes possible.

This truth is extremely far reaching. Not only for material wealth are we under obligations to our fellows, but also for our intellectual wealth. Others have labored and we have entered into their labors. It is creditable for a man to study and possess the wisdom of the ages. But let him temper his pride in the abundance of his intellectual possession with the thought that every great truth he learns has been discovered by another. Our abundance of in-

[redacted]

mighty courage of men who have long since gone to their reward? The environment of our lives which conduces to purity of heart, how much did it cost in the struggle of our ancestors out of a beastly state into decency of living? Let us not be wise in our own conceit, but in the midst of our abundance let us think humbly, soberly, according as God has given unto us, through the ministry of our fellow men, the measure of all things which we possess.

(2) Then as we face abundance, even as when we face want, let us endeavor to appreciate the relation of values. Is the man who possesses wealth better than the man who possesses nothing? Perhaps. But not because he possesses wealth. Is the university graduate, the man who possesses intellectual riches, better than the man who has never been to school? May be. But not because he is a university graduate. The man who possesses much and is stingy is worse than the man who possesses little and is stingy, because there may be an excuse for the stinginess of the man who has only a crust and faces starvation, but there is no excuse for the man who goes on adding barn to barn or thousands of dollars to other thousands, while his neighbors hunger. There may be excuse for the ignorant man for not trying to advance the intellectual standards of the community in which he lives. He has nothing to give, no capital to work with. But there is no excuse to be made by the man who has had all the advantages that the colleges afford, for doing nothing for the world. He has power and should use it.

The only riches worth while are in the character. Use your abundant possessions to help build the kingdom of God, as the workman uses his tools to construct a wall or to build a house. So shall your dollars be transformed into character, and your intellectual achievements minister to ethical attainments.

(3) Finally learn to face prosperity by continually acknowledging that what you seem to possess you do not really possess at all. You are only a trustee of a portion of the estate which belongs to God. I possess so many golden dollars. How beautiful they are, how substantial, how enduring. See me clutch them. They are mine. I will hold them. Nothing shall rob me of them. Nothing? Wait. Shortly this hand of mine which clutches so firmly shall be palsied in death and later crumble to dust. The grasp upon the gold shall be loosened. Mine? It was never mine. Out of God's earth it came. In God's earth no human power can prevent its ultimately returning. "Naked came I into the world, and naked shall I depart thither." To-night, may be, that journey shall commence. How absurd, then, to talk of my possessing wealth.

But there is one possession which we shall keep, and which shall endure as long as we endure. Character shall endure, because my character is myself. If one has learned love, that shall abide. Purity of heart, honesty of purpose, kindness of life shall endure, for these belong to the immortal soul of man. Said Jesus, "The man who in the spirit of love ministers to the sick, clothes the naked, feeds the hungry, visits the prisoners, he and he alone shall hear the voice of Him who sitteth upon the throne, saying, 'Come ye blessed, inherit the kingdom prepared for you from the foundation of the world.'"

From Everlasting to Everlasting.

From whatever angle the love of Christ is regarded, it is unspeakable. It is unspeakable in its length. It had no beginning; it knows no break; it has no end. The mercy of the Lord is from everlasting to everlasting. It is unspeakable in its breadth. It includes each and all. It is like a benediction upon every soul. It is unspeakable in its depth. It saves to the uttermost. And it is unspeakable in its height. It makes us joint heirs with Christ, kings and priests with God forever.—A. J. F. Behrends.

The very personification of envy is that which the henpecked husband and the bachelor who has been disappointed in love feel for each other.

SATURDAY, APRIL 4, 1903.

ANNEXATION WIPED OUT.

Now that the legislature has repealed the annexation law it behooves all good citizens to accept the situation, and bow to the will of the people.

In our news columns we give particulars of the last act of the drama as witnessed at Trenton this week, and from the facts brought out surely no one will be proud of the record of the passage of the original bills.

The history of the annexation law is well-known to most of our readers, but for the benefit of those who are not thoroughly conversant with the facts, we give below a brief description of it.

On the evening of February 14, 1902, there was sent to the REVIEW office for publication notices signed by W. L. Saunders and Philip V. R. Van Wyck, which set forth that the [redacted] borough and city.

At that time Charles A. Reed was the State Senator from Somerset county, and he was immediately notified by telephone of this notice. He laughed at the idea and was not disposed to treat the matter seriously, saying that it would be utterly impossible to get such bills through a Republican legislature.

The people of Somerset county had great faith and confidence in the Senator they had elected to represent them in the legislature, and knowing these bills to be bad, and that their Senator had said on several occasions that he was opposed to such an act, they never doubted for a moment but that he would look out for their interest and work against such bills. Even after Mr. Reed had gone on record as favoring the bills the people were loth to believe their Senator could so betray their trust, but when it was impossible to longer doubt that he was working to divide the county, our people woke up, and under the leadership of A. V. D. Honeyman, Charles W. McCutchen, W. W. Howe, Dr. J. H. Cooley, Charles Place, Dr. H. K. Carroll, George D. Hallock, Dr. J. H. Buchanan, W. J. Buttfield, John H. Van Winkle and many more prominent citizens of the Borough, a meeting was called and the Citizens' Association of North Plainfield was organized for the purpose of defeating a bill which they had never asked for and which if it became a law would mean misfortune to Somerset county.

Representative citizens were sent to Trenton and everything possible done to side-track the bills, but it was too late—the bills passed with a majority of 16 to 1.

Knowing the impossibility of such bills ever getting through the lower House on its merits, Mr. Reed represented to the Assemblyman from Somerset county that as a personal favor he wanted the bills to go through that body so that he (Reed) might have the honor of killing them in the Senate. Mr. Reed did this before he came out publicly in favor of the bills.

Assemblyman Hoagland believed Mr. Reed to be sincere in his statements, and voted and worked for the bills, as did other assemblymen upon his recommendation. It was not until the bills had passed the House that the Assemblymen and the people of Somerset county learned that their Senator had betrayed their trust, and it was then that our people began their fight.

And then they did fight, too! With odds against them that would have discouraged most men, our representatives contested every inch of the way; and after the bills had gone through the House, and before coming to a vote in the Senate they secured a hearing before the committee where the whole matter was argued. After the gentlemen who opposed annexation had left the room, Senator Reed asked if a referendum were attached to the bill if that would be satisfactory. No reply being vouchsafed by any authorized party, there being no one present to represent the Antis, it was taken for granted that a referendum would be satisfactory and it was so reported.

Governor Murphy exacted a promise from Mr. Reed that in view of his signing the bill after a referendum was attached, that a prompt election on both laws would be held, but in spite of a petition by leading citizens to the Mayor and Council of North Plainfield, no election was called until September 16, 1902, at which time an election was called on *annexation only*, and the scheme was defeated by 161 votes at one of the largest and most spirited local elections ever held in this borough.

It was supposed, of course, that this decided victory would settle the question, but not so; for before the air was clear of the smoke of the battle, threats were made that it would yet go through, although it was the general opinion among the legal fraternity that no other election could be called under that law.

In order however that the matter might be settled once for all, it was decided to have the law repealed, and a repealer was introduced into the legislature for that purpose, and it is this annexation bill repealer which has just been passed. There yet remains the consolidation law which after a vote by both the borough and city to that effect a consolidation of the two municipalities may be made without changing the county lines. But on this point the former annexationists cannot agree, so it is not likely [redacted]

"Antis," and to the people who have made this victory possible a debt of gratitude is due, and as the years roll by and the matter is understood in its true light, those men who have been so active in behalf of annexation under the proposed law will be glad that their wishes did not come to pass.

THE Plainfield annexation imbroglio is not the only one of its kind in this state. The inhabitants of a portion of Gloucester are making a vigorous fight against annexation to Camden county. More than 10,000 citizens have signed protests against the contemplated change. Three years ago there was the same kind of fight in the same place. As a rule people are opposed to violent changes of political lines. A few years ago an effort was made to take a slice off Middlesex county and annex it to Union, for the purpose of acquiring and improving a county road. Not fifty people, all told, occupied the little territory, yet a big fight ensued and the project was defeated. The North Plainfield fight is of the same kind, generally speaking, but none of these has been so prolonged and so bitter as the interminable fight for and against the taking of Kearny from Hudson county and annexing it to Essex. As a rule the people do not want county lines changed.—*Elizabeth Daily Journal.*

True for you, editor McBride; the people do not want county lines changed, especially when the change contemplates taking from a small and adding to a larger or wealthier county, as is the scheme of a few politicians in annexing North Plainfield to Plainfield.

If ever the Monroe doctrine was applicable, it should apply here, and the wonder is that so many honest people should have been misled into this unfair scheme of taking the chief source of revenue from Somerset and adding it to Union county, when the whole argument (if annexation is demanded) is on the side of adding to Somerset.

We are pleased to note that many who once favored this scheme are beginning now to understand the true inwardness of the question and as they become better acquainted with the situation they are arrayed on the side of justice, and are now convinced that the whole thing was nothing more nor less than a political scheme.

THE REPEAL—WHO ACCOMPLISHED IT

The repeal of the vicious act to carry this borough bodily over to Union county, which the election last September decided must not be done, was brought about by the North Plainfield Citizens' Association, of which Mr. Charles W. McCutchen is President. That body appointed early in the winter a committee of Mr. Howland, Mr. Honeyman and Dr. Cooley to effect a repeal, since the election had been held and it was just not to have the act longer as a menace. This committee attended the legislature, as did other members of the Association, and defended the repealer before both Senate and House against the attacks of our political bosses.

The REVIEW extends its congratulations to these gentlemen on the successful completion of their work. They did nobly and at much personal sacrifice of time and business convenience. It also congratulates Senator Childs and Assemblyman Swackhamer on the bold, frank, honest stand they took in voting for the repealers as their party platform required. It must have been a severe blow to the pride of the local bosses to have elected these two Democrats and then fail to control them; but these gentlemen have gained the good will of the whole of Somerset county by their manly conduct.

It pays even a politician to do right, as Senator Reed has found out to his cost; and as others will discover when the day of reckoning comes. We hope ex-Mayor Saunders can now see what a mistake he made in linking the fortunes of his consolidation measure with the political fortunes of the Reed-Smalley combine. He might better have gone it alone.

"When you want to do a public thing with any hope of public approval, do it in a fair, open way," said a statesman once. He was right.

FOR HONEST PRIMARIES.

It is too much to hope or expect that the new primary election law will be perfect in all its working details, and it would be strange if the law is not found wanting; but it is a great step forward and it will be a small matter to perfect the law by legislative action after experience shows its defects.

We may not see clean, honest primaries in this generation, but in view [redacted] the very foundation [redacted] government rests upon the primaries, any movement which tends to awaken interest in them is to be commended.

The details of the new plans are not yet sufficiently understood to be made a subject of comment, and experience will enable the people to judge the merits or demerits of the law.

THE voting machine bill which was passed in the Senate and then in the House provides for the purchase by the State Voting Machine Commission of eighty-one machines, for which $40,000 is to be appropriated by the State, to be distributed to the various counties by the Secretary of State, for use in general elections, in the ratio of a machine for each member of the Legislature in the county. The Secretary of State is to designate the election districts in which the machines are to be used.

How many times do the Plainfield city newspapers want the borough ex-annexationists to vote on a question before giving up? Were they not beaten fairly and squarely last September with plenty of votes to spare? Usually one ballot on such questions is final. There would be just as much sense in having a Borough or any other election repeated on the ground that some who voted at the first election had changed their minds!

THE new automobile law places the speed limit in the country at twenty miles an hour, and not more than six or eight miles in cities; provides for the easy identification of machines, and the persons controlling moto vehicles must have a certificate showing competency.

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the REVIEW free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled. write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed, but it is necessary to have them properly vouched for.

LEGAL NOTICES

U. S. MARSHAL'S SALE

U. S. Circuit Court, District of New Jersey } ss

Between

Execution — WILLIAM H. CONROD, Complainant, and MARSHALL C. KELLY, et als, Defendants.

By virtue of the above-stated writ of Fieri Facias to me directed, I shall expose for sale at Public Vendue, on Wednesday April 8, 1903 Between the hours of twelve and five o'clock in the afternoon of said day, to wit at 2 o'clock, at the Court House in Somerville, Somerset County, New Jersey, All that tract or parcel of lands and premises situate, lying and being in the borough of North Plainfield, in the County of Somerset and State of New Jersey; and being known and designated as lots numbered 15, 16, 17, and a part of lot numbered 20, in Block B, as the same are laid down on a certain map entitled, "Map of Villa Sites in Washington Park, North Plainfield, N. J., J. R. Dunham, Surveyor", dated May 1, 1872, and which map was filed in the Clerk's office of Somerset County.

Lot No. 15 is thus described: BEGINNING at a point in the centre of Rockview Avenue, distant three hundred and twenty-five feet in a southwesterly direction along the centre of said Avenue from a point in the centre of said Avenue opposite the centre of Sycamore Avenue, and is the corner of lot No Sixteen as laid down on said map; thence along the division line between lots number fifteen and sixteen in a course of south forty-one degrees and twenty-one minutes East two hundred feet and fifteen hundredths of a foot to a point in the line of lot number twenty thence along the line of lot No. twenty in a course of South forty-three degrees and fifty minutes West twenty-six and ninety two one hundredths feet to a point and is a corner of lot number fourteen; thence along the line of lot number fourteen in a course of North fifty-four degrees and fifty minutes West two hundred and one and four one hundredths feet to a point in the centre of the aforesaid Rockview Avenue; thence along the centre of said Rockview Avenue in a course of North thirty-seven degrees and fifty-seven minutes East fifty feet; thence still along the centre of the same in course of North fifty-four degrees and twenty-two minutes East twenty-four and five tenths feet to the point or place of Beginning. Be the said measurements more or less.

Said lots numbered Sixteen seventeen and a part of lot numbered twenty taken together are bound and described as follows: Beginning at a point in the centre of Rockview Avenue distant one hundred and seventy-five feet in a Southwesterly direction along the centre of said Rockview Avenue from a point in the centre of said Avenue opposite the centre of line of Sycamore Avenue and is a corner of lot Number Eighteen, thence along the line of that lot in a course of South eighteen degrees and fifty-two minutes East and extending across lot number Twenty two hundred and sixty-two and fifty-eight one hundredths feet more or less to a point in line of lot number twenty-one; thence along line of that lot South seventy-five degrees and thirty minutes West Ninty-nine and five tenths feet more or less to a corner of lot number Twenty-one; thence North twenty degrees and five minutes West along line of lot number fourteen thirty-five feet to a corner of lot number fifteen thence North forty-three degrees and fifty minutes East along line of lot number fifteen twenty-six and ninety-two one hundredths feet to a corner thereof, and also a corner of lot number sixteen; thence North forty-one degrees and twenty-one minutes West along line of lot number fifteen two hundred and fifteen one hundredths feet to a point in the centre of Rockview Avenue; thence along the centre thereof North fifty-four degrees and twenty-two minutes East seventy five feet, thence still along the centre thereof North sixty-nine degrees fifty-eight minutes East seventy-five feet to the place of BEGINNING;

Being the same premises conveyed to the said Ella Booth by Benjamin M. Day and wife by deed dated December 9th 1898, and recorded in the Clerk's office of Somerset County, New Jersey, in Book X-8 of Deeds on pages 380 &c.

Seized as the property Marshall C. Kelly, et als, defendants, taken in execution at the suit of William H. Conrod, Complainant, and to be sold by

THOMAS J. ALCOTT, United States Marshall, District of New Jersey.

COULT, HOWELL & TENEYCK, Solicitors.

NEW JERSEY'S LEADING NEWSPAPER.

Newark Evening News
AND
Newark Sunday News

THE ONLY PAPER WHICH COMPLETELY COVERS THE HAPPENINGS OF THE STATE.

ALL who wish to keep in touch with the news of New Jersey will find in the NEWARK EVENING and SUNDAY NEWS the best medium for attaining their desire. The NEWS is not only a paper for Jerseymen, made by Jerseymen, but it is a newspaper in the widest sense of the term. It contains each day more news of the world in general than any afternoon paper printed in New York or Philadelphia, in addition to making a specialty of all matters of importance in the State.

BETTER THAN EVER IN 1903. The facilities of the NEWS for the production of a great newspaper have been largely increased in the past year and many improvements have been made. But in the coming year greater progress than ever before is promised. New features are being added constantly, which make the NEWS more and more attractive as a newspaper for the home.

INDEPENDENT IN POLITICS. The NEWS is absolutely independent in politics, and is always the champion of every measure which has for its object the greatest good to the greatest number.

Its reports of the Legislature are full, but discriminating. Uninteresting details of the routine work are eliminated, and attention is devoted to the important bills presented, and the bearing of all these measures as related to the welfare of the people is made public. A special study of the political situation is made and unbiased reports are given. The enviable reputation that the NEWS has held in the past in this regard will be maintained in the future.

TERMS OF SUBSCRIPTION:
The EVENING NEWS, by mail, $5 a year, or 50c. a month.
The SUNDAY NEWS, by mail, $1.50 a year.
The EVENING NEWS and SUNDAY NEWS, by mail, $6.50 a year, or 60c. a month.

The **News** is delivered by newsdealers and carriers in all towns in Northern New Jersey and all along the Jersey coast, at 10 cents a week for the evening paper and 3 cents a copy for the Sunday edition.

Circulation of the NEWS Over 50,000 a Day.

AN ILLUSTRATED PASSION

By CLINTON DANGERFIELD

Copyright, 1902, by McClure's Newspaper Syndicate

"And so," concluded Thomas Fontelle, "I would marry Yvette and be son to you."

"Son!" hissed old Matthieu. It was an unfortunate word. "Yes, yes! You think—you—to take my son's place—but you never shall! Take thyself off. Thou shalt never marry Yvette. No man shall be a son to me now that my Jean is dead!"

Expostulations proved unavailing, and in the little known village of St. Leger, between Vevey and Blonay, there were at least two sad hearts—Yvette's and her blue eyed lover Thomas'. That evening they stood together gazing sadly at the house pictures around them, for once taking neither pride nor interest in the remarkable drawings with which M. Alfred Beguin is good enough to decorate his neighbors' dwellings, for St. Leger is probably the one illustrated village in the world, and tourists, those few who know of it, study the village as one might the pages of a magazine.

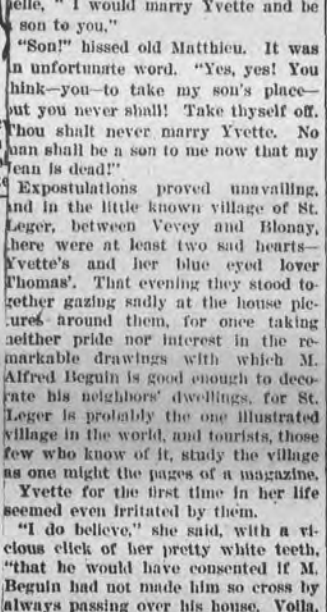
Yvette for the first time in her life seemed even irritated by them.

"I do believe," she said, with a vicious click of her pretty white teeth, "that he would have consented if M. Beguin had not made him so cross by always passing over his house. Voila, we are not at all illustrated! Oh, Thomas, if thou couldst only paint!"

"'Tis woman's work," said Thomas shortly. "A man belongs in the field. Foi d'un homme, Yvette—I think I will enlist."

"No, no, no!" pleaded the girl, with the ready credulity of her sex in masculine threats of wandering afar. "Wait! We will find a way. Look, Thomas, there is a new tourist! See! He gazes at the pictures! He is coming this way. What a kindly face!"

It must be confessed that even the gloomy Thomas was moved to some return of cheer by the gracious presence of the stranger who now came up to them and began asking about the spirited design on the wall near them. Finally he inquired where they dwelt, and some remark of his concerning the



THE WHOLE VILLAGE TURNED OUT TO SEE HIM PAINT.

absence of decorations there, coupled with his sympathetic tones, made Yvette suddenly inform him how sore her father felt concerning the omission, yet how he was too proud to make any advances.

"And he could not now if he would," she added, sighing, "for M. Beguin is away at present."

"And is that why you look so sad, pretty maid?" returned their new friend. "There were tears on your lashes when I came up."

A second's hesitation and the unhappy love tale came out.

"If he was only illustrated," sobbed Yvette, "he would regain good humor to Thomas."

"And do you think nothing but that would move him?" inquired the stranger.

"Alas, no! But, oh, if I could only move M. Beguin to do it, do you know what he should paint on our cottage? He should paint Jean," said Yvette breathlessly, "my dead brother Jean, and he should paint Thomas standing beside him, and they would be hand in hand, and then father would be obliged, yes, obliged, to see it was like a command for our marriage."

"No such luck," observed Thomas [illegible], adding like a Greek chorus [illegible] "I shall enlist."

[illegible] say that again," implored [illegible] "Ah, me, if monsieur could [illegible]nt—monsieur, who has been so [illegible]hetic!"

[illegible]d smile crossed the stranger's [illegible]have been told," he said kind[illegible]many even[illegible] [illegible]saw something of paint[illegible]taurant fea[illegible]e and I will do my [illegible] to be seen, and even bouga[illegible] ready made. White broadcloth is so far the smartest thing, though velvet, lace and more or less spangled fabrics have played a conspicuous part. From this on canvas, etamine, voile, barege, nun's veiling, grenadine and lace will be more in evidence. And lace and handwork will be most favored as trimmings. Tiny tucks, ajour stitchings and any amount of embroidery, all these go to make the success of these lovely dresses. Add to these lace, any amount of it, and there you are. Such dresses are high at the neck, with or without a stock, though the sleeves and yoke are often transparent.

Fringe has neither become a craze

wore a blouse belonging to Thomas. The whole village turned out to see him paint, some prophesying that the audacity of one who dared work in opposition to M. Beguin would meet merited failure.

The stranger painted rapidly. Sometimes he gazed in comical dismay at the increasing crowd; sometimes he looked at a quaint little tintype in his left hand which bore the features of one Jean, son of Matthieu, long drowned at sea.

Suddenly a man in the crowd shouted: "But see—it is too strange! It is Jean—the dead Jean whom he makes there!"

Next day the whole village turned out to see what the second figure would be, and, lo, it was Thomas—Thomas, whose rejection by Matthieu was too well known already. The villagers gazed open mouthed. But the surprise was completed when Yvette herself appeared on the wall also, and the tableau showed the lovers' hands being placed in each other by the benign Jean, who wore a smile beautiful to see.

The artist shook himself and descended, and his descent had barely been made before old Matthieu was upon them.

"Out of my way there!" he shouted. "Why do you congregate around an honest man's house?"

He made a plunge toward the crowd. They surged back willingly, and, lo, he was face to face with his cottage wall, and there—had the sea given up her dead?—there smiled the bold youpg sailor, his cap atilt, his frank eyes shining down on old Matthieu just as they used to shine when they came home together.

A sob of mingled pain and rapture leaped to the old man's throat. Then as he discovered the other figures Yvette, leading Thomas, crept timidly to his side.

"Who hath done this?" demanded the old peasant so sternly that Yvette's heart sank fearfully. The tourist stepped forward as though to shield her, saying:

"It was my work."

"Thine—a stranger's? And who art thou?"

"At home," said the other simply, "men call me Millais."

"I know not of thee," answered Matthieu, "but a greater than thou hath worked through thee." Then, turning to Yvette, he placed her hand within Thomas', saying solemnly:

"Wed when thou wilt, and whom the dead hath joined may no man put asunder!"

How Long Man May Live.

It was Professor Hufeland's opinion that the limit of possible human life might be set at 200 years; this on the general principle that the life of nearly all living creatures is eight times the years, months or weeks of its period of growth. That which quickly comes to maturity quickly perishes, and the earlier complete development is reached the sooner bodily decay ensues. More women reach old age than men, but more men attain remarkable longevity than women. Horned animals are shorter lived than those without horns, fierce longer than timid and amphibious creatures longer than those which inhabit the air. The pike will continue to live for 150 or 175 years, and the common turtle is good for at least a century. Passing up the scale of life to man and skipping the patriarchs, we find many recorded instances of extraordinary longevity.

The ancient Egyptians lived three times as long as the modern "lotus eaters." Instances of surprising and authentic longevity among the classic Greeks and Romans are not at all rare. Pliny notes the fact that in the reign of the Emperor Vespasian (76 A. D.) there were 124 men living in a limited area on the river Po who were 100 years old and upward. Three of these were 140 and seven others over 130. Cicero's wife lived to be 103, and the Roman actress Luceja played in public after she had celebrated her one hundred and twelfth birthday.

Curious Habits of Spiders.

The water spider carries air down with it when it dives. Dr. McCook saw one remain forty-five minutes under the water. One water spider builds a nest under the water attached to the stem of some plant and in the shape of a diving bell, with the opening downward. It fills this bell with air by taking down a bubble at a time. Coming to the surface, it incloses an air bubble under its body and instantly descends. Getting under the nest, the bubble is allowed to escape into it, and this process continues until the nest is full of air. The spider then lays its eggs there, inclosed in a cocoon, and leaves them to grow in this under water palace, safe from all flying foes. When these water spiders are seen under water, they look like little balls of shining silver. Little bubbles of air seem to cling among the hairs of their bodies. As spiders, like insects, breathe the air at little holes along the whole length of the body, they can easil. make use of these bubbles of air for breathing.—London Opinion.

Saving a Fib.

A certain young woman had been devoting her evenings to entertaining a bashful admirer. He seemed to be deeply in love, but he evidently didn't

Sciatic

Trouble From Sprain of Back.

Dizzy, Dull, Nervous, Constipated.

Dr. Miles' Nervine Completely Cured Me.

A frequent complication of rheumatism and sciatica is constipation. The use of Dr. Miles' Nerve and Liver Pills in conjunction with Restorative Nervine makes an ideal treatment for such cases. The Nerve and Liver Pills, by their tonic influence upon the nerves of the stomach, liver and bowels, cause them to act naturally. Thus the system is readily cleansed of the impurities which cause the trouble and the nourishing and soothing effect of Nervine is allowed to do its wonderful work of restoration without hindrance from the complication.

"About ten months ago I sprained my back. This ran into sciatic trouble from which I have suffered more or less ever since. This was complicated by chronic indigestion. I had sick headache every day with a dizzy, dull feeling, also quite a little confusion. Was extremely nervous and suffered much from constipation. I was influenced to try Dr. Miles' Remedies and decided to give them a trial. I procured a bottle of the Restorative Nervine and a box of the Nerve and Liver Pills. I used them as per directions and received much relief. I continued the Nervine until I had used several bottles of the same and I am glad to state that it has cured me completely and permanently. I now enjoy good health, relish my meals and can eat any kind of food without fear. I take pleasure in recommending Dr. Miles' Remedies to the public."—REV. A. B. MOWERS, Taneytown, Md.

Tired Out

"I was very poorly and could hardly get about the house. I was tired out all the time. Then I tried Ayer's Sarsaparilla, and it only took two bottles to make me feel perfectly well."—Mrs. N. S. Swinney, Princeton, Mo.

Tired when you go to bed, tired when you get up, tired all the time. Why? Your blood is impure, that's the reason. You are living on the border line of nerve exhaustion. Take Ayer's Sarsaparilla and be quickly cured. $1.00 a bottle. All druggists.

Ask your doctor what he thinks of Ayer's Sarsaparilla. He knows all about this grand old family medicine. Follow his advice and we will be satisfied.

J. C. AYER CO., Lowell, Mass.

An Advertising Druggist.

Druggists usually limit their advertisements to window and country displays, as they have the benefit of some of the manufacturers' announcements. A Boston druggist, however, has made a new departure by buying newspaper space, which he uses from day to day according to weather conditions, exploiting medicines which are timely. Besides the sales of such remedies he has gained public attention as a wide-awake druggist, and he says his increased trade has paid for his advertisement and more.

Stopped by a Fly.

An instance is reported of a motor car being stopped by a fly in the Department of the Marne. The motor worked very well in the first part of the journey, but began to fail toward the end, and at last stopped altogether. After a number of fruitless attempts to ascertain the cause, the driver discovered a dead fly in the tube connecting the reservoir with the carburettor. The insect had completely choked the tube, and stopped the supply of oil to the motor.—Paris Autovelo.

Butte's Great Wealth.

More wealth is produced in the small area of Butte City every year than in some whole States. The revenue from the mines—some $55,000,000—is equal to the income of the Government of Holland. The recent great progress in every department of electrical development has been made possible in large degree by the energy of these men of Butte. For the city and its environs now produce a quarter of the world's entire product of copper, about two-fifths that of the United States. A single group of mines in the heart of the city—the Anaconda—yields more than twice as much copper yearly as all Germany. Nor is the treasure confined to copper. Butte is the greatest silver-producing centre in the United States, its annual output—some $13,000,000—being nearly equal to that of the entire State of Colorado, which, next to Montana, has the largest production of all the States. And of gold Butte still yields considerably over $1,000,000 yearly.—Ray Stannard Baker, in the Century.

First Census Ways.

The original schedules of the first census are now contained in twenty-six bound volumes, preserved in the Interior Department. For the most part the headings of the schedules were written in by hand. Indeed, up to and including 1820 the assistant marshals generally use such paper as they happened to have, ruling it, writing in the headings and binding the sheets together themselves. In some cases merchants' account paper was used, and now and then the schedules were bound inside of a newspaper.—The Century.

They're Running Yet.

A lawyer was cross-questioning an Irish woman, the point under inquiry being the relative positions of the doors, windows, etc., in a house in which a certain transaction had occurred. "And now, my good woman," the lawyer said, "will you be good enough to tell the court how the stairs run in your house?" "How do the stairs run?" the witness replied. "Shure, whin I am upstairs they run down, and whin I am downstairs they run up."—Ram's Horn.

Smallpox costs France nearly $2,000,000 a year. N.Y.—14

Miss Gannon, Sec'y Detroit Amateur Art Association, tells young women what to do to avoid pain and suffering caused by female troubles.

"DEAR MRS. PINKHAM:—I can conscientiously recommend **Lydia E. Pinkham's Vegetable Compound** to those of my sisters suffering with female weakness and the troubles which so often befall women. I suffered for months with general weakness, and felt so weary that I had hard work to keep up. I had shooting pains, and was utterly miserable. In my distress I was advised to use **Lydia E. Pinkham's Vegetable Compound,** and it was a red letter day to me when I took the first dose, for at that time my restoration began. In six weeks I was a changed woman, perfectly well in every respect. I felt so elated and happy that I want all women who suffer to get well as I did."—MISS GUILA GANNON, 359 Jones St., Detroit, Mich., Secretary Amateur Art Association.

It is clearly shown in this young lady's letter that Lydia E. Pinkham's Vegetable Compound will certainly cure the sufferings of women; and when one considers that Miss Gannon's letter is only one of the countless hundreds which we are continually publishing in the newspapers of this country, the great virtue of Mrs. Pinkham's medicine must be admitted by all; and for the absolute cure of all kinds of female ills no substitute can possibly take its place. Women should bear this important fact in mind when they go into a drug store, and be sure not to accept anything that is claimed to be "just as good" as **Lydia E. Pinkham's Vegetable Compound,** for no other medicine for female ills has made so many actual cures.

How Another Young Sufferer Was Cured.

"DEAR MRS. PINKHAM:—I must write and tell you what your Vegetable Compound has done for me. I suffered terribly every month at time of menstruation, and was not able to work. Your medicine has cured me of my trouble. I felt relieved after taking one bottle. I know of no medicine as good as yours for female troubles."—MISS EDITH CROSS, 169 Water Street, Haverhill, Mass

Remember, Mrs. Pinkham's advice is free, and all sick women are foolish if they do not ask for it. No other person has such vast experience, and has helped so many women. Write to-day.

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness.
Lydia E. Pinkham Medicine Co., Lynn, Mass.

Woman's Usefulness.

By Eben E. Rexford.

If you organize a village improvement society be sure to include the women in it, and give them an opportunity to carry out some of their ideas. A woman has a keen eye for the beautiful, and her knowledge of color-combinations will be of great benefit in the arrangement of flowering plants. But her usefulness will not be confined to the aesthetic features of the undertaking. Women can be as practical as men are. In Green Bay, Wisconsin, certain lines of street work have been put into the hands of a committee of prominent women with most satisfactory results. They not only plan, and plan wisely, but they execute, and execute thoroughly.

It is a most excellent plan to interest the children in this work also. They will bring a great deal of enthusiasm to the performance of their share of it, and take pride in living up to the responsibility placed upon them. It will be good training for them. Bear in mind this fact—that the greatest measure of success is almost always the result of the widest, heartiest co-operation. Get everybody interested, if possible, and keep them interested by giving them something to do. Make active members of everyone in the organization.—Lippincott's Magazine.

The Penalties of Prominence

By Sara Yorke Stevenson.

There is a growing, if unexpressed, belief pervading every sphere of our social structure that as the State is entitled to levy a tax in exchange for the comforts secured by them while living under its protection, so is the community entitled to tax every citizen who has achieved intellectual distinction, in exchange for such benefits as he may derive therefrom. This view is no doubt correct, but taxation is recognized as legitimate only in so far as it is kept within just limits, and to-day an individual's talents are as grudgingly admitted to be his own as is his wealth. No sooner does a man display a capacity above that of the average than he becomes a target for the steady and diversified demands of his fellow-citizens. Here a dignified and deeply learned Shakesperean scholar is dragged out of his retreat to read for the benefit of a school of art needle-work—and he may deem himself fortunate if a preface extolling the school's achievement is not also exacted of his good nature—there a former Ambassador is torn from his distant Western haunts and gently but firmly brought to an Eastern church hall to talk about the Spanish War to an audience of messenger boys. Nor does it make much difference if he knows but little of Spain and if his career has led him exclusively through paths of peace. He is a personage. The Spanish War is the topic of the day. The people wish to see and hear him; it becomes a public duty. It must pay the tax levied upon his prominence. Indeed, little discrimination is made by the new tyrant as to his victim's qualification for the task imposed upon him. Whether he is a savant, a litterateur, a statesman, an actor, a journalist, or a diplomat, every man of note, unless he consistently surrounds himself with a frigid atmosphere of chilling selfishness, will sooner or later find himself a slave.—Lippincott's.

Modern Science Proves the Bible True

Perhaps the most remarkable event in the history of modern Christianity is the unexpected confirmation of Bible truths from the hands of what seemed to be its arch-enemy, Modern Science.

The pick and spade of modern scientific investigations have come to the rescue. Parts of the old Biblical world have been opened up, and we now find ourselves face to face with the veritable contemporaries of Daniel, Moses, Joseph, Abraham.

Within the last two decades the excavator has been actively engaged uncovering a few cities in the land of Eden, the home of Abraham. The University of Pennsylvania is excavating Nippur, the Biblical name of which is Calneh (Genesis x., 10); the French are excavating Tello, a city which flour- [illegible] the Germans are at work upon the tem- [illegible] city of Babylon.

[illegible] Babylonian legends which so closely re- [illegible] Creation, Eden, and the Deluge belongs to this country. The Deluge story, for instance, as recorded by the Babylonians is strikingly similar to the Old Testament, even in minor details. Atrachasis, the Babylonian Noah, is commanded by the gods, after they had decreed a flood, to build a ship or ark; to pour pitch over the outside and the inside, and to take the seed of life of every kind into the ship. When it was ready, Atrachasis embarked with his family, servants, possessions, cattle and beasts of the field, and closed the door. The heavens rained destruction for six days and nights. The winds raged, the floods and storm devastated, until the whole of mankind was turned into clay. The ship grounded on a mountain of Nizir. After seven days a dove is sent forth; but it returned, as a resting place it did not find. He then sent forth a swallow; but it also returned. Lastly a raven is let go, which did not turn back. Everything is then sent forth to the four points of the compass. An altar is erected and sacrifices offered. The gods smelt the sweet savor, and gathered like flies about the sacrificer, after which it is decided that, instead of a deluge, wild beasts and famines shall diminish mankind because of its sins.

A number of the tablets containing these legends were written about the time of Abraham.—Woman's Home Companion.

Conventionality Limits the Individual

By Margaret Stowe.

It is noticeably evident that common sense and broader thought are gradually doing away with the social conventionalities in life.

We have come to realize that to conform to rules and regulations that have no sensible reason for existing means limiting ourselves to a very small circle of thought and action which in so doing make us lose our individuality—we become colorless.

We will not mention the conventionalities of dress so much as the absurdness of some of the conventionalities of action, such as the newest fashion in walking, handshaking, bowing and other nonsensical rules to be conformed to at home and at social functions.

Let us all try to be original and not monotonous. Is there anything more monotonous and absurd than the actions of a roomful of men and women standing in a fashion-prescribed posture shaking hands either high in the air or low down, according to the latest whim of this erratic rule of Dame Fashion?

The minds of these same people are so taken up with the fear of forgetting themselves or these little rules that their conversation, for lack of real exercise, deteriorates into foolish, senseless chatter.

Is it the lack of courage that stands in the way of individuality—courage to break away from such inane existence and act one's true self? Then mothers should cultivate courage and strength of conviction in their children.

Bring Mary Smith up to be Mary Smith and not to resemble, so closely that you cannot tell one from the other, a following of marionettes worshipping at the feet of Fashion.

The question is asked, "Why don't girls marry?" The distinguishable ones do marry—those who are beautiful or magnetic in some way, whose characters have some definite coloring and who can make themselves in any way conspicuous, not in any undesirable sense, but prominent in character or individuality.

Men are going to choose the girls they can see; those who are completely negative, unnoticeable, colorless, formless, invisible are left behind.

Make the youth of to-day realize that a disposition to imitate a fashion or conform to senseless rules set by others is always a sign of inferior intellect and rudimentary taste.

The time is coming when you will not consider it anything of a compliment to have it said that you follow a flock of fashionable imitators.

Your life, your actions, your manners, should be unique. What you do and the way you do it should concern you, and not what others think.

Get rid of artificiality and allow people to detect the precise man you are. Don't be afraid of being criticised because you dare to stand forth individual. Be one, and be natural in your actions. Emerson says, in [illegible] wood- conformity and the criticism that usually follows the lack of it [illegible] on high and what you have already done singly will justify you [illegible] barn, granary, everybody in society reminds us of something else, or of [illegible] well, fruit trees. Character, reality, reminds you of nothing else; it [illegible] Half hour's ride from creation."

The Funny Side of Life.

ON THE LONG ROUGH ROAD.

Some men are born to follow
And some are born to lead;
A few are born to order,
And many are born to heed.

Fate puts us in the harness
To worry and to strive,
And each of us is longing
To crack the whip and drive.
—Chicago Record-Herald.

WHILE WAITING FOR PATIENTS.

Old Doctor—"Are you pursuing any special line of study aside from your practice?"

Young Doctor—"Oh, yes! I am experimenting to find out how little food is necessary to support human life."—Puck.

NO SUBSTITUTE.

Little Elizabeth was impatiently demanding a piece of bread and butter. Her mother was busy and said:

"Have patience, Elizabeth!" To which Elizabeth replied:

"I don't want patience. I want bread and butter."—Little Chronicle.

COMPULSORY.

"Are you doing anything for your cold?"

"I sneeze whenever it wants me to."—New York Journal.

DO YOU BLAME HIM?

Towne—"There seems to be nothing he enjoys so much as the sound of his own voice."

Browne—"That's so, and there's nothing annoys him so much as the thought that he can't hear himself when he talks in his sleep."—Philadelphia Press.

EASILY EXPLAINED.

"Jennie," said the fond mother, "why do you throw your clothes on the floor that way?"

"Do you really want to know?" asked the precocious youngster.

"Of course."

"Well, it's because it's easier than hanging them up."—Chicago Post.

THE JUDGE WAS LITERAL.

"This young man," said the lawyer, as he pleaded for mercy for his client, "comes from a good family."

"Yes," said the police judge, "that appears to be the chief trouble. He should not have come from a good family. He should have stayed with it. Just $11.40, with costs, please."—New York Commercial Advertiser.

A MODERN ANANIAS.

Mrs. Mateland—"Henry, I wonder if you love me as much as you used to love me before we were married. You never say the pretty things to me that you did in those days."

Mr. Mateland—"That's because I love you more than I did then, dear. I love you too much now to lie to you, you know."—Boston Transcript.

HIGH PROTECTION.

"Say! Ain't it lucky that wireless telegraphy hasn't reached these parts yet!"—New York Journal.

Census Comparisons.

The differences between the cost of securing the returns from the six simple questions asked in 1790 and that of the extended inquiry made a century later, is illustrated by the per capita cost, which in 1790 was 1.13 cents, and in 1900 15.5 cents. In 1790 Virginia was the most populous State in the Union, having 747,610 inhabitants. The records of the Treasury Department show that at the first census the cost of making the enumeration in that State was $7553.90. Moreover at that enumeration the underpaid assistant marshals supplied their own blanks, an item which was of considerable importance in the days when all paper was made laboriously by hand. In 1900 the population of Maine—about 700,000—most nearly approximated that of Virginia in 1790. At the twelfth census cost of actual enumeration in Maine, including the pay of supervisors, was $34,560.90, or more than three-fourths of the amount expended for the enumeration of the entire United States in 1790, though the pay of an enumerator in 1900 did not exceed the wages of an intelligent day laborer.—W. R. Merriam, in the Century.

Slap-Dash Insurance.

There is a great increase in England of life insurance without medical examination, a system highly praised by some experts.

Broadly stated, the position of the companies which seek the business is that the benefit of selection in keeping down the death rate exhausts itself in the first few years, and thereafter the mortality is about average.

If policies were issued to the first 10,000 apparently healthy men met in the street by agents of the company, the mortality of the group would be much the same as that of 10,000 insured lives of similar ages who had passed a strict examination five years previously.

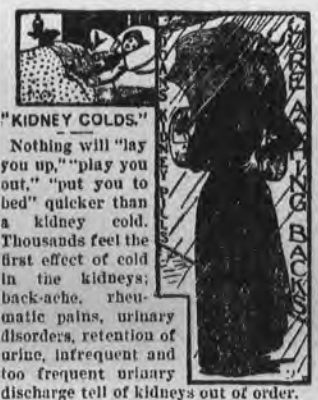
Accordingly in risks taken without examination an extra charge of $4 per $500 is made for the first year and $2 extra for the next two years, the rate after that being normal, or a proviso is made that in case of death within five years only a part of the premium is to be paid. With these precautions the business is considered conservative.—New York World.

Spain's Migatory Sheep.

There are about 10,000,000 migratory sheep in Spain which each year travel as much as 250 miles from the plains to the mountains. They are known as trans-humantes, and their march, resting places and behavior are governed by special regulations, dating from the fourteenth century. At certain times no one may travel the same routes as the sheep, which have the right to graze on all open and common land on the way. For this purpose a road ninety yards wide must be left on all enclosed and private property. The shepherds lead their flocks, which follow after and around. The flocks are accompanied by provision mules, and by large dogs to guard against wolves. The merino sheep travel forty miles to the mountains, and the total time spent on the migration there and back is fourteen weeks.

Sad State of Poetry.

For songs the use of poetry has for some time been abandoned, and words, any sort of words, have been employed instead. With patriotic songs any suggestion of poetry is held to be fatal to success. It is probable that in another ten years some member of Parliament will introduce a short bill making the production of any other sort of poem a criminal offense; and it is not impossible that the member of Parliament will be a publisher.—Macmillan's Magazine.



"KIDNEY COLDS."

Nothing will "lay you up," "play you out," "put you to bed" quicker than a kidney cold. Thousands feel the first effect of cold in the kidneys; back-ache, rheumatic pains, urinary disorders, retention of urine, infrequent and too frequent urinary discharge tell of kidneys out of order.

Doan's Kidney Pills cure all kidney ills from common back-ache to dangerous diabetes.

A. T. Ritenour, owner of the wood yard at 125 East Cork street, Winchester, Va., says: "Ever since I had la grippe I have been a sufferer from kidney troubles, which made themselves apparent in racking pains through the region of the kidneys and across the small of my back. The pains were always severe, and sometimes so sharp and biting that they compelled me to take to my bed. The kidney secre- furnished further evidence of diso- They were off color, irregular and [illegible] ful of passage. Added to this t- was an annoying weakness. Circulation of the NEWS Over 50,000 a Day.

New York City.—Shirt waists made with wide box pleats at the centre and with tucks running from the shoulders make notable features of the latest styles, and are exceedingly becoming. The very attractive May Manton model shown is made of pongee stitched with corticelli silk in self color, and worn with stock and cuffs of ecru lace bound with brown velvet, but the design suits all the season's silks, wools, linen and cotton fabrics equally well. Plain collar and cuffs can be substituted for the lace when the material requires such treatment and the lining can be used or omitted at will. The arrangement of tucks is peculiarly satisfactory, as the shorter groups provide fulness and soft folds over the bust. The plain back is seen in the greater number of new models and always is becoming.

WOMAN'S SHIRT WAIST.

The fitted lining extends to the waist line only and is closed at the centre front, but separately from the outside. The waist itself consists of the back and fronts, both of which are arranged in gathers at the waist line. The back is drawn down smoothly, but the fronts blouse slightly over the belt. At the centre is the regulation box pleat through which the closing is made. The sleeves are in bishop style with straight cuffs. The stock is novel and attractive.

The quantity of material required for medium size is three and three-quarter yards twenty-one inches wide, three and three-quarter yards thirty-two inches wide or two yards forty-four inches wide, with one-eighth yard of all-over for stock and

FASHIONABLE BLOUSE WAIST AND THREE-PIECE SKIRT

cuffs.

New Finery For the Fair.

There never was a time when so many evening dresses suitable for restaurant feasting and resort wear were to be seen, and even bought ready made. White broadcloth is so far the smartest thing, though velvet, lace and more or less spangled fabrics have played a conspicuous part. From this on canvas, etamine, voile, barege, nun's veiling, grenadine and lace will be more in evidence. And lace and handwork will be most favored as trimmings. Tiny tucks, ajour stitchings and any amount of embroidery, all these go to make the success of these lovely dresses. Add to these lace, any amount of it, and there you are. Such dresses are high at the neck, with or without a stock, though the sleeves and yoke are often transparent.

Fringe has neither become a craze nor dropped out of sight, as is usually the case. Fine deep chenille fringe outlining a very shallow shaped yoke is becoming to very good figures.

Simple looking, but far from cheap or easy to make, is a gown copied from one Lady Sybil Primrose wore at the coming-of-age ball Lord Rosebery recently gave his son. It is of cream-white accordioned chiffon, the skirt in sun-ray effect, bordered with ruche-like frillings and falling from a perfectly fitting yoke of the loveliest duchesse lace. Over the finely-pleated blouse is a bolero of the lace, which comes down to the skirt yoke at the centre front. It covers the front of the low, square-cut bodice entirely. The snug elbow sleeves are also of the lace, ending in a small flare at the elbow. A large chou of white silk ribbon is at the back of a gracefully draped girdle.

French Waists.

White cloth gowns are very smart, and for the moment what is known as champagne-colored cloth, somewhat darker than ivory white, is the favorite color, trimmed with lace and embroidery of the same color or with a touch of pale blue to make it more becoming.

There is also a return to the fad for black, and there are dozens of smart black gowns with a round or pointed lace yoke and high stock collar all in one, and with elbow sleeves of the black finished with big puffed undersleeves of lace.

The separate waist, that most useful and practical garment which is so often prophesied to be going out of fashion, and which each succeeding season takes a new lease of life, appears in an endless variety of designs. It is once again the most noticeable of all the new styles. Quite apparent is the shirt waist influence upon the waists. These, while quite too elaborate to be rightly called shirt waists, are like them in being made without lining or bones, and with a certain simplicity of pattern. All white materials are fashionable again, and especially the wash materials that even now are to be had in such fascinating patterns with open-work and embroidery, lines of lace insertion, or lace medallions all woven with the fabric. These are more expensive, and consequently thought smarter, with the lace or embroidery of the finest hand work. As a rule, the new waists are made to fasten in the back, all the more elaborate ones being finished in that style. The lace is in bands across the chests or in long lines. The sleeves are charming, with the fulness well below the elbow, but gathered into a band of lace or embroidery at the wrist, and large enough to allow of a little fulness at the top of the sleeve.—Harper's Bazar.

PLEATED SHIRT WAIST.

SCIENCE & MECHANICS

The United States commercial agent at Vladivostock states in a recent report that a German engineer has found new naptha ground on the eastern part of Sakhalin Island, and also a large lake filled with dry naphtha. This, he says, would be excellent material for preparing asphalt. This engineer thinks the prospects for naphtha promise to be richer than those of Baku.

The "navipendulum" is the name given to a recently invented instrument, the object of which is to enable naval architects to study the rolling of a ship on the waves. The instrument consists of two parts—a plate to which is imparted a motion corresponding to that of the surface of a wave, and a pendulum of peculiar shape, which rolls on the plate in the same manner that a ship rolls on water. An ingenious arrangement permits the pendulum to represent vessels of different size and shape.

From Canton, China, comes the announcement of United States Consul McWade that an American physician, Dr. Adolf Razlag, has discovered and demonstrated by experiment a cure for the hitherto incurable disease of leprosy. This cure receives the endorsement of Consul McWade, who declares that he has personally followed the treatment as administered to four patients, and has seen three return to their business perfectly cured. The foundation of the discovery is in baths. Sun baths, sand baths, warm and cold fresh water baths and salt water baths, together with medicated baths, are the main features of the remedy. The medicated baths include a wide range of drugs and chemicals used in various stages.

Both in France and Germany wagons and omnibuses run by electric trolley wire are now in use in at least two places, at Konigstein, Germany, and between Fontainebleau and Samois, France. The plan differs from that of ordinary trolley cars mainly in the absence of rails carrying the wheels of the vehicles. The wagons can be run over a street pavement or a country road, and can turn out to a lateral distance of about ten feet in order to pass other vehicles. In the French system the wagons are towed along by a self-propelled motor trolley running upon the wires alongside the road. In the German system trains composed of several cars or wagons can be used, the steering being effected with the front wheels of the leading car.

The whorls of hair on the coats of horses and other animals, says Dr. Walter Kidd, of the Zoological Society of London, may be called animal pedometers, because they register the locomotive activities of the animals on whose bodies they are found. The best example and the greatest number of these hairy whorls and crests are found on the domestic horse. A notable instance is the graceful feathering that extends along the hollow of the flank, dividing the trunk of the animal from the hind quarters. There are also crests and whorls on the horse's chest and other parts of its body. A study of the action of the underlying muscles explains the origin of these peculiarities in the lay of the hair, and furnishes the justification for calling them pedometers, although the analogy is, of course, merely superficial.

A Scheme to Defraud Farmers.

A lawyer whose office is not far from the City Hall is the leading spirit in a scheme which, doubtless, defrauds many farmers out of sums varying from $2 to $5. He works with a publication which circulates among the farmers. If an up-State man once subscribes, the paper continues to come even after notice has been sent to have it discontinued. Then the paper sends a bill for a year's subscription, and naturally the farmer refuses to pay.

Then the lawyer comes in. His letter-head bears the announcement that a collection agency is the sender and notifies the farmer that unless the subscription is paid a suit will be started and an example made of the debtor. Instead of beginning his notification, which is printed in imitation of typewriting, with the ordinary "Dear Sir," the lawyer writes at the top "The Blank Weekly vs. John Jones," and the tone of the circular is such that an ignorant man might be frightened into payment. Reputable publishers say that they know of the man, and that he never sues. It's just an attempt at blackmail, they declare. — New York Sun.

Historic Telegram.

T[illegible] Charles Foster, former Secretary [illegible] Treasury and former Gover[illegible]io, was a visitor at the capital, [illegible] a heretofore unpublished story [illegible] Minneapolis convention of 1[illegible] renominated Benjamin Harris[illegible] the Presidency, and of the late [illegible] McKinley's part in that conv[illegible].

Mr. Foster, [illegible] other members of General Harri[illegible]net, was at the White House [illegible] returns from the convention. [illegible]ally was anxious that Ohio s[illegible] her votes in the convention [illegible]arrison, and was much concer[illegible] when a telegram came announ[illegible] that "Ohio casts one vote for Ha[illegible] and forty-five for McKinley, who [illegible] chairman of the Ohio delegation:

The answer soon came b[illegible]ed by McKinley himself:

"The Ohio delegate who [illegible] General Harrison was William [illegible]ley, Jr."—Washington Post.

DAN GROS REST — Loco.

"Pe-ru-na is an Excellent Remedy---I am as Well

HON. DAN. A. GROSVENOR, OF THE FAMOUS OHIO FAMILY.

Hon. Dan. A. Grosvenor, Deputy Auditor for the War Department, in a letter written from Washington, D. C., says:

"Allow me to express my gratitude to you for the benefit derived from one bottle of Peruna. One week has brought wonderful changes and I am now as well as ever. Besides being one of the very best spring tonics it is an excellent catarrh remedy."—DAN. A. GROSVENOR.

In a recent letter he says:

"I consider Peruna really more meritorious than I did when I wrote you last. I receive numerous letters from acquaintances all over the country asking me if my certificate is genuine. I invariably answer yes."—Dan. A. Grosvenor.

A County Commissioner's Letter.

Hon. John Williams, County Commissioner, of 517 West Second street, Duluth, Minn., says the following in regard to Peruna:

"As a remedy for catarrh I can cheerfully recommend Peruna. I know what it is to suffer from that terrible disease and I feel that it is my duty to speak a good word for the tonic that brought me immediate relief. Peruna cured me of a bad case of catarrh, and I know it will cure any other sufferer from that disease."—John Williams.

A Congressman's Letter.

Hon. H. W. Ogden, Congressman from Louisiana, in a letter written at Washington, D. C., says the following of Peruna, the national catarrh remedy:

"I can cheerfully recommend your valuable remedy, Peruna, to anyone who is suffering with catarrh, and who is in need of a permanent and effective cure."—H. Bowen.

Mr. Fred. D. Scott, Larue, Ohio, Right Guard of Hiram Football Team, writes:

"As a specific for lung trouble I place Peruna at the head. I have used it myself for colds and catarrh of the bowels, and it is a splendid remedy. It restores vitality, increases bodily strength and makes a sick person well in a short time. I give Peruna my hearty indorsement."—Fred. D. Scott.

Gen. Ira C. Abbott, 606 M street, N. W., Washington, D. C., writes:

"I am fully convinced that your remedy is an excellent tonic. Many of my friends have used it with the most beneficial results for coughs, colds and catarrhal trouble."—Ira C. Abbott.

Mrs. Elmer Fleming, orator of Reservoir Council No. 168, Northwestern Legion of Honor, of Minneapolis, Minn., writes from 2535 Polk street, N. E.:

"I have been troubled all my life with catarrh in my head. I took Peruna for about three months, and now think I am permanently cured. I believe that for catarrh in all its forms Peruna is the medicine of the age. It cures when all other remedies fail. I can heartily recommend Peruna as a catarrh remedy."—Mrs. Elmer Fleming.

Mrs. Elmer Fleming, Minneapolis, Minn.

Treat Catarrh in Spring.

The spring is the time to treat catarrh. Cold, wet winter weather often retards a cure of catarrh. If a course of Peruna is taken during the early spring months the cure will be prompt and permanent. There can be no failures if Peruna is taken intelligently during the favorable weather of spring.

As a systemic catarrh remedy Peruna eradicates catarrh from the system wherever it may be located. It cures catarrh of the stomach or bowels with the same certainty as catarrh of the head.

If you do not derive prompt and satisfactory results from the use of Peruna write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

GOOD ROADS

"Deliver.

The Funny Side of Life.

A Paradoxical Affair.

When I am riding on the train,
In ecstasy I roar,
To think that I am going where
I've never been before:
But when I reach my station just
An hour late, I find
I've never been before
For years.—Washington Star.

A Congressman's Letter.

Congressman H. Bowen, Ruskin, Tazewell County, Va., writes:

"I can cheerfully recommend your valuable remedy, Peruna, to anyone who is suffering with catarrh, and who is in need of a permanent and effective cure."—H. Bowen.

LIVER TONIC
Cascarets
CANDY CATHARTIC
BEST FOR THE BOWELS
10c. 25c. 50c.
ALL DRUGGISTS
NEVER SOLD IN BULK

CURE all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow complexion and dizziness. When your bowels don't move regularly you are getting sick. Constipation kills more people than all other diseases together. It is a starter for the chronic ailments and long years of suffering that come afterwards. No matter what ails you, start taking CASCARETS to-day, for you will never get well and be well all the time until you put your bowels right. Take our advice; start with CASCARETS to-day, under an absolute guarantee to cure or money refunded. 488

GUARANTEED TO CURE: Five years ago the first box of CASCARETS was sold. Now it is over six million boxes a year, greater than any similar medicine in the world. This is absolute proof of great merit, and our best testimonial. We have faith and sell CASCARETS absolutely guaranteed to cure or money refunded. Go buy to-day, two 50c boxes, give them a fair, honest trial, as per simple directions, and if you are not satisfied, after using one 50c box, return the unused 50c box and the empty box to us by mail, or the druggist from whom you purchased it, and get your money back for both boxes. Take our advice—no matter what ails you—start to-day. Health will quickly follow and you will bless the day you first started the use of CASCARETS. Book free by mail. Address:

STERLING REMEDY CO., NEW YORK or CHICAGO

Spoiled His Case.

The motorman was buried in thought. He had forgotten which turn to take at the end of the street. An old gentleman tried to cross in front of the car.

The motorman suddenly emerged from thought. He helped to lift up the car so that the old gentleman could be extricated from his little difficulty.

Willing hands placed him in the ambulance. Various parts of his anatomy were then tenderly laid beside him. The car sped on.

In due course of time the case came to trial. The old gentleman wanted damages. The result seemed to be a foregone conclusion. The injured man already had arranged how he should spend the money he was going to receive, when he did a very foolish thing. He mentioned that he no longer had the pesky rheumatism in his right arm, for the simple reason that he had no right arm since the accident.

What followed? You can easily guess. The motorist put in a counter claim for services rendered. A rheumatic jury was empanelled. The defendant proved his case out of the claimant's own mouth. He received a judgment in his favor and left the court without a stain upon his character.—New York News.

Talks to Thousands.

An advertiser explains in this way his confidence in newspaper advertising: "If I could stand 10,000 men in a row and talk to each in turn, I could make sales to a large proportion. When I advertise in a newspaper of large circulation I address many more than 10,000 by simply telling my story once. I get better results than if I should talk in turn to each of the 10,000."

I do not believe Piso's Cure for Consumption has an equal for coughs and colds.—JOHN F. BOYER, Trinity Springs, Ind., Feb. 15, 1900.

Some people run into debt and then complain that they were pushed in.

PUTNAM FADELESS DYES color more goods, per package, than others.

The man who is everybody's friend is generally his worst enemy.

Suspicious.

When you begin to talk about the moon an experienced woman always gets suspicious of your intentions.—New York Press.

But one-fifth the population and one-eleventh of the area of Turkey is in Europe.

Catarrh Cannot Be Cured

With local applications, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

Tired Out

"I was very poorly and could hardly get about the house. I was tired out all the time. Then I tried Ayer's Sarsaparilla, and it only took two bottles to make me feel perfectly well."—Mrs. N. S. Swinney, Princeton, Mo.

Tired when you go to bed, tired when you get up, tired all the time—then who Why? Your blood

The executive committee of the State Home has been chosen as a special committee by the board of trustees of the State Home for Girls to inquire into the causes of the latest troubles there and the charges of ill-treatment and mismanagement brought against Mrs. Myrtle B Eyler, the superintendent. Five girls who escaped from the institution recently told of severe methods of punishment alleged to be practised.

The storage of coal at the Lehigh Valley plant at South Plainfield, the largest plant in the country, with a capacity of 32,000 tons, was begun Monday. Work at these yards has been practically at a standstill ever since the coal strike began, the yards at Perth Amboy, which have a capacity of nearly 15,000 tons less, being first stocked. The cost of handling has been reduced by machinery from nearly $1 a ton to less than ten cents a ton.

The breaking in two of a flat bottomed ferryboat on the Delaware River at Raubsville, a few miles below Phillipsburg Tuesday, caused the drowning of one man and three horses. Two other men and a horse had narrow escapes. The boat is a flat one of the old style. Nathaniel Bougher and Elmer Krietz, each had a double team. Bougher and three horses were drowned. Krietz and the ferryman, William Lanz, were carried a mile down the stream, but were finally rescued. The fourth horse broke loose and swam ashore.

Rhey Thompson, the ten-year-old son of Mr. and Mrs. Frank Thompson, of West Sixth street, Bayonne, who ran away several weeks ago, is safe at home. The boy was found on Park Row, New York, Saturday afternoon, by his father. The boy ran away with idea of making a fortune in New York. He had but little money with him, but, although the New York police were called into the search for him he eluded them until his father surprised him Saturday. The boy said he

[illegible]

Historic Bell to be Recast.

After 140 years of continuous service, says the Elizabeth Journal, the bell which has served to call the congregation of the First Presbyterian Church in Morristown to service during that long period has become disabled and sent to the Neely Bell Company of Troy, N. Y., to be recast.

The history of the bell is a traditional one, and dates back 12 years previous to the revolution. It was presented to the congregation here by the king of Great Britain, add has on it the impress of the British crown and the name of the makers, "Lister & Peck, of London, fecit."

Francis L. Whitehead, the present sexton of the church, has rung the bell since 1865, but its surroundings are different than they were when he was first employed. In the old days its position was among huge oaken beams, hoary with age, and cedar shingles riven out by hand. Now all is brick, iron stone and marble, and the oldest members of the church aver that the silvery tones are even affected by the modern change. Mr. Whitehead's predecessor rang it for 23 years, and during his incumbency the bell was cracked and had to be recast.

Mr. Whitehead is an Elizabeth man, and is a brother of William Whitehead, sexton of St. John's Church.

Before the accident it was one of the sweetest sounding bells in this vicinity, but after it was returned from the foundry the sound had changed to a sharp ring. It is the intention of the trustees to have the bell recast again, and at the same time have more silver placed in it, to give it the sweet sound that it once possessed.

During the 140 years that the bell has been used there have been only five sextons of the church. The first was Nathan Howell, and following him William Cherry, Moses Cherry, Sevalar Mulford and Mr. Whitehead.

Butte's Great Wealth.

More wealth is produced in the small area of Butte City every year than in some whole States. The revenue from the mines—some $55,000,000—is equal to the income of the Government of Holland. The recent great progress in every department of electrical development has been made possible in large degree by the energy of these men. [illegible] M. Butte. For the city and its environs now produce a quarter of the [illegible] nd to Henry entire product of copper, [illegible] fifths that of the Vulture single group of [illegible] the city—th[illegible]

A Pack of Cards.

The ordinary playing cards of today are derived from a stick game supposed to have originated in this country. Fifty small sticks are a pack. The "game" was originally for the player to divide the sticks rapidly with his two hands, the opponent guessing which hand held the larger number.

Owners of sticks spent rainy days in carving them. The Asiatics borrowed the game and carved more elaborate counters out of ivory. Those with different carvings grew to have different values. Arranging them in groups of fours made it necessary to add two to the original number. Then thin slabs of ivory began to be used.

For centuries after this all playing cards were hand painted, at first on ivory or metal, afterward on cardboard. The pictures, at first legendary heroes and ladies, gradually became the fixed, wood faced caricatures we now know, and these, coming back to America in their westward journey around the world, find our Pacific coast Indians still juggling the same kind of sticks their forefathers used.—New York World.

The Word "Starvation."

The word "starvation" was introduced into the English language by its coiner, Henry Dundas, afterward Viscount Melville. It was originally used by him in a speech in parliament on the American debate in 1775 and was immediately caught up and applied to himself in a political nickname, so that he was known thenceforward as "Starvation" Dundas."

"I shall not," such was his declaration, "wait for the advent of starvation from Edinburgh to settle my judgment."

Before the time of Dundas "starve," "starving," "starved" and "starveling" were in use, but hunger or famine represented the state of starvation.

Although this word has now an established place in our vocabulary, it was at first vigorously opposed by many, and on just grounds, as of hybrid formation. The root "starve" is old English, while the ending, "ation," is Latin. It does not appear in any English dictionaries until the year 1809.

Deep Sea Fish.

Great forests of seaweeds cover the bottom of the ocean and reach from the greatest depths to the surface. In [illegible] urchins, shells, crustaceans, starfish, turtles and millions of other living things of all kinds find their food in the equally varied plant life of the deep sea.

A curious circumstance connected with deep sea fish is that none of these has ever been brought up alive. Recent deep sea explorations reveal the fact that the ocean still contains immeasurable treasures which await development and utilization by human inventiveness. The most fertile acre of cultivated land is a sterile desert compared with one acre of the surface of the deep sea bottom.

Wet Shoes.

The usual—and the wrong way—of treating wet boots is to take them off and put them on the fender or the radiator to dry. This method spoils the boots. Too much heat cracks and hardens leather.

Another wrong way is to stand them on their soles anywhere to dry.

The proper way is to place the boots, soles upward, near enough to the fire to dry slowly and properly, but not to steam during the drying.

The soles should always be turned upward, even when the boots are only a little wet, for this way enables the air to reach the wettest part of the leather first.—American Queen.

The Colossus of Rhodes.

The Colossus of Rhodes, a bronze statue, was 105 feet high. It was made by Chares, who, aided by an army of workmen, consumed twelve years in its construction. It remained in position in the harbor of Rhodes for sixty-six years and was thrown down by an earthquake B. C. 224. It lay on the ground 894 years and was sold to a Jew for old metal. He carried away 900 camel loads, or about 720,000 pounds, of bronze.

A Transposition.

Margaret—No, you cannot stay, love. Your mother says it is absolutely necessary for you to come home.

Elizabeth—Oh, dear! I sometimes think that mother is the inventor of necessity instead of necessity being the mother of invention.—Kansas City Journal.

The Traveler's Ready Answer.

Mrs. Z.—Listen, George. The baby is saying "Oo-goo-ja-bo-oo-go." What does it remind you of?

Mr. Z.—H'm! Reminds me of a brakeman calling out stations.—Philadelphia Record.

Retentive.

Wantanno—What a memory you have! Did you ever forget anything in all your life?

Duzno (after profound thought)—Not that I can remember.—Baltimore American.

The average coffee tree in Honduras produces half a pound of beans.

Wo[illegible]

GETTING OVER IT!

Colds are easy to take but hard to cure.

A cold taken now may annoy you all winter unless properly treated.

A bottle of White Pine Balsam or Nagle's Tar and Wild Cherry taken now will relieve your cold at once and cure in a day or so.

Better keep a bottle of this remedy at hand always.

DO YOUR CHILDREN ASK QUESTIONS?
Of course they do. It is their way of learning and it is your duty to answer. You may need a dictionary to aid you. It won't answer every question, but there are thousands to which it will give you true, clear and definite answers, not about words only, but about things, the sun, machinery, men, places, stories and the like. Then, too, the children can find their own answers. Some of our greatest men have ascribed their power to study of the dictionary.
Of course you want the best dictionary. The most critical prefer the New and Enlarged Edition of
WEBSTER'S INTERNATIONAL DICTIONARY.
If you have any questions about it write us.

A LIBERAL OFFER

As an Inducement to secure New Subscribers, and for Old Subscribers to pay up, we will, until MAY 10th, 1903, give each subscriber to the REVIEW, absolutely Free, a year's subscription to the Tribune Farmer; or the REVIEW and the Tri-Weekly Tribune for the single price of that paper.

Read Our Combination Offers Below.

Most Liberal Offer Of The Year

The New York Tribune Farmer

is a national illustrated agricultural weekly for farmers and their families, and stands at the head of the agricultural press. It is a practical paper for practical farmers, helping them to secure the largest possible profit from the farm through practical methods.

It is entertaining, instructive and practically useful to the farmer's wife, sons and daughters, whose interests it covers in an attractive manner.

The regular price is $1.00 per year, but for a limited time we will receive your subscription for THE NEW YORK TRIBUNE FARMER and also for the REVIEW, Plainfield, N. J.,

Both Papers One Year for only $1.00

Send your order and money to the REVIEW.
Your name and address on a postal card to THE NEW YORK TRIBUNE FARMER, New York City, will bring you free sample copy.

Almost As Good as a Daily News-Paper

THE NEW YORK Tri-weekly Tribune

is a metropolitan newspaper for busy people, almost as good as a daily.

It is published on Mondays, Wednesdays and Fridays and contains all the most important news of The Daily Tribune, which is a guarantee of its value.

If you live in the borough or on a farm and have not time for a daily newspaper you may be kept in close touch with all important news of the world at a very low cost.

The regular price of THE NEW YORK TRI WEEKLY TRIBUNE is only $1.50 per year, but you can secure it with the REVIEW, Plainfield, N. J.,

Both Papers One Year for $1.50.

Send your order and money to the REVIEW.
Your name and address on a postal card to THE NEW YORK TRI-WEEKLY TRIBUNE, New York City, will bring you a free sample copy.

Remember, this offer holds good only until May 10, 1903, after that date the price will be raised.

MADE FAMOUS BY DICKENS.

Old Curiosity Shop, London.

WORN IN BIBLICAL TIMES

A Royal Ring Which Is Nearly 5000 Years Old.

Noteworthy is a find that has recently been made by Professor Petrie while exploring tombs of the kings of the twelfth dynasty of Egypt. This wonderful relic is the royal signet ring of

OLDEST OF ROYAL RINGS.

Usertesen I., who reigned nearly 5000 years ago, making it the oldest royal ring in the world. Its owner and wearer founded the great university of Heliopolis, mentioned in the Bible.

It was here that Moses learned all the wisdom of the Egyptians. The mummy of the king has not yet been discovered, but the recovery of this ring, it is thought, will lead to the discovery of his tomb.

The ring was authentically proved to belong to the king by the royal inscriptions on the same. It is of pure, solid gold, weighing 678 grains, and is engraved with the king's titles. It is as fresh as when it came from the royal goldsmith fifty centuries ago.

The first royal inscription at the top refers to the union of upper and lower Egypt, the water plant typifying the River Nile and its banks, while the bee is the emblem of the cultivated delta. The second title refers to the king's position as representative of the deity upon earth, "Son of the Sun," the goose being symbol for son, and the circle representing the sun; the lower framed inscriptions bear his royal name and title.

A Remarkable Cooking Apparatus.

That it may be possible to cook without fire is shown by the following physical experiment. A metallic tube filled with water is placed upon an ordinary rotary machine, put into motion by a hand lever. The tube is to be closed by a cork. As one turns the handwheel, a small wheel, connected with the former by means of a little belt, rotates simultaneously; the tube is fastened to this small wheel. In diminishing the rapid rotation of the tube by putting a wooden clamp around it so that the two sides of the clamp cause a constant friction upon the tube, the latter grows hot and reacts naturally upon the water contained

WATER BOILED WITHOUT FIRE.

therein until it begins to boil and finally throws out the cork. In this way boiling water is obtained which may be used for any purpose.

Precious Days.

Two anniversaries that a man always observes with solemnity are his wedding day and the day his rich uncle died without leaving him anything.—New York Press.

The things we do best are often the things that are not worth doing.

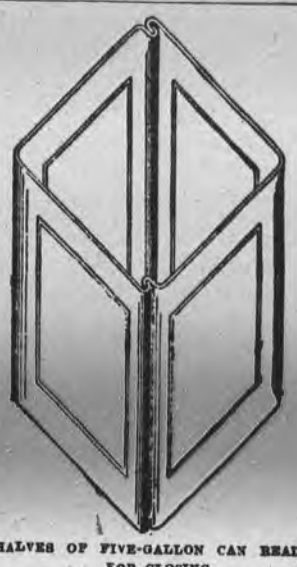
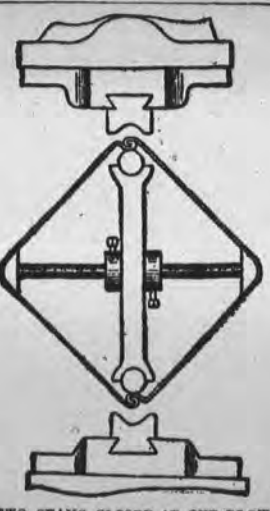
THE STAGES OF MAKING A SEAM.

quantities and at small cost. The machinery is very largely automatic, and but little skill is required of the attendant. In one of the accompanying cuts the successive operations of seaming are shown, which is done by two mechanical operations. This is the simplest form of the work, and there are a number of more complicated processes which are done also mechanically in the manufacture of articles for kitchen and household use, such as tea kettles, coffee pots and similar utensils.

It is now the custom to put up illuminating oil in five gallon cans, for shipment abroad, and as these cans are not returned for refilling it is essential that



HALVES OF FIVE-GALLON CAN READY FOR CLOSING.



TWO SEAMS CLOSED AT ONE BLOW.

they should be made very cheaply. The cans are practically square, the sides consisting of two pieces, the joints being along opposite edges. These edges are locked together by separate operations, but both seams are made tight at once in a press by the arrangement shown.

Observation Kites.

cable winch is controlled, for paying out, by a strap brake that may normally be held in contact with a brake

EXERCISE : : INSTEAD OF REST

The Frenkel System of Treating Locomotor Ataxia.

The new method of treating locomotor ataxia, advocated by Dr. H. S. Frenkel, of Heiden, Switzerland, and which is attracting the attention of the medical fraternity, is contrary to the usual procedure of giving the patient rest, working in exactly the opposite direction, says the New York Herald. The fault in the sufferer from locomotor ataxia is lack of co-ordination, failure to properly control the members of the body from the central organ, the brain. Now this being the case, Dr. Frenkel argues that rest only increases the lack of control, which is not absolute to begin with, and the proper way to overcome this gradual loss of power is to increase the power artificially.

The system is a series of exercises devised for the purpose of restoring the power of co-ordination. It is possible after the patient has had the training of an expert physician to continue the exercises at home, with the aid of a nurse or a faithful wife. He may use one room in his home as an

WALKING IN FOOTSTEPS AS A CURE FOR LOCOMOTOR ATAXIA.

exercise room, in which all of the simple apparatus is kept. The floor is to be marked with a line nine and a half inches wide, on which he is to walk. The guide afforded by the line serves to re-establish the power of guiding his steps in a straight line. If he then practices upon the narrower line it helps him further to retain his balance.

On account of the peculiarities of the affliction many scientists believe that not only certain nerves, but also certain centres of the brain are affected, and it is to restore these to activity that the exercises devised by Dr. Frenkel have been arranged. Besides those of walking on level ground and up and down stairs, other exercises in rising

PEG BOARD PRACTICE FOR LOCOMOTOR ATAXIA.

from a chair and sitting down and similar common acts of every day life are practiced constantly.

In addition thereto a number of exercises while in a reclining position are prescribed. Most of these consist in movements of the lower limbs, by which the activity of the muscles and their control are preserved. Most of them require no mechanical aids, but all must be done under supervision, so that the patient does not practice wrong. In one or two cases the doctor has devised a moving frame on which the patient practices to regain the elasticity of certain leg muscles.

An Arch-Like Cactus.

Here is a typical specimen of the so-called "Jumping Yucca" of the Arizona Desert. This plant forms a span which a horse or wagon can be sometimes driven under. A variety of these plants are found on this desert, and they are put to a number of uses. Cloth and paper are made from some and alco-

GOOD ROADS

Rural Free Mail Delivery.

THE remarkable growth of the rural free mail delivery system, and the willingness of Congress to appropriate money for extensions faster than the extensions can be made have been surprising even to the most enthusiastic friends of the system. "Why, the thing is spreading like wildfire," remarked a gentleman who had been reading up on the subject. "At this rate rural free mail delivery will be universal in a few years." At first glance this view appears to be correct, but in fact such a view is merely superficial. It takes no great amount of investigation to convince one that the system must meet and overcome some very great obstacles before it can even become general to say nothing of being universal. So far the system has sailed on smooth and open seas with favorable winds. But now it is rapidly approaching a region of rocks and snags and storms.

Dropping the maritime figure and coming back to terra firma the great obstacle to the general spread of the rural free delivery system is the miserable roads of the country. So far the system has only been extended to communities blessed with good roads. Among the many communities demanding the introduction of the system the Postoffice Department has been able to select those which have good roads, either as a result of favorable natural conditions or superior wealth. The less favored communities which have been passed by have consoled themselves with the thought that their turn would come soon. But when these disappointed communities—and their number is increasing very rapidly—find out that they are permanently barred from enjoying the benefits of free delivery on account of the condition of their roads, a cry of indignant opposition will be raised, and it will grow into an angry roar, above which it is doubtful if the friends of free delivery can be heard. When this storm breaks the beneficiaries of the system will be found to be a small minority and the disappointed a large majority of the rural population. Suppose the minority stands on its dignity and says: "What are you going to do about it?" What's to prevent the disappointed majority from wiping out the whole system and thus restoring "equality before the law?" Or suppose the minority says: "Why don't you improve your roads and thus secure the blessings of free mail delivery?" The majority can answer: "We have to overcome greater obstacles, and our means are less. Why not help us to improve our roads through general taxation?" Such a demand as this is almost certain to result from the agitation for rural free delivery of the mails. And what is there unreasonable or unjust about such a demand? The general improvement of the roads of the country is a work too stupendous to be left entirely to the small municipalities. Besides, is it not more deserving of national aid than the building of the railroads and canals and the improvement of rivers and harbors?

A proper distribution of the expenses of general road improvement among the nation, the States and the local communities appears to be the only practical solution of the road problem, and the road problem must be solved if rural free mail delivery is to be made general.

Automobiles and Good Roads.

There is no question that smooth, hard highways would be of immense benefit to farmers and not be merely a convenience for the owners of automobiles and bicycles. It has been shown over and over again that the farmer could draw four times as heavy loads to market with the same span of horses over a properly made road as over the average roads through even, level country. The roads ought to be made and kept in repair from local taxation by the towns and counties through which they run. But co-operation between such neighboring divisions in the matter is more difficult to secure than uniform divorce laws among the States or uniform trust legislation. One long, fine road as an object lesson might be worth even State co-operation for its effect upon other communities. If the automobile can be used to promote interest in that movement it is a good thing, but farmers are not going to vote taxes for roads which would be practically speed courses for these machine wagons, and on which it would be dangerous to drive their family carryalls.—Brooklyn Eagle.

A Permanent Argument.

In addition to the financial reimbursement brought by travel to any locality of good roads, it is an unquestionable fact that the residents profit largely by their own ability to get to and from business centres when other sections are tied up because of the impassability of the highways.

The automobile is here a fixture. It is no longer an experiment, and it is a permanent argument for road improvement. The communities that make the best of new conditions are those that ultimately will profit the most. There is no immediate danger that the automobile will crowd the horse off the road. Both are here to remain indefinitely.

Love a Shining Mark.

Death and envy and all disagreeable things love a shining mark. But whether it is better to shine and suffer or to keep dark and not have to dodge is a problem that doesn't worry many of us.—Philadelphia Telegraph.

The Funny Side of Life.

A Paradoxical Affair.

When I am riding on the train,
In ecstasy I roar,
To think that I am going where
I've never been before:
But when I reach my station just
An hour late, I find
That where I'd never been before
I have arrived behind!
—Baltimore News.

CRUEL PERVERSION.

He—"I wish to gracious I could!"—Yonkers Statesman.

HIS GOOD TASTE.

She—"Your dog was trying to bite me, sir."

He (touching his hat)—"Yes, madam; he has a sweet tooth."—Yonkers Statesman.

COMPASSION.

"I pity the poor birds that haven't even got a roof under their feet this weather."—New York Sun.

TAX ENOUGH.

She—"What would you think of a tax on bachelors?"

He—"Oh, pshaw! Don't we have to buy wedding presents?"—Detroit Free Press.

CAUTION.

Raising his hand the minister said: "I baptize thee John Henry——"

"Thay," the child interrupted, "hath thith water been boiled?" — Chicago Record-Herald.

REMEMBERED IN TIME.

Carroll—"Oh, by the way, Miss Westcott, there was something I wanted to say to you. Now what was it?"

Ethel—"Can't you think?"

Carroll—"Wait a minute. Oh, yes, I remember now. Will you marry me?"—Sacramento Journal.

SO WAGS THE WORLD.

Crabshaw—"I'm thinking of getting my life insured for $50,000. If anything happened to me that would insure your comfort in the future."

Mrs. Crabshaw—"Indeed it would, my dear. With that much money I'd be sure to capture another husband."—New York Herald.

WINS.

"Ah," she sighed, "the great men are all dead."

"But the beautiful women are not," he answered.

Then she looked soulfully up into his eyes and told him she had said it just to be contrary, and not because she thought it for a moment.—Chicago Record-Herald.

WAITING FOR THE CHANGE.

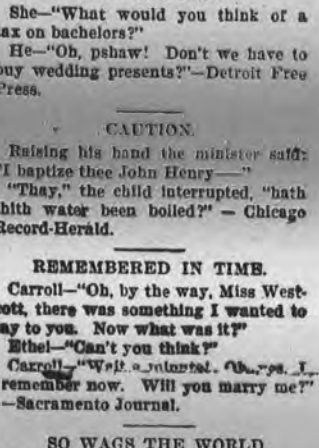
"It was too bad to keep you waiting so long for your change," said the smiling shopgirl, as she counted it out. "I am afraid I have given you a bad quarter—"

"What!" exclaimed Mrs. Tyte-Phist, in alarm.

"——of an hour."

"Oh!" she said, considerably relieved. —Chicago Tribune.

GETTING EVEN.



Doctor's Wife—"Aren't you going to take your instrument case?"

Doctor—"No; the patient is a plumber. I'm going to send back for the instruments and charge him for the time."—New York Journal.

IN A QUANDARY.

"Mary gets so excited when she reads history."

"Does she?"

"I should say she did. She's been reading English history, but she had to stop when she got to the Wars of the Roses."

"Why did she stop."

"She couldn't tell which Rose she preferred to have win." — Cleveland Plain-Dealer.

North Plainfield Weekly Review

HARRY H. WEBB
AT NORTH PLAINFIELD, N. J.
33 Somerset St. Telephone 217

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, APRIL 18, 1903.

NO ANNEXATION AT IRVINGTON.

At Irvington, this State, an election has just been held on the question of annexing that borough to the city of Newark, with the result that the Antis won out by a majority of about three to one.

A news item states that former Councilman-at-large W. L. Glorieux was a stanch anti-annexationist, and when the early returns began to foretell the defeat of the annexation scheme, the big fire whistle on his factory heralded the victory through the town. The event was enthusiastically celebrated all over town by the "Antis," and a banquet was enjoyed at Haas's Hotel.

The total vote for annexation was 273; against 614.

While 1903 is an "off" year for politics, it evidently is also an "off" year for annexation, not only in North Plainfield, but at all other places in the State where it has been voted upon.

Newark has wanted for some time to gobble up Irvington, Harrison, Orange, East Orange, South Orange, Belleville, Montclair, and everything else in sight; and at last there was a bill put through the Legislature to have Irvington annexed, provided the people would vote aye. As quickly as possible—only a week or so after the bill was signed by the Governor—a vote was arranged for, and by 614 to 273 the people said "No!" It will be just so when the other municipalities come to vote, although they have thus far staved off legislative bills leading to that point. Irvington sees no need of shouldering Newark's debts and being subject to her politicians, few of whom honor it. And of course the Newark papers don't like it. Just as in Plainfield, they see one side of the question and no other. Able men in the city of Plainfield, some of them among her best business men, have wide-open eyes and do not desire yet to take in North Plainfield and be compelled to expend here more or less city money to give us, for example, sewers such as we do not want, and at a tremendously increased expense to Plainfield over what is now necessary. And just as able men in North Plainfield know that a suburban borough—purely suburban, intended to be so by its founders, not wanting and never expecting to get special business features, such as a post office and banks, when such are already near enough and good enough—is immeasurably better off by having its own local government at the minimum of expense and with all the satisfaction that independence give. Far-sighted men in the borough see this, and are content. Grasping politicians after fatter salaries do not see it. Men who have so called "pride" in a bigger city, for the name it gives, do not see it. But we see it; our people generally see it. Newspapers outside of the borough, and politicians outside of the borough, never will see it; they are too obtuse, and have too many axes to grind. We confide in the common sense of our people, who will see in the vote of Irvington another indication of how a small, well-governed municipality is an improvement on a big city political ring and big city expenditures, every time.

DOES GOLD GROW?

Some reasons for answering this question in the affirmative are given by "Popular Mechanics," which warns the reader, however, that he must not expect to grow gold eagles from dollars. Says the writer:

It has been found that gold nuggets under favorable conditions actually increase in size. Gold is known to have grown on mine timbers which have long been immersed in mine water. In the California State Mining Bureau Museum there is a specimen of a piece of jointed cap and post taken from the Comstock, where it had been under water for years, in which gold has formed in the joints and pores of the wood. Gold is constantly being formed in rocks and veins and placers.

Just what it is that the baby gold formation feeds on to effect its growth is not known: if it were, a new and wonderfully lucrative industry might be born, and all other kinds of farming save the growing of gold might temporarily be abandoned. The formation and growth are due to mechanical and chemical action. As in the case of the animal or vegetable, existing gold has existed in some other state before assuming its present form. Waters which percolate through the earth's crust are said to contain substance from which gold is formed.

Thus gold, like the animal and vegetable, must have water in order to thrive. The gold in the water is deposited when it meets the proper precipitant. The precipitant may be an earth current of electricity, some vegetable growth or chemical in the rocks. It has been claimed that the nuggets found in placers are the formations from the waters that percolate through the gravels, and are not from decomposed quartz, as generally supposed. Those who so contend cite the fact that in the center of nuggets can be often found a small grain of iron sand. This was the nucleus around which the earth current of electricity created or deposited gold from the substance in the waters, just as it is deposited in electroplating. During long ages this influence was at work causing the gold to form around the little grain of iron ore and then grow to become a bright, shining nugget of gold much larger and purer than any ever found in the veins of ore.

THE DISGRACE OF ST. LOUIS.

Through the efforts of one man, a young lawyer, it has been shown that the city of St. Louis has been governed by one of the most corrupt rings of politicians that have existed since the days of Tweed; indeed it may safely be assumed that St. Louis was even worse governed than was New York.

Unaided, almost a stranger, this young man sent to jail men of high standing in the community—bankers, aldermen, assemblymen, state officials. He has compelled others to leave the State, and some have taken refuge in foreign countries.

Bribery and blackmail have been as open as the saloon doors were on Sundays. Public franchises have been sold and the proceeds appropriated by the ring.

Newspapers and magazines have been filled for months past with these degrading and corrupt details so that there is hardly a man in this broad land not conversant with the facts.

Last week the city election was held, and it was a grand opportunity to forever rid the city of its foul blot.

And what was the result? There are, according to count, 122,000 voters in St. Louis. At the election only 64,000 voted, and 41,000 of these were cast for the same old gang! There remained away from the polls 58,000 men.

We are at a loss for words to express our contempt for the voters of St. Louis who have allowed this election to go by default without at least making an effort to clear their beautiful city of the stigma which rests upon it.

Were it possible to enforce a compulsory voting law we would certainly favor it; and with a few more cases of the St. Louis kind, we would favor it any way on general principles.

A NEW MAGAZINE.

The Suburbanite for April has just appeared. It is published by the passenger department of the Central Railroad of New Jersey for "those who are and those who ought to be interested in suburban homes." Among the contents are an article on "Surburban versus City Life," and another by Winthrop E. Scarritt, president of the Automobile Club of New Jersey, on "Jersey, the Auto mobilist's Paradise." Other articles are, "The Suburban Home Garden," "Picturesque Cranford," "A Suburbanite to some Purpose," "Atlantic City at Easter," and "Social Life in the Suburbs."

LOUISIANA PURCHASE EXPOSITION.

The plans for the St. Louis World's Fair are on a scheme of great magnificence. The estimated cost is $30,000,000, with the expectation that the total will reach over $40,000,000 by the time the work is completed. Of this, Missouri has voted $1,000,000 as a preliminary expenditure. The cost of the Centennial Exposition at Philadelphia was $8,500,000; of the Paris Exposition at $9,000,000; and the Columbian Exposition at Chicago, $27,250,000. The states are showing much interest in the St. Louis Exposition.

THE FRUIT has not been injured nearly so much by the frost as was at first supposed. Reports from the chief fruit districts in the State indicate but little damage. The probabilities are that the fruit crop in Jersey will be nearly equal to average year.

Spring-time in Washington.

Washington is a typical Spring resort and its bustle is purely social and political. There are gathered in the Capital representatives of every nation and country, and their comings and goings are of no little interest. Then the doings of the Senate and House are features which every tourist delights in following, and these features together with the visits to the numerous public buildings keep one busy all the while one is in Washington. The Royal Blue Line of which the New Jersey is the initial road is going to operate an excursion to Washington on April 27th, and cost of tickets for the 3 days' excursion including all expenses is $12. Train leaves New York at 1 p. m., and arrives Washington at 6.10 p. m. If you want to know about the trip drop a postal to C. M. Burt, General Passenger Agent, New York City, for tour book. Free for the asking.

The Constitution in Practice.

The theory of the constitution is that the three departments of the government—the legislative, the executive, and the judiciary—are independent of one another. In practice, the government is not carried on in harmony with this theory. The system of checks and balances does not operate as its inventors intended. The president was to have had the power of selecting his subordinates; the senate, through the exercise of its power of confirmation, was to prevent the appointment of unworthy men, especially of men who might connive with the president to usurp power. In practice most of the president's subordinates are forced upon him. He usually selects after consultation with a senator, who stands for the whole senate, for he has its power behind him through a custom which has grown to be a rule of conduct, known as the "courtesy of the senate."—Henry Loomis Nelson, in Century.

Uncle Reuben Says:

People orter have de sense to grow old gracefully an' make de best of it, but it somehow happens if de conductor stops a kyar fur an old man to git off he hurts his feelings wuss dan if he had tumbled him into de mud.—Detroit Free Press.

NOTICE.

The final meeting of the Board of Chosen Freeholders will be held at the Court House
ON TUESDAY, MAY 12, 1903,
to settle up the business of the current year. It is requested that all claims be presented to the Clerk on or before May 8.

A. P. SUTPHEN, Clerk.

In accordance with the statutes of New Jersey, the members of the Board of Chosen Freeholders of the County of Somerset will meet
ON WEDNESDAY, MAY 13, 1903,
in the Court House, in Somerville, at 11 o'clock a. m., for the purpose of organization and such other business as may be presented.

April 6, 1903. A. P. SUTPHEN, Clerk.

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the REVIEW free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled. write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed, but it is necessary to have them as a guarantee that the matter is vouched for.

LEGAL NOTICES

U. S. MARSHAL'S SALE

U. S. Circuit Court, District of New Jersey } ss

Between

Execution { WILLIAM H. COONROD, Complainant, and MARSHALL C. KELLY, et als, Defendants

By virtue of the above-stated writ of Fieri Facias to me directed, I shall expose for sale at Public Vendue, on Wednesday April 8, 1903 Between the hours of twelve and five o'clock in the afternoon of said day, to wit at 2 o'clock, at the Court House in Somerville, Somerset County, New Jersey, All that tract or parcel of lands and premises situate, lying and being in the borough of North Plainfield, in the County of Somerset and State of New Jersey; and being known and designated as lots numbered 15, 16, 17, and a part of lot numbered 20, in Block B, as the same are laid down on a certain map entitled, "Map of Villa Sites in Washington Park, North Plainfield, N. J., J. R. Dunham, Surveyor", dated May 1, 1872, and which map was filed in the Clerk's office of Somerset County.

Lot No. 15 is thus described: BEGINNING at a point in the centre of Rockview Avenue, distant three hundred and twenty-five feet in a southwesterly direction along the centre of said Avenue from a point in the centre of said Avenue opposite the centre of Sycamore Avenue, and is the corner of lot No Sixteen as laid down on said map: thence along the division line between lots number fifteen and sixteen in a course of south forty-one degrees and twenty-one minutes East two hundred feet and fifteen hundredths of a foot to a point in the line of lot number twenty thence along the line of lot No. twenty in a course of South forty-three degrees and fifty minutes West twenty-six and ninety two one hundredths feet to a point and is a corner of lot number fourteen; thence along the line of lot number fourteen in a course of North fifty-four degrees and fifty minutes West two hundred and one and four one hundredths feet to a point in the centre of the aforesaid Rockview Avenue; thence along the centre of said Rockview Avenue in a course of North thirty-seven degrees and fifty-seven minutes East fifty feet; thence still along the centre of the same in course of North fifty-four degrees and twenty-two minutes East twenty-four and five tenths feet to the point or place of Beginning. Be the said measurements more or less.

Said lots numbered Sixteen seventeen and a part of lot numbered twenty taken together are bound and described as follows: Beginning at a point in the centre of Rockview Avenue distant one hundred and seventy-five feet in a Southwesterly direction along the centre of said Rockview Avenue from a point in the centre of said Avenue opposite the centre of line of Sycamore Avenue and is a corner of lot Number Eighteen, thence along the line of that lot in a course of South eighteen degrees and fifty two minutes East and extending across lot number Twenty two hundred and sixty-two and fifty-eight one hundredths feet more or less to a point in line of lot number twenty-one; thence along line of that lot South seventy-five degrees and thirty minutes West Ninty-nine and five tenths feet more or less to a corner of lot number Twenty-one; thence North twenty degrees and five minutes West along line of lot number fourteen thirty-five feet to a corner of lot number fifteen thence North forty-three degrees and fifty seconds West along line of lot number fifteen twenty-six and ninety-two one hundredths feet to a corner thereof, and also a corner of lot number sixteen; thence North forty-one degrees and twenty-one minutes West along line of lot number fifteen two hundred and fifteen one hundredths feet to a point in the centre of Rockview Avenue; thence along the centre thereof North fifty-four degrees and twenty-two minutes East seventy five feet, thence still along the centre thereof North sixty-nine degrees fifty-eight minutes East seventy-five feet to the place of BEGINNING:

Being the same premises conveyed to the said Ella Booth by Benjamin M. Day and wife by deed dated December 9th 1898, and recorded in the Clerk's office of Somerset County, New Jersey, in Book X-8 of Deeds on pages 390 &c.

Seized as the property Marshall C. Kelly, et als, defendants, taken in execution at the suit of William H. Coonrod, Complainant, and to be sold by

THOMAS J. ALCOTT, United States Marshall, District of New Jersey.
COULT, HOWELL & TENEYCK, Solicitors.

NOTICE OF ORDER TO LIMIT CREDITORS

Somerset County Surrogate's Court.

Estate Of Katharina Kirch, Deceased.

Notice is hereby given, that on the Fifth day of January, A. D. 1903, on the application of the undersigned as Executors of the will of Katharina Kirch, deceased; an order was made by the Surrogate's Court, requiring the creditors of the said Katharina Kirch, deceased, to bring in their debts, demands and claims against the said decedent, under oath or affirmation, and present the same to the subscribers within NINE months from the date of said order; and in default thereof any such creditor should be forever barred of his or her action therefor against the subscribers.

GETTING OVER IT!

Colds are easy to take but hard to cure.

A cold taken now may annoy you all winter unless properly treated.

A bottle of White Pine Balsam or Nagle's Tar and Wild Cherry taken now will relieve your cold at once and cure in a day or so.

Better keep a bottle of this remedy at hand always.

Miss Razzle-dazzle

By BALDWIN SEARS

Copyright, 1902, by the S. S. McClure Company

She was insignificantly small and plain. You could never remember what she looked like long enough to describe her nor forget her long enough to be indifferent as to how she looked.

The others were always arguing about the color of her eyes—eyes that were blue with sympathy, gray with sadness, green with mischief, brown with indifference and black, fire sparkling with anger. John Strange vowed that they were "thunder and lightning color" at that unlucky moment on the pier when he said, with a laugh:

"Miss Dalzell? Razzle-dazzle suits her better. I don't believe she ever had a serious thought. She's just a little feathery, frothy, spangled speck of humanity meant to amuse people. Razzle-dazzle! Why the name's just made for her." And he went off to sit beside Laura Lewiston and be consoled.

Laura laughed with him, of course, and by night the other girl was epitomized in John's idle words. What a name it was! Deliciously daring! Some of the girls—those who had not had cause to fear her—envied it. "You can see that she's rather proud of it," they said as she sang and laughed and danced and flirted and kept herself on the crest of the wave by main force of pride.

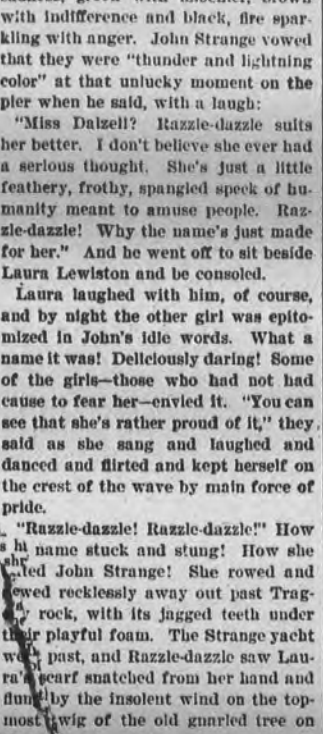
"Razzle-dazzle! Razzle-dazzle!" How Enicurus his name stuck and stung! How she called John Strange! She rowed and rowed recklessly away out past Tragedy rock, with its jagged teeth under their playful foam. The Strange yacht went past, and Razzle-dazzle saw Laura's scarf snatched from her hand and flung by the insolent wind on the topmost twig of the old gnarled tree on the rock.

Razzle-dazzle laughed as she saw it and heard the outcry. There was a spark in her eyes that afternoon as she listened to Laura's plaint that she would not have felt so bad "had it not been a gift, you know."

"But you surely expect to get it back!" exclaimed Razzle-dazzle in great surprise. "Why, any stupid fisher boy would go after it for 5 cents—that is, if nobody else dares." And she looked at John as he sat playing with Laura's glove.

John laughed easily. "I'm afraid that your brave fisher boys will ask a trifle more for the trip to the top of the rock," he said, looking up at Laura.

Razzle-dazzle smiled too. "As I shall expect no reward but the fun of the



WITH A SHOUT OF DISMAY HE PLUNGED HEADLONG OVER THE EDGE.

thing, perhaps Miss Lewiston will allow me to get it for her," she drawled as she tossed her golf ball to the dog.

"It is kind of you," answered Laura sweetly, "but Mr. Strange has promised to get it himself." The blue eyes met the green ones for a moment, then smiled confidently at John.

"I knew you meant to get it," she said when they were alone. "I couldn't resist that little prick at her ladyship's pride."

John kissed her hand in silence. He felt like a fool, however, as he left the hotel alone a little later, went across the fields, stole a boat from a private beach and rowed quickly out of sight across the bay. It was a nasty job on such a day. Though it was low tide, he could see the froth on the bowlders at the foot of the crag. He ran the boat between two rocks and sprang up the path leading to the top of the cliff, where, beckoning out over the water, the red silk scarf fluttered tauntingly.

John laughed as he maneuvered toward it. "It would have been more like Razzle-dazzle to have lost it here, where no one on earth can get it. I don't see how I can." He drew himself farther over the edge, clinging by one hand to a projecting angle of rock as he stretched forward. "I wish that girl had kept still," he added angrily as a gust of wind snatched the loose end of the scarf out of his reach. "There, Miss Razzle-dazzle. I hope you'll be satisfied."

As he uttered the order, clutching the silk, the point to which he had been clinging loosened, and with a shout of dismay he plunged headlong over the edge and fell, slipping, struggling, sliding, to the rocks below.

There was a long silence after the loose stones had ceased falling. Then the wounded man stirred, groaned and fell back. For awhile he lay quiet, striving to think clearly. All at once he started. A rill of cold water slid under him and out again. He had forgotten the tide. With infinite pain he dragged himself to the spot where his boat should have been. Already it had courtesied far beyond his reach. Overhead the gulls were startled by peals of laughter that rang round the craggy island—hysterical laughter and shouting as John, exhausted by desperate efforts to climb above the swift rising tide, signaled vainly to a fishing boat that scudded past before the increasing wind. Then night came, and the wind talked to him.

John was not afraid of death, but there were some things he was sorry for, things he would have changed had he known. He wished he had not been so unkind to little Razzle-dazzle; he hoped Laura would not blame her now; he wished—no, after all, it was better that he had not spoken, better that it had ended as it did. Laura was only amusing herself after all, as he had started to do. She would regret him very little—not enough to spoil her winter. How differently Razzle-dazzle would feel for any one she loved! He smiled, as every one smiled when thinking of her. Gradually his past stood out in perspective, and he understood it. Her dark eyes looked at him, blue and forgiving. "She was the real sort," he said to himself, as if life were all over for her too. He sighed, lifting himself by instinct as high as he could in the rising water. Every wave broke over him now. The foam looked like sea faces come up to stare at him. "I hope little Razzle-dazzle would think this the right sort of courage."

What was that? Had some one called? He stared, listening. Above the plunge and break of water, "John, John!" clear, low, as if in shame of entreating him. Laura, could it be? And yet who else? He listened, in his tense eagerness forgetting to answer, fearful that a motion would dispel the strangely sweet fancy.

"John! O-o-o-o-h, John! Where are you, John?" And Razzle-dazzle's face, eager, passionately searching and stripped of all its scorn, glimmered out of the darkness close at his side.

* * * * * * *

"Don't say you love me because—just because I—I have"— she began in a harsh, gasping sob when he tried to tell her. "If you knew how I had wanted you to die, and then I had to come after you, because—because—oh, you mustn't forgive me! Hate me! I deserve it!"

But John laughed even there. "If I should hate the one who loved me enough to risk her life for mine, what can I give the one who loved me only well enough to risk my life for this bit of silk?"

And the scarf itself was the answer.

Absurdities of Lovers' Language.

Lovers have a language of their own.

"I would I were thy bird," sighs Romeo.

"Sweet, so would I," returns Juliet, "yet I should kill thee with much cherishing."

From the sublime to the ridiculous:

"Plumpetty itty partridge, who does 'oo love?" demands a stricken swain of his inamorata in one of Marion Crawford's novels.

"Zoo!" returns the fat little woman, with a smile which, in the author's graphic words, "went all around her head like the equator on a globe."

This sort of thing is all very well when the bride is a rosy little dumpling of a woman. The worst of it is that engaged couples of every age and of the most unromantic appearance adopt the same style.

"What shall I call you, my dearest own?" asks an Adonis of fifty, gazing with yearning tenderness on his bride.

"Call me Birdie, nothing but Birdie!" chirrups the lady whose weight might turn the scale at 200 pounds, as she nestles lovingly to his side.

And so on ad infinitum, we will not say ad nauseam, till the soul of the unregarded old curmudgeon of a bachelor within hearing turns faint within him.—Exchange.

Gorgeously Colored Toucans.

It is more especially the gaudy coloration of the toucans which renders them most typical in many ways of the habits and manners of the larger fruit eating birds. Flower haunting and fruit eating creatures, such as butterflies, humming birds, cockatoos and lories, almost always develop in the long run a marked æsthetic taste for pure and brilliant colors, which reacts at last through sexual selection on their own appearance.

Accustomed to seek their food among bright tropical blossoms or gaudy southern forest fruits like mangoes and star apples, these feathered æsthetes acquire a hereditary love for color which influences them in the end in the choice of their own brilliant mates and so secures the perpetuation of the most beautiful and most gorgeous of their kind by unconscious selection. And in this respect the toucans are absolutely unsurpassed in the whole range of nature. Their large and richly colored bills, their delicate breast plumage and their bodies generally present a variety of melting tints and contrasted hues nowhere else to be found in equally close display on any other animal.—Cornhill Magazine.

Sciatic

Trouble From Sprain of Back.

Dizzy, Dull, Nervous, Constipated.

Dr. Miles' Nervine Completely Cured Me.

A frequent complication of rheumatism and sciatica is constipation. The use of Dr. Miles' Nerve and Liver Pills in conjunction with Restorative Nervine makes an ideal treatment for such cases. The Nerve and Liver Pills, by their tonic influence upon the nerves of the stomach, liver and bowels, cause them to act naturally. Thus the system is readily cleansed of the impurities which cause the trouble and the nourishing and soothing effect of Nervine is allowed to do its wonderful work of restoration without hindrance from the complication.

"About ten months ago I sprained my back. This ran into sciatic trouble from which I have suffered more or less ever since. This was complicated by chronic indigestion. I had sick headache every day with a dizzy, dull feeling, also quite a little confusion. Was extremely nervous and suffered much from constipation. I was influenced to try Dr. Miles' Remedies and decided to give them a trial. I procured a bottle of the Restorative Nervine and a box of the Nerve and Liver Pills. I used them as per directions and received much relief. I continued the Nervine until I had used several bottles of the same and I am glad to state that it has cured me completely and permanently. I now enjoy good health, relish my meals and can eat any kind of food without fear. I take pleasure in recommending Dr. Miles' Remedies to the public."—Rev. A. B. Mowers, Taneytown, Md.

CONGRESSMAN WILBER SAYS

(To The Pe-ru-na Medicine Co., of Columbus, O.)

"Pe-ru-na is All You Claim For It."

Congressman D. F. Wilber, of Oneonta, N. Y., writes:

The Peruna Medicine Co., Columbus, Ohio:

Gentlemen—"Persuaded by a friend I have tried your remedy and I have almost fully recovered after the use of a few bottles. I am fully convinced that Peruna is all you claim for it, and I cheerfully recommend your medicine to all who are afflicted with catarrhal trouble."—David F. Wilber.

Pe-ru-na a Preventive and Cure for Colds.

Mr. C. F. Given, Sussex, N. B., Vice-President of "The Pastime Boating Club," writes:

"Whenever the cold weather sets in I have for years past been very sure to catch a severe cold which was hard to throw off, and which would leave after-effects on my constitution the most of the winter.

"Last winter I was advised to try Peruna, and within five days the cold was broken up and in five days more I was a well man. I recommended it to several of my friends, and all speak the highest praise for it. *There is nothing like Peruna for catarrhal afflictions. It is well nigh infallible as a cure, and I gladly endorse it." -C. F. Given.*

A Prominent Singer Saved From Loss of Voice.

Mr. Julian Weisslitz, 175 Seneca street, Buffalo, N. Y., is Corresponding Secretary of The Sangerlust, of New York; is the leading second bass of The Sangerlust, the largest German singing society of New York and also the oldest.

In 1899 The Sangerlust celebrated its fiftieth anniversary with a large celebration in New York City. The following is his testimony:

"About two years ago I caught a severe cold while traveling and which settled into catarrh of the bronchial tubes, and so affected my voice that I was obliged to cancel my engagements. In distress I was advised to try Peruna, and although I had never used a patent medicine before, I sent for a bottle.

"Words but illy describe my surprise to find that within a few days I was greatly relieved, and within three weeks I was entirely recovered. I am never without it now, and take an occasional dose when I feel run down."—Julian Weisslitz.

If you do not derive prompt and satisfactory results from the use of Peruna write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

The Grass Stove.

"Did you ever see a grass stove?" asked a drummer.

"What do you mean by a grass stove?"

"One that uses grass for fuel. I visited a Mennonite village in February, and there I saw several of these stoves. They are cheap enough, if you live in the country, where grass is plentiful, but, of course, in town they would be of no use.

"The grass stove is made of brick. It is six feet high, three fet wide and five feet long. Inside are six chambers, set one above the other. The first is the ash box, the second is the fire box, the third is the cooking oven, the fourth is the smoke passage, the fifth is the hot air chamber, the sixth is the smoke passage to the chimney.

"The grass is pitched into the fire box two or three times each twenty-four hours. A great deal is pitched in. For ten minutes or so the pitching goes on. The grass, packed in the fire box, dies, becomes red hot and then for a long time radiates heat. Straw, sometimes, is used in this stove instead of grass."—Philadelphia Record.

The Ginseng Craze.

Twenty-five acres are said to comprise the commercial ginseng growing area of the United States, much of it being in two counties of New York. George Vanderbilt has planted a fine garden of the root at Biltmore. Two farmers in Ohio raised on one-third of an acre a crop that brought $15,000. A farmer in this State who had been raising cabbage at $2 a ton drove into town with a small buggy load of ginseng for which he got $1200. There are 400,000,000 Chinese, and all who can afford it use ginseng. The mystery of the root is its wide variation in price. While some sells readily at $4 a pound there are species that bring $100 an ounce. Consul Wildman says he has seen Mandarin ginseng that was worth 135 times its own weight in silver. The regular price is from $50 to $250 an ounce. The craze has advanced so far in this country that a monthly magazine called the Ginseng Garden has been started in advocacy of the culture.—New York Press.

Half-Sick

"I first used Ayer's Sarsaparilla in the fall of 1848. Since then I have taken it every spring as a blood-purifying and nerve-strengthening medicine."
S. T. Jones, Wichita, Kans.

If you feel run down, are easily tired, if your nerves are weak and your blood is thin, then begin to take the good old standard family medicine, Ayer's Sarsaparilla.

It's a regular nerve lifter, a perfect blood builder. $1.00 a bottle. All druggists.

Ask your doctor what he thinks of Ayer's Sarsaparilla. He knows all about this grand old family medicine. Follow his advice and we will be satisfied.
J. C. AYER CO., Lowell, Mass.

The Dust of Cities.

As we approach the great centres of population, says La Nature, the quantity of dust held in suspension by the air increases enormously. According to Sir James Crichton-Browne, the air of London contains 150,000 proportional parts of dust to Paris's 210,000, while in Argyleshire, Scotland, there are only 200. The air of cities is impregnated with dust and filth. To combat their deleterious effects the streets should be freely ventilated and watered. Wind and rain are the great destroyers of dust.

The substances designated as "variable" in the composition of the atmosphere, says in comment the Sanitarian, are but feebly suggestive. From the fields the wind lifts the debris of vegetation—pollen, seeds, spores of fungi and bacteria; the dust of the soil—silica, silicate of aluminum, carbonate and phosphate of lime and peroxide of iron. In and proceeding from volcanic regions fine particles of carbon and dried mud are taken up and wafted hundreds or even thousands of miles. In and round about cities and towns the finely ground dust of the pavements, fragments of straw, hair, stable manure, debris of insects, soot, epithelia from floor sweepings or shaken from rugs, carpets and bedding, together with gases and other volatile emanations from factories, rendering establishments, abattoirs, tan-yards and compost heaps of all sorts, though not of the air are in it, in so much as to be in some degree almost everywhere present.

Many School Children Are Sickly.

Mother Gray's Sweet Powders for Children, used by Mother Gray, a nurse in Children's Home, New York, break up colds in 24 hours, cure Feverishness, Constipation, Stomach Troubles, Teething Disorders and Destroy Worms. At all druggists, 25c. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N.Y.

Take care of your friends and your enemies will take care of themselves.

$100 Reward. $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address

The successful money maker is generally a dismal failure as a spender.

The Modern Census.

"A Decennial Snap Shot of the Nation For the Benefit of All Time."

By Director W. R. Merriam.

SINCE 1790 the area of the United States has increased from 827,844 to 3,622,933 square miles; the number of counties has increased from 307 to 2867; and the total population has increased from 3,929,214 to 76,303,387, or nineteenfold. There are four States each possessing, in 1900, a population greater than that of the entire Nation in 1790, at which time two of the four were an untrodden wilderness. The number of cities with a population of 8000 or over has increased from six to 546, and the number with a population of 25,000 or over from two to 161. There are now thirty-eight cities having a population exceeding 100,000, and three of these have over 1,000,000 each. In 1900 the record of capital, wages, and value of products of manufactures rises to figures almost beyond comprehension. The capital invested was $9,846,628,564; the salaries and wages paid amounted to $2,735,430,848; and the value of products was $13,039,279,566. In agriculture the figures are almost equally impressive. The total value of farms in 1900 was $16,674,690,247, and that of agricultural products in 1899, $4,739,118,752. To gather and collate such stupendous figures, not only with accuracy, but so swiftly that the record of population in 1900 appeared as quickly as did the little report of the first census, was a task of the first magnitude. It was indeed an evolution.

Such is the modern census. It is a decennial snap shot of the Nation for the benefit of all time. Patrick Henry declared that there was but one lamp by which his feet were guided—Experience. But so important has the study of facts become that statistics presenting the facts analyzed and classified is the lamp which guides the statesman and the student of to-day.—The Century.

Thoughts on Race Suicide.

From President G. Stanley Hall's Speech on Heredity at the Sons of the Revolution Banquet.

OUR country's development in all branches of industry during the last decade is simply wonderful and cannot be paralleled in history. Yet these statistics are not altogether cheerful.

The number of offspring a race produces is the real test of its permanent prosperity.

The temptation of the day is to take out of the constitution more than it can bear—by the inflation of the ego, the intense pursuit of individualism.

Statistics show that the offspring of native-born parents has steadily decreased in ratio, so that if it were not for our great immigration our population would be diminishing alarmingly.

Excessive development of the individual beyond a certain point always means impairment of the breed.

Looking back to the day of the Puritans, is it not true that the inhospitable character of the soil and the tremendous expenditure of vitality necessary to obtain a living all through these years has overdrawn human energy and stunted our race, so that the Yankee family is dying out?

A few generations ago families of ten to twelve children were not uncommon. To-day some families have become entirely extinct.

Has not our Nation been spending too much vitality? Is it right to rob posterity by intensifying individualism to such an extent? To expend so much vitality in toil and pleasure as to threaten the race?

There seems to be something in the climate and conditions of America which "keeps us on our nerves" all the time.

Appreciate the Uses of Life.

By Margaret Stowe.

TWO of the favorite questions that children usually put to their parents are, "What are we here for? Why do we live?"

Take care that you give no light answer to these questions. Think well before you speak, for upon your words may hang the success or failure of your child's future.

I recently overheard a small tot say to another with whom she had been discussing this subject, "Mother says that we are here to improve our minds so we will know a lot when we are old."

That is quite true, but how about the heart? Don't we need to improve that, too? We must be careful not to open the door of the mind so wide that we close the door of the heart.

Say to your children, "Yes, we are here to improve our minds only in order that we gain knowledge so as to be of use to our fellow-creatures, not fellowmen alone, but every living creature."

We must cultivate the intellect, but at the same time unfold the heart qualities. Don't forget that, for one without the other is like an orchard without fruit.

Teach your child to be observant, but never unkindly critical. In criticising others we are bringing out our own quality of thought. We are showing ourselves up in a kind, strong light or a mean, weak light, as we please. Our criticisms reflect more on ourselves than on the ones they are meant for.

We often hear the expression, "It is all from one's point of view." It is the quality of thought that each one of us holds that makes the difference in the view we take of people and things.

We grown up children should not lose sight of the fact that the unfolding of the heart qualities results in kindness of thought, word and deed.

We know that it is just as easy to be kind, to think kindly, and to act kindly as the reverse and the effect on one's own mind, as well as on the minds of others, is far more beneficial. It makes life easier and more worth living.

If we forget this one great essential of character and become impatient and fault-finding with others we are placing an obstruction in the way of success.

Keep your thoughts clear, loving and charitable and you will only see the good in everything. Then you will know what a power good is in the world and how much stronger it is than evil, and when you realise that fact you can answer those two questions for your children without hesitation, and they in their turn will be brought up to be a power and help to all around them.—New York Journal.

Mars Again to the Front.

By Garrett P. Serviss.

THE planet Mars, puzzling as ever, once more demands attention and will receive it. For who can resist the attraction of a world that looks as if it were inhabited? It would be as easy to withdraw the eyes from a jungle in which a tiger is believed to be crouching.

Anybody can see Mars now, climbing up the eastern sky before midnight, lurid among the white stars and slowly growing brighter as he approaches his place of opposition to the sun, which he will reach on the night of the 28th of March, when he will be less than 60,000,000 miles from the earth.

Sixty million miles are not much, as astronomers reckon distances. A powerful telescope reduces the 60,000,000 to 60,000 at a stroke, and 60,000 miles are but a quarter of the moon's distance. So, for the purposes of telescopic examination, we shall have Mars four times nearer to us than the moon is. Sometimes with the Lick telescope they use a magnifying power of more than 2000 diameters, which would bring Mars within an apparent distance of less than one-eighth of the moon's. Unfortunately our atmosphere is not steady enough, even on Mount Hamilton, to render the view of a planet with so high a power satisfactorily clear, but, on the other hand, much lower powers will reveal many wonderful things.

This time Mars shows us his northern hemisphere, and that is a circumstance calculated to pique curiosity, for when he furnished his great sensations in 1892 and 1894, it was his southern hemisphere that he turned in our direction. In several respects the northern half of Mars exhibits a striking analogy to the corresponding part of the earth. At present, a snow-like whiteness spreads broadly around Mars' north pole, but within the next month or two this wintry realm will begin visibly to contract its boundaries, for the summer sun will be rising higher there, as here; and so the two planets, Earth and Mars, like twin performers, keeping step and time upon the stage, will show the same change of countenance. But Mars' seasons being nearly twice as long as ours, the gradual disappearance of his polar hood will continue long after the earth has begun to draw on again its Arctic nightcap.

As the polar snows of Mars melt away, those strangest mysteries of all, the so-called canals will make their appearance, and perhaps we shall hear again of curious lights visible on that other world which some persons will think are actually intended for signals to us.

This opposition is the opening of another show-period for Mars, as every two years from now until 1909 he will get nearer to the earth. In 1907 and 1909 he will be more than 20,000,000 miles nearer than he is this year; but then it will be again his southern pole that we shall see best.—Collier's Weekly.

New York City.—Blouse jackets are among the notable features of the season's styles and are much liked both for general wraps and jacket suits.

BLOUSE JACKET.

The smart May Manton model illustrated is adapted to both purposes and to all the season's suitings, to etamine, to cloth and to silk; but in the original is made of tan colored canvas with trimming of fancy braid and makes part of a costume.

The blouse consists of fronts and back and is exceedingly simple and easily made. It does not require any snug fit of a jacket and is, therefore, far less exacting and better suited to the needs of the home dressmaker. The back is plain and without fulness, but the fronts are gathered and blouse slightly at the waist. The cape is circular and fits smoothly over the shoulders, but can be omitted and the blouse left plain when preferred. Both neck and front edges are finished with a shaped band. The sleeves are the new bishop sort and are gathered into pointed cuffs. The lower edge can be finished with the close fitting peplum or with the belt only as individual taste may decided.

The quantity of material required for the medium size is six yards twenty-one inches wide, three yards forty-four inches wide or two and three-fourth yards fifty-two inches wide.

Tucked Blouse or Shirt Waist.

Shirt waists that combine horizontal with vertical tucks are among the novelties of the season and are shown in a variety of styles. The very stylish May Manton one shown in the large picture is adapted both to washable fabrics and to the many waist cloths and silks. The original, however, is made of white madras and is held by four large pearl buttons at the centre of the box pleat.

The waist consists of the tucked fronts and plain back, with the fitted foundation, that can be used or omitted as the material requires. The fronts are laid in narrow vertical tucks that extend to shallow yoke depth and in wider horizontal ones below, and are gathered at the waist line, where they droop slightly. The back is smooth across the shoulders and the fulness is drawn down snugly in gathers at the belt. The sleeves suggest the Hungarian style and are made with snugly fitting upper portions, tucked on continuous lines with the waist, and full puffs that are laid in narrow vertical tucks at their upper edges. The cuffs are oddly shaped and match the stock.

The quantity of material required for the medium size is five and one-half yards twenty-one inches wide, five yards twenty-seven inches wide, four and one-half yards thirty-two inches wide, or two and three-fourth yards forty-four inches wide.

Fabric Gloves.

While plain silks, lisles, taffetas and Berlins are as yet the most active lines in this part of the world, says the Dry Goods Economist, a feature of steadily increasing importance is the large demand for fancy effects in these. It is the open-work and particularly the lace patterns that are fast coming to the front. This development is the natural forerunner of the craze for lace mitts that is to be the feature of later business. Lace mitts, in fact, are even now moving freely, and are taken for early delivery by the smallest, as well as by the largest and most exclusive retail houses. The fad for laces permeates all parts of the dry goods market that provide for women's adornment, and there is nothing strange in the fact that plain silk, lisle and other fabric gloves should be early forced to give way to lace effects and to lace gloves and mitts.

Gray Roses in Hats.

Gray roses are among the poetic things pressed into the service of the milliner this season, and very pretty they look, too, mingled with pale pink and green buds. This novelty was seen on a big picture capeline of rose-colored straw—the pale rose of the seashell—the wide brim of which was draped with lace. At one side this brim was raised by a big posy of forget-me-nots and pink roses, and in the heart of the knot of roses was placed half a dozen gray buds. The effect was striking—in a gentle way—and very pretty.

Royal Blue.

Royal blue will be used to a great extent this season for costumes millinery.

Woman's Tucked Waist.

Waists tucked to form yoke are exceedingly fashionable and are charming in all the soft fabrics that are so much in vogue. This stylish May Manton example is made of dotted black Brussels net, over white taffeta with trimming of Chantilly lace, and is daintily attractive, but all the thinner cotton and linen materials, soft, pliable wools and silk are appropriate. The flowing sleeves are graceful and new, but those in bishop style can be substituted when preferred. The model is made over the lining, which is cut away at yoke depth to give a transparent effect, but thicker materials can be used over the entire foundation. The tucks are hand sewn, but machine or fancy stitching with corticelli silk is effective on heavier fabrics.

ONE OF THE SEASON'S NOVELTIES.

The waist consists of the fitted lining, fronts and back. Both fronts and back are tucked to yoke depth, then left free to form soft folds and are gathered at the waist line. The closing can be made at the left shoulder and under-arm seam, as in the case of the model, or invisibly at the centre front. The sleeves can be cut in full or elbow length and are tucked at their upper portions, left free below. When used in full lengths they are gathered into narrow cuffs. At the neck is a plain stock that closes at the back.

The quantity of material required for the medium size is five and one-fourth yards twenty-one inches wide, four and one-half yards twenty-seven inches wide, three and three-fourth yards thirty-two inches wide, or three yards forty-four inches wide, with five and one-half yards of lace to trim as illustrated.

TUCKED WAIST.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "DOING THE WILL OF GOD."

The Rev. John Erskine Adams Explains the Profound Purpose Which Animated the Life and Labors of Our Lord—Dangers of the Spirit of Materialism.

NEW YORK CITY.—"Doing the Will of God" was the subject of the sermon preached Sunday morning by the Rev. John Erskine Adams, pastor of the Ross Street Presbyterian Church. He took as his text John 4: 34. "My meat is to do the will of Him that sent Me, and to finish His work." Mr. Adams said:

These words express the profound purpose which animated the life and labors of our Lord. He has been engaged in that wonderful conversation with the sinful woman of Samaria, and to her He has unfolded truths which have in part at least, been kept up to this hour even from His faithful followers. Things which had been hidden from the wise and prudent are revealed unto babes. Some of the most wonderful truths that Jesus uttered were to sinners; some of the most gracious promises to those who, like Himself, were despised and rejected of men. To this outcast woman whose life was branded with shame, He not only reveals His willingness to impart the gift of God, the living water, springing up into everlasting life," but He reveals to her His divine nature and Messianic character. "I that speak unto thee am He."

The woman has gone from His presence with a new hope in her heart and a new light upon her face, and the disciples approach their Master. He must be hungry, for the fast, like the way, has been long, and they offer Him meat. He replies: "I have meat to eat that ye know not of; My meat is to do the will of Him that sent Me and to finish His work." Again does our Lord declare that man shall not live by bread alone. There is a deeper satisfaction than that which comes from gratification of the carnal nature; the satisfaction of outreach toward lost souls; men and women in famine, wayward children of the Father, and in that outreach; doing the Father's will, who desires that not one of these little ones shall perish. That philosophy, which proved too profound for those disciples is, we fear, just as incomprehensible to the commercial and materialistic spirit of this latter age. The question: What shall we eat and what shall we drink? is more imperious to-day than ever. Epicurus has his disciples still, and Mammon its shrine before which countless multitudes bow. To eat, drink and be merry, that is the world's definition of life.

I have said that the words of the text express the purpose of Christ's life. They are the motive of all His deeds; the norm by which His every action is judged. "In the volume of the book it is written of Me: Lo! I come to do Thy will, O, My God." The will of the Father was the actuating power of His incarnation. He knew no other impelling force. It was this which turned His face toward Jerusalem for His final trial and triumph; it was this which gave to Him the victory in the garden of Gethesemane, and enabled Him to put the cup to His lips and drain it to the dregs. In its glow all lesser lights paled; to its authority all His powers were brought subject, and through its power all temptations were beaten down, all personal ambitions were destroyed, earthly distinctions and emoluments rejected. His responsibility to the Father pressed upon Him when only a boy of twelve years, and deepened in His consciousness till it became the overmastering impulse of His life. Responsibility to Almighty God was Webster's definition of the profoundest thought that could come to a man; the "Father's business" was the supreme business of Jesus' life: He knew no other mission or message.

And we are speaking truly when we say that it was this supreme purpose which gave power and dignity to our Saviour's character and work. Without it, His life, however beautiful, would have been at best an aimless one. Without that purpose of doing the Father's will and manifesting His glory there would have been no coherence to Christ's deeds or teachings, but in the will of God we find all that He was and did brought to the focus; to do that will was His meat and His drink.

Now what was true of Christ is in like measure true of every one of us. What purpose was and gave to the life of our Lord, it must be and give to us. We can no more live lives of strength without the deep impulses of a noble purpose stirring within them, than can the vessel reach her destined haven without the compass or the pole star. Behind all things are the infinite purposes, Tennyson gives us the thought:

"Yet I doubt not thro' the ages one increasing purpose runs,
And the thoughts of men are widened with the process of the suns."

God takes no delight in chaos or confusion. His works are ordered according to a divine purpose. Not only His works of creation, which move in the harmony of a perfect plan, but those of redemption and grace. St. Paul asserts that His manifold wisdom is declared "according to the ternal purpose which He purposed in Christ Jesus our Lord." And if God manifests His glory in the accomplishment of His purpose in nature and in grace, and if Christ's life was lived in the light of a noble purpose, how essential is it for us to move onward in accordance with well defined plans, under the inspiration, aye, compulsion of some aim in life, that shall give to life definiteness and coherence.

Saint Bernard had over his study table in illuminated letters these words: "Bernade, ad quid veniisti?" "Bernard, why are you here?" The reference was not to the routine tasks of his life. These were determined for him. But it was: What is the animating purpose of your life? What is the meaning of your existence? Is every pleasure and every task made subservient to the one purpose; the one supreme motive of your being? Amiel in his journal records, "Life is a mass of beginnings and endings." We have all experienced his meaning. We have begun to build, but did not finish. We have laid our plans and found them broken in upon and destroyed; we have skimmed over the surface of things, but not gotten at their hidden meaning. And if we ask the reason it is evident. We have failed because no presiding purpose has woven the tangled skein into harmony and beauty. We have been dallying with purpose, we have been half willing, we have been hanging forever in the balance, and so we have been losing our grip on life.

As a man purposeth in his heart so is he. The difference between aimlessness and decision is the difference between the stagnant pool, lying motionless, thick and slimy, breathing malaria and breeding venom, and the cataract, which rushes onward, a living, moving, plunging thing, something destructive in its energy, but a thing of beauty because a thing of life. "Better an ignoble purpose even," says Dr. Pierson, "than none at all." Better to be a Saul of Tarsus, breathing out threatenings and slaughter, but breathing, than such a man as Robert Dale Owen, who confesses: "I commi[tted] one fatal error in my youth, and d[evo]ted it; I started in life [wi]thout an object, even without an ambition. My temperament disposed me to ease, and to the full I indulged the disposition. I said to myself: I have all that I see others contending for—why should I struggle? I know not the curse that lights on those who have never to struggle for anything. Had I created for myself a definite pursuit—literary, scientific, artistic, social, political, no matter what, so there was something to labor for and to overcome—I might have been happy. I feel this now—too late. The power is gone. Habits have become chains. Through all the profitless years gone by I seek vainly for something to remember with pride or even to dwell on with satisfaction. I have thrown away a life. I feel sometimes as if there were nothing remaining to me worth living for. I am an unhappy man."

The necessity, therefore, of purpose in life is apparent. And the question we are asking this morning is a permanent one: What am I making the supreme purpose of my life? The Roman made martial exploit and supreme physical prowess the desideratum of existence. He was trained in the gymnasia; he sought to develop his bodily powers to the utmost. And so he became a splendid animal. His legions were unconquerable, but his moral nature was undeveloped, and Rome fell because she was built upon power without principle and conquest without character. The apotheosis of Greece was aesthetics. She established her life on philosophy and art. She gave them to the world, but perished in the giving. Her art and her philosophy did not strike fundamentals. Greece and Rome perished because they did not grasp the divine philosophy of life; the truth that "righteousness exalteth a nation, but sin is a reproach to any people." The supreme motive of their existence was carnal, not spiritual, and so, being built upon the sands of time they perished with time. A polytheistic paganism; not too much of God, but too many Gods, that was their undoing.

And so we might particularize. What is true of nations is true of men, for it is the man that makes the nation. Any motive, other than the highest, is fatal to permanence and power. To adopt any other motto of life than that which our Lord declares in the text—to do the will of God—is to court destruction. We need this warning to-day. We pride ourselves on the fact that we are a peaceable and peaceful people. We enter upon war only as a dernier resort. We are seeking to develop the industrial side of our life. We boast of our achievements in commercial competition; that the balance of trade is largely in our favor. We point to the enormous accumulation of capital; to our ever increasing exchequer. We are the wealthiest nation on the face of the earth. Our resources are inexhaustible, our possibilities of increment unlimited. But herein lies our very peril. It needs no figures to declare that the spirit of materialism is rife as never before in our land. The domination of wealth becomes daily more cruel. The quest of riches is more and more strenuous.

Millionaires are not numbered by the scores, but by the thousands. Materialism is rampant. Its interests are supreme. It has been said that "market is beginning to dominate literature and art, instead of classic models and superior excellence. To-day men no less than things have their price, and the money value is made the standard of the worth of an object. It is true that in some quarters there is revulsion of spirit on this question. The pendulum is beginning to swing the other way. We take hope from the thought that many are studying with insight the gross materialism of the age. The prophetic voices against it are on the increase in the pulpit. Ignorant, vulgar and brutal wealth receives severer chastisements than a few decades since. Empty show, extravagant display and selfish luxury are seen by increasing numbers, according to their hollowness and iniquity. There is a growing demand for simplicity of life, for solidity, for earnest realities, for ethics, for spirituality, for better ideals, for deeper thinking and for the inner as well as the outer development of society. The leaven is working, but as yet the lump remains practically unleavened.

What, then, is the duty of the church and the Christian in this matter? Do we not need to stand where Christ stood, to make the motive of His life the supreme motive of ours? Let us remember our apostleship. We are ambassadors for Christ as truly as was Paul. Through us, through our lives, our thoughts, our actions, God is seeking to speak to the world. And what message would He have us bring? Is it a message of worldliness, of selfishness, of carnal desires, a message of skillful temporizing with His commands and skillful attempts to make His claims upon us consistent with luxury and pleasure and worldly conformity? There is no doubt that many in our churches are seeking to apply this soporific to their consciences; to be in this world and of this world, and yet belong to God. Let us remember the words of the great apostle: "Be not fashioned according to this world, but be ye transformed by the renewing of your mind, that ye may prove what is the good and acceptable and perfect will of God."

What was needed in Rome is not less needed with us here to-day. Should there come such a transformation, should there be in every life the proving of the will of God, the whitened harvest would wait no longer for reapers; the desire of our Lord, which with aching heart He expressed that day of His conversation with the woman of Samaria, would be fulfilled.

Elizabeth Fry was a thoughtless girl of seventeen years, used to all the refinements of luxury and a life of ease, wholly selfish and wholly useless, when God came to her through the voice of a Quaker preacher. She consecrated her life to God. Her meat and her drink were the doing of the Master's will and work. At the age of sixty-five she wrote: "Since my heart was touched, at the age of seventeen, I believe I have never awakened from sleep, in sickness or in health, by day or by night, without my first waking thought being how best I might serve my Lord." There could be but one result from such consecration. God sent her among the outcast, and her life became a constant benediction. The work she began in Great Britain among female convicts spread all over the continent of Europe. Letters from crowned heads, as well as from philanthropic people in the common walks of life began to pour in, inviting her to visit the prisons of other lands, and subsequently she visited Scotland, France, Germany and other countries, upon this errand of mercy, everywhere hailed as an angel of peace and good will to men. The prisons of Europe were reformed through her labors, and the laws to punish criminals were greatly modified in nearly all European countries. Indeed the reformation spread throughout the world. This was the work accomplished by one woman, who had submitted her life wholly to the will of God. She was changed from a thoughtless, frivolous girl into a woman of great usefulness and power. But the power came because the purpose came. She gave full place to God and to His plans; she put them first, and so God used and honored her. And what was true of Elizabeth Fry may be true of each one of us. We may not be called to so high a task. We may find our horizon circumscribed, and our opportunities limited, but if our meat and our drink are to do the will of God, the opportunities will be many and the results will be precious and permanent.

A Help in Trouble.

Happy is the man who has made God his refuge and strength. No real harm can ever overtake him. He has a refuge to which he can flee in every hour of temptation or trial and sorrow, a refuge never failing. No matter what the peril, or what the grief, he flies to God and all is calm and rest. God is sufficient for anything that can arise. And our refuge is always near at hand, a very present help in trouble. The Israelite had often to flee a long way to his city of refuge, but ours is always close at hand; in a moment we are there. Happy also is the man who can say, "God is my strength." If He is indeed our strength we shall win every battle that we fight. Our enemies may be too strong for us, but they are not too strong for Him, "there is nothing too hard for the Lord," so there is nothing too hard for us, if He is our strength. The trouble is that we say that He is our strength while all the time we are trusting in our own strength. If He is our refuge and strength, not only in word and in tongue, but in deed and in truth, then we shall never fear under any circumstances, not even though the earth be removed, and though the mountains be carried into the midst of the sea.

SCIENCE & MECHANICS

Electrically operated shears, guided by hand, clip the fleece from an average sheep in three minutes. The fastest operation with hand power shears requires eight minutes to the sheep. The electrical clipper has the form of the barber's clipper.

Germans who use retort coke ovens get coal-tar products worth twenty-eight per cent. as much as the coke, and save nearly all the forty per cent. of the volatile elements of the coal which are lost in the open "beehive" ovens used in America.

A curious theory is being investigated by the Paris Academy of Sciences. Human stature is supposed to be controlled by the gland in the throat under the larynx, and artificial stimulation of this gland is claimed to cause any child to grow to maximum height.

It used to be thought that a bird learned to fly, or a duck learned to swim, by watching the old birds, but Professor Morgan conclusively proved that this was not so by taking duck eggs which the duckling had almost broken through and opening it letting the small bird drop out into a basin of water and the bird started to swim around right off.

The steam turbine has lately been used in the reversed direction for compressing air, an ordinary steam turbine being coupled direct to the air turbine. This air turbine is very similar to the steam turbine, and consists, as usual, of alternate rows of moving blades and guide blades, and is driven at a high speed, each row of blades increasing the pressure, and giving a steady blast.

The coral trade of Naples last year amounted in value to $1,600,500. The banks, from which the corals chiefly come, are situated off the coasts of Sicily, Calabria, Lipari, and in the Seas of Corsica and Sardinia. The fishermen of Torre del Greco are the most expert and have the best boats. Some of these keep to the sea for several months, in all weathers, the Italian Government having wisely provided a gunboat to cruise among them, partly with a view of preserving order, but also to provide drinking water for the fishing fleet.

A new process for drying fruit and vegetables—already in use for drying hops—consists in drawing air through a girdwork of steam pipes into a chamber below the slotted floor holding the materials to be dried. Absorption of sulphurous gases is avoided, while burning is impossible. In a test at Worcester, England, samples of carrots, potatoes, sliced and shredded apples, and other fruits and vegetables, were kept at temperatures of ninety degrees to 100 degrees for six hours, reaching the ordinary commercial state of dryness. The cost of working being small, it is expected that an important new industry will soon develop in England.

Swallowed a Fortune.

Thirty years ago I was on my way home on board a Norwegian vessel from South Africa with one of my friends, Monsieur Jacquin. The vessel went down, and the two of us saved our lives by clinging to a barrel. I had saved a little metal box, containing $160,000 worth of diamonds.

The shipwreck had taken place at night, and I had nothing on but a night shirt, so that I was obliged to keep my box of diamonds beneath my one arm.

They represented my whole fortune, and I had been twelve years collecting them. I suddenly thought of a way of saving them. My arms were getting very tired, and I knew that I should have to drop the box presently. I resolved to swallow the stones one by one. They might kill me, I thought, but the risk was worth taking. I climbed up on the barrel, sat astride of it, and swallowed them. As I swallowed the last one, my poor friend Jacquin lost his hold and was drowned.

A few hours afterward I was picked up by a Dutch vessel, which brought me back to Europe. I was fearfully ill, but my life was preserved, and the week after my arrival an operation which succeeded perfectly restored $155,500 of my fortune.—New York News.

Why the Stomach Lasts.

An old question which has long puzzled physiologists is, Why does not the stomach digest itself? The walls of the stomach are in substance not unlike the food which they contain, and which is digested by the peptic fluid. The stomach is able to digest proteid food when introduced into it, yet it does not digest itself.

The reason for this has recently been shown by Weinland. Weinland found that a substance can be extracted from the cells of the stomach which, when added to proteid material, will not allow it to be acted upon by the pepsin of the stomach. This substance belongs to the class of so-called antiferments—that is, a group of bodies which by their presence inhibit fermentative actions. The presence of the anti-ferment in the cells of the stomach prevents them from digesting themselves.

After death, when this substance decomposes, the stomach will digest itself.—New York World.

London's Fire Alarm System.

In London there are 700 fire alarm call-points. They vary from 200 yards to 400 yards apart.

Chinese Oath Is Queer.

In a Magistrate's Court the other day a Chinaman said that, before testifying he would like to take the oath in the manner of his own province. The Magistrate stated there was no objection to this, and the Chinaman drew from the hip pocket of his short, stiff blue trousers a saucer.

He walked to the door, looked up at the sky with a reverent air, declaimed a long, fluent sentence in Chinese, and then broke the saucer on the ground. At the end of the testimony some one asked him the meaning of his strange oath.

"What I said," he replied, "was this: 'In the name of God Oolong I break this saucer. If, during my testimony, it comes together again, I will have told a lie, and I will then expect not to live five days longer. But if it remains broken I will have told the truth and then I will expect to escape the vengeance of the gods.' The saucer, you see," concluded the benighted heathen, "did not come together. It must be clear to you, therefore, that I told nothing but the truth. That is the advantage of our Chinese way of swearing; it proves our veracity conclusively; for, when we lie, the saucer comes together."—Philadelphia Record.

Swift Footed Dogs.

The speed of animals was being discussed by the keepers at the Zoo. John Lover said: "The greyhound is the swiftest of all quadrupeds. A greyhound can run from twenty to twenty-four yards a second. This is 100 yards in five seconds, or a mile in one minute and twenty-eight seconds for the slower dog and a mile in one minute and thirteen seconds for the faster one. Foxhounds have great speed, too. A certain French foxhound has a record of four miles in six and a half minutes. The fox terrier has, for its size, great speed, and its endurance is wonderful. These sturdy little animals will follow a carriage, an automobile or a bicycle for hours, covering twenty or twenty-five miles without any appearance of fatigue. The shepherd dog can run about fifteen yards a second, and the setter can run from eighteen to twenty miles an hour, keeping this speed up for two hours easily. Among wild animals the wolf is said to have the most endurance. I'd like to see the sport of dog racing introduced in America. The racing of greyhounds is popular among the French. Why, I wonder, don't we have it here?"—Philadelphia Record.

Grow Tall by Inoculation.

Short men cannot be made tall in spite of the fact that a learned professor, lecturing before the Royal Dublin Society on Magrath, the Irish giant, hinted that he attained his height by artificial aid—to wit, inoculation.

The theory is that if children are inoculated with an extract from the pituitary glands of growing animals they will become giants.

"The pituitary glands," said a doctor whom an Express representative interviewed yesterday, "are two small lobes in the base of the brain. Provided, in the first place that an extract from these glands was capable of stimulating growth in a child, that growth would be a morbid one. It would practically become the disease known as acromegaly.

"I have only had two cases of this disease in my career, as it is very rare. The enlargement of the bones which it causes is very irregular, and one side of the body or a limb may be much larger than the other."

Short men will, therefore, have to abandon the hope of adding a cubit to their stature by inoculation.—London Express.

TWO SIGNALS.

There are two serious signals of kidney ills. The first signal comes from the back with numerous aches and pains. The second signal comes in the kidney secretions, the urine is thin and pale or too highly colored and showing "brick-dust-like" deposit. Urination is infrequent, too frequent or excessive. You should heed these danger signals before chronic complications set in—Diabetes, Dropsy, Bright's Disease. Take Doan's Kidney Pills in time and the cure is simple.

J. F. Wainwright, of the firm of Bones & Wainwright, painters and contractors, Pulaski, Va., says: "Four or five times a year for the past few years I have suffered with severe attacks of pain in my back, caused from kidney trouble. During these spells I was in such misery from the constant pain and aching that it was almost impossible for me to stoop or straighten, and it really seemed as if the whole small of my back had given away. At times I also had difficulty with the kidney secretions, which were discolored, irregular and scalding, and I was also greatly distressed with headaches and dizziness. I used a number of recommended remedies, but I never found anything so successful as Doan's Kidney Pills. When I heard of them I had an attack and procured a box of them. In a few days the pain and lameness disappeared, the trouble with the kidney secretions was corrected and my system was improved generally. I have every confidence in Doan's Kidney Pills."

A FREE TRIAL of this great kidney medicine which cured Mr. Wainwright will be mailed to any part of the United States on application. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

Don't wait until your sufferings have driven you to despair, with your nerves all shattered and your courage gone.

Help and happiness surely awaits you if you accept Mrs. Pinkham's advice. Disease makes women nervous, irritable, and easily annoyed by children and household duties; such women need the counsel and help of a woman who understands the peculiar troubles of her sex; that woman is Mrs. Pinkham, who with her famous medicine, **Lydia E. Pinkham's Vegetable Compound**, have restored more sick and discouraged women to health and happiness than any other one person. Her address is Lynn, Mass., and her advice is free. Write today, do not wait.

Will not the volumes of letters from women who have been made strong by Lydia E. Pinkham's Vegetable Compound convince others of the virtues of this great medicine?

When a medicine has been successful in more than a million cases, is it justice to yourself to say, without trying it, "I do not believe it would help me?"

Surely you cannot wish to remain weak and sick and discouraged, exhausted with each day's work. If you have some derangement of the feminine organism try Lydia E. Pinkham's Vegetable Compound. It will surely help you.

Mrs. Emilie Seering, 174 St. Ann's Ave., New York City, writes:

"DEAR MRS. PINKHAM:—If women who are always blue and depressed and nervous would take **Lydia E. Pinkham's Vegetable Compound** they would find it the medicine they need to bring them to a more cheerful frame of mind. I was terribly worried and downcast, and was thin and bloodless. My back ached all the time, no matter how hard I tried to forget it or change my position to ease it, and the pain at the base of my brain was so bad that I sometimes thought that I would grow crazy; I had the blues so much and was always so depressed I could not seem to shake them off; half of the time I did not seem to have the courage to do my work; everything seemed to go wrong with me, and I was always worrying and fearing the worst. I began to take **Lydia E. Pinkham's Vegetable Compound.** After the first few doses a load seemed lifted from my shoulders, I felt better in every way. The blues left me and my head stopped aching; before long my back was better too, and I looked younger and stronger. I took six bottles in all, and it is with thankfulness that I acknowledge that my present good health is due to the use of **Lydia E. Pinkham's Vegetable Compound.**"

FREE MEDICAL ADVICE TO WOMEN.

If there is anything in your case about which you would like special advice, write freely to Mrs. Pinkham. No man will see your letter. She can surely help you, for no person in America has such a wide experience in treating female ills as she has had. She has helped hundreds of thousands of women back to health. Her address is Lynn, Mass., and her advice is free. You are very foolish if you do not accept her kind invitation.

$5000 FORFEIT if we cannot forthwith produce the original letter and signature of above testimonial, which will prove its absolute genuineness.
Lydia E. Pinkham Medicine Co., Lynn, Mass.

Walking the Most Wholesome Exercise.

Walking is the simplest, the most natural and the most wholesome of all exercises. No athlete ever trains for a contest, no matter what its nature may be, without walking a considerable distance in the open air each day. Many keep in vigorous health by this alone, and, no matter what other exercise you take, you must walk. But, first of all, learn how to walk. A great many people walk in an aimless, shuffling manner, and secure but little benefit from the exercise. In walking for exercise, the effect is better if the mind is directed toward some pleasurable end. Walk with consciously directed movements until you have brought every muscle under perfect control of your will. Moping along in an aimless, lackadaisical manner does little good physically and harms one mentally.

The necessity of maintaining a proper, erect position of the body must, says a writer in the Cosmopolitan, be borne in mind. Bear the weight on the balls of the feet, keep the shoulders back and down, the chest high, but do not hold the abdomen inward, as is taught by many athletic instructors. Let it be relaxed, for this part of the body should move in and out with each breath. There should be perfect freedom to breathe normally.

$3.00 W. L. DOUGLAS SHOES $3.50
UNION MADE
W. L. Douglas makes and sells more men's Goodyear Welt (Hand-Sewed Process) shoes than any other manufacturer in the world.

$25,000 REWARD
will be paid to anyone who can disprove this statement.

Because W. L. Douglas is the largest manufacturer he can buy cheaper and produce his shoes at a lower cost than other concerns, which enables him to sell shoes for $3.50 and $3.00 equal in every way to those sold elsewhere for $4 and $5.00.

The Douglas secret process of tanning the bottom soles produces absolutely pure leather; more flexible and will wear longer than any other tannage in the world.

The sales have more than doubled the past four years, which proves its superiority. Why not give W. L. Douglas shoes a trial and save money.

ROUND ABOUT JERSEY.

The heavy rainstorm of this week caused the Rahway River to overflow its banks at Cranford and flood the sewers in Riverside avenue. The streets near the river were overflowed, and the cellars of houses filled with water. The boathouses and docks also suffered, parts of them being swept away by the rushing waters.

When Miss Maud Demereset, teacher of Mine Mount District School, attempted Monday to open the building she found the door barred on the inside. She broke a window and climbed in. She found the interior of the building wrecked. Every ink bottle had been emptied upon the floor or the contents tossed on the ceiling. The stove was broken, desks marred and a coal scuttle of ashes turned over the teacher's desk. The school Bible had been torn to pieces and pages of it scattered over the room or nailed on the blackboards. It was impossible to hold school. J. E. Ballentine, district clerk of the Board of Education of Mine Mount has offered a reward for the arrest and conviction of the vandals.

A Vanishing Industry.

Whaling is one of the vanished industries of Australia. In the thirties and forties it was a very remunerative business. The first settlement in Victoria was made almost 70 years ago by the enterprising Henty Bros., from Sussex, who started a whaling station on the shores of Portland bay. They flourished there for a considerable time, but the whales were gradually frightened out of Australian waters and have now to be sought in the neighborhood of the south pole. The other day a couple of whales entered Portland bay and interested some thousands of spectators. No attempt was made to capture them, as the town of Portland no longer possesses appliances for the purpose or contemplates visits from the leviathans of the deep.—London Chronicle.

"Biography of a Snowflake."

In order to have a fair start in life a snowflake should be built up on a particle of dust. Then, if it has the good fortune to begin its career at the top of a cloud many miles above the earth, and to pass through many atmospheric strata, differing in their temperature and the amount of moisture they contain, our snowflake is very likely to become a notable individual among its kind. In a stratum of warmer air the little flake catches moisture on its tiny spicules, and when it enters a colder stratum below, the moisture is frozen, and so the flake grows. In a thawing air many flakes sometimes cohere, forming disks from an inch to two or three inches across. —Knowledge.

Irrigation in the Southwest.

There was recently begun in Texas what is planned to be the most extensive system of irrigation in the United States, for it involves the utilization of no less than 295,000 acres of land. A main canal will be constructed 100 miles in length, extending 30 miles from the town of Pecos in a southwesterly direction, crossing the Texas & Pacific railroad six miles west of Pecos, and on to Toyah lake, seven miles south of Pecos, where one of the largest reservoirs in existence is to be constructed. From Toyah lake the canal will run on and join the Williams canal 30 miles farther down, finally emptying into the Pecos river 60 miles below Pecos.—Scientific American.

Wedding Changes.

Our manners and customs have changed—nowhere more than in wedding celebrations. The early service, the heavy luncheon, the long honeymoon, the tears, the fainting fits, the bashfulness and emotion of the bride, have all vanished. Instead we have the afternoon ceremony, the tea and light refreshments, the composure and gayety of every one, including the mother of the bride (for tears are in bad taste), and, finally, the departure by motor car.—London Graphic.

Antitoxin in Austria.

By order of the Austrian government antitoxin must be sold in every drug store throughout the empire below cost. According to the official report, out of 28,000 cases of diphtheria in Austria last year treated with antitoxin 13.9 per cent. died. Out of 10,000 not treated with antitoxin 37.5 per cent. died.—London Mail.

Not the Usual Question.

Harry—What did Kate say when you proposed to her?

Frank—She said yes.

"Then she is really going to marry you?"

"Oh, dear, no! What put that into your head? The question I asked was: 'Do you prefer to remain single rather than accept me?'"—Boston Transcript.

Shocked Him.

Gussie—Yaas; Cholly cut his fingah just a twifle and now he's in an awful way.

Ascum—Don't say? Did mortification set in?

"Yaas; mortification set in when he discovahed that the blood wasn't blue."—Philadelphia Press.

Few German Colonists.

Although Germany's colonies have an area of over a million square miles —that is, five times the size of the fatherland—yet the whole number of Germans in them, apart from soldiers, is but just over 4,000. This is about a fifth of the number who annually migrate to America.—N. Y. Herald.

Getting His Money's Worth.

Clerk—Yes, sir; we'll send the coal up to-day.

Mr. Milliedollar—An' say, have it put in with them iron chutes. If I've got to pay your price for coal I want the neighborhood to know when I gets the stuff in. Savvy?—Judge.

Chinamen in New York.

The Ah Sins of Gotham appear to be steadily increasing in numbers. No doubt the Celestial population here is recruited in part by smuggling immigrants over the Canadian border; but it is also true that New York, above other American cities, is a magnet drawing queue wearers from other places in the United States. But the Chinese are here almost without exception quiet and peaceable and do no harm. Manhattan's chinatown is not a disease-breeding pesthole, as Chinese settlements are said to be in some regions of Asia and even of America. The death rate in Mott street, Pell street and the vicinity is not excessive, and most of the people in that district are in fair health. Not a few of them live to a good old age.—N. Y. Tribune.

One Phase of the Nile.

In the Shab luka pass we have one of the many instances in which the Nile has hurled itself at an opposing mountain barrier and cut its way through. In fact, it often seems to select these unpropitious places for its course, when on each side, a few miles away, there is a tolerably level, unbroken expanse of desert. For ten miles the river twists in and out before escaping to the open once more. Its current is very rapid, making it well-nigh impassable at low water because of the numerous rocks; but at the time of my descent the summer flood was well along, and all but a few of these barriers were hidden below the surface, their presence being marked only by occasional eddies.—William Gage Erving, in Century.

Politicians and Whitewash.

Once upon a time there was a politician who, through the judicious dispensing of favors, had drawn to himself many friends, with whom he formed a strong combination for mutual profit. Finally the politician was detected in irregular conduct, and his friends insisted on a thorough and searching examination by a committee of their own appointing. When the committee made its final report the politician was exonerated and highly commended for his conduct. Then, feeling more firmly intrenched than before, the politician and his friends added very materially to their mutual profits.

Moral—Politicians are not always as white as they are whitewashed.—N. Y. Herald.

To Instill Patriotism.

One hundred and fifty busts of Washington were put in the public schools of New York city last year by a citizen who believed that the patriotism of the children would be fostered by a daily reminder of the example of the first president. A similar number of busts of Lincoln are to be put in the same schools this year, to show the youth that patriotism did not die with Washington. There may be some schools in other parts of the country which could not accommodate a sculptured bust, but there is none so small that it may not find a place for pictures of Lincoln and Washington.—Youth's Companion.

How the Misunderstanding Began.

"Yes," assented the old resident, fanning herself, "there are some things about living here that are unpleasant till you become used to them. We have unseasonable weather frequently, and there are other annoyances. But," she added, "you will generally find our nights cool."

"I am not aware," rejoined Mrs. Newcome, frigidly, "that I need any night school!"—Chicago Tribune.

He Was Rich.

Hotel Proprietor—Where did you put that ugly old man who just registered?

Clerk—Give him the best in the house?

"How do you know he can afford it?"

"I caught a glimpse of his wife waiting in the ladies' parlor. She's young and pretty."—Philadelphia Press.

Uncle Sam's Fisheries.

According to the last report of the United States fish commission, Uncle Sam spent $175,000 in one year in propagating fish for the benefit of the fisheries of various kinds. The fish and eggs distributed in a year number more than 1,000,000,000.—Cleveland Leader.

Thistle-Down in China.

In China the down of the thistle is gathered and mixed with raw silk so ingeniously that even experts are deceived when the fabric is woven. It is also used to stuff cushions as a substitute for eider-down, and a very good substitute it makes.—N. Y. Sun.

To Avoid Germany.

With the object of diverting the stream of emigrants that now travels to America via Germany, the Hungarian government proposes to establish a line of steamers running between Fiume and the United States.

Disease from Dusty Shoes.

According to Dr. Pinard, of Paris, many careless persons catch contagious diseases by taking off their dusty shoes and then sitting down to a meal without washing their hands.—American Medicine.

In the Suburbs.

The Deacon—And the cook has gone, has she?

The Minister (absently)—Yes; she has had a call from another congregation.—Puck.

It Means a Tumble.

An Atchison man who has climbed away up the ladder, is about to lose his head through looking down at a woman.—Atchison Globe.

Privileges of Fire Dreams.

Nobody associates fires with spinsters in any pleasant way. I have often wondered at it—wondered why it was that to sit before a blaze and dream has been by a common consent pictured as the privilege of very young girls who, chin in hand, rest there, or as the privilege of bachelors building castles that are one day to shelter the lady whom they love. When a woman is past twenty she is always represented, when before a fire, with a baby on her lap, or as an old grandmother thinking of the babies that have been but who now hold children of their own before other and brighter fires far away. Or she is some very, very old grandmother of the fairy-tale, crooning over her embers. When an old maid is pictured by a hearth, she is made a witch dreaming, not of love or of children, but of mischief! Love and children, it would seem, are not seemly subjects for old maids to dream of over fires. Yet I ask myself: "Why not?" since of all things else in the world they are the most beautiful.—Century.

Unjustly Accused.

"Stand up, Kingsley Sikes," said the police justice.

The prisoner stood up.

"You are charged with having willfully and maliciously, and with malice aforethought, feloniously removed, carried away, and appropriated to your own use and behoof, certain valuable goods, to-wit: Two bucketfuls of hard coal, belonging to one Jesse Hardesty, some time during the night of January 8, in the year 1903 A. D., the same being contrary to the statute in such cases made and provided, and against the peace and dignity of the people of the state of Illinois. What have you to say? Are you guilty, or not guilty?"

"I ain't guilty, jedge," replied the prisoner. "I stole the coal, all right, but that's all. I didn't do none of them other things you're been sayin'."—Chicago Tribune.

Anything to Oblige.

Miss Budd—Marry you? The idea! Why, I wouldn't marry you for $50,000!

Oldham—But, my dear girl, I'm worth a million.

"Oh, well, if you insist, I suppose I'll have to humor you."—Chicago Daily News.

Two Kinds of Workers.

The man who works eight or ten hours a day and spends his nights at home, does not work nearly so hard as the man who dallies and potters around during the day, and has "a good time" at night.—Atchison Globe.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address

A LIBERAL OFFER

As an Inducement to secure New Subscribers, and for Old Subscribers to pay up, we will, until MAY 10th, 1903, give each subscriber to the REVIEW, absolutely Free, a year's subscription to the Tribune Farmer; or the REVIEW and the Tri-Weekly Tribune for the single price of that paper.

Read Our Combination Offers Below.

Most Liberal Offer Of The Year

The New York Tribune Farmer

is a national illustrated agricultural weekly for farmers and their families, and stands at the head of the agricultural press. It is a practical paper for practical farmers, helping them to secure the largest possible profit from the farm through practical methods.

It is entertaining, instructive and practically useful to the farmer's wife, sons and daughters, whose interests it covers in an attractive manner.

The regular price is $1.00 per year, but for a limited time we will receive your subscription for THE NEW YORK TRIBUNE FARMER and also for the REVIEW, Plainfield, N. J.,

Both Papers One Year for only $1.00

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRIBUNE FARMER, New York City, will bring you *free sample copy.*

Almost As Good as Daily Newspaper

THE NEW YORK Tri-weekly Tribune

is a metropolitan newspaper for busy people, almost as good as a daily.

It is published on Mondays, Wednesdays and Fridays, and contains all the most important news of The Daily Tribune, which is a guarantee of its value.

If you live in the borough or on a farm and have not time for a daily newspaper you may be kept in close touch with all important news of the world at a very low cost.

The regular price of THE NEW YORK TRI WEEKLY TRIBUNE is only $1.50 per year, but you can secure it with the REVIEW, Plainfield, N. J.,

Both Papers One Year for $1.50.

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRI-WEEKLY TRIBUNE New York City, will bring you a free sample copy.

Remember, this offer holds good only until May 10, 1903, after that date the price will be raised.

North Plainfield Weekly Review.

Miss Louise M. Naylor has been chosen valedictorian and Miss Alice Pugh has been chosen salutatorian of the class of 1903 of the Plainfield High School.

Rev. D. Charles Dodd, pastor of the Peddie Memorial Baptist Church, of Newark, will preach in the First Baptist Church, tomorrow morning and evening

Captain and Mrs. M M. Patricks, of Washington, D. C. were the guest of the latter's parents, Mr. and Mrs. Martin I. Cooley, of Rockview Terrace, last Sunday.

The members of the West End Hose Company baseball team are very anxious to arrange a series of games with the baseball team of the Plainfield Fire Department

Mrs H. J. Martin, Jr., of Philadelphia, who have been visiting the former's parents, Mr and Mrs. H. J. Martin, Sr of Jackson avenue, have returned home.

The annual musicale given under the auspices of the Christian Endeavor Society of the Seventh Day Baptist Church, will be held at that church Thursday evening, April 30.

While walking across Somerset on Saturday evening, William Calloway, of Westervelt avenue was struck by a trolley car. He was severely bruised about the head and shoulders and was unconscious when picked up by the trolley employees. He was taken to the Muhlenberg Hospital.

The funeral of Alexander Warnock, who died at his home in New York City Sunday, was held Wednesday afternoon at the home of his sister, Mrs. Margaret Wilson, of Grove street.

Papers were passed on Monday for the sale of the Edward White property on West Front Front street now occupied by Hill and Shupp, to Charles W. McCutcheon, of Rockview avenue.

The funeral of Miss Mary McGlone, who died Monday was held at the home of her niece, Mrs. George Giddis, of Duer street, this borough, Wednesday morning and later at St. Joseph's Church.

Miss Louella C. Harris, soprano soloist at the First Baptist Church, who was too ill to take part in the cantata of "Magdalen" given in that church last Thursday week, was able to resume her place in the choir last Sunday.

Knights of Pythias, members of Unity Lodge, No. 102, and Perseverance Lodge No. 74 will attend the evening service at Hope Chapel tomorrow evening. The pastor, Rev. L. R. Howard is a member of Perseverance Lodge.

William S. Loizeaux, of this borough, and Miss Florence Williams, daughter of Mr. and Mrs. E. P. Williams, of West Seventh street, were married April 5 in New York City at the Hotel Manhattan. The nuptial knot was tied by Alderman Isaac Marks.

Miss Eleanor Van Deventer, of Washington avenue, a Sunday School teacher at Hope Chapel, entertained her Sunday School class last Saturday evening. Games were played. John Fritts and William Firstbrook won prizes. Refreshments were served.

The annual meeting of the Union County Retail Druggist Association was held at the Y. M. C. A. Tuesday and the following officers elected: President. T. S. Armstrong; vice president, Henry Schmidt, of Elizabeth; secretary, Joseph B. Smith, of Rahway; treasurer, I. Shaw.

Roundsman William Nesbitt, of the 38th Precinct of New York City, will address the men's meeting at the Y. M. C. A. Hall, Sunday, April 19th, at 4 p. m. Miss Grace D. Hildebraud, of White Plains, N. Y., will sing and the National Staff Band of the Salvation Army will play. All men welcome.

George Herring, of this borough, and Miss Emelia Keilblock, of Myersville, were united in marriage at the Myersville resbyterian Church, Wednesday evening, by Rev. George Bowers. Mr. and Mrs. Herring, after a short visit in Washington, D. C., will return here and make their home in apartments on Somerset street.

The Independent Gun Club, of this city held a shoot at their Myrtle avenue grounds on Monday afternoon. Nearly all of the members were present. Refreshments were served. The club postponed their business meeting until next Monday afternoon. The club will hold their next shoot on Decoration Day at the same grounds.

The sacrament of the Lord's Supper was observed at the morning services of the Warren Chapel. The individual communion service was used for the first time. A new member was received into the church Rev. J. Q. McKelvey, the pastor, was in charge. At the Sunday School service on Sunday afternoon, Thomas C. Hall, of New York, addressed the members of the Senior and Junior Departments.

Harry Martin, Frank DeCamp and Lewis Hurtt were arraigned before the Recorder, Tuesday evening upon the complaint of William Coombs, a grocer residing on Linden avenue. The complaint was that the boys were very mischievous and destroyed the property of persons residing near Mr. Coombs. The boys were reprimanded and discharged upon the promise to stop their mischievousness.

Edward Jackson, the eleven year old son, of Stonewall Jackson broke his arm Tuesday afternoon while climbing a tree in the yard of Adam Fritts, of Somerset street. He was climbing the tree with some of his companions when he made a misstep and fell to the ground. He was stunned when he fell and was picked by some passersby. Doctors Buchanan and Endicott were summoned and the young lad is resting easily.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD.

Harris... ington et ux to ...fena Trojano ... Wm. ... Ex'r, to ...ilne, $300.

HIGH SCHOOL NOT...

Items of Interest to all Tho... terested in the Borou... Schools and Pupils.

Edgar Adams, '03 has gone t... Windy City to visit his parents ... the Easter vacation.

Miss Julia Jerome, of the Elmh... teacher in the Franklin School is v... her parents in Syracuse.

Miss Helen Gill, of Grandview avenue, who has been visiting friends in Perth Amboy has returned home.

Miss Alberta E. Waterbury head of the eighth grade is visiting her friend, Miss Minnie Green, of New York.

Miss Mary Weller, head of the Sixth Grade, is spending her Easter vacation at her home in Washington, N. J.

Miss Anna Holcomb, head of the Seventh Grade, is spending her Easter vacation at her home in Trenton, N. J.

Miss Edna Bowers, of Basking Ridge was the guest of Miss Bessie Martin, of Jackson avenue last Saturday and Sunday.

Miss Lizzie Southworth and Miss Grace Anderson, of the Primary Department, are spending their Easter vacation at Binghampton, N. Y.

The Plainfield Board of Education has asked for bids for the painting of the Bryant and Franklin Schools during the coming summer.

Bert Moore, of Grove street, a member of the Young Men's Christian Association ball team, last season, will play with the St. Mary team.

The Misses Lillian and Helen Mayhie, of New York City, who have been visiting the Misses Filkins at the Elmhurst have returned home.

For the second time this season the Plainfield High School—Pingry School baseball game has been postponed on account of bad weather.

Arthur Humble, who has been visiting friends in New York and Brooklyn returned home and will play with the High School this afternoon.

Miss Clara Van Fleet, of Jackson avenue, piano player in the North Plainfield High School, is spending her Easter vacation with friends in Boston.

The High School Baseball team practiced every morning for the past week on the Cricket Field so as to get in shape for the Pennington Seminary game today.

The commencement exercises of the North Plainfield High School Class of 1903 will be held in the Young Men's Christian Association Hall on Friday, June the 19th.

Manager John Steiner, of the Young Men's Christian Association Baseball team has signed Catcher Charles A. Myers of the Wesleyan University team for the coming season.

The Board of Education which is making up next season's budget is making a number of changes in the school and when the school reopens next September, a corps of new teachers will probably be in charge. New books will also be procured where they are necessary.

The Junior class of the Plainfield High School has decided to present a handsome piece of statuary to the Plainfield High School. The subject will be "Moses" by Michael Angelo. This piece of statuary is 18 inches high and will stand on a pedestal. The statue will cost $35.00 which is a part of the proceeds of their recent entertainment.

The complete schedule of the North Plainfield High School is: April 18, Pennington Seminary at Pennington; April 22, Westfield H. S. at N. P. H. S. Field; April 25, Rutgers "Prep" at N. P. H. S. Field; May 6, Pingry School at Elizabeth; May 9, Rutgers "Prep" at New Brunswick; May 13, Jersey City H. S. at N. P. H. S. Field; May 27, Scotch Plains H. S. at Scotch Plains.

The Plainfield High School baseball team will play the Newark Academy team this afternoon on Stillman Field. Capt. Van Auken has been practicing his men every day for this game. The team will line up as follows:

Van Auken, P; Walters, C; Thompson, 1; Brokaw, 2; Craig, S; Munro, 3; Ulrich, L; Miner, C F; Bock, P. Brakely and Rocap substitutes. The game will start promptly at 3 p. m.

There is some talk of organizing an ex-High School Baseball team this summer. There is plenty of material from former High School teams. John Jacot, first baseman on the 1900 team; George Conover, shortstop on the 1901 team; Joe Farlee formerly of the H... team, pitcher; Edward Overt... baseman 19... Wesley M..., third base... 1902 te... Woodland. ... 1902 tea... principle p... n which ...

The new ... Educat... cided tha... "hookey...

...th Plainfield High School must be ...pped. The Board will try to invoke ...aid of the State Board, if ...ssary, in ...er to stop this bad practice. Many ... the pupils play "hookey" to smoke ...arettes and this the Board will also endeavor to stop. The state appropriation ... the school is based upon the number ... pupils present during the school year. ...e new truancy law which the Board is ...ing to pass is that the parents of the ...ils playing truant shall be fined not ... than $1, nor more than $25 or one ...'s imprisonment or both as the Judge ...ay decide.

The High School Baseball season will start today with a game with Pennington Seminary at Pennington, N. J. Much time has been spent for practice and the team as it will line up against Pennington will probably be the strongest to be had in the school. Fred Armstrong cannot pitch as he is under the doctor's care and Edgar George will serve up a lot of new twists and and shoots to the Pennington batters. George Ovens will watch the plate and look after the receiving end of the battery. McLaughlin will play first. Adams will cover second. Armstrong will pick up the grounders at short and Arthur Humble will take care of third. William Newmiller will pull down the liners in left field, Grover Kipsey will cover the center garden and William Mundy will take care of anything that happens to come in right field. The team as it will line up against Pennington Seminary.

George, P; Ovens, C; McLaughlin, 1; Adams, 2; Armstrong, S; Humble, 3; Newmiller, L; Kipsey, C F; Mundy, R.

The Plainfield High School baseball team journeyed to Brooklyn Saturday to play the Brooklyn Boys' High School baseball team and was snowed under. The Brooklyn boys pounded Van Auken all over the grounds for 12 hits and these helped along by good base running and 11 errors made by the Plainfield boys netted them 16 runs against two tallied by the Plainfield High School team. Schmidt; Scripture lesson, Cor. 5-20-21-50-58; Hymn, School; Instrumental music; Exercise, Primary Department; Easter Hymn, Solo, Quartette; Address, Rev. Mr. Duensing; Hymn, School; Easter Hymn, Instrumental Music; Easter Anthem, D Quartet; Books, Papers, Offering; Special Music, Hymn, Benediction.

The 1903 Wand Directory

If there is one thing more than another that the people of Plainfield should be proud of, it is the city directory issued by the Wand Directory Company.

The directory for 1903 has just been delivered, and it reflects great credit on the compiler, both in printing and binding.

Mr. Wand is certainly to be congratulated on ... he has achieved in ...ount of ad- ... contains ... appreci-

ROUND ABOUT JERSEY

Summ... of News From the Four Corners O...

Miss Ulysses Yancey, colored, second honors in the class of 1903 at the High School in New Brunswick. She is the first of her race ever graduated from the school.

The Cranford Township flagpole, 125 feet high, was blown down Wednesday morning carrying with it the fire alarm and electric light wires. Several pedestrians had narrow escapes from injury.

It is expected that New Brunswick's $50,000 Carnegie library will be ready for occupancy about the middle of July, but it will not be dedicated until it is completed. All grading, paving and parking of the grounds has been finished.

The Jewish passover which began at six o'clock last Saturday will close this evening. The first and second days of the feast are strictly observed as holidays. During the first four days special services are held in the synagogues and the last two days of the feast are observed as holidays.

When the keel of the armored cruiser Washington, which will be built by the New York Shipbuilding Company, is laid, the occasion will be made notable by the attendance of the Governor and many State and government officers, in honor of the first cruiser to be constructed in New Jersey.

The last legislature appropriated $600 to be used in making repairs and improvements to the Trenton Battle monument. The work will be commenced in a few weeks. The Trent Tile company donated tile to the monument association and this will be placed in the interior of the curio room, where the enamel has peeled off owing to the excessive moisture.

... A ... was ... Westwood, with the permission of the Weather Bureau and the Postoffice Department, to display weather signals from the rural free delivery mail wagons. The innovation meets the approval of the town and country people, and it is said that other towns that enjoy the free delivery service have inquired as to the practicability of the plan.

J. P. Holm has addressed an open letter to the assessors of Perth Amboy, asking that he be assessed. He says that he has been in business there for six years and has four children attending the public schools, but has never had a tax bill, not even for poll tax. Although born in Denmark, Mr. Holm says he is proud of his American citizenship and would feel better if he helped to bear his share of the cost of maintaining this city and county government. Mr. Holm is the ...nish Vice-Consul for New Jersey. He pu...lishes the Perth Amboy Folkeblad, ...nly Scandinavian newspaper in the ... State.

One of the most sought-for theatre programs is in the possession of Almyer Neigh, a barber at Califon. It is one of the play given by Laura Keene, entitled "Our American Cousin," at Ford's Theatre at Washington, D. C. on the evening of April 14, 1865, when Lincoln was assassinated. Only three are known to be in existence. The program was presented to Neigh's mother shortly after the war by a soldier who was on guard at the theatre at the time of the shooting. He also has in his possession a piece of the lace curtains and silk fringe from the flag that draped the box which the Presidential party occupied. He has received many offers for his Lincoln collection from Lincoln clubs and curio collectors all over the United States.

William Vallance, the famous lightning calculator, who could do any sum in mathematical calculation mentally and with but an instant's hesitation, died at Trenton Sunday night, aged thirty years. Vallance could duplicate the feats of any of the lightning calculators, and then beat them all by stating instantly any desired date in history. His mind was a vast storehouse of historical data, and where he gathered it no one ever know, as he was not a student. He could not tell how he knew history, but would rattle off fact after fact in profane and Christian history without an instant's delay. He could give instant answer to such arithmetical questions as multiply 389,487 by ... and whenever he met a professionhim to sham... ...tor Vallance would put Feats in algebra were ...llous feats. He would mentally work deci... an instant's time which required many minutes' close application of a college professor.

Mrs. Martha Thornton Cutler last Monday quietly celebrated at her home, the Oakleigh, in Llewellyn Park, West Orange, the one hundredth anniversary of her birth. Because of the death of her daughter, Mrs. Levi Payson Stone, on April 5, Mrs. Cutler observed the day merely by receiving calls from intimate friends. She has excellent health, considering her age.

Park Club Dance.

The Easter dance given by the Park Club was held at the Park Club rooms on Tuesday evening. The affair was largely attended by the society people of North Plainfield and the city. Several out of town guests were also present. The rooms were handsomely decorated with bunting and the room was profusely decorated with palms. The music was furnished by Prof. Garland and Orchestra of New Brunswick. Refreshments were served at a late hour. The committee in charge was: Mrs. S. St. John McCutcheon, chairman; Mrs. B. A. Hegeman, Jr., Mrs. Francis DeLacy Hyde, Mrs. Edward A. Ladd, Jr., Mrs. Henry A. McGee, Mrs. Walter M. McGee, Mrs. Charles A. Reed, Mrs. Samuel Townsend, C. E. Murray, Mr. and Mrs. W. L. Saunders.

Concert of Singing Society.

The members of the Gesang and Turn Verein gave a concert in the Saengerbund Hall on Monday evening. Prof. ... Spillman and orchestra, of Newark ... furnis... The singing section were assisted by members of the Elizabeth section. The program consisted of vocal and instrumental zither and piano selections. Dancing was one of the features of the evening. Refreshments were served. Seven members of the organization were made honorary members. Charles Smith, Charles Dresselt, George Bremmer, Christopher Keller, Jacob Keller, William Beiter, Joseph A. Blatz.

The affair was in charge of the following committee: Henry Haurard, chairman; Fred Moraller, John Wirth, Rudolph Kesselring and Otto Keller.

Leal Boys "Gloriana".

The French play entitled "Gloriana" given by the members of Leal's school Thursday evening at the Casino, was a complete success. This play shows the result of a whole winter's practice and does credit to the Leal School Dramatic Association. The boys conducted their parts very well and much credit is due to the efficient coaching of Edgar B. Smith, an instructor at the Leal School.

The Casino was packed to its fullest capacity—all the seats being occupied and all the standing room available was used.

The play which consists of three acts is a very complicated love affair and the entire caste is made up of students of the Leal School. The part of the women in the play were taken by students of the school and were well portrayed, and showed the effects of the efficient coaching.

Every year the Dramatic Association ...sents a play for the benefit of the pre... ...n and the Athletic Association. Leal...

Y. M. C. A. Supplemental Course.

The Young Me... ...n's Christian Association will give their ... ...t of the Supplemental Course of ente... ...tainments Thursday evening, April 23. The program of the evening will be a musical and literary character ... ...s Quartet, rendered by the Swedish Ladies ... ...rk Herald who are spoken of by the New Yo... as follows:

"The Swedish Ladies' Quartet ... was greeted by a very large audience last evening. Their singing was delightful, and the audience, among whom were some of the best judges of excellent singing, showed their pleasure by frequent and loud applause. The harmonious blending of the voices produced a sweet melody that will not soon be forgotten by those who were fortunate enough to hear it."

The literary portion of the evening's program will be given by Miss Edith M. Norton, a dramatic and humorist reader of great ability. This is Miss Norton's third appearance on the local Y. M. C. A. platform at which time she will again be heard by those who afford selves the privileges of the Y. M. ... courses.

KILLED BY COINERS' GANG

Nine Arrests in New York For Murder of Man Found in a Barrel.

ITALIAN COUNTERFEITERS' WORK

Police Regard It as a Mafia Crime and Round Up a Group Secret Service Men Have Watched—All Were Armed With Revolvers and Some Carried Stilettos Besides—Dangerous Gang Caught.

New York City.—Nine members of a gang known to the agents of the United States Secret Service as the most desperate lot of Italian counterfeiters and murderers of in this section of the country, with thirteen [illegible] rested [illegible] Wounds in the neck, was found tightly packed in a barrel at the corner of Eleventh street and Avenue D.

The dead man was a member of the gang, and for days before his death was closely shadowed by Secret Service agents under the orders of William S. Flynn, chief of the local bureau, who for some time has been planning a wholesale round-up of the Italian counterfeiters in the East.

That this man was murdered by his comrades in the gang with which he had been identified there is no doubt, and it is practically certain that the eight men locked up at Police Headquarters planned his death and that some of them accomplished it with their own hands.

The affront to his comrades which brought upon him the sentence of death is still a secret locked up in the breasts of the gang. The prisoners, all of whom were armed with huge revolvers and wicked-looking knives, maintained an attitude of sullen defiance after they were locked up, and no amount of persuasion could get a word out of any one of them.

It is this gang that perpetrated the horror of Tuesday morning, and the agents of the United States Secret Service declare absolutely that they are the same men who cut the throat of Giuseppe Catania in Brooklyn last July and carried his body in a sack to a deserted neighborhood.

The nine men arrested are a murderous looking crew, and a score of crimes are laid at their doors. The Secret Service agents, who have been watching them for months, declare that they have as little compunction about murdering a man as they would have about killing a dog.

A rule of long standing among them, the agents say, has been to kill anybody that stood in their way or betrayed them to the authorities. The man whose body is now in the morgue, the head almost entirely severed from the trunk, committed one of these offenses, it is believed, and at a council of the gang was sentenced to [illegible] and gave [illegible]

The men arrested [illegible] Agrees at Police Headquarters which the Government detectives say are in the main correct. They are as follows:

Joseph Fanaro, twenty-four years old, married, a merchant; Messina Genova, thirty-eight years old, single, importer (right name is Antonio Genova); Lorenzo Loboldo, forty-eight years old, merchant, married; Vito Loboldo, twenty-four years old, laborer; Domenico Pecoraro, fifty-three years old, married, farmer; Pietro Ingerillo, forty-four years old, married, confectioner; Giuseppe Morello, thirty-four years old, agent, single; Tomasco Petto, twenty-four years old, married, clothing presser, and Ignatz Lupo, twenty-five years old.

All of these men are Italians and are known as law-breakers. Most of them have yard-long criminal records, and there wasn't one of them that didn't have a big loaded revolver or a long sharp knife concealed somewhere about his person.

The principal members of the gang arrested are Morello, Pecoraro and Genova. The three are well-known counterfeiters, being makers of spurious bills as well as expert coiners. The other six worked under the direction of these three.

CONVIVIALITY NOT A BAR.

Report Refusing Promotion on That Ground is Rejected.

Washington, D. C.—Assistant Secretary Darling decided that a naval officer is not barred from being "a good fellow." James E. Cann is a pay inspector in the navy and recently came up for promotion to pay director. The board that examined him opposed his advancement on account of "his convivial habits."

Judge Darling could not reverse the finding, but he rejected the report and ordered another examination, with instructions on the board which [illegible] will result in a recommendation that Cann be given his promotion.

Cann has been in the navy three years, and if his convivial as to interfere with the performance of his duties or cause undesirable comments, or cause undethought it sufficient Judge Darling not been brought out before.

BALANCE OF TRADE.

This Country's Exceeds Those of All Other Countries Combined.

Washington, D. C.—The imports of the United States have grown from $436,000,000 in 1870 to $903,000,000 in 1902, but the exports have more than kept pace with the imports and have increased from $367,000,000 in 1870 to $1,355,000,000 in 1902, so that the favorable balance of trade is not only large, but exceeds that of all the other countries in the world combined.

Pennell's Insurance.

Buffalo (N. Y.) representatives of the accident insurance companies in which the late Arthur Reed Pennell carried policies admitted that the policies would not be paid until the courts had passed definitely on the question of whether Pennell came to his death by accident or suicide. The companies in which Pennell had accident insurance were as follows: Fidelity and Casualty Company, New York, $15,000; Travelers' Insurance Company, $10,000; Aetna Life Insurance Company, $10,000; Preferred Accident of New York, $5000.

SEN. CULLOM ON TRUSTS

Recent Decision Means That Restraint of Trade Must Stop.

"No Longer Can Trusts Evade Law," Declares the Author of the Inter-State Commerce Bill.

Washington, D. C.—In discussing the recent opinion in the Northern Securities case, Senator Cullom, who was for many years Chairman of the Senate Interstate Commerce Committee and author of the bill creating the Interstate Commerce Commission, said:

"The decision of the Court of Appeals in the Northern Securities case was an important victory for the Government and for the President, who gave instructions to institute the prosecution. Its far-reaching effect will not be fully appreciated by the people until the opinion has been carefully studied and is thoroughly understood.

"The decision means that the Government can control and suppress every kind of trust which restrains trade. One railroad is not prevented from acquiring another line for the purpose of extending its system, but parallel roads are prohibited from consolidating so as to destroy competition.

"The most important feature of the decision is that rich and poor must be accorded the same treatment. Powerful corporations cannot hereafter employ high salaried counsel to assist them in evading the law. That time has passed forever. It has always been my contention that the laws on the statute books were ample to permit the control of unlawful corporations by the Government. The decision in the Northern Securities case is merely a vigorous enforcement of the laws which have been in existence for years.

"Individuals may hereafter enter the commercial field without fear of extinction by the trusts. This will be possible, since it is clearly demonstrated that the Government has full power to deal with the trusts. During recent years the great combinations have driven individuals out of business. The wealth of the country has been concentrated in the hands of the few. As a result of this concentration men of limited capital have refused to enter the commercial field, as many industries were absolutely controlled by the trusts. The decision handed down by the Court of Appeals will make it possible for these men to invest their money and establish new industries, the Government suppressing such trusts as to prevent competition.

"I hope the decision will be sustained by the United States Supreme Court. New conditions will then follow. A large number of small concerns will spring into existence, there will be a return to the conditions before so many men were compelled to abandon their own business enterprises and work for the larger corporations on salaries. This will result from the knowledge that the Government proposes to prosecute unlawful combinations and alike protect the rich, the well-to-do and the poor.

"There will now be a resumption of competition, and much idle capital will be again invested. Prior to this decision it was impossible to start new concerns for the manufacture of steel or tobacco, because these industries and many others were completely controlled by the trusts and competition was prevented."

KILLS FRIEND; CALLS IT DUTY.

German Army Officer Shows No Remorse For His Shocking Crime.

Berlin, Germany.—The murder of Artilleryman Hartmann by his old-time schoolmate and lifelong companion, Ensign Huessner, because Hartmann failed to salute him in the proper manner when they met at Essen, while they had both returned to spend Easter holidays, continues to be the sensation of the moment.

Huessner is calm and [illegible] He says that he acted as every officer should. He is quoted as [illegible] when he was examined at the police office: "When I drew the pistol I want to see blood [illegible] He has been visited [illegible] mother, to whom he wrote: 'I have a clear conscience [illegible] officer.'"

Huessner's mother [illegible] Hartmann's in her [illegible] sympathy with her feelings: "I had no ill [illegible] son. It was simply [illegible] officer to chastise [illegible] Frau Hartmann to forgive, saying that if she pardons [illegible] will have a right to consider [illegible] Popular feeling against [illegible] is very bitter.

AGITATORS MUST STAY OUT.

Marines Guard Navy Yard Workmen Against Strikers.

New York City.—Marines guard the entrance to the Navy Yard against interference of walking delegates with the workmen on the cantilever crane.

Rear-Admiral Rodgers, post commandant, said that the Government had started to build a battleship, and it proposed to finish it on time.

"Until we get the men we cannot make any further progress on the ship," he explained. "The contractor's men seem to have had trouble outside the yard, and that trouble began to interfere with the work. Now he has got permission to keep his men in the yard all the time.

"This yard is United States property," said the Admiral, emphatically, "and I don't believe there will be any further delay while we are putting up the crane."

$1,000,000 Oil Fire in Texas.

Fire swept over what is known as the Hogg-Swayne oil syndicate tract in the Spindle Top oil fields, Beaumont, Texas, completely destroying everything in its way. The loss is estimated at from $800,000 to $1,000,000. Two hundred and sixty-five derricks are burned.

$5000 Pension to Mrs. Altgeld.

The bill granting $5000 as a pension to the widow of former Governor John P. Altgeld passed the Senate at Springfield, Ill., and was signed by Governor Yates. The bill had no opposition.

WORSE REPORT ON MAIN[illegible]

The Turret Supports Weak; the B[illegible] ers Unsatisfactory.

NEW WARSHIP IN BAD SHA[illegible]

Defects Regarded as a Consequence Great Advance in Power of N[illegible] Rifles—Calculations Must Be Rev[illegible] —Other Ships Will Be Affected—[illegible] Type of Boiler May Be Chosen.

Washington, D. C.—Captain Eu[illegible] H. Leutze of the new battleship M[illegible] came to Washington from New[illegible] News and gave the Navy Departm[illegible] officials their first detailed informa[illegible] about the condition of his vessel, w[illegible] developed defects during her "shak[illegible] down" cruise in the West Indies.

While Captain Leutze contradi[illegible] the report that the Maine was struc[illegible] ally weak, his statement showed that the battleship was in worse condition than had been supposed from the official information that had been received.

Not only are the supports and emplacements of her six-inch guns weak, but the structures of her turrets are entirely inadequate to bear the strain of firing the big turret guns.

In addition to this disquieting news the Department learned from Captain Leutze that the boilers of the Maine had proved to be decidedly unsatisfactory.

There was a disposition on the part of naval officials at first to make it appear that Captain Leutze had explained that the defects in the Maine were not at all serious, but Secretary Moody decided that frankness was the best policy and directed Rear-Admiral Bowles, the Chief Naval Constructor, to make a statement for the benefit of the public as to the vessel's condition. This is the statement:

"The officers who have examined the turrets of the Maine have found that the damage done consists largely of the loosening up and breaking of fastenings and rivets in the circular structure underneath the rollers and paths on which the turret is supported, and in no respect due to general structural weakness of the ship. The supports under the roller paths are of the usual construction, being built up of plates and angles.

"Since the date of the design of the Maine, however, the use of smokeless powder with higher pressure guns has been adopted and the recoils allowed have been shortened. Both of these improvements, while desirable of themselves, have greatly increased the strain on the supporting structure which in actual test of firing has proven inadequate.

"Were it not for the great weight of the revolving part of the turret, amounting to over 400 tons, the [illegible] of the additional str[illegible] ports which has become necessary would not [illegible]en decided to be ate work, but owing [illegible] be a very elabor[illegible] incumbent weight [illegible] to the great superported, and the in[illegible]which must be supparts, it is anticipa[illegible]ccessibility of the will take some lit[illegible]ed that the repairs

"The deformatio[illegible]e time.

the vicinity of [illegible]ns of the decks in due to the sam[illegible]rtain six-inch guns, much less impor[illegible] general cause, are remedied. [illegible]ant and can be easily

"The Chief [illegible] Constructor considers that no blam[illegible] contractors [illegible]ne can be attached to the no evide[illegible] for the Maine, as there was workma[illegible]nce whatever of defective

No [illegible]ship."

[illegible]cerning [illegible]icial statement was issued concerning these [illegible] the defects in the boilers, but to t[illegible] were otherwise described as due tw[illegible] collection of waste material in [illegible] at points so situated as to [illegible] the steam from being generated, [illegible]ing the burning out of [illegible] and on account of the con[illegible] the boilers making it exceedingly difficult to overcome the trouble.

As indicated by Admiral Bowles's statement William Cramp & Sons, of Philadelphia, who built the Maine, have been acquitted of responsibility for the defects. These are regarded as a natural consequence of the great advance in the power of naval rifles.

As the strength and resistance of the gun supports of most of the armored vessels under construction were calculated similarly to the calculations made for the Maine's gun supports, it will probably be necessary to strengthen the emplacements of the turret guns and other high-powered rifles on these vessels.

To do this will require alterations in plans, some expense and perhaps loss of time.

PRESIDENT REFUSES TO SHOOT.

Declines All Offers of Lion Hunt in the Yellowstone.

Cinnabar, Mont.—President Roosevelt broke camp and is slowly working his way to Major Pitcher's headquarters at Fort Yellowstone. He will remain there one day and then will start for Norris, where the geysers are. There is a good deal of snow between the fort and Norris and the Engineer Corps is at work opening the road.

The President has not fired a shot at a mountain lion and has no intention of doing so. It is estimated that there are 500 of these animals in the park and a determined effort is being made to exterminate them. "Buffalo" Jones, the game warden, is slaying them on every possible occasion. He offered to round up a lion or two for the President, but the latter declined.

10,000 Dutch Idle.

As a result of the recent strike in Holland 10,000 men are out of work and their families are in dire distress.

A Bulgarian Atrocity.

The latest Bulgarian achievement is the total destruction of a small village of exclusively Mussulman population. One hundred and sixty-five persons were all massacred in cold blood, except a few who escaped by flight. The women were subjected to indescribable mutilation.

[illegible]WS ON RACE PROBLEM

[illegible]re of the Negro Lies in the South, Cleveland Declares.

[illegible]s Out For White Domination—Obligations of the White Man, However, Should Be Strictly Carried Out.

[illegible]w York City. — That the negro problem in the South has aroused much interest in the North was shown in a large number of the representative citizens of New York assembled in the Madison Square Garden Concert Hall to listen to a discussion of the subject by such men as former President Grover Cleveland, the Rev. Dr. Lyman Abbott, William H. Baldwin, Jr., Edgar Gardner Murphy, of Alabama, and the Rev. Booker T. Washington, of the Tuskegee Institute. Former President Cleveland placed himself unequivocally upon a platform favoring the domination of the white race in the South, though he advocated more vigorously the education of the negro and a fair discharge of the white man's obligation toward the race formerly enslaved.

Mayor Low, in introducing Mr. Cleveland as the first speaker, said that the Tuskegee experiment had shown that the negro was worth helping.

Mr. Cleveland was received with cheers as he arose to speak. He said:

"I have come here as a sincere friend of the negro, and I should be very sorry to suppose that my good and regular standing in such company needed support at this late day, either from certificate or confession of faith.

"I desire to declare myself as belonging to the Booker T. Washington-Tuskegee section. I believe that the days of 'Uncle Tom's Cabin' are past. I am thoroughly convinced that the efforts of Booker T. Washington and the methods of Tuskegee Institute point the way to a safe and beneficent solution of the vexatious negro problem at the South."

Mr. Cleveland went on to say that whatever the work of the people of the North in aiding such efforts to help the negro as is being done at Tuskegee, and whatever the better tendencies among the negroes themselves prove to be, the hope for the black man must in the main depend upon the sentiment and conduct of the leading and responsible white men of the South.

He said that this aid and encouragement had been generously forthcoming from the South, and that he personally had faith in the honor and sincerity of the respectable white people of that section in their relations with the negro. He said that the South did not believe in the social equality of the races and made no false pretenses in regard to it, and that perhaps the so-called race prejudice amounted to racial instinct.

"But whichever it is," continued Mr. Cleveland, "let us remember that it condoned the negro's share in the humiliat[illegible] and [illegible] such [illegible] lia of [illegible] followed [illegible] survive [illegible] deluged by the perilous flood of indiscriminate, unintelligent and blighting negro suffrage."

He continued to say that the necessary element to the uplifting of the negro in the South was the co-operation of the white people of the South, which had been ungrudgingly given.

A RICH MAN'S BRIDE.

Miss Cathleen Neilson Becomes the Wife of Reginald C. Vanderbilt.

Newport, R. I.—The marriage of Miss Cathleen Gebhard Neilson, daughter of Mrs. Frederick Neilson, and Reginald C. Vanderbilt, youngest son of Mrs. Cornelius Vanderbilt, took place at Arleigh Cottage. The wedding, the reception and the wedding breakfast were all at Arleigh.

The bride's gown was of ivory white satin, covered with fine chiffon. Very little lace was used in the costume, but here and there were touches of rare old lace relieving the severity of the skirt, which was made without pleats, and fell in soft, graceful folds. The long train came from the waist and was uncovered, except by the bridal veil of old lace, a family heirloom. The bodice was made with a high neck, with the yoke and upper parts of the sleeves of lace, while long puffs of chiffon fell over the hands. The bride wore the bridegroom's gift, a magnificent string of pearls. Her bouquet was of white orchids, with sprays of orange blossoms and stephanotis bound loosely together with a broad white satin ribbon.

GEN. BALDWIN ASKED TO EXPLAIN

Called to Account For Alleged Disparagement of Filipinos and Negroes.

Washington, D. C.—The War Department has taken official cognizance of the reported statements of General Frank D. Baldwin, Commander of the Department of the Colorado, in disparagement of the Filipinos and negroes. Secretary Root directed that a formal inquiry be addressed to General Baldwin asking whether or not he had been correctly quoted. General Baldwin is fresh from the Philippines. The remarks he is reported to have made were to the effect that one of his reasons for liking the Filipino as a soldier was the same that gave him a preference for the negro in the same capacity—that in a fight he was not worried about his safety, as it made no difference whether he was killed or not.

High Wind in New York.

Wind blowing at the rate of forty-six miles an hour did much damage in New York City, making it almost impossible for women to walk through the shopping district.

S. N. D. North Will Be U. S. Census Chief.

S. N. D. North, of Boston, will accept the Directorship of the United States Census Bureau, recently offered to him by President Roosevelt. The Executive Committee of the National Association of Wool Manufacturers, of which Mr. North is Secretary, released him from his duties.

Anti-American Union Off.

The International Agricultural Congress at Rome postponed until the next session the German proposition for an anti-American union.

PAYNE TAKES UP SCANDAL

The Postmaster-General Says He Caused the Investigation.

NEW CHARGES AGAINST BEAVERS

He is Accused of Lobbying For the Postal Clerks' Union—Payne Promises a Most Searching Inquiry—Every Guilty Person Will Be Summarily Dealt With—President Roosevelt Approves.

Washington, D. C.—Postmaster-General Payne has returned to Washington. Before seeing any of his subordinates Mr. Payne said that he was personally responsible for the investigation now being conducted, information having reached him before he left Washington which he felt warranted a thorough investigation, and he had accordingly, with the approval of the President, directed Fourth Assistant Postmaster-General Bristow to make the necessary inquiry. Not only would it naturally fall to Mr. Bristow to make such an investigation, but the fact that the divisions to be investigated were under First Assistant Postmaster-General Wynne's jurisdiction made it especially desirable to secure an ex parte inquiry. The Postmaster-General made the following statement:

"During the months of January and February information and reports reached me, which I deemed it for the public interest to investigate, and I personally gathered such information and facts as would enable the proper officers of the department to undertake a thorough investigation as to the truth or falsity of these reports. I directed Fourth Assistant Postmaster-General Bristow to take the proper steps to institute the necessary inquiry, using for that purpose the postoffice inspectors' division and such other methods as would thoroughly ascertain the truth or falsity of the charges or insinuations made, and he was instructed to proceed promptly and with vigor during my absence. Since my return this morning I have not seen General Bristow, so that I am not advised of the progress made. The investigation will continue, and if any wrongdoing is disclosed the parties guilty of such wrongdoing will be summarily dealt with. If the system or method of doing business in the department is faulty the proper remedies will be applied without fear or favor. I inaugurated the investigation with the determination that it should be exhaustive.

"It is proper for me to add that I laid before the President the information which I had in my possession, and that he fully approved of the action proposed by me."

After dictating the above statement Mr. Payne held long conferences with Mr. Bristow and Mr. [illegible]

Mr. Bristow [illegible] formal charges [illegible] [illegible] of the effect that Mr. Beavers, late superintendent of the Division of Salaries and Allowances, had been employed by the Postal Clerks' Association, and had not only drawn a salary from the association, but had used his influence with members of Congress to secure continually increasing appropriations for clerk hire. As in the cases of all charges filed it was merely said that the matter would be thoroughly investigated.

The whole administration of the Postoffice Department is made subject to the investigation under Postmaster-General Payne's directions, and every charge will be probed thoroughly and the inquiry made as searching as the department's most expert inspectors can make it. At the same time Mr. Payne's purpose is to give fair and just treatment to all concerned, and not to act arbitrarily and with undue haste. For this reason it can be said that no immediate changes of importance in the personnel of the service are now contemplated, and changes will depend largely on the report to be made by Mr. Bristow, although developments in the meantime may make some deviation from this policy necessary.

When Postmaster-General Payne reached the department a score of newspaper men were awaiting him with queries concerning the investigation, but he parried all questions with remarks on his trip to the West Indies. He expressed particular gratification at what he had observed of postal conditions in Cuba, and said his observations in Cuba and Porto Rico would be helpful to him in administering the postal service. Mr. Payne summoned a number of the officials of the department and held short consultations with them respecting postal affairs.

It may be several weeks before the postoffice inspectors will be able to complete their work. When they have finished Mr. Bristow will prepare a comprehensive report on the whole subject. The report necessarily will embrace matters as to which publicity may not be warranted, so it is probable that some parts of it will be withheld from publication.

Corbin Barred From Washington Club.

A sensation has been caused in official and social circles in Washington over the withdrawal of the application of Major-General Henry C. Corbin, Adjutant-General of the Army, for admission to membership in the Metropolitan Club. The withdrawal of General Corbin's application was brought about by opposition to his admission, while the earnest efforts of many influential friends were not able to overcome.

Schwab to Be Re-elected.

It was reported in New York City that President Schwab, of the Steel Trust, would not only not resign, but would be re-elected.

Senate's Blind Chaplain Dead.

The Rev. William Henry Milburn, the blind chaplain of the United States Senate, died at Santa Barbara, Cal. He had been in poor health for some time and went there hoping that the mild climate would benefit him. He was born in Philadelphia on September 29, 1823.

Strike Riots in St. Petersburg.

Serious strikes have broken out in St. Petersburg, Russia, and bloody encounters have taken place between the police and the strikers.

A PANIC IN WALL STREET

$40,000,000 Paper Loss in Northern Securities.

The Cause is the Belief That the Court Decision May Be Applied to All the Great Combinations.

New York City.—Panic reigned in Wall street Monday. The bears pounded their fellow traders, the bulls, and hit market quotations from $2 to $10 a share in active securities and to as high as $19.50 a share in the inactive issues. The losses in shares, according to market quotations, reached tens upon tens of millions of dollars.

The gross decline of 9¾ points in Northern Securities Company stock alone represented a paper loss of almost ten per cent. on $400,000,000, or $40,000,000. The volume of trading was more than double the recent average, and not since the Northern Pacific corner of May 9, 1901, had such excitement prevailed in the financial district.

The cause of the commotion was the scope which speculators allotted to the Federal Court decision which pronounced the Northern Securities Company an unlawful concern, a combination in restraint of trade. They adapted the decision to include all the big railroad companies, all the recent combinations and interweavings of transportation companies, and all the great industrial concerns, especially those affiliated with railroad companies.

There was a rumor that, following the Government's success in its contention against the legality of the Northern Pacific and Great Northern merger, suit would be begun to uncover the Coal Trust. It was said also that action would lie against the control of Southern Pacific by Union Pacific, and that the holdings of shares of one railroad by another which competes for traffic would raise questions as to the legality of such ownership.

These applications of the North Securities case and the rumors followed convulsed the market shares. But it was only because speculators seized the opportunity attack the position of the bulls.

From an authoritative source learned no new plan has been cred, or even outlined, by Mr. and Mr. Hill in regard to meeting emergency created by the decision. Verbal notice of the the case to the United States Court has been given, a rule of the Court the erate as a stay of just case cannot come up next fall there is sider the situation no immediate of the Northern S[illegible]

NAVAL LORE FOR LAND F[illegible]

Artillery Man[illegible] Likely to Read [illegible]

[illegible]ton, D. C.—The Secretary of War has approved a scheme proposed by General Randolph, Chief of Artillery, by which it is proposed to give artillerymen in fortifications a better knowledge of the character of war ships, as well as to acquaint them more generally with matters nautical. It is proposed, among other things, to provide the coast posts with a set of international flags and a flagstaff from which they may be displayed and signals exchanged with passing naval and revenue vessels.

"If the positions of our fleet are not well known to our coast artillery," said General Randolph, in forwarding his recommendations, "it is not improbable that a friendly vessel approaching a fort in thick weather or after dark might be mistaken for a possible enemy, which would lead to disastrous results."

DIED TRYING TO SAVE OTHERS.

A Well-Known Indiana Attorney and Boy Burned to Death.

Indianapolis, Ind. — Nathan Morris, one of the best known attorneys in Indiana, and Frank Haas, the twelve-year-old son of Dr. Joseph Haas, were burned to death in a fire which almost totally destroyed the residence of the physician. Mrs. Joseph Haas, Miss Belle Haas, Miss Rore Haas, Louis Haas and Grace Lemon, a governess, were injured more or less seriously.

The fire started at 3 o'clock from the furnace. The family was asleep on the second floor. Morris was a brother of Mrs. Haas. From the position of his charred body it was evident that he was endeavoring to arouse the family when overcome by the flames. The firemen succeeded in saving the other members of the family.

Morris was the senior member of the law firm of Morris & Newberger. He was born in California in 1857, and had practiced here since 1877.

KILLED BY A BASEBALL.

Witness in Murder Trial Met Death While on Leave From Courtroom.

Dallas, Texas. — Aaron Sokolski, a witness in a murder case that is being tried at Orange, Texas, and whose testimony was considered important to the prosecution, was killed in a most peculiar manner.

While waiting his turn on the witness stand the Judge permitted witnesses who were not needed for a considerable time to go to witness a baseball game.

Sokolski was leaning with his back against a low fence back of the catcher. A wild pitched ball passed the catcher, hit Sokolski in the right temple, knocking him insensible. He died in two hours' time after the accident.

German Navy's Need of Men.

Owing to the increasing needs of the German Navy the Imperial Government has availed itself for the first time of its right to select recruits from the interior of the country. Three hundred Bavarians have been selected to serve in the navy instead of the army.

Russian's Death Alarms Turks.

The death of M. Stcherbina, the Russian Consul at Mitrovitza, who was shot by an Albanian sentinel, has caused much alarm in Constantinople, Turkey.

North Plainfield Weekly Review.

VOL. 4—NO. 6. NORTH PLAINFIELD, N. J., SATURDAY, APRIL 25, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

F. A. Sisson and daughter, of Somerset street, have removed to Chicago.

The Monday Afternoon Club will hold its annual reception, Thursday at the Casino.

Members of the Retail Clerks' Association gave a dance in the Casino Thursday evening.

George B. Allen, of Linden avenue, was tendered a surprise party Thursday night by a number of his friends.

Mr. and Mrs. William Debele, of Somerset street, entertained Miss Florence Obl, of Newark, Sunday.

The Borough Sewer Commission will hold a public meeting in Saengerbund Hall next Thursday evening.

Rev. George C. Wilding, D. D., will lecture next Tuesday evening at Monroe Avenue Chapel on "Ministerial Mishaps and Misfits.

If you are interested in strawberry plants and nursery stock it will pay you to read the ad of J. P. Wolfe in our advertising columns

Rev. Theodore Duensing will preach at St. Peter's German Lutheran Church on Grove street, Sunday 10.30 a. m. Sunday School at 9.30.

Professor Edward Howard Griggs will lecture in All Souls' Church, Friday, May 1 at 8 o'clock p. m. His subject will be "St. Frances of Assisi."

The first Episcopal service for the Plainfield colored people was held in the chapel of Grace Protestant Episcopal Church Sunday afternoon.

Adam Dealaman, postmaster of Dunellen, passed away at his home Thursday evening. He had been suffering for some time with liver trouble.

Andrew Love, of Duer street, President of the North Plainfield Board of Health, has been ill at his home this week with a severe attack of asthma.

A slight fire at the home of George Fairchild, Grandview avenue, Wednesday morning, caused the melting of a lead water pipe and the cellar was flooded

Members of Grace M. E. Church tendered their pastor, Rev. E. L. Earp a reception last Friday evening, it being the anniversary of the second year of his pastorate.

James Slorah, formerly of Plainfield, but now of Chicago Heights, who has been visiting his parents on McDowell street, returned to his place of business today.

The twenty-fifth anniversary meeting of the Woman's Home Missionary Society of the First Baptist Church was held in the lecture room of the church Thursday afternoon.

The Golden Circle of the King's Daughters, of Grace M. E. Church, will hold a clipping social next Thursday evening. The proceeds will be used for benefit of the City Nurse.

The T. A. B. fair which was held for one week was closed Wednesday evening. The net proceeds have not been announced yet, but it is confidently believed the amount will be large.

The Plainfield Board of Education will purchase the old Seventh Day Baptist Cemetery for the site of the new High School. The site will cost about $12,000. The bodies will be removed to Hillside cemetery.

The local union of Carpenters and Joiners gave a ball in Saengerbund Hall, Thursday evening. Suhr's Imperial Orchestra furnished the music. The receipts will be given to Muhlenberg Hospital.

At a meeting of the Plainfield Board of Trade Tuesday evening, the president was authorized to appoint a committee of three to look into the question of North Plainfield Borough consolidating with Plainfield.

The case of the State Board of Health vs. Abram Ten Eyck, of North Branch on the charge of selling adulterated milk was tried before Justice Smalley, this borough and a jury of twelve men, last Friday. The jury brought in a verdict of not guilty.

Howard Carver, of Harrison avenue, was brought before the Recorder Thursday evening to answer a charge made against him for not sending his four children to school, He was told that the four children must be sent to school Monday or the law would be enforced under the truancy act.

The little son of Alfred Seidel, of Jackson avenue, was knocked down in front of the North Plainfield High School Wednesday by a wagon, in which were two men. The little fellow was found to have received a gash over the left ear, which received attention from Dr. Buchanan who happened to be in the schoolbuilding at the time.

More Bridges for Somerset County.

The Somerset County Board of Freeholders met at Chimney Rock, Wednesday, and decided to build a bridge near Ernet's Grove, and a new one near O. A. Cortelyou's farm. on the road running from Wood's Tavern to Flagtown. The Board will meet near Mine Brook schoolhouse today.

Authority of Board of Health.

Some people have an erroneous idea of the power or authority of the Borough Board of Health.

For instance, this week complaint was made to the Board of Health that ashes and waste paper were being dumped on a vacant lot on Grove street, with a request that same be stopped.

Ashmen are licensed by Borough officials and not by the Board of Health, and the latter can only act in cases where garbage is mixed with the ashes and thus becomes a menace to health.

Strike on the Duke Estate.

Last Monday morning about one hundred Slav laborers on the Duke estate, went on a strike and attempted to prevent some Huns from going to work. A fight ensued, and, as the Huns won, they went on to their work. The Huns hearing that they would be met with guns and clubs when they returned from work, and appealed to their manager who placed them in wagons and went at the head of them. When the leader of the Slavs attempted to level a gun at his head, he promptly covered the man with a pistol, who dropped his gun and allowed the wagons to pass on. Tuesday the strikers, however, would allow no one to cross the bridge to Duke's estate.

The demands of the stone masons, who also struck Monday for 50 cents a day more, were granted and they returned to work, but the Slav strikers will not be allowed an increase. Mr. Duke is reported as saying that he would take the men back again at the same wages paid before the strike, but the men have not returned to work yet.

F. A. Van Auken Buried.

The funeral of Frank A. Van Auken, of Plainfield, who passed away last Saturday afternoon at his home, was held Tuesday evening. As the deceased was a member of Jerusalem Lodge, No. 26, F. A. M., Jerusalem Chapter No. 24, R. A. M., and Trinity Commandery, No. 17, K. T., the service was the full Templar service and in charge of Eminent Sir Bingaman, the commander and Rev. J. W. Richardson, prelate of the commandery. The remains were taken to Dover Plains, N. Y., Wednesday morning and interred in the family plot. Thirty of the knights accompanied the remains and held a service at the grave.

New Jersey Will Get the Money.

The Hunterdon County Orphans' Court has appointed John D. Bonnell, of Whitehouse Station, administrator to settle the estate of Daniel Listing, of Whitehouse, who died September 11, 1902, at Asbury Park, in possession of considerable personal property and lands at Raritan, Somerset county, but leaving neither heirs nor will.

This is the second time in the history of the State of New Jersey that a man has died in this way. The first instance was in Hudson county many years ago. After learning of this state of affairs the attorney-general had a writ issued in the Court of Chancery directing Sheriff McMurtry, of Somerville, to investigate the matter. This he did by summoning a jury of twelve men, who, after hearing testimony, rendered a verdict to the effect that there were no heirs; that no will had been found. Then the State advertised six months for heirs and none having responded the real estate and what remains after all the debts of the deceased are paid will revert to Daniel Listing's heir, the State of New Jersey.

Listing, when nine years old, was taken from the Morris County Poorhouse, November 3, 1856, by Peter W. Tiger, a wealthy farmer, who lived between Peapack and Chester.

After he became of age he went to Raritan, where he was employed a long time by Dr. J. F. Edwards. In 1886 he came to Whitehouse Station, where he worked for Mr. Bonnell. He was of a frugal nature and accumulated quite a fortune. Many times he said he was going to make a will, but that is as far as he ever got in that direction. He could never remember anything about any relatives, excepting a sister, who died.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Sarah A. Hart to Wm. Blair, $110.

Wm. M. Culbertson et ux to John Cary et ux, $1.

THE SOMERSET COURTS

Many Licenses Granted.--Driff of Bound Brook Indicted.

The April term of Somerset County Courts opened Tuesday, with Justice Garretson and Judge Schenck on the bench.

The following Grand Jurors summoned by Sheriff McMurtry are:

Charles J. Fury, Edwin R. Voorhees, Runyon Field, Henry W. Reasoner, Ezekiel B. Allen, Charles C. Kenyon, Wm. H. B. Wyckoff, James B. Duke, C. Spencer Van Cleef, Wm. O. Worth, Chas. A. Reed, David J. Carney, Isaiah C. Mullen, Martin B. Huyler, Wm. R. Bromfield, Charles Barker, Samuel D. Opie, John Studdiford, John H. Cooper, John R. Gannon, Charles H. Servis, Abram B. Hageman, Edward E. Cooper, Frederick Kirch.

All were sworn in except Mr. Duke, who did not arrive until the jurors were leaving the court room.

Judge Garretson in his charge said that it was the court's understanding "that there is one charge of homicide to be investigated by the Grand Jury. A man was killed at Bound Brook struck down by a club in the hands of someone lying in wait for him. A person is in jail charged with the crime. This should be given careful consideration, and, if the evidence satisfies you that there is cause you should indict him for murder."

The list of causes taken up were as follows:

SUPREME COURT CAUSES.

1. Edw. A. Embury v. W. S. [illegible] contract. J. P. Powers; W. S. [illegible]

2. J. Erwin Hillpot v. D[illegible] Quarry and Construction Co. Dungan & Reger; J. T. Van [illegible]

3. Guiseppe Vene v. [illegible] Co'—tort. Dungan & [illegible] Dunn.

4. John Grogan v. Al[illegible] Chas. J. McNabb; Henry [illegible]

5. Flora J. and Corne[illegible] v. Franklin M. F. As[illegible] East Millstone—contract. Booraem; Bartine & [illegible]

6. Elijah Stevens v. John E. D. Smith, Adm'r—contract. Fred'k A. Pope; W. S. Angleman.

CIRCUIT COURT CAUSES.

1. Albert Mackie v. Frank O. Dunning—certiorari. Bird & Runyon; Reed & Coddington.

2. Den. J. Galbraith v. C. E. Moldenke—contract. W. S. Angleman; F. A. Pope.

3. J. C. Wyckoff v. Henry C. Stryker, builder, and Frances A. Lord, owner—mechanics' lien. Dungan & Reger; James J. Bergen

4. John H. Harris v. Theodosia E. Carman—attachment. Edwin C. McKeag; James L. Griggs.

5. Mrs. Ruth Carman v. Theodosia E. Carman, Adm'x—attachment. E. C. McKeag; Jas. L. Griggs.

6. William G. Deinzer v. Theodosia E. Carman, Adm'x—attachment. E. C. McKeag; Jas. L. Griggs.

7. James Passey v. Theodosia E. Carmen, Adm'x.—attachment. E. C. McKeag; Jas. L. Griggs.

8. Garret V. Van Doren v. Estelle P. Brokaw—attachment. E. M. Wright; G. W. Anderson.

SOMERSET COMMON PLEAS.

1. Timmis & Deal v. Edwin J. Thompson—contract. J. J. Meehan; Fred Prout.

JUSTICES' APPEALS.

1. Lewis Van Doren ads. Wm. D. Vanderbeck, Justice Kitchen.

2. Clayton McMurtry ads. Wm. Biles. Kitchen

3. J. P. D. Kirch ads. Lemuel A. Tunison. Brampton.

4. North Jersey Nurseries Co. ads. David Y. Moore. Bowers.

5. Albert Voorhees ads. Frank Albert. Kitchen.

6. Catherine A. Hardgrove ads. Glenn Bros. Kitchen.

7. Patrick Agney ads. Lewis A. Clemant. Smalley.

8. Pasquale Fullo ads. Angeline Azzato. Sutphen.

9. Francis S. Carr ads. Elizabeth Seigel. Sutphen.

10. Dennis Wyckoff ads. Thos. Zanoni. Brampton.

Their disposition follows: Supreme, No. 1, settled; 2, 3 and 6, ready; 4, off by consent; 5, to be tried by court. Circuit, No. 1, laid over; 2 and 3, ready; 4, 5, 6 and 7, ready Thursday; 8, off by consent. Common Pleas, No. 1, settled. Justices' Appeals, Nos. 1, 2, 4, 8, 9 and 10, ready; 3, settled; 5, 6 and 7 (Court).

Judge Schenck announced that he would take up the trial of indictments May 11, Justices' appeals 13th and Court appeals 23d.

The following licenses were granted in North Plainfield; Inns and Taverns—Chas. Jensen; wholesale—N. J. Bottling and Rectifying Co., and Adolph Behrer.

William N. Pangborn, J. W. Sebring,

HIGH SCHOOL NOTES.

Items of Interest Regarding the Borough Schools

Freeday comes on Friday, May 1 this month.

Grover Kipsey spent Sunday with friends at Skillman, N. J.

Edgar Adams, who visited his parents in Chicago last week, has returned to his studies.

Stanley Fisher has appeared as a candidate for the Washington Park Athletic Club baseball team.

Leo Kenney, of Fairview avenue, who has been spending several days in Bound Brook, has returned home.

Leslie Backer, who has been spending his Easter vacation at Whitehouse, N. J., has returned to his studies.

All the students of the North Plainfield High School will be given their regular monthly spelling test next Monday.

There is a possibility that George Conover of last year's baseball team may return to school and play with the team.

Miss Clara Van Fleet, piano player in the High School, has returned to her duties after spending a week in Boston.

Otto Mueck, of Watchung avenue, who has been spending his Easter vacation at the National Capitol has returned home.

The High School will play the Rutgers "Prep" Baseball team this afternoon on N. P. H. S. Field. A good game is promised.

Miss Hannah, who has charge of the [illegible] in Spencer Hall and who was called away by the illness of her father has returned.

Miss Edith Osborn, of Montclair, N. J. who has been spending the Easter holidays with Miss Adelaide Howard, of Mercer avenue, has retuned home.

Miss Julia Jerome, a teacher in the [illegible] School, residing on Craig place. returned to her class work after visiting [illegible] parents at Sy[illegible]

[illegible] R. W[illegible] of the "Prep" class [illegible] Miss Minnie G[illegible] City has returned home.

Miss Anna Holcomb, of the Seventh Grade, who has been spending her Easter vacation at her home in Trenton, N. J., has returned to her class.

Miss Mary Weller, head of the Sixth Grade, who has been spending her Easter vacation at her home in Washington, N. J., has returned to her class work.

The game of baseball which was to have been played between the North Plainfield High School and Westfield High School was cancelled because of the poor condition of the ground.

George Ovens had an operation performed last Tuesday for a foreign growth in his throat. He is doing finely, but will be unable to play with the team this afternoon against Rutger's "Preps"

Miss Lizzie Southworth and Miss Grace Anderson, teachers in the Primary Department of the Somerset street school who have been visiting friends in Binghamton, N. Y., have returned home.

The Plainfield High School Baseball team defeated the team representing Newark Academy, on Stillman Field last Saturday morning by the score of 8 to 4. The game was void of any special features.

Herbert Conover while trying to catch a fly in the game with Pennington Seminary Saturday, stumbled and the ball hit him in the face causing his right cheek to swell up. He was put out of the game temporarily and was attended to at a Pennington drug store.

The following team will line-up against Rutgers "Prep" on N. P. H. S. field this afternoon: George, P; Schuck, C; McLaughlin, 1; Humble, 2; Armstrong, S; Adams, 3; Newmiller, L; Kipsey, C F; Mundy, R. Conover and Nischwitz substitutes. The game will be called at 3 p. m. sharp.

Out of respect to Captain Fred Van Auken, whose father passed away at his home on Saturday, the Plainfield High School management has cancelled the games with the Kluani Club of Princeton University which was to have been played on Wednesday afternoon and the game with the Princeton "Prep" school this afternoon.

The North Plainfield High School Baseball team was snowed under in the game with Pennington Seminary at Pennington last Saturday afternoon.

The boys showed the lack of diamond practice and were also completely outclassed by the seminary team which was composed of men as compared with the High School team. Fred Armstrong, on whom the team relied to play, was detained at the last moment and Edgar Adams the crack third baseman was visiting his parents in Chicago and their places had to be filled by substitutes. Mundy at third played a good game considering that this was his first game at that post. Most of his errors were in a way very excusable. McLaughlin's work at First and in the box were highly commendable, especially in the latter place and the number of hits made off his pitching was due to improper support by the fielders. His one handed stops of two hot liners, while pitching, called forth prolonged applause from the spectators.

Conover's game at short was fairly good but he is too small for the position. Arthur Humble played an exceptionally fine game at second taking Ovens throw from behind the bat beautifully and also scooping up the grounders with the air of a professional. George Ovens who played behind the bat made North Plainfield's only hits. His throwing to second was perfect and he caught several of the Pennington base-runners both at second and at third. Newmiller played a fine game in left field but his batting was very weak. Kipsey in the center field is very much inclined to be a Grandstand player now that he is a member of the High School team and many flies that were hits should have been caught by Kipsey. Kipsey is all right on a fly ball except when it is near the ground and he should be cured of this habit. Shuck in Right field and First base played a very poor game being very nervous. His batting is the poorest of any member of the team he being inclined to be very erratic. Edgar George's game in the box was fine and the score would no doubt have been greatly lessened had his arm been in better condition, but he overdid himself in practice on Friday. Nischwitz's playing could not be judged as he did not have any chances in right field although he played with a will

The playing of the Pennington Seminary team was almost perfect and the errors made by first baseman Jones were excusable. Pitcher Hart had perfect control of the ball and perfect support by the members of his team. The team is very strong in batting. The fielding is perfect

[illegible]

EDITOR OF REVIEW:

The announcement made in one of the city papers that the Borough Sewer Commission have three ways to dispose of sewerage, and apparently no more, must be a mistake, as the committee certainly know that there are more than double that number of ways, and the chairman, whose business it is to speak for the others, cannot be ignorant of the fact. Whether they have or have not investigated the other methods does not appear, but we desire to call your readers' attention to a plan that has not been publicly mentioned, but that deserves careful attention, as it has passed the experimental state, and is highly commended.

Pasadena, California, a town of not quite 10,000 inhabitants, some 15 years ago established a sewer farm to dispose of her sewerage, and she claims that it is a perfect success in every way. It is under municipal control, and as has been well said, completely refutes the theory that no city can economically manage affairs of this kind, for it has proved to be a very profitable investment, yielding the city $25,000 a year, according to the "Outlook," "besides effecting numerous savings." It is asserted that the sewerage is disposed of in a most healthful and satisfactory manner and that no objection can be raised against it by sanitarians. We read that "sixty acres are planted in English walnuts; and alfalfa in large quantities has been raised, sufficient for the city's horses, and many tons over for sale." A large crop of corn and pumpkins has also been raised and a herd of 100 swine has been fattened for market thereon, and now this number has been increased to 300. If we can believe those who know the place, this method of disposing of sewerage has been entirely successful, and there is no reason why other municipalities may not secure the same results, especially as other places than Pasadena have tried the same method and found it satisfactory.

It may be objected that Plainfield adopted this plan some years ago and failed, but in fact Plainfield did not adopt it at all, for in the first place they did not have, or at least did not use sufficient land to ascertain what the results would be; in the second place they did not have the right kind of soil, and in the third place there was no systematic and scientific farming really attempted. To say that the experiment was tried here and failed is misleading and one might as well condemn the sewing machine or the telephone because the first ones gave poor results. At all events this method should be carefully considered, before settling on any definite plan of action.

OBSERVER.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

A vein of iron ore has been discovered on the land of Randolph Stinson, of Bernardsville, and a New York company is trying to lease the property. Some forty years ago ore was taken from this place in large quantities, but it was supposed the vein was worked out. Two years ago Mr. Stinson had the old mine filled in.

A non-union man employed at the Standard Oil Works at Constable Hook was going to his work Monday on an Avenue C trolley car to Bayonne, when he was abused by Michael O'Rourke and Frank Redkey. They called the workman a "scab." They were arrested and fined $10 each by Recorder Lazarus.

The officials of the Central Railroad of New Jersey, on April 1, voluntarily increased the wages of the engine drivers and firemen. Men who on that date were receiving $3.25 to $3 50 a day now get $3.85. Besides the wage increase the regulations governing employes have been modified so that the condition of the men is greatly improved.

Deputy Game Warden Miller arrived from Lake Erie last Tuesday morning with 2,000 calico bass to stock the streams of Somerset county. Mr. Miller placed 500 of these bass weighing from 1½ to 2 pounds each in the South Branch river. During the next few days he will stock the North Branch and the Millstone rivers with the bass.

The W.C.T.U., of Long Branch, has decided to publish a list of the license signers prior to "license day," which is the fifth of May. It is the first time anything of the kind has taken place, and as a result of the intention to publish the list, signers to hotel licenses will be scarce. Already many [illegible]

[illegible] topher Hayes, of Trenton, ten years old, for rescuing Mary Burke, six years old, from drowning last summer will take place at the Valencia Boat Club on Saturday evening, May 2. A public reception will be given the little hero at that time. The New York Volunnteer Life-saving Association got a record of the rescue and decided to award a medal for the heroism shown.

Rev. J. G. Edwards, pastor of the Broad Street Methodist Church, of Trenton has adopted a novel means to prevent the dropping off of the attendance at his services. He has issued cards to members of the congregation, and at the close of each meeting will stand at the door and punch the cards of those present. At the end of the summer he will award prizes to those who have not missed any of the services.

Several counterfeit $5 notes, of the Morristown, N. J., National Bank, have been passed lately on the box offices of the Boston theatres. One particular note is the series 1882, check letter "A," on the National Iron Bank, of Morristown, bearing the signature of J. Vount Tillman, register; D. N. Morgan, treasurer. The Garfield head is not true. The star under the word New Jersey is imperfect, and the coloring is lighter than the genuine, but the reverse side would deceive anyone.

The Board of Education, of Perth Amboy, has failed to organize, despite Mayor C. K. Seaman's demand that the deadlock be broken. City Attorney C. C. Hommann has threatened to secure a writ of mandamus to compel the board to organize. Upon advice of Mr. Hommann, Comptroller W. D. Voorhees has declared that he will not sign any warrants ordered by the board until a president is elected. The members of the board are now talking of instituting proceedings to compel the comptroller to sign the warrants. They claim that a president pro tem. has power to sign them and that the comptroller has then no option in the matter.

Unable to remember words—many of them being but one syllable—William Chambers, of Trenton, is suffering at the McKinley Hospital with a disease rare in this country. Stricken with spells resembling epileptic fits lasting about twenty minutes, conscious of everything, Chambers is unable to control his actions. Sometimes he forgets his name and address. Words are forgotten by him, many of them of absolute necessity for daily conversation. The doctor's who are attending him say that but little can be done to relieve the man's condition. It is a disease of the entire nervous system.

TO AVERT A FREIGHT TIE-UP

Western Railroads Pay $170,053,000 For New Rolling Stock.

TO MOVE GREATEST WHEAT CROP

Traffic Managers Believe They Will Be Able to Handle It, But Cannot Make a Positive Prediction—Coal Strike Contributed to the Block Between the East and West Last Fall.

Chicago.—In view of the Government's forecast of the biggest winter wheat crop in the history of the country, and the prospect of an immense acreage of spring wheat and corn, the serious question is being asked, Will the railroads be able to move the crop and at the same time take care of their other traffic without a repetition of last fall's freight congestion?

So far not a railroad man in the West is bold enough to predict that there will be no such hindrance of traffic, but traffic managers and other officials talk hopefully and cite various reasons why they believe the experiences of the past season will not be repeated.

It is pointed out that freight traffic is so uncertain and irregular and railroad business so peculiar that a congestion is likely to result temporarily at any time, but, looking at the situation in its larger aspects, traffic observers disbelieve there will be a widespread and long-continued interruption of public carrying operations the coming year.

Briefly stated, here are the reasons for a hopeful view:

First—Car capacity and traction power are being greatly enlarged.

Second—Terminal facilities are undergoing great extension and improvements.

Third—Better methods for returning and utilizing empty cars are being formulated.

Fourth—There probably will be no big coal strike and attendant consequences to upset calculations or disturb natural movements of freight.

Fifth—Elevator and storage facilities will be better than heretofore.

Sixth—Much freight hitherto passing through Chicago to the East will be diverted to Canadian and Southern lines, going to the Atlantic by rail through the provinces, and by water from New Orleans.

Seventh—Roadbeds are being hardened, grades reduced and curves eliminated, thereby increasing the drawing power of locomotives.

The figures show that the in the last three years the roads in question have spent a total of $170,053,000 for locomotives and freight cars, counting the average cost of locomotives $17,000 and of freight cars $1000.

Based on the tables prepared by the [illegible] Railroad and Warehouse Com-

[illegible] new equipment marks an advance of almost half as much again as these percentages indicate. The reason for this is that the average tractive power of locomotives, as it is called by railroad men, has increased from 17,308 in 1900 to 23,634 in 1903, and that the capacity of the freight cars has been enlarged similarly.

The following table shows the number of locomotives and cars under construction at the present time, and what the total equipment will be when these are completed and put into commission:

Equipment.	Under contract.	Total.
Engines.....	968	2,769
Box cars.....	7,627	46,637
Coal cars.....	2,373	12,163
Stock cars.....	300	4,852
Refrigerator cars...	200	3,032
Flat cars	1,540	5,893
Ballast cars.....	300	1,724

The foregoing table is made up from the returns of fourteen roads. Other Chicago systems not included in the above table report the following total equipment, covering the last three years:

Locomotives.....	350
Freight cars.....	30,656

In addition to these there have been added since 1900 nearly 12,000 other cars, known as gondolas, hoppers, cinder cars, tank cars, ore cars, vegetable cars and the like.

"Western roads and the big Eastern lines are doing their best to anticipate and avert another congestion," said Mr. Thompson. "The situation last fall and winter was an abnormal one, on account of the big coal strike in the East. It brought about a condition which hindered the handling of all other kinds of freight. The grain traffic, corn and wheat together, does not in itself cause a congestion. The trouble comes when there is a sudden and prolonged rush of all kinds of freight. I don't look for great difficulty in handling the coming crops of corn and wheat. Much depends, of course, on market conditions and the eagerness to deliver grain on a good demand at attractive prices. With anything like a uniform distribution of the grain movement through the delivery period there is nothing to fear. The new winter wheat crop will not begin to move in quantities before the middle of July or the first of August."

The British Food Supply.

A royal commission has been appointed to inquire into the question of Great Britain's food supply in time of war, the Prince of Wales being a member and Lord Balfour of Burleigh the Chairman.

The Sultan Again Warned.

Representatives of the powers at Constantinople, Turkey, have again urged on the Sultan the necessity of suppressing the disorders in Albania. The Austro-Russian entente as regards the Balkan situation remains unbroken.

American Dentists Barred.

American dentists in Dresden, Saxony, have been forbidden to use a doctor's degree or sign where their degrees have been obtained from Chicago institutions.

FATAL CRASH OF TRAINS

An Express Strikes a Freight at Red House, N. Y.

Bodies of the Victims Found in the Wreckage—Many Persons Injured—Flames Destroy Passenger Coaches.

Jamestown, N. Y.—Eight persons are dead and ten are injured, three of them seriously, as a result of a collision between an express train and a freight train on the Erie Railroad near Red House, N. Y.

Of the dead only one, Robert H. Hotchkiss, of Meadville, a brakeman, was identified. Seven bodies, apparently those of three men, three women and a child, were burned beyond recognition in the fierce fire which followed the wreck. The women are said to have boarded the train at Youngstown, and to have come from Pittsburg.

R. S. McCready, mail weigher, of Meadville, Pa., and Frank Barbite, of Jamestown, a traveling salesman, were missing, and it was likely two of the unidentified bodies were those of the two men.

The wrecked passenger train was a vestibuled limited express, known as No. 4, running from Chicago to New York, and was made up of Engine 545, in charge of Engineer Samuel Cook and Fireman Fred Bo.., of Meadville; one combination car, two day coaches, three sleepers and two private cars. It was derailed by striking a freight train which was entering a siding at Red House.

The passenger engine and some of the coaches ran on beside the track for a distance of three rods and crashed into a small wooden structure used as a feed store and school house. The first half dozen cars of the freight were wrecked. They were box cars loaded with coal. The coal filtered in among the wreckage. All but three of the cars of the express followed the engine, and the whole mass of wreckage was soon in flames. The combination car, two day coaches and two sleepers, besides several freight cars, were consumed.

There is some dispute as to the cause of the wreck. The passenger train was running east, and the freight, which was westbound, had orders to go into the siding at Red House and wait for the passenger train to go by. The siding is about a mile and a half long, and there is a tower of the block system near the west end.

The freight was drawn by two engines. Some trouble was experienced in entering the siding, and the foremost engine of the freight was sent in along the siding with a flagman to hold the express. It is alleged that the operator in the tower—Lawrence Vale, a boy seventeen years old—saw the light engine of the freight which was bringing up the flagman, and supposed the freight was on the siding behind it. With this mistaken idea, it is thought, Vale displayed a white signal toward [illegible] and saw only the clearance signal from the tower. The train ran toward the east end of the siding at high speed, struck the second engine of the freight train just as it was about to clear the main line, tearing off the cylinder and part of the cab, and jumped the track.

MERGER DECISION SUSPENDED.

Action of Court Releases Over $4,000,000 in May Dividends.

St. Paul, Minn.—Judge Sanborn, in the United States Circuit Court, has granted the application of the Northern Pacific and Great Northern railways that the decree enjoining the Northern Securities merger be suspended, pending the outcome of the appeal to the Supreme Court, insofar as it prevents the paying of dividends by these railroads to the holders of Northern Securities stock. The decision releases over $4,000,000 in May dividends.

St. Paul, Minn. — Counsel for the Northern Securities Company and other defendants filed their appeal from the decision of the United States Circuit Court in the railroad merger case. Thirty-four points of error are alleged. Exceptions are noted to every paragraph in the decree, and the court is held to be in error in rendering any decree save one for dismissal of the petition and proceedings.

BOYS BURIED BY LANDSLIDE.

They Went to the Riverside to Dig and Were Overwhelmed.

Holyoke, Mass.—Bernald and Walter, sons of Charles Axmann, aged thirteen and ten years, respectively, were buried under a landslide in view of their home and were suffocated to death. The boys left their home near Ingleside, saying that they were going to visit relatives across the river. Instead, they took shovels and went to play beneath a high bank of sand which the river had shelved.

When the boys did not come back men dug beneath the bank and found the bodies, which were buried beneath several tons of earth.

BROKER SENT TO PRISON.

E. J. Dunning to Serve Not Less That Five Years.

Boston.—Edward J. Dunning, the Boston broker who recently was found guilty of the larceny of $23,000 from the estate of Francis G. Brooks, was sentenced to serve a term in State prison. The penalty is one of not more than eight nor less than five years, the first day to be in solitary confinement.

The evidence presented against Dunning was to the effect that he obtained the money from Mr. Brooks by fraudulent stocks transactions.

Judge Carluck a Cholera Victim.

Judge Carluck, of the Court of First Instance, in the Philippines, is dead in Cebu from cholera. The epidemic of cholera is practically over, there being but a few cases in the southern islands.

New Twelve-Inch Rifle For the Iowa.

Rear-Admiral O'Neill, Chief of the Bureau of Ordnance, at Washington, has ordered shipped to the Brooklyn Navy Yard a brand new twelve-inch rifle to take the place of that recently destroyed by an explosion on the Iowa.

FEDERATION OF EMPLOYERS

600 Omaha Business Men Organize to Fight Union Labor.

AGAINST SYMPATHETIC STRIKES

Desire Freedom to Employ Non-Union Workers and Oppose Restriction of Output—Association Possibly an Outcome of Manufacturers' Convention in New Orleans—A Similar One in Vermont.

Omaha, Neb.—Backed by the National Manufacturers' Association, 800 business men of Omaha have organized into the Business Men's Association for the avowed purpose of protecting themselves from the demands of union labor. It is said that the new organization will fight the labor organizations to the death. It is believed that this organization is an outcome of the meeting of the National Manufacturers' Association at New Orleans, and that it is the forerunner of the Employers' Federation spoken of in the annual report of that body. The leaders in the movement here issued a statement, part of which follows:

"The organization is known as the Business Men's Association, and its purpose is purely defensive, and made necessary, as it has been thought by the various business interests identified with it, by the apparent determination on the part of the labor organizations of the city to either control or ruin every business enterprise.

"The great object of the association is to protect its members in their rights to manage their respective businesses in such lawful manner as they may deem proper and expedient, employing such help as seems best adapted to their purposes, under such contract as is mutually satisfactory to the parties concerned, and not to antagonize any individual or organization.

"The platform of the organization embraces the following principles:

"First—Freedom to employ union or non-union labor without discrimination.

"Second—No limitation or restriction to output.

"Third—No sympathy strike."

Should the report that the National Association is behind the Omaha movement prove true, the fight will be very bitter. Already the labor organizations are asserting that they will have the support of organized labor everywhere in the coming fight.

ORGANIZING IN VERMONT.

Business Men Will Form an Employers' Association.

Burlington, Vt.—A meeting of business men of Vermont has been called to meet in Rutland and form an organization to be known as the Em[illegible]tion of Vermont. [illegible] men's organization [illegible] in Ohio. The objects of the organization will be:

"To protect its members in their rights to manage their respective businesses as they shall deem proper; the adoption of a system whereby members may ascertain who is and who is not worthy of their employment; the investigation and adjustment by proper officers or committee of the association of any question arising between the members and their employes when such question shall be submitted to the association for adjustment; to endeavor to make it possible for any person to obtain employment without being obliged to join a labor organization; to protect its members against legislative, municipal and other political encroachments."

Bill Allowing Peaceful Picketing.

Boston.—Without debate the House, by a vote of 70 to 41, passed to be engrossed the bill to allow peaceful picketing during strikes and lockouts.

MAFIA VICTIM KNOWN.

Benedetto Madonia, of Buffalo, N. Y., Killed For Threatening Band.

New York City.—Benedetto Madonia, of Buffalo, was the man whose lifeless body was found in a barrel in East Eleventh street. He was murdered, all evidence indicates, because he threatened to expose the secrets of the Mafia band of counterfeiters and blackmailers, the unconvicted members of which are under arrest in connection with the murder.

Madonia, it appears, was not a member of that band. His brother-in-law, however, was. And it was through efforts to aid his relative that Madonia incurred the enmity of the other members.

This brother-in-law's name is Giuseppe de Priemo. He is serving a sentence of three years in Sing Sing Prison for counterfeiting. When he was convicted, about three months ago, he was possessed of considerable property and money, about $25,000 in all. Before going to prison he turned this wealth over to his old comrades in crime. It was to be used by them to aid him and others of their band in the clutches of the law.

As soon as they got this money, and de Priemo was behind the bars, it appears that the members of the band divided the money among themselves and abandoned the prisoner to his fate. Madonia attempted to recover the amount, or some of it, for use in bringing about de Priemo's removal from Sing Sing to the Erie County Prison, near Buffalo, and for the family of the prisoner. He was killed for his pains.

These were some of the revelations made by the police and United States Secret Service agents.

Coal Miners Locked Out.

Thirty-two of the Reading Coal and Iron Company's forty-three collieries in Pennsylvania were closed, the men being locked out because they refused to work nine hours on Saturday; more than 30,000 men are out of work.

Died at the Age of 113.

Scott B. Anderson, a negro, for many years a resident of Bangor, Me., and for some time an inmate of the almshouse, is dead. Anderson's age is given as 113 years. He asserted that he was born in Iowa in 1790.

ARABS GREET M. LOUBET

A Brilliant Ceremony Held in the Algerian Desert.

Tribesmen Express Their Loyalty and the Chiefs Are Decorated—French President Begins His Return Journey.

El Kreider, Algeria.—President Loubet has witnessed a remarkable demonstration by the nomadic tribesmen of the desert who acknowledge the suzerainty of France. The tribesmen gathered in thousands from all parts of Southern Algeria for a ceremony of Oriental splendor.

M. Loubet had heretofore visited only those sections of Algeria which show the advance of French colonization. He now entered the desert country, with its sparse and burned vegetation, where the stretches of sand and hot sun produced the curious effects of mirage.

The ceremony was held on a vast plateau. Here the tribesmen assembled from all quarters, some of them having journeyed 300 or 400 miles across the desert. Their tents were arranged in circles after the Arab custom, each tribe occupying a large circle, in the centre of which were droves of richly harnessed camels. The chiefs were mounted on horses, but the tribesmen were on camels, and formed great caravans. More than 8000 men participated in the gathering.

A superb tent of camels' hair fabrics and Arab tapestries had been erected for President Loubet. As each tribe passed in review its chief dismounted and paid homage to the President of France, who distributed decorations to the principal leaders.

After the review came a native exhibition of sports. There were feats of horsemanship and much burning of gunpowder, the exhibition ending by a charge of all the native cavalry, which wheeled across the plain and galloped toward the station occupied by the President, pulling up their horses within 300 yards of his position. A mimic combat followed. It represented the attack upon and capture of a caravan by a desert tribe.

The ceremonies were brought to a conclusion by a grand "diffa," or Arab banquet, given by the chiefs in honor of M. Loubet. The menu, which was printed in Arabic and French, included such desert delicacies as roast gazelle, "couscous," and camel's milk. Dances executed by celebrated native beauties followed, and after an exhibition of native methods of hunting, which included a hare chase by trained falcons, the day's entertainment ended.

The President then started on his return journey to Saida. The tribesmen, mounting their horses, rode at full gallop alongside the train as long as they could keep up the pace, their many colored burnouses fluttering in the wind, making a brilliant picture.

The day's entertainment presented a spectacle of barbaric splendor such as seldom has been seen by European eyes.

A COLORED SUPPLEMENT "VICTIM."

Lurid Ink Caused a Newsdealer to Die of Blood Poisoning.

Providence, R. I.—Willis S. Scribner, who resided at 65 Wood street, and was a newsdealer at 44 Plain street, is dead from blood poisoning, due, it is claimed, to handling the highly colored supplements of Sunday newspapers, particularly those from New York, the ink used on which is gummy and adheres to the hand.

Mr. Scribner was accustomed to use his right index finger in ripping open the bundles. He cut his finger with the raw edge of the paper and got some of the ink into the wound. This happened two weeks ago, and while the finger became swollen and discharged pus, Mr. Scribner did not become alarmed until a week ago Sunday, when his arm became exceedingly painful, and a large spot appeared near the elbow.

A physician was called, but it was too late. Mr. Scribner was forty-three years old.

AL. ADAMS GETS ONE YEAR.

Policy King Denounced as a Persistent Lawbreaker.

New York City.—Policy King "Al" Adams, who was convicted of having policy paraphernalia in his possession, was sentenced by Justice Scott to serve not less than one year and not more than one year and nine months in the State Prison, and to pay a fine of $1000.

Before pronouncing sentence Justice Scott said to the prisoner: "Albert J. Adams, I am quite satisfied that no other verdict could have been rendered by the jury in this case. For years you have been a persistent lawbreaker, the mainstay and chief of a miserable game that preyed upon the weaknesses of its victims. When the Legislature fixed the maximum penalty for this particular kind of crime it evidently had in view the conviction of just such persons as you, and I see no reason why the maximum penalty should not be given you."

KEARSARGE'S GUN HUNG FIRE.

Ensign Who Investigated Closed the Breech Just in Time to Save the Crew.

Mobile, Ala.—The battleship Kearsarge, while at target practice at Pensacola, narrowly escaped a serious explosion in the after superimposed turret. The gun was fired by electricity, but the charge failed to explode. Ensign J. W. Clement waited five minutes before opening the block. On doing so he noticed smoke issuing from the primer. He closed the block just as the charge exploded, escaping the recoil of the huge gun and saving the lives of his own crew.

Admiral Higginson complimented him upon his cool-headedness. The hang-fire lasted an unusual time.

DREYFUS DEMANDS AN INQUIRY.

He Takes Up an Alleged Declaration of Emperor William.

Paris, France.—Former Captain Dreyfus has sent a letter to War Minister Andre demanding an inquiry in regard to the document in which, it is alleged, Emperor William, in a marginal note, declared Dreyfus had supplied documents to Germany.

Dreyfus' letter refers to Esterhazy as "one who stands before the entire world as the culprit." The entire letter is in a sustained rhetorical style.

TOTS CRUELLY TREATED

Tortured With Hot Irons For Refusing to Perform Acrobatic Acts.

Judge, When Sentencing St. Louis Man, Regretted That He Could Not Inflict Harsher Punishment.

St. Louis, Mo.—In the Dayton Street Police Court John Earl was tried on a charge of maltreating his two tiny adopted children, George and Florence Migge, aged seven and eight respectively. A muttering, threatening crowd of lawyers, newspaper men and spectators gathered about the witness stand, where the tots told their stories. Attaches of the court surrounded the prisoner for fear of violence.

The children were found locked in a dark, rat-infested closet at Mrs. J. T. Hayes' rooming house on Washington avenue, where Earl and his wife lived. The discovery was made by Mrs. S. A. Thompson, matron of the Undenominational Widows' and Orphans' Home, who had charge of the children before Earls adopted them, two months ago. Famished and weak from loss of blood they swooned in the arms of Mrs. Thompson.

Dr. J. M. Newell, who attended the children, pronounced this the worst spectacle of inflicted injuries he had ever seen, and he has passed through two wars as a regimental surgeon. The boy's back is a mass of cuts from the beatings he received. All of his front teeth are out, the result of a blow from Earl's big fists. His hearing is seriously affected from the innumerable beatings given him over the head, and the bottom of his feet are so badly burned that he can scarcely stand.

The girl is in a more precarious condition than her brother. Her limbs were punctured in a score of places with hot irons. Some of the holes are a half-inch deep. Her right foot has a large scar, the result of a burn, which she says was inflicted by Mrs. Earl with a flat iron.

Her back is blistered from her waist to her neck. Her head is cut in a half dozen places, one of the wounds apparently resulting from a fracture of the skull. There is a burned hole in her neck, which looks as though the Earls tried to drive the hot iron through her throat. The child cannot speak above a whisper from the severe chokings she has received. Her hair was pulled out by the roots, and even her finger and the toe nails were torn out.

Earl's wife fled from the Hayes house, leaving her effects behind, and has not been captured.

Earl was fined $1000, and the Justice said he wished he could make the fine $5,000,000. The Humane Society charges that Earl inflicted the injuries as punishment because the children refused to perform acrobatic feats.

NEW ATTORNEY-GENERAL.

Robert H. McCarter, of New Jersey, Succeeds His Brother.

Trenton, N. J.—Robert H. McCarter, of Newark, will be Attorney-General of the State in succession to his brother, Thomas N. McCarter, who has resigned to become President of the new trolley and lighting combine in East Jersey. The nomination was sent to the Senate by Governor Murphy during the special session, and was confirmed at once in executive session.

The place was offered to Mr. McCarter after Chief Justice William S. Gummere, of the Supreme Court, had announced his intention of remaining on the bench.

The new Attorney-General's appointment is for four years, the unexpired part of his brother's term.

CHOPPED UP HIS WIFE.

Insane Farmer Then Burned the Remains and His Barn—Suicide Follows.

Cumberland, Wis.—In a fit of rage John Keymeiser, a farmer, shot and killed his wife, chopped up the body, threw it into the barn and set the structure on fire. He then made his escape. A posse was organized and he was traced to the woods near Clayton. When the posse got near him he held them at bay with his gun for over an hour. When he found escape impossible he shot and killed himself.

The murderer and suicide was once an inmate of an insane asylum and also served a term in jail on charges preferred by his wife. There is a large family of small children surviving.

WALES WILL COME TO ST. LOUIS.

King Edward Asks Son's Appointment as Head of Fair Commission.

London. — The appointment of the Prince of Wales as President of the Royal Commission which is to represent Great Britain at the St. Louis Exposition will be made at the special request of King Edward, who thought he could thus best demonstrate his personal interest in the exhibition and his cordiality toward America generally.

John Redmond, the Irish leader, was invited to be one of the two Irish members of the commission, but his many engagements compelled him to decline.

CHINESE CRUCIFY A MURDERER.

Lingered in Agony For Three Days After Confessing to Sixty Killings.

Victoria, B. C.—Advices by the steamer Empress of China tell of the crucifixion of a Chinese desperado in Kwang Fung who confessed to sixty murders. When he confessed it was decided that decapitation was too lenient a punishment and he was crucified. He was nailed by his hands to a wooden cross and placed in a public place as a warning to malefactors.

He lingered for three days before he succumbed to his terrible suffering.

Irish Landlords Satisfied.

The annual report of the Irish Landowners' Convention describes the new Irish Land bill as the largest and most liberal measure ever offered Ireland by any British Government, and urges Parliament to pass it, with amendments.

Many Perished in Silesia Blizzard.

Dispatches from various parts of Silesia report that the bodies of fifteen persons who were frozen to death during the snowstorm have been found in snowdrifts.

OFFICERS KILL OUTLAW

Battle at California Joss House, Which Was Turned Into a Fort.

Deputy Sheriff Tibbetts Killed and a Constable Fatally Wounded—Seven Officers in the Fight.

Bakersfield, Cal.—James McKinney, an outlaw, was shot and killed here. Deputy Sheriff Tibbetts was also killed and Constable Packard was fatally shot.

Sheriffs Kelly, of Kern; Collins, of Tulare, and Leovin, of Arizona Counties, with Officers Will and Burt Tibbetts, Gus Tower and City Marshal Packard, surrounded McKinney in a Chinaman's house. Will Tibbetts and Packard approached McKinney in the house and ordered him to surrender. McKinney answered by shooting.

Will Tibbetts was hit in the stomach and died soon after; Packard was shot through the neck and shoulders and dangerously wounded. Burt Tibbetts, a brother of the dead Deputy Sheriff, shot McKinney through the mouth and neck, killing him.

McKinney had been in Bakersfield two days, and was harbored by friends in a Chinese joss house. The house was a regular fort. In the place with McKinney was Hul Hulse, a desperado. McKinney had a sawed-off shotgun and Hulse had a pistol.

Hulse would not obey the order to come out of the barricaded house, and the Fire Department was ordered to the scene. Hulse gave himself up. He was taken to the county jail. An immense mob surrounded the jail and tried to take him from the officers.

Another accomplice of McKinney was known to be in the house where the battle took place, but he would not surrender. At 4.30 p. m. the building was set on fire. The man was soon smoked out and was taken to jail.

McKinney was accused of having committed several murders. In the latter part of 1900 he shot and killed Tom Sears, a gambler, as the result of a dispute over a game of cards. Last July in Porterville he killed "Billy" Lynn and wounded Constable John Willis and another man in a drunken row. He made a sensational escape from capture. On April 5 news came from Kingman, Ariz., that McKinney had murdered Charles Blakely, known as the "cowboy pianist," and Roy Winchester, a young miner. It is thought that McKinney mistook the men for officers.

THE WEST VIRGINIA LAUNCHED.

New Cruiser Sent Into the Water From the Newport News Yard.

Newport News, Va.—In the presence of 10,000 persons, including Governors White, of West Virginia, and Montague, of Virginia, the cruiser West Virginia was launched. Miss Katherine Vaughn White, daughter of Governor White, broke the bottle of wine and named the ship, amid the cheers of the spectators and noisy din of the river craft salutes. The weather was ideal, and no incident marred the occasion.

The West Virginia is one of a new type of vessels now being added to the navy.

These are the general statistics of the West Virginia: Length on load water line, 502 feet; beam, extreme, 69 feet 6½ inches; draft, on normal displacement of 13,676 tons, 24 feet 1 inch; full load displacement, all ammunition and stores on board, 15,104 tons; designed indicated horse power, 23,000; speed, 22 knots; coal supply, full bunker capacity, 1850 tons; complement of officers, 47; complement of seamen, marines, etc., 783.

An armor belt extends five feet below and four feet above normal load line and from stem to stern. It is six inches thick at the top and five inches thick at the bottom. The armor tapers at the stem and stern to a thickness of three and one-half inches. The armor on the Hichborn balanced oval turrets, with inclined port plates, is six and one-half inches thick on the port plate and six inches thick on the sides and rear.

The main battery consists of four eight-inch breech-loading rifles, mounted two in each turret on the centre line of the vessel. There are fourteen six-inch rapid-fire guns and a secondary battery of eighteen three-inch and twelve three-pounder guns, besides four one-pounder automatic guns, four one-pounder rapid-fire guns, six Colt automatic guns, two machine guns and two three-inch field guns.

RABIES RAGING IN CHICAGO.

Lectures Proposed For Policemen So They May Recognize the Disease.

Chicago.—The prevalence of rabies has reached such dangerous proportions in Chicago that education of policemen in the symptoms of the disease is urged as necessary. It is proposed that lectures on the disease be given so that every patrolman may know rabies when he sees it, and destroy rabid dogs as soon as the first symptoms of the disease are shown. Dr. C. A. White, who has made a study of the disease, volunteered to lecture to policemen on the subject. Dr. A. Lagorio also stands ready to give instructions.

"The increase in rabies in Chicago has been great," said Dr. White. "The average number of cases in the world is one in every 2,000,000 of population; yet in Chicago in the last year there were nineteen cases, and the number reported probably does not complete the list. Rabies practically is epidemic here, and the people are just beginning to wake up to the danger."

Dog fanciers and owners of high-bred dogs are alarmed over the condition of the city as regards the disease.

All England is in a Shiver.

Such mid-April cold and snowfalls as have been experienced in the United Kingdom are without precedent in twenty years. Nine degrees of frost were registered in the Thames Valley and snowstorms were again reported in various parts of the country.

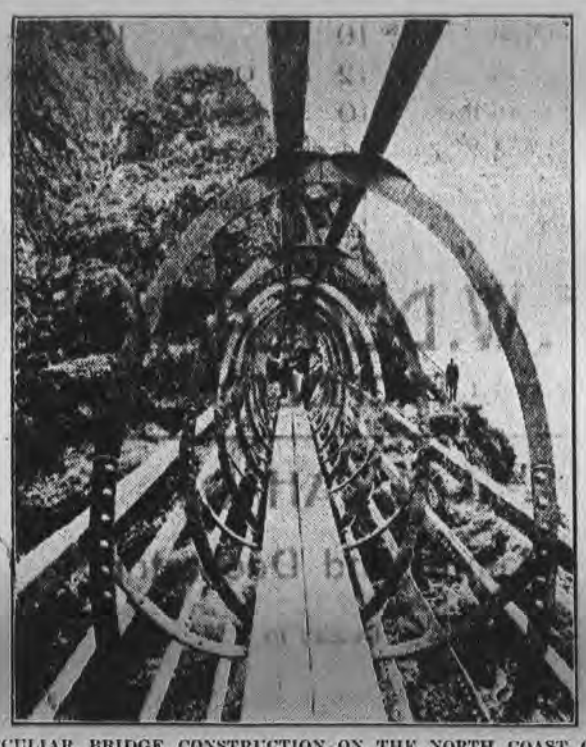
Italian Ship Goes Down.

The Italian ship Francesco C., hailing from Spezia, struck the rocks off Civita Vecchia during a violent storm and disappeared. The crew were saved.

A CURIOUS ELLIPTICAL BRIDGE.

A CLEVER and peculiar example of bridge construction and erection has recently been carried out upon the seacoast of County Antrim, in the North of Ireland. At this point the shore drops precipitously into the sea, the cliffs known as "Gobans' Cliffs," which tower to a height of 200 or 300 feet, being of the basaltic origin seen in this part of the country.

This seacoast scenery is of the wildest and withal most beautiful in its solemn grandeur in the North of Ireland; and to enable visitors and tourists to view the spectacle from its most advantageous points, and also to gain access to the many remarkable caves in the vicinity, a walk has been cut out and built in the face of the cliffs, which in itself constitutes a commendable engineering achievement. This pathway is only from two to three feet in width, and winds along the face and climbs the cliffs in a most extraordinary manner, which from a short distance always imparts to the promenade a most perilous appearance, since immediately below the waves thunder among the rocks. But the walk has been most skillfully and cleverly designed and constructed. Steps are cut roughly and broadly into the solid rock, but to insure perfect safety to climbers a handrail has been provided. The intervals between the rocks are spanned by delicate and spider-looking bridges of iron. The length of the walk so far constructed is nearly three miles, and it is to be continued for another two miles, which it is anticipated will be completed within a few months.



PECULIAR BRIDGE CONSTRUCTION ON THE NORTH COAST OF IRELAND.

The work is being carried out by the Belfast and Northern Counties Railroad under the supervision of Mr. Berkeley Wise, the chief engineer to the railroad.

The most notable triumph of engineering in connection with this work is the erection of what is known as Gobans' Bridge. This structure is distinctive owing to its curious design, being elliptical in shape. This piece of work was rendered necessary to span a gap sixty-five feet in width, giving access from the mainland to an isolated rock known as "The Man-of-War."

The general shape of the ellipses of the bridge and its method of construction may be comprehensively gathered from our illustrations. The bridge has a clear span of sixty-five feet, but is seventy feet in length from end to end. The main structure of the bridge consists of twelve ellipses made of steel placed equidistant. The major axis of each elliptical section is seven feet inside, with a minor axis of four feet eight inches. As will be seen from our illustrations, each of the ellipses is made in two segments of three-inch by three-inch by three-eighths-inch angles. They are spaced seven feet three inches centres, except the end ones, which are two feet four and one-half inches centres. The ellipses are held firmly in position by means of longitudinal iron bars, attached to the ellipses by means of stiffening plates ten inches by ten inches by three-eighths-inch. The longitudinal members are angles three inches by three inches by three-eighths-inch, and the flat bars are three inches by one-half inch. The ellipses are additionally strengthened by means of diagonal stays or bracings extending from the points where the half sections of the ellipses are joined.

This arrangement yields a stronger foundation to that portion of the ellipse which is to carry the greatest weight, i. e., the floor. The diagonal lattice steel girders are three inches by one-half inch, and carriers for floor angles three inches by three inches by three-eighths inch. The flooring of the bridge comprises two pieces of pitch pine twelve inches in width by three inches in thickness, laid up the interior bottom surface of the ellipse and raised sufficiently therefrom to afford a perfectly flat surface upon which to walk. In the cross section therefore the internal major axis from the floor to the crown of the ellipse is sufficient to afford a clear walking space to accommodate the tallest persons.

Owing to the exposed position of the site of the bridge, the turbulency of the surf playing upon the rocks immediately below, and the strength of the tides, it was found impossible to erect the bridge on the spot. Under these circumstances the structure was erected at Belfast and transferred intact to a scow. The latter was then towed to "The Man-of-War" rock and carefully brought to, as far as possible, immediately below the spot where it was to be installed. Lifting tackle was then placed in position upon each side of the gap to be spanned at the roadway level, and the lifting cables attached to each end of the bridge. The hoisting operation had to be carried out with extreme care, owing to the cramped space in which the lifting

GENERAL VIEW SHOWING THE POSITION OF THE BRIDGE ON THE CLIFFS.

tackle was operated, and to prevent the structure being thrown, by its own swinging motion when suspended in the air against the face of the rocks, which would have seriously damaged it. The structure was, however, lifted to its position without mishap. It was originally intended to stay the bridge when in position with guys, but when the bridge was erected it was found to be sufficiently rigid to dispense with these additional supports. The bridge was designed by Mr. Berkeley Wise, the chief engineer to the Belfast and Northern Counties Railroad of Ireland. —Scientific American.

Domestic and Foreign Envelopes.

In the United States we use an envelope that is thick enough to render the contents invisible and tough enough to withstand the wear and tear of the mail pouch. The consideration of postage never worries us. In Europe it is different. The thinnest of paper is used for envelopes, but the inside is stamped in colors to make it opaque. The writing paper is seldom so thin. New York Press.

The damage to the cotton crop from the leafworm, which in some seasons exceeded $20,000,000, is now prevented by insecticides.

BIRDS WHICH CARRY WEAPONS

A Plover Which Has Spurs on the Wings.

In the study of natural history we find that many birds, especially the larger species, are endowed by nature with most effective means of defense, such as lie in the strength of their wings, claws or beak, and that they can defend themselves or capture their prey with great agility. It is not so well known, however, that some birds are possessed of a special weapon, a sort of natural slung-shot, as it were, in the shape of a knob of bone on the wrist. The wrist of a bird is at the bend of the wing, and there is the place where such a weapon would be most effective.

WEAPONS OF BIRDS.

Mr. Lucas, in "Bird Lore," gives an interesting account of the flightless solitaire, the bird that possesses this knob of bone, and which was in reality a big, overgrown pigeon. When this particular species was in existence it was confined to the Island of Rodrigues, where years ago the Frenchmen caught him, and cooked him and ate him quite out of existence. The bone of this wing grows greater toward the extremity, and forms a little round mass under the feathers as big as a musket ball. They will not suffer any other bird of their species to come within 200 yards.

Among well-armed birds may be mentioned the gannet and heron. The former could do much damage were he inclined with his wonderfully keen-edged beak, while the thrust from the bill of the blue heron would be powerful enough to kill an adversary of the same species. The ostrich, with his hard kick, is well able to take care of himself.

Many game birds, as we know, are provided with spurs on their legs; while still other birds wear spurs upon their wings. Several species of plover found in South America, India and Africa have these wing-spurs, and very sharp and effective spurs they are, too. None of these birds are found in the United States, but one of the largest and finest is the Chilean plover. The spur is situated just at the base of the thumb, and, like the spurs on the legs of other birds, consists of a sheath of horn fitting closely over a core of bone. Some of the spur-winged plovers have fleshy wattles about the face, and there is a curious relation between the size of the spur and the size of the wattle, for when one is large the other is correspondingly well developed, and when the wattle is small the spur also is small.

The pretty little Jacanas are among the spur-winged birds; but there is a group of Jacanas peculiar to Africa which have no spurs on their wings, and these present a curious modification of the radius, so that this may serve instead. The bone is flattened and widened until it somewhat resembles an Australian throwing-stick in miniature and projects so far beyond the edge of the wing that it makes a very effective little weapon with which to buffet an adversary about the ears.

The spur-winged goose shows a variation in the making of a weapon by having the spur on one of the wrist bones instead of on the metacarpus where it is usually placed. Nature has provided some birds with a double weapon, which makes them formidable antagonists. The screamers, chauna and aubrina of South America have not only the longest, sharpest and strongest spurs of all birds, but are provided with a second spur on the lower part of the metacarpus. The large spur is slightly flattened on the side next the body, as well as gently curved, and would seem capable of being driven quite through a man's hand by a wing-stroke of so large a bird as the screamer. Fortunately, this bird is said to be a bird of peace, and dwells in harmony among its fellows.

Asbestos Armor.

An inventor plans armor of woven asbestos for firemen. Dressed in asbestos from head to foot fire may be defied with safety.

Philippine Jewelry.

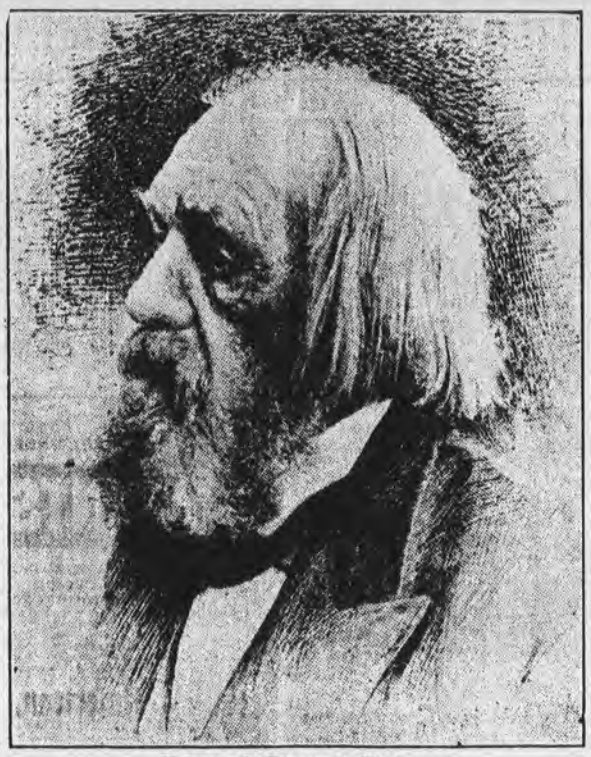
A correspondent of the Jewelers' Circular-Weekly gives an interesting account of the tortoise shell ornaments made and worn by the Moros of Mindanao Island, one of the Philippines. Our illustration depicts two characteristic examples, one a shell finger ring, the other a charm consisting of a little square of the shell, flattened and surfaced with a face-like figure.

New Type of Ships.

Professor Kretsonmar, of the German navy, completely rejects the traditional type of ship patterned on the form of fishes and substitutes that of aquatic birds. By minimizing the wave resistance the new form augments the propelling capacity of the screws of a ship of the present type 50 per cent., thus producing a corresponding acceleration of speed without any increase of power.

In the last two years one in eight of all deaths in Chicago have been from lung fever.

THE GRAND OLD MAN OF LETTERS.



Edward Everett Hale.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "INCREASE OF FAITH."

The Rev. Quincy Ewing Shows How This Becomes the Prayer of Our Souls When the World's Perplexities Bear Down Upon Us.

NEW YORK CITY.—The Rev. Quincy Ewing, of St. James' Episcopal Church, Greenville, Miss., who was at one time under consideration for one of the important pulpits of Brooklyn, recently preached a thoughtful sermon on "Increase of Faith." Mr. Ewing took his text from Luke xvii: 5: "Lord, increase our faith." In the course of the sermon he said:

We do not know why precisely the disciples should have made this request at this particular time. Jesus had just said to them: "If thy brother trespass against thee rebuke him, and if he repent, forgive him, and if he trespass against thee seven times in a day, and seven times in a day turn to thee, saying, 'I repent,' thou shalt forgive him." Then very abruptly comes from them the request, "Increase our faith." Possibly there was some tone of impatience in their voices as they spoke. They may have recalled that in the old book of Leviticus was to be found practically the same commandment that He was giving them; that in the book of Leviticus they were taught not to hate their brethren, nor to bear grudge against the children of their people, but to love their neighbor as themselves; and they may have felt that there was no need for them to hear this old teaching over again from the lips of the Master; that He was but wasting time in telling them what they already knew so well.

So their request, Increase our faith may have meant, "Tell us something that we do not already know—something hid from the prophets and wise men of old times; tell us something, show us something, do something which will make us surer that you are indeed the Messiah we and our fathers have looked for; that our hope in You is not misplaced; that You are truly the promised Deliverer. Make us more certain that we were justified in breaking away from the authority of the Scribes and Pharisees, in forsaking all to follow You. Do not be simply repeating to us what we may read ourselves in an ancient book; say something, do something, reveal something which will certify our faith in You as the Messiah."

Or the request may have had a profounder import and been uttered in a tone of self-distrust, of unfeigned humility and supplication. Suddenly while Jesus was speaking there may have awakened in the souls of His hearers the accusing consciousness that, though they had known for so long the divine law of duty toward their neighbors, yet never had they or their fathers been able to live up to it, to realize in their human life the divine ideal, and accompanying the consciousness of past failure may have been the reflection that never should they be able to realize that divine ideal, to exsel from their human hearts all hatreds, all resentments, all contempts, all unforgivingness and look upon their fellow-men with the steady Christ-vision of redemptive charity.

And so their request may have meant, "Open wider our spiritual eyes, that we may see with You; lead us, draw us up to Your spiritual height; let us share with You Your vision of God and man; let us drink from the invisible fountain of Your vast strength and goodness; let us know the secret of Your Christliness, that we may rise to full sympathy with Your divine purpose and build with You the kingdom of God among men as You would [illegible] prayer of the most needful moment of our human life, "Increase our faith." Now inevitably that becomes the prayer of our souls at times when the infinite problems and perplexities of this problematical, perplexing world bear down upon us and threaten to weigh us down; when we are forced to give ourselves to reflection upon the long and cruel and, apparently, unending suffering of good and evil; the suffering of unnumbered millions; the vast failures of justice and triumphs of injustice; the tragic defeat of right and victories of wrong; the bitter battles of uplifting truth for recognition by the mind and heart of humanity; the painful, questionable progress of indubitable good everywhere upon earth; and, so reflecting, are tempted to cry out in loud despair, or in danger of being mastered by that deep hopelessness which utters no sound and shows itself in no outward sign: hopelessness, that a deathless heart of good does, indeed, throb on to victory in things evil; hopelessness, that the to-morrows of humanity will be gladder and nobler than its yesterdays; hopelessness, that the wrongs we know will be done away, and the good we dream embody itself in fact; hopelessness, that our individual efforts, all that we can say, all that we can do, are not mere vain, transient strivings against eternal fate, powerless, as the wings of insects fluttering in the storm, to effect any betterment of things that are! How much that prayer of the apostles, Increase our faith, may mean, then, to our individual souls! A silent, unsyllabled cry for rescue to the Invisible Power that made us and the world; a pleading with that Power Invisible, whose name we cannot then utter, whose attributes we hesitate then to declare, that again we may be privileged to pray, "Our Father;" that again we may feel ourselves His children; that real enough may become His presence in our lives, to banish from us all doubt that the world intelligible, or unintelligible, dark or light, is in His keeping; all suspicion, that any good dies, that any right fails, that any throned and crowned power of iniquity can swing this earth outside the circle of His Father's purpose and His Father's love.

But it is not only in times of sorrow, sadness, perplexity that the request of the apostles should be our prayer, for that request of theirs points to an eternal and universal need of the human soul, the need to-day, to-morrow and forever of a firmer grasp of God, a clearer vision of His purposes, a deeper reading of His will, in order that we may live and save ourselves in the way divine. Perhaps from the standpoint of the need of some of us it is more necessary for us to pray fervently that prayer, "Increase our faith," in the seasons of our greatest joy than in the days of our deepest anguish; more necessary at times when the world shines bright about us and we are conscious of the burden of no perplexity and no misgiving, and disposed to be thoroughly satisfied with ourselves, our performances and with things as they are; for then, it may be, we are in greatest danger of forgetting God, of growing unmindful of our personal dependence upon Him, of crowding Him out of our life, of skimming gayly the gay surface of things with eyes and ears blind and deaf to their eternal aspect, their profound and supreme appeal. Perplexed, bewildered, crushed, under the stress of deep personal anguish, we may think God far from us, all out of touch with our lives and their needs. But to think God at all, however far we put Him from us, however grimly we deny ourselves all consoling faith in His wisdom and goodness—to think God at all is infinitely better than to forget, to ignore Him utterly, as if our goodness and our happiness did not need Him; as if the world about us were fair enough and bright enough, and altogether satisfactory enough with or without His presence!

Do you ask what sort of faith this is we need to pray for to have increased? Is it faith in some particular dogma—clearer mental comprehension of some series of metaphysical propositions—faith in the infallibleness of some verbal formula? Nay, the faith of our deeper need is that faith which means steadying vision of the divine unseen and the divine eternal; profound consciousness from moment to moment of what the poet has called "the deep below the deep and the height beyond the height;" nobler conviction within us, becoming ever more ineradicable and unconquerable, that the real value of things is a spiritual value, their real meaning a spiritual meaning, their real end a spiritual end. This is the faith upon which depends ultimately our strengthening and saving; the faith which our Bibles, our churches, our creeds, our dogmas, our devotions were meant to inspire, and which, if they do not inspire, they are but as sounding brass and a tinkling cymbal. This is the faith we need to pray for, kneeling in our pews on Sundays, or busy at our work on week days, increase of vision, of faculty, to see and feel below the earthly deeps and beyond the earthly heights, and when we pray God to increase for us this fundamental faith, be tempted to dictate to God how He shall answer us or when. We may want one answer; He may know that we need another. We may choose to have our answer in full all at once; He may choose to give us but the first syllable of it to-day, and to prolong the giving of it through the years of a lifetime, perhaps through the aeons of eternity. We may undertake in our wisdom to impose conditions upon God that we imagine He must fulfill if He would answer our prayer, forgetting the one fundamental condition, that we must impose upon ourselves honest eagerness to hear the higher voices that may call to us from day to day, and to obey them when they do; honest struggle to beat back the unholy temptations that beset us, darkening the way to our feet; honest purpose to do the duties that throng us hourly, momently, and in their doing ultimately illumine any darkness the soul can enter!

The prayer of the apostles was answered hardly as they expected certainly it might be, but answered nevertheless and to a degree of richness that they were not able all at once to fathom; answered for them, as it has been through the ages for all their successors by right of spiritual inheritance; for them as for him, great and good apostle unto us of our modern time, who walked through the fires of sacrifice and came in and out here among us for a score of years, fighting his good fight, his fight of good, his fight for God and man, whose words are vital yet within these walls, and beyond them where men speak the English tongue; answered, I say, that prayer for them of the earlier time, for him of this later, not by any flashing miracle of word or deed; not by any startling revelation of a new heavens and a new earth; not by any suddenness of divine destruction and reconstruction; nay, but by and through a gradual growing sympathy with the purposes of the Redeeming Master; by and through the deepening, widening, atonement of their souls and his; by and through their effort to live the life that worshiped His, and suffering and crucifixions, it meant to them to be and do what should bear true witness to a Christ.

And thus only is it that God can fulfill for any of us the prayer, Increase our faith. The eternal Father of our spirits can meet their deeper yearning for larger faith for clearer vision, only through and by the human experiences He has made possible for us from day to day, the life of effort, of struggle, of heroism. He has made it our privilege to live. The readiness to do His will reveals it; the seeking to realize His purposes interprets them, and closer, ever closer, becomes the meeting point of our actual earth and our possible heaven, as we resolve that our earthliest efforts shall be noble enough to bespeak a heavenly meaning, and our earthliest hopes heroic enough to prophesy a heavenly consummation.

Growing Faith.

[illegible] others we ought to remember.
One has no right to expect from [illegible] child that which belongs to manhood. When
Abraham was first called into God's [illegible] serving he came as has every one since. He [illegible] was untried and his growth just [illegible] began. God promised him great things which he hesitated to believe. When told that his descendants were to be as numerous as the stars he staggered at the thought. All passed like a dream before him. The patriarch was skeptical. "Lord, how shall I know that I shall inherit it?" God's word was not sufficient. He wished some evidence that would appeal to his positive knowledge. He wished to know. Years after that man staggered not at the command of God when told to slay his own. The difference was not in the quality of his faith. It was the same man further on. God's laws apply in principle alike to all. Abraham's experience becomes in a measure a part of our own. A living faith solves all things. Abraham's vision of the smoking lamp and parted sacrifice was but temporary. It served him for the moment and then became a recollection. But his faith became a permanent one. It was a lamp that grew the brighter. Here lies the strongest evidence of our acceptance with God. The vine lives because of its attachment to the tree. It draws its life from other veins. Is your horizon wider, your faith stronger, your sacrifice more willing? These are your assurances of greater things beyond.—Presbyterian Journal.

Doing What We Can.

Doing what we have the power to do is our highest privilege and duty. We often feel that, if we had more money, or more influence, or more power, we could do something worth doing, but, as it is, our possibilities are sadly limited, and we can have no hope of greatly honoring God, or helping our fellows. Yet the one woman in the world whose name stands highest above her fellows for what she did in her day and generation was not a woman of great wealth or of special power. Of her it is said simply, "She hath done what she could." She may have thought that her sphere and abilities were limited, but God blessed her simple doing with His blessing and with her ever-growing fame. All that God would have us do is to do what we can. That much we ought to be ready to do gladly.—Sunday-School Times.

Christian Faith.

"Sun of my soul, Thou Saviour dear," is a line that ought to be said every hour of a Christian's life. Some good people are the prey of natural despondent temperaments. Such need a double supply of grace and must pray for it. The worries of business or household care, the loss of sleep or the derangement of the bodily machinery, put such Christian folk under a cloud very often. To-day they sing like larks. To-morrow the barometer goes down and they are in the dumps again. Such people should look after their bodily health as a spiritual duty. Moreover they should keep their Christian faith where it will not be exposed to every east wind or drenched to death by every shower that falls.

Home Thoughts.

High thinking chisels the features into the beauty of a pure and refined expression. The tone of the mind assuredly reveals itself on the face. If our thoughts are kind, generous and forgiving, our faces will unconsciously reveal the sweetness of these virtues. Into a kind heart God pours His light, which radiates on the face and makes it fair and pleasing.

Christian Joy.

Christian joy is an experience of great depth and solemnity. It never overlooks that sadness and sternness of life; it is never shallow or unreflecting; it is restrained, tender, sympathetic, confident. We know it when we see it in the face of any whom we love; it helps us.—R. J. Campbell.

SATURDAY, APRIL 25, 1903.

SAME OLD STORY.

The Newark Evening News of last Monday contained an interview with James T. McMurray, the leader of the Republican forces of Plainfield, which, if correctly reported reflects anything but credit on that gentleman.

According to the article in question Mr. McMurray stated that "There is a strong feeling that the people of the two municipalities do not recognize the right of any one from Mercer county, in intruding in the fight. It is a matter between Union and Somerset counties, and concerns primarily Plainfield and North Plainfield. Any one that heard the speeches in the Senate or House knows that the argument favored annexation as advantageous. When the repealer bill went into the lower house it was referred to a committee of which a Mercer County Assemblyman was chairman."

This is the same old story which the politicians have been telling and [illegible] district of New Jersey. Under normal conditions Mercer is Republican, Hunterdon Democratic. Somerset is Republican, but if North Plainfield were taken away from Somerset and added to Union, as the annexationists purpose doing, it would throw Somerset in the Democratic column, and thus make the Fourth Congressional District Democratic instead of Republican.

Is this not a sufficient reason why Mercer county Republicans should interest themselves in the effort to keep North Plainfield in Somerset county?

But this is not the only reason why Senator Hutchinson supported the repealer bill. As is well-known, the original annexation bill was passed by House and Senate, through the efforts of a Senator by tricks that were anything but creditable. This resulted in casting a stigma upon the Senate, and it was only by repealing the bill that this cloud could be removed. As President of the Senate it was Mr. Hutchinson's privilege and duty to do all in his power to clear this matter up, and as an election had been held and the voters decided by a large majority that they did not want annexation; and as the law had been carried out, it was only right and proper that the act should be removed from the statute book.

All this talk about Mercer county having nothing to do with the severing of Somerset county is nonsense and unworthy of the utterance of a school boy. Mercer county *is* concerned, and may be depended upon in any emergency which may threaten this district.

It is only recently that the action of the Union county men could be construed so as to give any but Union a chance to have a say in the matter. Those people absolutely refused to allow Somerset any chance whatever to object to having the most valuable part of her territory taken from her.

As stated before in this column on several occasions, if consolidation was the aim of the politicians, why was it not brought up before? That is a question which concerns Plainfield and North Plainfield, and when that question is brought to an issue it will be settled by them.

NO NEED TO HURRY.

A meeting has been called at Sangerbund Hall for next Thursday evening by advocates of a sewer system for North Plainfield, for the ultimate purpose of discussing the advisability of such a scheme.

It seems to us the vital point of this question is, to first ascertain if there is a public demand for a sewer system in the borough. We do not believe there is—not just yet, at any rate.

Our borough is spread out over a large territory; there are no congested portions within its borders that the present system of sewerage will not take care of. If the time should arrive when the population increases to the extent of building up of portions such as called forth the Plainfield sewer, then it will be time to consider a sewer for North Plainfield.

We have from time to time in these columns shown conclusively that the health in North Plainfield is much better and the death rate much lower, than the city of Plainfield can boast of, her expensive sewer to the contrary notwithstanding.

That we will need a practical sewer system here some day nobody denies, but at present we believe with ex-Mayor Gilbert, of Plainfield, that no condition prevails here that calls for an urgent demand for sewers, and there will not be any for some years yet.

CONGRESS, at its last session, authorized the preparation of a list of all the Union and Confederate officers and men engaged in the Civil War as a continuation of the "Official Records of the Union and Confederate Armies." Secretary Root has accordingly asked the governors of all the states which furnished troops for the Confederate armies to co-operate with him in making the list as nearly complete as possible by lending to the War Department such lists as the states may have, and by assisting the department in getting access to lists in the possession of various associations and private individuals.

JAMES N. TYNER, Assistant Attorney General for the Postoffice Department, and formerly Postmaster General, was summarily dismissed from office by Postmaster General [illegible] Tyner [illegible] Postmaster General [illegible] husband's safe in the Postoffice Department and refused to give them up to inspectors who were sent to Mr. Tyner's house to demand them; the case has been referred to the Department of Justice, and arrests may follow.

NEW JERSEY has suffered a sad loss through destruction by fire of the New Jersey State Experiment Station at New Brunswick on Thursday. The damage amounts to over $100,000. but no money can replace the valuable collections and statistics which has taken years of research to gather. The building was the home of two distinct institutions—the New Jersey Agricultural Experiment station and the Agricultural College Station.

THOMAS N. MCCARTER has resigned as Attorney General, and the Governor has appointed his brother, Robert H. McCarter, to succeed him. The former gentleman is to become the president of the newly merged trolley and electric light companies. *There is nothing like keeping such plums in one's family.*

NEW JERSEY stands at the head of the list in good road building. Last year 155 miles of new roads were built and paid for by the State aid at a total cost of $750,000 and 68 miles more were nearly completed when the State Road Commissioner's report was made.

A SPECIAL session of the Legislature was held on Tuesday for the purpose of correcting an error made in the Passaic River Pollution bill. The session lasted about four hours. No other bills were introduced. The bill passed with little opposition.

Pure Fiction.

In real life you may know some one who became rich through owning a mine, or you may meet a man who has had money left him, and received it, but, outside of a novel, or off the stage, did you ever know any one to step in and pay off the mortgage on the old home place?—Atchison Globe.

Human Nature.

Smith—Say that's a fine dog you have there. I'd give $10 for one like him.

Jones—I'll let you have this one for $5.

"Huh! He ain't worth it. I'll give you 50 cents for him."—Cincinnati Enquirer.

"Little Animosities'" Curves.

A man of geometry and trigonometry figures out that "Little Animosity," the baby 16-inch gun at Sandy Hook, is a certain failure in a light breeze. "I witnessed the three shots fired," he said, "and noticed that the projectile described a curve to the right equal to about one-fifth of a degree, or 12 minutes. Now, supposing that this deflection from a straight line had been continued throughout the entire range of the gun, which is said to be between 20 and 21 miles, what would have happened? The projectile would have described a complete circle, coming back to its starting point. If this could be safely accomplished in practice it would mean a great saving, as the shells could be repeatedly used."—N. Y. Press.

Antiques in Negro Cabins.

It is said by experts that the finest antique colonial furniture in this country comes from the south. Much of it has been discovered in the cabins of aged negroes who were formerly slaves. When these rare, carved old pieces of mahogany were discovered by their masters they were often given to the negroes, not understanding the valuation of them that would come later. A richly carved mahogany sideboard was found recently in a chicken roost in one of the southern states. The chickens roosted on it every night and it was worn and battered. This was bought by a dealer for a small sum and after it was restored sold to a customer for $250.—Hartford (Conn.) Times.

Something New in Billiards.

The way in which billiard playing is simplified by the device of a Munich professor has astonished those who have witnessed the test. The sides of an ordinary billiard table are provided with six mirrors, one or more of which can be turned down when a play is made, and the advantage rests in the fact that any image is reflected in the same angle in which it falls on the mirror, just as the billiard ball rebounds from the cushion in the same angle as that of striking. The mirror shows at once the different ways in which a shot can be made. Even the tyro is said to make difficult indirect shots as direct ones, and the intricacies of the game are quickly conquered by anybody.—American Inventor.

He Saw It.

From a school in the remote districts in the mountains of Kentucky a little incident comes that illustrates the quickness of the southern mountain folk. Several of the pupils were six-footers. One quiet lad asked to be excused for a week. "What is the reason?" asked the teacher. "Got some law business to do." "What have you to do with law matters?" "Lawing over a killing," was the answer reply. "Well, what have you to do with it?" "Why, I did not see it, did you?" "I allow I didn't. I'm the feller they tried to kill."—Boston Transcript.

New Dental Operation.

Suppuration at the roots of the teeth is treated by electric rays by Dr. Stebel, of Munich. A powerful electric light is focused upon the bony cavities of the jaw, setting up irritation, increasing to violent inflammation, and a layer of tissue comes away. The suppuration ceases, the looseness of the tooth disappearing. The operation is difficult, but is reported to have been successful in 14 cases.—Scientific American.

Pope Leo's Wardrobe.

The pope has the largest and most costly wardrobe in the whole civilized world. Three large rooms at the vatican hardly suffice to contain the pope's wardrobe, and a special body of servants is told off to keep it in order. Each day in the year has its appropriate garment, which varies in color, weight and value, according to the season.—N. Y. Sun.

Wave-Motor Patents.

The United States government has allowed more than 150 patents for wave motors. Of these over 90 are accredited to the Atlantic and nearly 60 to the Pacific coast. Of the latter class nearly all have been actually or experimentally tried, only to be destroyed by the tremendous power of the surf.—Lippincott's.

No Character in Ears.

After studying and photographing more than 40,000 pairs of ears of persons, including those of 2,000 insane and 800 criminals and those of 300 animals, an English criminologist is forced to conclude that the ear gives no clew to personal traits.—Phrenological Journal.

Possessed.

Father—I wonder what's the matter with Nellie this morning. She acts like one possessed.

Mother—She probably is. I noticed a new ring on her finger when she came downstairs.—Philadelphia Bulletin.

Strenuous Hint.

Harem (11 p. m.)—It is a man's endurance—his staying qualities, as it were—that makes him strong.

Miss Cutting (suppressing a yawn) Indeed! Then you must be a modern Samson.—Chicago Daily News.

Domestic Bliss.

Husband—I think I'll run up to St. Paul for a couple of days for a change.

Wife—Will you take me with you?

"Of course not. I said I was going for a change."—Chicago Daily News.

Indefinite.

"You say his wife's a brunette? I thought he married a blond."

"He did, but she dyed."—Michigan Wriukle.

Future of Mississippi Valley.

If the Mississippi valley were densely populated as Massachusetts, would have 350,000,000 inhabitants.

Spring-time in Washington.

Washington is a typical Spring resort and its bustle is purely social and political. There are gathered in the Capital representatives of every nation and country, and their comings and goings are of no little interest. Then the doings of the Senate and House are features which every tourist delights in following, and these features together with the visits to the numerous public buildings keep one busy all the while one is in Washington. The Royal Blue Line of which the New Jersey is the initial road is going to operate an excursion to Washington on April 27th, and cost of tickets for the 3 days' excursion including all expenses is $12. Train leaves New York at 1 p. m., and arrives Washington at 6 to p m. If you want to know about the trip drop a postal to C. M. Burt, General Passenger Agent, New York City, for tour book. Free for the asking.

If You Want

If you want posters,
If you want bill heads,
If you want envelopes,
If you want statements,
If you want note heads,
If you want show cards,
If you want letter heads,
If you want calling cards,
If you want business cards,

SPORTS AND ATHLETICS

Preparing a Turf Campaign.

America's most unique turf character, "Pa" Bradley, is preparing a campaign for the season that may make him as widely known as he was when Robert Waddell won the American Derby and a fortune in money—for the sturdy character from the Old Dominion state. Every newspaper in the east has devoted columns to the success of "Virginia" Bradley's stable at Bennings race track. In fact there were days when the races seemed to be equally divided between horses of "Pa" Bradley and "Father Bill" Daly. Did some multimillionaire like August Belmont manage to capture a purse with one of his high priced animals, the race followers would say, "Well, he spent $5,000 on that horse and in training him to win a $600 purse. Wait until Virginia Bradley puts in a six-dollar horse and wins an $800 race with him."

"Virginia" Bradley.

However, this stricture is not altogether a just one. Robert Waddell was fancied for the Derby by his owner when all other experts seemed to have been enticed to the camps of the millionaire's animals. An offer of $15,000 for the gelding was refused by Bradley although he needed the money, just before the race. Waddell was badly injured and when Bradley announced that the gelding had been patched up again, critics became furious. They said it would be a shame to drag out the old horse and race him again. Bradley came out the other day with a positive denial that Waddell would ever be raced again. "The ole hoss done earned his keep foh many yeah," said Bradley. "Ef I takes any moh of these yeah big classics, it will be with some othah nag."

Yet there are men who think it will be "Bradley luck" to capture the American Derby again with his 150 to 1 shot Ahola. "Any horseman who can take a runt of a horse like Boney Boy, that did not cast a shadow on a sunny afternoon, and win a small fortune with him, might capture a $25,000 stake with a wooden animal," is the way the pessimists talk. Seriously speaking, however, "Pa" Bradley is making the racing game his life's business and he wants to be called a "character." It helps him to win money. Personally he has no idea of "repeating" in the American Derby.

Agitation against the foul strike rule will not down in eastern baseball circles, and if the fans of Boston have their way the American League will yet play under the old code as it did last year. President Ban Johnson has been showered with letters and petitions from baseball followers throughout the east ever since the foul strike rule was adopted by the joint conference of the two big leagues. Boston and Philadelphia are the two cities in which the agitation against the foul strike law has been the strongest.

Memorial Day Practices.

When the graduate committee of the Intercollegiate Conference Athletic association decided upon Decoration day as the time for the annual college championships, no departure from custom was made. Memorial day has been observed for many years by the athletes as a time for their big events. Time and again have the college athletes said that they revere the G. A. R. men, honor the dead that fell for the union in the civil war and share in the general idea that Decoration day should be a humility and acts of graciousness. But they contend that the trend of the times is to have relaxation on that day—a holiday that many take advantage of in dual manner.

Regulation for Memorial Day.

Time was when Decoration day was looked forward to by an army of cyclists and their adherents as the climax day of the season's sport. In the east the Irvington-Milburn road race and in the middle west the Chicago road race were the great attractions. Baseball, athletic meetings, golf tourneys, in fact a multiplicity of out door sports marked the day. Baseball enthusiasts will hold the attention of thousands this time; golfers on a thousand courses will have their competitions and the pick of the athletes of the colleges will compete for gold, silver and bronze medals. But the cyclists—they have been compelled to recognize the decadence of the wheel as a factor in Decoration day sports.

Dual meets, held during the cold weather in the various university gymnasiums, give only a faint idea of the talent that will be seen in the Conference annual meet. Michigan by defeating Cornell and Illinois, showed strength in several departments, that inclines critics to believe that the wolverines and maroons will be hard rivals for the largest number of points. Wisconsin, too, is to be reckoned with and Illinois has a team that will never quit until the last event is contested. Smaller colleges may cut in as usual with a few points, but the principal point winners may be computed now as likely to come from Michigan, Chicago, Wisconsin, Illinois and Northwestern.

E. G. WESTLAKE.

Finally Got It.

"What do you want, little boy?" asked the druggist.

"Say, mister," said the boy, who had been wrinkling his face, scratching his head and rubbing his right foot up and down his left leg in the effort to remember something that had escaped him, "what's the name of that place where we've got so many soldiers?"

"Fort Sheridan?"

"No; it's a good deal further away than that."

"The Philippines?"

"That ain't just it, but it's somewhere around there."

"You don't mean Manila?"

"Manila! That's right! I know'd I'd get at after awhile. I want a bottle of manila extract for flavorin' ice cream. How much?"—Chicago Tribune.

The Telephoto Lens.

The up-to-date explorer now takes a biograph or cinematograph with him. One of the first to do this was Prof. Haddon, of Cambridge, who has also included a phonograph among his outfit. With these instruments combined the scientific traveler can bring back an extraordinarily vivid record of manners and customs and cause the remotest savage to dance cancans and shriek their war songs in the decorous theater of the London university. Moreover, there is the telephoto lens, a combination of telescope and camera, with which all kinds of extraordinary subjects can be taken, such as a lion attacking an antelope, secret ceremonies of savages and other functions at which the immediate proximity of the explorer is highly undesirable in the opinion of all parties.—Pearson's Magazine.

A Spotless Character.

Prospective Employer—You don't drink?

Applicant—No, sir.

"Don't gamble?"

"No, sir."

"Don't smoke?"

"No, sir."

"Wouldn't touch the filthy weed, eh?"

"No, sir."

"Never swear?"

"Never, sir."

"Consider it a vile habit, I suppose?"

"Yes, sir."

"Well, I guess I'll try somebody else. I wouldn't feel quite comfortable if I had a coachman so much better than I am myself."—N. Y. Times.

Up-to-Date Courting.

"Then you will be mine?"

"All yours!"

"Oh, joy!"

"Oh rapture!" (They embrace.)

"It's getting late, dear; one more kiss, and then good-by. My husband doesn't permit my callers to stay after ten, and besides I must put the children to bed."

"But our wedding will be soon?"

"Yes, love, if our divorces do not flash in the pan. Good night. Give my love to your wife."—Houston (Tex.) Post.

House Rents in Mexico.

Rents are high in Mexico, not alone because of the growing demand for better homes and business houses, but because building is expensive and taxes are not low. The contribution to the government from a houseowner is no less than 12 per cent. of gross receipts from his rent, and this is quite aside from his water, paving, sewer and other taxes.

Horse Sausages.

The canton of Geneva recently passed a law which makes it compulsory that butchers who sell horse sausages must wrap them up in blue paper, so as to avoid confusion. The butchers are in high dudgeon, and have complained to the federal authorities that the new law interferes with the freedom of commerce.—Cincinnati Engineer.

Penalty for Russian Students.

By a law recently enacted in Russia any university or high school student who creates or causes disorder shall be drafted into the army for a period of from one to three years. This is to curb the rashness and fondness for mischief of college students who imagine they have the privilege to annoy all creation.—N. Y. World.

The Real Thing.

"Have you ever played a leading role?" asked the theatrical manager.

"Sure thing," replied the applicant.

"What was it?" queried the t. m.

"I led the mule in an Uncle Tom's Cabin company for two years," answered the embryo star.—Cincinnati Enquirer.

Not Superstitious.

"I am afraid you are superstitious."

"Deed I isn'," said Mr. Erastus Pinkley; "some folks is a-skyaht of ghoses an' all kin's of critters; but as long as I has a rabbit's paw in my pocket I feels puffickly safe." — Washington Star.

He Had the Goods.

Earnie—Why did she refuse him? I thought she said he was a man of sterling qualities.

Helen—Yes; she did; but she found a man with sterling silver.—Philadelphia Record.

Slim Diet.

"Casey, they till me th' dochter has put ye on a slim diet, b't yeh kape on atin' as hearty as iver!"

"So I do, man, but I eat spare-ribs."—Baltimore Herald.

Valuable Insecticides.

The damage to the cotton crop from the leafworm, which in some seasons exceeded $20,000,000, is now prevented by insecticides.—Science.

Merely Foolish.

Many a man thinks he is unlucky when he is merely a fool. — Chicago Daily News.

Doctor

Tried but Could Not Relieve Me

Of Headache, Dizziness, Twitching.

Dr. Miles' Nervine Did Relieve and Cure.

"The doctor tried but couldn't relieve me" is a phrase commonly met with in the letters we receive from grateful patients. The reason is plain. The doctor tries to cure the symptom and neglects the disease. In all cases of chronic headache, nervousness, weakness, general debility, dizzy spells, loss of appetite, inability to sleep, lack of energy, loss of flesh, lack of interest, morbid tendencies, hysteria, the disease is a nervous disorder and some means must be taken to strengthen and restore the nervous system. Dr. Miles' Restorative Nervine is performing wonders every day and will cure you as it has thousands of others. Read how quickly it acted in the following case:

"A few years ago I was greatly troubled with nervousness and indigestion. While at work a dizzy spell would come over me and I would be forced to stop and rest. I suffered terribly from headaches and my nervousness was so marked as to cause almost constant twitching of the muscles. My doctor tried but could not relieve me. I finally began the use of Dr. Miles' Restorative Nervine and continued until I have used four bottles, although I have not had a dizzy spell since taking the first dose. I am very thankful for what your medicine has done for me and shall take pleasure in recommending it whenever I can."—FRANK P. BENTLEY, Middlebury, Vt.

"POOR DIGESTION LANGUID AND TIRED."

[An Interesting Letter Concerning Pe-ru-na.]

Miss Della Janveau, Globe Hotel, Ottawa, Ont., is from one of the oldest and best known French Canadian families in Canada. In a recent letter to The Peruna Medicine Co., of Columbus, Ohio, she says:

"Last spring my blood seemed clogged up, my digestion poor, my head ached and I felt languid and tired all the time. My physician prescribed for me, but a friend advised me to try Peruna. I tried it and am pleased to state that I found it a wonderful cleanser and purifier of the system. In three weeks I was like a new woman, my appetite had increased, I felt buoyant, light and happy and without an ache or pain. Peruna is a reliable family medicine."

Adia Brittain, of Sekitan, O., writes: "After using your wonderful Peruna three months I have had great relief. I had continual heaviness in my stomach, was bilious, and had fainting spells, but they have all left me since using Peruna." —Adia Brittain.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Rootbeer

purifies the blood, quenches the thirst and pleases the palate. A package makes five gallons. Sold everywhere or by mail, 25c. Beware of imitations.

Charles E. Hires Co., Malvern, Pa.

Russia's Policy.

Some years ago Lord Rosebery said these remarkable words: "There is one signal quality which I specially admire in the policy of Russia: It is practically unaffected by the life of man or the lapse of time—it moves on, as it were, by its own impetus, and it is silent, concentrated, perpetual and unbroken; it is, therefore, successful."

Wisconsin's Centenarian.

Mrs. Susan D. Crossman, of Beloit, Wis., recently celebrated her 100th birthday. She was born in Massachusetts, her father having been one of the Concord minute men and afterward a major in the Continental Army. She has lived in Wisconsin since 1848 and has fifty descendants, representing five generations.

A Veteran Steam Engine.

One of the earliest steam engines ever built is still the main source of power in some rolling mills at Birmingham. It was set up in 1767, and the original wooden beam has lately been replaced by an iron one, after 135 years of continuous service. Aside from this iron beam and a cylinder that was put in new in 1802 the engine is the same as at first, even to the connecting rod. For its special purpose the old engine has been pronounced more economical than many modern engines, and it is likely to do duty many years more.

The Oldest Woman in the World.

Another contestant for the honor of being the oldest woman in the world has been found. This is a Mrs. Anne Charsley, who lives in Cape Colony. She was born in England in 1781 and has documents to prove it. Therefore she is 122 years old.

Has Raised a Large Family.

Mrs. Lydia Luntham, of Chester, Pa., recently celebrated her ninety-third birthday. In the family reunion were sixteen children, seventy-five grandchildren and an even hundred great-grandchildren.

During 1902 the lifeboats of the Royal National Lifeboat Institution were launched 289 times and saved 456 lives.

FASTEN AGE MARKS.

Sick Kidneys make people look older than they are; hasten the evening days of life; fasten the marks of premature old age. The world over Doan's Kidney Pills is the recognized Kidney Specific.

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs and dropsy signs vanish.

They correct urine with brick dust sediment, high colored, excessive pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills dissolve and remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness.

SALEM, MASS., March 31, 1903.—I received the sample of Doan's Kidney Pills, and with the use of one more box from my druggist I am entirely cured of a very lame back.—W. A. CLEVELAND.

GALESBURG, ILL., March 30, 1903.—The sample of Doan's Kidney Pills came to hand. I also got one 50-cent box from our druggist, and I am thankful to say the pain across the small of my back disappeared like a snow bank in hot sun. Doan's Pills reach the spot.—ELMER WARFEL.

ROSE GLEN, PA., March 29, 1903.—The free trial of Doan's Kidney Pills have been of great benefit to me. Since using them I have no occasion to get up so often at night. My complaint affected the bladder more when catching cold.—JOSEPH LEPPERAL.

CAMBRIA, WYOMING.—Previous to taking the sample of Doan's Kidney Pills I could scarcely hold my urine. Now I can sleep all night and rarely have to get up, and that aching across my back a little above my hips is gone.—ISAAC W. STEPHENS, Cambria, Wyo.

The Tracks of Wild Animals.

By Ernest Harold Baynes.

SNOWFALL is a blank page from the notebook of Nature, and upon it her children write the stories of their lives, each in his own way. When we begin to read and translate them the winter woods no longer present a cheerless appearance; they no longer seem a dreary waste of snow-covered ground and bare, gray trees. We find that they are peopled by a busy community, whose lives are as full of problems as our own.

Here, you see, the first note we come across has been written by a mink—a uniform trail, which might be imitated by dragging a narrow board through the snow. The legs of the mink are very short, so that his body sinks in the snow, often covering up the prints of his webbed feet, and the trail is simply a gutter in the snow, with deeper spots at intervals marking the points at which the feet have sunk. The trail of an otter through deep snow is similar, but very much larger, as a full-grown otter is sometimes nearly four feet in length. In moving through the snow an otter leaps forward, and slides for a considerable distance, plowing up the snow with his chest, then leaping again, and sliding, as before. The distinctness of the footprints depends upon the depth of the snow; when there is only a thin covering they are as plain as the tracks of a hare.

Here is quite a different trail, also leading to the water. It was made by a muskrat, and in one important particular differs from nearly all other trails—there is a sharp and almost continuous line connecting the tracks. That line was cut into the snow by the sharp-edged and almost hairless tail, which drags on the ground as the animal moves.—Woman's Home Companion.

American Women in Europe.

By Henry Labouchere.

THE American woman has unquestionably been a success in Europe. She is generally pretty. She is clever. She takes pains to please those whom she considers worth pleasing. She has that instinct for the class above which only they have who belong to the class below, and, to use Taine's expression, she always "stands with shouldered arms and feels herself on parade." Her affectations and the sins which she commits against the commandments of European good manners are overlooked because of her American origin, and the favor accorded to her by royal personages and the exalted position she sometimes acquires by marriage.

With those advantages is it to be wondered at that American women have succeeded socially in Europe? But are they also a success as wives? It is true that comparatively few American women have trailed their characters through the divorce court in England. Social success is what they aim at, and the exposure entailed by divorce court proceedings might endanger this success. They are tolerant and expect their husbands to be tolerant. Society is the end-all of the life of such an American woman and since she has obtained a foothold in England, society has degenerated from a polite pleasure into a profession.

Has the American woman come to stay? If the women of this country can maintain their higher and more womanly ideals and profit by the education and experience of modern surroundings, they may await a reaction with confidence, assured that their beauty, their home-making qualities and their disinclination to thrust themselves under the limelight will be appreciated when men of the Old World cease to go the new to procure money and when the American woman and her ways are no longer popular novelties in Europe. —London Truth.

A Steady Atmosphere.

It is a Prime Requisite For the Study of Planets' Surface Conditions.

From William H. Pickering's "A Lookout Into Space," in the Century.

ASTRONOMICAL science is divided naturally into two parts, that [illegible] have your stellar universe and that pertaining to our [illegible] "Lawful" planets. The latter are the only bodies in the universe of which we are aware that at all resemble our earth, and they are all, comparatively speaking, our near neighbors, and have, therefore, a much more personal and popular interest than the stellar universe at large. The study of their relative motions was virtually completed during the last century, so that at the present time the astronomy of the planets is confined chiefly to a study of their dimensions and surface conditions.

For this study there is one paramount requisite, and that is a steady atmosphere. With a good atmosphere, important results may be obtained even with a small telescope of only five or six inches diameter; but without such an atmosphere the very largest telescope will be of no avail. This is not the case in other departments of astronomy; for many kinds of observations on the stellar universe the quality of the atmosphere is of little account, provided only that it is cloudless and transparent; but for planetary and lunar astronomy a steady atmosphere is the fundamental requisite. To understand what is meant by a steady atmosphere, we have only to look at some object across a hot stove, or along the line of a railroad track upon a summer day. There is a shimmer in the air, a wavering motion, with which we are all more or less familiar. This wavering is always present in our atmosphere, although we usually cannot see it; but when we magnify the image of a planet in a telescope one thousand times, we magnify the atmospheric tremors in the same proportion, and they are then not only conspicuous, but they interfere very seriously with our observations.

In some parts of the world the atmosphere is much more steady than in others, and it is evidently a matter of the highest importance for the astronomer interested in planetary research to find where these places are situated. To illustrate the importance of this matter, I may say that a year ago, situated in one of these favored spots, I saw night after night, with a five-inch and even with a four-inch lens planetary markings and details that I have never seen even with the largest telescope in Cambridge.

Desire is Weak Without Resolve

By Margaret Stowe.

MANY times in this column you have been told that you are what you will to be.

It is such an important truth that I do not think it can be repeated too often.

Parents could do so much for their children by training them along those lines and carefully guiding them to the point where they have the understanding to choose for themselves the sturdy qualities of mind.

Teach them that it is will—force of purpose—that enables a man to do and to be whatever he sets his mind on doing or being.

It is not a new saying that "Whatever you wish, that you are; for such is the force of our will, joined to the divine, that whatever we wish to be, seriously, and with a true intention, that we become."

No one ardently wishes to be submissive, patient, modest, or liberal, who does not become what he wishes.

You have possibly heard the story of a working carpenter, who was observed one day planing a magistrate's bench which he was repairing with more than usual carefulness; and when asked the reason, he replied, "Because I wish to make it easy against the time when I come to sit upon it myself."

This same carpenter actually lived to sit upon the bench as a magistrate. The strong desire for that position that the man had could accomplish nothing without resolve, or force of purpose.

Each one of us feels that he is free to choose between good and evil—that he is not here to be blown in any or every direction by the wind, but that he has within him the power to direct his own movements, and is capable of pushing along on the path of his choice no matter how strongly the wind may blow or how often it may change.

This will, or force, of purpose is the only thing that is wholly yours, and it rests with you individually whether you give it the right or the wrong direction.

Your habits or your temptations are not your masters, but you of them.

The advice that Lamennais once gave to a gay youth is something that each one of us might read and take home to ourselves with some benefit.

He said: "You are now at the age at which a decision must be formed by you; a little later you may have to groan within the tomb you yourself have dug, without the power of rolling away the stone.

"That which the easiest becomes a habit in us is the will. Learn then to will strongly and decisively; thus fix your floating life and leave it no longer to be carried hither and thither, like a withered leaf, by every wind that blows."—New York Journal.

New York City.—Tucks of all widths and arranged in every possible way are seen upon the latest gowns and waists and are as charming as they are fashionable. The very pretty May Manton waist shown suits young girls to a nicety and is appropriate for all the soft and pliable fabrics now in vogue. The original is made of white batiste with trimming of Valenciennes lace and is well suited to confirmation, to graduation and to general summer wear, but soft wools and simple silks are equally effective. The lining can be used or omitted as best suits the material.

MISSES' TUCKED WAIST.

The waist consists of smoothly fitted lining, the front and the backs. The front is tucked to yoke depth only, and forms soft folds below, but the backs are tucked for their entire length. The trimming is arranged on indicated lines. The sleeves are tucked for several inches below the shoulders, then fall free and are widened to form the soft full puffs that are finished with deep cuffs. At the neck is a standing collar.

The quantity of material required for the medium size is three and one-half yards twenty-one inches wide, three yards twenty-seven inches wide, two and one-half yards thirty-two inches wide, or two yards forty-four inches wide, with two and one-half yards of insertion and three-eighth yards of all-over lace to trim as illustrated.

Lines of Grace and Beauty.

The present day Empire gowns require great artistic skill to produce without obtaining a hardness or stiff effect, which was quite unknown to the soft supple flowing garments worn in the days of Josephine's court. The fair Josephine de Beauharnais, as immortalized at Versailles by David, certainly bequeathed to the world of fashion a gown which is in every way seductive to feminine charms, while it is admirably adapted for the robe d'interieur, the toilette de bal, or the robe de diner. The Empire gown certainly ranks to-day as a picturesque example of the refined and artistic taste of the gracious wife of Napoleon the First. It is an inheritance which all fashionable women of to-day strive to possess, for a perfectly attired woman surely displays her individuality and refinement in her own particular style and simplicity of dress.

Lines of grace and lines of beauty are the primary considerations of the well appearing woman of to-day. Everything else must be subservient to these two factors. The most supple and clinging materials, with harmonious trimmings, are sought for. No style introduced seems to fit the manner of dress more than the fringe which was brought out in the early autumn. It was a little stiff and ragged then, but that now brought forth by the maker cannot be improved upon. It is satiny, soft, and while it possesses enough body seems to shape itself in just the curves and draperings desired. Many of the handsomest new gowns are garnished with it. One, a wedding dress to be sent to England, was in wood brown cloth, the entire front being of wide brown fringe. The three rows were so arranged that they came to a point in front, and the emplecement or yoke about the hips was of narrow bias bands of taffeta, brought together with herringbone stitch. The back of the skirt was sunpleated, and fell very full and gracefully. The corsage, made with wide cointure of brown taffeta, was sunpleated, and over the shoulders was a pointed collar, finished off in wide fringe. The collar was made similar to the emplecement on skirt. The cloth was sunpleated, and the pleatings made small and of as little of the goods as possible, to produce the effect such as is accomplished in crepe de chine or colleune. There is a special quality of cloth being prepared just now which is almost as soft and fine as silk.

ONE OF THE SEASON'S MOST POPULAR DESIGNS.

Dainty Hair Ornaments.

One of the daintiest of ornaments for the hair is a jetted ribbon tied in French bowknot fashion. It is invisibly wired and arranged on a fancy jet hair comb.

Girls' Gibson Dress.

So-called Gibson dresses, or those made with pleats over the shoulders that give a broad effect, always are becoming to little girls and are much in style. This stylish one designed by May Manton combines the familiar waist with a side pleated skirt and is both new and attractive. As shown it is made of dotted plque of the new, soft sort, and is trimmed with collar and cuffs of lace and worn with a pleated girdle with tasselled ends in place of the plain belt, but all the heavier cotton and linen fabrics, and such wools as cashmere, serge and the like are equally appropriate.

The waist is made over a body lining that is smoothly fitted and closes at the centre front, and itself consists of fronts and backs. The pleats are wide and extend over the shoulders, concealing the arm's-eye seams, but are so at the left shoulder and beneath the pleat at the left side of the front. The sleeves are in bishop style, with straight cuffs. The skirt is laid in backward turning side pleats that meet at the back and form a wide box pleat-ed effect at the front. It is seamed at the waist and closes at the left of the centre beneath the pleat.

The quantity of material required for the medium size [eight years] is five and one-half yards twenty-seven inches wide, or three and one-fourth yards forty-four inches wide.

GIRLS' GIBSON DRESS.

GOOD ROADS

Supports the Brownlow Bill.

IN a recent communication to Congressman Brownlow, Mr. R. W. Richardson, Secretary of the National Good Roads Association, supports the Brownlow bill in the following language:

"I have carefully read a copy of your bill, being H. R. 15,369, creating a Bureau of Public Roads in the Department of Agriculture, and providing for a system of national, State and local co-operation in highway improvement. I desire to commend you for your initiative in this most important and necessary public improvement. It seems passing strange that the people of the United States, who are so progressive in every other avenue of commercial and industrial development, should so continuously neglect to give even reasonable consideration to the public roads. It is safe to estimate that more than ninety per cent. of the area of the States of the Union is without improved roads, enduring almost impassable mud in winter and insufferable dust in summer, old and antiquated wasteful methods still in vogue in attempted road-making and repair, hundreds of thousands of dollars wasted each year in these methods, to be repeated again next year, and all this without any change from the road conditions our fathers left us, except in the majority of cases for the worse.

"National, State and local co-operation is the modern and sure method of equalizing the burden of cost, giving proper supervision and restriction, and securing an adequate system of improved highways. The postal, educational, military and economic interest of the general Government justify active interest in this behalf.

[illegible] are to be heartily commended [illegible] effort. If you succeed you [illegible] reared to your name an everlasting monument in the ever-growing gratitude of the people. Our associations are ready to give you every [illegible]"

European Methods.

[illegible]ways of Europe are [illegible]t by the farming re[illegible]hich they pass. No [illegible]d can alone bear the [illegible]s. The central gov[illegible]e pay half or more [illegible] road-building. In [illegible] roads which cross [illegible]re paid for from the national treasury. The department builds roads across every commune. The commune or township builds only the narrower branch roads.

Countess Alida von Krockow writes as follows in the Chicago Tribune: "Germans find that it pays to encourage peasants to free their fields of stones. The property rises in value—taxing value. The stones thrown into heaps by the roadside are purchased by the district road repairing commission. Poor men, who otherwise would have to be supported in almshouses, are hired to break these stones and then are trained to the work of repairing the roadbeds. The money to pay the men is made by auctioning off to the highest bidder the crops of fruit trees that were planted on both sides of the highway when it was built and which were nourished well by the manure that falls along the road and is pushed at intervals by the road tender upon their roots. The purchaser of the crop sees to it that his fruit is not stolen. The road commissioners have no bother about that. And although the sale be by auction it brings in considerable. Every burgher knows how much, because the sales of highway fruit crops are published in the local newspaper."

What the Governor Says.

Closely associated with the subject of rural public schools is the question of public roads. Good roads would enable country schools to be consolidated and strengthened, and at the same time facilitate the attendance of students. In the last few years there has been a general awakening throughout the country on the subject of good roads. Public highways are arteries of local commerce and trade, and when made permanent and substantial they facilitate travel, cheapen transportation of farm and other products to market, stimulate business, attract desirable citizens and increase the value of lands. They fill school-houses and churches, encourage social intercourse and advance civilization. Reducing the question to a purely business basis, good roads pay. If wisely and economically constructed, they are one of the best investments that can be made by the State or county. . . . I trust that your honorable bodies will give this important subject the most careful study, and amend the present law or enact some new law that will insure to the people of Tennessee a better system of public highways.—Governor Frazier of Tennessee.

Imported Crime.

The destitute aliens in London, it is very evident, are becoming more and more a den of thieves. The only course with these people is to repatriate them as far as possible, and for the future to take the most strenuous measures to oppose them landing on our shores. Other countries have had to do that before, and sooner or later we shall be obliged to follow their example.—Country Life in America.

Glasgow is pursuing a crusade against girl flower-sellers in the street.

SCIENTIFIC & INDUSTRIAL

It is estimated that the standing timber of the Dominion of Canada equals that of the whole continent of Europe, and it is double that of the United States.

The turbine plants that have been in operation during the last few years have shown high economy and call for practically no repairs. Compared with passenger steamers of similar size, but having reciprocating engines, the installation of turbines has shown a gain per indicated horse power in favor of the turbine steamer of twenty per cent.

Lord Kelvin has suggested that living spores from other planets might be thrown off into space by the perpetual hurricane of their upper atmosphere and come within the earth's sphere of attraction, be drawn to it, and then be developed. This theory of the origin of life upon the earth is as plausible as the "fortuitous concourse of atoms" theory of life's origin.

Electricity is making rapid progress throughout Spain. At the end of last year there were no less than 639 cities, towns and villages in Spain with an electric power station, and there were only 430 towns with a population of more than 4000 souls where electricity had not as yet made its appearance. In the district of Barcelona alone there are now over 850 turbines in use, representing 35,000 horse power.

In order to determine the density of the earth, President F. W. McNair, of the Michigan College of Mines, and Major John F. Hayford, of the United States Coast and Geodetic Survey, will conduct experiments at the Tamarack mine, which is particularly well fitted for this purpose, since its shaft is one of the deepest in the world, penetrating to a depth of 4550 feet in strata of uniform density. The density of the earth is largely a matter of scientific conjecture. It has been computed by formulae based on Newton's laws of gravitation. It is true that Sir George Biddel Airy, the British Astronomer Royal, computed the earth's density from experiments which he carried on at a Welsh colliery, but the figures which he obtained varied so much from those based on the formulae that they have not been generally accepted.

The substitution of working on a large scale, with heavy capital, for the individual operations which characterize a new placer mining country, is quietly but rapidly going forward in the Yukon region, says the Engineering and Mining Journal. While some hydraulic work has been done, the conditions are such that it will probably never be an important element in the region. Dredging in the rivers and creeks was tried this season with such success that next year it is probable a large number of dredges will be at work, despite the short working season. Already much machinery for dredge work is on the ground, ready for next year. Over 4000 quartz claims were filed during the last season, and while the majority of them will amount to nothing, a large amount of exploration and development is certain.

A Dose in Division Lobby.

I once saw Mr. Gladstone fast asleep in one of the division lobbies, while a division was actually going on. It showed how utterly tired out he must have been, for usually when he was going through a division he rushed to find a table, and started to write either a letter or the dispatch to the Queen in which he nightly recounted the events of the Parliamentary sitting. On this occasion there was no doubt of his being asleep. Members paused for a moment as they passed. It was a dark hour in the fortunes of the Liberal leader, for his Government was breaking up, and he himself was within a few weeks of his everlasting farewell to public life. His followers were touched as they saw in the strangely pallid face, in the drawn lines and in the slumber of utter fatigue the signs of coming disaster and final fall.—London M. A. P.

Fish Ate Their Young.

A pair of catfish that were continuously watched in a Government aquarium made a nest by removing the gravel from a corner. During the first few days after hatching the fry, banked in the corners of the tank, were at irregular intervals actively stirred by the barbels of the parents, usually the mate. Subsequently the parents were seen to suck the eggs into their mouths and then extrude them with some force. The predaceous feeding habits of the old fish gradually overcame the parental instinct; the tendency to suck the fry into their mouths continued and the inclination to spit them out diminished, so that the number of young dwindled daily and the 500 that had been left with their parents had completely disappeared in six weeks, although other food was liberally supplied.

The Spectroscope's Usefulness.

In the field of astronomy the spectroscope is often more serviceable than the telescope, for by its means have been discovered dark, planet-like bodies which revolve about the stars, and which a telescope thousands of times more powerful than any we now possess could ever reveal.

Germany's Maritime Position.

Germany has built the finest, fastest vessels afloat, although she is not geographically a maritime country, and no other country is so largely dependent on others for the raw materials which enter into the making of a ship.

The Funny Side of Life.

NO USE.

"Post No Bills." I stole that sign
And nailed it on my door.
No use. By every mail that comes
I get more than before.
I fear I'm getting in a groove;
I fear that soon I'll have to move.
—New York Sun.

THE PARENTAL BLESSING.

Algy—"So you asked old Jones for his daughter's hand? What did he say?"

Ferdy—"He said, 'Take her, and let me be happy!'"—Puck.

SHE HAD NINE.

Agent—"Madam, I called to insure your life."

Mrs. Katt—"Which one?"—New York Times.

THE SUPPLEMENTARY SET.

During a lesson in physiology Willie's teacher asked him if he knew the name of the last teeth people get, to which he replied:

"Yes'm; false teeth."—Little Chronicle.

VAIN COURTESY.

De Style—"What did that polite man do after they got him strapped into the electric chair?"

Gunbusta—"He wanted to get up and offer a lady his seat."—New York Sun.

OUT OF WHOLE CLOTH.

Jaggles—"Animals in captivity seem to do more wonderful things than when in their native wilds."

Waggles—"Perhaps that's because they have press agents."—New York Times.

PROSPECTING.

Von Blumer—"Do you mean to say you have been shopping all day and didn't buy a thing?"

Mrs. Von Blumer—"I haven't been shopping — I've only been reconnoitring."—Brooklyn Life.

PUT TO THE TEST.

Truth, being crushed to earth, rose again, but with a visible effort.

"This resiliency is all right," she remarked, "but it grows to be a strain on one when she is crushed into an airship prospectus!"—New York Times.

THEY DIFFER MUCH.

Ascum—"Say, a 'bibliophile' and a 'literateur' are the same, aren't they?"

Newitt—"Not much. A bibliophile is most pleased with first editions, but a litterateur struggles to achieve twenty-fifth or fiftieth editions."—Philadelphia Press.

CLOTHES AND THE MAN.

"What a mistake it is to judge men by their clothes!"

"I know it. There is a self-made millionaire in this town who dresses just as well and with as much taste as any of the clerks in his establishment."—Chicago Record-Herald.

NOT REASSURING.

"Now, Jane, you must be very careful with this cloissonne vase. I don't know that it would break if it dropped, but of course it won't do to take any chance."

"Don't worry about it, ma'am. I'll soon find out."—Cleveland Plaindealer.

CLUES.

"Have you any clues to the murder?"

"We have plenty of clues—too many, in fact."

"Then what are you waiting for?"

"We can't decide which to follow first. If we tried to follow them all it would take a lifetime." — Cleveland Plain-Dealer.

THE REASON.

Customer—"How is it you don't have your man stop at my house for orders any more?"

Butcher—"Why, you see, your cook jilted him last week, and since then I can't get him to go near the place."—New York Sun.

Using Smoke Profitably.

To put smoke to profitable use has been the aim of Toblansky, the Belgian engineer. In his process the smoke is forced by a fan into a filtering tower charged with coke or other porous absorbent, sprinkled with naphtha or alcohol, and the soot is retained by the coke, while the filtered gases, mixed with vapor from the naphtha or alcohol, are collected in a gasometer, to be fed to Welsbach burners, stoves or gas engines. This gaseous mixture, which has been named pyrogas, burns with a bright flame and an entire absence of smoke. The value of pyrogas even makes it profitable to burn fuel of low grade for its smoke alone, and it is computed that plants of small cost will enable cities to derive a material income from the conversion of their garbage into purified smoke for light and power. Large factories and small establishments in Belgium are making experiments, both in saving and in producing smoke for its combustible gas.

Discovery of an Aztec Mine.

"That prospectors and miners can never be certain that they have worked out a property was clearly demonstrated by the recent discovery of a fabulously rich deposit of silver in an abandoned mine in the Altar district of Mexico a short while ago," said D. A. Macon. "The mine was an ancient one, and had evidently been abandoned many years ago by the Aztecs who had worked it. The recent discovery was made quite by accident. The underground system of workings is very extensive, and there is in sight over $1,000,000 worth of silver ore. The recent exploration of the mine showed the skeletons of ten men lying in one of the chambers. A large supply of mining tools made out of copper was also found. Piles of rich silver ore were stored in underground chambers which will cost little to take out to the smelter."—Washington Star.

The Sparks Family.

Michigan has a family, five members of which have celebrated their golden weddings. This Sparks family came to the State from North Carolina in 1828 and settled in Berrien. There were eleven children, ten of whom married. But five are living and all these have been married fifty years or more, and one has lived fifty years with his second wife. Joseph Sparks was married first in 1838 and again in 1853. Elizabeth was married in 1840, Levi was married in 1843. Ira was married in 1851, in which year Susan was married.

Kerosene was first used for lighting in 1826. N. Y.—17

Piso's Cure is the best medicine we ever used for all affections of throat and lungs.—WM. O. ENDSLEY, Vanburen, Ind., Feb. 10, 1900.

A woman doesn't have to be a conjurer to change her mind.

Poorly?

"For two years I suffered terribly from dyspepsia, with great depression, and was always feeling poorly. I then tried Ayer's Sarsaparilla, and in one week I was a new man."—John McDonald, Philadelphia, Pa.

Don't forget that it's "Ayer's" Sarsaparilla that will make you strong and hopeful. Don't waste your time and money by trying some other kind. Use the old, tested, tried, and true Ayer's Sarsaparilla. $1.00 a bottle. All druggists.

Ask your doctor what he thinks of Ayer's Sarsaparilla. He knows all about this grand old family medicine. Follow his advice and we will be satisfied.

J. C. AYER CO., Lowell, Mass.

A prominent club woman, Mrs. Danforth, of St. Joseph, Mich., tells how she was cured of falling of the womb and its accompanying pains and misery by **Lydia E. Pinkham's Vegetable Compound.**

"DEAR MRS. PINKHAM:—Life looks dark indeed when a woman feels that her strength is fading away and she has no hopes of ever being restored. Such was my feeling a few months ago when I was advised that my poor health was caused by prolapsus or **falling of the womb.** The words sounded like a knell to me, I felt that my sun had set; but **Lydia E. Pinkham's Vegetable Compound** came to me as an elixir of life; it restored the lost forces and built me up until my good health returned to me. For four months I took the medicine daily and each dose added health and strength. I am so thankful for the help I obtained through its use."—MRS. FLORENCE DANFORTH, 1007 Miles Ave., St. Joseph, Mich.

A medicine that has restored so many women to health and can produce proof of the fact must be regarded with respect. This is the record of Lydia E. Pinkham's Vegetable Compound, which cannot be equalled by any other medicine the world has ever produced. Here is another case:—

"DEAR MRS. PINKHAM:—For years I was troubled with falling of the womb, irregular and painful menstruation, leucorrhœa, bearing-down pains, backache, headache, dizzy and fainting spells, and stomach trouble.

"I doctored for about five years but did not seem to improve. I began the use of your medicine, and have taken seven bottles of Lydia E. Pinkham's Vegetable Compound, which have done for me, and heartily recommend your medicine to all suffering women."—MISS EMMA SNYDER, 218 East Center St., Marion, Ohio.

"FREE MEDICAL ADVICE TO WOMEN."

Women would save time and much sickness if they would write to Mrs. Pinkham for advice as soon as any distressing symptoms appear. It is free, and has put thousands of women on the right road to recovery.

Mrs. Pinkham never violates the confidence thus entrusted to her, and although she publishes thousands of testimonials from women who have been benefited by her advice and medicine, never in all her experience has she published such a letter without the full consent, and often by special request of the writer.

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness.
Lydia E. Pinkham Medicine Co., Lynn, Mass.

Curbing Russian Students.

By a law recently enacted in Russia any university or high school student who creates or causes disorder shall be drafted into the army for a period of from one to three years. This is to curb the rashness and fondness for mischief of college students who imagine they have the privilege to annoy all creation.

More than thirty great manufacturing companies of the United States are establishing factories in Canada.

Within fifteen years the wealth of Basle has increased $60,000,000 and the population has almost doubled, which is a most remarkable showing for a town that is 1500 years old.

After the game the members of the baseball team were royally entertained by the members of the Pennington Seminary Athletic Association. They were conducted about the seminary buildings and grounds and later on in the evening they were served with a fine dinner at Berriens Café by the seminary students. The rooms were tastily decorated with maroon and black, the seminary colors and which are also the colors of the High School Athletic Association. Large ferns and palms also graced the several rooms. The dinner was voted by the members of the team to be an excellent [illegible] principal streets of the town by several of the students they started for home and reached Plainfield about 8 45 p. m. Saturday.

THE SOMERSET COURTS.

(*Continued from first Page.*)

J. B. Herder, James Woods, Dennis Wyckoff and Frank Wheeland were retained as constables for the term.

The list of petit jurors from North Plainfield is as follows: Asa D. Pope, Albert Runyon, Stephen Beeching and W. B. Emmons.

The trial of Joseph Ruer, who is in the county jail charged with the murder of John Diff at Bound Brook last Christmas, will begin May 11.

Concerning Proctor's Attractions.

Notwithstanding the fact that Spring is rapidly turning to Summer, the quality and quantity of the attractions at Mr. Proctor's various houses has not changed nor will they change in the general excellence that has become characteristic of the various companies. Many sterling comedies have been negotiated for the Summer season, and among these several that have not been produced in this country as yet. In the vaudeville field many big novelties and feature acts have been engaged for the Summer season. Mr. Procter's New York City houses are now undergoing alterations whereby they will be the coolest theatres in town when the hot season comes.

The forthcoming revival of "On the Wabash," at Proctor's Fifth Avenue Theatre, promises to be a notable one.

Big Load of Provisions.

When the steamship Pennsylvania, of the Hamburg-American line, left Hoboken last week, she had on board the biggest consignment of provisions ever shipped for the use of an Arctic expedition. The consignment, which represents fifty truck loads, is from a New York concern to the Ziegler Arctic expedition, which is fitting out at Trondjeim, Norway, to make another dash for the pole. The provisions include an immense quantity of canned goods, hardware utensils and implements of every description, and cases of clothing especially adapted for the Arctic climate. In addition to these there is a plentiful supply of spirits and tobacco, coffee mills, meat cutters, crystallized eggs, pipes and cigars. As it will be Christmas before the Fram and America now at Trondjeim reach winter quarters, plum pudding another item, will doubtless form part of the Christmas menu. The Esquimau dogs, which are to draw the sleighs over the Arctic ice, are not forgotten, as an item of 120 cases of dog biscuits appear on the manifest.

A NEW CROTON DAM

The Mammoth Engineering Feat Now Nearing Completion.

Extent of the System Which Is Necessary to Supply New York with Sufficient Pure Water—Needs of the Future.

Next to Chicago's drainage canal, with its extensive system of intercepting sewers, and the new rapid transit underground system of New York, the great Croton dam which the latter city is now building is probably the greatest engineering feat ever undertaken by any American municipality. In many ways it is the greatest undertaking of its kind the modern world has ever known, for its completion will create a basin that will hold 75,000,000,000 gallons of water, to quench the thirst of the citizens of Gotham.

This immense dam, built in the Croton valley, Westchester county, New York, and stretching nearly half a mile from mountain to mountain, will create a veritable lake 20 miles long. An idea of the size of the dam may be obtained from the immense amount of material and labor that has already gone into it. The estimated cost is $6,000,000; the height 300 feet, of which 150 feet is above the bed of the Croton river. The width at the base is 200 feet, from which the structure tapers to 20 feet at the top, across which a public drive will be constructed.

The amount of stone and materials used in the construction of the dam is estimated at 1,200,000 tons. Up to the present time the work has required more than 2,000,000 days of labor performed by an average of 600 men employed nearly every working day for ten years. It is probably safe to say that such a stupendous pile of masonry has not been erected since the building of the pyramids of Egypt. The steam and machinery equipment has equalled that of an ordinary railroad, for besides the many hoists and derricks, there are in use several miles of tracks and 50 locomotives and cars of

LOOKING ALONG THE FACE.
Showing the Contour of the Great Dam.

the dinky type used in hauling earth and stone.

The storage capacity of the present dam is about 43,000,000,000 gallons, but the completion of the new one will add about 32,000,000,000 gallons, almost doubling its capacity, and making a total of 75,000,000,000 gallons. It is estimated that the boroughs of Manhattan and Bronx, the only ones draining the Croton watershed, now use 276,000,000 gallons a day; at this rate the supply would last 267 days.

Although the new dam will increase the storage capacity of the Croton watershed, it will not increase the yield, which is estimated to be about 290,000,000 gallons a day, and an expert who has made a study of the problem of the water supply for the city of New York says that at the present rate of increase, in less than two years the watershed will not be able to supply the water needed. For this reason a new commission has already been appointed to scour the state for more water, more abundant rivers and bigger watersheds. Brooklyn borough, which uses about 115,000,000 gallons a day, obtains it from Long Island wells and ponds; the daily supply of Queens and Richmond boroughs, which is about 15,000,000 and 6,000,000 respectively, are also obtained by pumping, the supply in both instances becoming less and less.

Many farms and homesteads have been condemned during the past ten years on the immense tract that will furnish the bed of this new reservoir. Among others two famous inns will have to go. One of them is the Pine Bridge hotel in Yorktown, where Gen. Husted, known as the Bald Eagle, was first nominated for the New York state assembly and where he used to hold his conventions, and the other is the Palmer house, where Senator Chauncey M. Depew received his first nomination for the assembly, more than 40 years ago, and made his maiden speech.

Every precaution is being taken all through the watershed region to keep the water pure and free from contamination. The intake from the new reservoir will be from 22 gates, each supplied with charcoal filters through which the water must pass before it is turned into the aqueducts. These intakes have a capacity of 400,000,000 gallons a day. From this point the immense volume of water will be carried down to the city through masonry aqueducts 14 feet in diameter and lined with brick. Provision is made for draining the channels if repairs are found necessary and every precaution will be taken to prevent persons from placing contaminating substances in the water.

JAMES BRISTOL GREENE.

Elevated.

A Scotchman had reached the summit of his ambitions in attaining to the magisterial bench. He tried to live up to the honor. With his head high in the air, he swaggered along till he went bolt up against a cow which had not the manners to get out of the way, but continued to browse by the roadside in mild unconcern.

"Mon," cried the indignant owner, "mind my coo!"

"Woman," he replied, with fine dignity, "I'm no longer a mon. I'm a bailie."—Tit-Bits.

Nuns as Printers.

In Wadsworth, England, there is a printing department run entirely by nuns. It is used principally for the printing of sacred books for the use of choirs, such as hymnals, psalters, missals and the like. The productions do not bear the stamp of the amateur in the least, and the high standard of excellence is particularly shown in the music printing.—Albany Argus.

Taking Chances.

Old Lady—I feel awful nervous. Are you sure we won't have have any accidents?

Guard (fond of statistics)—Every person who rides on a railway takes one chance in 1,491,910 chances of being killed.

"La sakes! Why didn't that rascally agent tell me so before I bought my ticket?"—London Tit-Bits.

She Didn't Tell.

"You mean old thing,- now! You said you wouldn't tell Maude about me being engaged, and you went and did, so there!"

"I didn't do any such a thing! I didn't tell her at all! I just—I just asked her if she knew."—Baltimore News.

More Like It.

"I was thinking," said the humorous barber, "of hanging out a sign: 'Hair cut while you wait.'"

"But that's misleading," protested the victim. "Usually it's some other fellow who gets his hair cut while you wait.'—Philadelphia Press.

Marlborough Pudding.

To four tablespoonfuls of cream, put one pound of strained tart apples, six ounces of sugar, six of butter, six well-beaten eggs, and one grated lemon rind, with half of the juice. Bake about three-quarters of an hour.—Housekeeper.

A Hard Choice.

Maude—Oh, Gertie, what a lovely engagement ring! How I envy you!

Gertie—You needn't, dear. When it comes to the point, I've either got to marry him or give it back.—Glasgow Evening Times.

First American Strikes.

Three hundred shoemakers who struck for higher wages in Philadelphia in 1766 were the first workingmen to adopt such tactics in this country.

He Slept in Peace.

Miles—Did you encounter any of the big bugs while in New York?

Giles—No. I stopped at a new hotel.—Chicago Daily News.

A LIBERAL OFFER

As an Inducement to secure New Subscribers, and for Old Subscribers to pay up, we will, until MAY 10th, 1903, give each subscriber to the REVIEW, absolutely Free, a year's subscription to the Tribune Farmer; or the REVIEW and the Tri-Weekly Tribune for the single price of that paper.

Read Our Combination Offers Below.

Most Liberal Offer Of The Year

The New York Tribune Farmer

is a national illustrated agricultural weekly for farmers and their families, and stands at the head of the agricultural press. It is a practical paper for practical farmers, helping them to secure the largest possible profit from the farm through practical methods.

It is entertaining, instructive and practically useful to the farmer's wife, sons and daughters, whose interests it covers in an attractive manner.

The regular price is $1.00 per year, but for a limited time we will receive your subscription for THE NEW YORK TRIBUNE FARMER and also for the REVIEW, Plainfield, N. J.,

Both Papers One Year for only $1.00

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRIBUNE FARMER, New York City, will bring you free sample copy.

Almost As Good as Daily Newspaper

THE NEW YORK Tri-weekly Tribune

is a metropolitan newspaper for busy people, almost as good as a daily.

It is published on Mondays, Wednesdays and Fridays, and contains all the most important news of The Daily Tribune, which is a guarantee of its value.

If you live in the borough or on a farm and have not time for a daily newspaper you may be kept in close touch with all important news of the world at a very low cost.

The regular price of THE NEW YORK TRI WEEKLY TRIBUNE is only $1.50 per year, but you can secure it with the REVIEW, Plainfield, N. J.,

Both Papers One Year for $1.50.

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRI-WEEKLY TRIBUNE, New York City, will bring you a free sample copy.

Remember, this offer holds good only until May 10, 1903, after that date the price will be raised.

North Plainfield Weekly Review.

VOL. 4—NO. 6. NORTH PLAINFIELD, N. J., SATURDAY, MAY 2, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

Mulford Estil, of Grove street is recruiting at Atlantic City.

The graduating exercises for the training school nurses will take place May 14.

C. Frank French, of Somerset street the wholesale grocer, is enlarging his building.

J. Edmund Skiff has been secured as organist for the Church of the Holy Cross.

The Independent Gun Club will give a dance in Sangerbund Hall, Monday evening, May 4

William Barre, of Somerset street, has returned after a pleasant visit with Newark relatives.

The County teachers' examination will be held at Somerville, Friday and Saturday, May 1 and 2.

Mrs. Julia Rushmore of Pittsfield, Mass., is visiting her son, Edmund Rushmore of Sycamore avenue.

Mrs. John H. Carney, of Bayonne, is the guest of her mother, Mrs. Jacob Voehl, of Somerset street.

Mrs. H. A. Bonn, of Craig place, who has been detained at her home with a severe illness, is about again.

The New Jersey State Association of Postoffice Clerks will hold its convention at Trenton, Decoration Day.

Mrs Charles Greer, of Grove street who has been visiting friends and relatives in Newark has returned home.

John P. Wolf has ordered a delivery wagon of W. L. Sharkey, which he will use in delivering the Page wire fence for which he is agent.

A. V. D. Honeyman, of this borough, will lecture in the pubic school, Somerville, Monday evening on "The Aztecs and their Descendants in Mexico."

On Sunday May 10, Rev. C. [illegible] Sandahl, of Montclair will preach in the Swedish Lutheran Church, Grove street at 3.30 p. m. There will be baptism and communion.

The All-Plainfield baseball team will play the opening game of Wednesday's ball, on Hope Common, May 20. The opposing team will be the Sacred Heart Academy of Elizabeth

The Warren Chapel will at last have a building of its own. The property belonging to Councilman Robert Clark, Jr. at the corner of Watchung and Fairview avenues, has been purchased and a building that will cost about $15,000 is to be erected.

A Sunday school convention will be held in the Park Avenue Baptist Church Tuesday afternoon and evening, May 5. The conference is intended for superintendents, teachers and pastors. A number of speakers have been engaged for the occasion.

There will be no service in the Swedish Lutheran Church, Grove street tomorrow as the members will attend the celebration of the tenth anniversary of Upsala College which will be held in Carnegie Hall 57th Street and 9th avenue, New York City, tomorrow afternoon at 3.30.

The women's auxiliary to the board of governors of Muhlenberg Hospital has appointed these members as a visitors' committee for the month of May: Mrs. E. Arthur Janke, Mrs. Dorsey Hyde, Mrs. B. A. Hegeman, Jr., Mrs. I. N. Van Sickle, Mrs Rowland Stover, and Mrs. August Kleinche.

Hugh R. Monro, vice president of the Niagara Lithographic Co., of Buffalo will address the Y. M. C. A. meeting on Sunday afternoon at 4 o'clock. Mr. Monro is young, forceful and eloquent and he makes a strong appeal to the consciences of men. Charles L. Lewis, baritone of the famous Lotus Glee Club will be the soloist. The club of which Mr. Lewis is a member is advertised as Major J. B. Pond's the finest musical quartette in existence.

From some unknown cause the barn of Contractor William Simmons, of Cowperthwaite avenue was found to be on fire early Sunday morning. The flames had gained considerable headway before the burning building was discovered. Mr. Simmons has been severely burned. The alarm was sent in from box 142 and the Washington Company responded quickly. They arrived to find the building in flames and had to confine their efforts to saving adjoining property, which they did.

At the regular meeting of the North Plainfield Epworth League of the Methodist Episcopal Church, Saturday evening the following officers for the ensuing year were elected: President, Dyckman Wyckoff; first vice president, Miss Emma Smalley; second vice president, Miss Dyckman Wyckoff; third vice president, Mrs. D. L. Earp; fourth vice president, Miss Mary Steiner; secretary, William Warren; treasurer, Charles W. Harden. Mrs. Alfred Gaddis was appointed Superintendent of the Junior Department.

A fire started in a shed at the rear of 25 Somerset street yesterday forenoon. The fire department was called out and fire extinguished before any serious damage was done.

The fifteenth anniversary of the Monday Afternoon Club was observed Thursday by a breakfast at the Casino. Several out of town guests were present, and Mrs. R. W. Conklin, president of the club, gave the address of welcome.

In order to raise money to help erect the addition to the Park Club S. St. John McCutcheon, of Myrtle avenue gave a descriptive talk on "Italy" at the Park Club reception room Tuesday evening. The affair was largely attended and about sixty dollars was cleared for the fund.

New Bridge in Bernards.

The Somerset Board of Freeholders met at the Basking Ridge Hotel last Saturday and organized. It was decided to build a new bridge near Westlecroft's in Bernard Township.

Baseball Games Today.

Alis vs St. Mary, at St. Mary's grounds; Safe Works vs. Garwood, at Garwood; Westfield vs. Seventh Regiment; Hope vs. Scotch Plains; N. P. H. S. vs. ex High School; P. H. S. vs. Steven's Institute Underclassmen.

At Rest.

Funeral services for Mrs. Helen Leslie Love, wife of Andrew Love, Sr., of this borough, who passed away last Sunday, were held at her late home Wednesday afternoon.

Rev. Dr. D. J. Yerkes officiated and touchingly spoke of the character of the deceased. Elmer Runyon sang "I Do Not Understand" and "Abide With Me." Interment was made in Hillside Cemetery.

Annual Dinner of the Y. M. C. A. Gymnasts.

The annual gymnasium class dinner of the Y. M. C. A. was held in the small [illegible] Dinner was served at 6.30 to about fifty. Addresses were made by President Stephen Cahoone, W. D. Murray, General Secretary, J. H. Manning and Boys' Secretary, Kenneth Robbie. Physical Director, C. F. A. Heywood distributed the medals and badges to those winning the championship contests. Walter McNaughton was the champion in the athletic class, and was presented with a medal. Medals of silver and bronze were presented to Ray Smith the 2nd and to Paul Collier the 3rd champion. Walter McNaughton was also champion of the [illegible] class. William E. Neal came [illegible] and Wilbur Bonduff third. Both received silver medals.

Cellar for North Plainfield Engine House Begun.

At 7.15 sharp Thursday evening the Cellar Gang headed by the Independent Fife and Drum Corps marched through Lincoln Place to Contractor Dowd's home where each member was furnished with a shovel. They then marched down Duer street, through Craig Place and up Somerset street to the grounds where the Engine House will be built. The streets were lighted with red fire as the Cellar Gang marched to the grounds.

At 7.30 sharp the Mayor put five shovels full of earth into one of the wagons and each shovel full called forth cheers from the people led by Chief Stahl. After the Mayor had finished his work, and amid the cheers of the people, the ringing of the firebell, and the playing of the drum corps the Cellar Gang started to fill the twenty-four carts which were to take the earth away. The time consumed in filling the wagons was about one hour and fifteen minutes. After this the Cellar Gang again headed by the Fife and Drum Corps and followed by the Mayor, Councilmen and Hose Cart marched to the contractor's house where they deposited their shovels. The shovel which the Mayor used was presented for that purpose by A. M. Griffen through Chief Stahl.

The Gang then marched to Mr. Debele's house where a banquet was served. The yard was prettily decorated with bunting and lanterns.

Literary Note.

Book News for May carries the burden of the spring's heavy increase bravely. Fifteen pages of new work demand the entire [illegible] has been pressed into service, making the review columns uncommonly large but immensely well worth reading. D. Williams has, as usual, his talks "With the New Books," while Quentin McDonald has indulged in generous lots of space in "The Lorgnettes." The miscellaneous departments are complete, up to date, and the illustrations are numerous, the whole combining to [illegible] a most readable and [illegible] number.

JOHN WANAMAKER
Philadelphia. New York.

SEWER FOR BOROUGH?

Prominent Citizens Discuss Advisibility of a Sewer.

In response to a call for a mass meeting at Sangerbund Hall Wednesday evening, about fifty people gathered to hear the report of the committee appointed by the Mayor some time ago to investigate the different sewer systems and to recommend some system for the Borough.

The meeting was called to order by B. Hegeman, Jr., chairman of the committee, who read the report, which stated the different systems available, namely, a septic tank, similar to Plainfield's, and which would cost about $90,000 approximately; the establishment of a pumping station to connect with Plainfield, costing about $1500; and a tide water system to cost about $200,000.

A Mr. Smith, who is connected with an engineering firm in New York which installs sewer systems, was introduced and gave a very clear description of the kind of sewers his firm is interested in, and which seems to be almost identically the same as the one in Plainfield, in which the bacteria takes care of the sewage in a septic tank. He claimed that his system needed no attention after being installed, beyond an occasional inspection.

Joseph Osgood, of the borough, followed in a lengthy explanation of the Plainfield system. Mr Osgood stated that the water from the Plainfield plant flowed into Green Brook perfectly clear.

Mayor Smalley was the next speaker. He said he believed the people of North Plainfield were ready for a sewer system; that we were in great need of one, as the present cesspools were not satisfactory. He stated that within a radius of two hundred feet from the Hall there were located 25 cesspools, and said that was one of the reasons why he had sold his adjoining property. Some portions of the borough need a system right now, while other portions will not need it for some [illegible] system, whether it is tide water, or whatever system it is, I hope we will get the best, and I think we will if we take it up in the right manner and hang on until we are sure we are right," he continued.

He said that no one in the Borough was suffering at present for want of a sewer, but that there are places where a sewer was needed, and while no serious results had occurred, he thought there was room for improvement. "There is going to be a great expense in connection with a sewer, and I don't see how we can steer clear of that, and I hope the matter will be discussed and brought up just after my term of office expires, and that my successor will be some man who can give his time to the duties of the office, but I am ready to do anything I can and I hope the people of this Borough will be interested enough to get a good sewer system that will benefit the town."

At the conclusion of the Mayor's speech the chairman announced that the meeting was open to anyone.

Dr. H. K. Carroll arose and after thanking the committee for the commendable manner in which the members had performed their duties, said that "the question of a sewer is one of the most important which had confronted the people of North Plainfield, but I do not agree with the Mayor about deciding the question quickly. I think we should take plenty of time, and be very careful and not adopt any system that is in the experimental stage, but wait until the different systems proposed are found practicable; and of course the expense must be considered, and not burden our prosperity with too heavy a debt. I know very little about the systems mentioned. I should like to have a description of these different systems put in print so I can sit down at my leisure and study them over. My own opinion is and has been that the best way would be to go to tide water, but the cost must be considered. Perhaps in the course of a few years other communities will be willing to join with us in going to tide water and thus make it easy for all." He concluded his remarks by citing a similar case which came under his notice not long ago, where Roselle by joining with Orange was enabled to take its sewage to tide water with very little expense.

Mr. Smalley then explained that he did not mean that we should decide quickly on a system, but whether we did or did not want a sewer.

Mr. Osgood said that it would be necessary to first treat sewage before it could be emptied into a stream.

Charles H. Lyman, said the lack of a sewer in the Borough hurt every piece of property in it, and that it would cost no more for a sewer than it did to clean out [illegible] what proportion of [illegible] field were connected [illegible] This question raised [illegible] and brought to light that only about one-half of the houses there were connected with the sewer.

Mayor Jenkins, of Plainfield made a few remarks saying that he would like very much to see a sewer in North Plainfield, as he owned property here and was tired of cleaning cess pools, the cost of which averaged $20 a year. He said: "I believe it would be a good investment to put in a sewer. I have nothing to say about the system."

W. W. Howland was the next speaker. He joined Dr. Carroll in thanking the commission for its excellent work. He asked if the commission had examined into any other system besides that of Plainfield, and the chairman replied that they had not. He then said: "The only system before us is that in use at Plainfield, which I believe requires a stream of water to carry away the sewage." Mr. Osgood replied that in his opinion he did not think it was absolutely necessary that the sewage should empty into a stream or body of water. Mr. Howland then asked if all the houses in Plainfield were connected with its sewer if Green Brook was large enough to carry off all the effluent. Mr. Osgood replied in the affirmative.

Considerable discussion followed relative to the bacteria question. Mr. Osgood claimed that Green Brook contained as many bacteria before the sewer emptied into it as it does now.

Mayor Smalley said that the Borough was doing as much to contaminate the brook as was the city.

W. L. Saunders made quite a speech. He said, in part: "The question before us is not a system, but whether we need a sewer here in the borough." He spoke of seeing two open sewers in the borough near his property, one passing through a 4-4 inch pipe, the other a 10 inch pipe on the property of Mr. McCutcheon. He said that he had already paid $35 for cleaning cess pools the past year and have

MR. HONEYMAN INTERVIEWED.

[illegible] In Reference to Misstatements Made [illegible] Relative to Scores of Stream.

The Daily Press, last Saturday, contained an article to the effect that two drains were carrying filth into Stony Brook, and that the attention of the Borough Board of Health had been repeatedly called to the same but that the flow still continued.

Knowing that we have an efficient and prompt-acting Board of Health in the Borough, it was with a feeling of surprise that such a statement should be published and a representative of the REVIEW saw Rev. W. E. Honeyman, Secretary of the Board, and called his attention to the article. Mr. Honeyman said there were three distinct mis-statements in the article.

1. That Mr. Brooks has repeatedly called the attention of the health authorities to this drain. Mr. Brooks has never sent any communication to the Board of Health concerning said drain; nor has he ever conversed with them about it, nor does he pretend to have done so, and has so stated to me personally.

2. That the Board has neglected or been indifferent to the condition of Stony Brook in spite of notification of its bad condition. On the contrary, our Health Inspector, two or three times last Fall, went up and down the stream, looking for drains and pipes; and he has also been this Spring.

3. That a number of cases of Typhoid Fever have been reported among the boys who have used the swimming pool for bathing purposes. No case of typhoid fever among the boys, great or small, occurred in the Borough last year, and only one case the year before, which was contracted at Trenton, according to the statement of the physician who attended the case. No case of typhoid has ever been contracted, as far as known, from the use of this swimming pool.

Mr. Honeyman further stated that the *Press* was silent when the Plainfield Gas Works was sending daily, for weeks, a thousand times more foul matter into Green Brook than could possibly come from these drains. It was silent when the Electric Light Company poured its refuse into the Brook near Liberty street, and was silent last Fall when French's raceway was foul and filthy; and was silent when vaults near the bank of said raceway poured their contents into the water; and silent about other similar matters happening in the city. Why?

He also says there are vaults situated near the banks of the brook in Plainfield which pollute the stream and no notice is taken of them, and again questions why?

Mr. Honeyman stated that he has personally examined the two drains referred to, and that both appear to carry off only surface water. No connections whatever have been found between the drains and cess pools, but a more thorough investigation is being conducted, and of course if any such connection is found, the same will be instantly stopped.

HIGH SCHOOL NOTES.

Items of Interest Regarding the Borough Schools

Elmer Ackor '04 has accepted a position with a Newark firm.

A large number of students enjoyed pleasures of Free day yesterday.

Oscar Crite '01 is playing a great game for the Cornell Freshman Baseball team this season.

Superintendent Savitz, of the Westfield High School was the guest of Prof. Wightman, Tuesday.

Miss Ethel Daggett, who has been visiting friends at Whitehouse, N. J. has returned to her studies.

Miller is wondering where the baseball team of the Orange and the Block is this season—Deep, Down Deep.

The High School Athletic field has at last been put in condition and the boys are practicing every day.

The High School Baseball team will play the Battin High School team of Elizabeth here on May 19.

"Mary" has been adopted as the mascot of the High School nine at the suggestion of Manager George.

Otto Mueck is fast becoming an expert ball player and will no doubt play with next season's baseball team.

Arthur Humble has regained full use of his right ankle which he hurt in one of the basket ball games last month.

The High School baseball team will play the ex High School team on the Myrtle avenue ground in this afternoon.

The graduation essays of the class of 1903 have at last been finished and have been handed to Miss Glass for correction.

The Plainfield High School Baseball team will play the Underclassmen of Steven's Institute on Stillman field this afternoon.

Carl Steiner won the gymnastic championship of the Junior Department of the Young Men's Christian Association on [illegible] points.

The baseball game which was to have been played with Rutgers' "Prep" School on the N. P. H. S field Saturday, was cancelled on account of the poor condition of the field.

The class of 1903 of the Plainfield High School will edit the Oracle for the month of June. The cover will have a representation of the Plainfield High School class of 1903 pin enlarged.

Herbert Munro '05 of the Plainfield High School Baseball team has been elected Captain of the baseball team in the place of Fred Van Auken resigned on account of the recent death of his father.

The Senior class of the Plainfield High School has decided upon Monday June 15 as class day. The following officers have been elected: Class Poet, Miss Dorothy Waldo. Class Prophet, Archibald Brakely. Class Historians, Norman Hill, Cyril Brown, Arthur Conant, Helen Moody.

The N. P. H. S. baseball team went to Westfield Wednesday afternoon but were robbed of the game by the very poor decisions of the umpire, Manager Abrams. Spectators who were in position to see the playing acknowledge that his decisions were uncalled for, and that the team with two exceptions behaved very ungentlemanly. The score was, Westfield 13, N. P. H. S. 12.

Board of Education Met.

A meeting of the Board of Education was held on Monday evening at which a number of important steps were taken. Old Glory which has been waving at the head of the school fine days has become ragged and the Board has provided that two flags shall be bought, one for fine weather and a smaller one for bad weather.

The Truancy Committee made a report and showed that the attendance of the school has been increased by thirty pupils since the measure was passed.

A request was also read from the North Plainfield High School Alumni Association asking for the use of the High School Chapel in which to give a reception and dance to the Senior class next June. The request was refused because of the large amount of trouble it would cause to unscrew and remove the seats in the chapel but each member of the Board expressed their willingness to secure and defray the expenses of the Park Club House. It was also decided that repairs would be made to the Watchung School. Richard McDonald was secured as janitor of the school for another year. The Board unanimously decided that they would ask Prof. Wightman to reconsider his resignation and take charge of the schools another season.

Applications were received from Dr. Buchanan and Dr. Pittis for school physician and the Board, after a little discussion, decided upon Dr. Pittis.

At the Park Club Links.

Play was opened on Saturday afternoon for the President's Club on the links of the Park Club. First honors were equally divided between Charles A. Reed and Frank Rogers; second honors went to Rev. C. L. Goodrich. The scores were:

	GROSS	HAND	NET
Charles A. Reed	104	20	84
Frank Rogers	107	23	84
Rev. C. L. Goodrich	109	23	86
W. R. Faber	100	13	87
Nelson A. Miller	109	20	89
Leon R. Thurlow	114	24	90
C. W. Murray	111	20	91
S St. John McCutcheon	107	15	92
Herbert S. Rogers	112	18	94
A. W. Anderson	114	20	94
T. U. Dudley, Jr.	124	30	94
Morgan Townsend	100	0	100

STANDING FOR THE CUP.

Charles A. Reed	2.5 points
Frank Rogers	2.5 points
Rev. C. L. Goodrich	1 points

Refreshments were served during the afternoon by Mrs. Henry A. McGee and several young ladies of the club. Play will be continued this afternoon for the President's cup.

NEWS FROM WATCHUNG.

Ernest Fisher has new rubber-tired buggy.

Dr. Richard Moldenke and brother wheeled to New York City last Tuesday.

Crap shooting is openly practiced here Sundays. It ought to be stopped.

Mrs. C. Deity, of Woodhaven, L. I., is visiting her parents, Mr. and Mrs. Chas. Willis.

Harry H. Coddington has sold his kindling wood factory to Winans and Mobus.

Mrs. Grootmaan and children, of West Fourth street, Plainfield have been spending a week with Mrs. John S. Koch.

Richard R. Colton and Arnold Challett, of New York City came out on their wheels last Saturday and remained over Sunday with Postmaster Schmidt.

Farmers are wishing for some of the surplus rain that fell a few weeks ago. The top crust is so hard that plowing has been abandoned for the present.

Mobus has rented his house to Mr. Hillman, of Garwood, who took possession Wednesday. Mr. Mobus has moved into the Johnson house.

A whole lot of excitement and ammunition were wasted last Saturday on five wild ducks seen on Watchung Lake. Mrs. Koch's house which is situated on the bank of the Lake, received a broadside of shots which greatly frightened some children who were visiting there, but the ducks were secured.

A merry party gathered at the home of Mrs. John H. Koch's last Wednesday evening. Games and musical selections, both vocal and instrumental made time pass all too quickly. Among those present were: Mrs. and Miss Higgins; Mr. and Mrs. Henry Spear; Mr. and Mrs. George A. Schmidt, Mrs. Kelm and daughters, Miss Florence Ackor, Miss Etta Gordon, Ernest Bicknell, Hugo and Paul Kelm, George and Edward Spear, E. S. Ackor.

WARRENVILLE NEWS.

Mrs Wm. G. Cooper and son called on friends here this week.

Mrs. E. A. Cooper is spending a few days with her mother at Watchung.

W. Howard Toms is doing the carpenter work for Mr. Anderson at Washington Rock.

Dr. Martin Jennings has purchased another horse.

Nicholas Van Winkle is making some very good improvements on the old Cory place.

James Stewart has sold his farm on Safety Heights to a party in New York.

Mrs. Alice Cory has made arrangements to let furnished rooms for the summer.

The Board of Education will meet tonight at the Warrenville school house.

County Superintendent of schools, Krebs visited the school here last Thursday.

Death of Jacob J. Giddis.

Jacob J. Giddis, son of the late Amos and Martha Giddes, died at his home in Mt. Horeb Thursday morning. The funeral services will be held tomorrow morning at 10.30 o'clock from the Mt. Horeb Church.

The deceased is survived by four children, Amos, Benjamin, Martha and Lillian; three brothers; Amos of this borough, Isaac of Dunellen, Abram of Greenbrook: also three sisters, Mrs. W. J. Conroy, Mrs. Henry Demott both of this borough and Mrs. Louis Perrine of Martinsville.

Mr. Giddis had lived in Mt. Horeb all his life and been a member of the church there for thirty years.

Annual Reunion of New Jersey Editors.

The annual meeting of the reunion of the New Jersey Editorial Association will be held from Saturday, May 16 to Monday, May 18 at the Hotel Strand, Atlantic City.

REPORT OF GENERAL MILES

His Criticism of Conditions in Philippines Made Public.

WATER CURE AND ARSON ALLEGED

The Lieutenant-General Treats of Instances of Cruelty Reported to Him—Bureau Chiefs at Washington Dissent From His Opinions—The Report Given Out by Secretary Root.

Washington, D. C.—In reply to the charge of anti-imperialists that he dared not reveal the allegations of cruelty to Filipinos made by Lieutenant-General Miles, Secretary Root ordered the publication of General Miles' Philippine inspection report.

While the charges of cruelty have caused the greatest comment here General Miles' statement that the Philippines *are no better defended now than* five years ago; his urgent recommendation for establishment of a naval station at Olongapo; his prediction of a terrible famine within a very short time on acount of the drouth and disease among domestic animals have also attracted great attention.

In his address to the Secretary of War General Miles says that in going from Calamba to Batangas in November last he noticed that the country appeared devastated and that the people were very much depressed.

Stopping at Lipa he says a party of *citizens, headed by the acting presidente*, met him and stated that they desired to make complaint of harsh treatment of the people of that community, saying they had been concentrated in towns and had suffered great indignities, that fifteen of their people had been tortured by what is known as the water torture, and that one man, a highly respected citizen, sixty-five years old, named Vincente Luna, while suffering from the effects of the torture and unconscious, was dragged from his house, which had been set on fire, and was burned to death.

They stated that these atrocities were committed by a company of scouts under command of Lieutenant Hennessey and that their people had been crowded into towns, 600 being confined in one building. A doctor of the party said he was ready to testify that some of the 600 died from suffocation.

General Miles said he looked at the building, which was one story in height, eighteen or twenty feet wide and possibly sixty or seventy feet long. He asked for a written statement to be forwarded *him at Manila*, but says he never received it, and adds:

"I have no reason to disbelieve their statements, in fact, the instances of torture in the case of the man Luna having been tortured and burned to death are confirmed by other reports."

General Miles then refers to other cases, saying that in the Island of Cebu it was reported and published in November, 1902, "that two officers, Captain Samuels, Forty-fourth Infantry, Volunteers, and Lieutenant Fecter, Nineteenth Infantry, had committed similar atrocities against the people of that island. It is also reported that at Lacag, on the Island of Luzon, two natives were whipped to death.

"At Tacloban, Leyte, it was reported that *Major Glenn ordered* Lieutenant Caulfield, Philippines scouts, to take eight prisoners out into the country, and that if they did not guide him to the camp of the insurgent Quison he was not to bring them back.

"It was stated that the men were taken out and that they either did not or could not do as directed. One of the men, who had a son among the scouts, was spared, but the others were separated into two parties, numbering three and four respectively, and while tied together were all murdered by being shot or bayoneted to death, some being in a kneeling position at the time.

"The pretence was made that they were killed while attempting to escape, but, so far as I know, no official report was ever made of the circumstances. These facts have been reported by Major Watts, who investigated the case. Besides Lieutenant Caulfield, Civilian Scouts Ramos, Preston, Corn and McKeen were participants.

"It appears that Major Glenn, Lieutenant Conger and a party of assistants and native scouts were moved from place to place *for the purpose of* extorting statements by means of torture, *and it became so notorious* that this party was called 'Glenn's brigade.' Whether it was possible for officers to be engaged in such acts without the personal knowledge of the general upon whose staff they were serving at the time, namely, Brigadier-General Hughes, I leave for others to conjecture.

"These facts came to my notice in a casual way and many others of similar character have been reported in *different* parts of the archipelago. In fact, I was *informed* that it was common talk at the places where officers *congregated* that such transactions had been carried on either with the connivance or approval of certain commanding officers. It is, however, most gratifying to state that such atrocities have been condemned by such commanders as Generals Lawton, Wade, Sumner, Lee, Baldwin and others."

Continuing his report to the Secretary, General Miles says the law was violated in handling and buying large quantities of rice, which was *sold at a* profit. The people who were in the re-concentration *camp were, says* General Miles, "considered prisoners of war, but were compelled to buy food from those who held them at a large profit." General Miles speaks of the magnitude of the transaction, which involved 21,000,000 pounds of rice and other supplies, at a cost of $306,320. He says that "an extraordinary feature of this *transaction*" is that the action was disapproved by a division commander, who assumed command and who turned the matter over to the civil authorities, and that it has been carried on under an act of the Philippine Commission.

A reply to the foregoing portion of the report has been prepared by Judge Advocate-General Davis in a letter to the Secretary of War, in which he says:

"The incidents which are set forth in *the enclosed special* report have been made the subject of special investigations; in some instances these have been conducted by courts-martial and their findings and sentences have been duly promulgated in orders; in others the inquiries have been intrusted to inspectors or to officers designated for that purpose by the commanding general in the Philippines."

Replying to General Miles' recommendation that beef on the hoof be supplied to the troops in the Philippines, *General* J. F. Weston, Commissary-General, states:

"In my judgment it is not a feasible or economical plan, and there should be no departure from the present system of supplying frozen beef."

General Crozier, Chief of Ordnance, says the War Department appreciates the necessity of defending by fixed works the principal ports of all the insular possessions, including the Philippine Islands, but that the matter rests with Congress.

Miles' Charges Stale, Says Chaffee.

New York City.—General Adna R. Chaffee, after reading the statement of General Miles, said:

"There is nothing to say regarding it. It is only a restatement of that which has been published before dozens of times. Concerning the purchase of rice that was done with my knowledge, and I am willing to stand by it.

"This rice was bought with money taken from the insular treasury after *consultation with General* Bell. We sold at a profit of twenty-five cents on *every* 133 pounds, and the profits were used to relieve destitution in other parts of the island."

STRANGE CAREER OF ROLLER.

Had Been Thief, Respected Business Man and Forger by Turns.

Newark, N. J.—The suicide of Charles L. Roller in the Windsor Hotel in Montreal brought to a close a career which had furnished many sensations.

Roller was born in this city twenty-eight years ago. He came of a good family, and was looked on as a lad of much promise. In his teens, however, when he was employed by a watchcase company of this city, he stole some gold bars from the factory. The firm discovered the theft and compelled him to pay for one bar he had sold *and* return the others. The affair was hushed up.

Later he started in the real estate *and* investment business in this city. He showed business acumen and prospered to such a degree that within a few years he was regarded as a rich man.

One day, about two years ago, he disappeared. A few days later it was rumored he had been putting out fraudulent paper right and left. Then it came to light that he was a forger and embezzler to the amount of $60,000. Some of the most prominent men in Newark were his victims. He was arrested in California, brought back and tried. A sentence of seven years in State Prison was imposed.

After he had served eleven months of *the term he was released on parole.* He had revealed the secrets of a smuggling system that had been going on in the prison, and for this service he received conditional freedom. Then he went to Yonkers. He came into view again when he made a murderous assault on his wife in New York City. He was sent to an asylum, but released in his uncle's care.

LED PONY INTO WHITE HOUSE.

Animal Carried Up on Elevator to Archie Roosevelt's Room.

Washington, D. C.—Archie Roosevelt, who is recovering from the measles, had a visitor the other day whose visit will do more to restore him to health than all the medicine the doctor can give him. Soon after Archie began to convalesce, he begged to be *allowed to see his spotted pony. It was* too soon for Archie to leave his room, *and Mrs. Roosevelt was compelled to* decline the request. Charles, the *groom*, who looks after the pony and who also is a great chum of Archie, thought the matter over and concluded that if Archie wanted to see his pony he should do so.

Without confiding his plan to anyone he led the pony the other day into the White House and along the corridor into the elevator. The attendants were too much surprised to say a word, until after the elevator had disappeared. When *the second floor was reached* Charles led the pony to Archie's room *and ushered it in. To say that Archie* was delighted expresses it mildly, and the pony also seemed to enjoy the visit.

This is the first time that a horse has ridden in a White House elevator.

BOYCOTT BY BUSINESS MEN.

Omaha Association Threatens to Stop Supplies For a Restaurant.

Omaha, Neb. — William J. Huston, proprietor of the Climax Restaurant, a well-known house in Omaha, has been notified by the Business Men's Association that unless he abolishes the wage *scale he just signed with the Waiters'* Union he will not be able to purchase *supplies of groceries and provisions.*

The association is made up of nearly 900 of the strongest business houses in the city for the purpose of fighting labor unions. This is their first move in that direction. Huston says that he will lay in several days' supplies and see what results will be. The waiters assert that the new scale will be demanded everywhere.

BRITISH HONOR AMERICAN VALOR.

Memorial *Statue* Tells of International Incident at Pekin.

London.—The Prince of Wales unveiled in St. James Park a statue erected in memory of the marines recently killed in South Africa and China. The events at *Pekin are commemorated* by a bas-relief on the pedestal depicting *an episode in the defense* of the legations, when the British marines were *led in a sortie* by an officer of the United States Marine Corps, after their own officers had been put out of action.

Elections In Spain.

The general elections throughout Spain *are reported to have* resulted favorably to the Republicans, who obtained victories in Madrid, Barcelona, Valencia and other large towns. Slight rioting occurred at Barcelona, Bilbao, Granada and elsewhere; at Barcelona several persons were wounded by revolver shots.

Cruiser Colorado Launched.

The armored cruiser Colorado was launched at the Cramp shipyards in Philadelphia, Pa.

MUST RESPECT PROMISES

Our Government Demands an Explanation From Russia.

OPPOSES MANCHURIAN POLICY

Muscovite Ministry Reminded of Its Assurances That the Integrity of China and *Open Door Policy* Would Be Preserved—Ambassador Cassini, Though Ill, Has Conference With Secretary Hay

Washington, D. C.—Russia's *demands* in Manchuria and their effect on American interests were the subject of a conference between Secretary Hay and Count Cassini, the Russian Ambassador, which occurred at Secretary Hay's house and lasted for nearly an hour. It is denied that the Ambassador brought official advices from his Government, but the fact that he is still suffering from an attack of lumbago, which has confined him to the Em*bassy for several weeks, is evidence of* the urgency of the call.

Steps already have been taken by the State Department to ascertain the true inwardness of Russia's latest move. Ambassador McCormick, at St. Petersburg, has been instructed by cable to present to the Russian Foreign Office a note which, while diplomatically known as one of inquiry, is in substance a strong protest against Russia's demands.

Cable instructions have also been *sent to Minister Conger, at Pekin, to* express to the Chinese authorities the *dissatisfaction of the United States* with Russia's demands, and our hope that China will not accede to them. No answers have yet been received to either note, though unofficial assurances are still reaching the Department that American interests in Manchuria will be protected.

In the Department's note, forwarded to Ambassador McCormick, Russia's attention is called to the assurances which repeatedly have been given the United States relative to the preservation *of the integrity of China* and the continuance of the open door policy.

Russia also is reminded of the severe blow to American trade which must follow the granting of the first two demands, that no more ports or towns in Manchuria be opened, and that no additional foreign consuls be admitted. Russia's reason for contending for the closed door in Manchuria is the claim that the open door there is not a commercial but a political question. She continues to assure the United States that in some way this country's interests will be protected in Manchuria. The point is made that as the Manchurian demands are still in negotiation *between St. Petersburg and Pekin*, the United States cannot expect that Russia make concessions until the fate of her demands has been determined. *Should China* has acceded to all of these demands, it is suggested that a trade agreement of some sort can be reached between this country and Russia which will protect our trade interests.

Appreciating the fact that the interests of this country in Manchuria are those of trade and not territory, Russia, it is stated, is disposed to make certain trade concessions to the United States in Manchuria at the proper time.

Minister Conger Protests.

Pekin, China.—Minister Conger has sent a note to Prince Ching, the Grand Secretary, protesting against two features of Russia's proposed Manchurian agreement, which are considered particularly antagonistic to American interests. The note objects to China promising not to open more towns to foreign trade because negotiations are *progressing in connection* with the American commercial treaty for the *opening* of Mukden and Taku-Shan, and it objects to promising that the foreign employes in China shall only be Russians. The United States withholds expression regarding the other demands, but is prepared to insist on her treaty rights if infractions occur.

Russia's Denial.

St. Petersburg, Russia.—Russia surveys with undisturbed equanimity the tempest that has been aroused over the Czar's attitude in Manchuria, and the Foreign Office has entered a plausible denial of the intention attributed to it of renouncing the "open-door" policy. In fact, when the Pekin dispatches of April 23, setting forth the eight demands said to have been made by Russia on China regarding Manchuria, were shown, the officials entered a bold denial of several of the points, and minimized the importance of others.

Japanese Press Demands Action.

Yokohama, Japan.—Even those newspapers which previously have been moderate in tone now join in the opinion that the time has arrived for all Powers interested in the integrity of China, her development and trade opportunities there, to show a *firm front* to Russia in the matter of her demands upon *Manchuria*.

China Rejects the Demands.

London.—It is officially announced here that the Chinese Government has sent to the Russian Government in St. Petersburg a formal refusal to grant the latter's demands in regard to the evacuation of *Manchuria*.

Russia Increasing Fleet in Orient.

Victoria, B. C.—According to mail advices received here from the Orient, Japanese papers state that Russia is increasing her fleet in the far East.

Buffalo Broker a Suicide.

Wolf M. Elsner, note broker and real *estate dealer*, was found dead in his office by his clerk, Miss Louise Werle, *at Buffalo, N. Y.* Death was caused from carbolic acid poisoning. Elsner had been despondent on account of financial difficulties.

Macedonian Reports Exaggerated.

There will be no general uprising in Macedonia, the Bulgarians not having the right men for leaders. The reports of atrocities, both by Turks and Bulgarians, are much exaggerated.

A GERM OF SMALLPOX

Scientists Amazed at the Discovery of a Harvard Man.

The Relief Now Is That a Cure For the Dread Disease Soon Will Be Found —Experiments In Boston.

Boston, Mass. — Scientists were amazed when Dr. William T. Councilman, professor of pathology in the Harvard Medical School, told of his discovery of the germ of smallpox.

Though some news of the great medical discovery had crept out, it remained for Dr. Councilman to give to the world the details of it and suggest some remedy for a disease that has afflicted mankind for many centuries.

Most of the prominent members of the medical profession and many scientists of the East were in attendance at the meeting of the Boston Medical Society when Dr. Councilman read his paper, and after the reading it was *freely commented on. The opinion* was the cure for the disease now would be *found*.

The announcement of the discovery of the germ of smallpox is the outcome of the investigations conducted by Dr. Councilman, Dr. George Burgess McGrath and Dr. Walter Remsen Brinckerhoff, with the co-operation of the Boston Board of Health, during the recent epidemic of the disease in this city.

It has been determined that smallpox is caused by a micro-organism representative of the *lowest form of* animal life. This fact serves to relate *the disease with malaria and to distin*guish it from many other infectious diseases caused by minute forms of vegetable life known as bacteria.

Dr. Councilman's efforts resulted in finding that smallpox is caused from protozoa, distinguished from bacillus, as the latter germ is a vegetable organism, while the former one is the lowest form of animal life. Thus it is not strange that such a discovery of world-wide importance should have been made by a pathologist instead of a bacteriologist.

The recent outbreak of smallpox in this city gave the greatest opportunity for Dr. Councilman and his assistants to investigate its causes. The disease was studied in every form and the greatest attention paid to the most minute development in each case. New theories were put into practice and experiments made on subjects which were already known to be most susceptible, with the amazing discovery being accomplished as a result.

It is thought still greater truths will be learned in this manner in regard to *other diseases of an infectious character*, the chief symptom of which is shown on the skin.

EARL WEDS AN HEIRESS.

Relatives of Miss Thaw Absent From Her Marriage to British Nobleman.

Pittsburg, Pa.—Amid scenes as impressive as a lavish display of wealth, the dignity of society, and the solemnity of the ritual of the Protestant Episcopal Church could provide, the marriage of George Francis Alexander Seymour, of England, the Earl of Yarmouth, and Alice Cornelia Thaw, of Pittsburg, daughter of the late William Thaw, was solemnized in Calvary Church. The Rev. Dr. W. L. McEwan, pastor of the Presbyterian Church, of which Miss Thaw is a member, assisted by the Rev. Dr. John H. Mellvaine, pastor of Calvary Church, officiated.

A circumstance which caused much comment was the absence of a number of members of the bride's family, who were opposed to the marriage. Josiah Copley Thaw, a younger brother, gave his sister away.

The bride wore a magnificent gown of ivory satin, trimmed with duchesse lace, made high-necked and with a court train. She carried a bouquet of orchids and lilies of the valley, and wore a fine string of pearls that was her brother's wedding gift.

After the church ceremony there was a reception at Lyndhurst, the Thaw residence, for 150 people. The house was splendidly decorated, and the collection of gifts was most magnificent.

The bride gave to her attendants diamond and amethyst bracelets. The newly wedded couple left for a brief honeymoon trip before sailing for England. The Earl of Yarmouth's father, the Marquis of Hertford, and his family, who came from *England for the* wedding, are to return to London at once.

THE PRESIDENT IN IOWA.

He Is Greeted by Many Children and Kisses Some Babies.

Ottumwa, Iowa. — President Roosevelt's itinerary led him eastward through Iowa. Brief stops, punctuated with speeches, were the order of the day. Everywhere the President was greeted by large and enthusiastic crowds. With him as guests were Governor Cummins and Secretary Shaw. Congressmen Hull and Hepburn also were with the *party part of the day*.

One of the features of the day was the large number of school children that greeted the President. At every place he stopped and at many places where the train did not stop the little people were congregated, waving small American flags. This feature pleased the President very much, and he referred to the children several times. At Des Moines the President kissed a number of babies. During the drive four mothers, each with a baby in her arms, approached his carriage and handed him bouquets of flowers. They *then held the babies up to be kissed*, and the President did not disappoint *them*.

The President is bearing the strain of the trip splendidly, and his face has not yet lost the tan it acquired during his two weeks in Yellowstone Park.

A Rothschild Must Go to Prison.

The Appellate Court at Paris, France, confirmed the sentence passed on Baron Henri de Rothschild of ten francs fine and one day in prison, for driving an automobile at excessive speed on the boulevards.

Cable Landing In the Philippines.

Secretary Root, at Washington, has granted permi[ssion to] Commercial Cable [Company] on the militia [island of] Antonio Abau, to erect a cable

MOUNTAIN IS BLOWN APART

Disaster Visits a Mining Town in a Canadian Province.

SCORES OF PERSONS KILLED

Various Theories on the Cause of the Explosion—Whole Top of the Mountain Slides Into Valley—Victims Crushed to Death In Their Beds While Asleep —Threatened by Flood.

Vancouver, B. C.—Probably ninety-five persons are dead as a result of a mysterious explosion which *tore off* the top of Turtle Mountain, overlooking the little town of Frank, in the Province of Alberta. Great masses of rock were hurled down into the valley of the *Old Man's Creek*, sweeping away the works at the coal mines on the side of the mountain and demolishing houses in the town below. Many of the inhabitants were killed in their beds, the men at the mine works were all killed, and fifteen of the seventeen men in the mine escaped only by cutting their way out through debris which choked an opening leading from the main shaft.

There was danger that flood would add to the disaster. The rock formed a great dam, behind which the waters of the creek piled up, and if they should be let loose it was not doubted that the entire town would be swept away.

*Frank is a town of about 1000 inhabi*tants on the line of the branch of the *Canadian Pacific Railway over Crow's* Nest Pass. It lies at the entrance to the canyon, and the French Canadian Coal Company has been operating the coal deposits in Turtle Mountain for about eighteen months.

A dispatch received from Frank stated that at 4.10 o'clock a. m. the town was shaken with terrific force and was shocked by loud reports and detonations. Houses threatened to topple over in the rocking motion. Instantly the whole town was afoot, and *soon the shouting of men, who were* running to and fro, mingled with wails of injured and dying, showed that a catastrophe of magnitude had taken place.

For a time nothing was seen but dense clouds of black smoke, with balls of fire darting here and there across the disturbed section. As soon as the first smoke cleared away it was seen that the whole side and top of the mountain immediately at the back of the town had been blown off.

An immense upheaval of about one mile by two miles long had taken place, *and what before was a long swamp* was suddenly transformed into a huge mountain of rock. The direction of the eruption from the mountain was north and northeasterly and in limestone altogether, as this section of the country is all limestone. The side of the mountain on which the mine was working is [illegible] falling rocks.

As to the cause or nature of the explosion many theories are advanced, some asserting it was due to gas, others that it was slaking of limestone, and still others declaring it was a regular volcanic eruption. The immense stretch *of country torn up by the upheaval* would seem to lend color to the idea *that there was an upheaval for a mile* or so, but no explosion till the top of the mountain was blown up.

The company's mines and plant are totally destroyed, and the new electric light plant being installed is also gone. A mile or so of the Canadian Pacific tracks is also torn up, and the rails are twisted and bent in all sorts of fantastic shapes. The road could never be built up from there again.

Nearly every cottage in the district is now vacant, the occupants going to Blairmore, a small town seven miles distant. Rescue parties have been *organized, and a systematic method of* search and rescue is being vigorously *carried on*, but very little hope is held out for any of the missing.

Official Report of Disaster.

Ottawa, Ont.—Sir Wilfrid Laurier received the following telegram from S. W. Chambers, President of the Board of Trade of Frank, Northwest Territory:

"Terrible disaster here. The eruption of Turtle Mountain devastated miles of territory. One hundred killed. Must have Government aid at once to clear *passage of river*, which is dammed 100 feet high, and danger to life and *property from the flood most immi*nent. Not one day distant."

Sir Wilfrid Laurier replied as follows: "Very sorry to hear the sad news. I have given instructions to the mounted police at MacLeod to give all the relief possible. Please send further details."

Irving M. Scott Dead.

Irving M. Scott, head of the Union Iron Works and builder of the famous battleship Oregon, died of paralysis at his home in San Francisco, Cal. He was a millionaire. Mr. Scott was a native of Baltimore County, Maryland, and was sixty-six years old. He never *held public office*.

Foreigners In Venezuela.

President Castro has issued a decree defining the status of foreigners in Venezuela. Its provisions are drastic and foreigners in that country are much exasperated. Immigration and the introduction of foreign money there are expected to cease.

Three Suicides In Washington.

Three persons committed suicide in Washington, D. C., in one day with carbolic acid. They were Leonard H. Mangum, Guy E. Padgett and Mrs. Sadie Plummer.

Naval Surgeon Shoots Himself.

For reasons unknown Dr. Harold Hamilton Haas, Surgeon in the United States Navy, who was on sick leave at Staunton, Va., shot himself in the head at the Eakelton Hotel there. He left a sealed letter addressed to Senora Muneen, Culebra, P. R. He was a native of Harrisonburg, Va.

Some *Albanians* Accept.

The Albanians at Liuma and a section *at Ipek have given their acquies*cence to the reforms suggested by Austria and Russia.

KING VISITS THE POPE

British Monarch Received in a Secret Papal Audience.

The Pontiff Presents a Memorandum Concerning Church Affairs in the Empire and Requests Consideration.

Rome.—"I *am happy to see Your Ma*jesty," said Pope Leo XIII. in French, as he stood at the threshold of his private apartments and extended his right hand to King Edward VII. of England.

"I *am* happy to be here," responded King Edward also in French, as he clasped the Pontiff's hand, "and to add my congratulations to those of others upon having outlived the days of St. Peter."

The King passed within the Pope's private apartment, the door closed and *the two were alone twenty minutes*.

It has leaked out that the Pope told the King that in expectation of the visit he had looked into all questions regarding Catholic interests now pending in various parts of the British Empire, and had prepared a memorandum, to which he hoped the King would pay his benevolent attention.

One part of this memorandum concerns the school question in Canada.

King Edward arrived at the Vatican at 4.30 p. m. It being contrary to Papal etiquette to receive any one coming from the Quirinal, the King had [illegible] at the Quirinal and then driven to the British Embassy, and after a few moments' stay had driven to the Vatican in a carriage that did not belong to the King of Italy. But instead of returning to the British Embassy Edward drove directly to the Quirinal.

In the morning he had driven to the parade ground with Queen Helena and seen 25,000 Italian troops engage in mimic war under command of King Victor.

One of the Pope's chaplains called at the *British Embassy later with a por*trait of the Pontiff for King Edward, *upon* which was a dedication in the Pope's hand and his autograph.

Speaking to his familiars after King Edward left the Pope said:

"He is a very nice man."

At the Embassy reception King Edward remarked:

"It is wonderful: he looks more to be seventy-three than ninety-three years old."

HANGED NEGRO COMES TO LIFE.

Question Now as to Whether He Can Be Executed Again.

Mobile, Ala.—Two weeks ago a negro named Tom Barth was hanged at Wodowee, Ala., and was pronounced dead by a physician when he had been suspended in the air for some time. The body was cut down and turned over to relatives. Soon afterward it was noticed that the body seemed to have life in it, and a physician was called and administered restoratives. A few days ago the news came to Anniston that the negro is so far recovered as to be able to sit up.

This is the first legal execution to take place in Randolph County. The negro's neck was not broken. The question now is: Has he paid the penalty exacted by the law, and can he go a free man, since he has been declared legally dead. The negro is still in the hands of his people, and there has been no move to rearrest him.

The crime for which he was sentenced to death was murder.

WYOMING'S GOVERNOR DEAD.

Colonel De Forest Richards Succumbs to Acute Kidney Disease.

Cheyenne, Wyo.—Governor De Forest Richards died at his home in this city of acute kidney disease.

Colonel De Forest Richards had been a resident of Wyoming for fifteen years. He was born in Charleston, N. H., in 1847, and was educated in the New England States. He went to Alabama as a young man, and remained there eighteen years, engaged in mercantile business. During his residence in Wyoming he was identified actively with the business interests of the State. He was president of several concerns. For several years he was at the head of the State militia.

938 KILLED ON RAILROADS.

11,873 Others Injured in the United States in Three Months.

Washington, D. C.—The Interstate Commerce Commission has issued a bulletin on railroad accidents for the three months ended December 31, 1902. It shows that during that period in train accidents 266 persons were killed and 2788 injured. Accidents of other kinds, including those sustained by employes while at work, and by passengers in getting on and off cars, etc., *bring* the total number of casualties up to 938 killed and 11,873 injured. The *damage to cars and engines and road*bed by these accidents amounted to $2,462,056.

Confession Implicates High Officials.

John A. Lee, former Lieutenant-Governor of Missouri, has furnished Circuit Attorney Folk, at St. Louis, Mo., with a long typewritten statement of his connection with *boodling in the* Legislature, giving the names of Sena*tors and Representatives* whom he knows to have accepted boodle for the suppression of the enactment of legislation. Mr. Folk is satisfied that the expose is complete, names and dates being carefully recorded.

Turkey Admits American Pork.

Minister Leishman cables the State Department, in Washington, that the prohibition of American pork in Turkey, which has been in effect for five years, has been removed, and orders *have* been issued permitting entry after the customary inspection.

High Heels Cripple Baroness.

The Baroness Hengelmuller, wife of the Austro-Hungarian Ambassador, slipped on the polished floor of the Embassy in Washington and broke her ankle. The accident is attributable to the high-heeled shoes which the Baroness was wearing at the time.

Sluicing in the Klondike.

Sluicing out all the creeks in the Klondike has begun. The estimated *output for the present year* is given as $15,000,000, against $12,000,000 for last year.

A SANITARY TENT.

The Latest Health Device For Consumptives.

The newest thing in health devices in the Rocky Mountains is the sanitary cottage tent, in which a great many persons afflicted with tuberculosis are living almost out of doors in many

SANITARY TENT FOR CONSUMPTIVES.

parts of Colorado and others of the *Rocky Mountain States.*

This tent is ten by twelve feet, as designed for but one person. It has a good frame, floor and wainscoting. The latter is two and a half feet high above the floor, and above this is two and a half feet of canvas, making the side walls five feet high from floor to angle of roof. It is covered with double walls of canvas, between which is an air space of four inches and so arranged as to ventilation that a constant circulation of fresh air surrounds the inmate of the tent cottage. The outer roof canvas or "fly" is elevated six inches above the inner roof and projects two feet at each end and each side, thus protecting the tent from sun, snow, or rain. By a simple *mechanism the upper half of the outer* wall of each side and the rear end can be converted into an awning, thus changing the tent cottage into a tent pavilion whenever desirable. *These* features are shown in the illustrations here presented. Other devices regulate ventilation at will, the whole making a very convenient, cheap and comfortable habitation, durable, portable and easily dismantled by the removal of eight bolts.

New President of Brazil.

Dr. Francisco de Paula Rodrigues Alves is the new President of the United States of Brazil. President Alves belongs to the Republican party, which is also described as the "Conservative" party. He has held many public positions, and is one of the ablest men in Brazil.

DR. FRANCISCO P. RODRIGUEZ ALVES.
(The New President of Brazil.)

Dr. Brandao, who was elected Vice-President, has recently died.

President Alves holds that it is absolutely necessary to pay all the republic's obligations in gold. His chief effort will be to raise the value of the paper currency. He does not advocate a partisan modification of the constitution, as he believes it now embodies *the most advanced principles of democracy.*

French cabinet-makers have learned a way of preparing sawdust and making it into articles of ornament that resemble carved woodwork.

WILL MOVE SMITHSON'S BODY

Genoa Wants the Ground Occupied by America's Benefactor.

James Smithson, the founder of the Smithsonian Institution, is about to be turned out of his grave, in Genoa, Italy, to make room for a quarry, says the Kansas City Star.

The birth, life and death of this great benefactor of mankind were for him one series of misfortunes, and now *even his resting place is to be de*stroyed. As the illegitimate son of a duke and a noble lady who was the descendant of kings, he came into the *world unwelcomed; his life was em*bittered and blighted by the thought of his stained birth; he died in Genoa—he never had a home—without a single kinsman beside his deathbed; his grave was dug in a city far from his native land, and now his bones must be turned out of his grave in order that the city may get stone for its harbor works.

The movement that has been started urging that the body of James Smith-

SMITHSON'S TOMB AT GENOA, ITALY.

son be brought to the United States deserves and ought to gain success. If the people to whom he was so generous knew or realized that his bones were about to be disturbed they would insist upon honoring the memory of their great benefactor by bringing *them to this country and giving them a* permanent resting place in the grounds of the institution which he founded.

The United States Government ought to assign a war ship to carry his body in state across the Atlantic. It would be base ingratitude on America's part to let him be buried again in Genoa in another cemetery where, as time goes on and the city grows, he will be again disturbed.

Judging by the Job.

A man was taken on as a laborer in one of the large shipbuilding yards on the Clyde. The first job he had to do was to carry some rather heavy planks. He had been about an hour carrying them when he went up to the foreman and said:

"Did ah tell you ma name whin ah started?"

"Aye," said the foreman. "You said it was Tamson."

"Oh, that's a' right," replied the man, looking over at the pile of planks he had yet to carry. "Ah wis wunnerin' if you thocht ah said it wis Samson."—Tit-Bits.

First Vessel on the Great Lakes.

In 1679 the Griffon, the first vessel to navigate the great lakes, was built by La Salle on the shore of Lake Erie, near the present city of Buffalo. She was of about fifty tons burden, and carried thirty-four men and five guns. She sailed safely to Mackinac and thence to Green Bay. During her return voyage with a cargo of furs in 1680 she was wrecked, probably in Lake Huron.

Striking an average of the whole Orange River colony, land values have doubled since the war.

The first Union flag was unfurled on January 1, 1776, over the camp at Cambridge.

—The Sketch.

CRIME IN MACEDONIA.

No woman's honor can be safe in Macedonia, or else all Europe is in a conspiracy to malign the Turk. Torture in specially hideous forms is daily inflicted upon mothers and maids whose names and wrongs, vouched for by witnesses, have been widely printed. The men are overpowered by numbers, burned or impaled or mutilated.

Commenting editorially upon all these things, The Daily News (London) says:

"The Turk in Macedonia works in the minor key. He pillages, robs, violates and perpetrates the brutish tortures which he, alone among European peoples, has handed down from the Middle Ages, and from remoter days of barbarism. His officials and soldiery are not paid, and so they quarter themselves on the population. Reinforcing the acts of the Turks are Albanian troops and brigands, who are to the Macedonians what the Kurds are to the Armenians. Albanian lawlessness has developed of late years; and, indeed, Albania is at once the victim and the avenger on the Christian races of the laveterate misrule of the predominant partner in this ill-assorted empire. The reports before us show that neither life, nor women's honor, nor private property is respected in Macedonia, and that the nominal toleration accorded to Christians disappears when the military are given their head. This is the situation."

A most gloomy view of the situation is taken by the Reichswehr (Vienna), which predicts the failure of the reform measures undertaken by Austria and Russia. This view is shared by other observers, who insist that the Powers are concerned not so much about reforming Macedonia as about the political consequences of that undertaking. The Powers are mutually suspicious. Thus the Sviet (Odessa) says Italy is preparing to make a descent upon Tripoli the moment a conflict breaks out between the Balkan Slav States and Turkey. The Popolo Romano says Italy has nothing in particular to do with the Macedonian question:

"As long as the Powers concerned with Macedonia remain within the limits prescribed by the Berlin treaty, public opinion in Italy has not the slightest reason for anxiety. Even a repetition of the Bulgarian atrocities and a revolutionary movement in Macedonia need involve no risk to Italy's foreign policy. This is due to the oft-mentioned agreement between Austria-Hungary and Italy with reference to Albania—that is, the portion of the Balkan peninsula with which Italy's commercial and political relations are principally concerned."

Macedonia will succeed in throwing off the Turkish yoke, according to a well-informed but anonymous writer in the Neue Freie Presse (Vienna).

Unique and Wonderful Garment.

A genuine fish dress for women is shown in the accompanying illustration. These unique and wonderful garments are worn by wealthy ladies

FISH SKIN DRESS FROM SIBERIA.

of the Amur River region in far-off Siberia. They can now be seen at the American Museum of Natural History and are probably the only ones in America.—New York Commercial Advertiser.

"BRIGANDS" OF THE BALKANS.

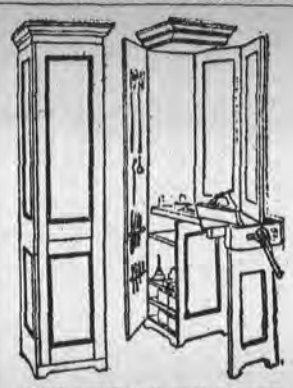
COLONEL YANKOFF.
Noted as a leader of "irregular" revolutionary bands in Macedonia.

BORIS SARAFOFF.
Pronounced "the most notorious" of Macedonian leaders.

FOLDING WORK BENCH

An Unsightly Piece of Furniture Tucked Away in a Closet.

An *exceedingly clever arrangement* has been recently devised by which a man who wants a work bench in the house can have his wish supplied without *the necessity of being constantly* confronted with what is necessarily a somewhat homely piece of furniture. In these days of general manual training nearly every man and many women have a good knowledge of the use of tools, and it is not an uncommon thing to find an excellent and complete set of tools in the possession of gentlemen who get more or less pleasure in performing various minor matters around the house in the way of construction and repair. It is not every man who has the space at his disposal to give up to a work bench, and this is quite as essential as the tools, and in response to the demand of gentleman carpenters various devices have been worked out for their convenience. Attractive wall cabinets to hold the tools conveniently have been in the market *for some little time, but the latest* thing in this line is a combination cabinet and work bench, which is shown in the accompanying cuts. This consists of a cabinet which has all the appearance of a wardrobe or closet when closed. Two of the sides are doors, and when one is opened all the tools in more general demand are conveniently displayed thereon. When the second door is opened it permits the



WORK BENCH AND TOOL CABINET.

bench to be dropped into position for use, the whole making a very compact *and convenient arrangement.* The bench is made of hard wood, is three feet long and has a strong parallel-jawed vise. It is provided with a bench stop and has a series of holes for similar stops running the entire length. This enables work to be held securely at both ends. There is a sliding guide on each side of the bench which supports work when necessary.

A Poisoner's Warning.

The following letter has been received at this office: "I note your frequent references to the sin of poisoning dogs. In our neighborhood there is a little dog that barks all night in a peculiarly irritating way. Several sick people have been greatly annoyed by the animal. I intend to poison this dog. I hope I am a fairly good citizen, but the dog annoys me, and I cannot sleep. The owners of the animal do not seem to care how much the neighbors are annoyed, and we are compelled to get rid of him."—Atchison Globe.

A Sap-Sucking Squirrel.

A correspondent of Forest and Stream tells a story of a four-legged sapsucker. He says: While driving from Freedom to Liberty, Me., I observed a red squirrel acting rather strangely. He was clinging to a small sugar maple tree beside the road some distance ahead. Stopping my horse to watch him, I soon learned that he had a 'sweet tooth' and was tapping trees for the sap. He had gnawed through the bark and clinging to a limb, was sucking the sap as it started to run freely from the gash he had *made. So eager was he not to lose a* drop that as I drove past, near enough that I might have hit him with my whip, though he eyed me cautiously, he clung to his post. It is well known that certain birds suck sap, but such action in a squirrel is apparently new.

Pins were first manufactured in this country soon after the War of 1812.

A SERMON FOR SUNDAY

AN ELOQUENT AND CONVINCING DISCOURSE ENTITLED "IMMORTALITY."

The Rev. St. Clair Hester Delivers a Comforting Message to Those Who Are Wavering in the Belief in Regard to a Life Everlasting.

New York City.—In the Church of the Messiah, Brooklyn, Sunday morning, the rector, the Rev. St. Clair Hester, preached on "Immortality—The Longing for It, Proposed Substitutes, Man's Right to It." The text was from Job xiv: 14: "If a man die shall he live again?" Mr. Hester said:

The irrepressible, ubiquitous question, repeated again and again, world without end. Men like Job were asking it centuries before Christ, and men like Job are asking it centuries after Christ. It is invested with perpetual youth and the world never tires of hearing answers to it.

A father afflicted by the loss of his only son in the morning of a beautiful youth writes a book entitled "Life Beyond Death." His dedication is a letter to his boy, beginning, "My Dear Phil," and closing with these words: "God bless you, my boy, till the eyes which I closed I see open again and looking into mine. Lovingly, father." This is the answer of one in grief. Under similar circumstances could you, would you, want to give any different answer? A wife bewails the sudden decease of her husband. She finds great comfort in reading through his sermons and gathering from them and publishing every sentence that bears on the subject of meeting again in the world to come. Her heart is constantly singing:

"Soul of my soul, we shall meet again,
And with God be the rest."

Here is the answer of one in loneliness buoyed up by confident anticipation. Who in such a position could or would want to give any different answer?

The thoughts of men on the subject repeated, reiterated, reaffirmed through thousands of years of human history, form an accumulation of evidence from which it is difficult to escape, evidence that gains emphasis by its repetition, evidence that arouses deepest feeling by the very earnestness of its utterance. The answer of Jesus Christ is the only answer that entirely satisfies the human mind and heart. It was proclaimed amid rejoicing, melody and song on Sunday last in all the churches.

The echoes of Easter have not yet died out. Their soul has gone into all the world and *their words unto the ends of the earth.* The echoes that come from the rock-hewn tomb within the Garden of Joseph of Arimathea are not like those we shout among cliffs and canyon walls that gradually soften *and die away. They are within the* realm of the spiritual world and they increase rather than diminish. They grow from soul to soul, from the soul of the risen Christ to the souls that believe in Him, and so they grow forever and forever.

If Christ alone of all who live or have lived upon the earth is to live again after death, the resurrection of the first Easter day is nothing more than an amazing exhibition of Almighty power which while it impresses us it correspondingly depresses us because it emphasizes the difference between us and Him and makes us despair of ever attaining unto such exaltation. If this be your feeling His rising was to no purpose, our preaching is vain, Christianity is a cruel system of deception and we are of all men most miserable. But the truth is His rising was a promise and pledge to us of ours. He was the first fruit of them that sleep.

First of all let me ask is it a fact that men desire to live again? Emerson tells the story of two members of the U. S. Senate who were fond of discussing speculative questions. Whenever possible they would never find salvation in conversing on subjects other than shop. The favorite topic was the immortality of the soul, but they could never find any satisfactory reason for believing it. They separated and one retired to a distant State. After twenty-five years they met at a crowded reception in the White House. They shook hands cordially, and standing to one side for a moment one of them asked, "Any light, Albert?" "None," was the reply. After a pause the other asked, "Any light, Lewis?" The answer again was "None." They shook hands again, looked one another in the eye in silence and parted, never to see each other again. Emerson's remark upon the incident is that the impulse that prompted these men to try to find proofs of immortality was itself the strongest of all proof. In my opinion Emerson was right.

Yes, men do desire to live again. They are not afraid to die, to have the body destroyed, many of them, but they shudder at the idea of annihilation, of becoming nothing more than a breath of air or a pinch of dust. Even the barbarian and the savage believe in a future life, that somehow the thinking soul may escape the wreck of the unthinking body. In all probability it is an idea that grew out of the phenomena of dreams. While man sleeps his other self wanders away at will, and something like this may happen, he reasoned, when death, the long sleep, comes to him. In after and higher stages of culture the conception of immortality was at first a sad and depressing one. The Sheol of the Jews, the Hades of the Greeks, the Orcus of the Roman, were abodes of shades, shadows, ghosts—and such a future could only be regarded with fear and dislike. But *in time man* began to surmise that perhaps the next life might be an improvement upon this one. The analogies in nature around him gave a strong suggestion to this effect. The snake casts its skin and *glides forth in a new and better one.* The beetle breaks away from its filthy sepulcher and enters on a new career, and man notices it and begins to hang golden scarabaei in his temples as symbols of his hope. *Winter retires and there comes a resurrec*tion of flower, foliage and fruits. He sees the silkworm weave its cocoon and die within it, and after a time come forth clad in brighter colors and able to spurn the earth on which it formerly crawled and fly away and then he begins to carve butterflies on tombstones and ventures to hope that he may likewise be freed from the entanglements and defilements of earth and flesh and range in a freer and happier state the universe at will. All such similitudes, and there are hundreds of them in nature, help to strengthen man's conviction that he will live again, make more roseate the hope that he will survive the wreck of the universe.

If a man die, shall he live again? The answer of Christianity is, "I believe in the resurrection of the body and the life everlasting." But this answer is not unanimous. Modern skepticism and speculative philosophy have proposed certain substitutes for the faith once delivered. Even though the comforting doctrine of Christianity be rejected men recoil from the specter of eternal oblivion. They invent new theories and call them by the old sweet name of immortality, which means continuation without break of the individual life. One substitute proposed is absorption into God, loss of consciousness of difference between self and another and between self and God—a melting of human being into Divine Being, just as sugar melts and is lost in the coffee it sweetens, just as the river flowing to the sea is swallowed up in the great deep.

Now the loss of individuality, personal identity, selfhood, would be a loss of consciousness and a loss of consciousness would be the loss of everything of importance. If I do not know that I exist this is practical annihilation, and this does not at all meet or satisfy the longing of my nature. This is a theistic substitute. Now let me mention some atheistic substitutes, substitutes that leave out God altogether.

One of these proposes the idea of absorption into the universe. The particles of matter of which we are composed will mingle with earth and air and sea and sky, and live eternally amid their ever varying changes and combinations. All this sounds well, but think of what it means. Life is always dying out, and death alone persists and conquers, according to this interpretation. Materialism attempt to dazzle us with an infinite panorama of whirling suns, evolving planets and astronomical wonders, but without the self-conscious soul life is nothing, a series of sepulchers, earth, ashes, dust. There is nothing in prospect to comfort the sorrowing heart.

Still another substitute is absorption into the race. *Immortality of fame.* The great man, it is said, will survive in the memory of his fellows. Beautiful books, useful inventions and instructive examples—these will insure the plaudits of posterity. *Napoleon is said to have remarked:* "My soul will pass into history and the deathless memories of mankind, and thus in glory I shall be immortal." The objection to this theory is that it makes immortality *the privilege of the few.* The Alexanders, the Cæsars, the Augustuses, the Washingtons, the geniuses, are all happily provided for, but what of the many who have written no beautiful books, who have performed no heroic deeds, who have left no inspiring examples? Are they to be blotted out, punished for not having what was never given them, for not having what they could not possibly get? Is immortality thus a reward only for the distinguished, the gifted few? No, it is a false theory. It is pathetic and surprising that men of parts should have stooped to console and flatter themselves in this fashion. Fame alone, be it as great as that of Pericles or Luther, is not by itself a sufficient and satisfying return for the labor its winning entails, it certainly is not pay enough for man's extinction. Fame is something left behind anyway, and those of us who have no fame are like the drop of water that dries up after it has fallen. This substitute is puerile, wanting in dignity.

The desire for immortality is too apparent to be open to dispute. The savage and the civilized, the illiterate peasant and the profoundest thinker alike want it to be so. Even when some have lost hope they desire it fondly as ever. Even when a man has lost all hope of living again he cannot rid himself of desire for it. That is ineradicable. Now here is the sound and legitimate conclusion. A desire so universal and persistent is the planting of the creative power responsible for our existence. It is a manifest prophecy of what shall be. The existence of an organ implies the existence of a field for its operation—this is an axiom of science. There would be no fins if there were no water to swim in, no wings if there were no air to fly in, no feet if there were no earth to walk on. Now here is another sound and legitimate conclusion—what God promises He performs. His character is perfect. To hold any other idea of Him would be blasphemous or presumptuous. To implant this desire and provide no means for its gratification would be a cruel deception. To make this promise and not carry it out would be a breach of trust as base as the squandering on selfish pleasure of the property the widow or the orphan confides to an attorney's management. God has not dealt so in any other case. He is the rewarder of those who put their trust in Him.

If a man die, shall he live again? As a Christian I answer yes. Do you ask why? *Because he has a right to do so. Because* God is just. Righteous art Thou in all Thy way, the psalmist sings. Some incline to the view that as regards God's dealings with man, the latter can have no right, *that man is in the position of a beggar,* glad to receive anything, but without any legitimate claim. He must call upon God, not because of any virtue in His character, but because He is all powerful. He made us, we are His creatures; therefore, He may act toward us and do with us as He pleases. We are duty bound to obey Him, to be kindly disposed toward Him, but He is under no sort of obligation to deal generously or justly toward us. All such theories and interpretations are misrepresentations of the divine character, actual goodness. God is a [illegible] at liberty to neglect a child simply because [illegible]. Indeed, this very fact is the strongest sort of reason that he will do just the reverse. We all recognize and respect the obligations of parent blood. To care for the child's body, to train its mind, to instill moral principle into its nature is incumbent upon every parent. Some deny themselves the high privilege for fear of an inheritance of weakness or disease, and thereby making the life of a loved one miserable. It is the veriest sophistry, it is cruel misrepresentation, to my mind it is unthinkable, that imperfect man is of kindlier nature toward his child than the perfect God toward His, that the finite is under compulsion to do right, but the Infinite is not. On the contrary, every rise in the scale of being demands a corresponding rise in the scale of obligation. The wiser, the greater, the better off the parent, the happier his child is expected to be. The greater his ability to do, the more he ought to do. This is the lesson of the parable of the talents. To one five, to another two, to another one, to every man according to his several abilities. In proportion to the gift so ought the return to be. He who has little of him little is demanded. He who has much of him much is required. This is an immutable law of universal application.

We are not mere objects—stones, sticks, shells—but animate, intelligent beings, into *whom God breathes* and builds something that identifies us with Him and His nature. The difference between God and man is more in degree than in kind. The two are of the same spiritual essence. There are *faculties the two have in common:* Reason, conscience, will, are specifications in point. Man is endowed with them and the constitution and course of nature reveal their existence in the workings of God. By resemblance of *attribute and identity of life we* are proven God's children. And will God kill His own children? kill us before we have fully realized what the life He has given is? We long for happiness and yet we get comparatively little of it here. We cherish an ideal of perfection and yet we never attain it on earth. We are but beginning to understand what a grand and noble thing life may be when we have to lie down and die. We are just on the point of reaching the rewards for which we have waited and toiled when the end comes, and if we are ever to enjoy them it must be in another world. Now is God in all this and all the while deceiving us? When we desire the bread of everlasting life will He give us the stone of everlasting death? After we have prayed to Him, trusted in Him, lifted up our hearts to Him, tried His works to do, loved Him and longed to be with Him during our residence on earth will He welcome us when at last we come to Him with annihilation? If so He is not good. If so He is not God. If so there is no God. If so on the throne of the universe is seated not a loving father but a jeering fiend taunting us for our helplessness and delighting in our misery. Righteousness, eternal righteousness is against any such supposition. It is not possible that the devil is supreme. It is not possible that man is more kind, more humane and considerate and sympathetic than the God who made him. It is not possible that He who made conscience has no conscience. If anything stands the test of reason this does—that He who implanted the sense of justice within us must Himself be just. Amid all the darkness the sorrows, the riddles of existence, let us not despond or despair, let us look confidently for the greatest gift, the gift God owes it to Himself to bestow—eternal life.

"In all the maddening maze of things
And tossed by storm and flood,
To one fixed state my spirit clings—
I know that God is good."

Therefore, He will never leave or forsake us, either in this life or the world to come. Let us hold fast to this truth—God is good—and when the end cometh all will be well with the soul.

When stress is applied internally to eggs they give way at a pressure of thirty-two to sixty-five pounds per square inch.

North Plainfield Weekly Review

ISSUED EVERY SATURDAY BY
HARRY H. WEBB
AT NORTH PLAINFIELD, N. J.
33 Somerset St. Telephone 217

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, MAY 2, 1903.

THE SEWER MEETING.

The meeting at Sangerbund Hall Wednesday evening demonstrated the fact that North Plainfield is awake to the importance of having a sewerage system. It also proved that the people are not willing to accept any or every "system" that comes along, but on the contrary, they want the best one available.

The meeting also demonstrated that while you may lead a horse to water, no human power can make that horse drink if he doesn't want to. Applying this homely illustration to the people of the borough, they are led to the conclusion that if the Plainfield sewer is the unqualified success its ardent supporters at the meeting would have the people of North Plainfield believe that it is, they are willing Plainfield shall continue to pay for and eventually own such a system, but they are not ready, just yet, anyway, to be forced into a co-partnership or adopt a similar system. Our people are willing to be led up to an [illegible] system, provided the officers, Can to come into close cch Inf Will it; but it is too much to a.. them to drink of its effluent which, according to one enthusiasti individual, flows into Greenbroo. so clear and sparkling and so free from all bacteria, that there are really fewer such animals in the water of the brook below the sewer than above!

Yes; the people of North Plainfield, want a sewer, but they are not in such a great rush for it as a certain element at the meeting tried to convince them, but afterward altered its plans somewhat when it saw the drift of public opinion.

AS IT APPEARS TO OTHERS.

The following editorial which appeared in the Newark Evening *News* last Wednesday, contains some good points which should commend it to the consideration of all fair-minded men.

The *News* loses sight of the chief argument in this question, however, namely: That the people of North Plainfield will never consent to leave Somerset county; but no such sentiment exists in Plainfield for Union county, therefore the proper and logical thing is for Plainfield to come into Somerset county. This would reconcile all differences, benefit Somerset county, and, in view of the petty jealousy and strife existing between the politicians of Plainfield and the county seat (Elizabeth), actually be a benefit to Union county by removing the cause of its chief trouble.

The article is as follows:

"Although the people of Plainfield and North Plainfield who favor the consolidation of the two municipalities are still discussing the proposition, there is growing evidence that they are becoming more and more discouraged as to the success of the movement. While they loudly assert that the repeal of the act authorizing the people of North Plainfield to vote on the proposition of annexation to Union county is invalid, there appears to be little likelihood that they will test the matter in the courts. If they do not take this step, the only course left open to them in the direction of uniting the two municipalities is to proceed under the consolidation act. This latter law gives the citizens of Plainfield and North Plainfield the right to vote on the question of joining fortunes, even though the two places remain in different counties.

"Though the *News* believes that the 'Greater Plainfield' is sure to materialize, it is to be doubted whether it would be advisable to consolidate the city and borough while the former is in Union county and the latter remains in Somerset. The wiping out of municipal lines, while allowing county boundaries to exist as at present, would be certain to cause much confusion and conflict of authority. If these places are to be joined together, they should be united under the most favorable circumstances, and that means that they should be in the same county. Had it not been for the trickery and underhand work that was done in the Lesislature when the original 'Greater Plainfield' bills were passed, it is more than probable that there would not have been an adverse vote on the question of annexation to Union county when it was submitted to the voters of North Plainfield last September. The time is coming, and it should not be so far distant, when it will be possible to secure the passage of a similar annexation act by straightforward means, and when that time arrives the people of the city and borough will doubtless be found ready to take advantage of the legislation."

STATE CONVENTIONS.

One of the results of the new primary law will be an increase in the number of delegates to the conventions that nominate candidates for Governor. The increase will be most perceptible in the Republican convention where the number of delegates will be 1,185 instead of 825 in 1901. The increase will not be so great in the Democratic convention as the convention of 1904 will have 1,157, while that of 1901 had 1,099.

The new law gives a delegate to each election district and as there are 1,114 such districts in the state there will have to be at least that many delegates. Some districts are entitled to more than one delegate, so that large conventions are assured for the future.

The following table will show how the Republican delegates will be distributed in 1904, according to the vote for the Governor in 1901:

	Rep. vote for Gov. 1901.	Delegates 1901.	Delegates 1904.
[illegible]mored [illegible]			
[illegible]antic	6,051	21	38

One-Client Lawyers.

The poverty of briefless barristers is as proverbial as that of the church mouse. It would not be an unnatural mistake to consider a barrister with only one client hardly better off than one with none. But the modern "one-client lawyer" is usually a prosperous individual. Said a man well known in the business world some years ago to a friend: "I want a young lawyer to put down at a desk beside mine. I'll familiarize him with my affairs, and then I want him to keep me out of trouble." The counterpart of this lawyer, whose duty it is to act as his own client's ounce of prevention, may be found in the office of many large concerns. He is often connected with trust companies, banks, banking houses, railroad and other transportation companies and large wholesale mercantile houses. When a merchant found himself in a tangle, it was once the custom for him to go to his lawyer for advice. The results were a written "opinion" and a fee. The business man to-day has a lawyer who shall work for him alone. Again, the field of the general practitioner is narrowed.—World's Work.

The Irish Captain.

"Which was the cleverest thief you ever caught?" asked the curious one?

"The one that was so clever I couldn't catch him," answered the Irish captain.—Chicago Post.

A Bacteria Find.

Dr. Ehrlich, an eminent German scientist, recently found 24,000,000 bacteria on the skins of a pound of cherries, and 16,000,000 on the skins of the same quantity of grapes.—Science.

As It Sounds.

Mrs. Newrich—Marie's trip abroad has given her quite a smattering of French.

Mr. Newrich (disgustedly)—Quite a sputtering, I should call it.—Judge.

Rats Fed by Municipality.

According to the Allahabad Pioneer the municipal committee appointed to take precautions against the spread of the plague has initiated comprehensive plans to exterminate rats as the propagators of the disease. The committee was at once brought face to face with the difficulty arising from the scruples of the natives, whose religious tenets forbid the taking of life. Consequently the committee is compelled to offer a reward for live rats, which will be maintained comfortably at public expense until the plague is suppressed, when presumably the rodents will be released. The municipality has authorized the expenditure of 42 rupees a month for the board of the rats while the scheme is being tried.

His "Character."

There was an opening for a butler in the family where Bridget was cook, and she promptly applied for the position in behalf of her brother.

"I take it that his reputation morally is all that could be expected," suggested madame.

"'Xuse me, but would you min' saying that question over ag'in?" asked Bridget.

"I say," repeated madame, "doubtless he is a man of moral character."

"Sure, mum, sure—but I don't know if I'm afther un'erstandin' you."

Madame waxed slightly impatient. "Oh, he is a good man, Bridget?"

"Good, is it? Sure he could lick th' eyes out of any spalpeen from Cork to Kilkenny!" was the enthusiastic reply.—N. Y. Times.

Diamond in a Meteorite.

The finest diamond ever imported paid no duty to the customs officers, having smuggled itself in from some other planet in a meteorite. Packed in a thick envelope of meteoric iron, it fell to earth in Diable canyon, at the foot of Crater mountain, Arizona, its coating being broken in numerous particles by contact with the rocky formation of the ground. A party of geologists discovering these fragments, at first thought them indications of a remarkably pure vein of iron ore, but their true character was soon discerned, and in one of the pieces picked up by Prof. G. A. Koenig, the diamond was found imbedded. It is now on exhibition at the American Museum of Natural History.—Washington Star.

"Hurry Up" Lacking.

Almost the first words which Italians learn in coming to this country are "Hurry up!" and this also expresses the first idea which they glean from their new environment. A young Italian who has been in this country just six months found, when he welcomed a younger brother at the end of that time, that there was already a slight difference in their point of view. In deprecating his brother's shortcomings as a friend he remarked:

"I see my brother ecss too much Italian; I see he ecss not 'nuff hurry up."—N. Y. Times.

Sleepy Railway Travelers.

To sleep at any moment is undoubtedly a sign of physical soundness and Philistine sanity, especially in the matter of the brain and its functions. A physician would have little anxiety about the general condition of a patient who could sleep at will on a railway journey. In these days of hurry and bustle there could be no more encouraging sight to the philosopher than a railway carriage at nonday full of sleepy passengers.—Medical Press and Circular.

Such Is Life.

Hamlet—What has become of De Ranter?

Eggbert—The old fellow was sent to the county infirmary last week.

"That's tough. But he will doubtless feel at home there."

"Because why?"

"He has been accustomed to poor houses ever since he began his stage career."—Chicago Daily News.

Conclusive Evidence.

"They weren't playing golf," said the wise caddy; "they were making love."

"They did stay at the other end of the links a pretty long time."

"Oh, it ain't that."

"What is it, then?"

"They wouldn't take a caddy along, an' they never lost a ball."—Chicago Post.

Perpetual Motion.

"Well," said the president of the South American republic, "has the revolution been suppressed?"

"Yesterday's has," replied the secretary of war, "but the nine o'clock revolution of this morning is still on. We've captured one of the revolutionists, but the other is still at large."—Philadelphia Press.

A Lot to Select From.

Carr—Motorleigh is going to offer a prize of $100 for the most appropriate name for his new automobile.

Whyrr—Humph! He can save his money by simply letting the machine bump into a cab driven by any old cabman.—Brooklyn Life.

Queen Alexandra's Pianos.

At the time of her marriage, 40 years ago, Queen Alexandra received 19 pianos as wedding presents. Every one of these elaborate instruments is still in perfect condition. — London Mail.

Elongated Sweetness.

Ethel—A 16-page letter from George! Why, what on earth does he say?

Mabel—He says he loves me.—Pittsburg Dispatch.

Old Cathedral Windows.

The Cathedral of Chartres, in France, is said to contain the most beautiful and the best-preserved twelfth-century windows in the world. They date from about 1145.—N. Y. Sun.

Spring-time in Washington.

Washington is a typical Spring resort and its bustle is purely social and political. There are gathered in the Capital representatives of every nation and country, and their comings and goings are of no little interest. Then the doings of the Senate and House are features which every tourist delights in following, and these features together with the visits to the numerous public buildings keep one busy all the while one is in Washington. The Royal Blue Line of which the New Jersey is the initial road is going to operate an excursion to Washington on May 7th, and cost of tickets for the 3 days' excursion including all expenses is $12. Train leaves New York at 1 p. m., and arrives Washington at 6.10 p. m. If you want to know about the trip drop a postal to C. M. Burt, General Passenger Agent, New York City, for tour book. Free for the asking.

If You Want

If you want posters,
If you want bill heads,
If you want envelopes,
If you want statements,
If you want note heads,
If you want show cards,
If you want letter heads,
If you want calling cards,
If you want business cards,
If you want invitation cards,
If you want business circulars,

If you want job printing of any description done in a satisfactory manner, you can have your wants gratified by calling on THE REVIEW, 39 Somerset st. North Plainfield, and leaving your orders or if preferable, use the telephone and our representative will call on you.

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the REVIEW free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled, write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed but it is necessary to have them properly vouched for.

LEGAL NOTICES

NOTICE.

The final meeting of the Board of Chosen Freeholders will be held at the Court House ON TUESDAY, MAY 12, 1903, to settle up the business of the current year. It is requested that all claims be presented to the Clerk on or before May 8.

A. P. SUTPHEN, Clerk.

In accordance with the statutes of New Jersey, the members of the Board of Chosen Freeholder of the County of Somerset will meet ON WEDNESDAY, MAY 13, 1903, in the Court House, in Somerville, at 11 o'clock a. m., for the purpose of organization and such other business as may be presented.

April 6, 1903. A. P. SUTPHEN, Clerk.

NOTICE OF ORDER TO LIMIT CREDITORS

Somerset County Surrogate's Court.

ESTATE OF C. A. Girard Lewis, deceased.

Notice is hereby given, that on the FIFTH DAY OF FEBRUARY, A. D. 1903, on the application of the undersigned, as Executors of the will of C. A. Girard Lewis, deceased; an order was made by the Surrogate's Court, requiring the creditors of the said C. A. Girard Lewis, deceased, to bring in their debts, demands and claims against the said decedent, under oath or affirmation, and present the same to the subscriber within NINE months from the date of said order; and in default thereof any such creditor should be forever barred of his or her action therefor against the subscriber.

EASTERN WAR CLOUD

Why It Arises Over the Perplexing Macedonian Question.

A Complication of Difficulties That Keeps Western Europe Constantly at the Boiling Point—Russian and Austrian Interests.

In this country and in western Europe people are sometimes puzzled to understand why it is that the Macedonian question occupies so large a place among the anxieties of the statesmen of the great powers, and why it should be generally assumed to involve the most serious dangers to European peace.

On the surface no political question could be simpler or more exclusively local. Macedonia, like Greece, Roumania, Bulgaria, Servia, eastern Rou-

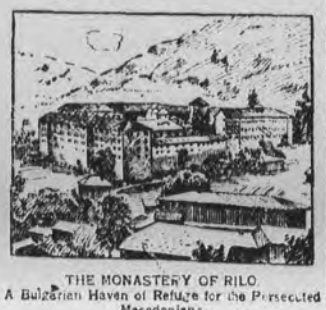
MAP OF WESTERN EUROPE.
Showing Macedonia and the Neighboring Countries.

melia, and Crete, is a Christian province of Turkey, suffering, as they once suffered, from intolerable maladministration and oppression. The treaty of Berlin stipulated for certain reforms in the local government similar to those which were demanded for Crete. They have never been carried out. The obvious conclusion is that the dissatisfaction and turbulence of the Macedonians are due to the nonfulfilment of the treaty, and that the proper remedy is either to insist on the reforms being fully and honestly applied, or, if it be too late to invoke the panacea, to expel the Turks altogether, and give the province some such autonomy as has fallen to the emancipated Christian dependencies of the sublime porte.

Where in all this is a menace to European peace?

The question is a tangle of many questions, involving the ambitions of two great powers and three minor states. In the first place there is no such thing as a Macedonian nation. Macedonia, like Austria, is a geographical expression, covering an ethnographic Babel. The population is a maddening mixture of Greeks, Bulgarians, Serbs and Roumanians, and a variety of minor races, who are still further split up by religious and sectarian differences. There is no national union among them, and although they are for the most part of the Slav race, they are incapable of uniting on that issue, and still less capable of rallying to one of the neighboring independent Slav states, seeing that some gravitate towards Bulgaria, others towards Servia, others again towards Montenegro, and a considerable section towards the growing Slav power in Austria. Each of these nations hates the other more bitterly than any of them hates the Turk. Hence an attempt to solve the grievances of the Macedonians on the basis of emancipation from Turkey is likely to result in a serious conflict between at least the Bulgarophils and the Serbophils, while it is exceedingly probable that Greece would find it necessary also to assert her rights.

The most serious dangers arise, however, from the conflicting interests of Russia and Austria. If once Mace-



THE MONASTERY OF RILO.
A Bulgarian Haven of Refuge for the Persecuted Macedonians.

donia were thrown into the melting-pot a struggle between Russia and Austria would be inevitable, and such a struggle would probably drag the allies of both powers into the fray. Russia as the head of the Slav world must insist either that Macedonia should be independent, or should form, with Bulgaria, Servia and Montenegro, a great Balkanic confederation. Austria, on the other hand, with her predominant Slav population, with her influence in Germany gone, with her outposts at Novi Bazar and her railways running to Salonica, could never permit the erection of such a barrier to her eastern expansion.

It is of vital interest to Austria that she should attach to herself the Slav population of Macedonia, for if once that province were to go the way of Bulgaria, the [illegible] would be practically master of the Balkans, and would inevitably attract [illegible] in time the Czechs of Bohemia, the Ruthenes of Transylvania, and, perhaps, even the Poles of Galicia. This would be the end of the Austrian empire.

Such are the main elements of the Macedonian question. It follows that if a European war is to be avoided the status quo must be maintained. This does not, of course, mean that the present maladministration should be allowed to continue. What, however, is essential is that the status of Macedonia as a Turkish province should not be radically changed.

DANIEL CLEVERTON.

Big Trees of Santa Cruz.

Santa Cruz, Cal., is rapidly becoming a show place. By accident more than foresight a grove of giant redwoods, in the canyon of the San Lorenzo, a little more than five miles from town, escaped the ax. Gradually it dawned upon the people that board measure was not the only standard by which the value of trees could be computed. Thus the lines of preservation were drawn about this grove, and each year the size, beauty and majesty of these monarchs becomes more impressive, and each year they attract a larger number of visitors. There are about 80 trees in this grove, ranging from 30 to 60 feet in circumference, and from 200 to 300 feet in height. Beside their enormous dimensions, the curiosities of their manner of growth and the charm of the grove itself combine to make this one of the most attractive spots in California.—Sunset Magazine.

Left at the Post.

"No, Mr. Slowun," said the fair possessor of the square chin, "I must respectfully decline to become your other half."

"B-but why?" asked the astonished young man who had figured from his form sheet that it was he under the wire in a canter.

"Because," replied the female extender of the frosty digit, "the man I marry must be brave and fearless. To-night you let out the information that you have loved me for five long, weary years but have not dared mention it until the present writing. A man who has no more nerve than that would hide under the bed while his wife went downstairs to interview a burglar who was making a raid on the family larder. Therefore, Mr. Slowun, I will work the piano for a little slow music while the curtain drops on the farewell scene. You will find your hat on the usual peg of the hall rack. Good evening."—Chicago Daily News.

Potato Planting.

The potato planter of to-day would make a farmer of a generation ago sit up and rub his eyes. It requires that the potatoes be supplied, but will do all the rest of its own initiative. It picks the potato up and looks it over—or seems to—cuts it into halves, quarters or any desired number of parts, separates the eyes and removes the seed ends. It plants whole potatoes or parts thereof, as desired, as near together or as far apart as the judgment of the farmer on the driving part suggests. Having dropped the seed it covers it, fertilizes it, tucks it in like a child put to bed and paces off the next row with mathematical accuracy.—Agricultural Journal.

Right Way to Bribe.

An amusing story is told among lawyers of a Walloon peasant who had gone to law with a neighbor. In a conversation with his lawyer he suggested sending the magistrate a fine couple of ducks.

"Not for your life," said his adviser. "If you do you'll lose the case."

The judgment was given in his favor, when he turned to his lawyer and said: "I sent the ducks." Astonishment on the latter's part turned to admiration when his client continued: "But I sent them in my neighbor's name."—London Express.

"Whisky on the Hoof."

Terence V. Powderly, formerly commissioner-general of immigration, has been confined to the house all winter by an old injury to his knee, which has recently given him much trouble. He was out recently for the first time in several months. He met Senator Penrose, of Pennsylvania, just outside the white house.

"How's your gout getting along?" a bystander asked Mr. Powderly.

"Oh, I suppose you might as well call it gout as anything," he replied. "Up my way," remarked Senator Penrose, "they call it 'whisky on the hoof.'"—N. Y. Sun.

Looked Hard to Him.

Cholly—I tell you, Sloman's a clevah fellah. Heard him tell a girl jawst night something about "Kind hearts are bettah than cwowns," or something or othah.

Algy—"Kind hearts are more than coronets." And did you consider that original with him? That's an old one.

"Ya-as; but think how clevah of him to keep it in his head!"—Catholic Standard and Times.

Great Expectations.

Her Former Mistress (admiringly)—He certainly is a bright baby, Norah. I expect he will make his mark some day.

Mrs. Muleaghy (fondly)—Sure, ma'm, an' we expect he'll be able to do more than make his mark—we want him to be able to write his name!—N. Y. Times.

Beyond a Doubt.

"Riches will not buy happiness," remarked the man with the quotation habit.

"Perhaps not," responded the chronic doubter, "but I know lots of guys who would be happy if they had money enough to make the experiment."—Cincinnati Enquirer.

Making a Noise.

"What do you mean by accepting a callow youth like Jack who's just out of college? Why, he'll never make a noise in the world!"

"Oh," said Mabel, "you just ought to hear him give his cute college yell and you wouldn't think so!"—Baltimore Herald.

Trick of Photography.

A German photographer, Kunwald, when taking a picture of a lady of doubtful age, places sheets of celluloid between the negative and the printing paper, thus producing a very softening effect, which hides the discrepancies of age.—Photography.

Severe

Nervous Trouble and Dyspepsia.

No Sleep for Weeks Because of Pain.

Dr. Miles' Nervine Gave Back My Health.

Dyspepsia nearly always arises from a derangement of the nerves. When the stomach is not well the entire system suffers. Constipation, bad breath, sour stomach, frequent headaches, biliousness, etc., will lead to terrible consequences if not treated in time. Dr. Miles' Nervine is a specific for nervous dyspepsia and all nervous diseases.

"My health was miserable for years, due to severe nervous trouble and dyspepsia. I had not been able to sleep for weeks at a time without being awakened with pains in my chest and stomach. My limbs felt tired, I was unable to do my house work without feeling completely worn out. The doctors failed to relieve me, and after taking an endless amount of their medicines I began taking Dr. Miles' Restorative Nervine and Nerve and Liver Pills. I obtained relief from the first bottle of Nervine, was able to sleep better than I had in years. My stomach began to gain strength and I felt better in many ways. I have taken twelve bottles of Nervine and Nerve and Liver Pills in the past three years but have not taken any of late as I have not felt the need of it. I go about my work an entirely different woman and have recommended them to ever so many people. I am a great believer in Dr. Miles' Nerve and Liver Pills, I have them on hand all the time. I feel very grateful for the Dr. Miles Remedies."—MRS. J. W. WHITMAN, Mechanic Falls, Me.

RHEAUME. Brauch Office 33 Somerset Street.

HARD TO BEAR.

When the back aches and pains so badly, can't work, can't rest, can't sleep, can't eat, it's hard to bear. Thousands of aching backs have been relieved and cured. People are learning that backache pains come from disordered kidneys, that Doan's Kidney Pills cure every kidney ill, cure bladder troubles, urinary derangements, dropsy, diabetes, Bright's disease. Read this testimony to the merit of the greatest of kidney specifics.

J. W. Walls, Superintendent of Streets of Lebanon, Ky., living on East Main street, in that city, says:

"With my nightly rest broken, owing to irregularities of the kidneys, suffering intensely from severe pains in the small of my back and through the kidneys, and annoyed by painful passages of abnormal secretions, life was anything but pleasant for me. No amount of doctoring relieved this condition, and for the reason that nothing seemed to give me even temporary relief I became about discouraged. One day I noticed in the newspapers the case of a man who was afflicted as I was and was cured by the use of Doan's Kidney Pills. His words of praise for this remedy were so sincere that on the strength of his statement I went to the Hugh Murrey Drug Co.'s store and got a box. I found that the medicine was exactly as powerful a kidney remedy as represented. I experienced quick and lasting relief. Doan's Kidney Pills will prove a blessing to all sufferers from kidney disorders who will give them a fair trial."

A FREE TRIAL of this great kidney medicine, which cured Mr. Walls, will be mailed to any part of the United States on application. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

The Medical Institute for Women in St. Petersburg recently gave diplomas, after a five years' course, to 111 students, ninety-three of whom passed their examinations "with distinction."

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free DR. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

A girl may make a date with a fellow and not care a fig for him.

Beware of Ointments For Catarrh That Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure to get the genuine. It is taken internally, and is made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists; price, 75c. per bottle.

Hall's Family Pills are the best.

Gold From Poor Rock.

About the nearest approach there is to manufacturing gold, says the Mining Investor, goes on night and day in the Black Hills. Occasionally bunches of very rich rock are found there, but ninety per cent. of the ore is of low grade, running from $2 to $10 per ton. This grade of rock, however, is there in such vast quantities that it can be handled economically. In the old days the ore treatment consisted in crushing the rock under the stamps and collecting the free gold on the plates. This, of course, did not make very clean saving, and as the workings became deeper the rock was more and more refractory. Then the cyanide method was tested, and found to be just what was wanted. It is estimated that millions upon millions of dollars' worth of gold have in the past been allowed to wash down the gulches practically, and that all of this could have been saved had the cyaniding system been in use. It is principally this which has given such an impetus to mining in the Black Hills in the last two or three years.

A census recently completed shows that there are 94,882 children of school age in Boston, and that 71,532 of them are pupils in the public schools and 15,601 in private schools.

Miss Agnes Miller, of Chicago, speaks to young women about dangers of the Menstrual Period — how to avoid pain and suffering and remove the cause by using Lydia E. Pinkham's Vegetable Compound.

"TO YOUNG WOMEN:—I suffered for six years with dysmenorrhea (painful periods), so much so that I dreaded every month, as I knew it meant three or four days of intense pain. The doctor said this was due to an inflamed condition of the uterine appendages caused by repeated and neglected colds.

"If young girls only realized how dangerous it is to take cold at this critical time, much suffering would be spared them. Thank God for **Lydia E. Pinkham's Vegetable Compound**, that was the only medicine which helped me any. Within three weeks after I started to take it, I noticed a marked improvement in my general health, and at the time of my next monthly period the pain had diminished considerably. I kept up the treatment, and was cured a month later. I am like another person since. I am in perfect health, my eyes are brighter, I have added 12 pounds to my weight, my color is good, and I feel light and happy."—MISS AGNES MILLER, 25 Potomac Ave., Chicago, Ill.

The monthly sickness reflects the condition of a woman's health. Anything unusual at that time should have prompt and proper attention. Fifty thousand letters from women prove that Lydia E. Pinkham's Vegetable Compound regulates menstruation and makes those periods painless.

READ WHAT MISS LINDBECK SAYS:

"DEAR MRS. PINKHAM:—**Lydia E. Pinkham's Vegetable Compound** has greatly benefitted me. I will tell you how I suffered. My trouble was painful menstruation. I felt as each month went by that I was getting worse. I had severe bearing-down pains in my back and abdomen.

"A friend advised me to try Mrs. Pinkham's medicine. I did so and am now free from all pain during my periods."—JESSIE C. LINDBECK, 1201 6th Street, Rockford, Ill.

FREE ADVICE TO WOMEN.

Remember, every woman is cordially invited to write to Mrs. Pinkham if there is anything about her symptoms she does not understand. Mrs. Pinkham's address is Lynn, Mass., her advice is free and cheerfully given to every ailing woman who asks for it. Her advice has restored to health more than one hundred thousand women. Why don't you try it, my sick sisters?

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness.

How to Succeed.

By Henry Frank.

DETERMINATION to succeed means merely that one's mind is set upon success. Now, can this habitual mental mode be acquired and cultivated? I think so. In the first place, to be surrounded by success is a great inspiration toward success. Therefore let him whose nature is timid and lackadaisical seek the company of people whose native energy is virile and persistent, whose outlook is always toward achievement and whose habit is to succeed.

Another suggestion: Mental habit is the product of the action of the so-called "unconscious mind." Says C. H. Lewes: "I am the product of all I have felt; not a thrill passes through the body but our sensorium is altered by it; the sum of such traces is the human life." If this proposition is true, then the object of life should be to get the unconscious mind working for success. How is this done?

By reading authors whose writings inspire the hope of success, by reading the lives of successful men and women, by living much with successful people. These are the first essential steps. But perhaps above all other essentials is that of cultivating the mental habit of thinking success for one's self. By day, by night, awake, asleep, let the one thought and yearning be to succeed. The unconscious mind will do the rest.

Teaching Man How to Live.

By the Editor of What to Eat.

WHERE is the billionaire philanthropist who is willing to accept a crown of immortality by endowing an agency for teaching men how to live?

Free public libraries, universities, colleges, schools and hospitals are being endowed all over the country. Millionaire philanthropists are engaged in a rivalry over the endowment of learning. Each is striving to build a monument in the shape of a munificent gift to education or art that will forever perpetuate the memory of the donor in the hearts of the people. One multi-millionaire is scattering libraries in the cities and towns of the Union, thereby enshrining his name in the grateful memories of a hundred or more communities.

But of what avail are all the well-laden shelves of the free libraries in teaching man the laws of life? Millions of volumes of literature have rolled from the presses in the last decade, and one might read every line of every page without understanding the mysteries of his own being or the laws of his own bodily nourishment and replenishment. Young men come out of the colleges and universities every year with their craniums packed with useless facts and dead languages. But who ever heard of one who had mastered the art of building his own body, scientifically and perfectly, from the materials bountifully provided by nature? Whoever heard of one graduating with the degree of doctor of dietetics or doctor of alimentation?

And yet what is of greater importance to the human being, which has in its custody and keeping the most wonderfully delicate and complicated mechanism in all creation—the human body, temple of an immortal soul—than the science which teaches how to live?

Success.

By George Horace Lorimer.

BOYS are constantly writing me for advice about how to succeed, and when I send them my receipt they say that I am dealing out commonplace generalities. Of course I am, but that's what the receipt calls for, and if a boy will take these commonplace generalities and knead them into his job, the mixture'll be cake.

Once a fellow's got the primary business virtues cemented into his character, he's safe to build on. But when a clerk crawls into the office in the morning like a sick setter pup, and leaps from the stool at night with the spring of a tiger, I'm a little afraid that if I sent him to take charge of a branch house he wouldn't always be around when customers were. He's the sort of a chap who would hold back the sun an hour every morning and have it gain two every afternoon if the Lord would give him the same discretionary powers that He gave Joshua. And I have noticed that he's the fellow who invariably takes a timekeeper as an insult. He's pretty numerous in business offices; in fact, if the glance of the human eye could affect a clockface in the same way that a man's country cousins affect their city welcome, I should have to buy a new timepiece for the office every morning.

Boys are a good deal like the pups that fellows sell on street corners—they don't always turn out as represented. You buy a likely setter pup and raise a spotted coach dog from it, and the promising son of an honest butcher is just as like as not to turn out a poet or a professor. I want to say in passing that I have no real prejudice against poets, but I believe that if you're going to be a Milton, there's nothing like being a mute, inglorious one, as some fellow who was a little sore on the poetry business once put it. Of course, a packer who understands something about the versatility of cottonseed oil need never turn down orders for lard because the run of hogs is light, and a father who understands human nature can turn out an imitation parson from a boy whom the Lord intended to go on the Board of Trade. But on general principles it's best to give your cottonseed oil a Latin name and to market it on its merits, and to let your boy follow his bent, even if it leads him into the wheat pit.—From "Letters from a Self-Made Merchant to His Son," by George Horace Lorimer. By permission of Small, Maynard & Co., Publishers, Boston, Mass.

The Law of Cause and Effect.

By Margaret Stowe.

OUTSIDE of my window two boys have quarrelled. One has knocked the other one down. The boy picks himself up and shouts after the retreating friend: "You wait. I'll get even with you. I'll pay you back for this!"

They are boys, apparently, of refined and educated parents, yet they evidently have not been taught, and probably have never heard of, the law of cause and effect.

One has only to read the progressive magazines and newspapers to see how education along this line is spreading, and how thousands of thinking beings are building up their lives and the characters of their children by the power of thought.

The true physician and parent of the future will not medicate the body with drugs so much as the mind with principles.

The coming mother will teach her child to assuage the fever of anger, hatred and malice with the great panacea of the world—Love.

The coming physician will teach the people to cultivate cheerfulness, good will and noble deeds for a health tonic, as well as a heart tonic; and that a merry heart doeth good like a medicine.

Let us go back to the boy holding thoughts of anger, revenge and malice. If he pays the other boy back in the same coin that he received at his hands what will happen?

He will get even with him by going down to his own level, and both will suffer by it.

But if this boy had been brought up by the law of cause and effect he would show himself the larger by sending his companion love for hatred, kindness for ill-treatment, pay him back by raising him to his level.

Sentimental rubbish? Yet turn an honest and impartial judge for a moment and tell me which way of dealing with the question is the better.

Teach your children that they can never help another without by that very act helping themselves.

If the boy is ready to treat the other as he treated him, then he shows clearly that there is in him that which attracts the hatred and ill-treatment to him; he deserves what he got and should not complain.

We know that love is a positive force and stronger than hatred. The latter can always be conquered by love.

Make children understand that by meeting hatred with hatred they degrade themselves, but by meeting it with love they elevate not only themselves, but also the one who bears them hatred.

I heard a mother the other day say to her children who were nagging and teasing each other in a very rude and annoying manner: "If you children hold the discordant thoughts that are in possession of your minds at present I shall not be surprised if you are both ill sooner or later.

"You understand the law of cause and effect and so know that an angry and discordant thought has a direct effect upon your bodies.

"By former experience you know, too, the poisoning effect that discord has upon the organism; therefore I advise you each to go into your own room and clear your thoughts, as you know so well how to do, and do not let me see you again until you are quite sure that harmony is restored."

Educating a child upon such lines, you will find that these little lessons become less frequent, because harmony is developing and increasing, while discord is quickly diminishing.—New York Journal.

SCIENCE & MECHANICS

The late surveys of the English coast show a loss of land of forty thousand acres since 1867, although in some places, as at New Romney, the solid ground has been pushed out two miles or more in the sea.

There are now ninety-seven rice mills in Burma alone, and fifty-eight saw mills. They are gradually being extended by the Burmese themselves throughout the province. They cheapen timber for building purposes, and rice, the staple food of the country, besides giving remunerative employment to a considerable number of hands.

An enterprising lignite colliery, at Bodarf, near Cologne, has laid down a central generating plant for supplying light and power in the district between Cologne and Bonn. It was found that the fuel was so poor that it would hardly pay for transport over considerable distances, but it has turned out a very valuable asset when put to the above purpose, and used at the pit mouth.

The magnitude of the electrical business and what is meant by the phrase "investment in copper," which occurs so frequently in electrical literature, is disclosed by the statistics of copper consumption in the electrical industries of this country. It is asserted on good authority that during the past year 170,000,000 pounds of the red metal were used for electrical apparatus, while the telephone interests require about 60,000,000 pounds additional.

The milky sea, as it is known to mariners, is not yet fully understood. It seems to be most common in the tropical waters of the Indian Ocean, and is described as weird, ghastly and awe-inspiring, and as giving the observer on shipboard the sensation of passing through a sort of luminous fog in which sea and sky seemed to join and all sense of distance is lost. The phenomenon is probably due to some form of phosphorescence.

A swinging radiator, suitable for steam or hot water, is a recent offering of an American manufacturer. One naturally questions the demand for such a design, but the actual marketing of the type in large numbers during the past seasons proves that the device has a niche of its own to fill. The distinguishing characteristic of the radiator is that it is hung upon a pivot, and can be swung back again to the wall when not in use, and out into the room when greater heat is desired. The entire weight of the radiator is sustained by the top wall bracket, the working connections at the bottom carrying practically no weight. The question of leakage of steam or water at the joint has been cared for in the union in a practical and successful manner. As these radiators, according to the maker, are in special demand for hospital work, they are made as plain as possible to reduce to a minimum lurking places for dust and its accompanying hosts of germs.

Good Hunting Without Exception.

A gentleman having an estate in the Highlands, as he was going abroad for some time, advertised the shootings to let, and told his gamekeeper, Donald, who was to show the ground, to give it a good character to any one who called to see it.

An Englishman came down, and inquiring of Donald as to how it was stocked with game, first asked if it had any deer. Donald's reply was:

"Thoosands of them."

"Any grouse?"

"Thoosands of them, too."

"Any partridges?"

"Thoosands of them, too."

"Any woodcock?"

"Thoosands of them, too."

The Englishman, thinking Donald was drawing the long bow, asked if there were any gorillas. Donald drew himself up.

"Weel, they are no' so plentifu': they jist come occasionally, noo and agin, like yourself."—Spare Moments.

Left in the Nest.

A lady who had moved into a remote district of the West found it almost impossible to keep her "help." One after another girls came on from their country home in the East, and were married before, as the deserted housewife said, they had time to wash the dinner dishes. Finally, she sent for a severe-looking maiden of advanced years who had no opinion of masculine blandishments. On the day of the maid's arrival a miner called at the kitchen door for a glass of water. He looked at her, drank the water, expressed his thanks briefly, and then went round to the front of the house, where the mistress herself was sweeping off the steps.

"Well," said he, lazily taking off his hat, "looks as if you'd got a nest egg now."—Youth's Companion.

Stoneware Furniture.

The German plan of finishing meat shops with tiles is a very satisfactory one, as cleanliness is thereby secured with added attractiveness. In many German butcher shops the floor, walls, ceilings, counters, scales and desks are all finished with glazed tile, somewhat similar to those used in the American bathroom. Stoneware furniture is a novelty in German shops that might be adopted with advantage in this country. This is especially applicable to meat shops, fish and other markets, kitchens, sculleries, etc.—Philadelphia Record.

Early Use of Electric Plow.

So long ago as 1879 a field at Sermaize, in France, was plowed by an electrically driven plow.

GOOD ROADS

Relation of Vehicles to Maintenance.

KEEP what you have, and get all you can" is an old saying of successful business men when asked as to how they succeeded in life, writes George E. Chadsey. The expression is peculiarly appropriate in connection with the subject in hand, and particularly applicable, as regards the first part of the quotation. When the first is carried out the last half follows as a natural consequence.

The effect of tires on a roadway is unmistakable in its results. The wide tire has long received the vote of approval as a preserver of roads, whereas the narrow tire is universally conceded to be destructive. Experiments conducted at the Missouri and South Carolina agricultural colleges have demonstrated conclusively the advantages of the wide tire over the narrow one, both in the beneficial effect on the road surface and the lighter draught.

As regards the lighter draught the tests made show that on macadam or dirt roads the broad tires, under the same conditions, carry a gain in lighter draught of from sixteen to thirty-five per cent. over the narrow tire. Where the roads are soft and muddy but have a hard foundation the narrow tire seems to offer less resistance than the wider one. It cuts through to the solid earth more easily and lifts less mud. But the season of soft roads is comparatively short during any year and the little temporary advantage passes out of consideration.

A bad road will never become good by the traffic of good vehicles passing over it, but a good road may become bad by indiscriminate use of improper wheels. Narrow tires grind and wear away surfaces instead of packing and cementing them. It has been demonstrated by Morin, the French engineer, that a tire 2.4 inches wide caused nearly double the wear of a 4.6 inch tire. Further tests showed that a 9.6 inch tire causes no more damage to a road than a seven inch tire and the general opinion is that above 4.5 inches there is no special advantage.

It may not be out of place at this point to mention the influence of wheels of different diameters on the roadway. According to experiments made at the Royal Agricultural Show, at Bedford, England, the resistance of wheels increases inversely as the diameter; that is, reduce the diameter of the wheel by one-half and the force required to move the load will have to be doubled. The cause of this difference is attributed to the sinking down of the wheel in the roadbed. This sinking of the wheel is what destroys a road and an additional foot in diameter of wheel might prove of greater benefit than an extra inch in width of tire. It will be perceived that a wheel of small diameter has to cut deeper in order to get a greater bearing surface. On a well constructed road the elasticity of the roadbed is equal to the down bearing and as the wheel passes over the surface it quickly springs back to place. On poorly built roads the wheels crush and displace the road materials, thereby threatening the endurance of the roadbed and increasing the cost of pulling a given load over it. In such a case, even if the road be perfectly level, the wheels are constantly going over an incline. To reduce this grade to the minimum should be the object of the engineer and can only be accomplished by making the roadbed so firm that its elasticity responds in measure to the pressure of the wheels.

It will therefore be seen that several influences may be brought to bear upon the maintenance of a system of roads. Proper construction of roads and careful selection of vehicles that pass over them are two of the most important factors in the good roads question. The engineer may be responsible for the first condition, but the latter comes within the jurisdiction of the municipal or governing authorities.—Good Roads Magazine.

A Governor's Expression.

No argument is necessary to prove that the prosperity and welfare of a people is vastly improved by a perfected system of highways. Good roads not only add value to every acre of land in their vicinity, but they also lessen isolation, so undesirable in rural life, by bringing people into closer social relations. The pecuniary benefits are also marked, for good roads lessen the expense of reaching the markets and railway stations with the products of the farm. Fully ninety per cent. of all our products primarily have to pass over our highways. The State of Minnesota should not be found lagging in this work. In my judgment much will be added to our growth and prosperity through a perfected system of good roads. In order to establish such a system, after the most careful consideration, I am satisfied that the Legislature should, under the authority given by the Constitutional amendment adopted in 1898, provide for a State highway commission and enact the necessary legislation to carry out the provisions of that amendment.—Governor Van Sant, of Minnesota.

Supervisors Convicted.

Two supervisors of Lower Waln[illegible], Pa., were recently convicted of maintaining a nuisance in the condition of the roads. The court sentenced them to pay a fine of $1 and the costs of prosecution, to abate the nuisance, and to stand committed until the same be complied with. Here is a hint for other towns whose roadmasters regard public office as a private snap.

Pride goeth before a fall, and afterward there isn't anything left of it.

North Plainfield Weekly Review.

VOL. 4—NO. 7. NORTH PLAINFIELD, N. J., SATURDAY, MAY 9, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

The Borough Board of Health will meet for business on Monday evening.

Miss Gladys Meade, of Somerset street, is detained at home with a severe illness.

Mrs. Elizabeth Shotwell, of Pearl street is detained at her home with a severe illness.

Miss Ashbrook, of Philadelphia is visiting her aunt, Mrs. Ashbrook, of Mercer avenue.

Mrs. F. O. Ball, of Myrtle avenue, is entertaining her sister, Mrs. Holman, of Buffalo.

Mrs. William Morrison, of Mountain avenue is the guest of her sister in New Brunswick.

Welsh Brothers circus will be in town June 3rd at West Fourth street and Darrow avenue.

Frank Barre, of Somerset street, was the guest of Brooklyn friends on Monday and Tuesday.

The Alis Club House on Arlington avenue was opened to the members on Saturday evening.

Mr. and Mrs. John Moleke, of Newark are visiting at the home of Mrs. Jacob Gaub, of Duer street.

Miss Ada Van Horn, of Duer street, who has been visiting friends at Elizabeth has returned home.

Miss Helen Foster, of New York City is the guest of her aunt, Mrs. John Gray Foster, of Mercer avenue.

C. Frank French, wholesale grocer, is having an addition built to his store building on Somerset street.

Miss Mamie Meade, of Somerset street, who has been visiting her parents at High Bridge, has returned home.

Mrs. Morgan Taylor, of Colorado Springs, formerly of Rockview Terrace, is visiting friends in the Borough.

Mrs. Charles Jensen, of Somerset street, who has been visiting her parents at South Amboy, N. J. has returned home.

Miss [illegible], who has been the guest of Brooklyn friends the past week has returned home.

Herbert Simpson, of Craig place, has accepted a position with the United States Steel Corporation, of New York City.

John Gaub, of Duer street, who has been detained at his home with a severe attack of pneumonia, is able to be out again.

Rev. E. L. Earp, of the Grace M. E. Church, who has been detained at his home with a severe illness is able to be out again.

Thomas J. McNeill and Frederick O'Harra, of Belleville, visited at the home of Mr. and Mrs. O. R. Pearson, of Manson place. Sunday.

Miss Blanche Stover, of Watervliet, N. Y., who has been visiting at the home of her uncle, James C. Blair, of Duer street, has returned home.

The New Jersey Motor Vehicle Company's plant on East Fourth street was purchased on Monday by Harry L. McGee, of Willow avenue.

Miss Minnie McNeill, who has been visiting at the home of her sister, Mrs. O. R. Pearson, of Manson place, has returned to her home in Belleville.

Tomorow Rev. C. F. Sandahl, of Montclair will preach in the Swedish Lutheran Church, Grove street at 3:30 p. m. There will be baptism and communion.

The Business Men's Basket Ball team of the Y. M. C. A. played the Reform Club Five at the Y. M. C. A. Gymnasium Monday evening and defeated them by the score of 22 to 20.

The Independent Gun Club held a [illegible] shoot on Saturday afternoon on [illegible] avenue grounds. Most of [illegible] were present. Refreshments were served after the shoot.

[illegible] Brothers, who received the contract for digging the cellar for the new engine house started work Monday with ten men. The work is progressing and will no doubt be finished the first part of next week.

A duplicate whist party was given at the home of Mrs. De Witt C. Brokaw, of Sycamore avenue, on Saturday afternoon. The affair war largely attended by people from the city, borough and out of town. Refreshments were served during the afternoon.

The Monday Afternoon Club met at the Casino Monday afternoon for the ensuing year. The officers elected were: Mrs. Robert Lowry, president; Mrs. Isaac L. Miller, Mrs. Benjamin Shreve and Mrs. Josiah Brown, vice presidents; Miss Mary Whiton, recording secretary; Miss Susan Hubbell, corresponding secretary; Mrs. James R. Joy, treasurer.

Warren Engine Company Elects Officers

At a meeting of the Warren Engine Company held Tuesday night the following officers were elected: Forman, L. B Bodine; First Assistant, Alonzo Brokaw; second assistant, Frank Kesselring; recording secretary, Philip Kirch; financial secretary, W. H. Debele; treasurer, J. M. Higgins; engineer Lou Feiring; first assistant, A. DeCamp; second assistant, Winfield Conover; stoker, Harry Coddington; delegate to Firemens Relief Convention, J. M. Higgins.

A smoker and social time followed the business meeting.

West End Hose Company Election.

The West End Hose Company held its regular election of officers on Monday evening at West End Hose Company's rooms. A challenge from the Warren Engine Company Baseball Team for a game with West End Hose Company was read and Manager Bagley was instructed to accept and the game will be played Decoration Day. The officers elected were: George Giddes, foreman; Dennis Bagley, first assistant foreman; Frank Keller second assistant foreman; William Demorest, coresponding Secretary; Gus Piering, financial secretary; Herman Hansen, treasurer; deiegates to the Firemens Relief Association, Charles Kellar.

Free Delivery For Prideville.

Through efforts of Colonel A. G. Perry, that portion of the borough known as Prideville, situated north of Greenbrook road, will soon be favored with free delivery of mails. An Inspector of the P. O. Department was here Wednesday and after investigating the subject, expressed himself as favorable to the scheme.

Mr. Grant's Narrow Escape.

Frank A. Grant, of Westervelt avenue, had a remarkable escape from death last Saturday, and is now confined to his bed as a result of his injuries received while in performance of his duties as Inspector of buildings for an insurance company in New York.

In company with the owner of the building, who preceded him with a lighted lantern, Mr. Grant was examining the basement of a down-town office building. It was quite dark and he did not [illegible] the floor. Between the bottom of elevator and floor there is a space of about twelve inches, and this prevented his instant death. As it is, he was seriously injured and for a time his life was despaired of, but he is now out of danger and in a fair way of speedy recovery.

Members of the I. G. C. Dance.

The members of the Independent Gun Club gave a dance in Sangerbund Hall on Monday evening. The affair was largely attended by the German residents of Plainfield and the borough. The dance was a success socially and financially.

Music was furnished by Suhr's Orchestra. The committee in charge was: Henry Haurand, chairman; W. W. Mills, secretary; Charles Jensen, treasurer; Charles Keller, Louis Van Dyck, Frank Keller.

Fined for Keeping Pigeons.

An investigation made by the Board of Health of the pigeon nuisance caused the arrest of David Conover, of Duer street, who breeds pigeons. The arrest was made by inspector Wm. N. Pangborn. Conover pleaded guilty in Justice Mattison's court Tuesday and was fined $3., and warned to get rid of his birds. Several other arrests may follow.

Dr. Moldenke Wins Suit.

In a suit for extra plumbing brought by D. J. Galbraith against Dr. Charles Moldenke, of Watchung, for $446.14 and which was decided by James J. Bergen, judgment was awarded Galbraith for $264.12—a little more than Dr. Moldenke offered to pay prior to suit being brought.

A New Athletic Club Started.

The Progressive Tennis Tournament was started at the Park Club Saturday afternoon. The prize is a handsome silver pewter bowl from Tiffany's. The person making the largest score in any single tournament holds the championship and cup for that week. The person winning the largest percentage of games during the season wins the championship and cup for good.

On Saturday Charles Dupee won 71 per cent of his games and William Burrows was second with 65 per cent.

Progressive Heart Party.

A Progressive Heart Party was given at the Park Club on Tuesday evening. There were ten tables with six players at each table. There were four prizes which were won by Mrs. John Holman, of Buffalo; Miss Nellie Valiant, Wallace Guilford and William R. Faber. After the play refreshments were served after which followed an informal dance.

The committee which had charge was Mrs. S. St. John McCutchen, chairman. Mr. and Mrs. Walter M. McGee, Everitt Morgan, Mr. and Mrs. Samuel Townsend and S. St. John McCutchen.

HIGH SCHOOL NOTES.

Items of Interest Regarding the Borough Schools

William B. Mundy has signed to play left field with the Y. M. C. A. team this year.

The Leal's School Athletic Association will hold an Athletic Meet this afternoon on Hope Common.

There is some talk that the Alumni Reception next June will be given at the Mountain Park Inn.

The offer made by the Board of Education to Prof. Wightman has been accepted and he will remain here another year.

Fred T. Van Auken, Plainfield H. S. '03 is taking the entrance examinations to the West Point Military Academy at Governor's Island.

The North Plainfield Crescents will hold a fair at the home of Councilman Charles Lee on Grove street on Friday, May 29 at 2.30 p. m. cake, candy, lemonade, etc. will be for sale.

The North Plainfield School Alumni Association met in the High School Chapel Tuesday evening. Final arrangements were made for the commencement dance next June.

Princeton Football Schedule.
Sept. 30—Swarthmore at Princeton,
Oct. 3—Georgetown at Princeton.
Oct. 7—Gettysburg at Princeton.
Oct. 10—Brown at Princeton.
Oct. 17—Carlisle at Princeton.
Oct. 21—Bucknell at Princeton.
Oct. 24—Dartmouth at Princeton.
Oct. 31—Cornell at Princeton.
Nov. 7—Lafayette at Princeton.
Nov. 14—Yale at New Haven.

The High School Ball team journeyed to Elizabeth, Wednesday afternoon to play the Pingry School Nine. In some respects the playing of the High School was improved in some directions.

As was expected when they went down, they were defeated by the score of 16 to 2. The fielding of the Pingry Nine was gilt edged with the exception of Liv[illegible] was changed.

McLaughlin was changed from first to third base and as the position was new to him failed to stop some of Oven's bad throws. Ovens played a good game behind the bat, but was erratic in his throwing to bases which was responsible for some of the runs.

Humble played a great game at second and his wonderful stops of grounders and catches of flys added materially in keeping up the spirit of the boys. Humble's batting showed improvement and he cracked out a neat little single.

Armstrong was changed from right field to first where he played a great game. His wonderful stops of wild thrown balls called for the applause of the spectators. In the first inning Armstrong made a one handed stop of E. Miller's hot liner and putting the ball to Humble on second completed the High Schools first double play. Armstrong smashed the ball over right field fence for two bags.

Manager George should be given credit for the excellent game which he pitched and had he received the same support from all the members of the team as was given him by Humble and Armstrong, he would no doubt have won the game. The team lined up as follows:

N. P. H. S.

	R.	H.	P.O.	A.	E.
McLaughlin 3	0	0	1	0	0
Ovens C	0	0	8	1	0
Adams R	1	0	0	0	1
Humble 2	1	1	5	2	0
Armstrong 1	0	1	7	1	0
Conover S	0	0	1	0	3
Kipsey C F	0	1	1	0	2
Newmiller L	0	0	1	1	0
George P	0	0	0	3	1
Total	2	3	24	8	7

PINGRY.

	R.	H.	PO	A.	E.
Turner C F	2	1	1	0	0
E. Miller 1	2	2	8	1	0
Satelle P	3	2	1	4	0
Glazebrook 3	2	0	0	1	0
Kerr C	1	0	13	1	1
K. Miller L	1	1	1	0	1
Wilson R	1	2	0	0	0
Livingston 2	2	1	2	2	4
Keeney S	2	2	1	0	0
Total	16	11	27	9	6

Score by innings:
Pingry—2-0-4-1-1-3-4-1-x--16.
N. P. H. S.—0-0-0-2-0-0-0-0-0—2.
Stolen bases—Armstrong—4. Turner—1.
Two base hits—Armstrong, E. Miller.
Double plays—Armstrong to Humble, Miller to Livingston.
Base on balls—Off Satelle-1. Off George-4. Struck Out—By George-5. By Satelle-13. Passed Balls—Ovens-1-Kerr-2. Time of game—1. 10.
Scorer—H. C. Brose.

The Sewer Pipe Canard.

After a careful and exhaustive investigation by the Borough Board of Health of the two pipes, which it was claimed by a Plainfield newspaper and several ardent annexationists, were emptying sewage into Stony brook, it is proven beyond a shadow of doubt that there is not a word of truth in the statements.

The larger drain, a ten inch pipe, was built to convey surface water into the brook, and there is no evidence whatever that it conveys anything else, save, of course, the wash of the streets from two catch basins. These basins were carefully examined by three members of the Board and it was found that the water in them was *below* the bottom of the outlet pipes, so that nothing was flowing out. Neither basin contained any foul matter, nor was any ordor perceptible even after stirring up the water.

Both basins were flushed and for half an hour the outlet was carefully watched, but no vault or cess pool matter was discovered—nothing but the natural wash from street.

The 4 inch pipe, which was claimed to be in such a dreadful condition, was also carefully examined, and nothing worse than spring water was discovered. It is not connected with any house or cess pool. About a year ago it was connected with a house, but the Board of Health notified the owner to disconnect it and it was done at that time. And even that connection was an indirect one and the property owner was unaware of it until his attention was called to it by the Board, when he cheerfully complied with their request to disconnect.

A man was employed to dig up this drain and tests made which conclusively proved that it was not connected with any house, or cess pool. The inside of the pipes were perfectly clean—no grease or other accumulations such as collect on pipes from cess pools.

And so ends another fairy story.

Property of Delinquent Taxpayers Sold.

Ten properties of delinquent tax payers was put on sale Monday at noon by the Tax Collector George F. Brown. Of the ten properties the borough bought eight. Many tax payers settled up before noon on Monday. The properties [illegible] by the borough were:

Lot O—on Greenbrook Road, Estate of F. S. Runyon $36.72.

Lot No. 4—Unknown owner on Watchung avenue $121.

Lot on Rockview avenue, Theodore Smith, $121.

Lot on Summit avenue, Frederick Arthur, Jr. $10.09.

Estate of Bridget Utzinger, 110 Jackson avenue, $38.72.

Estate of Isaac Scribner, Myrtle avenue, $13.06.

F. A. Dunham, 89 Fairview avenue, $52.03.

Mrs. Isabelle A. Miller bought Lot No. 6 at 157 Grove street belonging to the estate of F. S. Runyon for $44.56.

The Dime Savings Institution bought 31 Rockview avenue for $221.35.

Fair of the W. F. A. C.

The Washington Park Athletic Club held a fair on the grounds of Mrs. W. J. Roome, of Willow avenue, Saturday afternoon. The fair was a success and the club cleared $48.50. The candy table was in charge of John Valiant, Jr., and Tracy Howard. Ice cream table was looked after by Gwendolyn Strong and Lawrence Milne. Lemonade table was in charge of Jack Dewey and Lloyd Fisher. Cake table, Russel Pond and Leslie Brokaw, Charles Lyman, Jr., had charge of the grab bag.

The committee in charge of the affair was: Lawrence Milne, chairman; Jack Dewey and Lloyd Fisher.

A Dance at the Park Club.

The first informal Saturday night dance was given at the Park Club House Saturday evening. The affair was largely attended and the rooms were prettily decorated with bunting. Large palms and ferns graced the nooks and corners.

The affair was under the patronage of Mrs. Samuel Townsend and Mrs. Walter M. McGee. Music was furnished by Prof. Garland and orchestra, of New Brunswick.

Last Saturday's Golf Game.

The second week's play for the President's cup was played on the links of the the Park Club on Saturday afternoon. A large number of players were present.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

What is said to be the largest catfish that has been taken out of Lake Hopatcong in twelve years was caught Tuesday night by Alderman Nicolas Arrowsmith, of Morristown. With a party of friends he was fishing in the River Styx when he made the catch, which tipped the scales at four pounds.

E. Jesse Esterbrook died at Hammonton last Tuesday, seventy-nine years old. Although he was near his eightieth year, he had only had eighteen birthdays, having been born on the twenty-ninth day of February, 1824, and 1900 he was deprived of his regular birthday by the calendar skipping leap year. He had voted for every Republican candidate for the Presidency since Zachary Taylor.

At a meeting of the New Jersey Society of the Colonial Dames of America held at Trenton Tuesday, the following officers were elected: President, Mrs. Thomas T. Kinney, Newark; vice-president, Mrs. Frederick G. Burnham, Morristown; second vice-president, Mrs. Ernest C. Richardson, Princeton; Delegates to Washington, 1904: Mrs. Thomas J. Craven, Salem; Mrs. R. Meredith Dickinson.

The Suydam prize, in competition at Rutgers' College, New Brunswick has been awarded to Frank Steele Booth, of Yokohama, Japan, for his essay upon "The Sepoy Mutiny, a Study in Human Nature Politics and Religion." The Appleton Memorial prize for the best essay on "Moral Philosophy," written by a member of the senior class, has been awarded to James Wallace Hageman, of New York.

John Firman, twenty-five years old, of Paterson, has two hearts. He is a fine specimen of physical manhood, and is in constant enjoyment of good health. Firman discovered that he was a double hearted man when he enlisted with the Second Regiment at Paterson. Since that time he has been interesting to physicians both in Paterson and New York, and has had an X-ray photograph taken by Dr. A. L. Newman, of Paterson, which shows the heart formation.

There was a gathering of local societies in the Presbyterian church of Freehold Monday night, at a massmeeting helped by the local chapter of the Brotherhood of Andrew and Philip. The music was furnished by the choir and the Freehold Cornet Band. It was the first time the people of that town had heard a band in church on Sunday, and the first time the band appeared in public. The audience was principally of men, fifteen societies being represented. President Fred Parker welcomed them, and a special sermon was preached by Dr. Fox. The band played sacred music.

The annual meeting and church day of the Middletown Baptist Church was held last Saturday. A feature of the occasion was the roll call, and nearly all the members answered to their names. The church is situated in one of the most prosperous farming sections of Monmouth County, and has a membership of some of the oldest and solidest families in the township. The society is one of the oldest religious bodies in this part of New Jersey, having been originally founded in 1668. Its first regular preacher was assigned to the charge before 1750. The present pastor is Rev. W. H. J. Parker, who has been at the head of the church for the last nine years.

Dennis McMullen a Jersey Central brakeman, was brought to the hospital at Somerville last Saturday night badly injured by a peculiar accident. McMullin was on top of a freight train at Hampton Junction and fell between two cars just as the train pulled out. His head rested on the rail in front of a moving wheel and he seized an axle bearing in a frantic effort to save himself. The wheel pushed his head along the track several feet and he was nearing a frog when a knuckle on the automatic coupling on the car ahead snapped and the train parted. This applied the air brake at the rear, and stopped the car when McMullin's head was within a few feet of the frog. McMullin's face and one arm were badly torn.

Mr. Blair's latest investment in trees exceeds his great expenditure of last winter, when he moved a hundred mammoth trees by wagons ten miles over mountain roads and transplanted them about his new residence at Peapack. In front of Blairsden, as Mr. Blairs palatial residence is called. There is a picturesque basin or pool, which it is his intention to fringe with boxwood trees. The boxwood is the rarest tree found in New Jersey. A boxwood tree, which is said to

Medical Society Meet at Somerville.

The annual meeting of the Somerset County Medical Society was held at Somerville, in the Ten Eyck House, Thursday afternoon.

Prof. H. Augustus Wilson, of Jefferson Medical College made the chief address of the afternoon taking for his subject "The Advantages to be Derived From the Early Diagnosis of Tubercular Joint Disease." He was followed by Doctors John Ward, of Trenton, O. H. Sproul, of Flemington and A. Treganowan, of South Amboy.

Among other physicians present were Dr. J. Hervey Buchanan, of this borough, W. H. Merrill, Mary Gaston, W. H. Long, Jr., C. R. P. Fisher, J. F. McWilliam, T. H. Flynn, S. O. B. Taylor, J. H. Cooper, M. C. Smalley, J. P. Hecht, J. D. Ten Eyck, A. L. Stillwell, Josiah Maigh and George Henry.

The following officers were elected for the ensuing year: President, C. R. P. Fisher, of Bound Brook; vice president, J. P. Hecht, of Somerville; secretary, J. Hervey Buchanan, of North Plainfield; treasurer, T. H. Flynn, of Somerville; reporter, W. H. Long, Jr., of Somerville; representatives to State Society, J. Hervey Buchanan, of North Plainfield, M. C. Smalley, of Gladstone and T. H. Flynn, of Somerville.

The proprietor of the Ten Eyck House served the medical fraternity with an excellent dinner.

Baseball Games Last Saturday.

Alis—13; St. Mary's—7.

Orange F. C.—27; New Market A. C.—17.

Plainfield H. S.—11; Stevens Underclassmen—15.

Dunellen A. C.—9; Cuban Giants—0.

Safe Works—11; Garwood—5.

Clinton Avenue A. C.—8; Y. M. C. A.—4.

Westfield—6; Seventh Regiment—5.

Scotch Plains—5; Hope Chapel—1.

Will Observe Memorial Day.

At a meeting of the G. A. R. Memorial Day Committee, last Saturday evening, I. L. McVoy was appointed marshal for the day and it was decided to attend divine services Sunday evening at St. Joseph's Roman Catholic Church this borough. Vicar Gen. Father Miller will preach.

Revision of State Game Laws.

Revision of the game laws by the legislature this year included a number of changes which will be of interest to sports in this section. People who sell game and fishing tackle are also interested, because new restrictions are also placed upon them.

The section in relation to the sale of game changes the period of possession from thirty to fifteen days.

It is unlawful this year to sell any artificial bait with more than three hooks attached.

Open season for reed birds begins September 1 instead of August 25.

Open season for geese, ducks and webfooted fowl begins October 1 intead of September 1.

Open season for snipe is during the months of September, October, November, and December. Under the old law snipe could be shot during March and Apirl and from August 25 to December 31.

Section in relation to shooting partridge, quail and rabbits while snow is on the ground is made plainer, showing that only a tracking snow is meant, doing away with much confusion under the old law.

It shall be unlawful to kill or have in possession any yellow legs, povers, willets, sandpipers, dowitchers or robin snipe, brown backs, curlews, turnstones or calico backs, godwitl or marlin, and tattlers, or any other birds commonly know as shore birds, surf snipe or bay snipe, excepting only from the fifteenth day of July to the thirty-first day of December, both dates inclusive.

It shall be unlawfu to kill or have in possession any marsh hen (commonly know as mud-hen) or rail bird excepting only from the first day of September to thirty-first day of December, both dates inculsive, of each year.

It shall be unlawful for any person to kill in any one day, from the first day of September to the thirty-first day of December, inclusive, more than thirty marsh hens.

It shall be unlawful to kill or have in possession any partridge, quail, English or ring-necked pheasant, prairie chicken or any wild turkey, excepting only between the tenth day of November and the thirty-first day of December, both dates inclusive.

It shall be unlawful to hunt, kill or possess any woodcock, excepting during the months of July, October, November and December of each year.

It shall be unlawful to kill or have in possession any rabbits, gray, black or fox squirral, excepting only from the tenth day of November to thirty-first day of De-

TRAIN KILLS EXCURSIONISTS

Men, Women and Children Mown Down by a Flyer.

THE VICTIMS ARE TOLEDO POLES

A Large Party Waiting For a Train at Detroit Struck by a Grand Trunk Express—Bodies Strewn Along the Tracks For Two Blocks—Warnings Not Heard —Scores Killed and Injured.

Detroit, Mich.—Late, and thundering in from the West at high speed, the famous Grand Trunk Pan-American flyer plowed through a crowd of a thousand excursionists at the crossing of Dequinder and Canfield streets. From seven to ten persons were killed outright and forty more injured, some of whom will die.

The accident was terrible, its results horrifying. The swift train tore through the crowd like a flash, and without warning, crushing persons in mere masses, or hurling men, women and children to one side or the other, as a snow plow would cut its way through a drift. Some of the victims were thrown thirty feet by the impact, and scores not on the track were knocked down by the flying bodies.

In an instant the merry party of excursionists were transformed from a laughing, chatting group into a riven, horror-stricken, hurtling, shrieking mass, while the crossing ran with blood from the many victims.

The excursion was given by the Polish Lancers, a society connected with a Toledo Catholic Church. There were fifteen cars filled with men, women and children. Their train, which was on the Lake Shore Road, was scheduled to leave the Canfield avenue station at 7.30 o'clock, but was late. Finally it hove in sight and the tired people, anxious to get seats, rushed down the tracks to intercept it.

A freight train was on the west track, while their train was on the east track. The gateman, who had been warned by the electric bell of the approaching train, says that he yelled at the crowd to get out of the way, but they paid no attention to him.

It is alleged, however, that the farewells between the Detroiters and their guests were so noisy that the voice of the old man at the gate was drowned.

So in the shadow of the approaching excursion, which was slowly coming up and the freight train on the opposite side, the crowd stood on the middle track.

Then the Grand Trunk passenger train, due at the station within a few minutes after it left Canfield avenue, came along.

Witnesses insist they did not hear any bell on the Grand Trunk engine or any whistle. All they know is that the train bore down it, the crowd and the slaughter followed.

Patrolman Shultz sent in a general call for doctors and ambulances. Along the tracks for two blocks the mangled bodies of the dead were found. The victims all came from Toledo.

John Synda, a wealthy Polish brewer of this city, who was present, insists that the crowd was not warned in the least of the approach of the Grand Trunk train.

"It was simply dreadful," said he. "There never was a happier crowd of people. All of a sudden that train rushed down almost in the centre of the crowd. The crying could be heard for blocks."

The railroad officials and crews say that the gates were down and the police verify this statement.

KAISER AT THE VATICAN.

Pope Grants the Emperor a Private Interview Lasting Forty Minutes.

Rome, Italy.—Kaiser Wilhelm was entertained at a state luncheon at the German Embassy. After the luncheon the Kaiser was driven to the Vatican in a magnificent four-horse landau, escorted by a detachment of carbineers.

Surrounded by his entire court the Pope received the Kaiser in the throne room, and then granted him a private interview which lasted forty minutes.

This interview over, the Kaiser presented his sons, Crown Prince Frederick William and Prince Eitel, who have just returned from a tour of Egypt and Palestine, where both were ill with measles. The Pope expressed great pleasure at meeting the young princes, and when the audience was terminated he presented to the Kaiser and his sons three very costly mosaics made in the Vatican factory.

TWO NEGROES LYNCHED.

Hanged to a Railroad Bridge For the Murder of a Merchant.

Vicksburg, Miss.—Ben Bryant, aged twenty-one, and William Morris, aged thirty, two negroes who murdered William H. Legg, a merchant and planter, at his store at Adams Landing, sixteen miles north of here, were arrested and confessed the murder. They were taken from three deputy sheriffs and hanged to the iron bridge near the scene of the murder, just twenty-four hours after the assassination.

Russia Assures Great Britain.

Announcements were made in Parliament that the British Government has received authoritative information that Russia had no new designs in Manchuria.

Postal Robbers Get $10,000.

Nearly $10,000 was secured by burglars from the postoffice at Ravenswood, W. Va.

Besieged Town Relieved.

Six hundred troops have relieved the besieged town of Arzila, Morocco. Two hundred and fifty fugitive Jews from that place have been taken to Tangier in steamers. They are in a miserable plight.

Salonica Bank Blown Up.

The Ottoman Bank at Salonica, European Turkey, was blown up by dynamite, bombs were thrown in many places throughout the city, and two men were killed in the disorders.

KILLED IN A COURT HOUSE

Former Judge J. B. Marcum Murdered in Jackson, Ky.

He Was the Last Surviving Leader of the Cockrills, Who Had a Feud With the Hargises.

Lexington, Ky.—James B. Marcum United States Commissioner in eastern Kentucky, former County Judge of Jackson, Ky., and once prominent candidate for the Court of Appeals, was assassinated while standing in front of the court house door at Jackson. He was shot in the head from behind by some person standing in the dark hall further back.

This murder is another chapter in the long-standing feud existing in eastern Kentucky between the Hargis and Cockrill factions, in which in the last twelve months the lives of thirty-five men have been sacrificed. Marcum was the last recognized leader of the Cockrill faction.

The feud originated over a contest for the office of town marshal in 1896, as the result of which John O. Hargis was killed by Jerry Cardwell. The feud smouldered until the spring election of 1901, when the Hargis faction overran the independent ticket and took possession of the offices of County Judge and Sheriff. Marcum was the attorney for Teny and Davis, the contestants for these offices.

County Judge Tom Cockrill, a Cardwell man, shot and killed Ben Hargis in a saloon. Directly after this Dr. D. B. Cox, the guardian of the Cockrill boys, was assassinated. Then Jim Cockrill was shot from a window in the court house.

Marcum was warned to leave the county, and through spies he learned of a plot to assassinate him. He refused to go and barricaded himself in his house for seventy-two days. He then slipped away, coming to Lexington. He fought his opponents in the courts from this place.

NICARAGUA'S CIVIL WAR.

Revolutionists Claim Successes in the Republic.

Panama.—The official news emanating from Managua, Nicaragua, to the effect that the revolution has been put down, is contradicted. The Nicaraguan revolutionary junta here has received a report from General Emiliana Chamoro, saying that the Nicaraguan Government steamer Once de Julio has been sunk by the rebel vessel Victoria. The entire crew of the Government boat were lost, notwithstanding the efforts made to save them. The rebel victory at Acoyapa and the capture of Ometepe and San Carlos have been confirmed. The members of the junta are hopeful of success, and declare that the rebels cannot be attacked, the Government forces not being sufficiently strong to do so.

TEXAS WINS LAND SUIT.

Ownership of 375,000 Acres Affected by a Decision of the Courts.

Austin, Texas.—Tracts of land aggregating 375,000 acres, situated in the southwestern part of the State, which were originally a part of a Spanish land grant, will pass into the ownership of the State of Texas under a decision rendered by the Supreme Court in the case of the State of Texas against Thomas O'Connor, for the recovery of 20,000 acres of land.

The same question is involved in the cases of other claimants to these lands now pending in the courts. Some of these claimants have had possession of the land for a half century or more, and improvements valued at many thousands of dollars are located thereon.

CUBAN VETERANS WANT PAY.

Tell Palma and Congress They Are Tired of Delay in Raising Loans.

Havana, Cuba.—The Veterans' Association of Havana has sent a memorial to President Palma and Congress setting forth its dissatisfaction with the delay in raising the loan to pay the Cuban soldiers and asking Congress to appoint a committee to decide upon the legality of the claims not recognized by the commission which is preparing the army lists.

It is said officially that no difficulty is looked for in obtaining this $35,000,000 loan, and that the collection of taxes in payment of the loan soon will be begun.

LOURDES GROTTO TO PEN.

Premier Combes Says It Will Not Be Closed Till Court Says So.

Paris, France.—A delegation from Lourdes which waited on Premier Combes was assured that the Grotto will not be closed until the courts have decided whether the law under which the religious orders are expelled from France applies in this case.

This was considered equivalent to saying that the Grotto will not be disturbed.

Buffalo Woman Shoots Husband.

John H. Costello, capitalist, mine owner and lumber merchant, was shot and seriously wounded by his wife in the corridor of the Prudential building at Buffalo, N. Y. Immediately after the shooting Mrs. Costello walked down to Police Headquarters and gave herself up. The shooting was the outcome of years of domestic infelicity and open warfare in the courts between Costello and his wife.

U. S. Consul Escapes Sentence.

The sentences of the local court in Solingen, Rhenish Prussia, imposed on United States Consul Landger, a fine of $7.50 and one day's arrest, for disorderly conduct in the courtroom, have been canceled.

Swift's Estate Valued at $12,000,000.

Letters testamentary were granted by Judge Cutting, at Chicago, to the administrators of the Gustavus Swift estate. The will provides that the estate shall not be divided within ten years, nor later than twenty years. The estate is valued at $12,000,000.

Philippines Postmaster Sentenced.

O. G. Milne, postmaster at Tacloban, Island of Leyte, P. I., who recently was convicted of misappropriating Government funds, has been sentenced to seven years' imprisonment.

CRASH OF STEAMERS IN FOG

The Hamilton Sinks the Saginaw Off the Virginia Coast.

AT LEAST A SCORE PERISH

The Wrecked Vessel Goes to the Bottom Within a Few Minutes—Victims Asleep When Disaster Overtakes Them—Lifeboat, Filled With Fifteen Women, Swamps and All Drown.

Norfolk, Va.—Replete with the tragedy and heroism which form so large a part of the annals of the sea is the story of the sinking of the steamer Saginaw, of the Clyde Line, from Richmond and Norfolk, for Philadelphia, and the drowning of at least twenty of her passengers and crew off the Virginia coast. The steel prow of the steamer Hamilton, of the Old Dominion Line, from New York City for Norfolk, cut off twenty feet of the Saginaw's stern, as though it was so much cheese, and then, in the darkness of fog so thick that objects a boat's length away could hardly be discerned, with the almost bisected Saginaw sinking, as the waters rushed in, ensued a shipwreck scene more thrilling than which the pages of fact have seldom recorded.

From both steamers boats were lowered into the pit of the fog amid the clamor of panic and the silence of despair from passengers who had been aroused from sound sleep and rushed on deck to see the water pouring into the ship. As the first boat from the Saginaw's side struck the water it capsized, and fourteen negro women sank. With the roar of a battleship's broadside the decks of the Saginaw burst and belched forth freight, crew and passengers into the sea. Lashed to a mast above it all was Captain Tunnell, with some of his ribs broken, and others of the crew and passengers who had taken refuge there, and amid the wreckage, the struggling and the drowned sped the lifeboats of the Hamilton, picking up those who had kept afloat. When the Saginaw sank, a few minutes after the collision, there went to the bottom with her some who had been killed in their bunks by parts of the cargo, which had fallen on them.

The list of the dead and missing, so far as known, is as follows: Passengers—A. Gilmore, P. L. Pendleton, Florence Newby, Edna Ward, M. E. Jones and Mary Robertson. Crew—Edward Goslee, first mate; William Bitters, first assistant engineer; Mary Anderson, stewardess; ———, cook; William Morris, steward; unknown colored waiter; Peter Swanson, missing.

The scene of the wreck was about fourteen miles offshore between Winter Quarter Lightship and Fenwick Island Lightship. The first officers of both steamers were at the wheel, both were proceeding under reduced speed and, both were sounding their fog sirens, each hearing the other. Captain R. B. Boaz says:

"It was clear when we left New York City, but we ran into a fog bank four miles north of Egg Harbor, the fog lasting until we reached Cape Charles. It was about 4.40 o'clock a. m., and we were proceeding at about nine knots an hour. We had been under reduced speed since encountering the fog. We could not see a ship's length ahead, when we heard a whistle on the starboard bow two points ahead. We stopped the Hamilton and then I heard another whistle. Suddenly the Saginaw loomed up three points on the bow, and the Saginaw attempted to run across the Hamilton's bow. We backed at full speed, but struck the Saginaw on the port quarter. In a very short time she went down. When the Hamilton backed off she was settling. We lowered two boats, but meanwhile the Saginaw had lowered her boats and a raft. I picked up two of these boats and the raft."

When the Saginaw was sighted after the first impact her stern was under water and her bow was high in the air. Panic stricken people rushed over her decks and scrambled toward the bow. A boat from the Hamilton saved Second Officer W. L. Morris and the colored stewardess of the Saginaw, who were in the lifeboat that capsized. The woman died in the Hamilton's boat. She had been held up by First Mate Goslee, of the Saginaw, who sank himself as the Hamilton's boat reached them.

The other two boats and the life raft lowered from the Saginaw and the Hamilton's two boats picked up the people who clung to floating wreckage, but so quickly did the Saginaw sink that when the lifeboats of the Hamilton reached her nothing but the topmasts were visible, with the men clinging to them. The lifeboats took them off.

The Hamilton hovered around the scene of the wreck for more than an hour, but no sign of life could be seen among the mass of floating freight. Two bodies, one of a man and the other of a woman, clad in nightgowns, were seen drifting between bales of cotton and cases of goods.

The Hamilton has been in several serious collisions since she was launched in 1899, at Roach's yard, Chester, Pa. On June 13, 1900, she struck and sank the steamship Macedonia, seriously damaging her own bows. Ten days later she sank the schooner John H. Ker, and on October 7, of the same year, she sank the schooner A. A. Shaw.

Waterloo Veteran Dies at 105.

Louis Reep, of West Bay City, Mich., is dead at the age of 105. It is said he was in the Battle of Waterloo under Blucher.

Salvador Must Pay Up.

The State Department, in Washington, has cabled instructions to Minister Merry to notify Salvador that she is expected to settle the El Triunfo claim without delay. This is expected to produce some definite statement of Salvador's position.

Decrease in Navies Favored.

The Italian Under Secretary of State said that Mr. Balfour had declared that Great Britain was ready to diminish her navy if the other Powers would follow the same course.

FATHER WALSER FREED

Priest Exonerated of the Charge of Killing Miss Agatha Reichlin.

Brothers of the Girl Swear at Coroner's Inquest That They Believe Him Innocent of the Crime.

Elyria, Ohio.—At the end of an investigation into the cause of the death of Agatha Reichlin, who was murdered, Coroner French, of this county, gave as his conclusion the verdict "That Agatha Reichlin came to her death from wounds inflicted by a stone in the hands of a person unknown." The conclusion reached by the Coroner resulted in the freeing of Father Walser from confinement later in the evening.

The witnesses examined included policemen who had been called to the Reichlin home and Casimir Reichlin, a brother of the murdered girl. The Rev. Charles Reichlin, another brother, also testified. The consensus of the testimony of the witnesses was favorable to Father Walser's claim of innocence and in support of the theory that a burglar or some other desperate man had committed the crime.

Casimir Reichlin, the younger brother of the murdered girl, who was in the house when the crime was committed, said he was awakened about 1 o'clock by the priest rushing into his room and excitedly saying that burglars were in the house. He arose and ran to his sister's room and found her lying in her bed, covered with blood and life extinct. He then searched the house, but found no one. Casimir said he notified the police and took them into the attic, where they found fresh mud on the attic floor under the attic window and afterward on a ladder which stood outside under a window of the murdered girl's room.

"You have every confidence that Father Walser is not guilty of the crime with which he is charged?" he was asked.

"If Father Walser is guilty, then I am guilty. If he should hang, then they had ought to hang me. I know he is innocent."

Later the same question was asked of Father Reichlin. He said: "I have absolute faith in Father Walser. I know he is innocent."

The Rev. Charles Reichlin said as to a possible motive:

"My first thought was that it might have been a jilted lover. A Mr. Rospert was her last lover. I think the motive for the crime was robbery. My sister never expressed to me any love for Rospert. He called twice since November."

Martin Reichlin, another brother of the girl, testified that Rospert had come to see Agatha last summer, but she refused to accept his attentions.

Father Walser was brought from the county jail and discharged from the charge of murder. Mayor King went through the formality of reading the warrant for Walser's arrest, and his attorney, E. G. Johnson, entered a plea of not guilty. Prosecuting Attorney Stroup, addressing His Honor, said that, after having listened to the evidence presented at the inquest he could see that there is not sufficient evidence to hold the defendant.

Mayor King then announced that, as the Prosecuting Attorney had said there was not sufficient evidence to hold the accused he had nothing to do but discharge him from custody.

Father Reichlin, brother of the murdered girl, listened attentively to the proceedings, and upon adjournment of court was the first to approach Father Walser with a hearty handshake, after which the handshaking became general, and the freed priest was the recipient of congratulations on all hands.

HARVARD ATHLETE LONG MISSING.

Wealthy New Yorker Disappeared in February—Feared That He Is Dead.

Cambridge, Mass.—It was learned that William Scollay Whitwell, a wealthy New York youth in the senior class at Harvard and a member of last year's football eleven, has been missing from Cambridge since February 27.

At the time of Whitwell's disappearance his father, Dr. Whitwell, was ill in their home in New York City, and the common belief was that the young man had hastened to the invalid's bedside. As he left no word and as nothing was heard from him as time went on fears were entertained that he had committed suicide or had been the victim of foul play.

His father died soon after his disappearance, and it is said that death was hastened by grief over the youth's disappearance. The fact that Whitwell took neither money nor clothes with him and that he was always of a more or less despondent nature leads to the belief that he committed suicide.

WELCOMED BY "ROUGH RIDERS."

Roosevelt Assists at a Picturesque Christening at Santa Fe, N. M.

Albuquerque, N.M.—President Roosevelt was made welcome by the ancient cities of Santa Fe and Albuquerque, received greetings from hundreds of his old Rough Riders, assisted at the christening of a baby boy named in his honor, and had a splendid time from start to finish of the day.

The christening of Theodore Roosevelt Armejo, son of Sergeant George Armejo, of the Rough Riders, was one of the prettiest affairs of the day. The ceremony took place in the ancient cathedral in Santa Fe. The President stood at the baby's head and the mother at his feet, while the venerable priest read the long service and applied the sacred ointment and holy water. Governor Otero, of the Territory; Mayor Parks, of the city, and Secretary Loeb held candles in a semi-circle about the chief actors during the function.

Jim Howard's Brother-in-Law Killed.

Sid Baker, a brother-in-law of Jim Howard, who was recently convicted of the murder of William Goebel, was shot and killed in a fight on the highway near London, Ky. The man who fired the fatal shot is William McCullum. Hugh Barnes, a companion of Howard, was shot through the arm.

Cuba to Issue Independence Stamps.

The Cuban Congress has authorized an issue of 7,700,000 postage stamps in commemoration of the installation of the Cuban Republic.

THE POSTOFFICE INQUIRY

Investigation to Extend to All Large Cities, Says Mr. Payne.

THE STORY OF AN AUTOMOBILE

A Costly Machine Bought For the New York Office, Ostensibly For Business Purposes, But Really For Private Use —The Inquiry Will Embrace Every Phase of Administration.

Washington, D. C.—Postmaster Van Cott's automobile was the uppermost topic in the Postoffice Department investigation a few days ago. The information to be had at the department is that the automobile is a good one, and that it cost nearly $3000. It was bought by Mr. Beavers, the late head of the salaries and allowance division, on pretext that it was a daily necessity to carry money from the main postoffice in New York City to the bank for deposit, and for safety and dispatch an automobile was indispensable.

Mr. Van Cott, it seems, did not ask for the machine and did not realize that the office could not get along without one. Mr. Beavers practically gave him the machine. It is of the coupe pattern, with the platform for the chauffeur up behind. The front is curved and of the finest plate glass.

From accounts received at the department it has not been used so much for the transportation of money from the postoffice to the bank as for personal pleasure, and the statement was made by a prominent official at the department that it is believed the real motive in buying the machine was to provide an automobile for Mr. Beavers' use in New York City.

Postmaster-General Payne said to the twenty newspaper men who made their customary call late in the afternoon that the investigation authorized by Congress would take in all the first-class postoffices of the country. The scope of the inquiry will embrace every phase of administration, including possible extravagance and dishonesty, and any other thing that had been or might be suggested as meriting investigation.

He had conferred with the President about that general investigation early last session of Congress, he said. When the idea was first considered there was no talk of dishonest practices any more than the general matter of extravagant and wasteful methods and practices in the purchase of supplies. Later, when charges of all sorts of irregularities were made, the present investigation was precipitated, and the pending inquiry had developed a good deal that had not been contemplated in the original plan.

There was a revival of comment on the recent visit of Senator Lodge to Washington, to see the Postmaster-General. It is denied positively, however, that Mr. Lodge came here as the President's personal representative or that he had told Mr. Payne that the latter would be forced out of the Cabinet if he did not at once suspend A. W. Machen, the Chief of Free Delivery, from office pending the conclusion of the investigation.

It is true that Mr. Lodge did appeal to Mr. Payne in the strongest terms to suspend Machen, but he did not mention the President nor make any allusion to Mr. Payne's possible retirement from the Cabinet. He put the matter on party grounds and said that Machen, as a matter of common decency, should not stay in the department while he was under investigation. Mr. Payne said that he had not yet taken any action looking to Machen's suspension or dismissal.

SWEPT FROM RIGGING INTO SEA.

Sailors in Wrecked Schooner Battle For Life—Fifteen Perish.

Canso, N. S.—The American fishing schooner Gloriania, Captain George Stoddart, of Gloucester, ran ashore during a thick fog on the cliffs in Whale Cove, near White Point Ledges, and fifteen of the crew, including the captain, were drowned out of a total of eighteen men.

The Gloriania left Sable Island bound for Canso, in a heavy easterly gale and a thick fog. She brought up on the inner reef in Whale Cove, butted against a cliff and fell off into the sea. When she struck the cliff the three survivors rushed out on the bowsprit and climbed up on the rocks before a receding wave carried the vessel off again. Others of the crew started to lower the dories, but each boat was smashed. Four of the crew jumped overboard and were dashed against the rocks. The others who were on the vessel took to the rigging, but one by one they were swept away. When day dawned only one man was left in the rigging. When the survivors got assistance he was taken down, but he was dead.

MIXED ON HISTORY.

Kuhne Beveridge's Sculptural Version of the Charge at San Juan.

London.—The World says that Mrs. Kuhne Beveridge, the sculptor, has taken a house in Park street and commenced work on a monumental bas relief depicting the charge of the Rough Riders at San Juan Hill. President Roosevelt is leading the charge and at his feet lies Hamilton Fish.

Sergeant Hamilton Fish was killed at Las Guasimas several days before the fight at San Juan.

Ill Health Cause of Suicide.

Despondent through ill health, H. E. Moran, of Helena, Mont., killed himself at Baltimore, Md.

$42,032,800 Taxable Property in Newport

The tax assessors of Newport, R. I., have completed their labors and turned over to the city clerk their books. As stated by them the total valuation of the city is placed at $42,032,800, divided as follows: Real estate, $34,668,200; personal estate, $7,364,600, on which the tax is $504,393.60.

King Edward Welcomed Home.

King Edward was welcomed on his return to London by cheering crowds which lined his path from the railroad station to Buckingham Palace.

LAST ACT OF DYING MAN

Unknown to Family Left Death-Bed to Pay Insurance Premiums.

The Strange Case of a Commission Merchant of St. Louis, Mo.—Fact Discovered After His Death.

St. Paul, Mo.—From his dying bed Frank S. Powell arose, went downtown and paid the premium on his $5000 life insurance policy and returned home without the knowledge of his wife or anyone in the family. That night he died.

The fact that he had even left the house did not become known until negotiations toward settling up the policy were begun. In a statement of the circumstances of Powell's death, Charles W. Morgan, secretary of the Merchants' Exchange, who managed the matter for the widow, told the insurance company that Powell was confined to his bed for seven days prior to his death.

Later on the agent of the company called on Morgan and in the course of the conversation remarked that Mr. Morgan had made a mistake in saying that Powell had been kept at home so long.

"He was downtown and paid the premium to me the day before his death," asserted the agent.

Mrs. Powell was asked to decide the point. She was positive that she had been with him constantly during his illness, and that he certainly could not have been outside the house without her knowledge. Told the agent's story, she recalled that her husband had asked her to go downtown for something he desired and had asked her to tell other members of the family that he was not to be disturbed while she was away. She said she had gone downtown by the most direct route and had returned without delay.

On her arrival home she found her husband in bed. He said nothing about having left the house, and did not mention his life insurance.

Powell was a well-to-do commission man. His illness had lasted barely a week, when it terminated fatally.

"It is the strangest case I ever encountered," said Mr. Morgan. "The evidence would seem conclusive that it could not have been possible for Mr. Powell to leave his home at all, and certainly not to go downtown and back without being noticed by any one of his family. Yet the agent received the premium on the policy from Powell, whom he knew well. He recalls that Powell looked pale, almost ghostly, and had nothing to say. I am almost tempted to believe that, if there is any such thing, Powell projected his astral body into the presence of that agent and paid him the coin of the spirit land. It makes my flesh creep to think about it."

ABUSES IN THE CONGO STATE.

American Missionary Tells of the Tyranny of the Whites.

London.—The Rev. William Morrison, of Lexington, Ky., a member of the American Presbyterian Mission, who is here on his way home after six years' work along the Kassai River, about 1200 miles in the interior of the Congo State, fully confirms the stories of the abuses in the Congo administration.

He has furnished an exhaustive report on the situation to the Congo State authorities, to the American and British Ministers at Brussels, and to Foreign Secretary Landsdowne, detailing the results of his personal investigation. He shows that the situation is growing worse, as a result of the rubber monopoly's introduction of forced labor, virtually amounting to slavery.

On his way to the coast Mr. Morrison covered 800 miles of the Kassai River, formerly thickly dotted with villages, and he says there are now less than a dozen villages there, the people having fled into the forests to escape the tyranny of the whites. The missionary declares it is impossible for the natives to get any redress from the Congo State officials for the flagrant abuses and cruelties to which they are subjected.

BANKER'S DAUGHTER SLAIN.

She Was Defending Her Father From a Highwayman.

Boston, Mass.—Miss Nellie Sturtevant, daughter of James Sturtevant, President of the Medford Co-Operative Bank, was shot down on her father's doorstep on Sturtevant Terrace, Medford, late at night by an unknown man.

The case is one of the most mysterious which the police of that city have ever had to contend with. The young woman was shot at three times by her assassin, each of the bullets taking effect in her body.

Miss Sturtevant was one of the best known young women in the Hillside district of this city. She was twenty-five years old. Her family is one of the oldest in the city and is highly respected.

The assassin was attempting to rob Miss Sturtevant's father, as he was returning from a bank meeting with a satchel filled with checks and money. After the shooting the man jumped upon a bicycle and escaped.

BRITISH MONROE DOCTRINE.

No Power Can Have a Naval Base in the Persian Gulf.

London.—Foreign Secretary Lansdowne has proclaimed a British Monroe Doctrine in the Persian Gulf.

"I say without hesitation," said the Foreign Secretary in the House of Lords, "that we should regard the establishment of a naval base or a fortified port in the Persian Gulf by any other Power as a very grave menace to British interests, and we should certainly resist it with all the means at our disposal."

RESTRAINS 3000 STRIKERS.

Federal Court Bars Interference With Freight in Omaha.

Omaha, Neb.—Judge Munger, in the Federal Court, has issued a sweeping injunction against the 3000 strikers.

The order restrains the striking teamsters from interfering with freight between warehouses and depots or destined for other States; from congregating in large crowds on the streets, or in any way interfering with the transaction of business.

FOR THE FAIR

LATEST NEW YORK FASHIONS

New York City.—Blouse jackets with little capes of various sorts are among the features of advanced styles, and are exceedingly becoming to young girls. The very stylish May Manton example illustrated is suited alike to the general wrap and the costume, but, as shown, is of Rhone blue cheviot and takes part of a suit. The trimming is bands of the same material stitched on with corticelli silk and held at the points with handsome buttons.

MISSES' BLOUSE JACKET.

The blouse is made with fronts and back. The cape is separate and is circular over the shoulders and extended at the front to form stoles, at the back to give a V effect and to make the postillion. It can be omitted and the blouse made plain when preferred. To the lower edge are attached the basque portions. The sleeves are full but tucked above the elbows and allowed to form puffs below. At the wrists are plain straight cuffs simply stitched.

The quantity of material required for the medium size (eleven years) is two and a quarter yards forty-four inches wide or two yards fifty-two inches wide.

Hints For the Summer Wardrobe.

What pretty fashions we are given this year. We never feel quite sure of styles until the exclusive places show the very latest things Paris has put out, because the best come last. But this great event has come off and womankind can settle down to dream over and plan her summer wardrobe, sure she is on the right track.

Quite a noticeable feature is the use of the fine, thin laces, frequently the old-fashioned silk laces we have not seen for so long. There has been such a hue and cry about the vogue of heavy, coarse lace that the appearance of these fragile, delicate laces comes much as a surprise. They are used, however, only on the thin sheer muslins, organdies and fine handkerchief linens that build the summer gowns. The coarse lace will still be used on the heavy linens and the voiles and etamines. But on the fine sheer fabrics—the silk crepes, the French mousselines, the filmy printed organdies—this finer lace is used. It is a nice, discriminating touch, and it takes the best of taste and judgment just when to use it and when to leave it alone.

Another point to be noticed is the lingerie effect in the gowns. Of course the abundance of handiwork used could not but make a trend this way. It is all very dainty and sweet and simply idyllic for the summer girl.

Handkerchief points are much noticed. Some of the daintiest trimming on gowns looks as if the points of fine lace handkerchiefs had been taken and applied to the gown in all manner of dainty ways. In fact, one of the loveliest gowns shown in a recent opening is made of fine crepe de chene in handkerchief squares embroidered, and held together by dainty Val lace. The fronts of the little bolero effect are gracefully drooping handkerchief points, and the long—almost angel—sleeve is entirely of this picturesque handkerchief point effect.

Skirts, many of them, show the three ruffle effect. There are not three ruffles as a rule, but the skirt is shirred in three bands, each fuller than the other, and each having a heading, so that almost it seems as if the ruffles were there.—Philadelphia Telegraph.

The Short Four-in-Hand.

Curtailed cravat ends mark the "Short Four-in-Hand" which is worn with a morning blouse. As so many waists are trimmed with pendant collar ends, in fact, long, flat streamers of cloth or silk, it would be decidedly too much of a good thing to have elongated cravat ends also fluttering down to the waist. The fresh-looking "shorts" are made of cotton cheviot or Oxford cloths with a brilliant stripe of white upon a dull white ground, and clusters of light blue dots or pen rings sprinkled lavishly upon the shining white stripes.

Neckwear For Young Girls.

Different styles of neckwear in the simpler designs, turn-over or protection collars, wash stocks and the like, that are worn by the grown-ups, are to be found also in the young girl's wardrobe.

LADIES' FANCY WAIST—LADIES' SKIRT.

Woman's Shirt Waist.

Plain shirt waists are always in vogue. The very desirable May Manton one illustrated includes just the fulness at the neck which renders it becoming to all figures and is made with the new wide centre pleat. The original is made of white dotted batiste with large pearl buttons, but all waistings are equally appropriate. The tie can either be made of the same or of contrasting material as preferred.

The waist consists of fronts and back only and is fitted by means of shoulder and under-arm seams. The fronts are gathered at the neck edges and again at the waist line, but the back is plain and drawn down snugly at the belt. The sleeves widen as they approach the cuffs, which are straight and can be held by means of buttons or links as preferred.

The quantity of material required for the medium size is four and a half yards twenty-one inches wide, four yards twenty-seven inches wide, three yards thirty-two inches wide or two and a quarter yards forty-four inches wide.

A PLAIN SHIRT WAIST.

The Funny Side of Life.

ALWAYS LUCKY.

A jolly fisherman was he,
As jolly as you'll ever find;
While some caught big ones in the sea,
He caught still bigger in his mind.
—Washington Star

CONUNDRUM ANSWERED.

A teacher once asked a class of little folks where wool came from to make so many useful things.

"I know," piped Frederick; "from wolves!"

BAD TERMS.

Walling—"Bogert and Appleton are not on speaking terms, are they?"

Nelson—"Well, yes; but they don't use very good terms, I'm afraid."—New York Herald.

GRATITUDE.

Mr. Fish—"Thanks, old man."—New York Sun.

NOT IN HIS LIST.

"Our son seems to be goin' right in for culture," said Mrs. Corntossel.

"Yes," answered her husband in a tone of slight disappointment; "every kind except agriculture."—Washington Star.

PAINFUL EXPOSURE.

Richard—"Uneducated people often have a lot of insight."

Robert—"That is so; our new maid knows that she is a better cook than we've been used to."—Detroit Free Press.

CONSIDERATIONS.

"You must not forget that there are millions of people whose interests are at stake."

"Yes," answered Senator Sorghum, "and millions of dollars, too."—Washington Star.

AILMENT.

"I settled that fellow's hash for him."

"Was he mad, doctor?"

"No; that's what he wanted me to do. He was suffering from indigestion."—New York Herald.

A SUBJECT FOR DEBATE.

"You know he married Miss Millions."

"And they do not get along?"

"No. They can't agree about what portion of the wife's income the husband ought to have."—Puck.

A DRAW.

"Diplomacy is a curious game," said one statesman.

"It is," answered the other; "it is one in which the most satisfactory results are achieved when both sides can go home and claim a victory."—Washington Star.

CAN'T HELP THAT.

HIS RIGHT TO A MEAL.

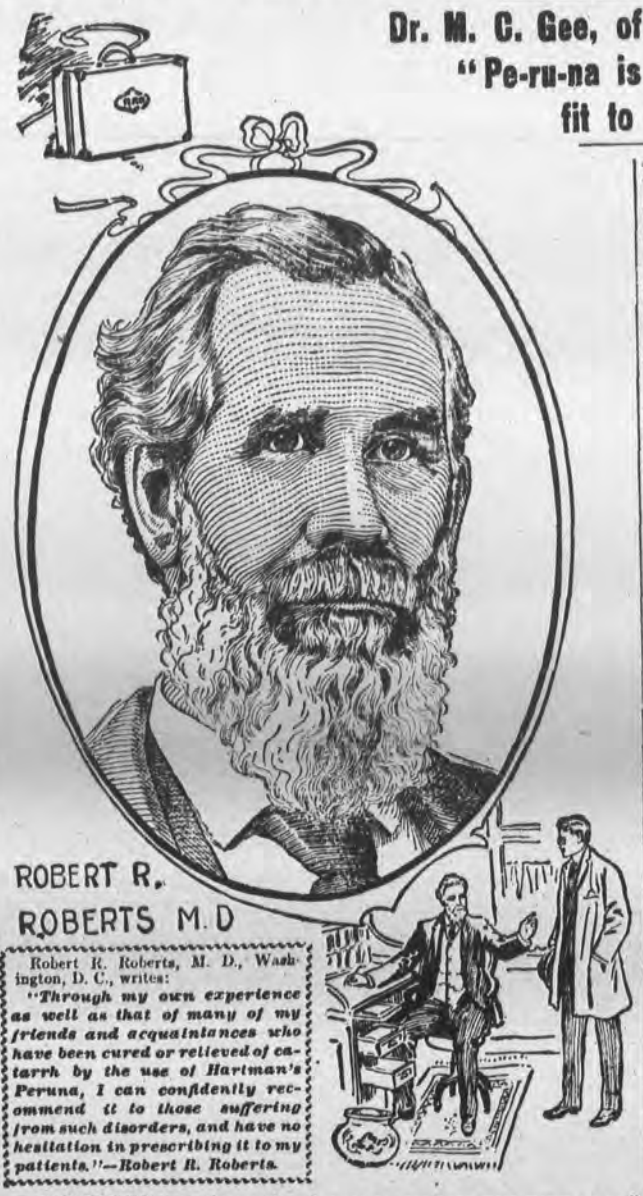
"Don't you think it's unwise," said the first partisan, "to be so sanguine about your candidate?"

"All right," retorted the other, "just wait till after election and then I'll have a right to crow."

"That's what you will, but I don't think you'll care to eat all you'll have a right to."—Philadelphia Press.

PROMINENT PHYSICIANS PRESCRIBE PE-RU-NA.

Dr. M. C. Gee, of San Francisco, Says "Pe-ru-na is of Especial Benefit to Women."



Robert R. Roberts, M. D., Washington, D. C., writes:

"Through my own experience as well as that of many of my friends and acquaintances who have been cured or relieved of catarrh by the use of Hartman's Peruna, I can confidently recommend it to those suffering from such disorders, and have no hesitation in prescribing it to my patients."—Robert R. Roberts.

A CONSTANTLY increasing number of physicians prescribe Peruna in their regular practice. It has proven its merits so thoroughly that even the doctors have overcome their prejudice against so-called patent medicines and recommend it to their patients.

Peruna occupies a unique position in medical science. It is the only internal systemic catarrh remedy known to the medical profession to-day. Catarrh, as everyone will admit, is the cause of one-half the diseases which afflict mankind. Catarrh and catarrhal diseases afflict one-half of the people of United States.

F. H. Brand, M. D., of Mokena, Ill., uses Peruna in his practice. The following case is an example of the success he has through the use of Peruna for catarrh.

Dr. Brand says: "Mrs. 'C.,' age 28, had been a sufferer from catarrh for the past seven years; could not hear plain and had watery eyes. She came to me almost a physical wreck. She had tried the Copeland cures and various other so-called specialists, and had derived no benefit from them. She told me she did not want to spend any more money on medicines unless I could assure her relief.

F. H. Brand, M. D.

"I put her on Peruna and told her to come back in two weeks. The effects were wonderful. The cast-down look she had when I first saw her had left her and a smile adorned her face. She told me she felt a different woman, her hearing was improved and her eyes did not trouble her any more.

"This is only one case of the many I have treated with your valuable medicine."—F. H. Brand, M. D.

Catarrh may invade any organ of the body; may destroy any function of the body. It most commonly attacks the head, nose and throat, but thousands upon thousands of cases of catarrh of the lungs, stomach, kidneys, bladder and other pelvic organs have been cured by Peruna.

Peruna is able to cure catarrh wherever it may be located by its direct action upon the mucous membranes. Catarrh means inflamed mucous membranes. Peruna acts at once to cleanse and invigorate the catarrhal condition of the mucous membrane no matter where it may occur in the body. Its action is the same on the mucous lining of the nose as on the mucous lining of the bowels. It cures the catarrhal inflammation wherever it may occur.

Dr. R. Robbins, Muskogee, I. T., writes:

"Peruna is the best medicine I know of for cough and to strengthen a weak stomach and to give appetite. Beside prescribing it for catarrh, I have ordered it for weak and debilitated people, and have not had a patient but said it helped him. It is an excellent medicine and it fits so many cases.

"I have a large practice, and have a chance to prescribe your Peruna. I hope you may live long to do good to the sick and suffering."

We say Peruna cures catarrh. The people say *Peruna cures catarrh.* Prominent men and women all over the United States from Maine to California do not hesitate to come out in public print to say that Peruna is what it is recommended to be, an internal, systemic catarrh remedy that cures catarrh wherever it may be located.

Dr. M. C. Gee's Experience.

Dr. M. C. Gee is one of the physicians who endorse Peruna. In a letter written from 513 Jones street, San Francisco, Cal., he says:

"There is a general objection on the part of the practicing physician to advocate patent medicines. But when any one medicine cures hundreds of people, it demonstrates its own value and does not need the endorsement of the profession.

"Peruna has performed so many wonderful cures in San Francisco that I am convinced that it is a valuable remedy. I have frequently advised its use for women, as I find it insures regular and painless menstruation, cures leucorrhoea and ovarian troubles, and builds up the entire system. I also consider it one of the finest catarrh remedies I know of. I heartily endorse your medicine."—M. C. Gee, M. D.

Women are especially liable to pelvic catarrh, female weakness as it is commonly called. Especially in the first few weeks of warm weather do the disagreeable symptoms of female weakness make themselves apparent. In crisp, cold weather chronic sufferers with pelvic catarrh do not feel so persistently the debilitating effects of the drain upon the system, but at the approach of summer with its lassitude and tired feelings, the sufferer with pelvic catarrh feels the need of a strengthening tonic.

Peruna is not only the best spring tonic for such cases, but if persisted in will effect a complete cure. Write for a copy of "Health and Beauty," written especially for women by Dr. Hartman. If you want to read of some cures, also, write for a copy of "Facts and Faces." That will surely convince you that our claims are valid.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Origin of Jekyll and Hyde.

Charles H. E. Brookfield says he was in Robert Louis Stevenson's company at the moment when the germ of the idea of "Dr. Jekyll and Mr. Hyde" was conceived. Stevenson was inveighing against a man with whom he had done business and with whose methods he was dissatisfied. The man's name was Samuel Creggan or something like it. "He is a man who trades on the Samuel," Stevenson declared in his rather finicky, musical Scot's voice. "He receives you with Samuel's smile on his face; with the gesture of Samuel he invites you into a chair; with Samuel's eyes cast down in self-depreciation he tells you how well satisfied his clients have always been with his dealings; but every now and then you catch a glimpse of the Creggan peeping out like a white ferret. Creggan's the real man; Samuel's only superficial."

A Remarkable New Grain.

A new grain, known as corn-wheat, is being grown in Eastern Washington. It has the nature of both corn and wheat, possessing the fattening qualities of corn and the corn flavor. In appearance it resembles wheat. Its grains are twice as large as those of ordinary wheat. It yields sixty to 100 bushels an acre, and seems to solve the problem of fattening hogs in the Pacific Northwest, as corn is not successfully raised in that country.

A Painful Marriage Custom.

The penalty among the Hottentots for widows who marry again is a somewhat severe one. It is the rule among these people that, before so marrying, a widow must cut off the joint of a finger and present it to her new husband on the wedding day.

SEWER FOR BOROUGH?

(*Continued from first Page.*)

leta contract for $40 more. He then offered the following resolution:

"*Resolved.* That it is the sense of this meeting that an efficient system of sewerage shall be installed here as soon as the best method can be determined."

Mr. Howland said he would join the citizens in any movement for a system of sewerage, but that at the same time he agreed with ex-Mayor Gilbert, of Plainfield in that no immediate necessity existed.

W. J. Buttfield thought the report of the commission did not cover the ground inasmuch as the systems examined by them were in the nature of experiments. He agreed with others that tidewater was the best system, and inquired if Plainfield had been approached to see if it were possible for the Borough to connect with the sewer there, to which Mr. Hegeman, the chairman, replied, no; that it was their idea to first ascertain if the people really wanted a sewerage system, and if so, to then look up the best system and to avoid the expensive experiments that Plainfield had passed through.

C. A. Reed said that he had two cesspools which were dug 12 years ago which had never gotten full, but he knew others not so fortunate. He presented some figures of property owned by his partner, wherein it was shown that it was actually cheaper for a sewer connection than to keep cess pools cleaned.

W. C. Smith related his experience with cess pools, which was anything but satisfactory. He claimed that they were successful in some locations and failures in others.

John R. Goodwin was satisfied with a cess pool and thought it unwise to saddle any more debt on the borough. Though the servants were responsible in a great measure for the filling up of cess pools by allowing the water to run to waste from the pipes.

Dr. J. H. Cooley stated that his experience with cess pools was that it did not pay to have them cleaned out, but rather to install overflows about fifteen feet away.

Dr. Carroll thought the resolution proposed by Mr. Sanders was too far reaching in its character, and advocated a simple resolution to the effect that a sewer was needed, leaving the details for a future meeting. Mr. Saunders agreed to this and the resolution was amended as follows:

"RESOLVED. That it is the sense of this meeting that an efficient sewerage system is desired."

This resolution was then passed without a dissenting voice.

Trying to Close Draw Bridges.

The Merchants' Association, of New York, has started a crusade against the delays caused to the commuters from the residential sections of New Jersey, owing to the opening of the drawbridges, over Newark Bay, and the Passaic and Hackensack Rivers during the rush hours morning and evening, which are a source of great annoyance and a loss of time and consequently of money, to thousands of people residing in the State who do business in New York. While these people have their places of business or employment in New York City, a large proportion of them live in New Jersey, spend their money there, and pay taxes in that State. These delays also cause a great loss of time, and consequently of money, to the employers in this city. In view of the relative character of the traffic on the river, the Association has made application to the War Department for the closing of the drawbridges during the rush hours morning and evening. As a result of the application, the War Department has appointed a special Board of Engineers, which will meet at the Army Bldg., New York City, on Wednesday.

The session opened with the reading of a carefully prepared argument by S. Christy Meade, assistant secretary of the Merchants' Association. The gist of the argument was to the effect that the proposed closing of the draws was a matter of great importance, as the volume of business coming into New York over the various railroads was very large, and about 100,000 passengers were carried daily on these railroads, which required 462 trains to accommodate the traffic. Fifty per cent. of this traffic, the Association contended, was between the hours of 7.30 and 9.30 o'clock in the morning, and 5.30 and 7.30 in the evening.

Somerset County Courts.

The civil cases were concluded Wednesday, and the jurors dismissed until May 11, at which date the criminal cases will begin.

The following cases were disposed of:

J. E. Hillpot vs. Delaware River Quarry and Construction Co. Verdict for plaintiff, who was awarded $980.

Guiseppe Vene, vs. Somerset M'f'g. Co., of $250 for plaintiff.

D. J. Galbraith vs. Dr. Chas. Moldenke, referred to James J. Bergen for settlement.

Four cases against Theodosia E. Carman, all of which were for goods purchased. Verdicts in each case against defendant for full amounts sued for.

Joseph Erner, indicted for the murder of John Driff at Bound Brook, plead not guilty. His trial will begin on May 12. Nelson Y. Dungan was appointed to defend.

The following prisoners were arraigned and all pleaded not guilty:

William Wolf, who is charged with re

ceiving s[illegible] gave $200 bail to appear May 11.

William Ralph, breaking and entering with intent to steal, was bailed in $200 for May 11.

John [illegible] grand larceny, $200 bail each.

William Kennedy, breaking with intent, to be tried May 11.

Samuel S. Johnson, rape, to appear for trial May 12.

James Conboy, assault and battery, gave $100 bail and will be tried May 11.

James A. Little, assault and battery, will be tried May 11. Daniel H. Beekman was assigned as his counsel.

William Brown, malicious mischief, was held in $100 bail for trial on May 11.

Rosie Magino, for receiving stolen goods, was bound in $100 for appearance May 11.

Tony Louies, receiving stolen goods, gave $100 bail until May 11.

Tilly Gabriel, larceny, will be tried May 12. A. M. Beekman was assigned to defend her.

The Olcott will case was argued before Judge Scheuck on Friday. Decision was reserved.

$50,000 in the Bank.

Forty Thousand Dollars has been set aside and deposited in a Savings Bank to be paid to successful contestants in the Greatest Prize Contest ever offered by a reliable concern.

What one State in the U. S. touches the greatest number of States? If you can answer this question you will receive the full particulars of which will repay you many times over for a little trouble on our part. Enclose with your answer five cents silver to cover cost of this free publication and particulars. You will receive immediately reply also beautiful Genuine Austrian Pearl Scarf Pin free. Send your answer to-day, remember every one has an equal opportunity; distance makes no difference. Address, Illustrated American, Dept. G 114 Fifth Avenue, New York.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

Lewis Sipes, of Frieslburg, celebrated his 43d birthday anniversary Saturday. His mother and a pair of twins were present. Lewis was born [illegible]

Edgar, the year-old son of Edmore Duffield, of Bridgeton, saved a six year old boy named Fagan from drowning. Fagan fell overboard from a skiff, and as he came to the surface young Duffield grabbed him and held the boy until help arrived. Fagan's father gave young Duffield $5 for his heroism.

As a result of the gallantry of a rooster, Enfield S. Gale, of Mount Holly, now walks with his left hand bandaged. Mr. Gale is a well known poultry farmer, was attempting to separate two hens who had the head of the flock come to the rescue and inflicted a painful wound in Mr. Gale's hand with his spur.

The Cradle City Council of Trenton has passed an ordinance to the big celebration of the anniversary of the battle of Monmouth to be held at Freehold on June 27. They want to parade with the national guard of this state and the invitation will be tendered by the committee. It is expected that this will be the biggest celebration of its kind held in this state for some time.

The New Jersey Weather Bureau which has been located at New Brunswick for fifteen years will be transferred to Atlantic City. The change is partly due to the fire which destroyed the New Jersey Experimental Station in that city in which the weather bureau was located. The reports for the State will be sent out from Atlantic City, and there will be only a local agent there.

The New York Audit Company has been engaged to examine the Cranford Township accounts and straighten out the muddled books. The committeemen are unable to tell just how much money they have to spend. The clerk's books balance, but are at variance with the annual report. A new set of books has been purchased, and a fresh start will be taken when matters are cleared up.

Watson F. Henry, of Johnsonburg, has in his possession a $1.25 bank note that was issued by the Belvidere National Bank on October 1, 1862. It bears the names of John I. Blair as president, and I. Harris, cashier. Mr. Henry received it from Mrs Julia Crockett as compensation for shearing a flock of sheep, and at his death the bill is to go to his son, S. V. Henry, of Newark. The note is in a good state of preservation.

District Court Clerk George S. Bogart, of Bayonne, is still house hunting desperately. He has a wife, seven children and a dog, and no owner or agent will rent him a dwelling. Last week a woman with nine children obtained a house by a ruse. She had tried for a week, but the agents all refused when she told how many children she had. She had a friend take her children to a cemetery, and then called on a real estate agent. When he asked the fatal question she said: "I am the mother of nine, but they are all in the cemetery now." The agent expressed sorrow, and gave her a year's lease.

Peril in Dirty Money.

It has long been a crime against the sanitary welfare of this country that the government should tolerate the circulation of so much paper money that is utterly vile in its filthiness. Every day one is compelled to handle dirty bills that one would not touch under any circumstances. Lately there appears to have been a great deal of this nasty stuff in circulation, and that it transmits fatal diseases from one person to another cannot for an instant be doubted. In fact, smallpox was introduced into a thriving western town through this means, the first victim being the cashier of a bank. The sacrifice of several lives followed. Many deaths have been traced to contaminated money. But we never hear a protest from the national health department.—Rochester Herald.

Singular Plurals.

A correspondent who keeps a watchful eye on our columns wants to know what are the correct plurals of "mongoose" and "phoenix." One is tempted to write "mongeese" as one is tempted to write "Musselmen," though neither man nor goose has any claim to consideration in these words. "Mongoose" is quite a fancy spelling, and you may spell it "mungous" or "mongous" or "mungoos," as you will. Therefore, we think "mongoose" is quite plural enough to cover all the specimens that are likely to come up for christening. As to the phoenix—its case may be dismissed with the swiftness of a police court magistrate. There is never more than one on the active list at the same time, so the phoenix does not require a plural at all.—London Chronicle.

A Cash Time-Register.

She—Didn't our honeymoon pass quickly, dearest?

He—Well, I should say it did! Why, it seemed no time before I had spent all the money I had.—Harper's Bazar.

Calendars Distributed.

Forty millions of calendars are gratuitously distributed in the United States during the first month of every year.—Albany Argus.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address. Rev. EDWARD A. WILSON, Brooklyn, N. Y.

25,000 NEW WORDS

are added in the last edition of Webster's International Dictionary. The International is kept always abreast of the times. It takes constant work, expensive work and worry, but it is the only way to keep the dictionary the

has opened

A First-Class House Furnishing Goods Store at 23 SOMERSET ST, PLAINFIELD, (near Front Street)

Everything for furnishing a house for comfort, ease, and appearance, sold on Monthly or Weekly Payments. Discount for Cash. Orders by mail promptly attended to.

Pianos, Phonographs and Records a Specialty.

SPECIAL ANNOUNCEMENT.

As an inducement to Cash Purchasers for the next 20 days we shall give Absolutely FREE your choice of a handsome present:

A HANDSOME AXMINSTER RUG with every purchase of $5.00 or over.

A HANDSOME HASSOCK with every purchase of $10.00 or over.

A HANDSOME AXMINSTER RUG, (16 x 34) with a $30.00 purchase.

All goods delivered free of charge.

A LIBERAL OFFER

As an Inducement to secure New Subscribers, and for Old Subscribers to pay up, we will, until MAY 10th, 1903, give each subscriber to the REVIEW, absolutely Free, a year's subscription to the Tribune Farmer; or the REVIEW and the Tri-Weekly Tribune for the single price of that paper.

Read Our Combination Offers Below.

Most Liberal Offer Of The Year

The New York Tribune Farmer

is a national illustrated agricultural weekly for farmers and their families, and stands at the head of the agricultural press. It is a practical paper for practical farmers, helping them to secure the largest possible profit from the farm through practical methods.

It is entertaining, instructive and practically useful to the farmer's wife, sons and daughters, whose interests it covers in an attractive manner.

The regular price is $1.00 per year, but for a limited time we will receive your subscription for THE NEW YORK TRIBUNE FARMER and also for the REVIEW, Plainfield, N. J.,

Both Papers One Year for only $1.00

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRIBUNE FARMER, New York City, will bring you free sample copy.

Almost As Good as Daily Newspaper

THE NEW YORK Tri-weekly Tribune

is a metropolitan newspaper for busy people, almost as good as a daily.

It is published on Mondays, Wednesdays and Fridays, and contains all the most important news of The Daily Tribune, which is a guarantee of its value.

If you live in the borough or on a farm and have not time for a daily newspaper you may be kept in close touch with all important news of the world at a very low cost.

The regular price of THE NEW YORK TRI WEEKLY TRIBUNE is only $1.50 per year, but you can secure it with the REVIEW, Plainfield, N. J.,

Both Papers One Year for $1.50.

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRI-WEEKLY TRIBUNE, New York City, will bring you a free sample copy.

Remember, this offer holds good only until May 10, 1903, after that date the price will be raised.

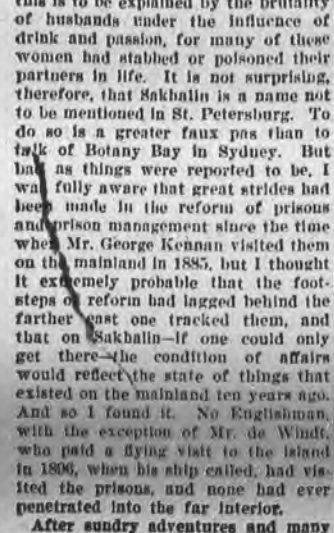
The author is one of the only two or three Englishmen who have ever visited the Russian prison-island of Sakhalin, which numbers no fewer than eight thousand murderers among its small population! Mr. Hawes paints a most impressive picture of the terrible life led by convicts in this grim land of despair and desolation.

OF all the penal settlements in Siberia the Island of Sakhalin has the worst reputation. This is not surprising when we remember its great distance from the central administration and that it is the prison-island to which all the worst criminals are sent. There are probably not a dozen free-born individuals outside of the convicts, ex-convicts, their wives and children, and the officials and native tribes. On January 1, 1898, there were on the island 22,167 convicts and ex-convicts. Of these 7080 were engaged in hard labor, and of this number alone no fewer than 2836 were convicted of murder, so that out of the total number of convicts and ex-convicts a moderate estimate would give 8000 as murderers!

Of the 2836 murderers the large proportion of 634 were women. Perhaps this is to be explained by the brutality of husbands under the influence of drink and passion, for many of these women had stabbed or poisoned their partners in life. It is not surprising, therefore, that Sakhalin is a name not to be mentioned in St. Petersburg. To do so is a greater faux pas than to talk of Botany Bay in Sydney. But bad as things were reported to be, I was fully aware that great strides had been made in the reform of prisons and prison management since the time when Mr. George Kennan visited them on the mainland in 1885, but I thought it extremely probable that the footsteps of reform had lagged behind the farther east one tracked them, and that on Sakhalin—if one could only get there—the condition of affairs would reflect the state of things that existed on the mainland ten years ago. And so I found it. No Englishman, with the exception of Mr. de Windt, who paid a flying visit to the island in 1896, when his ship called, had visited the prisons, and none had ever penetrated into the far interior.

After sundry adventures and many difficulties overcome, I succeeded in getting away from Nikolaevsk, which is situated on the mainland, near the mouth of the River Amur, to the island. At the very last moment I was pacing the deck of a tramp steamer which stood in about two miles from the shore, and the captain was signalling again and again. He despaired of being able to land me, though he good-naturedly delayed, and at length a tiny tug, used for dragging lighters loaded with convicts, put out, and to my surprise I was allowed to board it; but no sooner had I ascended the steps of the wooden jetty than a military officer stepped forward and demanded my business. To him I made reply in the scantiest of Russian that I had a letter of introduction to an ex-convict merchant. His was a strange and sad story, for in early days he had been heir to large estates, through which the traveler from Berlin to St. Petersburg passes. The only answer I received was that the ex-convict merchant was now at the coal mines and would not return for another twenty-four hours, and that I must remain there in custody. I looked around the log-built room and thought I had slept in much worse places than that; then I went to the door, but was stopped by a sentry, of whom, however, I demanded my baggage. From the window I could see my ship preparing to leave, and in this lay my great hope; for although the authorities might lock me up they would not be able to send me away for some time.

Here I was a prisoner, but how enviable was my lot to that of those who had to spend the remainder of their lives on the island. As I stood looking out to sea the sun was setting behind a fiery-red cloud-bank. To me it pictured the passionate longing of those exiles whose eyes were straining ever westward to the land of the sunset, to the homestead, the land of friends and loved ones, so long ago left behind.



THREE LONG-SENTENCE CONVICTS.

Some weeks later I shared the log-house of a petty official engaged on the jetty, and so was able to wend my way to the place of my late detention to watch the batches of convicts arriving. One lot from Siberia had tramped the two thousand and seventy-five miles from Nertchensk to Nikolaevsk, with an occasional lift from a steamer, and the journey had occupied them three months.

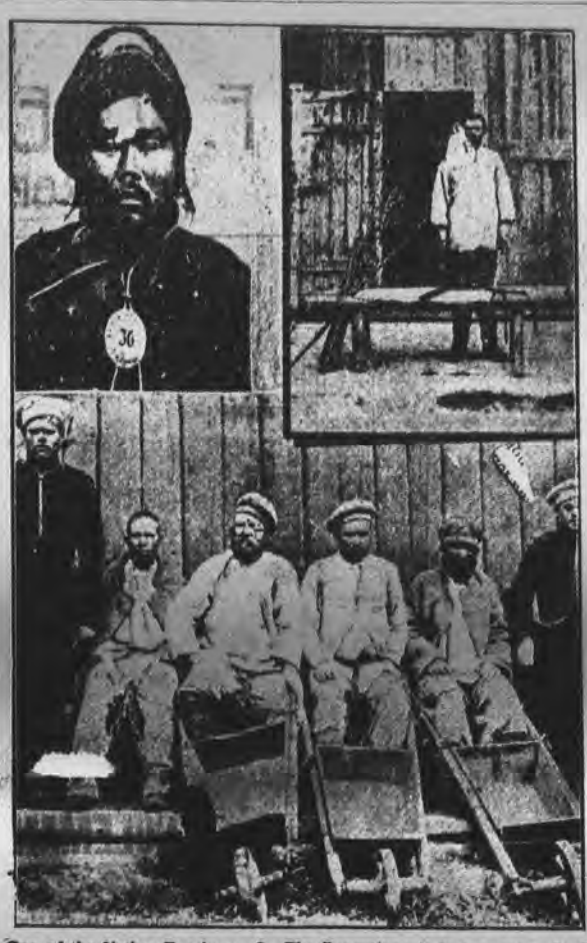
I know what it is to have had to struggle for a bare bench in a fourth-class Russian railway carriage whereon to sit and try to sleep at night, and this was my home for a couple of weeks through a frozen country. But what was this to the lot of those poor convicts who, hungry and weary after a long day's march, failed in the wild scramble to obtain one of the miserable plank resting-places allotted them, and had to lie on the filthy floor. Even there a stronger neighbor often crushed them, for the most brutal tongue, the hardest fist, got the best place, and the timid and weak went to the wall—or the floor. Such is the description we have heard in the past. Is it true to-day? In the main—no; but in my experience—yes!

Russian convicts are dressed in unbleached cotton shirts and trousers, with socks—or pieces of cloth wound around their legs, puttee fashion—and shoes. Over all they wear the "khalat," or long, ulster-like frieze. All are in chains. One degrading form of punishment, that of chaining the convict to a wheelbarrow, which is never detached either by day or night, has been abolished on the mainland; but on Sakhalin to-day there are still two men who are undergoing this miserable punishment.

This form of punishment, the officials say, is necessary to keep them from escaping. The clean shaving of half the head is also intended to render escape more difficult and identification easier.

Only one hundred out of the six hundred convicts in the worst prison were being sent out to do hard labor in the mines or road-making; it was not surprising, therefore, that the dreadful ennui drove some of the remainder into risking attempts at flight. The night to choose for an escape was when a storm was raging. It was on one such night of my stay that six in the Alexandrovsk Testing Prison, under cover of the darkness and the howling storm, lassoed the tops of the twenty-foot stockade and, clambering over, dropped down and successfully evaded the patrols. The storm that night did us as good a turn as it did the convicts, for returning from a seven hundred mile journey, mostly accomplished in a dug-out canoe, we (my interpreter and I) had entered on our last stage which took us through the forest into which these six convicts had plunged. There were two roads before us, one traversing the forest and the other being merely the sandy beach. The latter was impassable at high tide, and had this advantage, that one had only to defend oneself from human—or, rather, inhuman—assailants on one side. An ex-convict who had given us hospitality begged us not to take this forest road. Now, of course, there is freemasonry among the convicts and ex-convicts, and while he told us that they were armed with guns more particulars he would not divulge. Seeing us still unpersuaded he backed up his statement by telling us how the post, which I have seen leaving Alexandrovsk, twelve miles distant, carrying beside the driver one armed official and two soldiers with bayonets fixed, was held up on this road, a few miles out of Alexandrovsk. So we determined to take our chances of the rising tide and try the beach route, though we had just heard that the youth who lived with us at Alexandrovsk had been murdered on the sands for the sake of the gun he carried.

We started in darkness with no lantern, for that would have rendered us a mark, and the wretched telega moved along at a snail's pace. We sat back to back, revolvers and daggers handy in our belts and loaded rifles in hand. We had instructions from the police to fire if we should see any moving form. Little, indeed, could we make out—though we could imagine a great deal—as we peered into the dark forest on our way to the beach. We had dragged on at this miserable pace for about a mile and a half, longing for a troika with its galloping steeds, when suddenly the storm burst upon us. To keep our guns dry and be ready for an attack was impossible, and I confess I was not sorry to be compelled to take refuge in the hut of a convict, which the howling of dogs announced to be near by.



1. One of the Native Trackers. 2. The Executioner's Instruments. 3. Convicts Chained to Wheelbarrows.

It is almost impossible for these "brodyagas" (passportless vagabonds) to get away from the island. From the prison they escape into the forests, and there in summer they manage to exist on bilberries, cranberries, mushrooms and roots, and add to the little given them by comrades, whose sentences have expired, by waylaying passers-by. But when winter comes on, with its seven feet of snow and a temperature occasionally touching forty degrees (Fahr.) below zero, with no food to be obtained and rags for clothing, they find their way back to the prison. After giving themselves up here they are flogged with the cruel "piet," and received back again with an additional sentence.

The photograph shows the instruments of the executioner—the "kobila," or bench, on which the convict is strapped; the birch-rods, which are dipped in hot brine, and the heavy, three-thonged "piet," with leaded ends. These are the instruments in use at Ilkovsk Prison.

Another photograph shows the public executioner at Alexandrovsk, Golinsky by name. The "palatch," or executioner, is chosen from among the convicts themselves. Prisoners who are refractory in prison are birched, but sometimes this punishment is given for no other reason than that the chief of the prison, of whom it would be difficult to say anything too bad, happens to be in a fit of ill-humor when they go before him to prefer some simple request. My own interpreter, himself a man of rank, told me that in common with all the rest of the convicts and political exiles he paid tribute money in the shape of food to the executioner, so that, should he be ordered the "piet," the leads should be brought down on the underside of the board and not on his bare body. Corporal punishment for women has been done away with by law in Russia, but in February of last year two women were flogged with birch-rods dipped in brine, and afterwards put in chains for refusing to obey their villainous overseers.—World Wide Magazine.

GOLINSKY, THE EXECUTIONER, WITH THE TERRIBLE "PIET."

MURDER CROSSES.

Gruesome Memorials That Dot New Mexican Plains.

It is one of the charms of travel in the out-of-the-way districts of the United States to encounter picturesque customs undreamt of in the philosophy of the well-populated regions tributary to the great cities of the North and East. Particularly rich in these quaint ways is the Southwestern country, of which New Mexico is the geographical centre and which draws its traditions from old Spain.

Among the peculiar customs of that territory is the practice of planting crosses on spots where murders have been committed. Not infrequently, as one rides across some lonely plain bare of vegetation save for the ubiquitous sagebush and greasewood, or through some wild pass in the hills made wilder still by the desolate ruins of an abandoned adobe hut or two amid the cactus. Such crosses are met with rising out of small piles of stones. They are constructed of wood, without inscription of any sort, and often being taken to the church by the relatives and friends of the murdered man and blessed by the priest, are set up upon the scene of the murder, there to remain a continuing memorial of the unholy deed and a mute appeal to all pious passers-by to contribute a prayer for the unshriven soul that has gone beyond.

You can't liquidate a debt by paying compliments.

CITY KITCHEN IN CHRISTIANIA.

One of the best municipal institutions in Norway is no doubt the city kitchen in Christiania, opened last year. During the last six months of 1902 no less than 1,624,240 meals were served to the poor, while 76,000 meals were sold at six cents a meal. The building is throughout fitted with the latest inventions and most up-to-date machinery, including a dish-washing machine, laundry machinery, etc. Our cut shows one of the large kitchen rooms where eight boilers are installed for the supply of heat and hot water.

A SERMON FOR SUNDAY

AN UPLIFTING AND ELOQUENT DISCOURSE ENTITLED "FAITH."

The Rev. Roderick Terry Shows the Necessity of Establishing a True Spiritual Life on a Proper Foundation—Why We Have Hope Unto an Eternal Life.

NEW YORK CITY.—Dr. Roderick Terry, pastor of the South Reformed Church, Madison avenue, preached Sunday morning on "Faith." His text was chosen from Jude 20 and 21: "But ye, beloved, building up yourselves on your most holy faith, praying in the Holy Ghost, keep yourselves in the love of God, looking for the mercy of our Lord Jesus Christ unto eternal life." Dr. Terry said:

We have no information concerning this short Epistle of Jude beyond that which is contained in the verses themselves. We know not who he was, nor where he lived, nor to whom he wrote, nor the circumstances calling for the writing of the Epistle further than the information we gain regarding some of these facts from its contents. And inasmuch as this, as well as the whole of the revelation, though written originally for certain people at a certain time, was intended to be universal in its scope, and was applicable to people of all times, it is not of so much importance to us to know precisely for whom the words were first intended, as to ascertain their applicability to the different periods of the church's history, and especially to the time in which we live. It is written, as Jude says, as a warning to Christians; that they should "earnestly contend for the faith which was once delivered unto the Saints." These words imply first, the importance of guarding this faith once delivered to the Saints, and in the second place, that there were dangers lest this faith might be lost. In regard to the first of these, however needful at that time, or at any succeeding time in the church's history such a warning may have been, it can never have come with greater force than it should come to Christ's people to-day. The necessity of contending for the faith, "delivered once for all to the Saints," is, in the present state of religious opinion, something which needs to be repeatedly insisted upon. By faith is meant here, not that quality or grace which the Christian possesses which typifies his feeling toward God; it has reference rather to that which is believed in; which St. Paul calls "The Faith of the Gospel." "The faith which is in Christ Jesus," and which is used universally by the sacred writers as synonymous with the teaching which God gives concerning Himself. "This faith," says Jude, "was once for all delivered unto the Saints," and he exhorts Christians that they should earnestly contend for it. When this faith was delivered unto the saints, and under what circumstances, we are well aware; it included the revelation which God made of Himself through all history, and His relation with His chosen people; it included the life and the work of the Master, and the influence which He shed upon His disciples; it included the work and the teachings of His followers; it was, in fact, the revelation of God recorded through all the Scriptures. Jude insists upon the necessity that every one who is a child of God should contend for this faith as thus by revelation and miracle once for all delivered unto the Saints.

The writer of the epistle makes no secret of the reason why he found it necessary to insist upon the importance of thus guarding the faith as given to us by God, for the dangers which menaced it were two fold; in the first place they sprang from the natural tendency of men to seek to reason out for themselves all matters of faith or belief, as they would reason out questions of history or of science. These men, puffed up with their own supposed knowledge, were unwilling to abide by the clear and simple words of Scripture which came from God, and not only interpreted them according to their own judgment, but even replaced them with ideas of their own. The writer has little to say to these men, whom he describes as those whose "mouths speak swelling words," as though the words came not from any deep thought, but he shows conclusively that they were as conspicuous in the church then as they are to-day. There is nothing harder for the natural man than to acknowledge and live up to the acknowledgment of his ignorance; there is no subject of thought or discussion—whether connected with the life in this world or in the world to come—which men will not seek to handle with the tools of their own mental equipment, and therefore men are always jealous when the Bible declares that there are some things which they cannot understand, but that in regard to those very things they must have faith; so that the first class of dangers to the maintenance of its true position on the part of faith in human intellectual life, springs from mental conceit, from the unwillingness of men to believe that which seems inconsistent with, or above their own reasoning.

When this epistle was written this class of enemies to the faith, in that contention against it which is always being waged, were not very conspicuous nor influential in the church, but to-day there is more danger to the purity and the simplicity of the Christian faith from them than from any other of its enemies, and it becomes the adherents of the cause of Christ to be strong and unyielding in their opposition to the modern tendency; to elevate human individual opinion as over against the revealed will of God. When God says: "The soul that sinneth, it shall die," and some man rises in opposition and declares that "all good and bad shall finally inherit everlasting life," it is time for the servant of God to take a firm position in support of the revealed will of the Lord and to contend for the "faith once delivered to the Saints." When men declare that this very Bible, which contains God's revelation to men, is a somewhat uncertain guide to belief, an unreliable anchor to hope, and proceed to tear it to pieces and to rob it of its supreme strength in its hold upon the consciences and minds of men, it is time for the servant of Christ to announce with emphasis his belief that it is the revealed will of God, and that of all His revelation there shall fail not one jot or tittle, and that a curse shall come upon him who taketh away from or addeth unto the words which God hath given for our comfort and our guidance. Surely there is need to-day, more than ever in the past, that in regard to all of God's teachings, in regard to the word of God's revelation, in regard to the plan of salvation, in regard to our hope of heaven, even to our belief upon God Himself, the Christian should stand firm, and should contend, with courage and with zeal, in his own heart and in the world for the faith as it is in Jesus.

For that faith is also in danger of being undermined by the human characteristics universally found among men which make them unwilling to accept of and to live up to its moral and ethical teachings. The standard of morality in the world being much lower than that taught in the Scriptures, all men are apt to suffer their ideas to drift lower and lower in sympathy with the ideas of the world. In the first place this result occurs to-day, as in the time of the writing of the epistle, from the creeping into the church of certain men who are themselves ungodly "filthy dreamers, defiling the flesh, despising dominion, speaking evil of dignities," criticising those things which they know not, who in the time of the writing of this epistle had become so conspicuous in the church life of the time that they were called "raging waves of the sea, foaming out their own shame, murmurers, complainers, having men's persons in admiration because of advantage." It is a blessed thought that to-day such persons are not conspicuous in the church, for this is an age of honesty, an age of the denouncing of all duplicity, an age, when Pharisees and hypocrites once brought to the light, are abhorrent to all classes of men, but while not openly conspicuous as members of the church of Christ, such emissaries of Satan are still at work in the world, and their influence is felt in a subtle fashion influencing the hearts of men against pure and holy living.

In very striking terms Jude calls attention to instances in history where God showed His abhorrence of unfaithfulness in mind, heart or action upon the part of those who were His professed followers. He refers to the large number of the children of Israel, who, having been delivered from Egypt, for their lack of faith were destroyed in the wilderness. He reminds them of Sodom and Gomorrha; of Cain, of Balaam and of Core, in order that they may be persuaded of the high value which God sets upon adherence and obedience to the faith which He has given to men; for the point of the whole epistle lies in the contrast between those who thus neglected their privilege and duties as children of God—who, knowing the right, yet pursued evil—who professing love to God practically ignored Him in their lives, and those who not only in outward profession, but in inward service, sought to live as became the children of faith: "Building up themselves on their most holy faith, praying in the Holy Ghost, and thus keeping themselves in the love of God, looking for the mercy of our Lord Jesus Christ unto eternal life." Of the number of these he prays, "may be those to whom he writes," hoping that they will see the present misery and the sure future punishment associated with the course of wickedness and neglect of faith, and on the other hand, blessedness now and hereafter of those who are not only in name, but in deed and in truth, the children of God, and in order that those who read, and that all of every time who hear this epistle may know how to avoid the dangers against which he warns them, and to persevere in their service for God and for the right, he gives them these two verses explaining the principles and the method of progress of the servant of God; giving to them what has been called "The Law of Christian Safety," that they should keep themselves in the love of God, and explaining how that may be done.

To this end he insists, first, upon the necessity of establishing a true spiritual life on a proper foundation: "Building up yourself on your most holy faith." As in the beginning of the epistle, so here, the faith, the teaching, the revelation of God is given as the foundation upon which alone true religious life is to be built. There is no establishing of spiritual growth upon a merely ethical foundation; there is no erecting a fabric of true religious character upon the teachings of men, and as for the church itself Jesus Christ must needs be the true corner stone, so of all religious ideas, the revelation of God must furnish the base. As the foundation of a building is essential not only to the solidity of that which is erected upon it, but also furnishes the lines and dimensions according to which it is to be built, so unless there is at the basis or foundation of all religious life some revelation or some truth broad enough for an ideal and strong enough to sustain the whole building, there can be no security and no assurance that the character will stand. He who seeks to direct his course in life according to the teachings of men's wisdom, or the dictates of human conscience uninstructed by God, is sure to find his character like unto a ship; tossed about by the waves and driven by contrary gales, for human judgment and human ideas of right and wrong are as valuable as are the winds of heaven. There must be an ultimate and universal standard of right according to which we may direct our moral lives, or we can never be sure that we are not going wrong. Such an ultimate and satisfactory standard must be given by one whose knowledge is infinite as compared with that of man, and such a standard has been given in the revelation of God. It is therefore not unreasonable nor unnecessary that the Bible should insist upon this revelation as being the foundation upon which we are to build our characters. Nor can we fail to notice the use of the word "building" here, as applying to our relation to the revelation of God. Day by day and year by year the Christian is erecting a structure either of righteousness or of unrighteousness. According to the general desire and tenor of the life is the general character of the building. On the whole, every man is moving onward either toward holiness or toward wickedness, either advancing or retrograding in his moral nature. As long as we live in this world we shall continue in a state of change. We never shall lay down our armor nor have our work finished until we cease to draw the breath of life. It is natural to believe that some, after many years of careful labor in the erection of true Christian characters, have suddenly turned and in a short time destroyed the result of years of effort; there is danger to every one lest by failing to continually build up his character in righteousness, in the true faith, he should be taking away from that which he has already builded. There is no period of rest, there is no goal attained, there is no definite eternal reward until we reach that other world. "Building" is the word used, of our daily Christian lives. Let us see to it that every stone placed in the building of our characters is one formed upon the model of the life and deeds of Jesus Christ, and is a strength to the whole edifice.

The second duty insisted upon by Jude, if the Christian would keep himself guarded from the dangers which beset him, is expressed by the words "praying in the Holy Ghost." Now we are well aware that there is no prayer except in the Holy Spirit; that is to say, no prayer except such as is in harmony with the Spirit of God, and so sincere that that Spirit will join to it his utterance and intercessions, with groanings which can not be uttered, and he must needs be persuaded that the Holy Spirit which descended at Pentecost is still active in the church. It needs no enormous faith, no long experience to pray in the Holy Ghost, but it requires sincerity, a meaning and a feeling in the prayer, and a determination that the expression of the desire made in the prayer shall be followed by fitting action.

The third and fourth conditions requisite to growth in spiritual life referred to in the text, while not less important than those already discussed, need only to be mentioned, for their necessity is clearly apparent: "Keep yourselves in the love of God, looking for the mercy of our Lord Jesus Christ unto eternal life," living in such a way that God's love to us shall both grow and be continually more apparent, and a stronger factor in our spiritual life is something eminently necessary, if we would live as His children. Were it not for the supreme and infinite love of God we should have no hope either for this world or for the world to come, and the more deeply we appreciate that love, and the more strongly we cling to it, the more confident may we be of our own future, and the more will we be led to give unto Him in return that love which He seeks from us. And not less certain is it that only through the expectation of the mercy of our Lord Jesus Christ can we have hope unto eternal life, as it is the only hope which can sustain us in the time of our weakness, of our sin, of our despair. According as our confidence in the truth of the Gospel grows, and our assurance of the love which Christ has for each of us, shall be our ability to stand in the evil days of this life and to persevere in our pursuit after holiness. This is the divine word of God; it is His message to us, and may He grant us grace so to "build up ourselves in our most holy faith, praying in the Holy Ghost, keeping ourselves in the love of God, looking for the mercy of our Lord Jesus Christ unto eternal life" that we may be guarded from the evils into which so many are falling about us in the world, the evils of doubt, of carelessness, of immorality, so that we shall be saved, as it were, brands from the burning and kept by Him that is able to keep us from falling, and "presented by Him faultless before the presence of His glory with exceeding joy."

The fellow who is run over by an automobile is apt to have that tired feeling.

North Plainfield Weekly Review

ISSUED EVERY SATURDAY BY
HARRY H. WEBB
AT NORTH PLAINFIELD, N. J.
33 Somerset St. Telephone 217

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, MAY 9, 1903.

IS CLEVELAND A CANDIDATE?

A few Democratic newspapers have recently come out for Grover Cleveland as the Democratic candidrte for President in 1904.

One of the most ardent promoters of the New Jersey candidate is the Brooklyn *Eagle*, which says that the "Princeton gentleman is the only man who can assuredly lead the party to victory, and that the alternative for that party is either Cleveland, or only a nominal opposition to the election of Mr. Roosevelt."

As to the matter of a platform the Eagle says the nomination of Cleveland "would end all quibbles about recent or future platforms. He would be the platform. His career and character would be the guaranty of the restoration of repose, of strength, of consistency, of dignity, of wisdom and of trained experience to the chief magistry. The dangerous tendencies of plutocracy on the one hand and of proletiariatism on the other would be stopped by the very fact of his presidency. To the Democratic party his nomination would mean rejuvenation and to the country at large reassurance."

The greatest opposition to Mr. Cleveland would come from the West, and that portion of the United States must surely be reckoned with if success is to be attained. It will be remembered that Cleveland and his friends refused to support Bryan in the last two Presidential campaigns, and that element will not support Cleveland; and were he nominated there would be a bolt, and the Bryan element would no doubt put up another ticket.

There is still another objection to Mr. Cleveland's candidacy: The people are unhesitatingly opposed to a third term under any and all circumstances, and this fact alone would influence thousands to vote against him.

In commenting on Mr. Cleveland's possible candidacy, the *Mail and Express* says:

"He enjoys the unusual distinction of seeming stronger with the people when out of power and responsibility than when clothed with those attributes of popular confidence. He was weak in 1888, after his first term; and weaker in 1896, after his second term. Those who regard him as strong today ignore the fact that he holds that position in the national mind where forgetfulness of the past is regarded as a duty to the one living man who has passed the goal of every American's highest ambition, and who is therefore presumed to look out upon his country and its interests from a place that harbors neither the conflict of individual ambition nor the prejudice of partizan creed. Mr. Cleveland with Presidencies and Presidencial candidacies forever behind him is one man; Mr. Cleveland with Presidencies and Presidential condidacies still in his mind and view is quite another. All hats are off to the former. If the country has to express its opinion of the latter through the ballot box, those who force it will invite the most humiliating experience that any ex-President of our country ever suffered."

TO CLOSE THE DRAW BRIDGES.

The Merchants' Association of New York is doing some excellent work in the endeavor to have the railroad drawbridges closed during the hours when New Jersey commuters are on their way to and from New York.

Thousands of men and women who go to New York and whose business interests involve millions of dollars, are subjected to annoying delays, and railroads have their schedules thrown out of gear which are not resumed for hours by some sail boat or steam tug which could just as well as not avoid the rush hours.

It would seem that these arguments should and did prevail at the recent meeting held at the Army Building, and that the Government will surely take some action to relieve the annoyance referred to.

MUNICIPAL OWNERSHIP AT SUMMIT.

After months of investigation the citizens of Summit, at a public meeting, recommended the puchase of the water plant now owned and operated there by the Essex-Union Water and Light Company. The question of municipal ownership of water plants has been decided in the affirmative so many times that it may scarcely be said to remain an open question.

If we mistake not the Borough of North Plainfield has a committee in existence charged with investigating the feasibility of a municipal plant for this Borough, but we do not hear much of it lately.

NEW JERSEY HIGH SCHOOLS.

According to a recent report issued by the State Board of Education, for each pupil who graduates from a High School-course in New Jersey the cost to the State and school district, based upon the figures for last year, average $365.60. There were 1,672 graduates turned out as finished products of the 147 High Schools is the State during the year, a little more than four per cent. of all the pupils enrolled in all the public schools, and about eleven per cent. of the total enrollment in the High Schools. To enable every High School pupil to graduate at this rate the High School course would have to be extended to ten years, and for every child now in the public school to obtain a diploma would take something like twenty-five years.

Out of twenty-five children who enter the primarys grades in the pubic schools, only about ten get as far as enterinfi the grammar grades, and less than tpree enter the High School.

THE *Suburbanite* for May, a monthly magazine published by the passenger department of the Central Railroad of New Jersey, is just out and contains many interesting articles.

BETWEEN thirty-five million and forty million dollars are expended annually in the United States for new church buildings, and for each day in the year there are built and dedicated between twelve and fifteen new churches. It is hard to argue from this that the world is growing worse.

SAN FRANCISCO is to entertain the Grand Army of the Republic this year, on the occasion of the thirty-seventh national encampment to be held in August. If we can judge from the newspapers, no veteran attending the encampment will have cause to complain of lack of hospitality and attention.

IT seems never to have occurred, says the Indianapolis Journal, to those Democrats who are constantly flinging at Mr. Bryan the charge that he has twice led his party to defeat that he received tens and tens of thousands more votes than did Mr. Cleveland in all the voting states except on the eastern coast.

MORE than a thousand miners of Pennsylvania struck the other day because they could not decide whether a bridle was part of a mule's harness or not. The trouble arose over the refusal of the stablemen to put on the bridles, claiming it was not part of the harness. The case was submitted to a committee of referees, who compromised the matter by recommending that the mules be driven without bridles, whereupon the men returned to work.

THE New York *Times* prints the details of a disastrous fire which occurred near Maplewood recently, to which the local fire company was notified by postal card to come to the rescue.

And our esteemed contemporary, the Short Hill Item, which is published in that neighborhood, says it is informed with all seriousness that because the fire department did not respond to the summons, that there is talk of bringing suit against the township.

Shades of Philadelphia, preserve us! Was there ever such calumny heaped upon our fair state as this?

Subsoiling with Dynamite.

"Strange are some of the farming methods of California," said Benjamin Mann, of Germantown, who recently returned from a visit to the Pacific coast. "One day in the vine country I heard a tremendous bang, bang, banging, and started from my seat, thinking that a dreadful explosion had occurred. But my host told me, with a laugh, that his men were merely plowing with dynamite. Then he went on to explain that when it was desired to loosen up the soil to a depth of three feet or so dynamite cartridges were set in the earth and fired off. They broke up the ground beautifully. They did the work much better, and much more cheaply, than any machine or any manual labor could do. And, in addition to this, they destroyed the parasite called the phylloxera, the bane of the vine growers. No vineyard whose soil had been dynamited, my host said, ever suffered from the phylloxera afterward."—Philadelphia Record.

Queer Language, Verily.

"It is a queer language," said a bewildered Frenchman. "A horse falls into ze subway and hees owner falls out with ze contractaire. Ze house, it goes up in smoke and ze firm goes under from ze fire, while ze goods go down on account of ze smoke and ze wattaire when ze fire goes out.

"Ze wife run up a bill at ze shop, ze bookkeepaire runs up ze column of figures in ze ledgaire, ze husband runs from ze collectaire, ze shopkeepaire runs over to ze court, and ze attachment runs about a month and zen it runs out.

"Ze gamblaire sees ze poor foreigner, ze foreigner sees ze gamblaire's bet and raises it; zen he sees a flush royale and zen ze police seize ze whole business. Ze gamblaire sees ze wardman and ze foreigner sees his money no more. It is a strange language in ze great country of America."—N. Y. Times.

The "Athletic Awakening."

Prior to 1880 not a single record for events on standard athletic championship programmes was held by an American. They were all credited to Englishmen, Scotchmen and Irishmen. To-day, 22 years later, Americans hold nearly all the records. That is one result of the "athletic awakening"—the increased interest in outdoor sports in the United States; but it is by no means the most valuable. Better health, sounder, stronger bodies, calmer minds, less tendency to dyspepsia and nervousness—these are worth more than records; they seem in this case to go together.—Youth's Companion.

"Point Tresse" Lace.

"Point tresse" is a very rare kind of lace made of human hair. Its production was confined to the early part of the sixteenth century. Margaret, countess of Lennox, the mother of the wretched Darnley, sent from the tower, where she was imprisoned when her son, Lord Charles Lennox, married the daughter of Bess of Hardwicke, a piece of this kind of lace to Mary, Queen of Scots. This curious little square of point tresse was worked by the old countess' hands from her own gray hair.—London Globe.

No Bath, No Wife.

Among the Turks bath money forms an item in every marriage contract, the husband engaging to allow his wife a certain sum for bathing purposes. Should it be withheld she has only to go before the cadi and turn her slipper upside down, and if the complaint be not then redressed it is a ground for divorce.—London Chronicle.

George's Kind Permission.

"Mary!" her father called downstairs, "just ask your young man if he doesn't think it's pretty near bedtime."

"Yes, papa," replied the sweet girl, after a pause, "George says if you're sleepy go to bed by all means."—Toledo Bee.

Used to It.

Towne—You don't mean to say you didn't notice that earthquake shock?

Browne—I guess I was home in Aiguhurst at the time.

"But the shake must have been perceptible there."

"I guess all of us just took it for our malaria."—Philadelphia Press.

The Smoke Nuisance.

"I hear young Jenkins has lost his job."

"Yes; he came into the office several times puffing cigarettes, and the boss said that where there was so much smoke there must be some fire."—Kansas City Journal.

Comparison.

He—Are Miss Simson and Miss Timkins good friends?

She—I should say not. Why, they couldn't be more bitter enemies if they sung together in the same church choir.—Chicago Daily News.

Something Unheard Of.

He—Did you hear of the accident your husband met with at the railroad station this morning?

She—No; I did not.

"Well, he ran for the train—and caught it."—Yonkers Statesman.

Hawaii's Population.

Hawaii has a population of 160,000, of which 60,000 are Japanese and 30,000 Chinese. There are also Porto Ricans and likewise some Hawaiians.—N. Y. Sun.

Spring-time in Washington.

Washington is a typical Spring resort and its bustle is purely social and political. There are gathered in the Capital representatives of every nation and country, and their comings and goings are of no little interest. Then the doings of the Senate and House are features which every tourist delights in following, and these features together with the visits to the numerous public buildings keep one busy all the while one is in Washington. The Royal Blue Line of which the New Jersey is the initial road is going to operate an excursion to Washington on May 7th, and cost of tickets for the 3 days' excursion including all expenses is $12. Train leaves New York at 1 p. m., and arrives Washington at 6.10 p. m. If you want to know about the trip drop a postal to C. M. Burt, General Passenger Agent, New York City, for tour book. Free for the asking.

NEW CANADIAN NAVY

It Is Being Created for the Purpose of Colonial Defense Only.

Our Northern Neighbors Will Enlist Some Three Thousand Men in a Naval Reserve Force—Newfoundland Establishment.

Canada is preparing to organize a colonial naval force for home defense along much the same lines that have been followed by Newfoundland in creating the Royal Naval reserve which was begun some three years ago.

Neither Canada or Newfoundland are garrisoned to any extent by either land or naval forces from England, though Canada supports quite an extensive militia force of her own for land service. England maintains but 2,000 imperial troops in Canada. These are stationed off the fortress of Halifax, which is considered an imperial station. To this force Canada adds a well trained reserve of about 35,000 organized militia, covering all branches of the land military service. So far as the imperial navy is concerned Canada is practically without representation. The ships of both the North Atlantic and North Pacific stations touch at her ports from time to time, and at Esquimalt, on Vancouver island, British Columbia, a naval victualling station is maintained. Partly because of this lack of representation Canada proposes to organize a naval reserve force of her own, which will be in no way connected with the Royal navy of England, as is the Newfoundland force.

TRAINING SHIP CALYPSO.
Anchored in the Harbor of St. Johns, Newfoundland.

The commander of the Canadian Fisheries Protection Service, a retired English naval officer, Capt. Spain, has visited Newfoundland recently to study the workings of the Naval Reserve there, so as to see what modifications are necessary in the system to adapt it to Canada's needs. The Newfoundland force is eventually to be at least 600 strong; the Canadian is to be four times that strength. The two bodies are recruited from much the same class of men—the former from the famous cod-fishers of Newfoundland, and the latter from the fishermen of the maritime provinces.

The Canadian parliament met on March 12, and the legislation to create the force was then presented. The total strength is fixed at about 3,000 men, but it will be some years, of course, before this is reached. To provide the necessary staff for inaugurating the system, sufficient retired officers and instructors from the Royal navy will be engaged, and the headquarters of the force will be at Halifax, Nova Scotia. Drill-sheds will be built, ranges will be procured, and the system will be inaugurated in the most workmanlike manner. The first enrollment will probably take place next autumn, at the close of the fishing season, when the young fishermen will have little to do for the winter.

NEWFOUNDLAND FISHING VILLAGE.
Is from These the Colonial Naval Reserve Is Recruited.

The Newfoundland Naval Reserve, upon which this Canadian force is fashioned, was formed in November, 1900. An experimental contingent of 50 young fishermen was recruited and taken for a six months' cruise in the West Indies in H. M. S. Charybdis. So satisfactory was their work that 44 earned promotion as "qualified seamen" at the close of the cruise. The next autumn another batch was taken, and did equally well, 47 being promoted. Last autumn 80 were enrolled, and these saw active service in Venezuela, where the Charybdis was the flagship of the allied fleet which brought Castro to terms. Meanwhile, the men of the previous years, and scores of others, are putting in their month's drill (which the rules ordain each year) aboard H. M. S. Calypso, sent out last October by the British admiralty for the purpose, and intended to be kept permanently in Newfoundland waters.

P. T. M'GRATH.

GEORGE MEREDITH

The Last of a Bright Band of English Literary Lights.

Though Seventy-four Years of Age He Is as Buoyant of Spirit To-Day as He Can Ever Have Been.

By general consent one of the most engaging figures in literary life of our time is that of Mr. George Meredith. Now that Philip James Bailey has passed away, he is the only survivor of that bright band of British poets and novelists that gave distinction to the first half of Queen Victoria's reign. His work is achieved, his pen is laid aside—unless it be that he is engaged at intervals on his autobiography, for at the end of 1901 it was stated that he had the intention of writing the recollections of his life.

George Eliot, Tennyson, Browning, Swinburne—these were among the first to hail George Meredith as a new force in literature; so long ago as 1862 Mr. Swinburne spoke of him as "one of the leaders of English literature." But even the imprimatur of such authorities was powerless to make the reading public take him to its bosom forthwith. There are, it need scarce be said, certain obvious reasons why George Meredith should have been so long winning his way to popular approval. A brilliant young novelist to whom I listened the other night reading with rapture from "Love in a Valley," said, very happily, as it seemed to me, that Meredith "thinks in metaphor." That is precisely what the rank of mankind never does; hence it is not surprising that to the avearge reader the works of the greatest English novelist should present grave difficulties of style.

It may come as a surprise to many to be told that his spoken words resemble curiously his written phrases, with their unexpected epithets and surprising association of thoughts;

GEORGE MEREDITH.

so that what he has written of his peerless Diana may aptly be said of himself: "This was like her, and here and there a phrase gave him the very play of her mouth, the flash of her eyes." Indeed, to have listened to the talk of George Meredith for but one brief hour is to have abandoned the thought that nobody was ever so brilliant in speech as he makes many of his characters to be.

He talks with a touch of that old-fashioned manner which sounds to-day almost like affection, but none could be freer from a suspicion of such than George Meredith, for the lasting impression which the man leaves on one's mind is that the child's heart has never changed in him, and that he is as lacking in self-consciousness as a boy of 12. After we have searched laboriously for that unknown, elusive something which constitutes genius, we shall find that it is nothing more than the power to keep in our old age the spirit of our youth, and to retain to the end the great gift of wonder. Assuredly George Meredith has done those things. In his 74th year we find him as buoyant of spirit, as full of wonder as he can ever have been.

Flint Cottage, Boxhill, has been his home for at least one-half of his days, and there The Egoist, that relentless study of refined selfishness, and many another masterpiece have been written. There, too, he has lived his quiet days of close communion with nature, and here his happy years of family life have been passed; his long widowhood, and now his lonely age. Flint Cottage lies in a hollow by the roadside, around it spread its owner's well-loved gardens, and perched on the hill behind is the little chalet in which most of his writing for over 30 years has been done. The well-stocked bookshelves are heavy with what the literary man would call working books, but a large proportion are the familiar paper-bound French novels, of which Mr. Meredith has been a great reader. In a corner stands the desk whereon the master-hand has written so long; but the quills lie dry, the inkbottle empty. From the window is obtained a spacious view of the green hills of Surrey, gentle in outline, soft and peaceful, strangely unsuggestive of the rugged grandeur of the master's work. One cannot leave the place without a touch of sadness, knowing that the work of this great writer is finished while yet he lives; but that is only the emotion of a moment, for in the knowledge of his splendid achievement there is nothing but thankfulness.

J. A. HAMMERTON.

I Used

Dr. Miles' Nervine and Anti-Pain Pills.

Cured Grip—Did Full Day's Work.

Anti-Pain Pills, the Best Headache Remedy.

"I wish to say I have used your Anti-Pain Pills and Nervine for La Grippe and knocked it out and kept up my full day's work. I have also used Dr. Miles' Anti-Pain Pills many times during the past year for headache and always with most gratifying results. I consider them the best of headache remedies. I have also used your New Heart Cure in my family with excellent results. Actual experience with these three of your remedies have proved so beneficial that I cheerfully recommend them to others."—MERRIT M. DAYTON, Business Mn'gr Ithaca Publishing Co., Publishers Ithaca Daily and Weekly News, Cornell Daily Sun, Cornell Alumni News, 202 N. Tioga St., N. Y.

In itself LaGrippe is very dangerous, but in its after effects it is one of the most deadly scourges that afflicts mankind. It shatters the nervous system, weakens the heart's action, and lays the foundation for heart disease. The accompanying fever consumes the vitality and renders the patient susceptible to pneumonia, bronchitis and catarrh. The best treatment consists of Restorative Nervine which quiets the nerves, soothes the brain, restores strength and vitality to the entire system; Dr. Miles' Nerve and Liver Pills, a nerve tonic acting directly on the nerves of the digestive organs causing them to act in a natural and healthy manner, and Dr. Miles' Anti-Pain-Pills which speedily relieve the torture of headache, backache and soreness, the most common symptoms of Grip.

All druggists sell and guarantee first bottle Dr. Miles' Remedies. Send for free book on Nervous and Heart Diseases. Address Dr. Miles Medical Co., Elkhart, Ind.

Time Table in effect Nov. 16, 1902

For New York—2.17, 3.37, 5.38, 6.02, 6.29, 6.57, 7.05, 7.25, 7.28, 7.48, 7.55, 8.02, 8.11, 8.30, 8.34, 8.46, 9.27, 9.59, 10.26, 11.25 a. m.; 12.09, 12.44, 1.18, 2.31, 2.42, 2.49, 3.44, 4.17, 4.47, 5.43, 5.53 6.23, 6.33, 6.43, 7.08, 7.32, 8.36, 9.40, 10.17, 11.28 p. m. Sundays—2.17, 3.37, 5.05, 7.41, 8.01, 8.52, 9.52, 10.08, 11.10 a. m.; 12.00 m.; 12.58, 1.45, 2.40, 3.17, 3.30, 5.41, 6.45, 6.52, 8.13, 8.32, 10.22 p. m.

For Newark—5.38, 6.29, 6.57, 7.05, 7.25, 7.48, 8.11, 8.34, 8.46, 9.27, 9.59, 11.25 a. m.; 1.18, 2.31, 2.49, 3.44, 4.17, 4.47, 5.43, 5.53, 6.23, 6.33, 7.08, 7.42, 8.36, 9.40 p. m. Sundays—7.41, 8.52, 10.08, 11.10 a. m. 12 m.; 12.58, 1.45, 3.30, 5.41, 6.45, 6.52, 7.32, 8.13, 8.32, 10.22 p. m.

For Somerville—5.25, 7.12, 8.21, 9.36, 9.54, 11.00 a. m.; 1.01, 2.02, 2.11, 3.32, 3.44, 4.33, 5.03, 5.29, 5.57 6.04, 6.19, 6.41 7.12, 7.34, 8.08, 8.21, 9.37, 10.23, 11.26 p. m.; 12.59 night. Sundays—5.45, 8.42, 11.14 a. m.; 2.03, 3.40, 5.37, 6.35, 8.30, 10.15, 11.29p. m.

For Phillipsburg and Easton—5.25, 8.21, 9.54, a. m.; 2.11, 5.29, 6.41 p. m. Sundays—5.45 a. m.; 2.03, 6.35 p. m.

For Bethlehem, Allentown and Mauch Chunk—5.25, 9.54 a. m.; 2.11, 5.29 p. m. Sundays—5.45 a. m.; 2.03, 6.35 p. m.

For Wilkesbarre and Scranton—5.25, 9.54 a. m.; 5.48 p. m. Sundays—5.45 a. m. 2.03 p. m.

For Long Branch, Ocean Grove, Point Pleasant and seashore points—8.11, 11.25 a. m.; 3.44, 4.47, 6.23 p. m. Sundays—8.52 a. m.; 3.30 11.28 p. m., Wednesday and Saturday only, except Ocean Grove.

For Lakewood—3.37, 8.11, a. m.; 1.18 3.44, 4.17p. m. Sunday, 9.52 a. m.

For Atlantic City—9.27a. m.; 2.49p. m.

For Trenton—5.17, 5.25, 7.12, 7.44, 8.38, 9.14, 9.44, 10.44, 11.44 p. m.; 12.46, 1.01, 1.39, 2.11, 3.44, 5.29*, 7.34*, 8.21, 9.37* p.m., 1.17 night. Sundays—5.17, 5.45, 9.55, 11.14 a. m.; 1.39, 2.45, 4.55, 5.37,* 6.35,* 9.47 p. m.; 1.17 night.

For Philadelphia—5.17, 7.44, 8.38, 9.14, 9.44, 10.44, 11.14, 11.44 a. m.; 12.46, 1.39, 2.11, 3.44, 5.34*, 7.34,* 8.21, 9.37* p.m.; 1.17 ng't Sundays—5.17, 5.45, 9.55, 11.14 a. m.; 1.39, 2.45, 4.55, 5.37*, 6.35*, 9.47 p. m.; 1.17 night.

For Reading and Harrisburg—5.17, 5.25, 8.38, 9.54, (10.44 to Readind only) 11.44 a. m.; 2.11, 5.48 p. m. 1.17 night. 1.17 night.

Sundays, 5.17 a.m., 2.03, 5.37, 6.35 p. m.;

For Pottsville, Sunbury & Williamsport— 5.17, 5.25, 9.54, a. m.; 2.11, (5.29, to Pottsville only) 8.21 p. m.; 1.17 night. Sundays, 5.17 a. m.; 2.03,; 1.17 night.

ROYAL BLUE LINE
(N.J. Cent'l, P & R., B. & O. R'ys.)

For Baltimore and Washington—9.14, 11.14 a. m.; 1.39, 3.44, 4.18, 5.34,* 7.34* p. m; 1.17 night. Sundays—11.14 a. m.; 2.45, 5.37, 6.35* p. m., 1.17 night.

Tired Out

"I was very poorly and could hardly get out of the house. I felt tired out all the time. Then I tried Ayer's Sarsaparilla, and it only took two bottles to make me feel perfectly well."—Mrs. N. S. Swiney, Princeton, Mo.

Tired when you go to bed, tired when you get up, tired all the time. Why? Your blood is impure, that's the reason. You are living on the border line of nerve exhaustion. Take Ayer's Sarsaparilla and be quickly cured. $1.00 a bottle. All druggists.

Ask your doctor what he thinks of Ayer's Sarsaparilla. He knows all about this grand old family medicine. Follow his advice and we will be satisfied.

J. C. AYER CO., Lowell, Mass.

A Keen Observer.

Prince Edward of Wales appears to be a keen observer for one of such tender years. A story is being told which illustrates this. It happened during some of his early theological studies when a kind teacher was endeavoring to convey to him some idea of the future state. She told him that there all men and women would be completely equal in happiness. He meditated over this thoughtfully and then inquired: "Shall we all, everybody, be really equal?" "Yes, my dear." "All of us, really?" "Yes, darling." "Great-grandma," referring to Queen Victoria, "and all?" "Yes, darling, even great-grandma." "I am quite sure," said the young prince decidedly, "that great-grandma won't like that at all. Quite sure."—London Tatler.

The classified civil service now embraces 134,017 positions.

An Ideal Woman's Medicine.

So says Mrs. Josie Irwin, of 325 So. College St., Nashville, Tenn., of Lydia E. Pinkham's Vegetable Compound.

Never in the history of medicine has the demand for one particular remedy for female diseases equalled that attained by Lydia E. Pinkham's Vegetable Compound, and never during the lifetime of this wonderful medicine has the demand for it been so great as it is to-day.

From the Atlantic to the Pacific, and throughout the length and breadth of this great continent come the glad tidings of woman's sufferings relieved by it, and thousands upon thousands of letters are pouring in from grateful women saying that it will and positively does cure the worst forms of female complaints.

Mrs. Pinkham invites all women who are puzzled about their health to write her at Lynn, Mass., for advice. Such correspondence is seen by women only, and no charge is made.

The Vanishing North Sea.

Heligoland is not the only land which is gradually giving way before the continued onslaughts of the North Sea. A strip of thirty-six miles of English coast between Flamborough and Spurn Head loses on an average two yards and a quarter, or thirty acres, a year. Over a mile has gone since the Norman conquest. Nothing has yet been devised to stop the inroads of the waves.

The old, invariable virtue of

St. Jacobs Oil

makes it the king cure for

Sprains and Bruises

Price, 25c. and 50c.

The Principle of Rest

By Rose Wilson-Helme.

THE principle of rest is the principle of relaxation—a temporary cessation or suspension of energy from any part or from all of the body. Absolute rest implies the complete "letting go" of tension, mental, nervous and physical; all are involved, to some extent, in every act of our daily life, nor can they be entirely separated.

Let us see what will happen if we place the body in a reclining position, so comfortably arranged that absolute physical repose would seem inevitable. Then let the mind take hold of some problem and concentrate on it until all the mental energy is aroused. This energy is unconsciously communicated to the nervous system, and soon the entire physical self is in a highly tensed condition. Few people realize this until their attention is called to it. They think they must be resting when the body is inactive. It is not necessary that the body be exercising in order to be tense. A set of muscles may be nervously tense and yet be apparently motionless. This difference between a tensed muscle and a muscle entirely relaxed, or devitalized, is what I want you to thoroughly understand, for this tense condition brought on by mental and nervous strain, and often held without relaxation for hours, produces greater fatigue than many forms of exercise that are more physical in execution.

Remember, always, that the mind is the great controlling power, and it is only when the mind becomes, as nearly as possible, a perfect blank, that the body can rest satisfactorily. If the body would rest the mind must rest also; in other words, "Think rest," "Let go" of everything mental, and relax completely.—The Pilgrim.

Government's Business a Model

By Frank A. Vanderlip.

THE responsibility for keeping the revenues and for their disbursement, now that the totals have come to aggregate more than one thousand million dollars, would seem to be quite enough to lay upon the shoulders of any man, particularly if he must take up those duties without thorough familiarity with their details, as does each new Secretary. But in addition to this duty, there is the further responsibility for the solution of the problems of an intricate and diverse currency system. The Secretary, too, occupies indirectly, through the Controller of the Currency, a supervisory relation to the whole National banking organization of the country. He is the indirect custodian of $300,000,000 of gold and silver coin, stored in the Treasury vaults, against gold and silver certificates in circulation representing that coin, and, through his subordinate, the Treasurer of the United States, he shares the responsibility for the care of more than two hundred million dollars, representing the reserve balance which the Government carries. All the Mints and Assay officers are, through the Director of the Mint, under his control. He directs the operations of a great factory employing 3000 operatives in the printing of money and Government securities, and he must there meet the same problems of organized labor that other great employers have to meet. He is responsible for the collection of commercial statistics, and is fortunate in finding a bureau for that purpose which has a record for the best statistical work done by any of the great Governments. He is at the head of the greatest auditing offices in the world, where every dollar of income and every item of expenditure is checked over with minute exactness, so that at the end of the year it is safe for him to say that the whole billion dollars, the total on both sides of the ledger, has been collected and disbursed with absolute fidelity and legality and without error.—From "The Treasury," in Scribner's.

Courage, Physical and Moral.

By the Rev. Thomas B. Gregory.

THE sublimest pages of biography and of history are those which show the manhood triumphant over the pressure that was brought to bear upon it.

One day the immortal discoverer of the law of gravity was sitting in his office in the Mint when a seemingly dressed lady came in and in the most delicate way intimated to the grand old man that if he would use his official power to aid her in a certain direction she would see to it that he should not be the loser by it.

"Madam!" said Sir Isaac, "here is the door. You will oblige me by your immediate departure!"

"Forward, men—forward!" cried Blucher to his wearied soldiers as they were floundering through the mud on their way to join the English at Waterloo. "I have promised my brother Wellington to be there—promised, do you hear? and you shall make me break my word?"

Americans will never cease to be proud of the reply made by Henry Clay when he was urged not to champion a certain cause lest it should jeopardize his chances for the Presidency. "I would rather be right than be President!" thundered back the incorruptible old Roman.

When Stephen A. Douglas was at the height of his fame he was approached by the agent of a rich syndicate, who offered him a princely fee if he would lend his advocacy to a certain bill which the syndicate was anxious to get through Congress.

The Little Giant's eye flashed fire, and there was a sudden exit of the agent—without his hat!

These men had moral courage. Theirs was the highest form of bravery—the bravery which enabled them to bid defiance to the temptation to wrong.

Physical courage, we repeat, is something that calls for our admiration. The spectacle of a fellow human being gritting his teeth, clinching his fists and silently, calmly bearing the pain that is killing him, draws from us at once pity and chords!

But grander than any mere physical pluck is the silent courage of the soul, which, though hard pressed by splendid inducements to do wrong, keeps its poise, and in its fight with unprinciple never shows the white feather!—New York Journal.

The Value of Human Life.

By Prof. Rudolf Eucken.

BROADLY viewed our present human existence reveals an entirely different condition from that shown by the spirit of pessimism—a spirit which exerts so potent an influence upon our contemporaries. The existence of the facts which pessimism sets forth in support of its views, is not questioned; they remain, and deserve consideration. In reality, however, they constitute but one side of human life, which is fraught with a deeper meaning and involves far more at present than many of us become conscious of. The fact that this deeper meaning is too frequently relegated to the background and that the possibilities of the spiritual life are not sufficiently developed may be explained from the general state of modern culture. Great revolutions have been effected in the last centuries; [illegible] channels; old doctrines are beginning to totter; and new ideas [illegible] recognized. An equilibrium, however, has not yet been established. The law of compensation has not yet exercised its power to the fullest extent. Above all, there is still an absence of that energetic concentration which will convert man into a complete and harmonious organic entity, as the variety and multiplicity without—an entity capable of sifting, [illegible], and clarifying all the innumerable impressions presented by the heterogeneous influence of the external world. An intellectual activity capable of rising superior to all the blows of fate is also lacking. It may, therefore, be said that the centrifugal forces are greater than the centripetal. Labor, with its enormous ramifications, is more powerful than the spiritual force within ourselves. Herein we must seek the answer to the question whether life contains more reason than meaningless complexity and whether true happiness can exist. Life, as conferred upon us, is not invested with a fixed and unchangeable value. It depends upon ourselves what value we are willing to give it. The more man seeks to concentrate his life, the more he seeks to develop a victorious intellectual activity productive of ever higher spiritual strength, the greater will be his ability to confront the complex phenomena of life with cheerfulness and courage. He will then readily understand the words of Vauvenargues: "Le monde est, ce qu'il doit etre pour un etre actif, plein d'obstacles" (The world is, what it ought to be to an active being, full of obstacles). In our day also happiness and confidence in the rational purpose of nature may be obtained by zealously and mightily developing the intellectual life, so that man may face all the multifarious phenomena of life as a unit endowed with strength of character and the power of conviction. Never were there greater possibilities in this direction than to-day; and it devolves upon man to avail himself of them, to the end that he may find good cheer and courage within himself and power to become victorious over the petty and depressing impressions which a first view of prevailing conditions produces. He will then tread the upward path ever sought by the powerful and youthful natures, be they nations or individuals.—The Forum.

New York City.—Gowns cut in princess style are exceedingly becoming to many figures and make most satisfactory home gowns. The admirable May Manton model shown fits snugly and smoothly and becomes simple or elaborate as material and trimming are one or the other. As illustrated it is designed for morning wear and is made of cashmere in a pretty shade of beige, is simply stitched with corticelli silk and finished with gold buttons.

PRINCESS GOWN.

The gown consists of fronts, backs, side backs and under-arm gores. The fronts are fitted by means of single darts and all the portions flare freely at the lower portion, so giving the fashionable effect. At the neck is a simple turn-over collar. The sleeves are in bishop style with straight cuffs.

The quantity of material required for the medium size is twelve and a half yards twenty-seven inches wide, ten and three-quarter yards thirty-two inches wide or seven and a half yards forty-four inches wide, when material has figure or nap; ten yards twenty-seven inches wide, seven and three-quarter yards thirty-two inches wide, five and three-quarter yards forty-four inches wide, when material has neither figure or nap.

Woman's Blouse Jacket.

Blouse coats with stole finish are among the features of the latest styles and are exceedingly smart both for the entire costume and the separate wrap. The stylish May Manton model shown in the large drawing is suited to both purposes, but, in the case of the original, is made of etamine, in soft gray stitched with corticelli silk, and combined with stole and belt of Oriental embroidery and makes part of a costume.

The blouse consists of fronts, back, and under-arm gores. The back is plain and without fulness but the fronts blouse slightly over the belt. The capes, which are optional, are attached to the stole which is then applied over the neck and fronts. The basque portions are seamed to the lower edge, but these last can be omitted and the blouse finished with the belt if preferred. The sleeves are the full ones of the season with roll-over cuffs.

The quantity of material required for the medium size is two and three-quarter yards forty-four inches wide or two and a half yards fifty-two inches wide, with three-quarter yards eighteen inches wide for stole.

Brim Veiled as Diadem.

A white chip hat has a high coronet-shaped brim, with the edge cut in deep curves and bent carefully to stand upright like a diadem. This is veiled with a soft covering of fine batiste heavily embroidered with floral border deep enough to reach from the upper edge nearly to the bottom. Below this the batiste is softly gathered into shape. The embroidery stands out well and resembles a crown of flowers or garland around the face, when it is executed in rose pink, pale blue or mauve. A small loop-bow of black velvet ribbon is set low down on the left side, almost directly resting on the hair of the wearer.

The New Bishop Sleeve.

When made of batiste, crepe de chine or any thin silk, the blouse can boast of the new bishop sleeves adorned with rows of shirring both above and below. This sleeve is cut immensely full, and shows triple rows of close shirring on the upper arm, just below the arm-size, and again at the wrist. Between these points the sleeve is very full, but as it is correctly cut, the fulness is not suffered to droop. Such a blouse should have a full front, with a triple row of shirring extending across the front just below the yoke, which is inset with lace.

The New Hats.

Most of the new models in hats show brims (rolled on the edge) completely covered with small green foliage and buds of whatever flower is chosen, with a heavy fall of the full flown flowers at the back. These "waterfalls" of flowers will largely supplant the graceful lace scarfs of the last three seasons that fell over the back hair.

Pink Prettiness.

A pink frock, which has a pointed shoulder collar of embroidery over a longer one of pink, has the guimpe tucked, and is of the pink material of the frock.

Fancy Waist.

Combinations of tucks and shirring are notable in many of the latest gowns and waists, and are exceedingly effective in the fashionable soft materials. The very smart May Manton waist illustrated is shown in white crepe de Chine with yoke and trimming of Venetian lace, but is suited to washable fabrics as well as to silks and wools, and to the odd waist as well as the entire gown.

The waist consists of the fitted lining with fronts and back of the waist proper. The lining is made to form the yoke and the waist is shirred at the upper edge and tucked above the belt. It is gathered at the waist line and is slightly full over the belt. The closing is effected invisibly at the centre back. The sleeves are shirred at the shoulders, where they form continuous lines with the waist, so giving the desired broad effect, and the fulness is gathered to form soft full puffs at the waist.

The quantity of material required for the medium size is five and three-quarter yards twenty-one inches wide, four yards twenty-seven inches wide, three and a half yards thirty-two inches wide, or two and seven-eighth yards forty-four inches wide, with seven-eighth yards of all-over lace and two and one-eighth yards of applique to make as illustrated.

EXCEEDINGLY SMART BLOUSE JACKET.

FANCY WAIST.

SCIENTIFIC & INDUSTRIAL

In dry airs sound travels 1442 feet a second; in water 4900 feet, and in iron 17,500 feet.

It is proposed at Yarmouth, England, to revive the Greenland whale fishery formerly carried on from that port.

Several children and adults have become totally blind after eating a fruit known as "finger-cherries" near Cairns, in northern Queensland, Australia.

The weather bureau station having the highest mean annual precipitation, including rain and melted snow, is Hatteras, N. C., where the figure is 66.4 inches.

The discovery has been made by a German physician that erysipelas can be more promptly cured if the patient remains in a room painted red and with red windows.

An automatic signal lantern has been placed at street railway crossings in Leipsic which will avoid accidents at such points. It answers its purposes as well in the daytime as at night.

In proportion to population, more patents are issued to citizens of the District of Columbia than to those of any State. A recent compilation showed that Tennessee was at the foot of the list.

Captain Scott with the Discovery has penetrated 100 miles nearer the South Pole than any previous explorer and discovered an extensive mountainous region hitherto absolutely unknown. He thinks this indicates that land stretches to the Pole in a series of very lofty mountains.

The facility with which an automobile turns a corner depends upon the fact that its motor-driven axle is in two pieces connected with bevel wheels and a pinion. In turning the pinion is loosened on its stud, which permits the two wheels, each of which is solid on its axle, to revolve at different speeds.

Princeton University recently received from John M. Clarke, New York State palaeontologist, the body of an octopus-like creature, from Onondaga Lake. Dr. Orman examined the specimen and found it to be a cold-water, short-armed squid, a species of devil-fish prevalent along the Atlantic coast from Cape Cod to Newfoundland. The specimen examined by Dr. Ortman differs from the ocean-bred squid in that it has not the delicate membrane [illegible] that stretch out from its body.

What One Clever Woman is Doing.

There seems to be no limit in these modern days to what woman may do. In South Boston there is a woman who owns and controls a chain of nine weekly papers supplying smaller New England cities with leisure reading. Five years ago this woman had never seen the inside of a newspaper office. At that time she invested in five papers at the advice of a young man who had supreme confidence in himself as an all-round newspaper man and controller of a syndicate. The result not justifying his confidence, collapse seemed imminent, when this resourceful woman herself stepped to the fore. The peculiar feature of her management is that she employs only girls on these papers. Man never appears in connection with them, save as subscriber or advertiser. Her workers are often as young as seventeen, and she never engages any one over twenty-one, her idea being to secure optimistic, fresh and cheery views of life in her sheets and to avoid the work of women with "set ways" which might be difficult to unlearn. These "girl graduates," as most of them are, are sent forth in search of news, and rapidly learn to become newspaper women. The proprietor herself writes and signs all editorials. Her papers are not distinctively papers for women—that is, they do not confine themselves exclusively to women's news—but they have the interests of women more particularly in view.

Woman by a Woman.

If women's brains were as strong as their hearts, the combination would conquer heaven.

Extreme amiability in women is either stupidity or a social or matrimonial axe to grind.

Women are a study—men are an understudy.

The divination of the heavens is A, B, C compared to the divination of women.

The head women attract us. The heart women fasten us.

As an individual, woman is divine. As a sex, she is a bore.

When a man is divorced, the women "poor thing" him and put on an extra smile. When a woman is divorced, the men all wink and wonder what there is in it!

Wasn't it a foxy design of some one's that made widow's weeds so becoming?

If women were judges of men, there would be no marriages. If men were judges of women—but that is an inconceivable proposition!

A man is born generous, just, forgiving. A woman has to have every one of these virtues pounded into her with a sledge hammer.

Men take themselves so seriously! It is very amusing to the woman who hears him rail at the coffee, blame the laundry man, and turn the house topsy-turvy when he has the toothache.—Nettie Seeley-Murphy, in Philadelphia Evening Bulletin.

GOOD ROADS

Endorsing National Co-Operation.

CONGRESSMAN BROWNLOW, of Tennessee, says that his good roads bill is the most popular measure introduced in Congress ince the Civil War. He says that even he Democratic Legislature of his own State has endorsed it, and that the Legislatures of Minnesota, Missouri, Alabama and New Mexico have taken similar action, and that he believes the bill will be endorsed by the Legislature of every State in the Union, if that is necessary to press upon Congress the importance of the measure. The following is a copy of the resolution as adopted by the Legislature of Minnesota:

Whereas, The burden of improving and maintaining our highways according to the general prevailing system in this country rests entirely upon the agricultural lands and people living in the rural districts; and

Whereas, The State-aid plan for constructing highways, as practiced in the States of New Jersey, New York, Connecticut and Massachusetts has proven satisfactory in its operation, and has offered a partial solution of the road question in that it distributes this burden of cost so that one-half is paid out of a general fund supplied by the State; and

Whereas, It is desirable to extend this principle of co-operation and distribution of the burden of cost to a still greater extent, so that the Government of the United States shall bear a share the cost of construction to be paid of the general revenues of the United States; and

Whereas, One-half of said revenues, aggregating during the last two years $1,000,000,000 per annum, is derived from the agricultural States and rural districts, while only ten per cent. of the total amount is appropriated by Congress for the use of said agricultural States and districts, while ninety per cent. is appropriated for public buildings and other uses pertaining to great cities; and

Whereas, The Hon. Walter P. Brownlow, member of Congress from Tennessee, has introduced a bill in the United States House of Representatives providing for a system of National, State and local co-operation in the permanent improvement of the public highways, according to the provisions of which the sum of $20,000,000 is appropriated, and the United States Government [illegible] cost of [illegible] when [illegible] co-operation thereof; therefore be it

Resolved by the General Assembly of the State of Minnesota, That we hereby heartily endorse said Brownlow bill and recommend its passage by Congress, and that we request the Representatives from the State of Minnesota in Congress, and instruct the United States Senators from this State to vote and support said bill.

The First Gains.

If the people of Pennsylvania, by authority of the Legislature, expend $1,000,000 annually on the making and mending of public roads, it will be the country folk who will profit most directly by the outlay, while it will be the city folk who will furnish the greater part of the money. Eventually, however, the welfare of all will be greatly promoted, and the advantages accruing from good country roads will be reflected in the prosperity of the entire Commonwealth. The merchant's teams in the city streets, or his carriage in the park, will traverse the same pavements and the same driveways as heretofore, while to the farmer going to market improved roads will make fully one-third difference in the cost of transportation, and far more than that in the comfort, the convenience and the satisfaction found in his work. The first gains, therefore, all go to the tillers of the soil, but, while recognizing this fact, no intelligent taxpayer will regret his contribution to the good roads fund, what though he never leaves city pavements from year's end to year's end. In the long run the welfare of each citizen coincides with the welfare of the community, and there need be no question that a system of good country roads throughout the State will aid most effectively in building up the towns of the State.—*Philadelphia Telegraph.*

A Novel Plan.

A novel plan for raising money for good roads was adopted by the farmers and fruit growers of Fennville, Mich., while at the same time securing better facilities for packing, shipping and disposing of fruits. An association was formed which during the season employed a man at the Chicago end of the line to see that the goods are properly received and accounted for. All surplus or savings at the end of the year are expended in graveling and improving the roads throughout the fruit country. The association alone during the past season shipped 265 cars of fruit by rail, and after paying all claims and expenses had a balance on hand of $875 for the making of good roads.

Advertising Means Enterprise.

People do not crowd a store which makes no use of its show windows. Such a store is obviously without enterprising management. For the same reason people are not disposed to trade at a store which does not advertise in an age when advertising is general.

The East Indians call rock crystal an unripe diamond.

MOVING THE MISSISSIPPI.

Deserted a Decade Ago, Vicksburg Is Again a River Town.

Until about the beginning of the last decade all the geography classes in our schools were taught, and correctly, that the city of Vicksburg, Miss., made historic during the Civil War, was situated on the bank of the Mississippi River. This statement, however, ceased to be a fact some ten or more years ago, when the Father of Waters, in one of his erratic moods, forced a new channel for himself and left Vicksburg perched on a high bluff, several miles inland. The town, which had been one of the most important steamboat ports on the big stream, was thus suddenly deprived of much of the traffic that had caused it to prosper. Strangely enough the misfortune was an echo of the famous siege of Vicksburg, and General U. S. Grant was primarily responsible for it. In order that the Union gunboats might run past the shore batteries unharmed Grant sought to divert the waters of the Mississippi away from the city by digging a new channel. The great river refused at the time to take the new course marked out for it, but it eventually did so, more than thirty years after such action could be of any use to the Union Army.

Naturally the people of Vicksburg did not accept with good grace the Mississippi's belated performance, so damaging to their material interests. They clamored for a restoration of the old days when they dwelt near navigable water and when stately floating palaces touched at their wharves and trade flourished. They appealed to Congress for aid, and the national lawmakers made an appropriation for constructing a canal northward to the Yazoo River. This canal was recently completed, and the water was let into the channel deserted by the Mississippi. The flow was abundant and filled the space from bank to bank, making Vicksburg once more a river town. The event caused general rejoicing in the city, which has already begun to feel the good effects of renewed traffic.—Leslie's Weekly.

WISE WORDS.

Nothing dries sooner than tears.—German proverb.

What's true is not always probable.—French proverb.

The public is wiser than the wisest critic.—Bancroft.

Literature is the immortality of speech.—Schlegel.

A little gall spoils much honey.—Portuguese proverb.

Those are generally good at flattering who are good at nothing else.—South.

The man who lets the world, or his own portion of it, choose his plan of life for him, has no need of any other faculty than the apelike one of imitation.—J. S. Mill.

It is a real delight, a restful pleasure to be in the society of people who have been disciplined in the amenities of life—of those who radiate an atmosphere of kindliness, of good will, and of helpfulness, wherever they go.—Success.

It is something to have an influence on the fortunes of mankind; it is greatly more to have an influence on their intellects. Such is the difference between men of office and men of genius, between computed and uncomputed rank.—Landor.

Cheerfulness, enforced at first, by and by inspires a gracious contentment, and self-sacrifice, at first a conscious struggle, loses itself in the self-forgetfulness of love. In such ways as these the daily crosses of duty change into the many-rayed crown of life.—Brooke Herford.

"No Hogs Now."

President Tucker, of Dartmouth College, is "telling one on himself." In fact, he avows that the entire story is a little too personal to be enjoyed.

Last summer he went to a Maine town for a short rest, and boarded with a farmer who was in the habit of taking a few summer guests into his house to help "lift the mortgage." Some time ago the President received a letter from his former landlady asking for his patronage during the coming summer.

"There are several little matters that I desire changed, should my family decide to pass the coming summer at your house," wrote President Tucker in reply. "We don't like the maid, Mary. Moreover, we do not think a sty so near the house is sanitary." And this is what he received in reply:

"Mary has went. We hain't hed no hogs sense you went away last September."

Brake For Electric Motors.

Mr. Arthur Hultqvist, assistant engineer in the workshops of the electrical street railways of Gothenburg, has recently constructed a brake for electric motors which consists of a small automatic reversing switch (omkopplare), which is fastened near the motor. On every machine is a pendant handle bearing the words "emergency brake" in red letters. If a workman should happen to be caught in the machinery or any other accident should occur, the machinery can be quickly stopped by pulling the handle, which sets the brake in action. It is claimed that the machine can be stopped in this way within one-half or one-fourth rotation. It is expected that this brake will be found very useful in every establishment where electric motors are in use.

An Expensive Penny.

The sensation of a London auction the other day was the sale of a gold penny of the reign of Henry VIII., the earliest and most beautiful coin of the English series, of which only five other specimens are known. It was knocked down to Mr. Norton, a private collector, for £325.

The Funny Side of Life.

TOO MANY BANQUETS.

I'd like to hold a hero's place
With talents to command it,
And yet I sadly fear that my
Digestion wouldn't stand it.
—Washington Star.

EVENING MATTERS UP.

Customer—"That is very large coal you have sent me for the range."

Dealer—"Possibly, but you'll notice that it is a very small ton."

SWEET NOTHING.

"Why did you send me a blank sheet of note paper instead of your usual love letter?"

"Because my love has grown beyond reach of expression."

A NEW OCEAN TERROR.

"Goodness, Bertie, what ever's the matter with you? Been plucked for your exam?"

"No; just flew into one of those new-fangled Marconigrams, that't what."—London Punch.

AN IMPOSSIBILITY.

"Whose photograph is that?"

"One of the chorus girls in the Frivolity show taken when she was sixteen."

"Nonsense; photography wasn't invented then."

ONE THING SURE.

"Do you believe Germany is in earnest about respecting the Monroe Doctrine?"

"I don't know. If she isn't, she's going to be."—Chicago Record-Herald.

LIMITATIONS.

Squire Cornfodder—"This free mail delivery is great, ain't it?"

Billy Shoemaker—"Wall, Squar', I don't like it. A feller can't get up no excuse to come to town evenin's any more!"

WORDS, WORDS, WORDS.

Browne—"Gringle has chosen a title for his last up to date novel that is simply perfection for simplicity, truth and directness."

Towne—"What is it?"

Browne—"Eighty Thousand Words."

ONLY PLACE FOR HIM.

Some one said to Brother Dickey: "Here's a story of a man who has eight living wives."

To which after a moment's reflection, Brother Dickel replied:

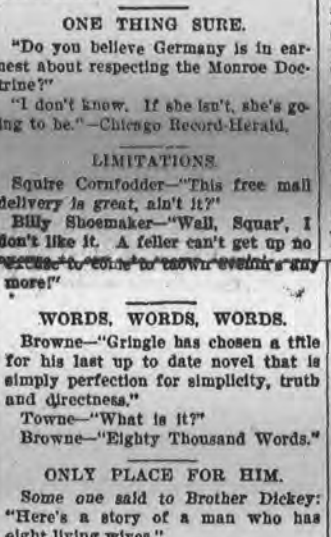
"Which one er de lunatic asylums is he in?"—Atlanta Constitution.

RESIGNED.

Golfing has a very Scotch story of an old caddie and his wife. The minister who was called in tried to comfort the wife, saying that while John was very weak he was evidently ready for a better world. Unexpectedly, however, John rallied, and said to his wife: "Jenny, my woman, I'll maybe be spared to ye yet."

"Na, na, John!" was the reply! "ye're prepared, and I'm resigned! Dee noo!"

PERFECTLY SAFE.



Dusty Darby—"'Ere's a man lost his eye from blood poisonin' by handlin' dirty money."

Weary Willie—"I wouldn't take chances like dem rich fellers does fer nuttin', would you?"

A KNOTTY PROBLEM SOLVED.

Sapleigh (naughty-never), Yale, made a new discovery recently.

Meeting some of his classmates on the fence, he enunciated this problem:

"If I should stand on my head," he began, "all the blood would rush to my head, wouldn't it?"

No one ventured an answer.

"Now," he continued, triumphantly, "when I stand on my feet why doesn't all the blood rush into my feet?"

"Because," said Matty Matics, "your feet aren't empty Sapleigh."

"PE-RU-NA SAVED MY LIFE,"

Writes Mrs. W. McRoberts.

Women Made Strong and Happy Mothers.

Catarrh of the Pelvic Organs is a Frequent Cause of Barrenness.

Pe-ru-na Eradicates Catarrh From the System.

MRS. W. McROBERTS

"I Do All My Housework and Take Care of My Baby and I Feel So Good."

TO the woman of ancient Israel not to become a mother was regarded as the greatest of earthly calamities. To become a mother—more especially the mother of a strong, healthy boy—was the height of glory for the faithful woman of the good old Bible days. Even now, when maternity is not esteemed as of yore, the mother of healthy children is an object of admiration, and sometimes envy, by her neighbors. As compared with ancient peoples, the average American woman has a low appreciation of motherhood. There are, however, a great many exceptions to this statement.

The accompanying letters from grateful women who have been made strong, healthy and happy mothers need no added words of ours to make them convincing. Catarrh had weakened and impaired their entire systems. Peruna made them sound and well.

Mrs. L. M. Griffith, Arco, Idaho, writes: "Your medicine did me a wonderful amount of good. It cured me of barrenness. I am 30 years old and never had any children; but since beginning your medicine I gave birth to a 10-pound baby girl. She is now six months old and weighs 25 pounds. My friends were all surprised. Some would not believe it until they came to see me.

"My husband says he never saw such a change in any one as there was in me after I had taken three or four bottles of Peruna. I am stronger than I have been since I was quite young. God bless you and your medicine forever. I cannot tell you all. My letter is too long already; but I will say Peruna cured me. I never saw or heard of anything half so good. I can never thank you enough for your kindness. In cases of la grippe it works like a charm. It cured my baby when other medicines failed. She was real bad with la grippe."—Mrs. L. M. Griffith.

Mrs. E. E. Thomas, Alpha, Mo., writes: "I have used your Peruna and Manalin. I had been doctoring for several years, but kept getting worse. One day a neighbor woman brought me your book, the 'Ills of Life,' and wanted me to take your medicine. I told her that I had given up all hope of ever getting well. I had tried so much medicine. My neighbors thought I was nearly dead with consumption.

"Finally I concluded that I would make a last trial. So my husband got me a bottle of Peruna and Manalin. I commenced taking them according to directions. That was two years ago. A year ago last November I gave birth to a 10-pound baby boy, who is well and hearty, and I am doing my own housework. I can never give Peruna too great praise. I think it is the best medicine I ever heard of."—Mrs. E. E. Thomas.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

A YOUNG MOTHER'S LETTER.

Mrs. W. McRoberts, writes to Dr. Hartman from Delano, Miss., the following:

Delano, Miss.

Doctor S. B. Hartman, Columbus, Ohio:

Dear Sir:—"I feel perfectly well of catarrh. I did as you directed me to and took Peruna and Manalin. The third of March I gave birth to a 10-pound baby girl and we are both well and happy. I am very thankful to you, and Peruna saved my life. I recommend it to everyone and can't praise it enough.

"I send you my own and my baby's picture. She is so sweet and good,—she is a Peruna baby. I have such good health now. I do all my housework and take care of my baby, and feel so good.

"There are three or four of my neighbors using Peruna now, since it did me so much good. They were just run down, and they think it is fine. It is so good to give strength."—Mrs. W. McRoberts.

Long Service Engine.

There is in Birmingham an engine which was erected in 1767, and has been working continuously ever since. It is of beam type, and the oak beam was only replaced at the end of last year by one of iron. In 1802 a new cylinder was put in, but the rest of the engine remains as it was 136 years ago, even to the connecting rod for rolling mill purposes.—Tit-Bits.

Dr. Ekenberg, a Swedish scientist, has invented a machine for converting skimmilk into a powder, which when dissolved in water gives the properties of ordinary milk.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

We are told that it takes two to make a quarrel, and also that man and wife are one. It's hard to reconcile these statements.

The 1902 prune crop of Oregon estimated commercially at 15,000,000 pounds.

Use Allen's Foot-Ease.

It is the only cure for Swollen, Smarting, Tired, Aching, Hot, Sweating Feet, Corns and Bunions. Ask for Allen's Foot-Ease, a powder to be shaken into the shoes. Cures while you walk. At all Druggists and Shoe Stores, 25c. Don't accept any substitute. Sample sent FREE. Address, Allen S. Olmsted, LeRoy, N.Y.

The forests of South Africa are composed principally of stunted and gnarled native trees, fit only for wagon making and fence building.

"The Klean, Kool Kitchen Kind" of stoves keep you clean and cool. Economical and always ready. Sold at good stove stores.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, Ohio.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c. per bottle. Sold by all Druggists.

Hall's Family Pills are the best.

Bells are never used in Mohammedan mosques. The Moslem race detests bells under the delusion that they cause the assemblage of evil spirits.

I do not believe Piso's Cure for Consumption has an equal for coughs and colds.—JOHN F. BOYER, Trinity Springs, Ind., Feb. 15, 1900.

It's a physical impossibility for some people to live within their income, because they haven't any.

DOAN'S CHANGE DOUBT TO GLAD SURPRISE

EVERETT, MASS.—I received the sample of Doan's Pills and they stopped all my trouble of pain in the back, from which I have suffered for two years. I am a sole-leather cutter, and being on my feet and lifting heavy dies all day, appreciate the help Doan's Pills have given me. I feel like a new man.—GEO. A. BURGESS, 163 Belmont Street.

ST. LOUIS, MO.—Received sample, and am on my first bottle from the druggist—they helped me wonderfully. I had a feeling of wanting to urinate all the time, and trouble in passing, burning and itching. That is all gone now, and I feel thankful.—E. K. STEVENSON, 5351 Easton Ave.

ASPEN, COLO., April 10, 1903.—Doan's Kidney Pills accomplished the desired result in my case—relief came the second day after I commenced taking them. I was troubled with retention and dribbling of the urine. Now it is natural and free as ever in my life.—D. L. STAFFORD.

Aching backs are eased. Hip, back, and loin pains, limb swellings and dropsy signs vanish.

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, dizziness, headache, nervousness.

ROUND ABOUT JERSEY.

(*Continued from first Page.*)

grow only an inch a year, must have from twenty-five to fifty years' growth to be of the desired size, and several hundred of these are needed to go around the edge of the pool. In order to obtain these trees, agents of Mr. Blair are now canvassing the country for a distance of fifty miles around his residence, and are buying up boxwoods wherever they can be found. After a tree has been purchased a force of men is set to work digging trenches about it. A box about four feet square, made out of two-inch planking, is then built about the roots of the tree, and when this is completed the tree, with its natural soil is loaded on a wagon by the aid of a derrick. Ten teams are constantly engaged in carrying these trees to the Blair residence.

John McNamara, an apprentice boy employed by John R. Croot, a plumber of Summit was seriously injured by an accident that resulted from his fooling with gasolene last Saturday. He had seen a trick performer at a theatrical entertainment perform some sort of a feat that appeared to blow a flame from his mouth, and it is believed that he was trying to imitate that trick. He filled his mouth with gasolene and then lighted a match, holding it but a few inches from his face. Toward this burning match he he blew the gasolene, and the flame backed to his face and head, burning both horribly. The physician in charge of the boy believes he will recover, but will probably be disfigured.

The faithfulness of dogs was never more fully shown than by an incident witnessed by Frederick Voight, of 71 Thorn street, Jersey City Heights, who had his Newfoundland and fox terrier at the reservoir pond for a bath last Saturday. Voight threw a stick into the water and the smaller dog went to fetch it. It got the piece of wood, but on its return it suddenly stopped and began to make desperate offorts to keep its head above the water. The man on the bank saw at once that something had happened to the terrier, but was helpless to aid him. The large dog at his side, with almost human intelligence, seemed also to divine that the dog in the water was drowning and springing into the pond soon reached the gasping and struggling terrier. The large dog grasped its smaller companion by the neck and carried him to the shore, where both lay panting for breath. A piece of wire had become entangled in the terrier's feet and he would undoubtedly have been drowned but for the action of the Newfoundland dog.

Revision of State Game Laws.

(*Continued from first Page.*)

cember, both dates inclusive, of each year.

It shall be unlawful to hunt, kill or destroy, or attempt to hunt, kill or destory, any partridge, grouse, pheasant, quail, woodcock or rabbits while there is snow upon the ground in such condition that any such bird or animal may be tracked therein, or by tracking any such bird or animal in the snow, or to have in possession any such bird or animal above mentioned that has been hunted, killed, destoryed or taken as aforesiad under penalty of twenty dollars for each bird or animal.

It shall be unlawful to take or to attempt to take any fish from part of the waters of this state by means of any contrivance whatsoever, excepting in the manner commonly know as angling with hand-line or with rod and line; provided, however, that this provision shall not apply to the catching of eels by means of eel wires from the fifteenth day of September to last day of October, both dates inclusive; nor to the taking of suckers, eels, catfish or carp with a spear in all streams and in all lakes and ponds of less than one hundred acres, from the twenti:th day of February to twentieth day of April, both dates inclusive, of each year; provided, also, that it shall be lawful to take minnows and other bait-fish with a seine not over fifty feet in length in all ponds and lakes which have an area of over one hundred acres, and in all other waters with a seine not over thirty feet in length; in every such case, however, all trout, pickerel, bass, pike and pike-perch captured therein shall be immediately released thereform uninjured.

It shall be unlawful to kill or have in possession any black bass Oswego bass, white bass, calico bass or pikeperch, excepting only from the fifteenth day of June to the last day of November, both dates inclusive.

It shall be unlawful to take, kill or have in possession any pike or pickerel excepting only from the first of May to the last day of November, both dates inclusive.

It shall be unlawful to catch, kill or have in possession any brook trout, except only from the first day of April to the fifteenth day day of July, both dates inclusive.

It shall be unlawful in any manner to take any trout, bass, pike-perch, pike or pickerel between 9o'clock in the evening and daylight of the morning following.

It shall be unlawful to put, place, use or maintain in any of the waters of this state inhabited by pickerel, pike, pike-perch, black bass or trout, any set-line or set lines, or to use upon a line for the taking of fish in such water any contrivance having more than three hooks attached thereto, under a penalty of twenty dollars for each offense.

It shall be unlawful at all times to use, have in possession, or offer or expose for sale, any artificial bait with more than three hooks, or more than one burr of three hooks, attached thereto, under a penalty of twenty dollar for each offense.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue :

NORTH PLAINFIELD

Mary E. Messerschmidt and husband to Fannie G. Bolen, $1.

Alice F. Martin and husband to Cornelius R. Gulick, $1.

Anna R. Rhodes and husband to Dorcas Burtchell, $3,800.

Joseph A. Hubbard to Estelle Aken, $2950.

Addie Dietrich to Christena Howard, $900.

Summer Outings.

The season for excursions of Sunday Schools, Churches, Societies, is at hand and everything is astir with Walter C. Walsh, Jr., the District Passenger Agent of the New Jersey Central at Newark, N. J. Mr. Walsh is one of the best known excursion managers in this section, and the largest excursions from Newark and vicinity have been under his direction. Among the excursion resorts reached by the New Jersey Central are Atlantic City, Mauch Chunk, Lake Hopatcong, Asbury Park, Ocean Grove, Highland Beach, Boynton Beach and innumerable other resorts, while its well known Sandy Hook steamer "St. Johns" can be chartered for trips up the Hudson or to the Shore and Sound excursion grounds. The New Jersey Central devotes particular attention to excursion business and for information, dates, rates, etc., apply to W. C. Walsh, Jr., D. P. A., Broad street station, Newark, or to C. M. Burt, G. P. A., 143 Liberty street, New York City.

Early Spring at the Seashore.

In a hundred ways conditions at the sea shore have changed. The time was when one never considered that the shore could be visited until the hot season of July and August, first because of the supposed miserable weather, and because there were no hotel accommodations for those who dared a visit, nor were there any attractions in the amusement line. Of course the Southern and Florida resorts were in bloom, but in May and June the weather was far from delightful, and for the busy man who delights in a day or two's outing during these charming months Florida was out of the question. Then Atlantic City came to the front. A superb climate, magnificent hotels, entertainment galore, and all within three hours of New York, and at the shore too, what more could you ask.

Atlantic City at the present time is the ideal spot, its temperature averaging in the nineties, when overcoats and heavy clothing are unnecessary. The ocean breezes are most exhilarating and bracing, and the board walk is thronged with a happy crowd. Down at the inlet two score of craft are in commission for delightful pleasure cruises along the shore. The several big ocean piers are alive and entertainment is provided for young and old in the form of theatricals, concerts, cakewalks, basketball games, dancing and like diversions. The bazaars on the board walk are all open and from the inlet to Chelsea there is an incessant liveliness. Atlantic City was made famous by its marvellous hotels and every one of the beach front hostelries numbering fully a score and accommodating fully 20,000 guests, is open for the reception of visitors. These hotels cater to your every demand, and nothing is left undone which will make you happy and comfortable.

The cuisine in every instance is equal to that of the fashionable metropolitan houses, and when you consider the fact that Atlantic City is but 3 hours distant from New York by the New Jersey Central, it can be readily imagined that Atlantic City is the leading resort for May and June, as well as the seasons. The New Jersey Central has vestibuled trains with buffet Pullman's from its Liberty Street Station, New York, at 9.40 a. m. and 3.40 p. m., and if you want to know about Atlantic City send a postal to C. M. Burt, G. P. A., New Jersey Central, New York City, room 8, for booklet, free for the asking.

Why He Couldn't Buy.

It happened in the south—not the new south, but the old south, where they live in the same old way.

The enterprising Yankee thought he saw some "opportunities."

"This looks like good land," he commented.

"It is," replied the native, carelessly.

"But the people here don't make the most of it."

"They don't," admitted the native.

"I could make three times as much out of it as they do."

"You could, if you could get it."

"Can't I get it?"

"Well, hardly."

"Not if I pay twice what it's worth to the present owners?"

"You couldn't buy it for ten times what it's worth to them."

"Why not?"

"Stranger," said the native wearily, "you don't seem to get the hang of things here. If they sold they'd have to move away, wouldn't they?"

"Of course."

"Well, they're too lazy to move."—Stray Stories.

Good Breeding.

The best bred women do not fuss. They take their gowns and their furniture and their jewels as a matter of course. They are unconscious of their veils and their gloves, and they expect every one else to be equally so. If they see an intimate wearing a handsome gown, they refer to it admiringly, but they also preface their comment with an apology. Their differences with their husband are not aired, neither are the domestic upheavals. The repose of the well bred woman is not the quiet of weakness. It is the calm of trained faculties, balanced so nicely that an earthquake may cause a change of color, but will not bring forth a loud cry. Well bred women are a boon to the human race. They help the world to maintain a high standard both of morals and behavior.—Washington Star.

The Indian Could Box.

Two roystering young New Yorkers entered a cafe on Broadway and jostled against a sallow-faced little man wearing a sombrero. He turned, expecting an apology, and was insulted by one of them. The little man's right fist shot out to the swell's jaw, lifting the insulter off his feet, and knocking him senseless. The assailant was arrested, and in court told the magistrate that he was Wounded Buffalo, son of Chief Running Elk, of the Mohawk tribe. He learned to box at the Carlisle school, where he played with the football eleven. On hearing the circumstances the magistrate discharged him.—N. Y. Sun.

Japanese Railway Waitresses.

The Japanese railway company recently introduced dining cars on its trains, and also pretty Japanese girls as waitresses, and the experiment has been found to be a great success. The girls have been carefully chosen from among some of the best families of the island and were required to be of known good health, good appearance and with a past absolutely marked for its respectability. The girls are not allowed to talk to the passengers, and would lose their jobs if they were caught taking a tip.—Washington Star.

Insinuating.

Harry—I hear you do not speak to Miss Rose.

Reggis—No, she is too offending. I told her I went to a phrenologist and had my head examined and she said there was nothing in it.

"Did she mean there was nothing in phrenology?"

"She said I could draw my own conclusions."—Chicago Daily News.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address,
Rev. EDWARD A. WILSON, Brooklyn, N.Y.

A LIBERAL OFFER

As an Inducement to secure New Subscribers, and for Old Subscribers to pay up, we will, until MAY 10th, 1903, give each subscriber to the REVIEW, absolutely Free, a year's subscription to the Tribune Farmer; or the REVIEW and the Tri-Weekly Tribune for the single price of that paper.

Read Our Combination Offers Below.

Most Liberal Offer Of The Year

The New York Tribune Farmer

is a national illustrated agricultural weekly for farmers and their families, and stands at the head of the agricultural press. It is a practical paper for practical farmers, helping them to secure the largest possible profit from the farm through practical methods.

It is entertaining, instructive and practically useful to the farmer's wife, sons and daughters, whose interests it covers in an attractive manner.

The regular price is $1.00 per year, but for a limited time we will receive your subscription for THE NEW YORK TRIBUNE FARMER and also for the REVIEW, Plainfield, N. J.,

Both Papers One Year for only $1.00

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRIBUNE FARMER, New York City, will bring you free sample copy.

Almost As Good as Daily News-Paper

THE NEW YORK Tri-weekly Tribune

is a metropolitan newspaper for busy people, almost as good as a daily.

It is published on Mondays, Wednesdays and Fridays, and contains all the most important news of The Daily Tribune, which is a guarantee of its value.

If you live in the borough or on a farm and have not time for a daily newspaper you may be kept in close touch with all important news of the world at a very low cost.

The regular price of THE NEW YORK TRI-WEEKLY TRIBUNE is only $1.50 per year, but you can secure it with the REVIEW, Plainfield, N. J.,

Both Papers One Year for $1.50.

Send your order and money to the REVIEW.

Your name and address on a postal card to THE NEW YORK TRI-WEEKLY TRIBUNE, New York City, will bring you a free sample copy.

Remember, this offer holds good only until May 10, 1903, after that date the price will be raised.

North Plainfield Weekly Review.

VOL. 4—NO. 8. NORTH PLAINFIELD, N. J., SATURDAY, MAY 16, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

W. Wm Weckoff, of this borough had two fingers badly mangled at the Potter Press Works Wednesday.

The house on Westervelt avenue, which A. V. Searing, Jr., is having built is nearing completion.

The condition of Charles J. Fisk, of Plainfield, who was so ill last week that it was thought he could not live, is now slowly improving.

Somerset Council, Jr. O. U. A. M. entertained members of Franklin and Benevolent Councils to a smoker Wednesday evening.

The Somerset County Teachers' Association will hold a meeting in the Bound Brook public school building today beginning at 10:30 a. m.

Mrs. Jennie Fowler Willing, the founder of the Women's Christian Temperance Union, will give a series of seven lectures in Plainfield May 19, 20 and 21.

Members of the Ladies Aid Society of Grace M. E. Church, this borough, will hold a fair and strawberry festival on the evenings of May 28 and 29 at the church.

Otis Simonson, of Duer street, while working at Plainfield Electric Light Company's plant last Monday, fell and while seriously injured has been confined to the house.

At a meeting of the Grand Commandery, Knight Templars of New Jersey held in Trenton last Tuesday, Dr. D. C. Adams, of this borough was chosen grand commander.

Dr. Chas. Lancaster, one of the oldest if not the oldest person in this borough, is able to be out again after a severe illness which confined him to his bed for five weeks.

The funeral of Mrs. Albert Runyon was held Thursday evening at the home on Grove place. Rev. J. B. Cleaver, of Bound Brook officiated. Interment was private at Orange, Friday.

E. A. Haywood and Kenneth Robinson have planned a tennis tournament for the Young Men's Christian Association members. All entries must be in by May 23, and play will commence June 1.

Miss. Tsilka will speak in the Congregational Church tomorrow evening. Mr. Tsilka and little Elenche will accompany her. It will be remembered that Mrs. Tsilka was Miss Stone's companion in captivity among the brigands of Bulgaria.

The Union County Board of Chosen Freeholders met and organized last Wednesday morning. J. Frank Hubbard of Plainfield, was unanimously elected director, which is the seventeenth time he has been successively elected to this office.

William Ross, of Plainfield was arrested for intoxication last Tuesday and taken to police headquarters. While confined there he strangled himself to death. He leaves a wife and nine children the youngest an infant only two weeks old. The family are in destitute circumstances.

The Odd Ladies of Mizpah Lodge, No. gave an "Old Folk's Concert" at Washington Hall Tuesday evening which was so well received that it may be repeated. Mrs. H. L. Gibbons, Mrs. E. K Cox, Mrs. A. Randolph and Mrs Henry Benn comprised the committee in charge of the affair.

Ragmar Jensen, a Danish girl, who had only been in this country three weeks, escaped from a trolley car last Sunday afternoon while it was in motion and was almost instantly killed. It is thought that in her eagerness to see an acquain she forgot to notify the conductor to stop the car and thus made the jump.

Low, chief book-keeper of the department of the Jersey Central road, who removed with his family this borough to Philadelphia year ago, was in town Thursday after some work which he will on his property on Fairview

e of Frederick E. Kanen, of against the Philadelphia and ilroad for injuries received in l wreck, the jury last Tuesat in a verdict for $18,000. The sued for was $30,000. The railthrough i's counsel has given notice of appeal, believing the amount to be excessive.

Relief Association Elected Officers.

The following men have been elected officers of the North Plainfield Firemen's Relief Association: President, William Demarest; secretary, David Bodine; treasurer, Jacob M. Higgins. The members of the board of visitors are Julius J. Stahl, George Schlereth, Lewis Bimble and Charles Keller.

Howard George Falls and Breaks Leg the Second Time.

Howard George, of Craig place, a victim of the Westfield wreck, who was fast recovering from the bad effects of the wreck, while walking about on crutches at his home Sunday afternoon, one of crutches slipped with the result that he broke his leg again in the same place previously broken. Dr. Endicott was called in and it was at once placed in a cast again and the unfortunate young man will have the second ordeal of the bone knitting process to pass through.

Special Music at the First Baptist Church.

Rev. Edward Judson, D. D. will preach at the First Baptist Church tomorrow morning and evening. As Dr. Judson proposes soon to sail for Europe to spend a year abroad with his family, this will be his last appearance in the pulpit of this church.

Special music has been arranged by the choir for the evening service, which will be in the nature of a farewell to this preacher, who is highly esteemed by the congregation of the First Baptist Church.

An offering will be made for the King's Daughters' summer mountain camp, and the Fresh Air Home of Miss Curry at Netherwood.

Semi-Annual Meeting of Kings Daughters.

The semi annual meeting of the city union of King's Daughters was held at Trinity Reformed Church Tuesday afternoon.

Reports were listened to from various circles which were interesting and encouraging.

Election of officers for the year resulted as follows: President, Mrs. C. A. Reed; vice president, Mrs. D. W. Hyde; recording secretary, Mrs. F. W. French; corresponding secretary, Mrs. Anna Most; treasurer, Mrs. S. A. Krom.

The baby camp on the mountain will be continued this summer.

Found Dead in His Wagon.

David K. Campbell, a farmer residing on the mountain back of Adamsville was found dead in his wagon, which was in the yard at his home, last Sunday. County physician Taylor decided that the man had died of heart disease.

Somerset County Freeholders Organize.

The last meeting of the old Board of Freeholders was held in the Court House Somerville, Tuesday.

The new board organized Wednesday and is as follows:

Director, William J. Logan; Clerk, A. P. Sutphen; County Collector, E. B. Allen; County Engineer, Joshua Doughty, Jr.; Counsel, John A. Frech.

Justice Kitchen swore in the officers.

The new board is constituted as follows:

Bedminster—David Philhower, D.
Bernards—J. A. Whitenack, D.
Branchburg—E. B. Hoagland, D.
Bridgewater—Wm. J. Logan, D.
Franklin—T. E. Gibson, D.
Hillsborough—R. W. Hoagland, R.
Montgomery—Jacob M. Vreeland, R.*
North Plainfield—Wm. M. Demler, D.*
North Plainfield Boro—A. Lutkins, R.
Warren—Joel Codington, D.*

*Elected in April.

The following newspapers were selected to print the financial statement: Unionist Gazette, Messenger, Democrat, Chronicle, North Plainfield Review and State Centre.

NEWS FROM WATCHUNG.

Miss Cooper, of Gallia is visiting her grandmother, Mrs. D. Bartels.

Percy Cannon, the blind man, conducted a very interesting service at our chapel last Sunday night.

Mrs. Col. Hines and family spent Sunday with her sons-in-law Richard and Charles Moldenke.

Henry Guinard is improving Somerset Park and is enclosing it with the Page wire fence.

Postmaster Schmidt has made application to the Post Office Department, at Washington, D. C., for two mails a day. The probabilities are that he will get it.

There has been an unusually good attendence at our school this month, the average in the primary grade being 35. A kindergarten department has been added to the school which is under the efficient supervision of Miss A. J. Higgins.

Crap shooting is still practiced on Sunday in this township, and we are sorry that young men from this neighborhood are among the number. The game must be stopped and if the local authorities cannot do it, then officers from Somerville will be called upon to do so.

School Roll of Honor for April. Grammar Grade. Theresa Schmidt, Edith Kutz, Willie Demler.

Primary Grade. Elsie Schmidt, Helen Schmidt, Clara Mobus, Charlie Wersing, Eddie Wersing, Louie Clementz, Clarence Schmidt.

HIGH SCHOOL NOTES.

Items of Interest Regarding the Borough Schools

Dan Cupid is a marksman poor,
Despite his love and kisses;
For while he always hits the mark,
He's always making Mrs.

WILLIAM CUBBERLY.

Miller in Algebra—6 minus 3 are 2.

The High School spelling test will be held Monday morning, June 1st.

Several of the High School girls went with the ball team to New Brunswick Saturday.

All the persons who have seen the prize story by Frank Webster are sure that it will win the prize.

Miss Glass has lost her glasses and would like to have them returned by anyone who has found them.

Ernest Powlison, while experimenting, was severely burned by an explosion of sulphuric acid in the laboratory.

Otto Mueck is playing a fine game of ball this season and he will play with the High School team next season.

Memorial Day exercises will be held in the High School Chapel on Friday, May 29th. An elaborate program is being prepared.

The school has purchased two new typewriters, thus making eight typewriters, for the use of the High School students.

North Plainfield Crescents fair on lawn of Councilman Lee on Grove street on May 28. Charles Lee, Jr. chairman, Dorrance Smith, Harry Adams.

Freeday will be held on Friday, June 5th as the Memorial Day exercises will be held on the last Friday in May. This will be the last Freeday of this school term.

The North Plainfield High School Athletic Association will go to Pennington, N. J. as the guests of the Pennington Seminary Athletic Association on Decoration Day.

The High School team was unexpectedly cancelled by the Jersey City management. A game was arranged with a team representing the North Plainfield Firemen and the High School won by the score of 8 to 4.

The Invincible Athletic Association will hold a fair on the lawn of Mr. McClintock of Fairview avenue this afternoon for the benefit of the ball team. William Heath, chairman, Marshall Ward, Byron McClintock.

The class of 1904 of the North Plainfield, High School will hold a fair on the school grounds May 27 and 28. One half of the proceeds will go to the High School Athletic Association and the rest will go to purchase a class flag. The affair is in charge of H. C. Brose, chairman, Ernest Powlison, Leonard Mantz and Hanford Miller.

The High School baseball team played the Plainfield High School team on the Stillman field on Tuesday afternoon at 4.30 p. m. The game was the best one yet played by our High School and it was virtually a pitcher's battle. The game was lost on errors by Kipsey, McLaughlin and Ovens which were costly. The High School played together remarkably well. McLaughlin pitched for the N. P. H. S. team and allowed only two hits while only one hit was made off Van Auken. Two errors were made by Plainfield and three by our High School. Plainfield High School won by the score of 4 to 0.

The High School has five more games scheduled before the season ends. May 15—Underwood A. A. at N. P. H. S. Field; 18—Battin H. S. at N. P. H. S. Field; 23—Rutgers Prep. at New Brunswick; 27—Scotch Plains H. S. at N. P. H. S. Field; 29—Rutherford H. S. at N. P. H. S. Field.

Batting averages of the High School baseball team: Conover 385, Armstrong 334, Humble 231, Newmiller 231, Adams 200, Kipsey 143, Ovens 000, McLaughlin 000, George 000, Schuck 000, Mundy 000.

Fielding averages of the High School Baseball team: Ovens, 1.000; Mundy, Newmiller, 1.000; Schuck, 1.000; Humble, .941; Armstrong, .923; McLaughlin, .750; Adams, .600; Conover, 563; George, .455; Kipsey, .400.

The North Plainfield High School base ball team went to New Brunswick Saturday to play the baseball team of the Rutger's Preparatory School on Neilson field.

By some of the members the game was the best yet played by the High School as they won the game but lost it on errors.

On account of William Mundy being hit in the eye by a thrown ball the previous day, his place had to be filled by McLaughlin at third. This not being McLaughlin's regular position, he did

(Continued on Last Page.)

THAT AWFUL DRAIN,

Interesting Facts Regarding the Recent Press Editorial

The Daily Press, in its anxiety to injure the good name of North Plainfield, has recently been publishing that there is a drain "emptying a stream of filth into the low land immediately adjoining Stony brook." and that "a similar drain exists in the rear of the property of T. B. Brooks, whose beautiful place is on Rockview avenue," etc. In making these statements it wrote up the article in its usual fashion, utterly careless of the truth, and so worded that the Board of Health in North Plainfield naturally felt not in the most amiable mood.

After an investigation, and finding that the Press statements were not true in fact, the Board of Health sent a communication to the Press, signed by its president, Mr. Andrew Love, which, after some delay, the Press published, but added to it a long editorial comment "deploring the fact that a body of such reputable gentlemen should fall so greatly into error" as not to accept the Press as an authority on every point concerning drains and cesspools in the borough. Undoubtedly the Press can be, if it desires, an authority upon cesspools, but nobody would accept it as such upon pure water drains.

The REVIEW has examined into the situation with a view to ascertaining the facts, and these are the facts:

In the summer of 1901 Mr. E. S. Hooley complained to the Mayor that an old drain, which ran through, or emanated from three properties upon Rockview Terrace, and which discharged upon his lowland meadow, was noxious. The Mayor informed the Board of Health, who immediately visited the premises, and, after examination, discovered that while this drain had been constructed to carry away spring water (there are numerous springs on the hillside which had been made to converge in this drain as an outlet) that one of the houses had its plumbing connected therewith. The party residing there disclaimed any knowledge of the fact, and there was no reason to disbelieve the truth of his statement, as he had only recently purchased the property. This gentleman immediately informed the Board that he would be glad to disconnect and sent for a plumber, Mr. C. W. Krausse, who disconnected the plumbing entirely from the drain. This remedied that evil and it has been remedied from that time until this, so far as the Board has known.

The Press in its article said: "A year ago the borough health authorities were notified but the trouble was not remedied." Inasmuch as the Board of Health did remedy it immediately when brought to their attention, it will be seen that the statement of the Press is wholly untrue, and we do not wonder that the Board of Health felt provoked at such unwarranted criticism.

The first Press article, which was printed three weeks ago, went on to say concerning this drain: "A stream of water flows from the drain and solids are easily distinguishable. . . . The stream makes its way across the low land to a 'blind' ditch which carries it to the brook not many yards above the swimming pool where the small boys of the borough have been wont to congregate for years. A number of cases of typhoid fever have been reported among the boys during the last few years."

No cases of typhoid fever occurred as stated.

On the appearance of the above article, Mr. Andrew Love, president of the Board of Health, Rev. W. E. Honeyman, the secretary, and ex-Marshal Pangborn, the inspector, with a digger, revisited the drain to see if since the remedy of a year before any one else had probably connected with it. They examined the mouth of the drain; then went back some distance, dug down and took up the pipe, and ran a wire a long distance up the pipe. The water was clear, without odor, and there were no evidences whatever of either grease, as if from a kitchen sink, or of sludge. They also went to the only house which they thought might possibly have been connected with it since a year ago, put coloring matter in the plumbing and watched for it to come out. This is a test which is absolutely certain as regards the connection of private houses with drains. The result was that no evidences whatever were seen of house connection with this spring drain. The Board could do no more.

At the same time the same members of the Board of Health visited the drain at Rockview avenue, which is a drain taking away surface water from the streets. They made tests there which showed that only surface water went through it. After severe rains this street water is discolored and has an odor, because of the refuse on the street which passes through it.

The Press said in this connection: "Mr. Brooks has repeatedly called the attention of the health authorities to this drain but the flow still continues." We find on investigation that six or seven years ago Mr. Brooks objected to this surface drain to the proper authorities, namely, the committee on streets of the borough who could then, and might now, remedy the surface drain if they would. Nothing was done, however, about it and its condition is precisely now as it has always been.

The Board of Health being certain that neither drain is a menace to public health and is not drained into by private parties, cannot, under the law, take further steps but have stated that they will be glad to do anything in their power at any time, should either drain become a nuisance, or should they secure any clue to either being connected with any private house.

It is what is called in politics "small potatoes" for the Press to undertake to run up against the Board of Health of the borough of North Plainfield, with the sole design, as is apparent to anybody, of belittling not the Board of Health so much as the borough in the eyes of its readers. Everything that can be devised in the Press office, or in the offices of the two literary bureaus near by, (both of which frequently supply the Daily Press with editorials or comments), to run down the borough, and such officials of it as never agreed with the views of the Ring on the annexation question, it prints that tends to besmirch the borough. If the Press imagines that any such miserable falsehoods concerning North Plainfield are going to hasten the day when the borough shall surrender its independence it is mistaken.

Our local board of health has always had the reputation, both here and at Trenton, of being one of the most efficient in the state. It is composed of honorable men all of whom act without any consideration, except the secretary, who is paid for clerical work, and they perform their duty fearlessly, regarding neither friend nor foe, whether as concerning nuisances, distribution of milk, or any other thing which comes within their authority. This Board, like the borough itself, can afford to be attacked in the Press, because that journal is no longer possessing influence either in Plainfield or North Plainfield. As was well said by the Courier a few nights ago, what that journal needs is an editor with judgment and all round common sense. It is an ill bird that fouls its own nest. The nominal editor of that journal is a resident of the borough, and ought to be doing everything to build up the interests of the borough instead of pulling them down.

The Press concludes its comments on the article by Mr. Love in these words: "The Board of Health should be working in heartiest co-operation with the Borough Sewerage Commission and should aid that body as far as possible instead of refusing repeatedly to meet with the Mayor and members of the Commission for a discussion of the sewerage problem." Which is the veriest nonsense, because the Board of Health has nothing to do with the establishment of the sewerage plant in the borough, any more than the school trustees, or the trustees of the Grace M. E. Church; nor have they repeatedly refused to meet with the Mayor and members of the Sewerage Commission.

We advise our neighbor to celebrate another anniversary and start anew by resolving to tell the truth.

Somerset Courts.

In the Somerville Courts last Monday the first criminal case moved for trial was that of the State v. William Rolph. The defendant was indicted for breaking and entering the general store of James W. Rodenbaugh at Gladstone, and stealing merchandise. The jury rendered a verdict of acquittal.

The case of William Brown (colored), charged with malicious mischief at the home of T. G. Winsor, was next tried. After the evidence was in James J. Meehan, for the defense, asked the court to instruct the jury that no malice had been shown. The court directed the jury to acquit.

Samuel S. Johnson (colored), charged with assault upon a young girl at Millstone was placed on trial. The jury disagreed.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

Mrs. Nancy Pierce, of May's Landing, owns a chicken, hatched this week which has four legs, three wings, two bodies, two tails and one head.

Swain Woolson, assistant keeper of the Cape May lighthouse, fell from the top of a twenty-foot ladder, breaking his wrist, injuring his hip and sustaining other bruises.

A new industry at North Branch this summer will be the raising of goldfish by a Philadelphia concern, which is building a large pond on J. V. D. Ten Eyck's farm for that purpose.

It is not an unusual sight this spring to see on many of the truck farms around Mullica Hills, entire families, including the wife and daughters, at work in the fields. This situation is due to the scarcity of other farm help.

The first Odd Fellows lodge in New Jersey was Jersey Lodge No. 1, organized in Camden in 1833. The lodge is still in existence and is flourishing. By the last report of the grand lodge, New Jersey had 261 lodges, with a membership of 25,165. Last year these lodges spent $140,033.56 for relief work.

By the derailing of a freight train on the Philadelphia and Reading Railroad near Round Brook on Monday, Henry Shirley, of Philadelphia, the engineer, was instantly killed. Joseph Gallagher, the fireman, also of Philadelphia, was cut and bruised, but not dangerously injured. The train was running on a siding. It ran into a derailing switch, which threw the engine with eight cars off the track. The engine toppled over, and Shirley was buried under it.

Mrs. John Donovan, of 305 Second street, Elizabeth, was on a New Jersey Central Railroad express train Tuesday on her way home with her two-year-old niece. The child climbed to a seat near an open window, and at Berge's Point fell to the tracks. Howard Galbraith, a student at the New York Dental College, saw the child fall and jumped from the car. He found the little girl crying, but not seriously hurt.

Mrs. Mary Tripp, an old woman, who has been on Passaic's poor account for many years, carried her sick husband from a burning house Saturday morning just as the flames came through the floor near his bed. The man had been bedridden for many years, and his wife has supported him by doing washing. She was about to start for work when the fire was discovered. She ran into her husband's room and carried him in safety to the back door.

Joseph Stryker, superintendent of George A. Clarke's creamery at Lebanon, has about twenty eels in a sheet of water near the creamery which he has succeeded in taming. When he wishes to call the eels together he simply strikes several times on the water, when they will come to the surface and eat worms out of his hand. They will also allow him to take them from the water and fondle them. Mr. Stryker feeds his pets every evening at 6 o'clock, and it is a sight to see them come to the surface of the water and take the food from his hands.

The people of Trenton are enjoying a handsome cross of tulips on the lawn of the residence of the late Mrs. Washington A. Roebling. Last fall Mrs. Roebling said that she wanted her lawn to be more beautiful than ever this spring, and she gave minute directions for carrying out her wishes. For weeks tulips have bloomed in the oval bed in the yard, but Mrs. Roebling's instructions were that the bulbs should be planted in such a manner as to insure the formation of a cross by the late bloomers. All the flowers have dropped their blossoms except those that form the cross.

Carl Gruno, of Morris Plains, known by many as an ornithologist of ability, stumbled and fell last Saturday night, breaking his neck. Gruno was about forty-five years old, a German who had lived in this country for many years and had served upon a number of estates in the capacity of game-keeper or bird warden. He claimed to know more about birds, their life, habits and anatomy than any man in the country. He was a highly cultured man, spoke half a dozen languages fluently, and could imitate the warble or whistle of any bird. He had at various times been in the employ of George J. Gould, John D. Rockefeller and George H. Vanderbilt.

Captain Asher Wardell, keeper of Life-

(Continued on Last Page.)

MUST CONTROL THE PACIFIC

President's Most Important Speech Since He Left St. Louis.

WE INDEFINITELY DESIRE PEACE

But to Maintain Its Supremacy America Must Be Constantly Prepared For War —His Theme Was Trade Development and the Protection of Our Newly-Acquired Possessions.

San Francisco, Cal.—President Roosevelt made the most important speech he has delivered since he left St. Louis at the Mechanics' Pavilion here. His subject, "Expansion and Trade Development and Protection of the Country's Newly Acquired Possessions in the Pacific," together with the advocacy of a greater Navy, made his speech of particular interest to Californians, and he aroused his auditors to a high pitch of enthusiasm. The President said:

"Before I saw the Pacific slope I was an expansionist, and after having seen it I fail to understand how any man confident of his country's greatness and glad that his country should challenge with proud confidence our mighty future can be anything but an expansionist. In the century that is opening the commerce and the progress of the Pacific will be factors of incalculable moment in the history of the world. Now, in our day, the greatest of all the oceans, of all the seas and the last to be used on a large scale by civilized man bids fair to become in its turn the first in point of importance. Our mighty Republic has stretched across the Pacific, and now in California, Oregon and Washington, in Alaska and Hawaii and the Philippines, holds an extent of coast line which makes it of necessity a power of the first class on the Pacific. The extension in the area of our domain has been immense; the extension in the area of our influence even greater.

"America's geographical position on the Pacific is such as to insure our peaceful domination of its waters in the future, if only we grasp with sufficient resolution the advantages of this position.

"We have taken the first steps toward digging an isthmian canal, to be under our own control, a canal which will make our Atlantic and Pacific coast lines, to all intent and purposes, continuous, and will add immensely alike to our commercial and our military and naval strength. The inevitable march of events gave us the control of the Philippines at a time so opportune that it may without irreverence be held providential. Unless we show ourselves weak, unless we show ourselves degenerate sons of the sires from whose loins we sprang, we must go on with the work that we have begun.

"I earnestly hope that this work will always be peaceful in character. We infinitely desire peace, and the surest way to obtain it is to show that we are not afraid of war. We should deal in a spirit of fairness and justice with all weaker nations; we should show to the strongest that we are able to maintain our rights. Such showing cannot be made by bluster, for bluster merely invites contempt. Let us speak courteously, deal fairly and keep ourselves armed and ready. If we do these things we can count on the peace that comes only to the just man armed, to the just man who neither fears nor inflicts wrong.

"We must keep on building and maintaining a thoroughly efficient navy, with plenty of the best and most formidable ships, with an ample supply of officers and of men, and with these officers and men trained in the most thorough way to the best possible performance of their duty. Only thus can we assure our position in the world at large and in particular our position here on the Pacific.

"All our people should take this position, but especially you of California, for much of our expansion must go through the Golden Gate, and the States of the Pacific slope must inevitably be those which would be most benefited by and take the lead in the growth of American influence along the coasts and islands of that mighty ocean where East and West finally become one."

In the afternoon the President broke ground at the Baker street entrance to Golden Gate Park for a monument to be erected to the memory of President McKinley by the citizens of San Francisco.

FEAR SCOURGE ON ISTHMUS.

Dangerous For White Men on Canal Zone, Says General Hains.

Washington, D. C.—General P. C. Hains, a member of the Isthmian Canal Sub-Commission, who has just returned from the Isthmus, says that fever is prevalent there and that it is quite dangerous to white men. He says it is either yellow fever or such a malignant type of malarial fever as to be as bad as yellow fever.

The condition can be improved, but it would require control by the Government of sanitary measures. He thinks it would take about a year to place the canal region in proper sanitary condition.

"Wet" Vote Sweeps New Hampshire.

The cities of New Hampshire have voted for license. The towns went fifty-nine for license and 127 for no license, prohibition having been the law since the 70's. The eleven cities gave a majority of more than 11,000 for license—yeas, 18,758; nays, 7524.

Mad Carpenter Dead in the Hold.

Stephen Oscar Writanan, the mad carpenter of the Norwegian bark Emigrant, who for nineteen days was in the hold of the vessel and held the crew at bay, was found dead at Halifax, N. S., beneath a cask.

The Plague Spreading in China.

Consul-General McWade at Canton, China, cabled the State Department, at Washington, that the bubonic plague is spreading rapidly among all the towns and villages west of the Canton River.

SALT TRUST CONVICTED

Pleads Guilty to Charge of Maintaining a Monopoly.

Case Marks the First Conviction Under the Sherman Law—A Victory For the Government.

San Francisco, Cal.—Before Judge De Haven, in the United States District Court, the Federal Salt Company, of which D. E. Skinner is President, was convicted of maintaining a monopoly contrary to the Sherman anti-trust law.

When the case was opened counsel for the corporation withdrew its original plea of not guilty and pleaded guilty to the first count of the indictment. The maximum fine is $5000.

This case marks the first conviction under the Sherman law, which went into effect in 1892. The Attorney-General's office won a civil suit last fall before Justice Morrow against the same company on the same evidence. The successful termination of that suit abolished the contracts the Federal Salt Company had.

The Federal Salt Company was organized in New Jersey in 1900. It established a business in California and quickly secured a monopoly of the product on the coast, raising the price from $2 and $6 a ton to $30 and $35.

GIRL'S SUITORS MURDERED.

Second One Killed in Two Weeks While Driving Home in His Buggy.

Indianapolis, Ind. — Louis Yeager, a young man living near Fairfield, Howard County, visited Miss Emma Finley, and when his father got up in the morning he found the son dead in his buggy at the front gate. An investigation showed that the young man had been shot in the side and also in the right temple, and his position in the buggy indicated that he had been killed while driving along the highway. Miss Finley says that he left her house about 10 o'clock and started in the direction of home.

Francis Sutton, a young man who was also a suitor for the hand of Miss Finley, was found dead in his buggy two weeks ago with a bullet in his brain, having been shot the night before while driving along the road. It was supposed that he had committed suicide, though there was nothing to show that he had shot himself, but the murder of Yeager under precisely similar circumstances leads to the belief that both young men were assassinated because of their attentions to Miss Finley. There is no clue to the murderer.

THE KISHINEFF MASSACRE.

Additional Details of the Anti-Jewish Outbreak in Russia.

St. Petersburg, Russia.—Additional details of the Kishineff massacre of Jews are printed here daily. The correspondents give the number of victims thus far buried in the Jewish cemetery at forty-four, and say that eighty-four persons seriously wounded are still in the Jewish hospital.

The horrors reported scarcely bear repetition. In one instance spikes were driven through a woman's head into the floor, and reports of cases of bodily mutilation have been authenticated.

About 800 to 1000 persons were arrested, an energetic official having been sent from Odessa to deal with the situation.

The apathy of the local authorities during the two days of outrage and murder appears to have been fully established.

TELLS HIS HEIRS TO MARRY.

Pierre Olivier Enjoins His Nieces and Nephews Not to Follow His Example.

New Orleans, La.—The will of Pierre Numa Olivier has been opened. Mr. Olivier was a descendant of one of the original founders of New Orleans, and his family owned a large part of the site upon which the city is built. He served with distinction in the Confederate Army. He leaves his entire fortune to his nephews and nieces with the injunction that they marry.

"I shall die," he says, "with the regret of not having fulfilled the mission of a man on earth, that is to say, not having married and raised a family. I advise my nephews and friends not to follow my example in this matter."

NO REDRESS FOR MOB HANGING.

Jury Finds For Defendants in Suit For $25,000 Damages.

Freehold, N. J.—The suit brought by Charles Herbert, who was strung up by the neck because a vigilance committee thought he might have been concerned in incendiary fires in Matawan two years ago, was ended in a verdict for the defendants.

Herbert sued former Senator Henry Terhune and others for $25,000 damages. No one denied the hanging had occurred, but all denied having guilty knowledge of the affair. Senator Terhune said, after he had questioned Herbert in the Terhune homestead, he left him in one room while he went to another to consult the town authorities.

King Holds Levee in Holyrood Palace.

The City of Edinburgh, Scotland, was in holiday attire, and immense crowds warmly greeted King Edward and Queen Alexandra as they proceeded from Dalkeith Castle to Holyrood Palace, where they held a court and a levee, the first of such functions to be held in the historic palace for eighty years. On their arrival at the palace the King and Queen received a number of public addresses. Presentations followed.

Mikado Silent on Foreign Relations.

The Emperor of Japan opened the Diet at Yokohama in person. He announced the introduction of measures essential for the completion of the national defenses, but did not allude to foreign relations.

Business Continues Large.

Bradstreet's says: "Business continues large and industry active, in most cases surpassing previous years at this date, despite unseasonably cool weather in some sections and a swarm of vexatious labor troubles."

THE PRESIDENT WELCOMED

San Francisco Greets Him With Unbounded Enthusiasm

IGNITES A $115,000 MORTGAGE

Banqueted by the Citizens' Committee at the Palace Hotel—In His Speech Roosevelt Says That Our Currency System Should Be Made More Elastic—Suggests Further Financial Legislation.

San Francisco, Cal.—President Roosevelt arrived here and rode for miles between walls of densely packed, cheering humanity. M. H. De Young made the speech of welcome. Admiral Bickford, of the British Pacific squadron, conveyed the good wishes of King Edward, and said that the arrival of the flagship to assist in the greeting was another instance of the cordial relations existing between the two nations. President Roosevelt begged that his good wishes be given to His Majesty.

Before entering his carriage Mr. Roosevelt warmly shook hands with Engineer McGrail and Fireman Everly, who had piloted him safely from the South. In the parade the line was headed by a troop of colored cavalry—an innovation.

At the Y. M. C. A. Building a throng had assembled to see the burning of mortgages representing the total indebtedness of $115,280. The President, by request, touched a lighted match to the documents, and as the flames licked up the papers he joined with the assemblage in singing "Praise God, from Whom All Blessings Flow."

The President was banqueted at night at the Palace Hotel by the Citizens' Committee. In his speech the President said:

"There is unquestionable need of enacting further financial legislation, so as to provide greater elasticity in our currency system. At present there are certain seasons during which the rigidity of our currency system causes a stringency which is very unfortunate in its effects. In my judgment the Congress that is to assemble next fall should take up and dispose of the pressing questions relating to banking and currency. I believe that such action will be taken, and I am sure that it ought to be taken. It is needed in the interest of the business world, and it is needed even more in the world of producers, of earth tillers, of men who make their living by the products of the farm and ranch. Such action would supplement in fitting style the excellent work that already has been done in recent years, as regards our monetary system."

Before his arrival here President Roosevelt visited Leland Stanford, Jr., University, at Palo Alto. He was greeted by President David Starr Jordan, the faculty and students, to whom he delivered a brief address.

SIGNS DRASTIC LIBEL LAW.

Governor Pennypacker Refers to His Being Cartooned as a Dwarf.

Harrisburg, Pa. — Governor Pennypacker signed the Grady-Salus libel bill, and issued a long statement giving his reasons for so doing. The bill, which increases the liability of newspapers for carelessness, does not affect the weeklies. Daily newspapers are required to print in each issue the names of the responsible publishers and editors.

The Governor says reputable newspapers need have no fear of the new law, and that if it fails to accomplish the ends desired it can be amended or repealed. He refers to a cartoon in which he was pictured as "an ugly little dwarf" standing on a stool which had been so placed that the starting of the wheels of "a huge printing press" would throw him to the ground. Put into words the cartoon asserts to the world that the press is above the law and greater in strength than the Government. This attitude, Mr. Pennypacker says, a self-respecting people will not permit to be long maintained.

BUSINESS MEN ENJOINED.

Omaha Labor Unions Secure a Sweeping Counter-Order.

Omaha, Neb.—Judge Dickinson, in the District Court, on application of John O. Yeiser, an attorney representing the labor unions whose members are on strike, issued an injunction against the business men and proprietors even more sweeping than that issued by the Federal court against the unions a week ago. The order restrains the business men from refusing to sell goods to dealers who employ union labor, prevents them from boycotting union labor, requires the Business Men's Association to cease holding meetings or conspiring against the unions or in any way interfering with the unions in the management of their affairs.

Mrs. Eddy's Church Gift of $120,000.

Through the gift of the Rev. Mary Baker Eddy, the Christian Scientists of Concord, N. H., are to have one of the finest church structures in the Granite State. The gift of Mrs. Eddy includes the lot of land now occupied by Christian Science Hall, in the heart of the city, at the corner of State and School streets. In addition to the gift of this site Mrs. Eddy presents to the church a cash donation of $100,000, making her total gift represent the sum of $120,000.

Manchuria Open to World.

M. Pleneon, the Russian Charge d'Affaires, at Pekin, China, announced that all Manchuria was open to foreign travel, and that passports were no longer necessary.

Reports of Russian Activity Denied.

The Tokio correspondent of the London Times says the Japanese Consul at New-Chwang has telegraphed denying all the rumors of Russian military activity and the reinforcing of the garrisons in that region.

Site For the Peace Palace.

It is stated that the Royal Vienna Dooden will be purchased as a part of the site of the Peace Palace, at The Hague, Holland, which is the gift of Andrew Carnegie. The site is the best at The Hague. The price is $500,000.

FIRE DEVASTATES OTTAWA

Forty Blocks Burned and Hundreds of People Left Homeless.

SUSPECTED INCENDIARY HELD

A Man, Who Recently Served a Term in Prison For Arson, Under Arrest—The Blaze Starts Where the Big Hull Fire of 1900 Ended—Millions of Feet of Lumber Consumed.

Ottawa, Ontario.—A fire, suspected of being of incendiary origin, destroyed hundreds of houses and millions of feet of lumber in this city. John White, who has just been released from the penitentiary after serving a term of imprisonment for arson, was caught near where the fire was first discovered. He was taken to the police station and charged with starting the conflagration.

The fire originated within a stone's throw of where the great Hull fire of April 26, 1900, was checked. The Hull fire started on the opposite side of the river and spread to the Ottawa side, destroying millions of dollars' worth of property. It burned out near where the Ottawa and Parry Sound Railway enters the western part of the city, and it was in the lumber yards near the railroad that the latest fire originated.

Two hours before the principal fire started two smaller blazes were discovered and quickly extinguished in the lumber yards near the Canadian Pacific Railway. It was 3:30 when the third fire was discovered. When the brigade arrived at the scene it was found that the water main had been damaged and no water could be obtained. When the brigade finally did get water the fire was utterly beyond its control. It swept along over the same ground that the former fire had gone, the only difference being that it was going in the opposite direction.

There is a large cliff which extends from the Ottawa River to Margaret and Preston streets. The fire area was on the flats below the cliff. At two or three points it came very near getting over the cliff, and had it done so nothing would have saved the city. At 9:30 at night the fire was thoroughly under control and it was confined to the following area:

The Ottawa and Parry Sound Railway, on the south, Division street on the east, First avenue on the west, and the Richmond Road on the north. From the Parry Sound Road to the Richmond Road is about one mile, and from First avenue to Division street is about one-quarter of a mile.

Fifteen million feet of lumber were destroyed. It belonged chiefly to J. R. Booth and was sold. The loss on the lumber will be about $300,000. The buildings burned were principally dwelling houses and stores. They were all built since the last great fire, and were either solid brick or brick veneered, as the city would not permit any other kind to be erected.

Mayor Cook said that there were from 500 to 600 families homeless, or about 2000 individuals. All the property is supposed to be well insured.

The Mayor said the city would oppose any aid being asked from outside Canada, and personally he thought that the city should grapple with the situation without any appeal for outside help.

Mayor Cook estimated the loss on the buildings at $300,000, making a total loss of $600,000.

On the cliff overlooking the ruins were thousands of people looking upon the desolation which the conflagration created. The large majority of those burned out were taken charge of by friends.

Alderman Plouffe, who represents the ward in which the fire occurred, estimates that between 500 and 600 families were burned out.

$2100 FOR A POE MANUSCRIPT.

"The Bells," in the Poet's Handwriting Sold at Auction in Philadelphia.

Philadelphia, Pa.—The original manuscript of Edgar Allan Poe's "The Bells" was sold at auction for $2100. It was part of the Harold Peirce Library.

The manuscript is a little scorched. It consists of slips of blue paper pasted together, and originally formed a strip eight inches wide and thirty-seven and one-half inches long, but it has been divided into three more or less equal parts. It lacks the last fourteen lines of the completed poem, but it is believed that they never formed a part of this sheet.

There were three dealers active in the bidding—George D. Smith and George W. Bowden, of New York, and George H. Rigby, of this city. The manuscript was bought by Mr. Rigby.

RAZED HIS OWN TOMBSTONE.

Man Supposed to Have Been Dead Many Years Astonishes His Family.

Rochester, N. Y.—Twenty-eight years ago this month the body of a man was found floating in a millrace here. It was identified as that of William H. Stone. The identification was made positive by Mrs. Stone, the supposed widow.

The One Hundred and Fifth New York Infantry, of which he had been a member, adopted a memorial resolution and attended the funeral in a body. Chief of Police Cleary, then a policeman, was one of the pall bearers. Interment was in the Stone family plot, in Mount Hope. A few days ago Stone suddenly appeared, razed the tombstone, and fully identified himself to his family and the police. He has been a wanderer.

Many Killed in Railroad Wreck.

Twelve men were burned to death and eight slightly injured in a train wreck fifty miles west of Port Arthur, Ont. A caboose attached to a tie train left the track, the car was overturned and took fire.

Chinese Leper Recaptured.

Dong Gong, the Chinese leper, who escaped from quarantine at St. Louis, Mo., was recaptured. He was found in a Chinese laundry, many customers of which burned their linen when they learned of the capture.

PLOT TO BLOW UP LINER

Police, Warned by Mail, Find Infernal Machine on Umbria's Pier.

According to "Mafia" Letter, Oceanic Was Spared Because of Women and Children Aboard—A Joke, Perhaps.

New York City.—A special delivery letter was received at Police Headquarters at 12.15 o'clock p. m. marked "Warning from the Mafia," and containing the information that a box containing 100 pounds of dynamite had been sent down to the Cunard Line pier to be put aboard the Umbria, which was to sail at 2 o'clock.

The letter also said that the box had been fitted out with a clockwork appliance which was set for thirty-six hours.

Within a very few minutes detectives were dispatched to the pier. Under a pile of trunks they found a plain pine box, much like an ordinary packing case, with iron handles at each end. There was no name on it, and a hasty examination convinced the detectives that it contained a lot of dynamite. The clockwork was seen as soon as the lid was opened.

The letter containing the warning was written in fairly good handwriting, evidently that of a man. After telling of the dynamite it said that it was meant as a warning to those who sail on English vessels.

When the box was taken out the top was pried off and the clockwork was seen inside. The wheels of it were moving.

A rope was tied around the box and it was dropped over the pier near the side of the Umbria and lowered until it struck the bottom.

The Umbria sailed at her scheduled hour, 2 o'clock, and then the box was raised and an investigation begun. The removal of the bottom disclosed three compartments. In the centre compartment was the clockwork and a lot of wires. In the end compartments were about ten small packages, each labeled "Climax Powder Company, Emporium, Pa." The packages were about one and a half inches in diameter and about six inches long. It was taken to Fire Headquarters for further examination.

All the men on the pier knew of the box was that it was taken to the pier in an express wagon at 2 o'clock on the previous day by two men, who looked like Italians. They said that they had met a man at Thirty-ninth street and Broadway who had told them to take the box.

Superintendent Murray, of the Bureau of Combustibles, said that the infernal machine was the most complete and elaborate he had ever seen. There was no doubt, he said, that it contained guncotton and powder.

The letter of warning, which was written in pencil, was mailed at the general postoffice at 11 o'clock, and the writer gave the information that it had been intended originally to send the box on the Oceanic, but it was found that that vessel would carry too many women and children, so it was decided to send it on the Umbria.

Police Commissioner Greene is inclined to the belief that the whole affair was somebody's idea of a practical joke. This impression is gaining considerable strength, and if the investigation corroborates it the joker should be caught, will have a very hard time of it for perpetrating such a scare upon the public.

The police, however, regard the placing of the box on the pier as a very serious matter, and purpose to make it anything but a joke for the perpetrator.

CLEVELAND ON HIS BOOM.

Says He Has Not Desired to Lead the Democrats For the Fourth Time.

Athens, Ga.—B. F. Holder, Jr., editor of the Athens Banner, recently wrote a letter to Grover Cleveland, telling him the result of a poll of the business men of Athens, showing a strong sentiment for the nomination of Mr. Cleveland, and asking this question: "Are you now considering or would you consider making the race for the Presidency next year on the Democratic ticket?" Mr. Cleveland wrote in reply as follows:

"Princeton, N. J.

"B. F. Holder, Jr.:

"Dear Sir: I thank you for your letter of the 4th inst., and for the editorial clipping from your paper which accompanied it. I cannot fail to be gratified by the kindly expressions which frequently come to me in these days from all parts of our country, and I desire to thank you for your loyal support in the past and for your exceedingly friendly expressions at this time. In answer to the question with which you conclude your letter, I can say no more than to assure you that at no time since the close of my last Administration have I been desirous of carrying the Democratic banner for the fourth time in a Presidential contest. Yours very truly,

"GROVER CLEVELAND."

NEGRO CARRIER THREATENED.

Warned on Pain of Death to Give Up Mail Route in Tennessee.

Washington, D. C.—Another colored incident is reported in the postal service, and as in the Indianola affair the Postmaster-General has ordered the suspension of service until the report of threatened assault has been fully investigated. John C. Allgood, a colored carrier on a rural delivery route in Gallatin, Tenn., says he was held up by masked men and commanded not to make another trip with the mail under penalty of losing his life.

Postmaster-General Payne directed Special Agent Conger in Nashville to make a thorough investigation, and to suspend the delivery of mail on that route until the circumstances have been learned.

Pershing Destroys Moro Forts.

Ten Moro forts were captured by Captain Pershing and destroyed. 115 natives were killed, thirteen wounded and sixty, including the Sultan of Amparugano, made prisoners. The American loss was two killed and seven wounded.

Prairie Fire Damages a Town.

Fire which spread from the prairie to Minnedosa, Manitoba, has destroyed the Canadian Pacific stock yards, Wallace's grain elevator and damaged several other buildings. Loss, $100,000.

EXCITED RISE IN COTTON

New York Market One of the Most Sensational in Years.

MANUFACTURERS ARE UNEASY

Raw Cotton Too High and Cloth Too Low—May Be a Cut in Wages or Production—Prices of Futures Advance 20 to 37 Points at New Orleans—Realizing Causes a Recession.

New York City.—Monday was one of the most sensational markets ever known on the New York Cotton Exchange. Prices fluctuated violently all day, and all day an excited crowd of brokers struggled around the pit railing endeavoring to snatch up the offers of long cotton, which the bull clique was handing out freely, because on each bale sold at the high prices they realized a heavy profit. The aggregate gain of the Sully clique was estimated as being way up in the millions. How much it was no one could say, excepting, perhaps, Mr. Sully himself, and if he knew he declined to tell.

The opening of the market was accompanied by scenes of the wildest excitement. The Liverpool cables, which almost always have an influence on the market here, showed an advance since Saturday of eleven points, whereas no one had expected to see an advance of more than seven points. Buying in Liverpool by shorts on this side of the Atlantic is supposed to have been largely responsible for this rise.

Whatever the cause, the result was that the market here opened up twenty-five points and more, while in New Orleans, where there is also a corner in May cotton, the opening was from thirty to forty points above Saturday's closing. It is estimated that up to noon 400,000 bales were traded in. The next two hours were rather quiet.

It was stated that nothing like the prices quoted have been known in the cotton market for many years. In January, 1901, a squeeze of shorts carried the price to twelve cents a pound, and in 1898, also in January, cotton sold at 12.75 cents a pound.

Fall River, Mass.—The continued rise in the price of raw cotton and the stagnation in the cloth market, together with certain other unfavorable features, are causing some uneasiness among many of the managers of the forty manufacturing corporations in this city. Manufacturers assert that the wages as well as cotton are too high, while cloth is too low.

Some of the managers favor a general reduction in wages, while others advocate a curtailment in production, but so far there has been little disposition among all mill treasurers to act in harmony.

New Orleans, La.—The cotton market was a surprise even to the long side. At the opening, prices of futures took a jump of from twenty to thirty-seven points in the active months and the advance was so strong and wild that prominent longs, seeing danger in store for local traders, sold the market down almost immediately. Within fifteen minutes after the opening from five to twenty-seven points had been shaved off from the advance, which brought prices down to a more conservative level, although even then a stiff advance was maintained. The cause of the advance was a continuance of the bull campaign to which was added reports of sensational advices in both the Liverpool and New York markets.

HOSTILE MOROS SUBDUED.

Ten Forts Captured and Destroyed and Every Hostile Datto Punished.

Washington, D. C.—The War Department received news of Captain Pershing's successful invasion of the Moro country about Lake Lanao. In a cablegram to Adjutant-General Corbin General Davis says:

"Captain John J. Pershing has completed a circuit of Lake Lanao via the east coast from Camp Vicars. Had a sharp fight at Taraca. Captured ten forts, many prisoners, thirty-six bantacas and sixty rifles. All other datties friendly. Liberated prisoners, destroyed hostile forts and bantacas. Our loss two killed and four wounded.

"Every hostile Lanao datty has now been chastised. All Moros know our friendship is valuable and freely extended to all who deserve it. No property save hostile forts has been molested. Troops returning to Vicars via the west coast. Men labor eager for employment on the wharfs and shelter buildings; former almost finished, the latter progressing rapidly.

"Troops have behaved splendidly, not only in contending with a fanatical savage foe, but with a dreaded disease, and, besides, had to construct many miles of road through tropical jungle. No more hostilities are anticipated beyond occasional sniping."

Secretary Root cabled General Davis as follows:

"I congratulate you on the work done in Mindanao. Express to Captain Pershing and the officers and men under his command the thanks of the War Department for their able and effective accomplishment of a difficult and important task."

Montana Ranchmen Drowned.

While trying to ford the swollen Jefferson River at Anaconda, Mont., Finney and John Sullens, prominent ranchmen, were drowned.

Planter Assassinated From Ambush.

B. T. Henry, one of the most extensive cotton planters of the Brazos Valley, Texas, was fatally shot from ambush by an unknown person.

Hollis Declines to Be Umpire.

Frederick W. Holls, of New York, to whom President Roosevelt offered the post of umpire in the settlement of the claims of Germany and Italy against Venezuela, has notified the State Department at Washington that he is obliged to decline.

Tiny Firebug Released.

Margaret Cobbly, thirteen, who confessed to setting five fires discovered in the house of Julius Gens recently, was released with a reprimand at the Police Court at Lawrence, Mass.

ORPHAN ISLE OF PINES.

UNITED STATES AND CUBA HAVE RIVAL CLAIMS—PRODUCTS AND PEOPLE.

OFF the coast of Cuba there is an orphan island by the name of the Isle of Pines. Secretary Root has just announced that Cuba is its guardian, but the orphan is protesting. It had eagerly expected to call Uncle Sam "padre," and, now that its anticipations have been snubbed, it has, in true infantile fashion, "set up a howl."

Herbert G. Squiers, the United States Minister to Cuba, who returned to Havana recently from a visit to the Isle of Pines, reports that the American residents there are clamoring for American sovereignty, and say that they have made extensive purchases of land with the understanding that the Stars and Stripes were to float over their houses. The Pine Islanders can appeal to Congress for relief from the ruling of the Secretary of War.

About the size of the State of Rhode Island, and situated sixty miles south of the western end of Cuba, the Isle of Pines would prove a valuable accession to any country interested in South American affairs. In the same longitude as Tampa, Fla., and the same latitude as Yucatan, Mexico, the bit of land is regarded as a strategic key to the Caribbean Sea and the Yucatan Channel, which connects this sea with the Gulf of Mexico. Attention to the island as a military base has recently been still more strongly focussed by the Venezuelan imbroglio.

The circumstances which orphaned the Isle of Pines grew out of the recent Spanish-American War. At the end of the conflict Spain relinquished her ancient sovereignty to the island, and the nations wondered as to its fate. Some said it would come into the possession of the United States; others seemed to regard it as geographically a part of Cuba, inasmuch as Cuba, by reason of its concave shape, embraces the Isle of Pines in the segment of its arc. International curiosity, therefore, was greatly aroused when Cuba ratified the Platt amendment, which, in defining the territorial bounds of Cuba, omitted the Isle of Pines, and referred to it by saying:

"The Isle of Pines shall be omitted from the properly constituted boundaries of Cuba, the title thereto being left to future adjustment by treaty."

Leading statesmen in Cuba have all along taken the view that the de facto government of the Isle of Pines is only temporary, and that until its nationality is determined it should pay taxes to Cuba, as a part of the Province of Havana. The determination of Cuba to tax the inhabitants of the Isle of Pines brought the situation to a crisis. The 300 Americans who live on the island became defiant. They went to the Alcade, or Mayor, of the principal city, and said they would use force if necessary to prevent a tax levy by Cuba. They insisted that the country should belong to the United States, and as soon as the American flag floated over them they would pay their taxes to Uncle Sam, but never to any one else.

In its independence from governmental control, the Isle of Pines has simply been true to its traditions. For more than two centuries after Columbus discovered it this piece of the world was the home of fleets of pirates, who preyed on the commerce of the Atlantic as far north as the Carolinas and to the southward as far as Rio Janeiro. The island was peculiarly adapted by nature as a haven for the buccaneer, and some Cubans say that even at the present time, should this island come into the possession of a foreign power, it would become a strategic base of operations for smugglers.

An Isle of Pines Girl.

AN ISLE OF PINES FARMER'S HOME.

A line of reefs encircles the island for the most part, and between it and Cuba lies a chain of little isles, called the Isles de Mangles. The principal port on its northern shore is Nueva Gerona, a short distance up the Rio de Cerro. Should a person in Havana wish to visit the Isle of Pines, he would cross Cuba by rail, by a journey of thirty miles to Batabano, and take a steamer from there for Nueva Gerona. Though the entire distance would be only ninety miles, nevertheless, under present conditions, it would take the traveler a whole day.

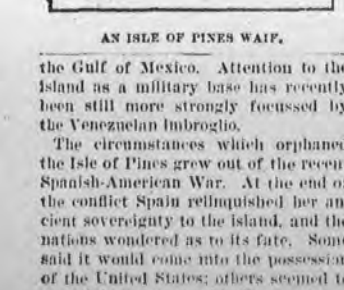
Were it not for a long, projecting cape, much resembling Cape Cod, at the western end of the southern shore, the Isle of Pines would have the square outline of the unpoetic Block Island. At high tide the island is practically transformed into two land areas, for the reason that the sea inundates a chain of lagoons across the southern part of the isle. The northern part, facing Cuba, however, is mountainous, with peaks more than 2000 feet above the sea. Here dwell nearly all of the 3000 inhabitants, and those who have been stimulated by American enterprise to till the soil finds that it responds with a wonderful fertility. Potatoes are produced which bring a higher price in the markets of Havana than those from the United States. Tobacco grows even too luxuriantly. Sugar cane is cultivated successfully, and the pineapple, which grew wild in such abundance that it gave its name to the island, is being systematically raised for American tables.

The population of the Isle of Pines is distinct from that of Cuba, and is a mixture of the native Indian, the invading Spaniard and the negro slave. Before the advent of the Spaniard the aborigines were divided into two classes, one owning the lands and cultivating them by means of negro slaves, and the other a shiftless, totally savage race, which subsisted on raw fish and fruits, and wandered naked up and down the coasts.

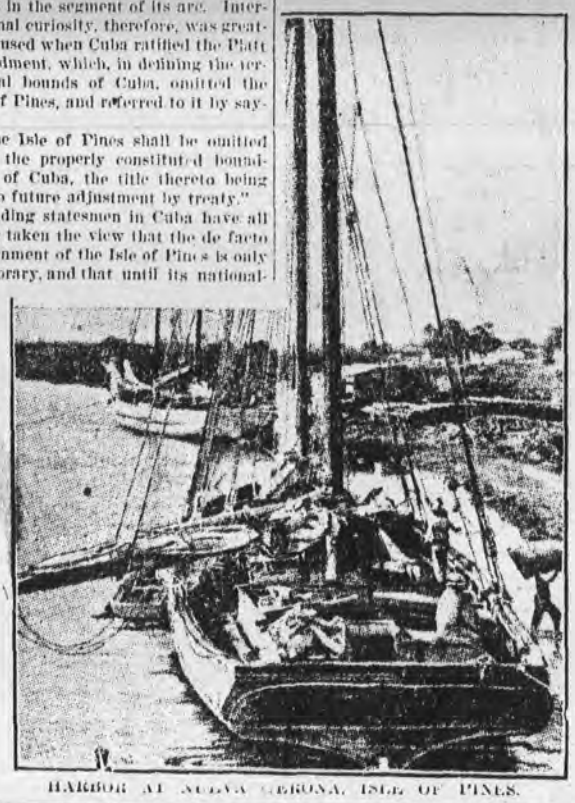
Three hundred Americans have settled on the island, and with an enterprise characteristic of their race they are rapidly turning the natural wealth of the country to commercial ends. They have found that many woods abound, such as cedar, oak, pino de tea, ocuja, sabrina, capeche, fustic, cocoa, ebony, mahogany, walnut, ceiba, manroon, majugua and the royal palm, which tree furnishes most of the necessities of life, including food, drink, shelter and raiment. Many rare woods have long been used prodigally by the natives, who did not realize their value, and thus the Spanish prison at Nueva Gerona, in which politically prisoners were at one time confined when the island was used as a penal colony, is finished in mahogany and ebony, over which has been daubed whitewash, for "ornamental purposes."

Marble quarries, containing fine varieties of white, green and pink stone are now being operated, and a company has been organized to build a sanatorium at Santa Fe, in the interior, where there is the largest of the many magnesium springs which has long made this island a health resort for rich Cubans. Naturalists say that the island possesses 200 species of birds and fully 700 of fish. The most picturesque member of the bird family is one which walks about on lily pads, and possesses blue head feathers, with creamy white body, scarlet breast, legs of green and bill of orange. In the everglades in the southern part teem countless forms of insect and amphibian life, and after nightfall travelers say the lagoons glow with phosphorescent lights, will-o'-the-wisps and other unearthly forms of misty fire.—New York Tribune.

"Gimme a Cent."



AN ISLE OF PINES WAIF.



HARBOR AT NUEVA GERONA, ISLE OF PINES.

PRACTICAL EATING-APRON

May Be Made of Percale, Linen or Brown Crash.

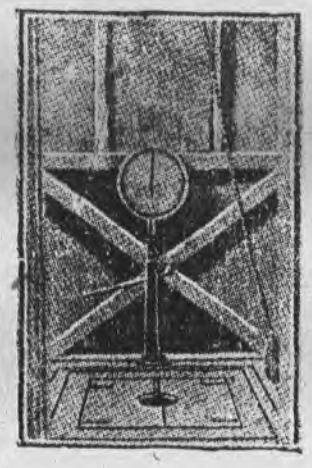
This little apron, says Woman's Companion, is something entirely new. It is a simple, practical eating-apron for children, cut in one piece, and buttoning with one button only in the back. It may be made of percale, linen or crash, and bound with pretty colored tape. It will be exceedingly serviceable made of rough brown crash—just the sort of crash that is used for kitchen towels. In fine oilcloth it will be found useful, too, as it can then be wiped off with a damp cloth after each meal.

A useful feeding bib is made of a piece of damask linen or mummy cloth, with an absorbing pad on the back. The pad is made of absorbent cotton, over which is quilted a piece of soft linen. One of the nicest materials of which to make this bib is the perfect parts of worn-out table linen, which is soft and much more absorbent than new linen, and is much easier to rinse out and keep fresh.

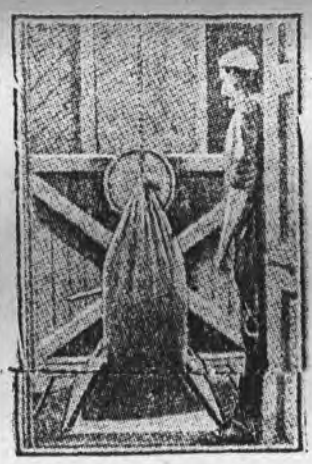
A SACK-WEIGHING MACHINE

Platform Scales and Hatchway Doors Combined.

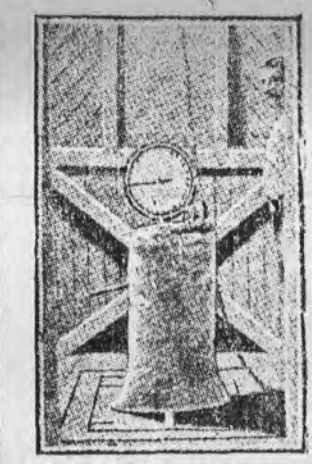
A usual way of checking the weight of material going into a warehouse or factory in sacks is to take, say, every third sack and place it separately on a weigh-bridge. This procedure has several disadvantages. It takes time and labor to do it, and the exact weight can never be ascertained absolutely, as the system is open to trickery and deception. An ingenious device has recently been designed by an English firm whereby not only every sack can be weighed, but time and labor are both saved. This apparatus is shown in the accompanying cuts. It certainly has the advantage of being simple. The ordinary double trap-door, such as is found over the hatches of dry warehouses, is made to do duty as the platform of a weighing machine, the long and short lever bodies of the machine being so arranged round the hatchway as to permit of a free opening under the flaps. The levers can be made to operate a spring balance, as shown in the illustration, or else an ordinary steel-yard. In the one case a movable sliding indicator is attached to the periphery of the dial face, so as to show the weight which the pointer should show. In the other, of course, the proper weight is put on the steel yard, and the operator observes whether the lever is up, central or down.



TRAP DOORS AND SCALES.



RAISING SACK THROUGH TRAPS.



WEIGHING THE SACKS.

The method of procedure is well shown in the cuts. The sack is hauled up through the double flaps of the hatch in the ordinary way. When the flaps have fallen back into place the sack is lowered onto them, and the weight indicated on the dial. It will be seen, therefore, that there are not two handlings of any one sack, and all the time lost is that involved in lowering the sack onto the platform, or trap-door.

A lever will be noticed to the left of the pillar carrying the dial. This is for disconnecting the latter when it is not desired to weigh the sacks passed through the trap-door, and to save the machine from unnecessary wear and tear.

Novel Headline.

Editor Webb, of the Bosworth (Mo.) Weekly Star, puts this headline over his announcements of births, marriages and deaths: "Yells, Bells and Knells."

There is a movement in North Wales to raise a monument to the famous entertain, Owen Glyndwr.

Of the twenty-five men who have been President of the United States ten have to-day no descendants.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "PLEASURE AND GOD."

The Rev. A. B. Kinsolving Shows That When the Soul Has Found Its True Life the Simplest Things Will Serve—Then a Man's Heart Laughs.

NEW YORK CITY.—The Rev. Dr. A. B. Kinsolving, rector of Christ Church, Brooklyn, preached Sunday morning on "Pleasure and God." His text was taken from II Timothy iii: 4: "Lovers of pleasure rather than lovers of God." Mr. Kinsolving said:

This is one of those biting sentences of which St. Paul's letters are full. It occurs in a hurrying category and arrests our thoughts at once.

These two things, religion and pleasure, have always been here on God's fair earth. They are undoubtedly primal constituents of life, and yet it has ever been difficult for men to harmonize them and keep them on friendly terms. Religious people have often committed the blunder of looking askance at amusement. Indeed, some of the best and most earnest among them have conceived of piety as scarcely less than a kill-joy. They have represented God as intensely jealous of life's innocent as well as its forbidden pleasures, until their systems have gotten to be so one-sided, and extravagant, and over-wrought, and one-ideaed and melancholy as to cast an awful gloom upon communities for considerable periods. Such men have missed altogether the cosmic note of gladness which shimmers in the sunlight, dances in the laughing waters, which ripples and murmurs in the brooks and streams, which smiles from the blue dome above and thrills us in the spring bird notes and the summer flowers. "The material for enjoyment," says some one, "is so inwrought into the world's constitution that we cannot put a spade into the ground anywhere without turning it up. By travel; by staying at home, by working, by resting, by strain of the muscles or strain of the mind; by speech, by silence; by solitude, by society; by helping, by being helped; by receiving, by giving—by all these different roads do men reach joy."

And yet with our eye upon the history of mankind is there not abundant reason for religion's suspicion of the riot of pleasure? What nation of antiquity has not been slain by its sensual pleasures? Run through the list of them—Babylon, Media, Persia, the Egyptian monarchy, Greece, Carthage, Rome—let not the necessity for strenuous pleasure and the effeminacy which is its consequence value every virtue to the state, private virtue and state prosperity and power be the motive of study and search, and now these nations determine the mighty labors of Rome itself.

Look at the world that Christianity entered. What made it so hostile to Christ and His religion? What made it cruelly Him out of its sight and fling His followers to the beasts in the great amphitheatre at Rome? Why, more than aught else the unbridled love of sinful pleasures. With fierce flashes of anger these heathen liberals refused to have their indulgences interfered with. They would not suffer a faith to be taught in their midst which they astutely saw would have the moral effect of stopping their games, and so they cried with hellish hate: "The Christians to the lions," and to the lions they were thrown.

We know from the pages of Grote and Gibbon something of the excesses of the Greek and Roman national games and festivals. "That which began with some show of decency degenerated often into the extreme of licentiousness and ministered to the basest passions. Frequently for days and weeks together they absorbed the whole mind, making men oblivious to every moral obligation and dear to the enemies of humanity." Gibbon says that Rome had at one time 3000 female dancers and as many singers, and that when seasons of famine came, while all strangers and even professors of the liberal arts were banished from the city, the dancers were allowed to remain. Their performances were characterized by everything that was morally degrading, and the orgies which took place around the temples of the Goddess Fiora and Voluptas, the Goddess of Pleasure, descended into the depths of profligacy. In the times of Charles VI. of France, in the times of the Georges, the Borgias and the later Louis of France there was only too much to remind men of the blackest moral chapters in past history. Men "lived in pleasure on the earth and were wanton; they nourished their hearts in a day of slaughter." No wonder, brethren, with such spectacles before them, that serious Christian people, realizing the deadly peril from this quarter, should in their moral earnestness often have gone too far and failed to recognize that the thirst for pleasure and amusement is a human thirst, and must be provided for and guided and sympathized with, or else it will become religion's rival and antagonist.

Again, when men have tried to solve the mystery of laughter they have advanced very diverse opinions. Pascal thought that the passion for amusement was an illustration of the real unhappiness of most human lives. It is because they want to get out of themselves that they flock so to spectacles of every kind, or gather in crowds to laugh and talk—it is diversion they seek, that is, anything to escape from the somber ordeal of solitary thought. Doubtless, his explanation fits many cases but it hardly covers all. Play and joyousness are among the primitive gifts of human nature. The beginning of comradeship between the mother and child is the hour when, as she dangles some plaything before it, "the little, solemn face breaks out into a dimpled smile." Humor is one of the closest bonds of sympathy between us. The contagion of hearty, genial merriment is notorious, and the world has generally rightly loved the people who made it laugh.

Mr. James Sully, an Englishman of letters, has just published a book, which is a sort of philosophic study of laughter, in which he deplores any wane of this great human resource, and says that "it looks as if now only the more sordid material interests moved the mind, as if sport had to have its substantial bait in the shape of stakes. While comedy must angle for popularity with scenic splendors which are seen to cost money." However this may be, it is perfectly certain that the pleasure instinct is a true note of our human nature and that no life is whole without it. It is the lighter torch of this charming gayety which gives that large freedom and mobility to life which it needs for its complete expression. Amusement, relaxation and happiness are certainly part of the cosmic scheme. If at any period God should look down upon His world and see only solemn faces and hear no notes of rippling laughter, I think it would grieve Him at His heart. But here they are ever side by side; life's laughter and tears, and wherever innocent, we can only imagine the great and kind Father looking down benignantly upon all. Nothing is more conspicuous in the character of the Lord Jesus, with all His intense moral earnestness, than the beautiful simplicity of His sympathy with what we may call the joyous background of life. He begins His wonder-working at a marriage feast at Cana, to which He had been invited as a matter of course. The prodigal in his story comes home to music and dancing. The kingdom of heaven is itself like—not a funeral—but a feast. He was the enemy of every burden which galled the necks of men and delayed them of their rightful happiness. Doubtless many an hour in the intervals of work His soul was soothed by the lyric joy of nature—by the gentle starlight, by the song of birds, by those Syrian fields carpeted with unrivaled flowers, by the choral glee of young children on the hillsides and around their homes.

But, my brethren, what, think you, would the Christ have said to people who had come to put pleasure before God? He who said "My meat is to do the will of Him that sent Me and to finish His work," and again, "The Son of Man came not to be ministered unto, but to minister and to give His life a ransom for many." He who found the deepest satisfaction in life in doing His duty and revealing God's principles and love as the redemption of mankind—how must this Christ think of those who neglect their divinest duties for the little, teasing, diverting amusements, the little yieldings to the spirit of sloth and idleness which so frequently fill human lives. "What is your occupation?" was asked a young Frenchman some years ago. His reply was "Je m'amuse"—I amuse myself. That was only a frank admission of what is the only business of a great many lives.

Some time ago I went to call at a house where there were several young men. To one or two of them I bore a message from God which I am entirely sure it was worth their while to hear. And, having failed repeatedly to find them in, I took a mother into my confidence and spoke of my difficulty. "Yes," she said, "they are so full of engagements outside of work hours that they seem to have no time to think of anything else but pleasure. It is a continuous round, and while they are at home they are so utterly tired out that they rest."

How many does that simple description fit? But what is the upshot of it? Why, this, while life slips rapidly away God and eternal relations are wholly crowded out. The young man subsists upon two diets—a diet of hard work and a diet of hard play. And the motive in the work is to get the means to play, while the motive in recreation is often chiefly to get the health with which to work and earn. But what a selfish circle that describes! How narrow and poor and shallow is the young man who prizes only his capacity to labor and his appetite for play! Who so lightly values all those diviner elements of his being as to be willing to make no provision for their culture! "Lovers of pleasure rather than lovers of God." It is a terrible epitaph upon us, whether living or dead: "They worshiped and served the creation more than the Creator, who is blessed forever. Wherefore God gave them up to their own hearts' lusts." These are words to make us stop and think.

I have often noticed that it is apt to be the case that it is precisely those young men for whom God has done most who are apt to break away from Him and live the most selfish lives. There are noble exceptions to the rule, which shine like beacons, from Moses to Phillips Brooks. But too often the privileged life becomes a worldly life and does not tell on the kingdom of righteousness. Generally the love of pleasure in some form or other, more or less worthy, has come between them and the love and service of God.

Men and women we should all be, as the rule in the wilderness. A great many people have too much laughter, too little recreation in their lives. They would be wholesomer minded, freer in spirit, if they could get oftener out of their dark passages and rigid grooves. There are more of such people than we think, and they miss a great deal that God puts within their reach in His many sided world. But there are thousands of others who make themselves imbecile by the headlong pursuit of mere pleasure. They never read, they never think, they let their minds go, they forget that they possess souls, but spend their seasons in things that give them a little passing physical pleasure—in eating for the sake of eating, and dress and getting themselves talked about, in contriving to have their names in some society organ, till these things come to be the absorbing thirsts of life. What is not sacrificed by these giddy people on the altar of their social ambition? Where does not this selfishness, this love of voluptuous pleasure, this hard determination to force life to yield them bodily comfort, even if God's and nature's laws must be broken to do so—where does not this spirit lead?

And now ready are our leaders of opinion, sometimes, speaking great swelling words of vanity and sophistry, to ridicule whisperings of an educated and reverent conscience and to revise for the softer age the statutes of nature and of God!

Now these are some of the phenomena. What is the remedy? First, this: Put pleasure in its true place—as the divine Master did. If you look upon amusement as the one great satisfaction of life, you simply invert the intended order, and in the end are not satisfied. Our deepest want is the great inner reconciliation. We may be diverted, we may for a while escape from ourselves, but we shall never be satisfied until the soul is at one with God.

A brilliant writer, the author of "Ourselves and the Universe," reminds us that "men called Napoleon the unamusable." Talma might play before him * * * but the conqueror extracted no gayety from the performance. That is the nemesis of self. When, on the contrary, the soul has found its true life, the simplest things will serve. A man then learns the heart's laugh."

To make men happy, my friends, we must not first feed them with pleasures of the senses. The primal condition of happiness is that they be true to God and to each other. "The soul cannot laugh its own laugh till God has filled it." In that relation there are the unfailing wellsprings of pleasure. "In Thy presence is fulness of joy; at Thy right hand there are pleasures forever more." "These things have I spoken unto you that My joy might remain in you and that your joy might be full." When we know that satisfaction of dwelling in God and having God dwell in us, we have a security against inordinate lower desires of every kind. One did not have to warn Washington against wasting his time, or Gounod or Beethoven against making discords.

Then we should have a care to retain, as far as may be, the freedom, the mobility, the wholesome interest in the rightful amusements of others, especially of younger persons, which will keep us in touch with them.

If our diversions and amusements grow on the same stem as our religion; if they are part of one organic unity, there will be no trouble about their regulation. There will creep in them no poison of wilful law breaking, no grimace of an uneasy, conscience stricken soul trying to escape from itself, no waste of time and faculty, no hunger for vulgar display. Being in the secret of God, we shall have entered into the secret of the child's heart, and live in sensible relations with every part of God's great world.

The lasting pleasures of life are not the fleeting pleasures of the senses, but those of the mind, the soul, the spirit, the pleasure which comes from a cultivated intellect, from sound and noble thinking, from refined tastes, from love and sympathy and service.

Cross Words.

Not only pleasant things, but sad ones, have their influence, and are remembered. It is well to have this truth ever in mind, and to act in view of it. "Kind words can never die," says the little song. When one heard that sung pleasantly he said sadly, "Cross words can never die." One is as true as the other. When we speak to an other, it would be well for us to ask our own hearts, "How will this be thought of by and by, when it is recalled in memory?" By our words and by our deeds we are making memories for others that shall give pleasure, or give pain, in the coming days.

Sunday School Times.

The Sabbath.

Of all the holy days none is more worthy of the epithet than the Sabbath. Its antiquity, its rest for the body, mind and spirit, its worship of God and study of His word and works, the great events of which it reminds us, God's resting after creating the universe and man and Christ's resurrection from the dead with all the significance of that august event, combine to make it the sweetest and holiest of all the holy days.

North Plainfield Weekly Review

ISSUED EVERY SATURDAY BY

HARRY H. WEBB

AT NORTH PLAINFIELD, N. J.

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, MAY 16, 1903.

THE FALL ELECTION

There is a growing sentiment among the Republicans of Somerset county that no ticket will be placed in the field this Fall. The only office to fill is that of Assemblyman, and as the custom for many years has been to compliment all Assemblymen with a re-election, except where a bad record existed, and as Mr. Swackhammer, the present Assemblyman, has made an exceptionally good record, it is generally conceded that he will succeed himself.

There is some talk of a Republican candidate from Bernards, but we have heard of no others, and are not inclined to look very seriously on this aspirant.

Mr. Swackhammer's action on the repealer of the annexation law is a bitter pill for the annexationists to swallow, but they have no one to thank but themselves, they knew that he was pledged by the Democratic platform to vote for the repeal of the law.

No matter how much one may differ politically with Mr. Swackhammer, it must be admitted that he made an enviable record as Assemblyman.

SUNDAY BALL PLAYING.

There is considerable opposition in many New Jersey cities against Sunday ball playing.

Some lawyers claim there is no law against it, but a noted Supreme Court Judge says there is, and that the police are liable to indictment if they do not stop it.

The argument of the ball players is that they have as much right to play ball on Sunday as the golfers have to play golf.

In one sense they are right, but looked at from another point of view they are wrong. We refer to the disturbing phase of the two games. The laws of our land say that all persons are entitled to quiet Sundays. Base ball, as practiced these days, can hardly be called a quiet game, while golf disturbs no one.

Legally we may assume that neither game can be played on Sunday, but like many other Sunday laws which are being constantly violated, they are not opposed by church people because they do not disturb those people, and they protest only when their rest and quiet is disturbed.

PROSPERITY AN ISSUE.

Some of the Democratic newspapers pretend that there is not much prosperity in this country at present; that it is an optical illusion and will not stand examination. They say there is nothing in the prosperity argument of the Republicans. And, admitting that there is prosperity, some of them say the Republicans are not responsible for it, nor is there any guarantee of continued prosperity. All of which proves that they are somewhat worried over it, anyway.

In 1893 the Democrats went into power, and hard times struck this country and continued until 1897 when the Republicans assumed charge. Immediately a decided change for the better was observable, and for seven years this country has enjoyed the most prosperous times in its history, and there is every reason to think that it will continue.

WE NEED FEWER DOCTORS.

The other day at the convention of the American Medical Association in New Orleans, says the Scientific American, where some 4,000 or 5,000 physicians and attendants were gathered, Dr. Billings drew attention to the decided oversupply of medical men in the United States. He attributed the surplus to the fact that the medical colleges are graduating annually from 10,000 to 12,000 physicians, when the actual needs of the country call for only about 2,500. If Dr. Billings is correct, and there is no reason to doubt his figures, from 7,000 to 10,000 young men are annually entering a profession in which they have but the slimmest hopes of making even the proverbial "comfortable living." Of course, it goes without saying that most of the professions are more or less overcrowded; but we doubt if any of them, except the Law, could afford a parallel to the condition of things brought to light at the New Orleans convention. What this disparity between the demand and supply means to this army of young men, can only be surmised; but certain it is that in the majority of cases it will involve the loss of much money, that can ill be spared, and much time that can be spared still less. It does really seem a pity that some of these graduates have not entered other professions that are not so crowded, and can offer better prospects of remuneration. Sanitary engineering, naval architecture, and the comparatively new profession of forestry, for instance, are not overcrowded, and there will soon be a great demand for really competent automobile engineers, men who combine with mechanical ability a thorough knowledge of gas and other engines that are competing for the control of the field. Then there is the sphere of journalism, which, while abundantly supplied as to numbers, is pitiably supplied as to quality. There must be among those thousands of graduates not a few young men who have a natural gift for good writing—in these days an all-too-rare accomplishment that threatens to become a lost art.

Two members of the Somerset county Board of Freeholders have retired, namely: Eugene V. Cruser, of Montgomery township, and Augustus Mobus, of North Plainfield; and in their places we have Jacob M. Vreeland and William M. Demler. Mr. Vreeland has served in the same capacity before, and his re-appearance is welcomed by all who know his past record. Mr. Demler has served his township for many years in different capacities, and unless all signs fail, he will make equally as good a record in his county position as has distinguished his duties in the past.

The farmers of Iowa are Protectionists. They have reaped the full benefit of the good times. In fact, the farmers and the railroads, says the Des Moines Capital, have been well up in the procession of prosperity. The farmers say that present times are good enough for them. One farmer writes to the Capital that he is not specially concerned about the millions the steel trust is making, for the reason that he has observed that when the iron and steel industry is prostrate everything else is prostrate. Therefore he is willing for the steel trust to make money.

The new libel law which has recently gone into effect in Pennsylvania and which is supposed to muzzle the newspapers and prevent them from cartooning public men, is having an opposite effect. The day following the signing of the bill by Governor Pennypacker, the Philadelphia newspapers opened up their batteries on the Governor and ridiculed him beyond measure. This has been followed by nearly all prominent newspapers in the State. Instead of terrifying the newspapers they have redoubled their efforts to lambast the promoters of the law.

It is conceded that men who have lost their health by working in offices can be mentally and physically restored by working in the soil and the closer their contact with mother earth the better. Why not, young man, consider the claims of agriculture when determining the business you will follow? No other calling has greater attractions or more certain rewards.

According to the thirteenth annual report of the treasurer of the borough of Madison, the water and light plant which is operated by that municipality has been a good investment for the taxpayers. We hear of nothing being done in North Plainfield toward establishing a municipal water plant here, although not so very long ago we could, in our mind, almost see the stand pipe on the mountain, near the Mayor's quarry. Is it possible that the subject has been dropped?

The Diocese of N. J., of the Protestant Episcopal church, in session at Camden, last week, voted against the proposition to change the name of the denomination from "Protestant Episcopal" to "American Catholic". It is claimed that in this vote the low church party was victorious.

For the seventh consecutive time William J. Logan has been chosen director of the Board of Freeholders of Somerset county—a deserving compliment to a man who is indefatigable and conscientious in looking after the interests of his county.

Spring-time in Washington

Washington is a typical Spring resort and its bustle is purely social and political. There are gathered in the Capital representatives of every nation and country, and their comings and goings are of no little interest. Then the doings of the Senate and House are features which every tourist delights in following, and these features together with the visits to the numerous public buildings keep one busy all the while one is in Washington. The Royal Blue Line of which the New Jersey is the initial road is going to operate an excursion to Washington on May 7th, and cost of tickets for the 3 days' excursion including all expenses is $12. Train leaves New York at 1 p. m., and arrives Washington at 6.10 p. m. If you want to know about the trip drop a postal to C. M. Burt, General Passenger Agent, New York City, for tour book. Free for the asking.

The Fly's Noon Hour.

An Illinois congressman said that during a hot summer day he sought rest in a hammock beneath the scant shade of an old tree that stood at the corner of a down state hotel.

"I had no sooner stretched myself in the hammock," said he, "than these flies attacked me, seemingly by the million. It was intolerable, and in no pleasant frame of mind I looked up the proprietor.

"'What do you mean,' I demanded, 'by stretching your hammock in that fly haunted field of torture you call a lawn?'

"'I know the flies are bad out there now,' he answered, 'but you ought to use the hammock during the hammock hours, and you'd have no trouble from the flies.'

"'What are hammock hours?' I inquired.

"'From 12 noon to 2 p. m. daily,' he replied. 'During those hours flies will not attack you in the hammock.'

"I was much interested in the man's Socratic skill in evading the issue, and, wishing to draw him out, I asked:

"'Why are there no flies around the hammock between 12 and 2?'

"'Oh,' he rejoined, 'at that time they're all in the dining room.'"—Chicago Inter Ocean.

An Awful Experience.

A native diver descended into the water to see whether one of the piers, then in course of construction, had set. While he was engaged in this work a great iron cylinder subsided a little, crushing his hand between it and the masonry. When, on a signal being given, another diver came down, he found his unfortunate comrade imprisoned under water without hope of escape. After a few moments of mute despair and harrowing uncertainty a speechless decision was arrived at, and the newcomer proceeded with chisel and hammer to hack off his unhappy companion's hand at the wrist. The prisoner was thus liberated, but died soon after reaching the surface from the shock. Never, I think, has an opium eater in his dreams imagined a more pitiful spectacle of hopeless human suffering.—"Travels In India."

The Word "Average."

After a fair translation of its old French body, "aver," into English only "horse" is found, and the word becomes "horsage." The change tends to confusion, but none the less "horsage" and "average" are identical since in the old time French an "aver" was a horse. It was also a horse in the Scotch dictionaries, and in one of Burns' poems, "A Dream," he alludes to a horse as a "noble aiver."

In olden times in Europe a tenant was bound to do certain work for the lord of the manor—largely in carting grain and turf—horse work, and in the yearly settlement of accounts the just proportion of the large and small work performed was estimated according to the work done by "avers" (horses); hence our common word "average."

Ginseng as a Remedy.

No matter what the disease, the first thing the Chinaman thinks of is ginseng. His faith in his medicine helps to cure him beyond any doubt. Given such trust in any physician or any drug, there is no question but what it would reduce our mortality record. If a man wants to sober up after a night of feasting and wines, the remedy is ginseng. If he has used too much the opium pipe, give him ginseng. If the baby's stomach is out of order, put ginseng into its food. If the appetite is gone, it calls for the same drug. The rich season their food with it as we would with pepper, believing that it aids digestion. The aged Chinaman uses it in the belief that it keeps him from growing feeble.—Medical Talk.

If You Want

If you want posters,
If you want bill heads,
If you want envelopes,
If you want statements,
If you want note heads,
If you want show cards,
If you want letter heads,
If you want calling cards,
If you want business cards,
If you want invitation cards,
If you want business circulars,

If you want job printing of any description done in a satisfactory manner, you can have your wants gratified by calling on The Review, 39 Somerset st., North Plainfield, and leaving your orders or if preferable, use the telephone and our representative will call on you.

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the Review free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled, write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed but it is necessary to have them properly vouched for.

LEGAL NOTICES

NOTICE OF ORDER TO LIMIT CREDITORS

Somerset County Surrogate's Court

Estate of C. A. Girard Lewis, deceased.

Notice is hereby given, that on the FIFTH DAY OF FEBRUARY, A. D. 1903, on the application of the undersigned, as Executors of the will of C. A. Girard Lewis, deceased, an order was made by the Surrogate's Court, requiring the creditors of the said C. A. Girard Lewis, deceased, to bring in their debts, demands and claims against the said decedent, under oath or affirmation, and present the same to the subscriber within NINE months from the date of said order; and in default thereof any such creditor should be forever barred of his or her action therefor against the subscriber.

WILLIAM P. WILLIAMS
CHARLES AUGUSTUS LEWIS } Executors.
Care of JOHN A. MILLER,
716 Prudential Building. Newark, N. J.

SHERIFF'S SALE.

IN CHANCERY OF NEW JERSEY.—Between Mary Jane Sandford et al., Executors &c., Complainants, and James M. C. Smith Defendant.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi. Fa., to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY THE FIFTEENTH (15) DAY OF JUNE NEXT,

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock P. M. at the Court House in Somerville to wit:

All that tract or parcel of land and premises, situate, lying and being in the township of North Plainfield in the county of Somerset and State of New Jersey:

Beginning at a corner in the road in David Boice's line; thence along his line south thirty degrees east thirty chains and forty two links to Eli Pound's corner: then with his line north sixty degrees and forty minutes east twelve chains and twenty five links to James Vail's line; then with his line north thirty degrees and forty minutes west four chains and eighty-seven links, then north fifty-nine and a half degrees east one chain; then north thirty and a half degree west twenty-seven chains and fifteen links to the road; then along the road and David Boice's line south fifty-seven degrees and fifty minutes west twelve chains and eighty-seven links to the place of beginning. Containing forty acres of land, more or less. Being same premises conveyed to said Smith by deed of Elisha Coriell, dated March 4th, 1872, recorded March 8th, 1872, in Book J No. 4 of Deeds for Somerset county, on page 393, &c.

CALVIN D. McMURTRY, Sheriff.

NELSON & WM. N. RUNYON, SOLICITORS.
Dated May 11, 1903. [8.10 8.13]

Factory for Sale or Rent.

Four-story, 40 x 40, water and steam power. Location, 15 minutes walk from trolley; 30 minutes walk from railroad depot. Suitable for almost any kind of manufactory. I also have a

GOOD FARM FOR SALE.

Consisting of sixty acres, half woodland, half cultivated. Located on high ground; house, ten rooms; barn, granary, chicken house, good well, fruit trees, grape vines, etc. Half hour's ride from Plainfield.

Address, P. O. Box 642,
Plainfield, N. J.

THE AMERICAN MONTHLY REVIEW OF REVIEWS

How Can I Keep Up with the Times?

IT is pretty hard to keep well informed on the political news, the scientific news, the literary news, the educational movements, the great business developments, the hundreds of interesting and valuable articles in the hundreds of excellent magazines. About the only way it can be done by the average busy man and woman is to read a magazine like "The Review of Reviews," and, as it is the only magazine of the sort, it is a good thing to send $2.50 for a year's subscription.

PRESIDENT ROOSEVELT says:
"I know that through its columns views have been presented to me that I could not otherwise have had access to; because all earnest and thoughtful men, no matter how widely their ideas diverge, are given free utterance in its columns."

EX-PRESIDENT GROVER CLEVELAND says:
"I consider it a very valuable addition to my library."

The Review of Reviews Co.

Read The Review of Reviews

IN THE LAND of DREAMS

By LESTER GRAY

Copyright, 1902, by T. C. McClure

The setting sun burned through the river mists with lurid smoke. Its dying splendor silhouetted the drooping figure of the girl on the park bench and revealed pitilessly every line of discouragement and weariness.

The lower river walk was quite deserted, and so she kept her sunset vigil alone.

The day had been stifling. In the busy office the whirring fans had brought no breath of coolness. The keys of her machine had felt hot to her fingers, and the lines of typewriting had danced waveringly before her eyes. Somehow, with a strength born of the long ago days of childish freedom in field and wood, she had managed to drag through her work. And now the evening found her here, too weary in mind and body to realize that the river breeze was blowing freshly and the city noises were hushed by distance.

Her face was turned toward the western hills, already shadowed by the approach of night. Her fevered glance seemed to pass beyond them and see the peaceful valleys where ripening grain murmured in the night wind, where in the thickets by the splashing brook came the last faint calls of sleepy birds and drowsy cattle lay in the lush bottom grass.

The girl saw clearly, for in just such a valley she had once lived. She had waded in that clear brook and laughed joyously at her image mirrored in its flower fringed pools. Hark! That was the note of the whippoorwill. Faint and still more faintly it sounded. The scent of the evening primrose was in the air. Its sweetness was overpowering. Her head fell forward on her breast. She had fainted.

She looked around her dizzily. Her face and hair were wet and her head

SHE LAID HER HAND IMPLORINGLY ON HIS ARM.

lay back on a man's arm. Yet she felt neither fear nor surprise. The peace of her dream was still upon her, and her lips half parted in a smile.

The man had been gazing down wonderingly.

"Don't be frightened," he said gently. "You were tired and fainted. I was close by and came to you. Rest quietly."

The girl lay back passively. Realities were still dim uncertainties to her; conventionalities but a part of the forgotten heat and burden of the day. The moon had risen, and in its white light her small face looked very pure and childish.

After awhile the man spoke again, hesitatingly, apologetically: "I sat down some time ago, but you did not seem to notice me. You were too busy watching the sunset. Your face was transfigured. Where were you then?"

"I was in the land of dreams," she answered softly—"in the land of long ago. It is far away from the hurrying crowds, the noise and the heat of this great city, and there one never knows weariness and heart hunger. I know, for I was there once."

"Why do you not go back?" he asked.

"I cannot. Those who loved me and whom I loved are all dead. There is no place for me there."

The light of peace had faded from her face, for a sickening sense of reality had come to her as she spoke. But she had caught the note of bitterness in the man's voice, and now she turned to him, eagerly, gratefully. The moonlight showed a handsome young face, worn and haggard, its beauty dimmed by the too plain marks of dissipation. In the dark eyes was the shadow of despair. But the girl's face only softened into pity.

"Where is your dream country?" she asked wistfully.

He shrank a little from her clear gaze. Then he shrugged his shoulders with reckless nonchalance. "Oh, I am not as lucky as you. I dare not even dream of my country, much less go back." And he laughed bitterly.

"Then you mean you are afraid to go back?"

"Afraid? No!" he cried passionately, as though stung by her words. "I do not wish to go back. What's the use? I have burned my bridges behind me."

She laid her hand imploringly on his arm. "Is there no one left there who loves you," she asked softly—"no one who wants you to come back?"

She almost thought he had not heard the question, he sat so silently looking at the water rippling in the moonlight. Or perhaps he was angry. If she could recall her words.

Suddenly he caught his breath thickly, as if to choke back a sob. "Yes, there is one," he half whispered—"my mother."

Again the silence fell. Then the girl spoke. She did not look at him. He almost had to bend to hear the low monotone of repressed feeling.

"My mother! She has been dead these three months, but I did not appreciate her when she was alive. I was dissatisfied with the calm of my quiet country home. I wanted the glitter and the glare of the city. I forgot that she needed me, and I came here. Of course I meant to make a home for her, but that did not come first—for my own pleasure came first. And when I was gone she faded day by day. I was all she had, so there was no one to tell me. I wrote of gay times with new friends, and she was too loving to worry me with complaints. Then one day the word came she was very ill; I must go to her at once. She had been dead for several hours when I threw myself down beside her. It was too late—too late to hear her dear voice whisper that she had forgiven me."

Great tears were slowly rolling down her cheeks. There were tears in the man's eyes, too, but they shone with the light of new resolution.

"You have shown me your heart tonight, little girl," he said huskily, "and I thank you. You have shown me what I must do. I will go back tonight—at once. I will face the shame and live it down for her sake."

The girl had forgotten her own pain in joy for another. His mother would have her own again. She stood up and held out her hand in goodby. She must not keep him a moment his mother was waiting.

"You will go back and be a man for her sake," she said firmly.

"For her sake," he repeated, "and for you."

And one day her land of dreams became reality.

Thrice the Life of a Stag.

Is it true or not true—another curious and current belief—that the raven lives to an immense age, some say to a hundred or even to 300 years? Old Hesiod is the father of the belief, and he is supported, more or less, by a host of ancient writers, the elder Pliny, Cicero, Aristophanes, Horace, Ovid and Ausonius. Popular opinion in modern times quite agrees with them, as expressed in the highland proverb, somewhat modified from Hesiod:

Thrice the life of a dog is the life of a horse.
Thrice the life of a horse is the life of a man.
Thrice the life of a man is the life of a stag.
Thrice the life of a stag is the life of a raven.

There cannot be so much smoke without some fire behind it, and I am inclined to think that a raven does live to a great age for a bird and that Horace's epithet for the raven, annosus, and Tennyson's "many wintered crow" are justified by facts. But the belief in its extreme age rests, I suspect, on one of its most touching characteristics, its intense hereditary attachment to the spot, a particular cliff, a particular grove, a particular tree, where its ancestors, where itself and where its young have been born and bred.—R. Bosworth Smith in Nineteenth Century.

Local Critics.

"Local color" is an excellent adjunct to a good story, but it cannot supply the place of incident and character. A young author, now in possession of a promising reputation, has related how this fact was first painfully impressed upon his mind. He had spent the summer in an ancient seaport of New England and desired to reproduce its atmosphere of quaint, old fashioned tranquillity in a story.

He worked hard over it. When the tale was done, it occurred to him to try its effect upon a native resident, a retired sea captain, unliterary, but intelligent.

"Does it seem natural? Is it like the place?"

"Yes; oh, yes," replied the old man promptly. "It's like the place. But seems to me places were made for things, and so I been kind o' waitin' all along for somethin' to be doin', and the fust thing that happened was the end."

Still more crushing was the comment of another local critic who read the story after it was published. Some one asked her if it were not well written.

"Land, yes!" said she. "It's written real elegant and lifelike as natur', only whatever did he write it for?"

Boats With Glass Bottoms.

Are boats ever built with glass bottoms?

Boats with heavy and slightly magnifying glass bottoms are constantly used by tourists in the lovely Santa Catalina Island to visit the famous "blue cavern." The passengers sit round the sides of the boat and can see as they pass or linger over them the brilliant seaweeds, glinting fish and natural wonders of the deep, a veritable fairyland of glow and color, in transparent waters beneath.

Some of the pleasure boats at Nassau, in the Bahamas, are built with similar glass bottoms—that is to say, large pieces of plate glass are let into the lower part of the framework. The water is beautifully transparent, and thus those who glide in them over the surface have full opportunity to enjoy a continuous and enchanting sight through the bottom of the boat of various kinds of coral, sea anemones and sea plants which gem and enrich the ocean floor.

Close

To Border Line of Life and Death.

Neuralgia of Heart, Weak Stomach.

Dr. Miles' Heart Cure Cured Her.

Neuralgia of the heart causes sudden death. It is an acute affection of the cardiac nerve, just as neuralgia is of the nerves of the face, usually, and sciatica is of the nerve trunk of the thigh. One of its most frequent symptoms is derangement of the stomach and liver. Strengthen the heart's action and enrich the blood with Dr. Miles' Heart Cure; tone up the nerves with Restorative Nervine and you will soon be cured.

"Nervous exhaustion and liver trouble so affected my wife's health that she was greatly run down; neuralgia of the heart set in and for a long time she was very close to the border line of life and death. She was attended by two good physicians, who did all they could for her, but in spite of everything she grew worse right along. One day I saw an advertisement of Dr. Miles' Nervine and New Heart Cure, and the doctor's explanation of the effects of nervous trouble upon the heart seemed so logical that I decided to give the remedies a trial. We now know that the stomach and liver troubles were part of the heart weakness. She improved wonderfully at once. Her appetite picked up, she slept well at night and the pain around her heart rapidly disappeared. Thanks to Dr. Miles' Heart Cure in a few weeks she was able to be up and attend to her household duties, and in a few months every sign of nervous and heart trouble had vanished."—JAMES B. SIDLEY, Torrington, Conn.

Lost Hair

"My hair came out by the handful, and the gray hairs began to creep in. I tried Ayer's Hair Vigor, and it stopped the hair from coming out and restored the color."—Mrs. M. D. Gray, No. Salem, Mass.

There's a pleasure in offering such a preparation as Ayer's Hair Vigor. It gives to all who use it such satisfaction. The hair becomes thicker, longer, softer, and more glossy. And you feel so secure in using such an old and reliable preparation. $1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

The Cop at Dead Man's Curve.

The big policeman stationed on "Dead Man's Curve" was proving every second that his lot was anything but a happy one. Within five minutes he made four rescues. First, he went to the assistance of a man who tried to dispute the right of way with a car; then he grabbed a woman who essayed to dodge a cab and was about to fall under the wheels, but who, when he sprang forward, fell on him instead. Next, he pushed back a fussy old man who ran before a bicycle, and gathered under his wing a little girl who was hurling puny defiance in the face of an automobile.

Finally he went back to the curbstone to act as convoy to a flock of timid maidens. He marshaled them around him, waved his white-gloved hand, and with the aid of a Damrosch cried:

"Now, all together, ladies, please—all together."—New York Press.

A Deep Anchorage.

The greatest depth to which a ship has been anchored is 2680 fathoms, considerably more than two miles.

It is not generally known that the jackal is a greater destroyer of humanity in India than the tiger. Statistics published by the Government of India show that while 928 persons were killed by tigers, more than 1000 children were carried away by jackals.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa

An opportunity seldom comes back for a second trial.

Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Circulars sent free. F. J. CHENEY & Co., Toledo, O.

Sold by Druggists, 75c.

Hall's Family Pills are the best.

When a man is henpecked he is not apt to crow about it.

Laundering the Baby's Clothes.

Many mothers are ignorant of the serious injury that may result from washing the clothing of an infant with strong washing powders and impure soap. For this reason it should be laundered at home under the mother's directions, and only Ivory Soap used. To throw the little garments into the ordinary wash shows great carelessness.

ELEANOR R. PARKER.

The one thing that every man is willing to share is trouble.

Ladies Can Wear Shoes

A fellow generally gives a lame excuse when he has his leg pulled.

Jamaica Piso's Cure for Consumption saved my life three years ago.—Mrs. THOMAS ROBBINS, Maple St., Norwich, N.Y., Feb. 17, 1900.

A girl may have a far away look in her eyes and still be near sighted.

PUTNAM FADELESS DYES cost but 10 cents per package.

You can't have a blow-out without having something to blow in.

I Did Not Feel That I Could Walk

"DEAR MRS. PINKHAM:—It is with thankfulness I write that **Lydia E. Pinkham's Vegetable Compound** has been of the greatest help to me. My work keeps me standing on my feet all day and the hours are long. Some months ago it didn't seem as though I could stand it. I would get so dreadfully tired and my back ached so I wanted to scream with the pain. When I got home at night I was so worn out I had to go right to bed, and I was terribly blue and downhearted. I was irregular and the flow was scanty, and I was pale and had no appetite. I told a girl friend who was taking your medicine how I felt, and she said I ought to take it too. So I got a bottle of **Lydia E. Pinkham's Vegetable Compound** and commenced to take it. It helped me right off. After the first few doses menstruation started and was fuller than for some time. It seemed to lift a load off me. My back stopped aching and I felt brighter than I had for months. I took three bottles in all. Now I never have an ache or pain, and I go out after work and have a good time. I am regular and strong and am thankful to you for the change.

"I recommend **Lydia E. Pinkham's Vegetable Compound** whenever I hear of a girl suffering, for I know how hard it is to work when you feel so sick."—MISS MAMIE KEIRNS, 553 9th Ave., New York City.

Women should not fail to profit by the experiences of these women; just as surely as they were cured of the troubles enumerated in their letters, just so certainly will Lydia E. Pinkham's Vegetable Compound cure others who suffer from womb troubles, inflammation of the ovaries, kidney troubles, irregular and painful menstruation, nervous excitability, and nervous prostration; remember that it is Lydia E. Pinkham's Vegetable Compound that is curing women, and don't allow any druggist to sell you anything else in its place.

Miss Amanda T. Petterson, Box 131, Atwater, Minn., says:

"DEAR MRS. PINKHAM.—I hope that you will publish this testimonial so that it may reach others and let them know about your wonderful medicine.

"Before taking **Lydia E. Pinkham's Vegetable Compound** I was troubled with the worst kind of fainting spells. The blood would rush to my head, was very nervous and always felt tired, had dark circles around eyes.

"I have now taken several bottles of **Lydia E. Pinkham's Vegetable Compound** and am entirely cured. I had taken doctor's medicine for many years but it did me no good.

"Please accept my thanks for this most excellent medicine which is able to restore health to suffering women."

No other female medicine in the world has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female troubles.

Those women who refuse to accept anything else are rewarded a hundred thousand times, for they get what they want—a cure. Sold by Druggists everywhere. Refuse all substitutes.

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness.

Lydia E. Pinkham Medicine Co., Lynn, Mass.

Reform in Education.

By Professor Eliot, President of Harvard University

WE all know that there is no real line between the elementary and secondary schools, neither is there a definite distinction between the secondary school and the colleges. The whole process should be one.

But there is an epoch—a period at which the child's character is determined, and this is based on natural history, for the development of the child has in it just as much natural history as the growth of the flower of the field.

I believe that the line is this, and that it is the only line I know of in the whole process of education; it is the age when the child had best go away from its home for its education. Our country has found that the moral character of its youth has been pretty thoroughly developed at the age of eighteen. That age is a good one to take the child away from home.

Don't we know what changes really need to be made? The change is in the order of the subjects taught in the High School and the order of all the subjects from the ages of six to eighteen. Don't we know that the High School to-day is positively bad; that the study of languages is erroneous? Any child of nine can master any domestic or foreign language, and so also an observation subject such as botany. Yet the study of these subjects is deferred to the age of fourteen. We are beginning to get the observation studies down into the primary grades, but we have got to get them there more than they now are.

Every child in the whole country ought to have a chance to attack the language and observation studies. The hindrance to this system lies in the fact that certain studies are held back for High School study. Increasing the High School course to six years would be a distinct help.

The Uses of Corporations.

By Charles A. Conant.

THE discovery was made long before our time that a piece of property or a new enterprise could be given mobility and divisibility by putting the title of its ownership into transferable shares. The creation of share companies enables the small capital of individuals to be gathered into the large funds necessary to build factories and railways. It divides the risk of an undertaking among many persons, and places the enterprise beyond the accidents of a single human existence by giving it a fictitious body dowered by law with perpetual life.

To give mobility to the shares thus created, it is necessary that they should have a market. It would be comparatively useless to divide an enterprise into shares if there were no means of transferring these shares readily from hand to hand. Therefore, a market for the shares and bonds issued by such enterprises is one of the vital necessities of their creation. Such a market is afforded by the stock exchange. The fact that the stock market is sometimes abused by people who go into it in a gambling spirit, who know nothing of its purposes and who are incapable of understanding the mighty influences which dominate it, is no reason for treating it as a harmful excrescence on the body politic. Railways have not been abolished because a locomotive runs over men occasionally and kills them; banks have not been abolished because one occasionally suspends; and if enlightened judgment had been used, legislation would never have been enacted in Germany and seriously considered in other countries for stamping out or hampering the operations of the stock and produce markets.—The Atlantic.

The Distinctive Feature of Our Constitution

By Justice David J. Brewer.

THOUGHTFUL men, the world over, have not been lacking in praise of our constitution and system of government. As the years go by it becomes more apparent that the distinctive feature of the constitution is its judicial system, with the Supreme Court at its head. Not in the mere fact of a judicial system, for courts were a part of our Anglo-Saxon inheritance. Indeed, long before the settlement of this country executive, legislative, and judicial departments and functions were in existence. But the significance is in the powers given to the Supreme Court, and given in a Republic formed by a union of States, which, though surrendering some of the absolute supremacy of a Nation, were continued in possession of a large amount of independent authority.

We call ours a Federal system of government. It is Federal because there is a Nation and States within and a part of that Nation—a Nation supreme in national affairs and in foreign relations, and yet powerless to control the purely local interest of the separate States. We rightfully speak of the republic as a nation possessed in its relation to the nations of the world of all the essential attributes of nationality, yet we know that the nation, that Congress as the legislative body of the nation, is impotent to regulate the police affairs of the smallest village in any State. Over local affairs the States are as supreme as though they were not integral parts of the republic.

This creation of a new nation with all the elements of nationality, with absolute control over national affairs and foreign relations, and yet composed of States having a like absolute control over the local affairs of the communities within their limits, would, in the nature of things, result in controversies between the Nation and the States as to their relative control in many matters. That such disputes might be settled peacefully required an independent tribunal, and so the constitution provided the Supreme Court, and to that court were given vast powers.—From "The Supreme Court of the United States," in Scribner's.

We Can All Help to Make Life Pleasanter if We Will

By Margaret Stowe.

THE question that is naturally asked is, "How on earth can I help to make life more pleasant? I have no money to give, no influence and no time."

As far as your understanding goes now that seems perfectly true, but wait one moment. Let the idea of money go and let us take up the question of influence.

You have influence. Unconsciously you are influencing people every minute of every day with your thoughts. Influence derived from position in life is nothing compared to the power you have in your thought world.

Begin by looking out from within for a moment. Are your thoughts cheerful, or gloomy and dull? You can make your mental attitude toward the world such as will have the power, the influence, or the force to strengthen and uplift.

It is good to see on every side evidences of the fact that people are beginning to realize the power of thought and to know that through that channel they are a help in the world.

In this strenuous life of ours we need to cultivate and spread all the good cheer, happiness and contentment that we can; and each one of us can if he determines to do so.

The main stumbling block to man is self. Do not be so taken up with your own interests that you can think of nothing else. Do not, in other words, be a hindrance.

"It is the ignorant man who seeks his own ends at the expense of the greater whole. It is the ignorant man, therefore, who is the selfish man. The truly wise man is never selfish."

The question of time, or no time, is an absurd excuse. Instead of wasting time telling friends about your aches and pains and troubles, which, by the way, no one wants to hear about, why not spread good cheer and talk health and happiness?

Instead of fussing and worrying over business on your way home from the office why not send out to everybody strengthening and loving thoughts?

Think of others who are tired and depressed, and help those around you by your cheerfulness and kindness. You can benefit them and yourself as well, for it is by giving that we receive.

Try this a week and see if you are not the gainer. It is true, it is common sense, and it is demonstrable.

In the degree that you are kind and cheerful will you shed that light upon the lives of those around you. In the degree that we love will we be loved.

"Thoughts are forces. Each creates of its kind. Each comes back later with the effect that corresponds to itself and of which it is the cause."

So if you want love, happiness and contentment send out thoughts of love, happiness and contentment, for like attracts like; but if you live in the thought of malice, criticism or worry, those very conditions will come back to you and consequently breed weakness.

Think over the fact that thoughts are forces and the help that you can give is unlimited.—New York American.

New York City.—Shirred waists always are becoming to young girls and are greatly in vogue at the present time. The very pretty and attractive

MISSES' TUCKED SHIRRED WAIST.

May Manton design shown combines the broad shoulders effect with the shirrings at the waist line, which give the effect of a belt, and is as new as it is attractive. As illustrated it is made of white mull with a yoke of lace, but soft wool and silk fabrics are appropriate, as well as the cotton and linen ones.

The waist is made over a fitted foundation which closes with it at the back. The yoke is fitted onto the lining, and the waist proper is shirred and arranged over it. The sleeves are shirred at their upper portions to form continuous lines with the waist, and again between the shoulders and the elbows. They can be made in elbow length, as illustrated, or in the long bishop style, as shown in the small cut. If a transparent effect is desired the lining can be cut away beneath the yoke and beneath the full portions of the sleeves.

The quantity of material required for the medium size is three and one-fourth yards twenty-seven inches wide, three yards thirty-two inches wide, or two and one-eighth yards forty-four inches wide, with five-eighth yards of all over lace.

Woman's Rain Coat.

Every woman knows the comfort of a coat that completely covers and protects the gown in stormy weather. The very stylish May Manton one shown in the large drawing is adapted to heavy and to light weight cloth as best suits the season, but is shown in tan colored cravenette in medium width stitched with corticelli silk. It is simple and loose fitting at the same time that it is smart, and allows of wearing over the jacket when occasion requires. The sleeves are large and ample and can be drawn on and off with ease. In each front is inserted a convenient pocket and a concealed opening is made at the seam.

The coat is made with fronts and back and is fitted by means of shoulder and under-arm seams. The fronts are faced to form lapels and the neck is finished with the regulation coat collar. The sleeves are in full bishop style with roll over cuffs. The loose back is confined to the waist by a belt that passes through the under-arm seams and closes under the fronts, but which may be worn over them if so preferred.

The quantity of material required for the medium size is five and one-half yards forty-four inches wide, or four and seven-eighth yards fifty-four inches wide.

Millinery Novelty.

For fair ones who found the old English walking hat very becoming the new boat-shaped hat is the thing. Its lines are rolling, graceful as sea billows, and it turns up on both sides. An exceedingly smart example from Susanne Blum is of the finest and richest black straw. It is faced with burnt Cluny, which is caught down, or studded, with black straw nail heads. The only trimming is at the left side, where two ostrich plumes curl along the brim and droop over the hair. One is of black, and one of champagne color. The black one is over the light one two-thirds its length, and its quill is hidden in a pleated and rolled bow of black taffeta, which extends quite to the edge of the front brim.

A New Pique Waist.

A white pique waist has been made in rather an unusual way. Fancy bands of heavy cream lace are in the front, and it has trimming of embroidery in a deep cream shade. The sleeves show no lace, but there is a small point of it on the front of the cuffs. The tops of the sleeves have the cream embroidery.

Coral Collars.

Wide collars of many rows of coral beads are enriched with a central plaque and slides of brilliants.

Black Straw in Favor.

Black straw will be used profusely and threatens to take the place of white entirely.

Woman's Guimpe.

Guimpe dresses have become so common for grown folks as well as for children and young girls that the guimpe may fairly be counted a necessity. The very desirable May Manton

A STYLISH RAIN COAT.

one illustrated is made of shirred batiste with a yoke of lace and is high at the neck with long sleeves, but the same combination can be used with the low neck when preferred or the materials may be anything which best suits the gown.

The guimpe is made with fronts and backs which are faced to form the yoke that can be square or round as preferred. When desired low neck it can be cut on either round or square outline. At the waist is a casing through which tapes are inserted which are drawn up to the required size. The long sleeves are the new full ones that droop over the cuffs and the elbow sleeves show soft puffs at their lower edges.

The quantity of material required

WOMAN'S GUIMPE.

for the medium size is two and three-fourth yards thirty-six inches wide, with seven-eighth yards of all over lace.

GOOD ROADS

Rural Free Delivery.

Indiana is the first State to co-operate directly with the Postoffice Department in regard to rural delivery. The Governor has signed a bill which provides that five per cent. of the road fund shall be set aside to keep the rural mail routes in good condition.

Many routes have been discontinued during the past winter on account of the condition of the roads. It is said that the policy of the department will be to require bad roads to be repaired as soon as possible, after which a year's notice will be given of the improvements required in order to maintain the routes. Greater care will in future be exercised in initiating routes, so as to make sure that when once started they may not have to be discontinued. In one section recently twenty-seven out of thirty-five applications for rural delivery routes were rejected on account of the quality of the roads.

The Postmaster-General has also directed that no more routes are to be established over roads that require the payment of turnpike tolls by the department, and that routes already established over such roads will be discontinued upon the expiration of the existing contracts. This will probably have the effect of causing other States to follow the example of New Jersey, which has in the last few years through purchase by State or counties transformed most of its toll roads into free highways.

It has been claimed by many that instead of abandoning routes on account of the character or quality of the roads the General Government should, under the authority given to Congress in the Constitution, improve and maintain these roads as post roads. These critics do not seem to realize that, as it is the intention to extend rural delivery over the entire country as rapidly as possible, this would soon imply that the Postoffice Department would have to maintain practically all roads, as towns, counties and States would soon cease to do for themselves what they could get done for them without direct expense to themselves. Such a condition of affairs would be manifestly absurd. We believe most thoroughly that the General Government should bear its share of the cost of developing the road system of this country into a condition similar to that of the great European nations. It should do this in a manner that would tend not to paralyze but to stimulate local efforts either through the building of object lesson roads in all parts of the country, or, better, through co-operation with States or counties as provided for in the Brownlow bill, to the extent at least of constructing and maintaining a trunk system of great interstate highways from which would branch off the State-maintained roads, radiating from which would be the less important highways maintained by the counties and towns. It is high time that this matter should be considered in its breadth, and plans prepared for a truly national highway system.—Good Roads Magazine.

Connecticut's Good Roads.

For the amount of money spent, no State is making more rapid advance than Connecticut in securing good roads. Construction is left with the towns, but the State pays two-thirds the cost where the town has over a million dollars of property taxed, and three-fourths of the the cost in towns where the property is below a million dollars. Thus the poorer towns receive most help, yet the richer communities are eager to comply with the act and to appropriate their share of the cost.

Since 1895, when the plan was started, 162 towns out of the 168 in the State have complied with the law, and have commenced road improvement, the results of which are already quite remarkable. During the past two years 138 miles of road have been practically completed. The change in conditions of travel is becoming fully appreciated throughout the State, and there is pressure each year for increase of the appropriations. One very important result is the training given town officials in the art of road construction and repair, so that old, worthless methods are being given up, and the towns are getting more for their money.

In securing the co-operation of practically all the towns and in arousing general interest in road improvement throughout the State, the Connecticut plan seems to have surpassed the State or county method as practiced, say in Massachusetts and in New Jersey. The weak point of the Connecticut system has been the lack of connection between the improved sections of road, but this fault is disappearing with the new constructions made year by year.

Queer British Place Na

There are some places with curious names in the United Kingdom. All may be seen on reference to the Postoffice Guide. The following places with names significant to our readers will be found in the issue for this year: Hospital, Orphan Homes, Hydropathic, The Ward, Bath, Nursling, The Chart, Great Chart, Cotton, Sheet, Wool, Screen, Shelf, Pill, Glass, Swallow, Lansing, Sound, Salt, Steel, Rum, Burn, Gravel, Stones, Scales, Mumps, Knocks, Great Snoring, Healing, Back, Hand, Ham, Leggs, Eye, Tongue and Coldbackle Tongue—which last sounds like complicated symptoms in Pidgin English.—The Lancet.

The Jordan.

The Jordan's course in a straight line is only sixty miles. Along its stream it measures no fewer than 213 miles

SCIENCE & MECHANICS

Exports of frozen beef from Argentina have increased from 9079 tons in 1899 to 70,018 tons in 1902. Exports of live cattle declined during the same period from 312,150 head in 1899 to 118,303 head in 1902.

The grease in the wool of sheep is exceedingly valuable. A great deal of it is lost when the fleece is washed before shearing. A Government expert says: "It is safe to say that from $2,000,000 to $3,000,000 worth of wool fat and potash are run down the streams and wasted annually in the United States."

A twenty-five-story building is to be erected in New York City, 100 feet square, and on land worth $100 a square foot, or $1,000,000 for 10,000 square feet. The building, 325 feet high, will cost only $1,400,000, only forty per cent. more than the land. Offices are expected to rent for $2 a square foot—$800 for a room twenty feet square.

Excessive muscular development is pronounced by an experienced physician to be not only unnecessary, but positively dangerous. On ceasing athletic training, which every person must do sooner or later, the system adapts itself very slowly to new conditions, and digestive and liver troubles are liable to follow. The great lungs, not needed in sedentary work, often lead to consumption.

Professor Spring has examined the commonly accepted theory advanced by Hagenbach, that the blue color of the sky is due to the refraction of light caused by solid or liquid particles floating in the air. In laboratory experiments the author never succeeded in obtaining the blue color, the reflected rays of light always showing either red, yellow or violet. Purification to ease removed the blue tint from the air. After exhausting all physical means in an attempt to reproduce the blue color, the author concluded that the blue of the sky depends upon chemical conditions. The color deepens instead of fades as the observer rises above the earth. These conclusions are supported by the fact that liquid air is also blue.

Metallic construction appears to have had a very low power of resistance during the volcanic eruption at St. Pierre. Not only was it incapable of withstanding the weight of the burning matter, says the American Architect, but some chemical action is likely to have taken place which transformed the particles. M. Amedee Knight, a Senator of Martinique, was on the island at the time of the disaster, and he has been able to furnish details about the destruction which were not observed by others. He describes the effects shortly as corresponding with those which might be expected if some colossal Nasmyth's hammer had been employed in operation on the town. Most things have been reduced to a fine powder. One of the cases mentioned is the market of St. Pierre. After the cyclone of 1891 the authorities decided to reconstruct it in the most solid manner. Cast-iron was adopted. It is now impossible to find the slightest trace of a construction which had an area of 2000 metres square.

Man's Thrift a Wife's Toy.

Miss Vida Goldstein gave an interviewer some interesting information about the happy lot of the American woman. As thus: "It is an absolute fact that the American men treat the women splendidly. The home life is most beautiful. The women are comrades in every sense to their husbands." Then further along: "It is extraordinary to see the way the American men work. They are off to their offices by 8 o'clock in the morning at the latest." Again: "They (the men) devote their lives to making money. Having made their money they are more ready to turn their attention to public affairs. That accounts for the freedom of women. The men make the money and the women spend it."

This query suggests itself to modern society: How does the American man accumulate money if his wife spends it?

High-Speed Electric Railroading.

An Austrian engineer, G. W. Meyer, has been figuring on the possibility of running half-hourly electric trains between New York and Chicago, at a maximum speed of 125 miles per hour. He shows how trains, each consisting of a single car carrying ninety passengers, could be run by the polyphase system with 1800 horse power. He would have a high tension current transformed in substations placed at intervals along the line, and supplied to the motors at a lower pressure. Such, he calculates, could furnish the whole power required. It is the mechanical rather than the commercial possibilities of the scheme that have occupied Mr. Meyer's attention.—New York Sun.

China's Way.

At the beginning of China's late war with Japan, the Chinese Government applied the screws and made a loan of wealthy merchants. After the first year interest was paid on this loan; then it ceased and now the lenders have been asked to accept mandarin buttons, peacock feathers and other decorations in exchange for the obligations.

An Unclaimed Country.

Spitzbergen is one of the few countries as yet unclaimed by any nation. Anyone may dig the coal found in the cliffs there.

The Funny Side of Life.

UNLUCKY.

There are men who never roister,
Yet lead unsuccessful lives;
The world may be their oyster,
But they have no oyster knives.
—New York Times.

HER SIMPLE WANTS.

The Fellow—"Are you looking for any one that I can help you find?"

The Girl—"Perhaps. I am looking for a son-in-law for my mother."—Princeton Tiger.

TAKING NO CHANCES.

First Urchin—"Yer a chump ter spend yer last nickle fer mince pie."

Second Urchin—"G'wan! Don'cher know it's a disgrace ter die rich?"—New York Sun.

A RAINY DAY RACE.

"So you lost again?"

"Of course."

"Couldn't the horse you bet on run?"

"Yes. He could run very well. But he couldn't swim."—Washington Evening Star.

A BAD START.

"I suppose," he said, "it would be useless for me to ask you to be my wife."

"It would," she replied, "if that's your style of going about it."—Chicago Record-Herald.

DISMAL.

"Remember," said the optimist, "every day'll be Sunday—by and by."

"Yes," groaned the pessimist, "and I'll bet there'll be morning and evening services right along, too."—Chicago Record-Herald.

GOOD REASON.

Jobb—"Did old Cumrox give any reason for not allowing his daughter to marry you?"

Lotts (gloomily)—"Yes; he said he was afraid he couldn't support me in the style I was accustomed to."

TWO MISSES.

"Living in the country now, eh?"

"Yes."

"Don't you miss the early morning noise and bustle of the city?"

"Well, when I miss the 7.03 train I do."—Philadelphia Press.

COURSE OF TRUE LOVE, ETC.

Esther—"I suppose you would call the Brewsters a perfect match. They always act like a pair of lovers."

Constance—"Why, they are quarrelling more than half the time."

Esther—"That's what I mean."—Boston Transcript.

Cholly—"Here I am head over heels in debt, and the worst of it is that the more you contract debts the more they expand."—New York Times.

ABSOLUTELY PAST HOPE.

"She is the most inconsistent woman I ever knew."

"Never does what she ought to or what you expect, eh?"

"That is just it. Some times she does. She is inconsistently inconsistent."—New York Times.

MEASURING THE TEMPTATION.

Judge (to witness)—"You say you have know the prisoner all your life?"

Witness—"Yes, your Honor."

Judge—"Now, in your opinion, do you think he could be guilty of stealing this money?"

Witness—"How much was it?"—Tit-Bits.

PRINTER'S ART SHOW.

Universal Exposition to Be Held in City of Antwerp in 1905.

The city of Antwerp, Belgium, is preparing to hold a universal exposition of printing and the kindred arts in the year 1905 to commemorate the 300th anniversary of the publication of the first newspaper. For many years this honor has been disputed by England, Germany, France and Holland, and until recently it was accorded to England upon evidence furnished by the British Museum in the form of a paper called "The English Mercury," which was published by Lord Hardwicke in 1588, but it was discovered that the Mercury was nothing more than a political pamphlet, which appeared irregularly for the purpose of giving his lordship a chance to ventilate his views on public questions; that it never pretended to publish information or advertisements, and was not issued for profit, which circumstances ruled it out of the newspaper list. Nor was any account taken of the Pekin Gazette, which has been published regularly by the Chinese Government for more than 3000 years, because that does not conform to the orthodox understanding of a newspaper. It contains merely the edicts of the Emperor of China and the official announcements of the court.

Therefore the honor of issuing the first regular newspaper was awarded to Abraham Verhoeven, of Antwerp, who, in 1605, obtained a concession for that privilege from the Archduke Albert and the Archduchess Isabelle. Before that time Abraham had issued bulletins irregularly whenever events justified. These bulletins contained official announcements, market quotations and brief notices of current events, and the demand for them appears to have justified the publisher in arranging for their publication upon regular dates. Ten years later the first German newspaper appeared at Frankfort-in-the-Main; the first paper in the Dutch language appeared in 1617, the first paper in the English language in 1622, and the first in the French language in 1631.

The quaint old building at Antwerp in which Verhoeven had his office is still standing; his type and presses have been preserved and have been made the nucleus of a very interesting museum, which will be remembered by all tourists who have visited that city. It is proposed to invite the different nations of the earth to participate in an exposition of printing at Antwerp in 1905, and bring their best samples of everything that in any way pertains to the art preservative.

A Massacre of Nobility.

Such a slaughter of nobility as has lately taken place in Italy has not happened since the bloody days of the French Revolution. Fortunately this last massacre was bloodless. The heraldic office of the kingdom of Italy has been overhauling the rolls of the nobility and every claim to hereditary rank has been scrutinized by experts, historians, genealogists and jurists, with the result that a large number of marquises, counts and even princes have received notice that they are merely commoners. The entire "Black" nobility (those which owe their rank to the Popes) have been struck off the list; likewise the great (meaning numerous) nobility created by the kings of Naples. Another large class which has suffered is that which owes its rank to the numerous deposed and fugitive sovereigns of the Bourbon family whose titles are now legally extinct. It seems that the King of the Two Sicilies, the Grand Duke of Tuscany, the four sovereign Dukes of Parma, Modena, Calabria and Este, the Prince of Benevento and others have thought that they could at least create nobles. Henceforth it will be all the more necessary to examine carefully the titles of our distinguished Italian visitors. — New York Commercial Advertiser.

Paper Napkins.

Paper napkins are gradually coming into favor. They are cheap enough now to buy and throw away. American machinery bids fair to destroy the Japanese monopoly in the article. What is to become of the poor little Jap, who works for three cents a day, when our machinery is well introduced into the Kingdom of the Rising Sun? Japanese napkins are made of young bamboo, and all the work is done by hand. The process occupies about three and a half months. The paper napkin is just what is wanted for picnics and sporting excursions, as it is thrown away after use, thus lightening the hampers. One of these days we may be using paper handkerchiefs, with receptacles for them at every street corner.—New York Press.

Energy Lost in Rocking.

A physician was heard to exclaim recently upon the amount of vitality a woman will put into a rocking chair. "I have heard women who come in from a long walk or after a hard day's work complain that they were too tired to move, and throw themselves into a rocking chair and immediately begin swaying to and fro at an astounding speed, as if their very life depended upon it. The practice would exhaust a man in a few moments, but besides being a source of exhaustion, every rock, so to speak, is a useless and a wasted expenditure of strength."—Washington Post.

Masters of Their Craft.

The thieves of Budapest are undoubtedly leaders in the light-fingered art. Not long ago it was recorded in these columns how they stole a half-mile of stone pavement. The latest thefts are an entire house and all the street signs on two of the leading thoroughfares.

The Only Disagreeable Part.

It is only the first half of any job that is disagreeable. The second half is worse.—New Orleans Times-Democrat.

DOCTOR ENSOR

SUPT. SOUTH CAROLINA STATE INSTITUTION.

Endorses the Catarrhal Tonic Pe-ru-na---A Congressman's Letter.

Dr. J. F. Ensor, Postmaster of Columbia, S. C., late Superintendent and Physician in charge of State Insane Asylum at Columbia, S. C., writes:

"After using your Peruna myself for a short period, and my family having used and are now using the same with good results, and upon the information of others who have been benefited by it as a cure for catarrh and an invigorating tonic, I can cheerfully recommend it to all persons requiring so effective a remedy."—Dr. J. F. Ensor.

Hon. C. W. Butts, ex-member of Congress from North Dakota, in a letter from Washington, D. C., says:

"That Peruna is not only a vigorous, as well as an effective tonic, but also a cure of catarrh is beyond controversy. It is already established by its use by the thousands who have been benefited by it. I cannot too highly express my appreciation of its excellence."—C. W. Butts.

Dr. R. Robbins, Muskogee, I. T., writes:

"Peruna is the best medicine I know of for coughs and to strengthen a weak stomach and to give appetite. Beside prescribing it for catarrh I have ordered it for weak and debilitated people, and have not had a patient but said it helped him. It is an excellent medicine and it fits so many cases.

"I have a large practice, and have a chance to prescribe your Peruna. I hope you may live long to do good to the sick and suffering."

Only the weak need a tonic. People are never weak except from some good cause. One of the obscure causes of weakness and the one oftenest overlooked is catarrh.

Catarrh inflames the mucous membrane and causes the blood plasma to escape through the mucous membrane in the form of mucus. This discharge of mucus is the same as the loss of blood. It produces weakness.

Peruna stops the catarrh and prevents the discharge of mucus. This is why Peruna is called a tonic. Peruna does not give strength by stimulating the nervous system a little.

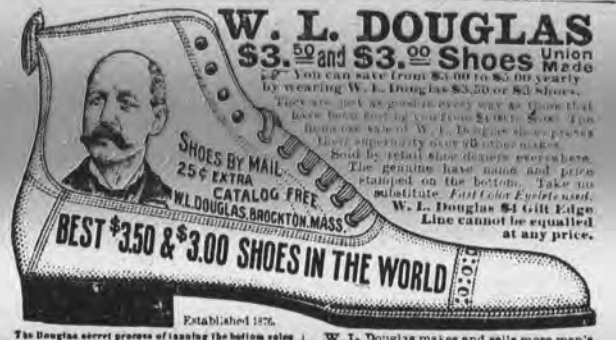
It gives strength by preserving the mucous membranes against leakage.

It gives strength by converting the blood fluids and preventing their draining away in mucous discharges.

Constant spitting and blowing the nose will finally produce extreme weakness from the loss of mucus.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.



W. L. DOUGLAS $3.50 and $3.00 Shoes Union Made

You can save from $3.00 to $5.00 yearly by wearing W. L. Douglas $3.50 or $3 Shoes.

They are just as good in every way as those that have been sold for years at $4.00 to $5.00. The same style of W. L. Douglas shoes cannot be equalled in other makes. Sold by retail shoe dealers everywhere. The genuine have name and price stamped on the bottom. Take no substitute. *Fast Color Eyelets used.* W. L. Douglas $4 Gilt Edge Line cannot be equalled at any price.

Established 1876.

The Douglas secret process of tanning the bottom soles produces more flexible and longer wearing leather than any other tannage. The soles have more than doubled the past four years, which proves its superiority.

1899 Sales: $2,203,883.61
1902 Sales: $5,024,340.00

W. L. Douglas makes and sells more men's Goodyear welt hand-sewed process shoes than any other manufacturer in the world.

$25,000 Reward will be paid to anyone who can disprove this statement

Made of the best imported and American leathers.

The Snarling of Bunsen.

Mrs. Remsen, who is eloquent on the subject of woman's rights, and who is suspected of browbeating her husband, was calling upon Mrs. Bunsen, a demure little lady, who holds to the Josephine Dodge Daskam theory that no woman need worry about her rights so long as she is assured of her privileges.

The conversation had turned upon the subject of husbands, and Mrs. Remsen was giving some pointers to her friend upon the management of these creatures.

"Did you ever catch your husband flirting?" said the advocate of women's rights.

"Why," and Mrs. Bunsen was so embarrassed that she laid down her embroidery while blushes suffused her pretty face, "that is how I did catch him."—New York Press.

Navel Orange Analyzed.

The California navel orange is the most popular winter fruit of the day, so that some recent data as to its make-up should be of special interest. The rind of such fruit makes up twenty-eight per cent. of the whole, while the pulp is represented by thirty per cent. and the juice forty-two per cent. The latter when analyzed gives 13.30 per cent. of solids, 10.46 per cent. of sugar and .97 per cent. of citric acid. Few of the oranges shipped to Eastern markets approach these figures actually, as owing to the plucking of the fruit before it is fully matured the fruit does not attain its greatest perfection.

Tenement Dwellers.

It is said that nine-tenths of the people of New York City live in tenements.

TIRED BACKS come to all who overtax the kidneys. Don't neglect the aching back. Many dangerous kidney troubles follow in its wake. Mrs. C. B. Pare, of Columbia Avenue, Glasgow, Kentucky, wife of C. B. Pare, a prominent brick manufacturer of that city, says: "When Doan's Kidney Pills were first brought to my attention I was suffering from a complication of kidney troubles. Besides the bad back which usually results from kidney complaints, I had a great deal of trouble with the secretions, which were exceedingly variable, sometimes excessive and at other times scanty. The color was high, and passages were accompanied with a scalding sensation. Doan's Kidney Pills soon regulated the kidney secretions, making their color normal and banished the inflammation which caused the scalding sensation. I can rest well, my back is strong and sound and I feel much better in every way."

A FREE TRIAL of this great kidney medicine which cured Mrs. Pare will be mailed to any part of the United States on application. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

It has been estimated by an expert in the employ of the Government that agricultural machinery reduces the number of men employed to do a given amount of work to one-third, while manufacturing machinery reduces the number to one-fiftieth.

In round numbers, the frozen rabbits imported into England last year from Australia and New Zealand totaled 11,500,000.

HIGH SCHOOL NOTES.

(*Continued from first Page.*)

not play up to his usual standard, and this worried him considerably.

Ovens played a good game behind the bat, but his batting was weak.

Adams in right field by a bad error let in three runs. He was changed to first where he played a better game. In batting he made two singles in the game.

Humble in spite of an error and poor throw to first when endeavoring to complete a double-play, played a fine game at second. In batting he was robbed of two hits by the fine playing of the third baseman and center fielder.

Armstrong's playing showed improvement. At first base he stopped several wild throws and made some fine stops of hot liners. In the box in the eighth inning with three men on bases, he struck the three succeeding batsmen out.

Conover's batting showed improvement as he made two singles; but he needs more practice at short.

Kipsey needs more and persistent practice as he was weak at the bat and allowed two runs to go over the plate.

Newmiller's batting showed improvement and he made a neat single in the seventh inning.

George played a good game in the box, but his team failed to support him properly.

Schuck had no chances in right field. He needs more practice in batting.

ROUND ABOUT JERSEY.

(*Continued from first Page.*)

saving Station No. 5, at Takanassee Lake, West End, Long Branch has been notified that a new station and boathouse will supplant the present humble quarters built more than a quarter of a century ago. Plans have been drawn and the work, it is expected, will be started on July 1, at which time the government appropriation will be available. The boatroom will be 38x45 feet, and one-story high. There will be a lounging room for the men and a lookout thirty feet in height. Captain Wardell is elated over the prospects of a new station. The old station will be remodeled and made to conform with the other building. The Takanassee "cottage" will be built on line with the other cottages on the avenue.

A rear end collision on the Central Railroad of New Jersey occurred at White House, last Tuesday afternoon and partially wrecked two freight trains, demolished an engine and completely blocked traffic between there and Easton on the Central that night. The wreck occurred at the bottom of a steep grade near Pickle Mountain. The engineer and fireman jumped before the collision and escaped injury. The engine was thrown down an embankment and ten cars were piled up and badly wrecked, obstructing both the east and westbound tracks. Some of the cars caught fire, when the train ahead pulled them from the wreck and prevented a serious conflagration.

At St. Mary's Protestant Episcopal Church, Burlington, special services are being held this week in commemoration of the 200th anniversary of the founding of the parish. While the service was in progress Tuesday morning a large gray eagle lighted on the cross on top of the tall spire of the church and remained for one hour until the service was over and then renewed its flight. Just a year ago an eagle made a similar visit and rested for a time on the arm of the cross. The visitation of the national bird is looked upon as a good omen by many of the parishioners.

"Miss Simplicity" at the Academy.

Following "The Suburban" at the Academy of Music, New York, Frank Daniels will appear with his big comic opera company in "Miss Simplicity" for three weeks, beginning Monday, May 11. Although Mr. Daniels has been for many years one of the most successful comic opera stars on Broadway, he has never before had an offering that yielded him such rich returns as has "Miss Simplicity." His long run at the Casino last year has not been forgotten, and the fact that he has used this piece exclusively for two years is another demonstration of its unusual merit.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

John C. Milne to Harry H. Coward, $1.

Harry H. Coward to Catherine Milne, $1.

Susan N. Johnston and husband to Laura J. Runyon, $1.

Sallie N. Saums to Henry J. Nischwitz, $3,075.

Low Rates to Los Angeles.

For the General Assembly, Presbyterian Church in the United States, at Los Angeles, California, May 21st to June 2d, the New Jersey Central will sell reduced rate tickets from all principal points on its line. The route is one of the choicest of the trans-continental lines and for information write I. E. Whyte, D. P. A., Asbury Park, N. J.; W. C. Walsh, D. P. A., Newark, N. J.; H. E. Ruhe, D. P. A., Allentown, Pa.; J. S. Swisher, D. P. A. Scranton, or C. M. Burt, G. P. A., New York City.

Concerning Proctor's Attractions.

The summer plans for the F. F. Proctor circuit of theatres have been practically completed, and unless all present signs fail, the outlook is a brilliant one promising success for the management, steady employment for the large band of actors in Mr. Proctor's employ, and best of all—a gay season of highly entertaining shows for the public at large. Later on, there will be a revival of several of last season's biggest hits, and then there will be produced in quick succession half a dozen gay pieces never before seen in New York. All those productions will be as carefully made as though the season were at its height, for it is never Mr. Proctor's idea to curtail expenses, be the season early or late. At his Twenty-third Street Theatre the plan of presenting all vaudeville shows will be continued throughout the summer, the bills being made up with especial reference to the warm weather. At his One Hundred and Twenty-fifth Street house, the favorite stock company will continue its excellent work, strengthened immeasurably by the reappearance of Miss Adelaide Kelm, who resumes her stage work after a much needed period of rest.

Down among the shoppers of Twenty-third Street, where the name "Proctor's" is as refreshing to the tired pedestrians as water to a dying man, the summer schedule has been laid out to satisfy the wants of Mr. Proctor's patrons. The theatre is now being fitted with cold storage pipes, which will insure cool temperature even on the hottest days. The show bills have been booked well ahead, and only the newest and best novelties will be shown this season.

Plainfield Boys Win.

Frederick Tabor Auken, of Plainfield, passed the highest in a competitive examination held at Pingry School for appointment as midshipman at Annapolis. Nathaniel Pendleton Rogers, Jr., of Plainfield was second. There were ten candidates, representing every county in the Fifth Congressional District. Auken and Rogers both took the West Point examination last year and at that time Auken was second and Rogers first. One goes to Annapolis and the other to West Point.

HIGHWAY CONVENTION

National Good Roads Association Soon to Convene in St. Louis.

A Short History of the Efforts Its Members Have Made to Improve the Highways of This Country.

During his long western trip President Roosevelt will nowhere meet an audience more important than one he will address in St. Louis on April 29. He will speak on that date before the National and International Good Roads convention, convening April 27, 28 and 29, and which will be attended by men of prominence from all parts of the country who are interested in the cause of good roads. Secretary of State Hay has, moreover, issued 1,567 invitations to foreign governments and officials asking them to send representatives to the convention in order that European methods of road construction and maintenance may be brought into comparison with ours.

Since the sessions of the first national convention ever convened to consider the subject of highway improvement (held in Chicago in November 1900), a good deal of progress has been made in arousing public enthusiasm for the cause of good roads and it is the plan of the association that the coming convention shall give the movement an impetus that will make itself felt in all parts of the country. The assertion is made that 95 per cent. of the loads carried by railroads, steamship or express companies must be carted in wagons or trucks over highways and that it now costs the farmers of the United States nearly three times more than those of Europe to market an equal tonnage of farm products over primary roads.

Of the organizations which have a very special interest in securing better roads, as shown by their willingness to send delegates to the convention, are the railroad companies, commercial organizations, automobile and bicycle interests and various others which have given their support to State Good Roads associations. Governors of states and mayors of many cities have taken an interest in the work and have promised to send delegates to the convention.

R. N. RICHARDSON.
Secretary of the National Good Roads Association.

The cooperation of the railroads has been an important feature of the good roads movement since its beginning. Early in the year 1901 the Illinois Central railroad placed at the disposal of the National association a splendid train consisting of eleven cars and an officer's crew, carrying full commissary for the entire crew. This train, which was equipped with full complement of modern road making machinery with expert operators, made a tour of the states of Louisiana, Mississippi, Tennessee, Kentucky and Illinois, holding 16 conventions, constructing as many object lesson roads, and covering a period of three months. A second train of this character was carried over the Lake Shore and Michigan Southern in September of the same year and a month later the third and largest train of this class left Washington, D. C., for a tour of five months over the Southern railway system, making 18 stops for conventions and road making object lessons. This campaign was closed at Charlottesville, Virgina, where the first section of the Jefferson Memorial road connecting the University of Virginia with Monticello, the home and tomb of Thomas Jefferson, was constructed.

In the beginning of the fiscal year 1902 the road division under the department of agriculture, having had its appropriation increased by congress, cooperated with the Great Northern railway and ran a train of ten cars over that system in September, holding four conventions and giving object lessons in Minnesota and North Dakota. The campaign was continued to the extreme northwestern states of Washington and Oregon by the government officials without the aid of the train, it having been deemed too late in the season to carry the train across the continent. As a result of the state conventions that were held the legislatures of both of those states have enacted modern road laws that are a gratifying evidence of progress.

Not since the days of the agitation of the national pike from the Cumberland to the Mississippi has there been such general and active interest manifested in the subject of the betterment of the common roads.

MILTON MARKS.

Jersey The Summer Paradise.

There are regions well known and resorts which are popular, but no one State has as many famous resorts as the New Jersey coast. To reach it is neither difficult or tedious because the journey begins with an hour's sail down New York Bay to Atlantic Highlands on the Sandy Hook boats, and the rail trip leads along the Jersey shore to the innumerable points from which may be selected the vacation place. The boats are frequented by the most famous brokers, bankers, professional and business men of New York City, who have summer homes at seashore, and the resorts are as famed as their summer residents. Upon reaching the Highlands there is ample express train service to Navesink, Normandie, Seabright, Monmouth Beach, West End, Long Branch, Elberon, Deal, Allenhurst, Asbury Park, Ocean Grove, Avon, Belmar, Spring Lake, Manasquan, Point Pleasant, Red Bank, Matawan, Freehold, and other well-known resorts, each of which has its own specific attraction, but the main feature, of course, is the bathing, and at the majority of these places there is both salt and fresh water bathing. For the yachting enthusiast the Jersey coast is unequalled, while in the matter of good roads for which New Jersey is noted, the section in which the above resorts are situated is far famed, and in every direction there are charming roads for walking, driving and automobiling. Every effort is exerted for the pleasure and comfort of summer tourists, and the hotels numbering into the hundreds are well kept houses. Besides the Sandy Hook Route the New Jersey Central has an all rail line to the Jersey coast, and its fast express service leaves New York from stations at foot of Liberty Street N. R., and South Ferry. All trains are equipped with the latest designed Pullman Parlor Cars and Coaches, and upon application to C. M. Burt, Gen'l Passenger Agent Central R. R. of New Jersey (26 New York, a hotel book and sea shore time table will be sent you; they are free for the asking.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dreaded disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address,

NEW JERSEY'S LEADING NEWSPAPER.

Newark Evening News
AND
Newark Sunday News

THE ONLY PAPER WHICH COMPLETELY COVERS THE HAPPENINGS OF THE STATE.

ALL who wish to keep in touch with the news of New Jersey will find in the NEWARK EVENING and SUNDAY NEWS the best medium for attaining their desire. The NEWS is not only a paper for Jerseymen, made by Jerseymen, but it is a newspaper in the widest sense of the term. It contains each day more news of the world in general than any afternoon paper printed in New York or Philadelphia, in addition to making a specialty of all matters of importance in the State.

BETTER THAN EVER IN 1903. The facilities of the NEWS for the production of a great newspaper have been largely increased in the past year and many improvements have been made. But in the coming year greater progress than ever before is promised. New features are being added constantly, which make the NEWS more and more attractive as a newspaper for the home.

INDEPENDENT IN POLITICS. The NEWS is absolutely independent in politics, and is always the champion of every measure which has for its object the greatest good to the greatest number.

Its reports of the Legislature are full, but discriminating. Uninteresting details of the routine work are eliminated, and attention is devoted to the important bills presented, and the bearing of all these measures as related to the welfare of the people is made public. A special study of the political situation is made and unbiased reports are given. The enviable reputation that the NEWS has held in the past in this regard will be maintained in the future.

TERMS OF SUBSCRIPTION:

The EVENING NEWS, by mail, $5 a year, or 50c. a month.
The SUNDAY NEWS, by mail, $1.50 a year.
The EVENING NEWS and SUNDAY NEWS, by mail, $6.50 a year, or 60c. a month.

The **News** is delivered by newsdealers and carriers in all towns in Northern New Jersey and all along the Jersey coast, at 10 cents a week for the evening paper and 3 cents a copy for the Sunday edition.

Circulation of the NEWS Over 50,000 a Day.

Two Boys Drowned Near Somerville

There was a double funeral Tuesday at the home of John Ward, along the Raritan river, three miles from Somerville.

His three sons, Adrian, Bird and Harry, aged sixteen, twelve and five, started from their home on Saturday afternoon with a large scoop net to fish in the Raritan River. They stopped at a pond in a field near the Philadelphia and Reading Railway bridge. The embankment gave way under Bird Ward's feet and he slipped into the pond and sank out of sight. His brother Adrian dived into the water to find him. Five-year-old Harry waited for a long time for the brothers to come to the surface, but saw only bubbles arise from the bottom of the pond. He ran screaming to his home and gave the alarm. John Ward and his neighbors ran to the pond. They found the brothers stuck in the mire bottom of the pond, with their arms locked about each other's neck. They were dead.

MEMORIAL EXERCISES.

Borough Schools Observe the Day With Appropriate Exercises.

Memorial Day was observed in the North Plainfield High School yesterday morning and afternoon. The following programs were rendered:

NORTH PLAINFIELD HIGH SCHOOL.

Erner Acquitted of Murder.

Joseph Erner, was acquitted of the murder of John Driff, his godfather. As he was brought into court Erner trembled, facing the jury. The jury discredited the testimony of Michael Wiza, the State's principal witness, who swore he saw Erner kill Driff with a club. Wiza gave conflicting testimony.

Decide Against Sunday Golf.

The Hillside Golf Club of Plainfield voted on the question of Sunday golf, and decided not to open its course on Sundays. The club was almost equally divided in opinion, and the Sunday observance won by a majority of two only; the vote was 93 to 91.

To Succeed Dr. Richards

A unanimous call has been extended to the Rev. John Sheridan Zelie, of Schenectady, N. Y., to become the pastor of the Crescent Avenue Presbyterian Church, succeeding the Rev. Dr. William R. Richards, now of the Brick Presbyterian Church, New York. A committee of fifteen was appointed a year ago to select a pastor. Mr. Zelie is a native of Maine and is thirty six years old. It is believed that he will accept the call.

Strawberry Festival.

Under the auspices of the Ladies' Aid Society of the German Lutheran Church of Grove street, a strawberry and ice cream festival will be held in the church parlors on Wednesday evening, June 3rd.

The Young Ladies Association of the Church will provide an interesting entertainment consisting of vocal and instrumental music, recitations, and reading.

All are invited.

Dunellen Post Office Goes to Dr. Brakeley.

Congressman Benjamin F. Howell has announced definitely that Miss Mildred Gaskill will not be placed in charge of the Dunellen Postoffice. He has decided to recommend for the place Dr. P. W. Brakeley to succeed Adam Dealaman. Henry S. Garretson, former director of the Middlesex County Board of Freeholders, who was a candidate, retired in favor of Brakeley.

Miss Gaskill was Postmaster Dealaman's assistant, and during his last illness managed the office. She has managed it since his death, and her thorough knowledge of the duties of the position secured for her the indorsement of all the women and nearly all the men of Dunellen.

But Miss Gaskill has no vote, and, moreover, it is said to be against the policy of the government to appoint women to such positions.

The formal appointment will not be made until President Roosevelt returns from the West.

THE DEADLY FLOBERT.

Little Thersa Watson the Victim of Youthful Novel Reader.

The death of little Theresa Watson, the nine year old victim of a Flobert rifle in hands of Willie James occurred at the Muhlenberg Hospital Tuesday night about twelve o'clock.

Briefly the facts in this sad case are as follows:

Willie James, a ten year old son of Mrs. Henry James, of Belmont avenue, together with a younger sister and brother, and Theresa Watson, daughter of James Watson, of Manning avenue, left home last Saturday morning, and were not found until Monday.

Mrs. James, it appears, knew the destination and object of her children's absence, but preferred to remain silent, while James Watson, the father of the victim of the tragedy, was making strenuous efforts through the police and otherwise to find traces of his little girl; and it was not, so it is claimed, until Mrs. James was threatened with arrest that she told an officer that the children had started for Liberty Corner, about eleven miles from North Plainfield, where they were found Monday, near the residence of Samuel Baldwin, by whom young James was once employed. Mrs. Baldwin stated that the children arrived at her house Sunday and that she looked after them and started them back home Monday morning.

Just what ocurred during the time the children were away is almost impossible to ascertain. Young James tells one story, Theresa Watson told quite a different story, and the older of the James girls, gives still another account. Putting the stories together it appears in some manner the James boy got hold of a small rifle and some ammunition. It is claimed his sister stole the gun from a neighbor. He says after they started that he tried to make Theresa go back, failing in which he shot her. He says he did not intend to hurt her much, and as she continued to follow after him, he supposed she was not badly hurt.

Theresa told her father while in the Hospital that Willie persisted in making her continue walking although quite tired, and when she complained and refused to walk any farther that he shot her.

When they reached Baldwin's house little Theresa, although fatally wounded, showed no signs of breaking down, and it is probable that Mrs. Baldwin did not suspect that the girl had been shot, and it was not until the arrival of the officer from here, and after she had started the children home that it was known that the child was in a serious condition, when she was brought home by James Laughlin, proprietor of the Mt. Bethel hotel.

As soon as she reached here, Dr. J. H. Buchan was summoned, and he sent her to the Muhlenberg Hospital, where an examination was made, the result of which showed that the bullet had entered her abdomen. Subsequent examinations showed that gangrene had set in and that the bowels had been perforated by the bullet a number of times. Dr. Buchanan saw there was hardly a chance for the little girl to recover, but with the assistance of other skilled surgeons, everything possible was done to save her life, but without avail, and she died Tuesday night.

Willie James was placed under arrest and is now in jail at Somerville, where he was committed by Justice Mattison, after a hearing, based on a charge made by James Watson, the father of the little girl.

According to the stories of those neighbors who are acquainted with Willie, as well as his mother, he is simply incorrigible. He has been a great reader of cheap novels of the Indian type, and lays considerable stress on his name, associating it with that of Jessie and Frank James, the life of whom was read to him by his older brother.

The funeral of little Theresa was held yesterday at the residence of Mr. Watson, Rev. Father Miller officiating.

Mayor of Elizabeth Under Fire.

Preaching in St. Patrick's Church at the 10:30 o'clock mass last Sunday, Very Rev. Dean Gessner practically called upon Mayor Ryan to tender his resignation as chief executive of Elizabeth.

Previous to his regular sermon on the Gospel of the day the pastor made a few introductory remarks. He said that in the morning he had been called out to minister to a sick man in the parish and that while returning to the church he had observed that the saloons were wide open and that in front of many of them young men were congregated.

"You know as well as I," he declared, "that our politicians are simply rotten. I think the Mayor of the city should resign if he cannot enforce the law against the Sunday saloons."

THAT "AWFUL" DRAIN.

Board of Health Not Worrying Over Mr. Saunders' Letter.

One of the most amusing incidents of the past week in local affairs was a letter sent by ex-Mayor Saunders to the North Plainfield Board of Health, enclosing an analysis by ex-druggist Reynolds, of common street water from a catch basin, which contained the usual washings of the street.

Years ago, either when Mr. Saunders was Mayor, or previously, the borough constructed a catch basin on property near the corner of Rockview avenue and Orchard Place, to carry off the drainage of certain streets. As it was constructed then, so it is now. No private drain has ever gone into it from anyone's house, so far as known. It has not been complained of in any formal manner; in fact the first regular complaint comes from Mr. Saunders, who lives many hundred yards away.

That the ex-Mayor has a right to complain as a citizen, if he thought the catch basin and the overflow from it a nuisance, nobody doubts. In fact it is quite likely that, as the population has increased in that vicinity, it is, or is likely to become in time, objectionable.

But it is the Borough that is responsible for the whole matter, as the Borough constructed the catch-basin, and not the Board of Health. In fact, if it happened that the Borough made the arrangement about the time Mr. Saunders was Mayor, it might easily be that he is himself responsible for this wonderful, remarkable, extraordinary and abominable "nuisance!"

Mr. Saunders, however, did not make a complaint in the usual way—say in a letter of ten lines, asking for "an abatement of the nuisance." Instead he had first a sample of the dirty street water taken to a former local druggist, who calmly analyzed it and discovered that it contained "ammonia." Street washings always do! Thereupon, the ex-Mayor straightened himself up and fired off a five-inch ball from a twenty-inch cannon. He loaded it to the muzzle with paper wadding, and fired it directly at the head of Andrew Love, president of the Health Board. Mr. Love heard not even the sound of the whizz, because the gun was so elevated it took the ball up to the Watchung mountains near the present Mayor's "copper mine." It is probably still reverberating amid the crags and eagle eyries of that famous place.

Shades of druggists and chemists! How a mole hill sometimes swells out and becomes a mountain!

The Board of Health, as well as the public, has had a good round smile at this letter. Windmills do not always grind grists of grain, but they do help to cool off a hot day.

It has been suggested that the new counsel of the Board, Hon. Samuel S. Swackhammer, who was recently selected by the Board to succeed Charles A. Reed, and who is abundantly capable of advising the Board as to whether it or the ex-Mayor constitutes the lawful authority of the borough, shall write a calm letter to Mr. Saunders, recommending him to keep perfectly cool, because the weather is lots hotter here than it will be in Russia!

In the meantime it has also been suggested that the Board turn this matter over to the Mayor and Council, because, if there is any ground of complaint, it is up to them to remove the catch basin and carry off the street "ammonia" to some other point.

Unfortunately life is so short that fun and frolic like this cannot be had all the year round, and everybody will regret, if by the action of the borough authorities, such little episodes will be no more. If we miss such analyses in the future from the columns of the newspapers, the nights will be longer and life scracely worth living.

Full details of the history of this drain appeared in the REVIEW two weeks ago, and nothing has since occurred that would necessitate anything more to be said on that subject.

North Plainfield High School Commencement.

The commencement exercises of the North Plainfield Public High School will be held in the Y. M. C. A. Hall Friday evening, June 19 at eight o'clock.

The following pupils are the graduates:

Edgar Whittington Adams, Fred Kline Armstrong, Jennie D. O. Smith-Bergman, Florence B. Conroy, Matilda E. Coddington, Marion Alberta Engelhart, Edgar Dawson George, Jr., Leah Angela Hammond, Arthur Roland Humble, Frances Ursula Krewson, Agnes La Boyteaux, Edna Antoinette Lewis, Hattie R. McLaughlin, Raymond F. Martin, Mary Hazel Martin, Hope Irene Miller, Minnie Mae Nischwitz, Mary Agnes Seal, Clyde May Slater, Stella Parkins Vermeule, Isabelle Hurlbut Williams, Sadie Adele Winckler.

TALL TIMBER IN SOMERSET.

CHILD AND CHILDS.

From the West Jersey Press.

Speaking of the Democratic Gubernatorial nomination, the Hackettstown Gazette says: "It is a long way off, but the two men now within the range of Democratic vision are Judge Francis Child, of Morris and Essex, and Senator Childs, of Somerset." This may turn out to be a bullseye hit. Judge Child would certainly make a high-class candidate, and Senator Childs is well equipped with the munitions of war. There is nothing to the discredit of either, so far as we know, except bad judgment in the way of political affiliations. The Democrats might go further and fare a great deal worse.

SOMERSET'S GUBERNATORIAL TIMBER.

From the Trenton Times

Ex-Senator Smith recently mentioned "among others," the name of Senator Childs, of Somerset, as a probable Gubernatorial nominee, and some of the Democratic papers have taken it seriously. Will some one kindly explain what Senator Childs has ever done to entitle him even to a mention? If the Democrats are looking toward Somerset county, what's the matter with Assemblyman Swackhamer?

Jumping From Trolley Car Caused His Death

On Saturday evening while going with several of his chums to the I. C. T. circus, Louis DeCamp the ten year old son of Mr. and Mrs. Frank DeCamp, of Linden avenue, boarded a trolley car without the intention of paying for his ride. As the conductor came around for the fares, DeCamp and his companions jumped from the rapidly moving car at the corner of Plainfield avenue and Fourth street and as a result received injuries from which he passed away on Sunday morning.

After having jumped off the car young DeCamp's actions became very peculiar, but as he picked himself up and continued with the other lads to the scene of the circus nothing more was thought of his fall until t[illegible] when DeCamp[illegible] corted to a bo[illegible] getting any better his brother advised to go home and the lads journeyed home again.

Shortly after reaching his home he became unconscious. At this point his parents were told of his accident and Dr. Adams was immediately called. The doctor worked over the boy several hours but at 5 o'clock on Sunday morning he passed away. The funeral services were held from the residence of his parents on Tuesday afternoon. Rev. Dr. Edwin L. Earp was in charge of the services.

No Law Can Stop It.

The age of romance is still with us. The writers of lurid fiction continue to make a great impress upon the rising generation. The composers of juvenile literature of a high class have been congratulating themselves that they have weaned the children of today from the dime novel and the nickel blood-and-thunder tale so popular in recent years. But happenings in North Plainfield in the past few days show that the highly colored tales of adventure found it in fuller measure than that for which they had hoped. The ten-year-old chief of the band of fortune hunters rose fully to the occasion. When one of his girl followers desired to desert the company while on the trail in the enemy's country, in the wilds of Somerset county, he promptly shot her and brought her into subjection. Shameful as it may seem, for this warranted discipline he has been placed in jail to await the outcome of the injury inflicted by his rifle bullet.

And yet this hero of his little world had been but following the instruction he had received from books. In his cell he probably bemoans his unjust fate, and, like Lowell, laments the fact that even in these enlightened days the couplet applies:

"Truth forever on the scaffold,
Wrong forever on the throne."

If the lad's instructors were to blame for his sad situation, why should they not be compelled to suffer with him? The "freedom of the press" to turn out literature that corrupts and deforms the moral instincts of the youth of the country, it seems cannot be restrained. It is a delicate matter to find out just where to draw the line. There is no press censor in this country, and the establishment of one would not be tolerated. If children are to be protected against the influences of harmful books, it must be through their parents and teachers. A child cannot be trained aright by civil or criminal law.—*Newark Evening News*

Mauch Chunk Excursion.

The New Jersey Central runs an excursion to Mauch Chunk on Decoration Day, May 30th, round trip $1.50; special train at 9 22 a. m., from Plainfield.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

A committee of the Hammonton council has been instructed to ascertain the cost of converting the town hearse into a hose wagon.

The resignation of Miss Anita A. Wright, who has been teaching in the Camden city schools for forty-eight years was accepted last night and she was placed on half pay.

Trenton High School graduates have voted this year to wear caps and gowns at the commencement exercises to be held Tuesday, June 23, at the opera house. Last year the graduates were criticised because some of the wealthier parents dressed their children in a style beyond the means of others in more humble circumstances. This year all will be attired alike.

The State camp of instruction for the National Guard of New Jersey will be opened on July 4 at Sea Girt, and will remain open until July 25, inclusive. The 5th Regiment and Battery A will take possession of the camp on July 4, and will evacuate the grounds on July 11, making room for the 4th Regiment and the Signal Corps. From July 18, for one week, the 1st Regiment and the 1st Troop, cavalry, will share the camp.

A children's fresh air camp is to be established at the Glen farm, near Park Ridge, Bergen county. Property has been purchased by the Salvation Army of New York city for the purpose, costing $15,000. Besides being used a children's home during the summer seasons, there will be established a permanent training school to teach young men and boys practical farming preparatory to being sent to the various Salvation Army colonies in different parts of the West.

Policeman Maroney saw a man acting [illegible] Avenue D, Bayonne. He described himself as George Craft, of King street, Newark. Having heard, he said, that Bayonne mosquitoes had steel beaks, he decided to prepare himself for an attack. Despite his heavy clothing, Craft was bitten, he said, many times on the legs. He was sent to Snake Hill for ninety days by Recorder Lazarus.

Table manners of Rutgers College students are criticised sharply by Miss Grace H. See, who has charge of the college dining-room. Miss See does not object to students appearing for meals in shirtwaists, and even minus their coats, but she does draw the lined at rolled-up sleeves. Therefore, she has issued an edict against this comfortable custom, and it is like unto the laws of the Medes and Persians. The students do not relish the mandate and talk rebelliously, but they must obey or go supperless to bed, like naughty children.

Newfield section boasts of a woman who is almost four score years, who is hale and hearty as a girl of twenty, and who declares that her unusual agility and youth is due to the fact that she invariably follows a vegetable diet and goes about continually in her bare feet. She is Mrs J. B. Lucas, who graduated years ago from a New York college of hygiene and natural methods in curing disease, and it was while a student at the institute that she imbibed the ideas that have ruled her life for many years. She declares that she will live to be a century old, and points to a life that has been perfectly free from disease, all because she has gone unshod, ate no flesh meat or seasoned food, and used only hot and cold water in healing simple ills.

West Point Excursion.

The New Jersey Central will run an excursion up the Hudson to West Point June 6th, on the Steamer St. Johns. The scenery throughout the trip is grand and an outing at this time of the year will be delightful as well as beneficial.

After leaving the commercial section of the river you see Grant's Tomb, Riverside Drive and the Palisades, while further along there is Anthony's Nose, the Crow's Nest and West Point.

The visit to the grounds and buildings of the Military Academy at West Point is both interesting and instructive as this is the place our Generals are trained and whom the safety of our beloved country often depends. This will be a first-class family excursion, no intoxicating liquors being offered for sale on the Steamer.

There will be music on the steamer and the restaurant will be in charge of a first-class caterer. The train leaves Plainfield station at 8:02 a. m. Round trip tickets $1.00. Don't forget this trip.

DEATH IN GREAT AUTO RACE

A Shocking Series of Accidents in the Paris-Madrid Event.

GOVERNMENT STOPPED CONTEST

About 300,000 Persons Witnessed the Start—One Competitor Burned to Death Under His Overturned Car—Two Soldiers and a Child Killed by One of the Machines—Blow to Auto Racing.

Paris, France.—The greatest automobile race ever begun was peremptorily declared off by Premier Combes because of an appalling list of fatal accidents attending the run from Versailles to Bordeaux. The event was the great Paris-Madrid race, and the most notable automobilists of the world were the participants. At least seven persons were killed and three others were fatally injured.

A mechanic, two soldiers, a woman and a child, who were standing near the course near Ablis, were struck by the racers and all of them instantly killed.

At Bonneval L. Porter, one of the contestants, burned to death while racing along a level stretch at a frightful pace. The machine caught fire in some unaccountable way and the chauffeur was instantly enveloped in flame. When taken from the wreck the body was found to be burned to a crisp.

Barrow, the Englishman, ran over a dog near Libowme, which caused him to collide with a tree. The occupants of the automobile were thrown. His machinist was killed and he was fatally injured.

Marcel Renault, the winner of the Paris-Vienna race, lost control of his machine, and ran into a ditch and was upset, which practically put him out of the race, though he was uninjured.

Couheverne also ran into a tree and was thrown violently to the ground. He was in a most serious condition and his automobile was wrecked. Farmen met with an accident which put him out of commission.

Fully 100,000 people witnessed the start at Paris at 3 o'clock a.m., there being 314 entries. Three hundred qualified and started, one every minute for five hours.

William K. Vanderbilt, Jr., and Henri Fournier were among the racers. The roads were found to be in better condition than had been anticipated.

The first stage of 343 miles was finished at noon, when Louis Renault dashed at a furious pace into Bordeaux, having made a record run of eight hours and twenty-seven minutes. An hour later M. Gabriel arrived with a still better record of eight hours and seven minutes. It is estimated that these automobiles covered sixty-two miles an hour on the road outside the cities.

It is stated that Louis Renault's automobile attained at Beaurdinieres, between Chartres and Vendome, a speed of [redacted] miles an hour.

Four Killed by Autos in Great Britain.

London.—Concurrently with the reports of the fatalities caused by the automobile race in France came reports of four deaths caused by motor cars in Great Britain. A woman seventy-two years old was killed at Edinburgh, a man was killed at Kew, and at Bristol, where bicycle races were in progress, a motor cycle killed a competitor and a spectator.

TOWNS WRECKED BY TORNADOES.

Lives Lost, Crops Damaged and Property Destroyed in the West.

Topeka, Kan.—Half a dozen towns were partly or completely wrecked, a dozen people were killed or fatally injured, over 100 were badly hurt, scores of cattle were killed and hundreds of thousands of dollars' damage was done by a series of tornadoes extending from Oklahoma to Lake Michigan. The greatest damage was in Kansas, where the furious gale demolished a string of prairie towns and razed thousands of acres of standing crops. An unprecedented rainfall flooded Oklahoma City, and the total loss to property is estimated at over $100,000.

Enid, Okla.—Hundreds of persons were rendered homeless and property damage to the extent of $300,000 was done to the Enid Bottoms by a cloudburst that struck west of this city. A hundred houses were partly or completely submerged.

BANK OFFICER TRIED SUICIDE.

Buffalo Bookkeeper Shoots Himself and Confesses to Shortage.

Buffalo, N. Y.—Grant Blodgett, general bookkeeper of the Bank of Buffalo, shot himself in the head in the basement of the building. The bullet entered just back of the left eye, and severed both optic nerves. Even if he should recover he will be blind.

Blodgett told President Elliott C. MacDougal, president of the bank, who was summoned after the discovery of the shooting that he was short $519,570. Blodgett had worked for the bank for sixteen years. He is married and has a son.

ANOTHER BOODLE CONVICTION.

First of St. Louis's Lighting Cases Tried—Hartman Found Guilty.

St. Louis, Mo.—Emile Hartman, a former member of the House of Delegates, was found guilty of bribery and his punishment fixed at six years in the penitentiary. The case will be appealed. This is the first of the boodling cases connected with the lighting scandal and implicates Edward Butler.

Bailey Sells His Big Ranch.

United States Senator J. W. Bailey has sold his big ranch. It contained 62,80 acres of the choicest land in Northern Texas, and the price is stated to be $50 per acre.

Small Gold Exports.

Small gold exports are not cause for uneasiness with treasury vaults holding about $643,000,000, and it must be remembered that thus far this year the outgo has been exceptionally light.

ACCUSED OF TAKING BRIBE

D. V. Miller Summarily Dismissed From the Postoffice Department.

Assistant Attorney Arrested—The John J. Ryan & Co. Turf Concern Said to Have Paid Money.

Washington, D. C.—Daniel V. Miller, an Assistant Attorney in the office of the Assistant Attorney-General for the Postoffice Department, was arrested on a charge of conspiracy to bribe and to accept money in violation of the law. The charge is made in connection with the case of John J. Ryan & Co., a turf investment concern accused of fraudulent use of the mails. Mr. Miller, before his arrest, was discharged from the department by Postmaster-General Payne. Miller was the only man left in the office of the Assistant Attorney-General after the dismissal of Judge Tyner and the suspension of First Assistant Attorney Christiancy.

Miller was arraigned before Commissioner Mills, and bail for $1500 was furnished.

A warrant has been issued also for the arrest of Joseph W. Johns, of Rockville, Ind., who is charged with having been a partner or go-between in the transaction. It is said that Johns kept $2000 as his share of the bribe, and that Miller received $2500 for what he did. The warrant includes the name of Johns and also that of Ryan of the get-rich-quick concern. The special charge against Johns is the same as that against Miller—conspiracy to bribe and to accept money in violation of law.

Cincinnati, Ohio.—Word was received by Federal officers here that Joseph M. Johns was arrested in Rockville, Ind. Johns is Prosecuting Attorney of Parke County, where Miller formerly lived.

MARYLAND DROUTH BROKE.

Terrific Thunderstorms Followed by Heavy Rain—Crop Losses.

Baltimore, Md.—For thirty-six hours Maryland was the centre of electrical storms and heavy rains. The drouth in all parts of the State is effectually broken, and dispatches from the best truck-growing sections of the peninsula and the southern counties state that the loss will not be as heavy as feared a few days ago. The tomato crop will not be as large as usual, and the conditions may affect the packing industries. The wheat crop on the Eastern Shore will be cut in half. In the western part of the State the hay crop is ruined.

While no fatalities are reported, the damage by lightning in various parts of the State is considerable. In some parts of the State five furious thunderstorms followed each other within six or eight hours.

TOWNS SWEPT BY TORNADO.

Many Persons Killed and Injured in Nebraska.

Hastings, Neb.—Fifteen persons killed, twenty seriously injured and damage done to the extent of nearly $100,000, is the record of a tornado that raged through Nebraska. Franklin, Clay and Kearney counties were the hardest hit. In one of these trees were torn out by the roots, houses demolished and carried far from their foundations, and their inhabitants mutilated and killed.

The storm was felt with unrelenting fury near the village of Pauline, which narrowly escaped destruction. The farm house of John Mumma was wrecked and six of its occupants were killed. The dead are John Mumma, Mrs. Mumma, Bertrune Mumma, Florence Palmer, John Palmer and Ray Quigg.

MISSING OFFICIAL FOUND.

Bridgeton Building Loan Man Refuses to Admit Defalcation.

Bridgeton, N. J.—Richard L. Howell, former secretary of the Bridgeton Building and Loan Association, was arrested in Hoboken at the request of the Bridgeton authorities, and arraigned before Recorder Stanton there. Howell disappeared from Bridgeton nearly a year ago. He said in court he had been living in Hoboken for the last eight months. He added:

"I left Bridgeton for business reasons—trouble over the accounts of the Building and Loan Association of which I was secretary. I turned over property to the Building and Loan Association, but they were not satisfied. I do not admit that there was any defalcation."

The amount involved is said to be $15,000. Howell was handed over to the Bridgeton authorities.

THE PRESIDENT'S STATEMENT.

Roosevelt Says Those Who Favor His Nomination Will Endorse Him.

Walla Walla, Wash.—Secretary to the President Loeb gave out the following statement:

"In speaking of the sudden political developments in Ohio the President said:

"'I have not asked any man for his support. I have had nothing whatever to do with raising the issue as to my indorsement. Sooner or later it was bound to arise, and, inasmuch as it has now arisen, of course, those who favor my Administration and nomination will indorse them, and those who do not will oppose them.'

"The President also said he was deeply touched by the action of President McKinley's home county, in which Canton is situated, in instructing so heartily in his favor. Nothing could have pleased him more."

Milk Famine Killing Babies.

Mortality among infants in Chicago has increased twenty per cent. since the refusal of the Milk Wagon Drivers' Union to deliver milk more than once a day went into effect.

Big Snowstorm in Montana.

The greater portion of Montana is covered with snow to a depth of from two to ten inches. Sheep men have suffered heavy losses because of the storm.

DIDN'T INCITE TO MASSACRE

Russian Minister Repudiates Story of Anti-Jewish Order.

10,000 VICTIMS ARE HOMELESS

A Relief Agent in Kishineff Reports 700 Houses Were Destroyed, 600 Shops Sacked, Forty-five Persons Killed Outright, and Over 500 More or Less Injured by the Frenzied Mobs.

St. Petersburg, Russia.—An explicit denial appears in the Official Messenger of the allegation that Interior Minister von Plehve sent a confidential letter to the Governor of Bessarabia shortly before the anti-Semitic outbreak at Kishineff and referring to the possibility of disorders there and the steps to be taken to suppress them. The Messenger, naming the London Times and a Continental newspaper as publishing the alleged letter, quotes from them as follows:

"'It has come to my knowledge that in the region intrusted to you wide disturbances are being prepared against the Jews, who chiefly exploit the local population. In view of the general disquietude, the disposition of the population of towns to seek a vent for itself, and also in view of the unquestionable undesirability of instilling, by too severe measures, anti-Governmental feelings into a population which has not yet been affected by propaganda, your Excellency will not fail to contribute to the immediate stopping of disorders which may arise by means of admonitions, without at all having recourse, however, to the use of arms.'"

The Messenger adds: "These reports have been invented. No letter of the above stated purport from the Minister of the Interior to the Governor of Bessarabia exists, and no communication whatever was made to the Bessarabian authorities preparing them for the disturbances."

The Chief of Police of Kieff has ordered the Police Commissaries within his jurisdiction to institute a fresh inquiry into the legal status of the Jews and to forcibly expel those who have no legal right of residence and who refuse to leave.

10,000 Persons Homeless in Kishineff.

Berlin.—The German-Jewish Relief Society, which is seeking to relieve the Kishineff sufferers, has sent an agent to Kishineff, who reports that 700 houses were destroyed, that 600 shops were sacked, and that about 10,000 persons, or 2000 families, are homeless as a result of the massacre of last month. Forty-five persons were killed outright during the massacre, eighty-four were severely wounded and 500 were slightly injured.

RELIANCE WINS RACE.

Defeats Constitution and Columbia Over a Thirty-Mile Course.

New York City.—The Reliance, in a race twice around a fifteen-mile triangle on the Sound, in a breeze varying from seven to twelve miles an hour, beat the Constitution two minutes and twenty-one seconds, actual time, and the Columbia fifteen minutes and fifty-one seconds.

It has been estimated that the Reliance's racing length is about 108 and the Constitution about 104. On these figures the Reliance would win from the Constitution by twenty-four seconds. If the Reliance's racing length is over 108 then the Constitution is probably a winner.

The race showed that the Reliance is not nearly as stiff as the Columbia or the Constitution. She made much more fuss in going through the water than the Constitution, and she was particularly hard to steer.

NEW YORK CELEBRATES BIRTHDAY

A Week of Fetes in Honor of Metropolis's 250th Anniversary.

New York City.—The 250th anniversary of the civic existence of New York City was celebrated royally throughout the day. The entire city was decorated. Mayor Low held a reception in the City Hall at 3 o'clock and entertained a number of guests at the Downtown Club.

Among the guests were Secretary Elihu Root, special representative of President Roosevelt; Senator Depew, Governor Odell and Secretary Shaw.

Later, at the City Hall, Mayor Low, Secretary Root and Bishop Potter delivered addresses. At night more than 50,000 persons assembled in the City Hall and Central Park to see the stereopticon exhibition of historic views and listen to the band music.

The celebration continued throughout the week, with more speeches, and each evening with entertainments in the parks.

Building Trades Paralyzed.

There are 165,000 idle men in New York City, notwithstanding that every line of business is booming. These men, but for strikes, lock-outs and dissensions among rival labor unions, would be earning on an average of $4 a day each, a total of $660,000 a day, or $3,960,000 a week. Not only is every penny of this stupendous sum lost to them, but 2500 building trade firms, representing a total capitalization of $550,000,000, are at a standstill, with a consequent loss of profits.

He Threw Letters Into Waste Basket.

The postmaster at Leedy, Okla., not knowing what to do with letters when they were uncalled for threw them into the waste basket. Because of his age he was let off with a fine.

Killed Filipino Fanatics.

Lieutenant Javier, commanding a force of constabulary and volunteers, has defeated 200 fanatical insurgents in the Island of Cebu, P. I., killing sixty-eight of them and capturing twenty-nine. The fight occurred in the mountains near Tabogon.

Rifled Chicago Mail Boxes.

Five hundred letters were found in the possession of Frank Blake and Henry Haekema when they were arrested at Chicago, Ill., charged with rifling mail boxes.

SPORTING BREVITIES.

Good jockeys are scarce.

Yale won the annual dual track meet with Harvard by fifty-eight to forty-six points.

Robert Maxwell has won the British amateur golf championship, defeating H. G. Hutchinson in the final.

From the Adirondacks and Pennsylvania trout streams come reports of excellent catches, with plenty of fish yet in the waters.

There is talk of a billiard match to take place in New York City next fall between Jacob Schaefer and Cure, the French expert.

"Tod" Sloane has been excluded from all courses under control of the French Jockey Club for the reason that he exercised a racer without permission.

Harvey Parker won the light weight wrestling championship of the United States at Toledo, Ohio, by securing two out of three falls in a contest with Bobby Reakes, of Muskegon, Mich.

Montreal has practically been decided upon as the destination of the next reliability run from New York City, to be held under the auspices of the Automobile Club of America. The event is to take place in October.

Charley Gaudaur, brother of the world's former champion oarsman, expects to be very busy this summer, as the chances are he will meet Hackett, Jack Rubmor, Wise, of Listowel, and Johnston, of Vancouver.

Lloyds' Register of American Yachts has just been published. It contains the names of 850 steam and power yachts and 1939 sailing yachts, all of which are owned in the United States or Canada. There are also 1073 private signals of yacht owners.

James Wray at present has $250 posted in Boston for a match race for $5000 and the championship with George Towns. Wray is the present champion in singles of Australia. He rowed in the four-oared shell which won the championship in Australia.

THE NATIONAL GAME.

Donovan, of Detroit, has not pitched a losing game.

Jimmy Calahan leads the American League batsmen.

There are eight left-handed batters on the Chicago American team.

Brooklyn leads the league in club fielding with the fine average of .953.

With Gessler playing Detroit has two left-handed throwers in the outfield.

Hans Wagner has been appointed captain of the Pittsburg (N. L.) team.

The two Chicago teams will have fourteen conflicting dates this season.

Kansas City has signed Pitcher Yerkes, late of the St. Louis League Club.

Cy Young and Rube Waddell are the pitching attractions in the American League.

"Jack" Katoll, who pitched for Baltimore last year, has signed with Minneapolis.

Doyle is doing good work for the Brooklyn team this season and saying nothing.

Pittsburg holds first position for long hits made by clubs with a total of 196 extra bases.

John L. Ward, President of the Texas Baseball League, is dead, at Austin, Texas.

The Baltimore Club has released Pitchers Raub and Hoff. Raub has signed with Utica.

The Brooklyn Club has taken on for trial Catcher Page, a Brooklyn semi-professional player.

Arrangements have been completed to play the Detroit and Cleveland Sunday games at Canton, Ohio.

Comiskey tried to get Infielder Frantz, of Harvard, but the latter does not want to become a professional.

American League critics are sprinkling ice water on Manager Mack, and most of them are telling him that the Philadelphia Americans haven't a chance to finish in the first division.

LABOR WORLD.

Cincinnati (Ohio) building laborers have formed a union.

Porters in the down-town stores of Chicago have organized a union.

Denver (Col.) tinners have received an advance from $3.50 to $3.75 a day.

The strike of the iron molders at St. Paul, Minn., will be settled by arbitration.

Chinese coolie laborers will be extensively employed in the hemp fields of Mexico.

A permanent organization of blacksmiths' helpers has been formed at Toledo, Ohio.

In Canada no child, young girl or woman can be employed more than sixty hours a week.

Substantial increases in wages have been granted by the boss blacksmiths of Brockton, Mass.

Indianapolis (Ind.) molders are out. Their demands for a ten per cent. increase were not granted.

It is said that the children of labor engaged in the various occupations of the United States number 1,750,000.

Several thousand men at Aberdeen, Wash., are interested in the contemplated plan to organize the millmen.

Members of the Federation of Musicians have been forbidden to play where Government musicians appear.

Toronto (Canada) coremakers have decided to ask for an increase from twenty-two to twenty-five cents an hour.

Montreal has now the largest local labor organization in Canada in the longshoremen's union, with 3300 members.

The Trades and Labor Congress of Canada has been organized thirty years. It has now become a powerful national labor body.

The Brotherhood of Locomotive Firemen has decided to build in the vicinity of Chicago a $25,000 home for aged and incapacitated members.

May Move Patrick Henry's Grave.

A movement has been inaugurated to remove the remains of Patrick Henry from the burying ground at Red Hill, in Charlotte County, where they now rest, to old St. John's Church in Richmond, Va., and bury him under the spot where he stood when he uttered his impassioned "Give me liberty or give me death."

SCIENCE & MECHANICS

Railway wrecking cranes are now constructed as high as fifty tons capacity. Such a crane will swing a loaded freight car from any place within reach or raise a locomotive after its easily detachable parts are removed.

Assuming that experimental tests continue to verify the electronic hypothesis the discovery of the existence of these infinitesimally small quantities of matter will remain a monument to the power of scientific research.

The cost of cyanide treatment of ore in a typical southwestern Colorado plant, where about 125 tons are handled daily, is stated to be seventy cents a ton—thirty-five cents for cyanide, 20.5 cents for labor, 3.5 cents for powder and fuel and 4.5 cents for zinc.

The late fall and winter months offer the best opportunity for fighting the tent caterpillar. The eggs then form masses on the twigs, which can be easily detected and scraped off. Every nest destroyed means about 200 less caterpillars to prey upon the trees next summer.

Hearing of the efficacy of the Roentgen rays for the removal of hairs from the upper lip, a lady in Hanover aged thirty-five, applied to Dr. Carl Bruno Schurmayer, a properly qualified doctor and Roentgen ray specialist, for treatment. He operated twice, but instead of removong the superfluous hairs the operation resulted in the skin of the face becoming red and the lips swollen. The lady thereupon brought an action against the doctor and was awarded $60 damages, against which he appealed, but the decision has just been upheld.

In his reports on the Zoological Gardens at Giza, Cairo, Captain Flower calls special attention to three specimens of that remarkable bird the shoebill, or whale-headed stork (Balaeniceps rex), now living in the gardens. With the exception of one specimen, now at Khartum, no other examples, is is believed, have been exhibited in captivity since the pair purchased for its menagerie by the Zoological Society of London in 1850. During the past year an aquarium was opened at Gezira, and contained at the date of the report examples of no less than twenty-two species of Nile fishes.

A new turbine steamer has been launched at Dumbarton, England, for cross-Channel service, which it is expected will materially lessen the distance of that dreaded sea voyage between Dover and Calais. The new vessel is of the same type, though larger, as the vessels which have been successful on the Clyde. The machinery will consist of Parsons' turbines, three being fitted, with three lines of shafting. In maneuvring the centre shaft runs free, and the two side shafts then take the place of ordinary twin screws. The builders have undertaken that this vessel shall have an average sea speed of twenty-one knots, and that it will be enabled to perform the voyage in forty-five to fifty minutes.

Farmer Boy's Lot Now Lighter.

Did you ever drop corn all day by hand in a furrow "laid out" by a horse driven by a single line attached to a single shovel plow and keep it up for two or three weeks? Most old people who have lived on a farm have had this experience or have followed the boy who was dropping the corn day in and day out, covering it with a hoe. Forty years ago a boy who could drop for two coverers could earn his fifty cents a day, while the ordinary boy could earn from twenty to thirty-five cents a day. As a matter of fact, a boy could get over more ground and plant a much bigger acreage than a man, but then, as now, there was an unwritten law that he should not receive men's wages. Before the days of labor-saving machinery, farm work—for the boy especially—was a constant round of drudgery, and it was little wonder they pined for a life in the city. Now it is different, and life on a farm is preferable to most other pursuits in life.—Kingman (Kan.) Leader.

Mutton Growing Popular.

Has mutton become popular in the last few years? Do people consume more mutton now than they did ten or twenty years ago? If this is not so why is there a greater demand for it now than then? Let us see about this problem. In 1883, just twenty years ago, there were only 614,000 sheep slaughtered in the four leading slaughtering points, Chicago, Kansas City, St. Louis and Omaha. Last year the number slaughtered at these four points had increased to 5,832,000. It would hardly seem necessary to comment on this state of affairs. The quality of the mutton has been subjected to vast improvement. The places for slaughtering them increased and countless thousands have learned the value of mutton as a meat product who had previously been prejudiced against it. We predict that the next decade will see still greater increase in the consumption of this very popular meat.—Salt Lake Tribune.

Great Fire in Miniature.

A representation of the great fire in London in 1666 will be one of the features of the Earl's Court Exhibition in London. Mr. A. Kotin is responsible for this remarkable attraction, for which a special fire-resisting building has been erected. A very vivid portrayal of old London as it was when the fire reached its climax will be given, all the well-known incidents being included.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

The owl may have a reputation for wisdom, and yet he never looks on the bright side of life.

Use Allen's Foot-Ease.

It is the only cure for Swollen, Smarting, Tired, Aching, Hot, Sweating Feet, Corns and Bunions. Ask for Allen's Foot-Ease, a powder to be shaken into the shoes. Cures while you walk. At all Druggists and Shoe Stores, 25c. Don't accept any substitute. Sample sent FREE. Address, Allen S. Olmsted, LeRoy, N.Y.

Piso's Cure is the best medicine we ever used for all affections of throat and lungs.—WM. O. ENDSLEY, Vanburen, Ind., Feb. 10, 1900.

The fellows who are adepts at making love don't make the best husbands.

Many women and doctors do not recognize the real symptoms of derangement of the female organs until too late.

"I had terrible pains along my spinal cord for two years and suffered dreadfully. I was given different medicines, wore plasters; none of these things helped me. Reading of the cures that **Lydia E. Pinkham's Vegetable Compound** has brought about, I somehow felt that it was what I needed and bought a bottle to take. How glad I am that I did so; two bottles brought me immense relief, and after using three bottles more I felt new life and blood surging through my veins. It seemed as though there had been a regular house cleaning through my system, that all the sickness and poison had been taken out and new life given me instead. I have advised dozens of my friends to use **Lydia E. Pinkham's Vegetable Compound.** Good health is indispensable to complete happiness, and **Lydia E. Pinkham's Vegetable Compound** has secured this to me."—MRS. LAURA L. BREMER, Crown Point, Indiana, Secretary Ladies Relief Corps.—*$5000 forfeit if original of above letter proving genuineness cannot be produced.*

Every sick woman who does not understand her ailment should write Mrs. Pinkham, Lynn, Mass. Her advice is free and always helpful.

Police Sweating.

"Sweating" in police parlance is about synonymous with "bullying" a prisoner into confession. Sometimes, in its milder forms, it corresponds with "cajoling." It is the natural resource of the policeman who has no detective ability, and would not know how to follow up a clew if by any chance he should recognize one when he met it. There is nothing wrong, of course, in seeking information from a prisoner, but there is something decidedly wrong when the police depend upon that means, to the neglect of others, for the tracing of crime.—Chicago Record-Herald.

Gypsies are supposed to have originally been inhabitants of India, and their Romany language has a strong, radical resemblance to the ancient Sanskrit.

A DANCER SPOT.

A dangerous spot for pain is the small of the back; it tells of kidney ills, as do most pains and aches in the back. Kidney ills begin with backache and end with Diabetes, Dropsy, Bright's Disease. Cure Kidney and Bladder troubles before they reach the serious stage. Read how easily it can be done.

W. J. Hill, of 40 South Union street, Concord, N. C., proprietor of hardware and harness store, Justice of the Peace, and one of the best known residents of that city, says: "Doan's Kidney Pills proved a very efficient remedy in my case. I got a box at the Gibson Drug Store and used them for disordered kidneys and backache, from which I had experienced a great deal of annoyance, trouble and pain. The kidney secretions had bothered me for a long while, were very irregular, dark colored and full of sediment. The Pills cleared it all up and I have not had an ache in my back since taking the last dose. My back is much stronger and my health generally is improved a great deal. I am glad to make a public endorsement of the Pills, trusting that it may be the means of relieving some other sufferer."

A FREE TRIAL of this great kidney medicine which cured Mr. Hill will be mailed to any part of the United States on application. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

A SERMON FOR SUNDAY

A LEARNED DISCOURSE ENTITLED "GOSPEL OF THE RESURRECTION."

"Christ Arisen From the Tomb" is Made the Subject of a Powerful Address by the Rev. Henry C. Swentzel—He Reviews the Miracle From Every Point.

NEW YORK CITY.—Dr. Henry C. Swentzel, rector of St. Luke's Church, preached Sunday morning on "The Gospel of the Resurrection." He took his text from Acts xvii: 18: "He preached unto them Jesus and the resurrection." Dr. Swentzel said:

With what noble confidence did the apostolic church set out to serve its world-wide mission. It had a new religion to proclaim, a glorious message from God for all the races of mankind. It was not provincial, but catholic. It began in Jerusalem, but it looked forward to conquering the whole earth. Wherever it went it encountered beliefs and rites which were venerable, impressive and upheld by the prestige of wealth, rank and culture; but it was none the less devoted to its huge work. What a hopeless task it seemed to be to convert the human family to the gospel of Jesus Christ. The Master of this latest cult was a Jew. He had been disgraced by crucifixion, and there was now scarcely more than a handful of disciples to tell the story of His career. When we consider the overwhelming odds against which these men struggled as they proceeded to evangelize the multitudes, we are all the more profoundly impressed with the confidence with which they took up the more than herculean labor. The magnitude of the effort to which they were called did not deter them, persecution could not affright them, the oppositions or indifference of the better classes could not discourage them. On they went, from city to city, from country to country, preaching the religion of which they were gladly the earthly champions. Not always had they been of this temper. The mightiest among them, the rock-man himself, had utterly collapsed in the high priest's palace, and after the fateful day of the cross they all accepted the plight of those who had served a lost cause. But now all this is changed. The cowards are the bravest of the brave, and each of the apostles is ready to face every peril and to meet death for the message of love and salvation which burned upon his lips.

Nor is the reason for this radical change difficult to account for. Those timid and blundering men had received a divine afflatus—they had been revolutionized in mind and heart and soul by the Lord's resurrection from the dead. To the gifts of the Holy Ghost which they received was added the indomitable assurance of the triumph of their divine Master over death and the grave. The Lord's resurrection was the dominant doctrinal note in their thinking and their teaching, and wherever they went they bore the witness of eyewitnesses to the fact which they so boldly declared. Although they had known Jesus and had companied with Him as intimate associates for several years, their spiritual perceptions were dull until the last, and they understood not His oft repeated saying that He would rise from the dead. But as soon as they are satisfied of His resurrection they all come to the front, ready for the fray, eager for the honor of representing Him in every land and willing to endure every hardship for His cause.

St. Paul on Mars Hill is an illustration of the temper of the Apostolic Church. He is thoroughly imbued with the certainty of the Easter story, and hesitates not to preach it throughout the missionary journeys when he so splendidly served his office as the apostle to the Gentiles. As we think of him in the Grecian capital, we can only wonder at the calmness and courage with which he met the ordeal which he had deliberately sought. What a striking picture he is as he stands on Areopagus, facing the chief intellects of the classic metropolis and speaking with undaunted boldness of the risen Jesus. The sun-browned traveler, a stranger in a strange land, he knows that he is in the centre of the very best paganism, and he is as fearless of its prejudices and subtleties and ridicule as he had been of the prisons of Syria. His training hitherto had prepared him to appreciate the sights on which he gazed. In him the civilizations of Jews, Romans and Greeks met, and he had appropriated the finest things of each. His attainments enabled him to see the difficulties all the more plainly. Evidently a Hebrew, his nationality would make it harder for him to win the respect of his hearers. Conscious of this handicap, he would feel the weight also of the queries and the bias which his words would surely evoke. It was probably his first visit to this seat of enlightenment. Its far-famed glories which he had long since desired to see were now before his eyes in all their bewildering splendor. He had mastered its language and literature, and now he walked on its streets, looked upon its population, gazed upon objects made rare in interest and celebrated in epic or in song, visited its sanctuaries and its schools, met its thinkers and artists, and realized the beauty and the power of its life and thought. From the time that he disembarked at the pier his attention was constantly arrested by the monuments and shrines of Athens, and all the tokens of its genius and culture.

Of monuments the new religion has yet had scarcely one. It was still in the days of its poverty. Churches and cathedrals and endowments were matters of the future. What could St. Paul expect in response to his pronouncement? The ambassador of Christ understood that he had come hither as the legate from the courts of heaven to the seers and scholars of this seat of learning to declare the resurrection of Jesus Christ from the dead. He was face to face with the clever scions of the highest intellectual culture known to antiquity; hard by were the temples of Eumenides and Theseus, the Propylaeum of the Acropolis, the temple of victory, and, towering above all from its lofty pedestal, was the bronze colossus of Minerva. Well might he assume that Stoics and Epicureans and other thinkers would attempt his overthrow, but he did not flinch while he announced a religion as yet without influence in art or literature, with scarcely a congenial resting place for its Scriptures and sacraments. In his manner, however, there are no indications that he was conscious of any special advantages. It could be otherwise, for he had himself seen the risen Jesus and he could, therefore, cover no more certain of the shining sun than Italy was of the truth of the Gospel which he preached. It was this unalterable conviction which sustained him even on Mars Hill as he discoursed of the redemption accomplished by Him who died and rose again. He was not splitting hairs nor telling fables nor playing with metaphysics, but upheld the risen Christ to challenge attention and support his truths and win the souls of this distinguished audience.

The basis of St. Paul's confidence as an apostle of Christ is the only basis of confidence in believing. The first Christians were Easter enthusiasts. Their unfailing belief in the resurrection of Jesus had much to do in making them worthy of veneration as the best among God's family of saints. All that had been written concerning the Son of Man they pondered with pious devotion, but they never forgot that He came forth alive again from the grave. They would think of Him as the Son of Mary; they would hear of His childhood years; they would study His sayings and His works; they would contemplate His sufferings and death, but always would they include His victory and coronation. "With great power gave the apostles witness of the resurrection of the Lord Jesus and great grace was upon them all." The apostolic church is a model, not only in so doctrine of polity and usage and doctrine, the dominion the religious type of its spirit sharply from It was pre-eminently an Easter sion elsewhere dant fruits and did abundant Harkness' cr achieved abundant results because in all its ideas and plans it stood upon the platform that God raised up His Son Jesus Christ from the dead. The same cause, we cannot doubt, would to-day produce the same effect.

All this is of solemn, practical moment to our own times. Although the preacher is not among those who believe that the cause of religion is waning, he is bound with all thoughtful people to recognize the peculiar difficulties which beset the church of the twentieth century. Our only hope is to hold fast to the ideas and ideals of the church of the first century. The weakness of Christendom to-day is the retirement from its conspicuous position of the all-prevading truth which was so powerful in the beginning. There is entirely too much uncertainty even among Christians concerning the resurrection of Jesus Christ. How many there are who would rather not be pressed too strongly by its discussion, who would prefer to have it eliminated from distinctively Christian teaching, who would award it no further dignity than to allow it to be placed among the matters of secondary importance to which little or no reference need be made. Just here there has unquestionably been a decline of certitude, and the hour arrived long ago when the issue should be strongly made and honestly met. If it is at all uncertain that the divine Redeemer came forth from the grave, it is just as well for us to know it and to fashion our belief and make our calculations accordingly. If the old faith is in peril, or even if it should be held in abeyance, as lovers of the truth we should be ready and willing to accept the result with the utmost candor and consistency. There has been entirely too much reticence and hedging; there has been a disposition to dodge the real question, though perhaps with a charitable purpose that thereby the conscience and hopes of others might not be shocked; there has been a sentiment that seems to advise that the less this matter is emphasized the better for the church. Let the church throw down the gauntlet; let it have this matter out once for all with those who dispute it or who hesitate to accept it ex animo. If the case is not settled let us settle it and settle it right. Let us insist upon the facts whatever they are.

Christians may well hide their heads in shame if they feel constrained in behalf of their religion to ask any quarter, to accept any favors of those who do not stand by the faith once delivered to the saints, or to take advantage of any technicalities. Better ten thousand times a controversy than to have this important part of the gospel continue where it now is in the estimation of so many good people. We may well afford to seek all the light that is available, and we need not be afraid to accept the consequences. There are those, thank God, who feel that the authority of the church is sufficient warrant for the doctrines of the church, but that authority is not universally recognized, and it surely will be no mortal sin if people amid their infirmities respecting religion demand other considerations in support of belief in the risen Christ. Are other considerations forthcoming? Are there reasons which justify timidity on our part? Is there a suspicion that somehow if we could fully know of this matter our creed would be worsted? Such questions may seem to be primary to those whose faith is sure, and they may appear to be hardly justifiable at this late day, but people will think, even though they think wrongly, and if they are the victims of a mistake or a misunderstanding it is a human kindness to lead them to a knowledge of the truth. What is the case of the resurrection of Jesus?

Of course the disciples believed that He surely died, a conviction which is now shared by everybody, the Hebrew people themselves not excepted. If one is disposed to quibble over the story of the Saviour's passion and to suggest that perhaps the Son of Man did not die, he should be referred to medical experts, who will tell him that if Jesus died of heart fracture it was only natural that the water and blood flowed from His side when the soldier's spear pierced the pericardium. It is now simply preposterous to impeach the genuineness of the Lord's death. The outcome of the cross was not a trance. The Redeemer "tasted death for every man."

If the Lord really died, is it a fact that He rose again? Medical experts can pronounce upon the story of His decease, so legal experts will pass upon the story of His resurrection. The testimony is all in. Shall it be permitted to stand? Christians need not hesitate to allow the matter, which is so supremely sacred to them, to be dealt with in this fashion. If they choose, they can go reverently to the Supreme Court that will review the testimony of the Easter witnesses. All that they ought to ask is that the tribunal shall be absolutely fair and honest in the application of the laws of evidence. Who are the witnesses and what is their "reputation for truth and veracity?" Inasmuch as their narrative is extraordinary in its character they must expect to submit to the most rigid examination. They will stand the test. The apostles and their followers were people who for integrity and religion have never been surpassed. Not only were they the incarnation of honor and piety, but they are entirely trustworthy on every account. They investigated the matter with the utmost care. Although excellent folk may be deceived by others and even by themselves, it is impossible to suppose that these men were the victims of either form of deception. If the Master had appeared to them all on only a single occasion, there might be place for a suspicion of their absolute accuracy, but they saw Jesus many times after the resurrection, they talked with Him, they ate and drank with Him, they even put their fingers into the print of the nails. The list of witnesses does not consist of two or three names, but includes at least 500 persons. The church is still another witness. Her organization, her beliefs, her sacraments, her unfailing testimony from the beginning and to every generation that the Founder of the Christian religion came forth from the dead is worthy of the utmost consideration. The results of this Easter creed should be reckoned with, for the doctrine of the Lord's resurrection has produced a race of men, women and children who are the very flower of the human race. It has brought forth all that is best and worthiest in every Christian country.

What is the reasonable response to all this testimony? It cannot well be ruled out. It cannot be discredited. It deserves something better than the Scotch verdict—"not proven." Although we do not rely upon the force of argument for arousing interest and changing opinions, it is worth while to show that the church's creed is supported by ample and adequate reasons, and that faith in the resurrection of Jesus is not blind credulity, but the acceptance of an historical fact which is duly verified by the canons of historical certitude.

Human nature does not change essentially. The needs of to-day are not very different from those of 2000 years ago. The gospel which St. Paul preached in Athens he would preach this day in Greater New York if he were here. "Jesus and the resurrection" is the blessed and triumphant theme. How grievously that word of God is needed not only for the upholding of faith, but for cherishing and strengthening hope for an eternity of felicity and bliss. Of arrant infidelity there is now comparatively little, but there is most unquestionably at least a partial failure to be quite sure of the soul's immortality. The prospect of everlasting life is not denied, it is simply not realized. Many a heart is saying, "Would that I might be certain of it all." It is impossible to suppose that the multitudes who are not actively associated with the church believe in immortality. If they look forward to an endless career beyond the bills of timesthey would speedily change their attitude toward holy things. And if the whole company of Christ's disciples were to lay hold as they ought of the gospel of "Jesus and the resurrection," there would be another protestant and the kingdom of God's dear Son would come indeed in all its power and glory.

FOR WOMAN'S BENEFIT.

THE NURSES OF THE ARMY.

Women Regularly Employed With Marked Success.

A brief account by Dr. McGee, of the Nurse Corps of the Army as it exists now, has recently been published in the Journal of the Association of Military Surgeons of the United States. A previous article described the conditions attending the appointment of trained women nurses for army duty, which began in May, 1898, and culminated in September, when about 1200 were employed. Between then and the present time they have served in the United States, Cuba, Porto Rico, Hawaii, Japan and the Philippines, and even in the Chinese campaign. The number is now fixed at 100 on active duty, with a small body of "reserves" who have seen active service and are ready to answer future calls. Trained nurses are permanently stationed at the army hospital at San Francisco, at the one for tuberculosis at Fort Bayard, N. M., and at the largest hospitals in the Philippines. They are temporarily sent to any post where they may be needed. They serve under a section of the army reorganization law framed in 1900, which provided that the medical department should consist of specified medical officers, of the enlisted men of the hospital corps, and of the nurse corps (female). A superintendent is stationed in the surgeon general's office and a chief nurse is at each of the hospitals where nurses are serving. Recent regulations provide for an examination in nursing, cooking and allied subjects before promotion from the grade of nurse to that of chief nurse. Women are employed with marked success as teachers of nursing and cooking in the two schools maintained to give brief preliminary instruction to the hospital corps recruits. Dr. McGee urges that in the future the nurse corps be more largely utilized in giving systematic ward training to fit the hospital corps men for their duties in the smaller hospitals where they have no trained supervision. She also recommends the gradual formation of a large corps of reserves who have received some post-graduate military training.—American Medicine.

Our Spoiled Children.

The girls of to-day have been petted and made much of from their cradles. Everything has been done to make the hard places easy and the rough roads smooth. There is a grading and leveling in the schools nowadays in order that children may learn without their knowing it. A sort of "ignorance-extracted-without-pain system" it is from kindergarten to college. At home, if not at school, American children are regularly and unblushingly spoiled, and while the effects of such wholesale injury to the childish life often wear off with boys as soon as they go out into the world to compete with their equals on every side, in the case of girls the tonic of mingling in the affairs of life and work, without flattery or favors of any kind, is usually denied. With girls the petting and coddling continue long after womanhood is reached, and so the daughters do not get over the effects of the American manner of spoiling children as promptly and as thoroughly as do the sons. These spoiled children will have to love very earnestly and tenderly if they are to be really successful home-makers. The ability they have; the training needed they often have, and can always get, even if the illumination comes after marriage. It is the disciplined nature which will be most needed; the habit of doing distasteful things, and doing them cheerfully and continually; the power to give up cherished plans; to devise ways of helpfulness about things of small interest in themselves, and the regular practice of forgetfulness of self and remembrance of others in the recurring trifles of daily life.—Woman's Home Companion.

A Plea For the Pocket.

Lucy Locket, the immortal woman who lost her pocket, is hardly so much to be pitied as we are. In her case it was found, but nobody can find our pockets for us! Man, happy creature, is a marsupial. He is blessed with more pockets than he knows what to do with, but poor, unfortunate woman, with styles in their present state, has not so much as one little pocket in which to bestow her handkerchief.

A weekly bereavement in this latter line is of common occurrence, and in the course of time becomes a severe strain. As for purses they only too often go the way of the handkerchiefs. The bell-shaped sleeves rendered hopeless the military trick of tucking one's handkerchief up it, but with new cuffs there comes a gleam of returning hope. The majority of them are tight-fitting at the wrist, the fulness suddenly spreading out several inches higher up the arm. This sleeve is more than pretty, for it will supply the abiding place for a long absent pocket. A little envelope-shaped receptacle could be easily fastened to the inner side of the left sleeve, in the fulness, just big enough to contain two or three small necessaries. Then a flap could be attached to button over. A Russian blouse or bolero affords opportunity for a breast pocket like a man's, inside. For summer frocks a separate pocket is pretty, made of the material of the gown or some harmonizing silk. At all events let us have the pocket somewhere.—Brooklyn Eagle.

The Swirling Stole.

There is nothing more certain than that the graceful swirling stole will be a very important accessory feature of the frocks of 1903, says Black and White. I would not like to say that it would have the enormous, the phenomenal popularity of that abomination the ruffle, as it does not appeal to such an extent to every status and condition of womankind, and as it must be worn with a certain studied ease, not possible, or at least not cultivated by the mass. Every woman could twirl a ruffle round her neck, but it takes some taste and experience to settle a stole off the shoulders, yet none off the figure, and then the composition of this stole is a much more erudite affair than that of the bristling, blatant ruffle (peace to its ashes), and to compass it will puzzle these enterprising beings, the manufacturers who make and sell things by the gross to the lesser shops. The stole is altogether a more subtle and less tangible thing than the dear, ahem! departed ruffle. At present the stole is delighting in the fluffy softness of marabout feather, with which cooperate ostrich feather and bird plumage and other things. Something transparent and something fluffy, or perhaps I should say something soft and something fluffy, are the essential ingredients of the stole of the future—I mean of the warmer months that are to be. Something soft for the centre, and something fluffy for the border.

Hard Medicine to Take.

"Doctor," said a fashionably dressed woman to her new physician, "I want you to give me a prescription which will cure me of a most irritating trouble." The doctor bowed and waited for her to go on.

"About 11 o'clock every evening," said the patient, "I am overcome by a feeling of sleepiness, no matter where I am—at the opera, at a dinner party, wherever I may be, this dreadful sensation comes over me. I have suffered from it now for five weeks, and no remedy has seemed to do any good."

"Oh, I can give you a prescription that will prevent it from overcoming you ever again," said the doctor.

His new patient was radiant, but when she looked at the slip of paper the doctor gave her her face clouded. It read thus:

"Rest from 10 at night till 7 the next morning. Repeat dose once in twenty-four hours, whenever symptoms recur."—Youth's Companion.

Exercise Brings Beauty.

Every woman who wishes to retain her health and beauty should walk at least two miles a day. As soon as breakfast is finished the woman who knows the proper way to care for her health rests for half an hour and then starts out for a long walk, the longer the better. She chooses the sunny side of the street and starts off at a smart trot. If she is seeking for slimness she covers five miles without resting.

Filigree Silv[illegible]

The once popular [illegible] have reappeared in [illegible] clasps. Old pieces resurrected may be perfectly cleaned with cream of tartar. Make a paste of the cream of tartar and a little water and spread it thickly on the silver, rubbing into the crevices. Wrap each piece in a flannel rag and let it lie for five or six days. Then wash in warm water and the silver will be as bright as if new.

Black Frocks.

The ever useful black frock is to the fore. The most popular material is crepe de chine, the kind with the gleaming satin finish finding most favor. The French modistes turn out many smart costumes of this material, the waists and skirts being, as a rule, accordion pleated. While not new, the pleated frocks persistently remain modish, and will be much worn throughout the summer.

Pleated blouses are much liked.

Silk for crochet work is being used to stitch costumes.

A flounce with upstanding parts in box pleat is attractive.

Forest-green taffeta parasols are among the catchy sorts.

Mitered schemes die hard—that is, they are not dead at all.

Buttons are an important feature on coats and summer suits.

Brown in shadings is a good color for a quill on an ecru hat.

Black embroidered white silk stockings are smart with black patent leather Oxfords.

Light colored silk coats in both plain and corded silks are the smartest for summer for little girls.

Woolen materials show a tendency toward small square or diamond effects in two colors, almost like embossing.

Linen crash in its natural tint is one of the most serviceable materials for young girls' skirts to wear with shirt waists.

The shoulder capes, so very fashionable for women, are just as desirable for girls. Much care should be taken in selecting their shape so as to overcome the rather short waisted effect they are apt to give. If a girl is short waisted the cape should be pointed in front.

Vapourine is one of the latest stuffs for blouses, stronger than mousseline, finer and more silky than crystalline, something between the two, but it is very pretty, and gains in effectiveness from the contrast with the coarse guipures and filet laces with which the majority of blouses are encrusted.

Coarse linen crash and holland in deep ecru and tea tints are fashionable for morning blouses, trimmed with pure white Irish crochet or black-and-white embroidery; these are generally made in slip form, fastening down the back, or with a broad box-pleat in front, finished off with a small black bow or cravat.

SOCIETY WRECKED HER HEALTH.

Address Dr. Hartman, President of the Hartman Sanitarium, Columbus, O., for free advice.

Tired, Nervous, Aching, Trembling, Sleepless, Bloodless.

Pe-ru-na Renovates, Regulates, Restores.

A Pretty New York Woman's Recovery the Talk of Her Numerous Friends.

Mrs. J. E. Finn, 82 East High street, Buffalo, N. Y., writes:
Peruna Medicine Co., Columbus, Ohio.

Gentlemen:—"A few years ago I had to give up social life entirely, as my health was completely broken down. The doctor advised a complete rest for a year. As this was out of the question for a time, I began to look for some other means of restoring my health.

"I had often heard of Peruna as an excellent tonic, so I bought a bottle to see what it would do for me, and it certainly took hold of my system and rejuvenated me, and in less than two months I was in perfect health, and now when I feel worn out or tired a dose or two of Peruna is all that I need."—Mrs. J. E. Finn.

Catarrh Causes Female Diseases.

America is the land of nervous women. The great majority of nervous women are so because they are suffering from some form of female disease. By far the greatest number of female troubles are caused directly by catarrh. These women despair of recovery. Female trouble is so common, so prevalent, that they accept it as almost inevitable. The greatest obstacle in the way of recovery is that they do not understand that it is catarrh which is the source of their illness.

In female complaint ninety-nine cases out of one hundred are nothing but catarrh.

Peruna cures catarrh wherever located.

That Settled It.

In the days when the people lavishly welcomed home the heroes of the Spanish-American war, a big man who had been behind a great gun was riding uptown on a Broadway car. Seated next to the sailor was an important-looking individual who, in the way of introduction and with evident pride, said:

"I am a sailorman myself in a way, but not exactly of the navy. You see, I am the man who supplied the cheese you had on your battle-ships."

"You are, are you?" queried the sail[illegible] supplied us with our butter?"—Woman's World.

Science of a Curved Ball.

Professor Joseph J. Thomson, who came over from Cambridge, England, to deliver the Benjamin Silliman course of lectures at Yale this year, was asked to give the explanation of a curved pitched ball. "The ball follows its nose, so to speak," said he. "If it leaves the pitcher's hand revolving downward on a horizontal axis it is bound to drop. If it leaves revolving upward on a horizontal axis it follows on a vertical axis, revolving outward from the batsman, the outcurve is the result, and similarly on a vertical axis, with an inward revolution, and so on. The axis and revolutions are determined by the manner of the sphere's leaving the pitcher's hand, and there you are."—New York Sun.

The trouble about saying smart things is that they generally come too late.

The more wisdom a man has the less he boasts of. N. Y. Sun.

Bronchitis

"I have kept Ayer's Cherry Pectoral in my house for a great many years. It is the best medicine in the world for coughs and colds."
J. C. Williams, Attica, N. Y.

All serious lung troubles begin with a tickling in the throat. You can stop this at first in a single night with Ayer's Cherry Pectoral. Use it also for bronchitis, hard colds, consumption.

Three sizes: 25c., 50c., $1.00.

Consult your doctor. If he says take it, then do as he says. If he tells you not to take it, then don't take it. He knows.

You should promptly correct any constipation or biliousness with Ayer's Pills, small, laxative doses.
J. C. AYER CO., Lowell, Mass.

TYPHOID FEVER
DIPHTHERIA SMALL POX

The germs of these deadly diseases multiply in the decaying glue present in all **kalsomines**, and the decaying paste under wall paper.

Alabastine is a disinfectant. It destroys disease germs and vermin, is manufactured from a stone cement base, hardens on the walls, and is as enduring as the wall itself.

Alabastine is mixed with cold water, and any one can apply it.

Ask for sample card of beautiful tints and information about decorating. Take no cheap substitute.

Buy only in 5 lb. pkgs properly labeled.

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, MAY 30, 1903.

THE NEW PRIMARY ELECTION LAW.

The new law concerning primary elections in this state went into effect April 14, and will apply to the Fall primaries. It is a peculiar law, and widely departing from previous customs. It is also a law which may work curious results in North Plainfield at the next primaries, which the law designates shall be held on the second Tuesday in September.

In the first place, the primary elections of all political parties are to be held on one day and at one place, namely, on the second Tuesday in September, at the place of registry. They are to be conducted by the Boards of Registry and Election, from 1 p. m. until 9 p. m.

Generally speaking, the same methods are to be employed as to official ballots, ballot boxes, registry lists and polling booths as at any election. Persons to be voted for as delegates to County Conventions must be previously indorsed by a petition, requesting that the name of the person so indorsed be printed on the official primary ballot. Those who indorse such delegates must be members of the same political party as the delegates. These endorsements are to be filed with the Clerk of the Borough or other municipality, who will make up from such petitions and indorsements, the official primary ballots.

The proceeding of the voter will then be as follows: He will enter the voting place and ask for a specific political ticket. Let us assume, for example, that Mr. John Jones, who is supposed to have been a Republican, enters the voting place and asks for a Republican ticket. It is given to him by the Board, and at the same time his name is written down, with the statement opposite, that he takes the Republican ticket. He then goes into a polling booth, where he erases the names of delegates for whom he does not wish to vote, and returns to deposit his ballot.

At this point, we shall suppose him to be challenged. The challenger may know that he did not vote for a majority of the Republican candidates printed on the ticket at the last general election, and, as a matter of course, he is challenged, because the law does not permit such a voter to vote that political ticket at the primary elections. When challenged, he must "make oath that he is a member of said political party; that at the last election for members of the Assembly, at which he voted, he voted for a majority of the candidates whose names were printed upon the party ticket of the said party and that he intends to support the candidates of the said party at the ensuing election." If Mr. Jones makes a false oath he is guilty of perjury, and may be sent to repose for a while in the loving embrace of the State prison. If he does not make the oath required, he is not permitted to vote.

In other words, it seems to be as plain as daylight, that in the case of a large number of North Plainfield Republicans last Fall that voted for a majority of the Democratic instead of the Republican candidates, although upon a ticket labelled Republican ticket, they will be unable to vote at this next primary.

In cases where municipalities have their own officials to elect, that are elected at the general election in the Fall, instead of voting at the primary election for delegates for a convention, the vote is to be direct for the candidates.

One provision of the law is, that "any voter who shall vote in the ballot box of one political party at any primary election held under this act, shall not be allowed to vote in the ballot box of any other political party at the next hereafter succeeding election." In order to know how a voter votes at a primary, the record is kept of his name, and the ticket which he votes, whether Democratic or Republican.

Only members of a political party can vote at these primary elections, and a political party is defined to be such as the preceding Fall election have cast for members of the General Assembly, at least five per centum of the total vote cast in the territorial district, where the primary is held.

Those who sign petitions for delegates must not only be members of the same political party, but resident in the same election district, and must also state in their petitions that at the last Fall election they voted for a majority of the candidates whose names were printed upon the ticket of that party at the ensuing election. This also cuts off from the list of those who may sign petitions for delegates those "good Republicans" who, at the last Fall election, here or elsewhere, did not vote for a majority of the candidates under the Republican ticket.

All petitions recommending delegates must be filed with the clerk not less than ten days prior to the primary election, and accompanying such petitions there must be a certificate indorsed by the candidate for delegate himself, "stating that he is qualified for the office or position of delegate," etc., and that he will stand as delegate if elected.

There is still another provision, which permits members of a county committee to adopt resolutions declaring their desire to have such a committee elected thereafter at the primary elections.

Section 21 we give in full, because it is of considerable importance in relation to those citizens who are constantly changing their politics, and yet may desire to vote at those primaries:

"No member of one political party shall sign his name to any petition purporting to endorse any person as a candidate for a delegate to the convention of another political party or as candidate for office of another political party, nor shall any member of one political party vote in the ballot box used for the primary election of another political party; any person who, being a member of one political party, shall sign his name to any petition endorsing any person as a candidate for delegate to the convention of another existing political party, or as a candidate for office of another political party, or any person who, being a member of one political party, shall vote in the ballot box used for the primary election of another political party, shall in each case be guilty of a misdemeanor, and, on conviction, shall be punished by a fine not exceeding five hundred dollars, or be imprisoned not exceeding two years, or both, at the discretion of the court."

Challengers are to be appointed for the election to represent each official party by the chairmen of the County Committees.

The whole act is in thirty-four sections, and is full of detail. It will probably take one or two primary elections before its provisions will become perfectly familiar to the election officers and the public.

INFORMATION comes from Atlantic City that this summer the cost of bathing at that resort will be fifty cents, instead of twenty-five as heretofore. The *State Gazette* says: "We have not been enlightened as to the reason for this increase in the cost of wallowing in the surf. If the price of the ocean has gone up we haven't heard of it, nor have we seen any advance over last year in the price of beaches; but perhaps the men who own the bathing suits need the money."

THE Paterson *News* says: "They are investigating the police force in Newark, and some evidence has got out that the cost of an appointment there is $250. We don't know what the quotations are in other cities, but a policeman who gave a note in this city for the appointment put a much higher figure than that upon it."

An Australian astronomer has made the discovery that the moon regulates the rainfall. His observations of thirty-six years confirms him in the belief that when the moon is moving south there is plenty of rain; when it is moving north there are years of drought; so there are alternate wet and dry periods, the wet lasting nine years and the dry ten. Strange that the world should have been witnout this knowledge so long.

REV. IRL R. HICKS, the St. Louis weather prophet, predicts much wet weather for June, accompanied by severe thunder storms. He says look out for severe storms from June 3rd to 5th or 6th. Cool nights are also to be expected during June. On the 9th a change to warmer and more rains.

The last week in June will mark frequent storms of wide extent and much energy.

Hicks has a way of foretelling storms which should put to shame all other would-be prophets.

THE New York *Herald* has canvassed the democratic national committee on the subject of Grover Cleveland as a presidential possibility. Three favor his nomination. Eight are non-committal and seventeen are flatly opposed to him.

SUNDAY, June 14, will be the anniversary of the Stars and Stripes, and "Old Glory" will be in evidence from every flag staff everywhere that is controlled by an American. The official celebration will take place on Monday, the 15th.

TODAY the men who fought and lived will decorate the graves of those who fought and died, and the whole nation will look on and honor them both. May their deeds be kept forever fresh by this beautiful custom.

The Paris Cafe.

The Paris restaurant reflects the conservative views of the Frenchman. The Parisian loves to sit on cushioned benches along the wall and as like as not enter into talk with his neighbor.

Again, the Parisian is a true democrat. Whatever his rank, he is willing to join in the fun going forward. I remember one night in the Cafe de Paris seeing a Hungarian prince with a rent roll of scores of thousands stalk up to a band of his countrymen and take the first violin from the hands of the leader. The next minute a score of well known people were gathered before him. A count sang a love song; a ballet dancer from the opera obliged us with a remarkable fandango; a sugar refiner gave us a comic patter. Nobody cared who his neighbor chanced to be. It was good fun. That was sufficient.

Imagine a duke and an earl and a rich merchant amusing the supper crowd at the Carlton or the Savoy!

Decidedly they do these things better in France.—Paris Letter in London Express.

New Stars.

It is suggested by Louis Rabourdin, a French writer, that in each of the new stars that blaze forth in the heavens from time to time we see the destruction of a celestial body by a volcanic cataclysm. At any rate, he says, if part of the earth's crust underlying the ocean should give way our earth would doubtless present in succession to a distant observer the same series of appearances that we witness in the case of "novæ," or new stars. First there would be an outburst of blazing hydrogen from the sea water decomposed by the earth's internal heat, then fusion of the whole crust, reducing the globe again to a molten state, and then the gradual extinction of its light owing to cooling. As cooling would first take place locally, we should have a variable star, the darkened portions being periodically brought into view by the rotation of the globe.—Success.

Sunflower Fuel.

In Russia sunflower stalks gathered from the fields and dried in piles have entirely replaced firewood. In fact, these stalks are preferred even to pine wood, producing a quick and hot flame fire. About 2,000 pounds of such firewood are gathered from an acre of land, thus adding a great boon to a district where wood is scarce. Sunflower shells are also used for heating purposes not only in private houses, but in large factories as well. They are burned in ovens specially prepared for their consumption.

A Town Under One Roof.

What would the ordinary woman say to a family that used every day 20,000 napkins, 12,000 towels, 3,800 sheets, 20,000 plates and 18,000 knives and forks? This is what is required by one of the large hotels in New York, at which a man cannot live for much less than $8 a day. The hotel will accommodate 3,000 people, besides 1,500 servants to wait on them.—Youth's Companion.

Too Much Ambition.

"I can't understand why you discharged my boy. You advertised for a boy with ambition, and he"—

"That's just it, madam—that's just it. He wasn't in the place two days before he had his feet on my desk and was smoking my cigars."—Baltimore News.

An Amusing Compliment.

Adelaide sat gazing very intently at the gold filling in her aunt's front teeth and suddenly exclaimed:

"Oh, auntie! I wish I had copper toed teeth like yours!"—Little Chronicle.

A Poor Relation.

Professor—Can you see any relation between these triangles?

Student—Yes, sir; that middle triangle's a poor one.—Columbia Jester.

If You Want

If you want posters,
If you want bill heads,
If you want envelopes,
If you want statements,

THE AMERICAN MONTHLY REVIEW OF REVIEWS

How Can I Keep Up with the Times?

IT is pretty hard to keep well informed on the political news, the scientific news, the literary news, the educational movements, the great business developments, the hundreds of interesting and valuable articles in the hundreds of excellent magazines. About the only way it can be done by the average busy man and woman is to read a magazine like "The Review of Reviews," and, as it is the only magazine of the sort, it is a good thing to send $2.50 for a year's subscription.

PRESIDENT ROOSEVELT says:
"I know that through its columns views have been presented to me that I could not otherwise have had access to; because all earnest and thoughtful men, no matter how widely their ideas diverge, are given free utterance in its columns."

EX-PRESIDENT GROVER CLEVELAND says:
"I consider it a very valuable addition to my library."

The Review of Reviews Co.
13 Astor Place, New York

Read The Review of Reviews

IN THE FALL of the CAMPANILE

By Clinton Dangerfield

Copyright, 1902, by T. C. McClure

"I tell thee," returned old Jacopo querulously and with the same impatient gesture he had often used to the St. Mark pigeons when they grew too familiar—"I tell thee thou canst not have the girl!"

"But I love her," urged Charlie Harkness, with the blind belief of lovers that this argument is sufficient.

"What if thou dost?" said the old guide sharply. "Thou art but an American seaman, speaking our sweet mother tongue most vilely, and who doubts but thou hast a light of love in every port thou hast touched on?"

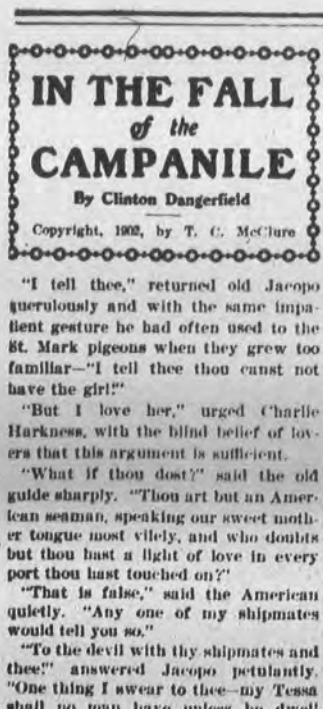
"That is false," said the American quietly. "Any one of my shipmates would tell you so."

"To the devil with thy shipmates and thee!" answered Jacopo petulantly. "One thing I swear to thee—my Tessa shall no man have unless he dwell within sight of the campanile."

As he spoke he glanced affectionately at the great bell tower crowning St. Mark's. Under the benign smile of the golden angel poised on its graceful height had Jacopo in his long gone youth pledged his troth.

To that dead Tessa had he first told the story of the campanile—how Doge Pietro Tribuno had begun it centuries ago, how the loggia had been a meeting place for the haughty nobles of Venice. So well had he told it that she suggested to him the occupation of guide, and under her inspiration he had succeeded beyond his hopes. He grew to be a great favorite among all tourists, and to people of many different lands he repeated, never wearying, the history of the bell tower.

Though a man of no education, he was strongly tinged with the poetry of



THE AMERICAN RAN FOR BOTH THEIR LIVES.

his passionate country and often comprehended far better than most of the slight crammed tourists who trotted after him the unparalleled beauty of the whole group of buildings on the famous piazza.

That an American should dare to think of carrying Tessa away forever filled him with dismay. Suddenly turning, he plunged into an alley and disappeared from view. Harkness was left to wander disconsolately through the piazza and to ponder on Tessa's gentle but firm assurance that she could not marry without her father's consent.

"As if our redwood trees and some of our canyons weren't worth a thousand bell towers!" he muttered wrathfully. Then suddenly he grasped the arm of a bystander and, pointing eagerly to the campanile, demanded in his usual curt Italian if "that" had always been there.

"That" proved to be a crack yawning in the campanile itself. In his surprise and horror the Venetian overlooked the slight to his dignity.

"Signore, no," he said anxiously. "The authorities must be informed."

The authorities were informed, and a careful inspection resulted in the discovery that this supreme treasure of Italy was in danger. So at least said the city magnates, but old Jacopo refused to believe.

"When thy bones and mine have been a century decayed," he said scornfully to Harkness, "the campanile will stand there."

So thought most of those in the city, but yet they paid some heed to the warnings of the guards set by the city council and generally avoided the piazza. Not so old Jacopo. He felt as certain of the security of the tower as did the pigeons drifting to and fro beside it in the mellow Italian sunlight. The Monday following the discovery of the crack he was persistently lingering near the campanile, though much irritated by the presence of Tessa's lover, who continued to urge his suit.

That the American had found this flaw in the tower annoyed the guide bitterly, and he turned the deafest of ears to all the young man's pleading, so deaf indeed that at first he took the ominous cracking sound rising sharply from the tower for an explosion elsewhere in the city. But at Harkness' cry he whirled around and faced the awful sight of the campanile crashing down toward them both.

In full reach of the sinking angel he stood gaping. Then two powerful arms lifted him like a feather, and the American ran for both their lives.

As Harkness put it, "It was a narrow shave." When the dust from the fallen stones settled, the two found themselves standing, unharmed indeed, but not six feet from the crushed figure of the once mighty angel.

Jacopo suffered the young sailor to lead him home, still with the stunned air of one who could not understand what had happened. He made no answer to any questions except to say stupidly that he was not hurt and, in spite of Tessa's anxious ministrations, refused all food for nearly two days, lying languidly on his simple pallet.

At last he ate, but the food held no savor. The physical terror he had suffered, combined with his bitter grief over the fall of his beloved tower, was too much for his feeble resources. Hourly Tessa saw him fading, but at last, with a flash of his old energy, he sat up and called the girl and Harkness to him.

"I said you should marry no man who did not dwell in the shadow of the tower, Tessa mio," he said quietly, "but where may such a man be found now? Shadow indeed the campanile throws no longer, and the lowest building in the city is higher than the labor of the masters! Never again shall thou and I, my daughter, let our boat drift in the blue waters of the bay and watch the setting sun lay a crown of splendid rays on the bright angel—that angel who for countless years has watched the white sails of the Venetian craft come and go! Never again—but I grow confused! Wed her, American, since she loves thee. 'Tis the old marvel—how a maid's heart is stronger than her native land!" His mind began to wander. "Oh, aye—the pigeons, signore. It is easy to feed them. They are always tame! See how they wheel downward, signore. There sits one upon the bronze doors. Such doors you cannot find elsewhere, and when one enters through them"—

The old voice trailed off into a dying whisper, for other doors had opened, and through them Jacopo had passed.

Revenge and Suicide of a Camel.

Some years ago it chanced that a valuable camel working in an old mill in Africa was severely beaten by its driver, who, perceiving that the camel had treasured up the injury and was only waiting a favorable opportunity for revenge, kept a strict watch upon the animal. Time passed away. The camel, perceiving that it was watched, was quiet and obedient, and the driver began to think that the beating was forgotten.

One night, after the lapse of several months, the man, who slept on a raised platform in the mill, while, as is customary, the camel was stalled in a corner, happening to remain awake, observed by the bright moonlight that when all was quiet the animal looked cautiously around, rose softly and, stealing over toward a spot where a bundle of clothes and a burnoose, thrown carelessly on the ground, resembled a sleeping figure, cast itself with violence upon them, rolling with all its weight and tearing them most viciously with its teeth.

Satisfied that its revenge was complete, the camel was returning to its corner when the driver sat up and spoke. At the sound of his voice and perceiving the mistake it had made the animal was so mortified at the failure and discovery of its scheme that it dashed its head against the wall and died on the spot.—Sheffield Telegraph.

Frederick or Frederic.

Some names are so cosmopolitan that it makes no difference how they are spelled, but just let anybody ring a few unauthorized changes on the name of Frederick, and the man who owns it will have something to say. They will not be pleasant things to listen to either. As Frederick was christened, so does he insist upon being spelled. If at the baptismal font he was invested with the dignity of a "k," he staggers under its weight to the end of the chapter. The only person on earth whose indignation can equal Frederick's when somebody leaves off the "k" is Frederic when somebody else puts it on. Family ties have been severed and irreparable social eruptions have been brought about by the unfortunate omission or addition of that final letter. To untutored ears Frederick with or without the "k" sounds just as musical, but to Frederick himself that alphabetical error is worse than a whole orchestra out of tune, and it behooves the person who would keep on the good side of him to learn his preference in the matter.—New York Times.

Origin of Dominos.

The game of dominos is said to have originated through the ingenuity of two monks who had been committed to a lengthy seclusion. They contrived to beguile the weary hours of their confinement without breaking the rule of silence by showing each other small, flat stones marked with black dots and by following a few simple conditions which ruled their game. By a preconcerted arrangement the winner would claim the victory by repeating in an undertone the first line of the vesper prayer.

In the course of time these two resourceful monks managed to complete the set of stones and to perfect this original pastime, and when their term of confinement expired the game caught on and was adopted as a new form of amusement by all the inmates of the monastery.

Spreading thence, it soon became popular throughout Italy, and a name was given to it which recalls its origin, by reducing the first line of the vespers to the word "domino."

Nails

Had Turned Blue—Limbs Bloated.

Lay in a Stupor From Heart Disease.

Dr. Miles' Heart Cure Cured Me.

The nails turning blue is a sign of defective circulation as is the bloating of the arms and legs. Other common symptoms of heart disease are shortness of breath from slight exertion, pain in or near heart, smothering spells, palpitation or fluttering, weak, tired and hungry spells, dreaming and nightmare, sudden starting in sleep. In severe cases the brain, stomach, lungs, etc., may become so disordered as to mislead the physicians as to the nature of the disease. If you suffer from any or all of these symptoms your heart is diseased and treatment should not be postponed a single day. Dr. Miles' Heart Cure is guaranteed to help you as it has helped thousands of others.

"I owe my life to Dr. Miles' Heart Cure. After four doctors met in consultation on my case, their verdict was that I had suffered from heart disease so long that they could do nothing for me and I would surely die. My brother said, 'While there is life there is hope, we will try Dr. Miles' New Heart Cure.' When I began taking it my nails had turned blue and my arms and legs were bloated to twice their natural size, and I lay in a stupor most of the time. After the first few doses the dizziness went away and after three bottles I was able to go around the house and do my work. Both my family and my nurse think I would have been in my grave had it not been for Dr. Miles' Heart Cure."—MRS. ROBERT MORRIS, Sackets Harbor, N. Y.

A DAY OF REMEMBRANCE
Here, by a costly monument;
There, by a humble stone,
This bearing eulogistic phrase,
That simply marked "Unknown,"
O'er each grass hidden mound of earth
Today a flag is set,
A token that our soldier dead
We ne'er forget.
It matters not the station, rank,
Of him who lies below:
"He fought for freedom and the flag:"
'Tis all we care to know,
And high or low, o'er all alike,
Our fragrant wreaths we lay
And bring our offerings to our dead
On Mem'ry's day.

EVERY Memorial Day is celebrated with impressive ceremonies in Arlington National Cemetery at Washington. Standing upon the steps of beautiful Arlington House reflections crowd thick and fast upon one. The grass-grown mounds, with their gleaming marble slabs, stretch away interminably, and the wind plays an eternal dirge among the boughs of the sentineling oaks. How vividly it all comes back—the horrible carnage, the desolated homes, the broken hearts and bodies. Happily the most of those who wrought and suffered are beyond the blighting memory of it now, and from that baptism of blood and fire the Nation has risen stronger and better, one and indissoluble forever.

Yet it is not quite forty years since a President, whom the assassin's hand awaited, stood on these same steps with the head of the Quartermaster's Department, General Meigs. The one had just returned from visiting some of the wounded men in the tents that then occupied every foot of ground on this noble old estate, while the other had remained here, filled with anxious thought which the superb view extending before him and on every side but served to embitter. It was by no means the first time he had seen it, for he had been a long-time friend of General Lee, and Arlington belonged to Lee by right of his wife, Mary Custis, sole heir of her father, George Washington Parke Custis, adopted son of George and grandson of Martha Washington. But the old friendship in Meigs' heart for his quondam comrade in arms, the brilliant and lovable Lee, was turned to vindictive bitterness.

Straight across the glistening Potomac, beyond the long bridge over which the two had driven, glittered the dome and the spires of the Nation's Capitol, the objective of the Confederate forces,

A WAR-TIME PHOTOGRAPH OF GENERAL GRANT IN THE VICKSBURG DAYS.

as Richmond was of the Federal. Its preservation was of vital necessity, and there was no place of better strategic value for such guardianship than Arlington, directly in front of it, on the Virginian hills that skirt the Potomac. It was not strange, therefore, that the gates of the mansion had scarcely closed on the retiring Lee family after the fall of Sumter than they swung open again when the first army called by Lincoln marched into the grounds and bivouacked beneath the stately trees where, later, some of them were to lie asleep forever.

But it was not a question of Washington's protection that troubled the Quartermaster-General on that spring evening in '61, for the battered old Forts McPherson and Whipple, scarcely a stone's throw away, told of their ability to hold their own. It was a much more serious problem in his estimation that demanded immediate solution—sepulture of the Union dead.

The matter was indeed a pressing one. The daily list of deaths from wounds and disease in the hospitals in and around Washington was very large, and the utmost limit of accommodation—8000—had just been reached in that city's Soldier's Home Cemetery. Moreover, murmurs of resentment and angry protestation had reached the department from the people of the North for the improper burial of her sons who had fallen in such appalling numbers from the ranks of all the armies. Nor could these protestations be ignored. Policy, if not humanity, required that some sort of action be taken at once, for from these very people must be drawn further recruits. Grant had just declared his intention of "fighting it out on this line," and as an earnest of his sincerity the roar and thunder of the awful Battle of the Wilderness could even now be heard. Sixty-four thousand new men would be required to fill the place of those who helped the great General to win the famous victories of the next few weeks. And the man who so brilliantly contested every one of them and every inch of that line was Robert E. Lee.

"He shall never, never return to Arlington, no matter what the issue of the war may be!" exclaimed Meigs, as the President rejoined him.

Scarcely were the words free from his lips when a squad of men approached with a melancholy burden—stretchers with the bodies of a dozen soldiers from out the tents.

"Set them down," commanded the quartermaster. "Captain, see that all the dead at Arlington are buried in the place. Begin there," and he pointed to a terrace a dozen yards away.

In such wise the greatest of our national cemeteries was begun. Oddly enough, with a meaning these forty years have revealed to us, the first body over which the brief but touching service was read was that of a Confederate prisoner who had died of his wounds in this loved home of his idolized Southern General.

There are more than 16,000 graves here now. Beautiful the place is still with its mighty oaks and elms and tender greensward, but it is the beauty of death, and the sighing of the winds and songs of birds but make the silence more profound. On the terrace where the first interments were made, commissioned officers now lie, the others having been removed to the lower part of the grounds, where sleep the rank and file.

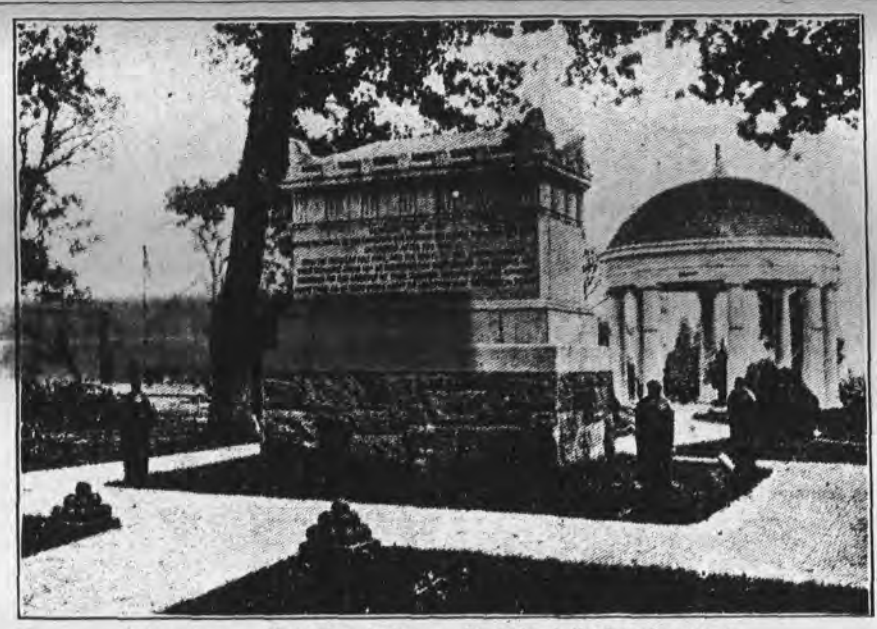
Straight in front of the main entrance

ADMIRAL FARRAGUT.

to the house under the shadow of the flag lies that idol of his command, General Sheridan, and by his side, Admiral Porter. Over the former has been raised the finest monument in the cemetery. It is of beautifully polished granite bearing on its face a bronze flag and a medallion head of the hero who rests below. Only in the officers' section is any deviation allowed from the prescribed plain marble or granite slab, but here friends and States are allowed to contribute and select, and many fine monuments attest both love and pride.

Along the terrace, a little to the south, in the midst of a flower garden, where the names of many brave men appear in parti-colored flowers, rises the Temple of Fame, a handsome structure in whose stone cornice upmolding the dome is cut the country's greatest names — Washington, Lincoln, Grant, Farragut. And on the pillars, too, are deathless names that thrill us as we read them. Is it the names or something else for which they stand that moves us so? Close beside this temple, as if to emphasize this question, is an extremely simple oblong pile of granite—a sarcophagus in which lie the bones of over 2000 soldiers, which were collected during the last years of the war from all the battlefields within a radius of thirty-five miles of Washington. Many of them were sadly deficient in the number of parts that go to make up a well regulated skeleton, and, of course, identification wasn't thought of, yet they were faithfully gathered together, separately boxed and placed in that massive tomb in the shadow of fame.

Unique among nations stands America in thus honoring her citizen soldiers. Unique also is the beautiful but sad holiday that is upon us, for every one of those eighty-three national cemeteries and all others where slumber any who took part in that awful war will be invaded by a flower-laden army to strew there sweet emblems of peace and immortality, and not the least beautiful part is that now and hereafter they who bear flowers will be quite as indifferent as the sleepers themselves whether they wore blue or gray uniforms in life.—Martin Curtis, in the San Francisco Chronicle.



Sarcophagus Containing Unknown Dead in Arlington Cemetery.

Arlington House---The Old Lee Mansion.

Bull Run and Appomattox.

It is a fact not generally known that the first and the last stand of the Confederates were made on land owned by the same man. A part of Bull Run battlefield was owned by Mr. McLean. After this famous battle he decided to move to a locality where there would be less fear from the ravages of war. By a strange coincidence he took up his abode at Appomattox, which subsequently proved to be the final battlefield of the Civil War.

Soldier's Day.

Flowers to-day for the soldier's grave.
Strew them there where sleep the brave.
Flowers to-day, forever and aye
Let memory hold the soldier's day.

Memorial Day Song.

(Respectfully Dedicated to the G. A. R.)

Where sleep in honor martyrs for our Nation,
Lend, O, ye flowers, lend your decoration;
While to Old Glory, giving salutation,
Sing we our choral lay.

Hail, O, Columbia! Like the morning glowing,
May radiant freedom, light on thee bestowing,
All lands illumine, and still brighter growing,
Shine on to perfect day.

Hail to the people, who a trust receiving
From patriot fathers, liberty achieving,
For in all bondage sore oppressed and grieving,
Will not their trust betray.

Hail to the banner, freedom's fairest token,
Flag of a Union that can ne'er be broken,
While hearts heroic, strong as bulwarks oaken,
Guard it on land and sea.

Rest, O, ye heroes! Not in vain your dying;
For, sons and daughters, on their God relying,
Pledge like devotion; with you nobly vying
In love and loyalty.

Hail, O, Columbia, every heart enslaving!
Hail ye, your country, in her peril saving!
Hail, peerless banner, in all breezes waving!
Flag of the brave and free!

—Edward A. Collier, D.D.

"Lights Out."

(A Memorial Day Memory.)

The sentry challenged at the open gate
Who passed him by, because the hour was late:
"Halt! who goes there?" "A friend." "All's well."
"A friend, old mate." A friend's farewell,
And I had passed the gate;
And then the long, last notes were shed,
The shrilly clarion's echoes dead;
And sounded sadly as I stood without
Those last sad notes of all: "Lights out;" "Lights out."

Farewell, companions. We have side by side
Watched history's lengthened shadows past us glide,
And worn the blue, and laughed at pain
And buried comrades lowly lain
And many a year has died.
And toil and hardship have we borne
And followed where the flag has gone;
But all the echoes answering round about
Have bidden you to sleep: "Lights out;" "Lights out."

And never more for me the bay'net's flash,
The trumpet summons. Oh, the crumbling ash
Of life is here's fruition; fall
The withered friendships, and they all
Are sleeping. Day by day
The fabrics of our lives decay,
And change unseen and melt away—
Like martial warnings from life's grim redoubt,
Like those last notes of all: "Lights out;" "Lights out."

—John R. Rathom.

The Nation's Honored Dead.

O freedom's sons, to thee we sing,
Who, from a golden chalice, poured
The wine of life, that it might bring
Sweet liberty and its reward;
God send us grace, that we may stand
As ye once stood—a noble band.

The noise and din of war have ceased,
Its valiant sons are senseless clay,
O may its scourge ne'er be increased,
Nor blood for blood obscure a day—
But give us peace, O Lord, we pray,
And guide us to Thy perfect day.

—Success.

Sleeping, Not Dead.

Ye silent men, who to your country gave
That last full measure of devotion—life—
Ye fell asleep while the tumultuous strife
Around you swelled in fury, like the wave
Which breaks upon the rocks which prove its grave.
To-day, around you all the air is rife
With wailing cries from bugle and from fife—
The voice of that dear land you died to save.
Nay, ye have never died—ye live to-day
In every soul which joys that it is free;
In that fair flag with which the breezes play,
With every flashing star undimmed, unlost;
In all our hearts, which clay like yours shall be
Before our land forgets what freedom cost.

—Ninette M. Lowater.

ARLINGTON

Above the tide that seeks the sea,
Through graves of song and haunts of bee,
A mighty camp in silence lies
Where even neath the starlit skies
No sentries guard with stately tramp
At dawn or dusk that sacred camp,
Where peacefully, neath shade and sun
Repose the brave of Arlington

Beneath the pine's uplifted crest
Sweet blossoms fall on many a breast
No roll of drum or fife so shrill
Can wake the sleepers on the hill,
Above the carpet Nature spreads,
O'er all the violet lifts their heads,
And once a day the sunset gun
The soft leaves stir at Arlington

No thrilling dreams of war invade
The camp deep in the cedar shade
No charge across the crimson plain
Could rouse the dead to life again.
Beyond the river, flowing down
Past ruined fort and ancient town,
The Nation's dome shines in the sun
Which lights, at noonday, Arlington

O sacred bivouac 'neath the rose!
Thy tenants rest secure from foes,
The fight that stirred their blood of yore
A vision past forevermore,
And once a year the fragrant bloom
Of May falls softly on each tomb—
The land's peace, the victory won,
O love-rivet Arlington!

In Memoriam.

Of all our holidays Memorial Day comes at the most enjoyable time of the year. When the sun has not yet attained his midsummer ardor the sky is apt to be serene; the trees and herbage still display themselves in their most brilliant verdancy, while flowers bloom in richer profusion than at any other season. What wonder, then, that the day should have become for the younger generation an outing festival, devoted to sports and communion with Mother Earth bedecked in her bridal robes? The balmy breeze carrying the scent of fresh fields and woodlands allures one to picnicking on the green; the feathered choir call a welcome, and the glow of springtime enters the blood and causes it to pulsate in rhythmic harmony with the great heart of Nature now completely roused from winter's sleep.

So long, however, as there are any of those left who offered their lives that the Republic might endure and the Union be preserved the real significance of Memorial Day will not be forgotten. Moreover, the generation which grew to manhood while the echoes of the terrific struggle through which the nation had passed were still reverberating through the land will remain keepers of the traditional associations of the day even after the last of the thinning files of the veterans shall have been gathered into the great majority. Long may it be before the country shall fail to pay due tribute to the dead of its truly heroic age; and if a proper conception of the sublime devotion to an idea of the silent regiments which sleep beneath the sod shall be instilled into the minds of younger America the time when the celebration of Memorial Day shall be divested of its solemnity and its inspirations to patriotism will never come.

The Martyred McKinley's Plea.

The old flag again waves over us in peace, with new glories which your sons and ours have added to its sacred folds. What an army of silent sentinels we have, and with what loving hands their graves are kept! Every soldier's grave made during our unfortunate Civil War is a tribute to American valor. And while, when those graves were made, we differed widely about the future of the Government, those differences were long ago settled by the arbitrament of arms; and the time has now come, in the evolution of sentiment and feeling under the providence of God, when in the spirit of fraternity we should share with you in the care of the graves of the Confederate soldiers.—William McKinley.

DECORATION DAY

Flags and wreaths and speeches
Children eager, gay;
In the long procession
Lines of veterans gray.
Wonder what it's all about,
This Decoration Day?

Listen, little stranger—
Listen and you'll hear,
Of our glorious country,
To its children dear:
It was saved, our country,
And our slaves made free,
Saved to highest honor,
Purest liberty.

Honor to our soldiers
That we come to pay,
With our flags and flowers
On Decoration Day.

The Funny Side of Life.

THE ONE FLAW.

At last we're to be married!
With joy my bosom thrills,
To think that all is settled—
That is, except the bills.
—Philadelphia Public Ledger.

BEST FELLOW.

"There goes Mabel and her best fellow."

"Huh! I'd hate to see her worst!"—Baltimore Herald.

LOVE'S EXCUSES.

He—"You passed me without speaking to me."

She—"Oh, I must have been thinking about you."—Detroit Free Press.

ONE BETTER.

"I began life without a cent in my pocket," remarked the self-made man.

"I didn't even have a pocket when I was born," retorted the gilded youth.—Philadelphia Record.

LARGE ENOUGH.

"I think," said the first author, "that I shall write a two-volume novel as my next effort."

"Yes?" smiled his rival. "Yes, I think that will be a large enough edition."—New York News.

TIME TO EVEN UP.

Mamma—"But, darling, you shouldn't be angry when Bobby gets the larger piece of pie—he's the older."

Bessie—"Yes, that's just it. He's been eating pie two years longer'n I have already."—New York Times.

HIS ONE GREAT PASSION.

"What a sour disposition Graphiter has!"

"Yes; disappointed in love."

"Nonsense! Disappointed in love?"

"Yes, in his love of money. He expected to be rich by this time."—Philadelphia Press.

NOTHING DISTINCTIVE.

"What does the expert mean when he says 'there is no character' in Clark's handwriting?" inquired the seeker after knowledge.

"He means," replied the man who knew, "that every character is legibly formed."—Philadelphia Press.

OBVIOUS.

An eccentric instructor was explaining a piece of mechanism to his class. Placing his fingers upon the handle and turning it, he remarked:

"You notice that this machine is turned by a crank."

And a titter passed through the whole class.

PASSING BELIEF.

Miss Gidday—"What did he say when you told him I was married?"

Miss Speitz—"Well, he seemed surprised."

Miss Gidday—"Did he ask when it happened?"

Miss Speitz—"No, but he asked 'how it happened.'"—Philadelphia Press.

HERO WORSHIP.

Jim—"What do you mean by hero worship?"

Jam—"It is the brief admiration we feel for a great man immediately before we begin to rip him up the back and begin writing letters to the newspapers attacking his character and utterances."—Baltimore Herald.

THE AMERICAN FATHER.

Ascum—"Another baby, and a girl this time, eh? How does it make you feel to have a daughter?"

Popley—"Great! One of the first things you think about is how a foreign nobleman will come courting her some day, and how you'll turn him down good and proper."—Philadelphia Press.

VETOED.

"I hear your engagement to old Goldman's daughter is announced."

"No, it was announced."

"Well, that's the same thing, isn't it?"

"It was announced; it is now denounced. I've just been interviewing her father."—Philadelphia Public Ledger.

HARD LUCK.

"Did you call at Roxley's house?" inquired the young doctor's wife.

"Yes; and I wish he had sent for me sooner."

"Gracious! Is he seriously ill?"

"Quite the reverse. I'm afraid he'll be all right again before I get in a half dozen visits."—Philadelphia Public Ledger.

CHOLLY'S REPARTEE.

"Cholly is so clevah at repartee," exclaimed Clarence.

"Isn't he?" said Reginald. "What's his latest?"

"A gweat, howwid bwute said to him, 'You are the biggest fool in this State,' and Cholly answered wight off, 'I don't agwee with you!'"—Cincinnati Commercial Tribune.

HUMILIATING.

Some members of the Automobile Club were discussing the latest police outrage.

"It is a shame," said the one most interested. "I never in my life was more humiliated than when that ignorant policeman went on the stand and swore that I was going twenty miles an hour."

"How fast were you really going, Harry?" another asked.

"Not an inch less than fifty miles an hour."—Brooklyn Eagle.

lapoleon of the Stockyards

From a Biography of the Late Gustavus Swift in the Cosmopolitan.

IMAGINE a procession of 10,000 cattle, marching two by two, in a line fifteen miles long; let 20,000 sheep follow them, bleating along twelve miles of road; after them drive sixteen miles of hogs, 27,000 strong; then let 30,000 fowls bring up the rear, clucking and quacking and gobbling, over a space of six miles; and in this whole caravan, stretching for nearly fifty miles and requiring two days to pass a given point, you will see the animals devoted to death in the packing houses of Swift & Company in a single day. Surely a Buddhist ould think that the head of that establishment had much to answer for. ever before in the world's history was a massacre of the innocents organized such a stupendous scale or with such scientific system.

The commander of the army of 20,000 men engaged in this work earned first penny picking cranberries in a swamp on Cape Cod, more than fifty ars ago. It was at Sagamore, on that historic peninsula, that a son was born the house of Swift on June 24, 1839, and named Gustavus Franklin. A years later, when the boy was not picking cranberries, he drove hogs ng the cape. It was like Napoleon exercising his infant armies at school.

he Indian's Point of View.

By Dr. Charles A. Eastman.

THE Indian's side of any controversy between him and the white man has never really been presented at all. History has necessarily been written from the white man's standpoint and largely from the reports of commanding officers, naturally anxious to secure full credit for their gallantry or to conceal any weakness.

Take as an illustration the so-called "battle" of Wounded Knee. A ring was formed about the Indians, and after disarming most of them one man resisted, and the troops began ing toward the centr:, killing nearly all the Indians and necessarily many their own men. The soldiers then followed up fleeing women and children d shot them down in cold blood. This is not called a massacre in official ports. The press of the country did not call it a massacre. On the other nd, General Custer was in pursuit of certain bands of Sioux. He followed eir trail two days and finally overtook and surprised them upon the Little g Horn. The warriors met him in force and he was beaten at his own me. It was a brilliant victory for the Indians, whom Custer had taken at disadvantage in the midst of their women and children. This battle goes wn in history as the "Custer massacre."

he Joy of Working.

Pleasures of Which the Producer of the Present is Deprived.

By Caroline L. Hunt.

THE producer of old had pleasures of which the producer of the present knows not. He had the quiet and safety and healthfulness of a small shop. He had common interest with fellow-workers and apprentices in village politics or in church affairs. Best of all, perhaps, there was a personal quality in his work because it was done for friends or for acquaintances, and an ever-present sense of its importance because it met needs which he had seen and recognized, and which his own manner of life, similar to that of the consumer and on the same social plane, prepared him to understand. He had, for example, possibly known for months that his neighbor was saving money th which to hire him to make the chest of drawers upon which he was work-, and there was a zest and a delight in his labor because he knew just how uch she needed the piece of furniture, just where it was to stand and just hat purpose it was to serve. The favorable conditions of his work, the pleas-ter surroundings, the personal quality of labor, the feeling of its direct use-lness were intensified in case of the housewife who worked in her own ouse with and for those she loved.

Now all is changed. The factory hand spends his working day in a eat, dingy shop with the maddening of the machinery in his ears. His asso-ates are strangers with whom he has little or nothing in common besides his ork. He labors for an indefinite, far-away consumer whose manner of life unknown to him. He has for this consumer neither the fellow-feeling which mes from sharing life in the same community, nor its only substitute, the bility which comes from broad education and from travel to project oneself imagination across space and to put oneself in the place of a stranger and realize his needs.—The Chautauquan.

Arctic America.

By Andrew J. Stone, Explorer and Naturalist.

TO undertake to give people a correct conception of Arctic America, or any part of it, is difficult. Although they know that the country is much larger than the United States, they look upon it as being all alike—a country of long, dark winters, fields of ice and snow, and barren wastes. In truth, within Arctic and sub-Arctic America there is much diversity of climate. And in this beautiful summer-land of Alaska, there are in midsummer endless fields of beautiful plant life. Many times I have left my mp at the foot of the mountains, and passing through a little meadow where variety of wild grasses waved their tops above my head, I would commence climb among the dense, tangled, and almost tropical jungle of alders, where ew several varieties of the most beautiful ferns.

Reaching the upper limits of the alders, great, waving fields of the purple pine and dainty red columbine covered acres and acres of the high, rolling lls. Among them, wild celery and wild parsnip grew many feet high, and her luxuriant foliage plants gave my surroundings an almost tropical appearance. A little farther, many little ponds grew beautiful, yellow lilies, ith their great leaves resting on the surface of the water, and the purple is bordered the shores.

Still higher came the yellow sunflowers, white and purple daisies in endless elds, and higher yet, violets, pinks, forget-me-nots, buttercups and bluebells, nd dozens and dozens of dainty, blossoming plants in many colors.

Purple is the predominating color, then white and yellow and blue and k dividing honors. But few red flowers were seen. I have traveled many es where every foot of my way was one grand profusion of beautiful wers in many varieties.—Scribner's.

Look Into the Future.

By President Roosevelt.

WE have every right to take a just pride in the great deeds of our forefathers; but we show ourselves unworthy to be their descendants if we make what they did an excuse for our lying supine instead of an incentive to the effort to show ourselves by our acts worthy of them. In the administration of city, State and Nation, in the management of our home life and the conduct of our business and social relations, we are bound to show certain high and fine qualities of character under penalty of seeing the whole heart of our civilization eaten out while the body still lives.

We justly pride ourselves on our marvellous material prosperity, and such prosperity must exist in order to establish a foundation upon which a higher life can be built; but unless we do in very fact build this higher life thereon, the material prosperity itself will go for but very little. Now, in 1903, in the altered conditions, we must meet the changed and changing problems with the spirit shown by the men who in 1803 and in the subsequent years gained, explored, conquered and settled this vast territory, then a desert, now filled with thriving and populous States.

The old days were great because the men who lived in them had mighty qualities; and we must make the new days great by showing these same qualities. We must insist upon courage and resolution, upon hardihood, tenacity and fertility in resource; we must insist upon the strong virile virtues, and we must insist no less upon the virtues of self-restraint, self-mastery, regard for the rights of others; we must show our abhorrence of cruelty, brutality and corruption, in public and in private life alike.

If we come short in any of these qualities we shall measurably fail, and if, as I believe we surely shall, we develop these qualities in the future to an even greater degree than in the past, then in the century now beginning we shall make of this republic the freest and most orderly, the most just and mighty Nation which has ever come forth from the womb of time.

NEW IDEAS in TOILETTES

New York City.—Coats made with stitched straps are much in vogue and are exceedingly smart. This very attractive May Manton one is adapted

STRAPPED COAT.

to suitings of all sorts as well as to materials used for general wraps, but is shown in tan colored covert cloth stitched with corticelli silk.

The coat is made with fronts, back and under-arm gores and includes seams in both fronts and back which extend to the shoulders. The neck is finished with the regulation collar and lapels and in each front is inserted a convenient pocket. The sleeves are in the smart tailor coat shape, but with novel roll-over cuffs.

The quantity of material required for the medium size is two and three-quarter yards forty-four inches wide, two and a half yards fifty-two inches wide.

Box Eton With Stole Collar.

Loose or box Eton jackets make a feature of advance styles, and will be

BOX ETON WITH STOLE COLLAR.

greatly worn during the season to come. The very pretty one shown in the large drawing is made of black taffeta, with trimming of applique cloth, held by fancy stitches, which is exceedingly smart, but etamine, cloth, peau de soie are all appropriate and the design is suited alike to the odd wrap and the costume. The trimming might be heavy lace of any sort, applique or the material braided, braiding being one of the latest whims of fashion.

The jacket is made with back and fronts only and is fitted by means of shoulder and under-arm seams. At the neck is a collar which is broad at the back and shoulders, but forms stole ends at the front. The sleeves are in bell style and short enough to allow the full ones worn beneath to be seen.

The quantity of material required for the medium size is three and three-quarter yards twenty-one inches wide, two yards forty-four inches wide.

Undersleeve Effects.

Many of the handsome new dresses show elaborate undersleeve effects. If well held in these are pleasing. Too saggy and droopy schemes, however, look positively untidy, especially for the street. Old sleeves may be made thus modish very easily. A handsome black broadcloth was thus treated. The sleeve was ripped up the back seam to the elbow. A ruffle of black chiffon was set in, puff fashion. Each side of it was one of black silk point de Venise lace. The edges of the cloth were hidden by an applique of Oriental embroidery like that on the cuffs and at the fronts.

A Word About Silk.

Though the Continental looms continue to turn out any amount of taffeta it is said that the coarser weaves will be the thing next autumn. Armures are looked upon as being one of the coming favorites. The great demand for taffeta is quite as much due to its desirability for lining as its vogue in garments. All the sheer etamines are over a taffeta foundation, and this alone sells enough taffeta to make it appear the silk of silks.

Twine Lace on Silk Crepe.

A novel puff dress is of castor silk crepe. The bolero, which is but a deep puff, droops over a deep draped girdle. There's a liberal showing of twine lace. On the skirt flat flounces of this lace alternate with the bias flounces of the crepe. There's no finding a color lovelier than this delicate shade of tan. In reality it is too light to be called castor; castor, however, stands for richness and delicacy of color, and tan is often an ugly shade.

Jackets Are Short.

In spite of what is said to the contrary, short jackets are being made to order at the tailors, and being purchased ready-made by those who are fortunate enough to be built in "stock sizes." Long coats and three-quarter lengths were all very well in cold weather. But for a run-about costume the short jacket is much liked, and so, all but indispensable.

Neckwear Newness.

A Windsor tie in washable striped silk is cool and neat for summer wear. Blue and white, "crab-red" and black, and red and white, and a clear and brilliant green and white are among those seen. The crisp bow is already tied, and as the silk is rather wide it falls out in plump outlines from the restraining knot.

Handsome Satin Girdle.

The back of a black Liberty satin girdle has four handsome cut steel buttons are ornaments. On both sides, but at a little distance, are three steel buttons and then two buttons. It makes a pretty finish to the belt and it fastens with steel clasps.

Green and Gold.

A bracelet that illustrates the fad for green and also the incoming fancy for a jour work, consists of green balls alternating with rondelles of gold openwork.

Fringes on Gowns and Coats.

Fringes will be considerably used on fichus and berthas. The old-fashioned net top bullion fringes are appearing on gowns and coats.

Woman's Three Piece Skirt.

Skirts made with deep graduated flounces that are arranged in shirring at the upper edge are notable among advance models and will be greatly worn in all the thin and pliable materials which are so fashionable, silk, wool, linen and cotton.

The very graceful May Manton model illustrated includes wide tucks at the lower edge of the flounce and is shirred over heavy cords. The material of which the original is made is voile, in the lovely shade known as mais or corn color, and the finish machine stitching with corticelli silk.

The skirt is made in three pieces and is laid in tucks at the sides and back, which give a hip yoke effect. The fulness at the back is laid in inverted pleats and the flounce is seamed to the lower edge.

The quantity of material required for the medium size is twelve and three-quarter yards twenty-one inches wide,

THREE PIECE SKIRT.

ten and three-quarter yards twenty-seven inches wide, nine yards thirty-two inches wide or six and three-quarter yards forty-four inches wide.

LAWS FOR MAD DOGS.

British Reduces Hydrophobia Cases by Legislating Against Canines.

It is still, we believe, an open question among people who don't know anything about it whether there is such a thing as rabies among human beings. But we are bound to say no doctor has any doubts on that score. Besides, it is useless to discuss the question since human beings who have been bitten by mad dogs do die of something extremely horrible, whether it is an actual fatal toxication or a form of acute mania induced by fear. We speak of this matter with some seriousness because of the alarming number of cases of hydrophobia reported in the papers in the last year. The blame must rest on local health and police authorities who do not insist upon the passage of laws that would prevent the infection of animals with rabies, or, if the laws exist, fail to enforce them. Whatever the disease may be, hydrophobia has been stamped out in Norway, Sweden, Holland, Switzerland and Denmark.

In Great Britain a rigid quarantine against imported dogs and sharp laws on muzzling reduced the number of fatal cases from 123 in 1889 to three in 1892. Some such action is needed in this country. Every real lover of dogs—for we reverse the old cynical saying and put it that "the more one knows of dogs the more he thinks of men"—every real lover of dogs should be in favor of regulation that, while aiming at the protection of the human community, also saves the brute creation from disease. As for the people who "don't believe there is such a thing as rabies," and the folks who have more sympathy for dogs than for men, we shall not attempt to convince them. The present situation is, as a physician has said, "precisely the same as if a centre of smallpox were allowed to exist," because a few persons did not believe in vaccination.—Collier's Weekly.

WORDS OF WISDOM.

I find nonsense singularly refreshing.—Talleyrand.

Repentance is the heart's sorrow.—Shakespeare.

A man must become wise at his own expense.—Montaigne.

Smiles are smiles only when the heart pulls the wires.—Winthrop.

There is nothing more fearful than imagination without taste.—Goethe.

The essence of knowledge is, having it, to apply it, not having it, to confess it.—Confucius.

Pitch a lucky man into the Nile, says the Arabian proverb, and he will come up with a fish in his mouth.—Willis.

We do not believe immortality because we have proved it, but we forever try to prove it because we believe it.—Martineau.

One thing is clear to me: that no indulgence of passion destroys the spiritual nature so much as respectable selfishness.—George MacDonald.

A Midnight Tragedy.

It was nearing the hour of midnight. A faint light was burning in a poorly furnished room of a three-story tenement.

At a table in the centre of the room sat a man. His thin, nervous fingers trembled as he eagerly read the long expected letter. "It is just as well," he murmured, as, laying down the finished letter, he took a shining revolver from his pocket. "it is even better so."

Slowly the hands on the clock approached the midnight hour.

"Almost time," he muttered, huskily, "and all will be over. Perhaps it is for the best; she—she will never know!" Then a pause as his grizzled locks sank low on the table.

One—two—three minutes passed silently away. Then, a low, wailing cry was borne up on the night wind through the open window. Again it was repeated and again the cry reached the ears of the desperate man. "Now, now is the time," he cried as the slow, musical bell of the clock struck 12, and seizing the revolver he strode heavily to the window.

Again that low, mournful cry was wafted on the air.

"Bang! Bang!" Then deathly silence.

The next morning an old gray cat was found dead in the alley.—Brooklyn Eagle.

One of Nature's Jokes.

A species of Australian fern which grows in the shape of the horn and antlers of deer and stag have been aptly described as "one of nature's jokes." The cause of this extraordinary reproduction of a feature of animal life has not been accounted for. It is altogether baffling to behold the thin green horns curving out of the tree trunk as realistically as if they were growing from the head of a stag, or to see the branching and magnificent antlers of a moose imitated even to the finest detail. This striking eccentricity is not by any means the only remarkable feature of fern growth. The wonderful manner in which these plants are propagated has challenged the admiration and awe of students. Under a magnifying glass hundreds of the minute spores which perform the function of seeds look like only the smallest atom, and so imperceptibly are they scattered from fern to fern that Shakespeare could think of no better synonym for love than "the secret of the fern seed," which "walks invisible."

Flowers Change Their Scents.

Some flowers appear to change their scents at different times. The common jasmine flowers, when first opened, have a delicate fresh perfume which, after a time, becomes grosser and attracts blue-bottle flies. Mr. J. O'Brien draws attention to flowers of the orchid odontoglossum hebraicum, which have a cinnamon fragrance and a hawthorn scent at different periods of their bloom.

GOOD ROADS

The National Convention.

COLONEL J. B. KILLEBREW, of Tennessee, writing for the Manufacturers' Record, gives the following graphic account of the great National Convention for good roads at St. Louis:

No more successful convention was ever held in the interest of any industrial movement than the good roads' convention that was held in St. Louis. In the number and intelligence of its delegates, in its enthusiasm and working capacity, in its unanimity and singleness of purpose, in the number of able speakers and freedom from partisan or political influences, it was seldom if ever equaled.

Two thousand delegates from nearly every State and Territory in the Union attended the convention. From the first day to the last the most dominating idea was the necessity of government aid in the construction of rural routes—government aid to be conditioned upon an equal amount of local aid as set forth in the Brownlow bill.

The best evidence, however, was in the adoption of the declaration of principles and resolutions on the last day of the meeting. There was not a dissenting voice in that large assemblage. The declaration of principles as set forth asserted that the building of good roads in the United States is now of paramount importance to national prosperity and commercial supremacy; that the harmonious co-operation of township, county, State and national governments is needed in furtherance of this end; that though the appropriations hitherto made by Congress for the improvement of the rivers and harbors were beneficent and commendable, yet the time has come when the agricultural districts should be assisted in the matter of building highways, so that the benefits of the free mail delivery may be extended and thus promote a higher order of citizenship and also meet the ever-growing necessities of the great agricultural interests of the country, upon which its prosperity and growth depend.

The principle of State and county co-operation was commended, and it was more than once emphasized that it is as much the duty of the general government to assist in the building of highways as it is to improve the rivers and harbors.

The resolution favoring national aid is to be presented to the Congress of the United States by a committee composed of one member from each State to be selected by the secretary of the National Good Roads' Association. The building of the Memorial road from Monticello to the University of Virginia in honor of Thomas Jefferson, who signed the first bill for the construction of a national highway on March 29, 1806, was unanimously approved and indorsed by the convention.

Among the most distinguished speakers at the convention were President Roosevelt, William J. Bryan, Senator Latimer, of South Carolina, and Governor Cummins, of Iowa. Mr. Roosevelt and Mr. Bryan both spoke of the necessity of building better highways for the nation, and though neither committed himself to the proposition of advocating government aid, yet the inference was clear that both would favor such expenditures. Senator Latimer made a strong and unanswerable argument in favor of government aid. There will be no more earnest worker for good roads in the next Congress than Senator Latimer.

The President made some good points. Among other things he said:

"It is the habit of road building that gives to a people permanent greatness.

"The development of the iron road has been all that one could wish, but it is mere presumption to consider good railways as substitutes for good highways.

"We want to see cities built up but not at the expense of the country districts.

"If the winter means to the average farmer a long line of liquid morasses through which he must painfully force his team if bent on business, and through which he must wade or swim if bent on pleasure; if an ordinary rain storm means that the farmer's boy or girl cannot use their bicycles, you have got to expect that those who live in the rural districts will not find farm life attractive.

"We should all encourage any check to the unhealthy flow from the country to the city."

This movement in favor of government aid is gathering strength day by day.

Sun's Antics at Sunset.

Curious deformations of the sun's disk as it sets have recently been studied by Dr. Prinz, of the Royal Belgian Observatory, by the aid of photography, says a writer in Success. The most common of these are simply indentations of the disk. Sometimes there is appearance as of flames issuing symmetrically from opposite sides and uniting above in a single jet, which disappears to give place to another, formed in the same way. These phenomena, according to M. Prinz, are due to horizontal layers of air of different density, which refract the sun's light. Some such appearance of the solar disk at sunrise may have originated the familiar legend that on Easter morning the sun dances as he rises.

It is calculated that more than 25,000 New Yorkers dine every day in the underground restaurants.

Municipal Ownership at Summit.

The reports of the municipal ownership committee were submitted to the Common Council of Summit Tuesday evening. The majority report outlined the general investigation that had been made into the subject of municipal ownership of water and plants, now owned by the Essex Union Water and Light Company, and the recommendations of the committee.

The majority report recommended the purchase of the water plant or the establishment of a new company, but declared against the purchase of the lighting plant. The committee's expert appraised the water plant at $123,000 while the company asks $387,000 for it. The majority report was signed by eleven members of the committee of thirteen. Its recommendation was to secure a plant operated by the city either by purchase or condemnation of the present plant or, failing in this, to construct a competitive plant.

The minority report was signed by only two members of the committee, and they entered a general objection to the whole theory of municipal ownership, claiming the city would receive better and more economical service by renewing a contract with the present company on far better terms than those at present prevailing.

The company at present receives $40 per hydrant a year, but agrees to make a contract for ten years at $20 per hydrant if 100 are used, and $15 each per year when the number is increased to 200.

Mileage Tickets.

In referring to the new interchangeable mileage ticket, which certain of the eastern Railroad Companies propose adopting June 1st, Mr. C. M. Burt, General Passenger Agent, New Jersey Central, stated that the Central Railroad of New Jersey had not become a party to the new arrangement for the reason that it is felt their present form of 1000 mile ticket is less complicated than the proposed new interchangeable form; as no excess is charged at time of purchase, no identifications necessary at time of presentation for passage, and there are no subsequent rebates.

Mr. Burt explained that the 1000-mile ticket issued by the Central Railroad of New Jersey is issued at a flat rate of $20, the tickets being good for use of bearer and limited to one year from date. In addition to their being accepted over all rail lines of the Central Railroad of New Jersey, they will, from and after June 1st, be accepted on the main line and branches of the Philadelphia & Reading R'y., Atlantic City R. R., Philadelphia, Newtown & New York R. R. Perkiomen R. R.; Stony Creek R. R. Gettysburg & Harrisburg R. R.; main line and branches of the New York Central & Hudson R. R., Adirondack Division (including St. L. & A. R. R.), R. W. & O. Division, Pennsylvania Division; West Shore R. R.; New York, Ontario & Western R'y (between Scranton and Hancock); and Delaware & Hudson R. R. (between Wilkesbarre and Scranton).

The New Jersey Central's New Suburban Book.

To interest the thousands of hived up Gothamites who ought to be "Suburbanites," the New Jersey Central has prepared a booklet of 48 pages, entitled: "Within the Suburban Limits." The book is printed on the best of paper and has over fifty half-tone engravings. The territory described is all within 35 miles of New York, and the information contained includes rate of fare, train information and details regarding schools, churches, social environs, health advantages, and in fact no details are lacking such as are demanded by the home seeker. The book will be forwarded to your address upon receipt of 4 cents in stamps by C. M. Burt, Gen'l Passenger Agent, New Jersey Central, New York City.

Concerning Proctor's Attractions.

To keep seven playhouses open all Summer, and all under one management, would seem a mighty formidable task; and, indeed, very few theatrical impresarios attempt it in these days. F. F. Proctor is a notable example of the type of manager who believes in doing things that the majority of his confreres fight shy of. Mr. Proctor announces, for instance, that not one of his seven playhouses will close its doors this Summer, and his staff are already hard at work making the necessary preparations for a hot-weather campaign. These preparations include such items as laying in a stock of 20,000 big palm-leaf fans, covering the plush chairs with cool and smooth linen covers; overhauling the ventilating system of each house; replacing the Winter draperies with light and airy stuffs, and a score of other details like these.

Across the river and a few miles inland is situated, in the city of Newark, one of the prettiest playhouses in America—Proctor's, at Military Park. The policy of producing quantity and quality in vaudeville has been tested to its fullest extent in that city, and the natural return has been enormous business ever since the house opened. Notwithstanding the fact that the hot weather is upon us, the shows still and always will retain that standard of merit characteristic of Mr. Proctor in refined variety. The bargain matinees at 25 cents continue to draw throngs of ladies and children to this home of polite vaudeville.

In the course of a few days Mr. Proctor intends giving out at his various places of amusement a very handsome souvenir in the form of a sterling silver coffee spoon, with the Proctor crest (a hand holding seven laurel wreaths) embossed in the bowl of the spoon. Underneath the crest is the word "Proctor's in fine raised letters. Last season many beautiful souvenirs were distributed among the thousands of patrons then patronizing the houses. In three weeks over thirty thousand handsome pin trays were disposed of. This season it is hoped that over twice the number may be distributed. Come and get one of these appropriate gifts, and add it to your curio cabinet.

Served Him Right.

A man dressed as a woman was caught and thrashed on Remsen avenue, New Brunswick, Sunday night, after he had accosted a young woman. The latter escaped from him and meeting two young men acquaintances, told them of the incident. They hurried after the fellow and caught him near Raritan engine. The nice white shirt waist and dark skirt of the man were considerably mussed up before the young men got through with him.

Water in the Kalahari Desert.

The bushmen in the Kalahari desert often live scores of miles from places where water comes to the surface. During a certain part of the year sharp storms pass over the Kalahari, covering the apparently arid region with the brightest of verdure and filling for a few short days the water courses with roaring torrents. The bushmen know how to find water by digging in the bottoms of these dried up river beds. They dig a hole three or four feet deep and then tie a sponge to the end of a hollow reed. The sponge absorbs the moisture at the bottom of the hole, and the natives draw it into their mouths through the reed and then empty it into calabashes for future use.

The animals that inhabit such wastes as the Kalahari are of course accustomed to living upon very small and infrequent supplies of water. The Hottentots do not lead their cattle to the drinking places oftener than once in two or three days. It is said that goats in the Kalahari frequently pass months without water.

"Blue Hen's Chickens."

Everybody knows that natives of Delaware are called "Blue Hen's Chickens," but not one in a hundred can tell you why they are so called. The epithet is said to have had its origin in the following:

One of Delaware's most gallant fighters in the war of the Revolution was a Captain Caldwell, who was notorious for his fondness for cockfighting. He drilled his men admirably, they being known throughout the army as "Caldwell's Gamecocks."

This same Caldwell held to the peculiar theory that no cock was really game unless its mother was a blue hen.

As the months wore away Caldwell's men became known as the "Blue Hen's Chickens," a title which only increased their respect for the old gamecock captain. The nickname became famous and after the close of the war was applied indiscriminately to all natives of the Diamond State.

A Genius For Friendship.

No man of Johnson's time knew the great city better nor all the varieties of life contained within its walls. He slept with beggars or wandered homeless through the streets at night with a brother poet; he "slanged" a bargeman, laughed and jested with Garrick's actresses or talked "with profound respect, but still in a firm, manly manner, with his sonorous voice," to majesty itself. "I look upon a day as lost," he said, "in which I do not make a new acquaintance." The fact that he never lost a friend except by death shows that he was as tenacious of old friendships as he was eager to acquire new. He had, in fact, a very genius for friendship, and the circle that gathered round him in his later years included not only poets, scholars and men of letters, but the most prominent painters, actors, musicians, doctors and statesmen in England.—Booklovers' Magazine.

He Knew What It Was.

A certain minister, while passing down the village street, observed one of his parishioners seated at his cottage door supping his broth.

Thinking this an unusual proceeding, he stopped and asked him what was the matter.

"Oh," replied John, "the chimley is reeking a bit, so I cam' outside to sup ma broth. Ye had better gan in and gie the missus a bit advice aboot it."

The minister had scarcely opened the door when a female voice exclaimed, "Is that thoo agyen, thoo awd rascal?" And the minister's hat was crushed over his eyes with a stool.

Without making a remark the minister closed the door and, stepping up to where John sat, said solemnly, "John, our chimney at home smokes sometimes too."

Some Practical Advice.

It is not necessary to leave your home and friends, give up your occupation or put on a uniform to do good. Here is a simple way: When you hear a good thing said about a man, tell him. This line of missionary work does not take any of your time from your legitimate business.—Atchison Globe.

The Subject He Liked Best.

"You talk well on the subject in which you are most interested," said the impertinent girl.

"And what is that?" said the man, smelling a compliment.

"Yourself," said the impertinent girl demurely.

The Raindrop.

The falling of a drop of rain is a commonplace, everyday matter, but a flash of lightning—ah, that is something out of the ordinary, something to wonder at, so most men think. The humble physicist plodding on the trail of these manifestations of physical energy thinks otherwise. To him the drop of water falling gently is much more of a mystery than the sudden rupture of the air gap and the headlong rush of electrical energy in a disruptive discharge.

Although rain has fallen since the dawn of creation, man knows very little about the origin, the structure of the raindrop. The reason for this is that the simple looking drop of rain is in reality a marvelous microcosm. Some day when the mechanism of a drop of rain shall be made plain it will be found that the universe itself is not more wonderfully held together.

The size of the drop is not the obstacle in the way of a clearer knowledge of the drop structure, for the average diameter of raindrops is not far from one millimeter, and men of science have to deal with quantities infinitely smaller.—Sunset Magazine.

The Limit Reached.

The prisoner, a faded, battered specimen of mankind, on whose haggard face, deeply lined with the marks of dissipation, there still lingered faint reminders of better days long past, stood dejectedly before the judge.

"Where are you from?" asked the magistrate.

"From Boston," answered the accused man.

"Indeed," said the judge—"indeed yours is a sad fall, and yet you don't seem to thoroughly realize how low you have sunk."

The man started as if struck. "Your honor does me an injustice," he said bitterly. "The disgrace of arrest for drunkenness, the mortification of being thrust into the noisome dungeon, the publicity and humiliation of trial in a crowded and dingy court room I can bear, but to be sentenced by a police magistrate who splits his infinitives—that is indeed the last blow."—New York Times.

Sweet Scotch Voices.

For real beauty of speech many experts think that we must go to the glens that surround the highland capital. Sir Morell Mackenzie used to say that the prettiest speakers were to be found in the Badenoch district of Inverness-shire. A wider knowledge would probably have induced him to modify his views and give the palm to the glen folk of the north and west of Inverness-shire. The voices of the highlanders are set low, and yet the articulation is clear, distinct and dramatic. One inclines to liken their speech to many beautiful things—to the clear, mellow note of a bell or the murmur of running water. The inflection of the voice is singularly engaging, rising and falling with exquisite cadences like bewitching music, and this, be it remembered, is the speech of the common people.

A Nation of Smokers.

Notwithstanding all one hears about the growth of the cigarette habit in this country, England occupies a comparatively lowly place as a smoking nation, says the London Tatler. Statistics prove that as smokers Dutchmen are well ahead of all the other nations. Germans come second, although, man for man, they consume less than half as much tobacco as Dutchmen. Three times as many cigarettes are consumed annually in England as in either Germany or Holland, but as consumers of pipe tobacco both these countries are far ahead of us.

A Sap Sucking Squirrel.

A correspondent of Forest and Stream tells of a curious sight he saw in the woods near Liberty, Me. It was a little red squirrel which was having the best of times gnawing through the outer bark of young sugar maples and sucking the sap. He was so intent upon his business that he did not stir when the spectator passed by, but kept on satisfying his sweet tooth.

The Dogs of the Red Men.

When Columbus discovered America, he found that the Indians possessed dogs. They were direct descendants of the wild coyotes of the plains. You can find a beautifully mounted group of coyotes in a glass case at the National museum, a male, female and young one. Their resemblance to certain domesticated dogs is very striking.

Wasted Time.

"You want that book bound, sir? Yes, sir. It will cost 3 marks. But there are pictures in it. That will make it 5 marks, sir."

"But why is it more with pictures?"

"Oh, you see, sir, my helper will waste so much time looking at them!"—Fliegende Blatter.

Great hearts are full of sympathy, and what man does not need the sympathy and support of his fellow men?—Schoolmaster.

Prof. Charles Wild, the gifted Scotch artist, gave an illustrated lecture on "Old Scotland" in the auditorium of the Y. M. C. A. building on Sunday afternoon at 4 o'clock. Prof. Wild has appeared in the Y. M. C. A. Star Course and at various other times at the Association building in Plainfield. All men are invited to attend the meeting.

Decoration Day Jaunts

Memorial Day seems to be the ideal day for launching the excursion season, and with the fine weather which usually prevails one is only too glad for the opportunity for a day's enjoyment. Perhaps no one resort is more eagerly chosen than Mauch Chunk, than which there is no more charming resort in this section. To reach Mauch Chunk, there is a delightful railroad journey through the hills of New Jersey and the mountains of Pennsylvania, and when Mauch Chunk is reached there is a burst of glorious scenic beauty. Then the Switchback railroad trip of 14 miles over a gravity road o'er mountain and through dale is a treat once experienced never forgotten, and another side trip into the mountdepths of Glen Onoko where are cascades, caverns and like attractions. On Decoration Day the New Jersey Central is going to run an excursion to Mauch Chunk, the round trip to cost $1.50 children 75 cent, and a fast special express train will leave Plainfield at 9.22 a. m. and arriving at Mauch Chunk at about noon; and as the return trip does not leave the mountain city until 5.40, there will be ample time for a good time. Ask nearest ticket agent for circular.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send free of charge a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address,

Rev. EDWARD A WILSON, Brooklyn, N. Y.

SMALL ACCOUNTS

Accounts of $5.00 or more will be received in our Special Department. On such accounts 3 per cent interest will be paid on all sums deposited for a term of three months. This term begins on the first of every month and interest is compounded semi-annually

Accounts may be opened and your banking may be done entirely by mail. Inquiries invited.

Capital - $100,000
Deposits - 500,000

The Plainfield Trust Company

The Crescent Furniture Company

has opened

A First-Class House Furnishing Goods Store

at 23 SOMERSET ST, PLAINFIELD,

(near Front Street)

Everything for furnishing a house for comfort, ease, and appearance, sold on Monthly or Weekly Payments. Discount for Cash. Orders by mail promptly attended to.

Pianos, Phonographs and Records a Specialty.

SPECIAL ANNOUNCEMENT.

As an inducement to Cash Purchasers for the next 20 days we shall give Absolutely FREE your choice of a handsome present:

A HANDSOME AXMINSTER RUG
with every purchase of $5.00 or over.

A HANDSOME HASSOCK
with every purchase of $10.00 or over.

A HANDSOME AXMINSTER RUG, (16 x 34)
with a $10.00 purchase.

All goods delivered free of charge.

ALEX. THORN

35 and 37 Somerset street.

NOTICE.—Decoration Day, Saturday, May 30, will Close at noon.

Not the CHEAPEST place in PLAINFIELD for Groceries, Meats, Vegetable,

Butter, Bread, and

Other household provender,

But the VERY BEST GOODS that can be purchased, at as low prices as consistent with quality.

A specialty of vegetables and fruits.

North Plainfield Weekly Review.

VOL. 4—NO. 11. NORTH PLAINFIELD, N. J., SATURDAY, JUNE 6, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

The baby camp on the mountain will open June 20.

The house on Westervelt avenue recently built for A. V. Searing, Jr., is now ready for occupancy.

The regular meeting of the Board of Freeholders of Somerset county will be held next Tuesday.

Twelve free concerts will be given this summer by Benjamin LaVere provided the necessary sum is subscribed.

William L. Newmiller, of Vine street, this borough was killed in a railroad collision Thursday at Stillwell, Kansas.

An entertainment for the benefit of the choir of Holy Cross Church will be held Tuesday evening in the parish house.

W. C. Smith, of Grandview avenue is building the foundation for a residence corner Fairview and Watchung avenues.

Mr. and Mrs. A. C. LaBoyteaux, of Fairview Avenue, have returned home after an extended trip through the middle West.

F. A. Grant, of 152 Westervelt avenue, this borough, accompanied by his wife, left here Monday afternoon for an extended vacation.

The funeral of Charles Blume was held at his late home, this borough, Thursday evening and interment made in Hillside Cemetery the next morning.

Members of Crescent Company, Uniformed Rank, Knights of Pythias, will decorate the grave of Harvey L. Paterson at Port Chester, N. Y. tomorrow.

The funeral of George Demlar, who died last Friday, was held Monday afternoon. Rev. Dr. D. J. Yerkes and Rev. Dr. W. C. Snodgrass officiated.

Charles Kellar, first assistant of the West End Hose Company, was presented with a gold badge Monday night as a token of appreciation of his services.

Rt. Rev. Dr. John Scarborough, bishop of New Jersey will preach in the Church of the Holy Cross tomorrow and will also confirm a number of candidates.

The Alumni Association of the North Plainfield High School will give a reception to the Class of '03 at the Park Avenue Hotel, Friday evening, June 19.

Mr. and Mrs. Harry G. Garrett, of New York City will spend the summer at 152 Westervelt avenue this borough, the residence of Mrs. Garrett's sister, Mrs. F. A. Grant.

Miss Carrie Jeter, and James Carter, of Plainfield were wedded at the home of the bride's sister, Mrs. Martha Probasco, of West Third street, Wednesday evening.

Agitation and petition on the part of Plainfield citizens resulted in compelling the Common Council to have the streets sprinkled and to include it as a part of municipal work.

Miss Jennie Bird, of Somerset place, this borough and Elmer Walker, of Plainfield, were wedded Wednesday evening at the home of the bride's mother, by Rev. J. O. McKelvey.

Rev. Dr. L. H. Hough, of Arcola, N. J. will occupy the pulpit of Grace M. E. Church during the absence of the pastor. Edwin L. Earp, who is attending commencement exercises at Syracuse University.

The marriage of Miss Ada C. Nash and Albert L. Wilson took place Wednesday evening at the home of the bride's parents, Mr. and Mrs. V. W. Nash, of Prospect Avenue, Plainfield. Rev. Dr. Snodgrass officiated.

Miss May R. Clawson and George H. Smith were married at the home of the bride's parents, Mr. and Mrs Jonathan Clawson, Brook Avenue, this borough, Wednesday afternoon, by Rev. Dr. Yerkes. Many handsome gifts of money and solid silver were received.

The funeral services of Mrs. J. Linn Halsall were held at the home of her parents, Mr. and Mrs. S. T. Williams, of Sudford avenue, Tuesday afternoon, by Dr. W. C. Snodgrass, assisted by Rev. C. E. Herring officiated. The remains were temporarily placed in the receiving vault at Hillside Cemetery.

After keeping his marriage a secret since September, Vernon Waters, has announced that he is the husband of Miss Bessie Ross, a young girl living near Bound Brook. The couple were married by an Episcopal clergyman in Cranford and immediately after the ceremony separated, she returning to her home in Bound Brook and he coming to his home. The bride is a daugther of a wealthy farmer, while the groom is a son of Mr. and Mrs. Erwin W. Waters, of East Third street.

Esther, the beautiful queen, a sacred cantata, will be given on Thursday June 11th, 8 p. m., at Vincent Chapel, under the auspices of the Young Men's Brotherhood of the First M. E. Church. Diagram to be seen and seats on sale at L. W. Randolph's drug store, 143 West Front street.

Shooting was Accidental.

Coroner Fisher, of Somerset county, held an inquest Wednesday at Boyce's Hotel, this borough, for the purpose of placing the responsibility for the death of little Theresa Watson, who was shot by Willie James two weeks ago. The jury was out only a few moments and brought in a verdict of accidental shooting caused by gross carelessness on the part of Willie James.

The boy was again taken to Somerville and placed in jail where he will be kept until Judge Schenck takes action in the matter.

Death of Mrs. Isaiah Corriel.

Mrs. Isaiah Corriel, over whose husband's estate there has been much litigation in the courts of Somerset county, died at her home near Warrenville Monday. Funeral services were held in the Mt. Horeb Methodist Episcopal Church Wednesday.

Newark Advertiser Now Republican.

The Newark Advertiser passed under the control of William B. Kinney last Monday, and will be run as a Republican paper independent in local affairs. Mr. Kinney is the son-in-law of Governor Murphy.

Grand Avenue Bridge.

The Bridge Committees of Somerset and Union counties met here last Tuesday relative to bids for the Grand avenue bridge.

Owing to a clause in one of the bids being more or less obscure it was decided to throw them all out and readvertise it.

Veterans Observed Memorial Day.

Memorial Day, last Saturday, was observed in the morning by the decorating of the graves of the brave soldier heroes who have passed on, by the comrades they left behind. About sixty veterans were in line of march, escorted by Company K, the Raritan Brass Band and five bicycle policemen. The different places visited were: Scotch Plains, North Plainfield, Baptist and Methodist grave yards. The graveyards were decorated the day before by a detail under W. C. Smith.

In the afternoon the veterans held patriotic exercises in Reform Hall which was prettily and appropriately decorated.

Past Commander L. V. F. Randolph was the speaker of the occasion. A chorus of forty children, decorated with red, white and blue sashes made a very pretty picture.

After the conclusion of the exercises, the members of the Women's Relief Corps served the veterans with cake and ice cream.

State Letter Carriers' Convention.

The fifth annual convention of the New Jersey State Letter Carriers' Association was held in Mechanics' Hall, Broad street, Elizabeth last Saturday afternoon. Delegates were present from Newark, Jersey City, Passaic, Elizabeth, Hoboken, Paterson, Bayonne, Morristown, Rutherford, Bloomfield, Montclair, Plainfield, Hackensack, New Brunswick, Orange, Rahway, Red Bank, Long Branch, South Orange, Madison, Cranford, Somerville, Arlington and Dover.

The convention was presided over by President A. Flynn and lasted from 3.15 until 8 o'clock.

The delegates were warmly welcomed by the Mayor of Elizabeth, P. J. Ryan.

The election of officers resulted as follows: President, Nicholas A. Flynn, Elizabeth; first vice president, Harry W. Crane, Cranford; second vice president, Joseph M. Brennan, Orange; secretary, Morgan J. Davey, Rutherford; sergeant-at-arms, Thomas P. Sheridan, Elizabeth; delegate to national convention, Fred J. Schmidt.

J. W. A. Bauersachs, of this borough represented Plainfield branch No. 396.

Golf at Park Links Last Saturday.

Golf players were at the Park links both morning and afternoon last Saturday. The scores for the afternoon resulted as follows:

Joseph H. Howell	99	22	77
Rev. C. L. Goodrich	100	20	80
H. S. Rogers	97	16	81
R. E. Hallock	111	29	82
Samuel Townsend	103	20	83
J. O. McKelvey	98	15	83
T. U. Dudley, Jr.	96	12	84
William A. Townsend	98	13	85
Charles B. Morse	101	16	85
Leslie W. Hallock	102	17	85
Charles L. Nichols	110	25	85
Arthur Peck	101	15	86
M. T. Townsend	86 plus 2		88
D. A. Anderson	106	16	90
C. W. McCutchen	112	21	91
E. M. Honeyman	113	22	91

Herbert S. Rogers won the driving contest with three drives averaging 208 yards, 1 foot. Charles A. Reed was second and R. E. Hallock third. The approaching and putting contest was won by Miss Sadie Mae Howell and William R. Faber.

AGAIN THAT DRAIN.

But Now the End is Near and all is Well.

With the single exception of the question of annexation, nothing has occurred in North Plainfield to rival the interest displayed in two drain pipes located in the fashionable west side of the borough.

Much has been said and written in regard to the matter, and practically it is now settled, and in a few days the drains will be no more.

Years ago the two drains were laid, long before it was ever thought that the section would be built up with the finest residences in the borough. One of the drains was connected with a house on Rockview Terrace, which had its outlet on land now owned by E. S. Hooley.

The other drain was constructed to drain the streets, and has its outlet on land owned by Charles W. McCutchen.

The first named drain was by the Board of Health disconnected and put out of use long ago, but as several springs abound in the neighborhood, one of which found its way into this old drain, some of the residents near by concluded that some one was using the drain for sewage purposes.

Under the direction of the Board of Health a large portion of this drain was dug up and the pipes removed. No traces whatever of sewage was found in the drain, the remaining portion was sealed up with cement so that no possible future complaint could be made.

About the same time it was claimed that solids were also coming from the street drain. Complaints were made to the Board of Health and a thorough investigation was made by that body, but nothing was found to substantiate the charge that sewage was flowing from the pipes. The particulars of the investigations which were made by the Board appeared in the REVIEW and it is not necessary to repeat them. At the same time it is desired to correct a slight error, which crept into last week's article but which has no bearing on the general result. We refer to the statement made that the drain was several hundred yards away from Mr. Saunders' house. It should have been feet instead of yards.

For a long time this street drain has been considered unsafe and has been the cause of considerable bitterness between neighbors. Rev. W. E. Honeyman, as Secretary of the Board of Health, has for many years realized the necessity of removing this drain and has felt that it should be done—not because it has actually caused any harm, but on general principles and for fear that in case of typhoid or an epidemic of contagious disease it might prove harmful in case some one should secretly connect with it.

As it meant considerable expense to construct another drain, and as the Board of Health could not take extreme steps under the circumstances, nothing was done until this last complaint was made, when the Board made an examination and consulted the State Board of Health and secured legal advice. This was done almost immediately on receipt of the complaint, and the outcome was that at the first regular meeting of the Board held last Monday evening, the secretary was directed to call the attention of the Mayor and Common Council to the complaints made on the condition of the effluent from the storm sewer leading from the corner of Mercer and Sycamore avenues to Stony Brook, and to request them to abate the nuisance; also to request them to cut out the portion of the sewer between Sycamore and Rockview avenues so that all possibility of seepage from the cesspools in this thickly settled portion be obviated. Also that the Board had already informally called the attention of the Mayor to this subject, and understood that he had the matter in hand.

The Board also sent the following to Mr. Saunders in reply to his complaint:

MR. WM. L. SAUNDERS.

DEAR SIR:

The Board of Health at its meeting last night instructed me to acknowledge your letter of May 19th. The borough authorities have agreed to take such action as will remedy all discovered evils as speedily as possible.

Very truly yours,

W. E. HONEYMAN,
Secretary.

June 2 1903.

There has been no delay, and no friction whatever between the Borough officials and the Board of Health in regard to the matter. The Secretary and the President of the Board personally saw Mayor Smalley and he stated that he would begin work at once by constructing a storm sewer which would carry the water off in another direction so that it would empty into Greenbrook. He did so by immediately ordering drain pipes which are expected here next week, and also had surveys and plans made.

An interview was had with several members of the Board of Health and the question was put to them if they believed there are any cess pool connections with this street drain. They were unanimous in the belief that there are no direct connections, and they gave the following reasons for their belief:

1. We have carefully examined all cess pools along this sewer and cannot find any connections. In many the level of the water in the cess pool is lower than the drain.

2. The high character of the citizens along Mercer avenue precludes the idea of connection. They are above suspicion.

3. We found on the first examination that the surface of the water in the Rockview catch-basins was several inches below the bottom of the outlet pipe. Had there been any matter flowing into these basins from Mercer avenue the water would have been above the bottom of these outlet pipes.

4. We flushed this drain three times and had a number of witnesses present, and all said that neither solid nor cesspool matter came out of the mouth of the drain.

5. We took the worst specimen of the effluent we could, carefully sealed in the presence of seven witnesses, to the State Board of Health at Trenton, and they said it was simply "dirty water."

6. Street Commissioner Emmons took up this pipe a few years ago some distance above Rockview avenue, and told us he found in it only leaves and dirt—no cesspool matter whatever and Mayor Smalley confirmed his statement. It is not at all likely that there have been any connections made since.

7. A number of persons have said that the only odor they found at the drain's mouth came from stale water, and that there was evidently a small spring a little way up which caused the flow, as the water was too cold and too pure to be from a cesspool.

8. The same smell that is at times found at the mouth of the drain may be found at the catch basin near the City National Bank, and at other catch basins, where no cesspool connection is possible.

9. The standpipe of the Water Company on Watchung Mountain two years ago sent forth water that had five times the color given out by this drain pipe, and yet it was entirely free from cesspool matter. It simply "spoiled" through stagnation. Much more will the stagnant water in the catch basins, full of horse droppings and street waste "spoil" and smell.

10. For over a week there has nothing run out of this drain. If there were connections there would be a flow.

11. The mouth of the drain does not have greasy matter, sludge, and filth in it such as is always found where there is a cesspool flow.

12. On Monday last we carefully watched the outlet of this drain almost until noon to see if any wash water came out of it and not a drop was discovered. Had there been any connection, wash day would have revealed it.

Other reasons might be given but these are sufficient.

The Board believes that every time the sewer is flushed or there comes a rain there is a smell near Mr. Brooks' house, but this is caused by the fall of water stirring up the muck near there and not because of cesspool matter from Mercer avenue.

West Point Excursion.

The New Jersey Central will run an excursion up the Hudson to West Point June 6th, on the Steamer St. Johns. The scenery throughout the trip is grand and an outing at this time of the year will be delightful as well as beneficial.

After leaving the commercial section of the river you see Grant's Tomb, Riverside Drive and the Palisades, while further along there is Anthony's Nose, the Crow's Nest and West Point.

The visit to the grounds and buildings of the Military Academy at West Point is both interesting and instructive as this is the place our Generals are trained and whom the safety of our beloved country often depends. This will be a first-class family excursion, no intoxicating liquors being offered for sale on the Steamer.

There will be music on the steamer and the restaurant will be in charge of a first-class caterer. The train leaves Plainfield station at 8:02 a. m. Round trip tickets $1.00. Don't forget this trip.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD.

James G. Mair et ux to Thomas Mair et al. $75.

Literary Note.

"Book News" for June has the same look of prosperous fatness that characterized May. The falling off of the season has not yet begun to tell upon its pages, the present aim being to supply any deficiencies in book reviews by substitutions of an interesting and miscellaneous literary order.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

Joseph Nelson, of Clayton, who is past eighty years of age, has learned to master the bicycle and is now one of the most enthusiastic riders in that borough.

According to a bulletin issued by the State Agricultural Experimental Station, at New Brunswick, the dry spell through which the farmers have been passing, the past seven weeks, has been the longest drought recorded in forty-one years.

The regular meeting of the State board of medical examiners of New Jersey for the examination of candidates for a State medical license will be held at Trenton, Tuesday and Wednesday, June 16 and 17.

Robins have built their nest on the trolley bridge near Kinkora, forty-five feet above the railroad tracks which run below. The step of the trolley cars nearly touch the nest in passing, but the mother bird sits on the nest as they whiz over her head, quite undisturbed by the bustle and noise.

For the first time in the history of Mercer county, and possibly of the State and nation, and maybe of the world, court was halted by a baseball game Thursday afternoon when the lawyers and doctors of the city played their famous charity game. Only one session of the court was held.

Trolley agitation is again being heard by residents of New Market and Piscataway. People living in the former village are very anxious to become connected with Plainfield by an electric road. The people who live in the outlying districts around New Market are also anxious to have such an avenue opened up to Plainfield.

Governor Murphy has promised to attend the 125th anniversary celebration of the battle of Monmouth to be held in Freehold on June 27. He will be accompanied by the Second Regiment of Trenton, under command of Colonel Collins, the Red Bank troop of cavalry and Battery B, of Camden, all to act as a special escort to the Governor, as commander-in-chief.

Thousands of Italian berry pickers have been shipped during this and last week to East Camden county. After the strawberry crop has been picked they will start in on the black and other berries, which grow in the sandy soil of the lower part of the State. Several of the families remain in the fields until the middle of fall, devoting their time to the picking of peas, tomatoes and other Jersey truck.

Heavy frost last Monday morning added to the unusual weather conditions which have harassed the farmers and fruit grower of Burlington county for the past two months. Considerable damage was done to strawberries and other crops. The cranberry bogs were also affected. The frost seemed to be the heaviest in the vicinity of Columbus and through the central part of the county.

The shad season at the Washington Park fishery closed Saturday after one of the poorest and shortest on record at that fishery. The season does not generally close until June 10, but the weather the last ten days and the poor run of shad so discouraged Captain Rice that after making the high water haul Saturday he ordered the fishermen to the fish cabin to prepare to put away the two-mile seine and to wind up the season's work.

William Dill, an aeronaut of Gloucester City, whose professional name is William Jewell, had a thrilling experience on Saturday. After ascending to the height of 1,500 feet he cut loose from his balloon, but one of the ropes of his parachute became tangled. The parachute refused to open, and while descending at lightning speed Dill, with wonderful courage, pulled himself up and disentangled the rope. The parachute opened about 500 feet above the ground. He made a safe landing.

The American Museum of Natural History in New York has what is believed to be the largest whale ever exhibited on land. It is a female finback sixty-eight and a half feet in length. It is estimated that at least fifty men could be inclosed within the interior of this gigantic animal. The full grown right whale, which is the species usually hunted for its blubber and whalebone, average from forty-five to fifty feet only in length. The whale whose skeleton is to adorn the museum was washed ashore dead near Forked river, New Jersey, last November.

A monkey belonging to the menagerie of Sun Brothers' circus, which gave a performance in Morristown last Saturday got away from its keeper and climbed into an elm tree in the circus grounds and refused to be captured. At first the men connected with the show thought the animal would come down with a little coaxing, but it would not. Then they climbed the tree after it, but the monkey eluded them. Finally they began pelting it with stones, but the little fellow sat erect and dodged the missiles. At last the management offered a reward of $10 for its capture. Several vain attempts were made in that direction, but when the circus left town the monkey was still on the limb of the elm tree.

By the merest accident the grave of a Revolutionary hero was discovered in an unused cemetery in Hudson street, Hackensack, on Saturday, and when the Grand Army veterans heard of it they sent a detail to the grave and caused a flag to be placed upon it. The headstone bears the following inscription: "In memory of Henry Berdan, who died on March 25, 1849, aged ninety-seven years and seven months and twenty-four days. A faithful soldier of the Revolution and a good soldier of Jesus Christ." The grave was found by Everardus Warner, Jr., and Charles P. Adams, who will notify the local historical society.

Trustees of St. Paul's Methodist Church Trenton are considering the advisability of erecting an annex to be used nursery for babies, in order that the mothers in the congregation may be able to attend services. The pastor, Rev. George S. Messroll, says he does not mind crying babies in the church, but the mothers are not so deaf to the criticism of spinsters and bachelors who attend. Members of the Epworth League have volunteered to take turns at nursing if the baby parlor is built.

NEWS FROM WATCHUNG.

Mrs. John H. Koch has been spending a week at Middletown, New York.

North Plainfield Township prides itself in having the best ungraded schools in the county.

Mr. [illegible] has returned home. Mrs. [illegible] Watching.

Mrs. John Shank, who has been under treatment at the Muhlenberg Hospital, has returned home.

Through the efforts of Postmaster Schmidt, Watchung has now two mails a day; one at 9:30 a. m. and another at 5:30 p. m.

Mr. and Mrs. William Springmeyer, and Master Springmeyer, of New Rochelle, N. Y., have been visiting Rev. Dr. Charles Moldenke at their handsome residence, "Villa Elsinore."

The Board of Education held its regular monthly meeting, May 29. Mrs. S. S. Higgins was re-engaged for principal, Miss Ada G. Higgins for teacher of the primary department and Miss Clara Bideman for the school at Greebrook.

Roll of Honor for May. Primary Grade—Lillie May Ralph, Tiny Texier, Elsie Schmidt, Helen Schmidt, Minnie Blume, Eleanor Hatch, Charlie Wersing, Eddie Wersing, Clarence Schmidt, Freddie Wessell, Roy Herrmann, Willie Hatch, Royal Hatch. Grammar Grade—Theresa Schmidt, Bertha Wyckoff, Willie Demler, Douglas Demler.

George Demler, Jr., passed away Friday evening of last week after a long and painful illness. Funeral services were held at the house Monday afternoon. Revs. Dr. Yerkes and Snodgrass officiating. Interment was made at Hillside. Floral tributes were many. Mr. Demler leaves a widow and one daughter. He was a brother-in-law of Charles Blume, who died in San Francisco on Thursday of last week.

Under the auspices of the Ladies Aid Society of St. Peter's Lutheran Church, of North Plainfield, a strawberry and ice cream festival was held Wednesday evening. An interesting program consisting of popular selections read by Dr. Richard Moldenke, Miss Sedentop, Miss Sabylusky followed with several duets by the Misses Kelm, solos by Postmaster Schmidt and instrumental selections on violin and organ helped to make the occasion a most enjoyable one.

WARRENVILLE.

George Giddis, a veteran of the Spanish-American War, prides himself on raising the largest strawberries of any one in this place. Eight of them fills a quart. He takes them to Plainfield, where he finds a ready market at twenty-five cents per quart.

Peter Newmiller, a highly respectable citizen, and for many years assessor of Warren township, had a stroke of paralysis last Saturday.

Gray Hair

"I have used Ayer's Hair Vigor for over thirty years. It has kept my scalp free from dandruff and has prevented my hair from turning gray."—Mrs. F. A. Soule, Billings, Mont.

There is this peculiar thing about Ayer's Hair Vigor—it is a hair food, not a dye. Your hair does not suddenly turn black, look dead and lifeless. But gradually the old color comes back,—all the rich, dark color it used to have. The hair stops falling, too.

$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

Forces That Lead to Fame and Fortune.

There are several forces which help to continue civilization. Among them are the family, the church, the government, literature, commerce and personality. The family represents love; the church represents religion; the government represents authority; business represents force; literature represents truth, and personality represents inspiration. Love, religion, authority, truth, force, inspiration are mightiest forces constituting civilization and promoting its progress.—Eugene Phillbin, of New York, in the Atlanta Constitution.

A Traveling Bridge.

An electric traveling suspension bridge is to be constructed across Langston Harbor to connect Hayling Island with Portsmouth. The car, fifty feet long and thirty feet wide, will run on steel girders from side to side. It will carry sixty tons, and 5000 troops could be conveyed in an hour.—Tit-Bits.

A woman never faints unless there is a man around to catch her.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa

A woman is never so skeptical as not to believe a man when he tells her he loves her.

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder. It makes tight or new shoes easy. Cures swollen, hot, sweating, aching feet, ingrowing nails, corns and bunions. At all druggists and shoe stores, 25c. Don't accept any substitute. Trial package FREE by mail. Address, Allen S. Olmsted, LeRoy, N.Y.

Windmills in Germany are now used to produce power to drive electric motors.

"The Klean, Kool Kitchen Kind" of stoves make no smoke, smell, soot, ashes or excessive heat. Always look for trade mark.

Fully 2500 persons commit suicide in Russia every yea.

The valley of the Amazon still remains almost unexplored.

Carpets can be colored on the floor with PUTNAM FADELESS DYES.

Flattery is a tool that will pry open almost any woman's heart.

A Fifty-Million Luck Story.

The creation of the fortune of the late Benjamin F. Jones, estimated in his home city of Pittsburg at $50,000,000, was one of those odd events that are wholly unavailable in support of the contention that pure luck or chance plays no considerable part in human affairs.

Jones owned a small forging shop thirty years ago, and had no apparent prospects of entering millionairedom. One day an employee, a careless fellow, let a pair of cold tongs slip from his hands and they fell between the rollers. Examination of the tongs when they were recovered disclosed the fact that the metal in them had been accidentally made into an exceptionally high-grade quality of steel. He then secured a patent and eventually became a millionaire.—New York World.

What the Census Revealed.

The recent censuses of Scotland and Ireland show them to be almost equal in population, each having but a few more people than the State of Ohio.

Germany has now 32,000 miles of steam railway. N. Y.—23

Health and beauty are the glories of perfect womanhood. Women who suffer constantly with weakness peculiar to their sex cannot retain their beauty. Preservation of pretty features and rounded form is a duty women owe to themselves.

When women are troubled with irregular, suppressed or painful menstruation, weakness, leucorrhœa, displacement or ulceration of the womb, that bearing down feeling, inflammation of the ovaries, backache, bloating (or flatulence), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excitability, irritability, nervousness, sleeplessness, melancholy, "all gone" and "want-to-be-left-alone" feelings, blues, and hopelessness, they should remember there is one tried and true remedy. **Lydia E. Pinkham's Vegetable Compound** removes such troubles.

Case of this Prominent Chicago Woman Should Give Everyone Confidence in Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—It affords me great pleasure, indeed, to add my testimonial to the great number who are today praising **Lydia E. Pinkham's Vegetable Compound.** Three years ago I broke down from excessive physical and mental strain. I was unable to secure proper rest, also lost my appetite, and I became so **nervous and irritable** too that my friends trembled, and I was unable to attend to my work. Our physician prescribed for me, but as I did not seem to improve, I was advised to go away. I could neither spare the time nor money, and was very much worried when, fortunately, one of my club friends called. She told me how she had been **cured of ovarian troubles,** and how like my symptoms were to hers, seven bottles of your medicine cured her, and she insisted that I take some.

"I did so, and am glad that I followed her advice. Within **six** weeks I was a different woman, strong and robust in health, and have been so ever since.

"A number of my friends who have been troubled with ailments peculiar to our sex have taken your compound, and have also been greatly benefited." — MISS ELIZABETH DALEY, 870 Loomis St., Chicago, Ill. President of the St. Ruth's Court, Order of Foresters, Catholic.

What is left for the women of America, after reading such letters as we publish, but to believe. Don't some of you who are sick and miserable feel how wicked you are to remain so, making life a burden for yourself and your friends, when a cure is easily and inexpensively obtained? Don't you think it would pay to drop some of your old prejudices and "Try **Lydia E. Pinkham's Vegetable Compound,** which is better than all the doctors for cures?" Surely the experience of hundreds of thousands of women, whom the Compound has cured, should convince all women.

Follow the record of this medicine, and remember that these cures of thousands of women whose letters are constantly printed in this paper were not brought about by "something else," but by **Lydia E. Pinkham's Vegetable Compound,** the great Woman's Remedy for Woman's Ills.

Those women who refuse to accept anything else are rewarded a hundred thousand times, for they get what they want—a cure. Moral—stick to the medicine that you **know** is the Best. Write to Mrs. Pinkham for advice.

$5000 FORFEIT if we cannot forthwith produce the original letter and signature of above testimonial, which will prove its absolute genuineness.
Lydia E. Pinkham Medicine Co., Lynn, Mass.

BIG FLOOD HAVOC

Scores of Lives and Millions of Dollars in Property Lost in Western Cities.

FEAR DISEASE AND FAMINE

20,000 Persons Are Homeless at Kansas City---Relief Work Going Forward Rapidly at Topeka.

Fifty deaths in Kansas City and thirty-four deaths in Topeka was the record of the disastrous floods in Kansas after careful revision. It was thought, however, that the death list might be increased when all the afflicted districts had been able to approximate their losses. The Kansas River was subsiding. As the waters abated the danger of contagious disease increased. Diphtheria and scarlet fever appeared, and the doctors were unable to reach the sufferers to any extent. Hundreds of cases of measles have appeared among the children and will result fatally in many instances owing to the exposed condition of the patients.

It is expected that North Topeka will not be habitable for months after the waters go down. Trains will carry the sufferers to places higher up along the track as soon as they can be run.

Food is scarce and all those penned up in houses are suffering for drinking water. From 15,000 to 20,000 persons are homeless.

Relief is pouring in to the stricken cities, other cities responding to the call quickly.

The loss to property will aggregate many millions. Hundreds of buildings have been destroyed, and thousands of acres of growing crops have been ruined.

The States affected are Missouri, Kansas, Nebraska and Iowa, and also Oklahoma and Indian Territory.

Kansas City, Mo.—The first authentic information from Kansas City, Kan., showed that 20,000 people are homeless in that district. Many have been drowned, but the number cannot be estimated. The property loss has been heavy. The situation is a parallel to the situation here—apparently no better, and no worse.

It is utterly impossible to form any estimate of the number of dead in Kansas City. There have been manifold stories of how boats laden with people have been seen to sink—there have been reports without end of bodies seen floating by on wreckage, of men who have tried to drive wagons laden with household effects against certain death in the swift current and gone down in the flood. The majority of these stories lack proof, however, and even if true the proof may never be had. There is no possible way of getting at the names of the dead, and no chance of forming any estimate that can confidently be termed accurate. It is likely, however, that the number of fatalities in Kansas City, Mo., will approximate fifty.

The financial damage is about as great now as it is likely to become unless the water rises much higher. The great danger is that the foundations of buildings may be undermined. However, the buildings that have withstood the flood all day have an excellent chance of holding out for some time.

There has been no suffering in the city beyond that sustained by the people driven from their homes. Excellent work has been done by the local relief committees, and those in control of the work are confident that the city will be able to care for its own without calling upon other cities of the State.

At night the city is in absolute darkness, save in buildings which have their own electric light plants. Power for the three street car lines that have resumed operation is furnished by water piped from a small stream in one of the valleys. The newspapers have been compelled to discontinue the use of their typesetting machines because of lack of power and are setting type by hand.

There is practically no railway traffic and business all over the city is suspended. Manufacturers on high ground were compelled to shut down owing to the almost total shutting off of the water supply. No street cars are running.

A great, swirling lake, dotted with floating cottages, trees, telegraph poles and other wreckage, covers the lowlands as far as the eye can reach. Similar floating objects came rushing down the Missouri River, some of it possibly from Topeka.

Word was brought to police headquarters that a number of men were looting houses in the east bottoms. They had improvised rafts from boards and by propelling them with poles were making their way into the houses through the second-story windows. Chief of Police Hayes at once ordered a detachment of officers to the place, with strict orders that if the story was found to be true the thieves should be shot down at once.

Mayor Reed has issued a peremptory order for the closing of all saloons in Kansas City. Within an hour the order had been carried into complete effect.

The food supply is rapidly becoming a question of vital importance. There was a run on every retail grocery and meat store in Kansas City. Persons almost overran the supply houses in a panicky rush to buy up enough food to last until the flood shall subside.

Merchants consider the food situation an alarming one. The supply of meat is scarcer than anything else. The coal situation is no less alarming. Prices for many staple articles of food have almost risen to a famine standard.

The major part of the loss will fall on the packing house interests. The inundation is greatest in Kansas City, Kan., but the property loss has been largest on this side of the river.

In Armourdale alone the losses to the packing industry and others is placed conservatively at $2,500,000. Argentine, another suburb, has suffered losses estimated at $500,000.

Armourdale, with a population of 16,000 people, is deserted and its site marked only by the tops of buildings and a number of fires.

Two-thirds of Argentine is under water. More than 4500 people in this suburb are homeless and nearly 3000 are destitute.

All bridges over the Kaw River are down, and the only communication with Armourdale is by boat.

The flooded district covers an area three miles long by four miles wide. The flood forms a semi-circle, reaching south and west from the Union Depot, which is located under high bluffs that mark the dividing line between Kansas City, Mo., proper and what is known as the west bottoms. The principal damage done was at Armourdale and Argentine, Kan., in the packing house district, on the Kansas River, on the extreme southwest border of the circle mentioned.

PERILS OF REFUGEES.

Topeka Physicians Fear a Scourge of Disease.

Topeka, Kan.—The water in the Kansas River is subsiding, and while practically all of North Topeka is still under water the worst of the flood situation is over and the work of rescue is now going forward rapidly. One thousand tents will be erected outside the city for the refugees from North Topeka, and they may have to remain in this camp for several months, as President L. Y. Grubbs, of the Board of Health, says that even after the water recedes the sanitary condition of North Topeka will be such that it cannot be inhabited for several months.

The recession of the flood has enabled the authorities to make a canvass of the damage done, and they report that the belief that nearly 200 had perished in the flood was erroneous. The known dead number thirty-four, and the city authorities do not believe that this number will be largely increased.

The distress of the sufferers is being relieved. Those who are still in North Topeka are being supplied with food and they are in practically no danger unless it be from sickness.

One of the most distressing features of the situation now is the possibility that there will be a spread of contagious diseases. Cases of diphtheria and scarlet fever are reported among the refugees. Hundreds of cases of measles are prevalent among the children, and, on account of the exposed condition of the patients, will result fatally in many cases.

The possibility of an epidemic is now the most serious thing the city must contend with. An emergency Board of Health has been appointed by the Mayor to co-operate with the city physician in quelling the disease which will result from the flood. The board organized, electing Dr. I. Y. Grubbs president.

Provisions of all sorts are becoming scarce in Topeka.

A sad feature of the situation is the tendency of thieves to loot buildings. They go in by rafts and boats away out in the suburbs where the homes are abandoned. The police have orders to shoot such marauders on sight.

It is estimated that the loss in the residence part of North Topeka will reach $500,000, in addition to the loss to the Santa Fe, Rock Island and Union Pacific railways, which will aggregate $200,000. The loss to the Topeka Street Railway Company will perhaps be $75,000. The loss to the business district is believed to be something more than $1,000,000.

President Roosevelt telegraphed to Governor Bailey, offering assistance of the Federal authorities, if needed, as follows:

"Cheyenne, Wyo.—I am inexpressibly shocked at reports of dreadful calamity that has befallen Topeka. If there is anything the Federal authorities can do, of course, let me know.

"THEODORE ROOSEVELT."

Large contributions have already been received for the benefit of the sufferers. The amount given by Topeka citizens alone will aggregate $100,000. To this is to be added an immense quantity of clothing, provisions and general supplies. Outside towns have generously offered aid, notable among which is Galveston, Texas.

The first effective rescue work began soon after daylight when nine boats arrived from Ottawa on a special train, and they were put into active service at once.

Soon after reports of drowning began to come in. A boat containing eight men engaged in rescue work was swept away in the swift current. As far as known all were drowned. A boat containing two men was capsized. The boats were too frail to live in the whirling waters. More boats arrived from Emporia and hurry messages were sent to other towns for more.

It was soon recognized that rowboats would be of no use in battling with the currents. Steam launches must be secured at once, and to this end rush messages were sent to St. Joseph. The launches arrived about 4 o'clock, and were at once loaded with provisions and dispatched to North Topeka. In an hour they returned loaded with refugees, many of whom were unconscious, having spent thirty-six hours in trees or on roofs, without food.

The disaster has developed hundreds of heroes. Men of all conditions of life worked night and day in effecting thrilling rescues. E. L. Bailey and E. M. Alexander performed some of the most heroic work of the night. In the darkness, about 3 o'clock a. m., at the greatest risk of their lives, they succeeded in reaching one of the burning lumber yards and rescued a dozen women and children.

Women and children were given the preference in the work of rescue. As a result there are scores of families on this side of the river to-day with no heads. The women and children were almost frantic in their all-consuming anxiety for the husbands and fathers left on the other side of the swirling flood. In the bulletin windows of the newspapers appeared notices signed by scores of women, asking that information be sent to them of their husbands as soon as their fate was known.

H. J. Henry, a hardware merchant, first sent his father and mother to safety and then undertook to remain and keep their property out of the hands of looters. He managed to escape when the flood came by riding a trusty horse. As far as Mr. Henry knows his stock of hardware had been swept away, with the building and entire establishment.

These are only a few of numerous instances of distress. Hundreds who were rich are now poor, and the poor people are in distress. Many lost absolutely everything. They had the savings of years taken by water. Now they have only the titles to the water-covered land.

IOWA SITUATION BRIGHTER.

Flood is Receding and Refugees Return to Their Homes.

Des Moines, Iowa.—The flood situation in Iowa is improving, and many refugees are able to return to their homes. In the Des Moines valley probably 15,000 still homeless, but all are being well cared for and will soon be able to go back to their flood-damaged dwellings. Provisions and clothes have been contributed in large quantities, and it is believed that there will be no further serious trouble. In this city the ice and milk famine is the most serious feature.

At Ottumwa the situation is more serious than in this city. About 7000 people were driven from their homes in Ottumwa.

The relief authorities announced that they were confronted with a food and fuel famine. Meat markets all over the city declared they had but two or three days' stock on hand. There was no prospect of getting a shipment of freight into Des Moines in less than three or four days. Bakeries were overtaxed by reason of the demand of the 6000 flood refugees through the relief association. The temperature of the past three days was such as to cause great suffering and to threaten great loss of life through exposure.

Then it transpired that there was but a meagre coal supply and that the light and power plant had an insufficient supply. Roads were impassable for team hauling and no coal could be shipped in.

For over two days it rained constantly and the mercury stood close to the freezing point. Scores of men, women and children spent hours at a time in soaking wet garments, sitting on the roofs of their homes awaiting the arrival of rescuers. More fatalities will result from exposure than from drowning. The property loss will amount into the millions. Hundreds are homeless.

War Department Renders Aid.

Washington, D. C.—The War Department will assist to the extent of its power in efforts to alleviate suffering in the flooded districts of the West. Orders to this effect have been given to Major-General J. C. Bates, commanding the Department of the Missouri, with headquarters at Omaha, Neb. The supply department, at Leavenworth, Kan., will be drawn upon for the shipment of tents to the flooded localities should these be found necessary.

BANK TREASURER, DEFAULTER.

Albert O. Mathes, of Dover, N. H., Confesses to Taking $15,000.

Dover, N. H.—The New Hampshire Bank Commissioners issued a statement announcing the discovery of a defalcation amounting to $15,452 from the Stafford Savings Bank, of this city, one of the largest banks in the State, with deposits aggregating $5,800,000. The verification of depositors' pass books, recently ordered by the Commissioners, disclosed the shortage, which the bank officials immediately traced to the treasurer, Albert O. Mathes.

On being questioned by President Brown he admitted that he had appropriated funds from the accounts of ten depositors to the amount of $15,000, because of speculative losses sustained several years ago.

The treasurer lost a leg by falling after alighting from a train a month ago, and his absence from the bank led to the discovery of the shortage. Mathes' condition is critical. The depositors' losses are made good from the bank's surplus.

Kelly Indicted as a Boodler.

At St. Louis, Mo., seven of the seventeen indictments which were returned against Daniel J. Kelly, of New York City, charged him with bribery and with attempted bribery.

A Larger Gold Output.

The Yukon's gold output this season promises to exceed that of last year by from $1,000,000 to $3,000,000.

Panama Canal Treaty Downed.

Trustworthy advices showed that the Panama Canal treaty was doomed to defeat in the Colombian Congress. The Colombians hope by deferring action for two years to obtain the sum allotted to the Panama Canal Company.

Office Created For Wu Ting fang.

An imperial edict issued at Pekin appoints Wu Ting-fang, the former Chinese Minister at Washington, to be a member of the Foreign Office. The appointment practically creates a new office.

Died of Suicidal Wound.

Grant Blodgett, the bookkeeper who shot himself in the Bank of Buffalo, at Buffalo, N. Y., died from his injuries. The shooting was done with suicidal intent, believed to have been prompted by trouble of some kind.

Seven Killed in a Wreck.

A double-header east-bound freight and a west-bound freight on the Southern Railway collided at Bryan, Ala., with the result that both trains caught fire and were burned and seven train hands were killed.

Poison Ivy Killed Him at Eighty-two.

Charles Whitehead, of Duboistown, Pa., aged eighty-two, died of poisoning. While working in the garden he contracted poison from ivy.

Roosevelt's Sixty-Mile Ride.

President Roosevelt took a ride of sixty miles over the "Black Hills trail" from Laramie to Cheyenne, Wyo.

French Budget Without a Deficit.

The French Minister of Finance has succeeded by rigid economy in providing for a budget without a deficit.

MINERS CALL CONVENTION

The Anthracite Workers to Vote on the Strike Question.

REPRESENTATIVES ARE IGNORED

Refused Recognition as Members of the Conciliation Board—The Operators Issue a Statement Defining Their Position — Mitchell Declines to Predict What Will Be the Outcome.

Wilkesbarre, Pa.—After arranging to call a joint convention of the Mine Workers' Union, in Pottsville, on June 15, to determine whether a general suspension of work shall be ordered until the operators agree to recognize District Presidents Nichols, Fahey and Dettry as members of the Conciliation Board, the district boards adjourned.

While this was being decided Messrs. Luther, Warriner and Connell, the operators' members of the Conciliation Board, after several hours' conference over the long distance telephone, agreed to issue a statement. This declares that the sole trouble is due to their decision not to recognize the three district presidents as members of the union. It is on this point that the dispute rests. The operators' statement is:

"Referring to the official announcement of the representatives of the United Mine Workers of America, the contention of the operators' representatives elected to the Board of Conciliation is that the recognition of the United Mine Workers of America was not one of the questions submitted to the commission for decision; that Mr. Mitchell admitted this by appearing before the commission simply as a representative of the anthracite mine workers; that the award of the commission specifically asserted that the recognition of the United Mine Workers of America as at present constituted was inadvisable; that award No. 4, providing for the Board of Conciliation, lays down certain rules for the appointment of members of said board.

"The representatives of the operators have been appointed strictly within the terms of said award, and there is no objection on their part to cordially accepting Messrs. Nichols, Dettry and Fahey as the representatives of the miners, providing they are elected by a majority of the mine workers as specified in the award of the commission.

"The objection is solely against their appearing as the official representatives of the United Mine Workers of America, appointed by an executive committee, without authority for such appointment.

"The operators' representatives feel that it is highly important that the formation of the Board of Conciliation be accepted by both interested parties as strictly in accordance with the award of the commission, in order that its rulings may be received without question and not be open to the criticism of having been made by a board not fully qualified to act."

The fact that the operators thus plainly leave the way open for an amicable meeting with the three district presidents if they are elected by the mine workers, will not in the slightest measure change the action of the boards. The members consider that the district presidents were legally chosen to represent the mine workers on the boards and say that no attention will be paid to the operators' statement, as it is the same thing they said to the district presidents at the conference when they refused to officially recognize them. This attitude they declare, is absurd and they will not submit to any change in their plans dictated by such a cause. Therefore, in support of their position, they issued a statement calling for a convention.

Indianapolis, Ind.—John Mitchell, President of the United Mine Workers, said: "The refusal to recognize these district presidents as members of the Board of Conciliation was in direct violation of the provisions made by the recent strike commission. The operators gave no reason for refusing to recognize these men that had been indorsed by the Executive Board of the miners, and said only that they did not bear the proper credentials. I cannot say what action will be taken if the recognition of these three members of the Board of Conciliation is still refused, and I do not care to say whether or not any other solution than a general suspension of work is feasible."

WHITE WHALES SEEN IN LAKE.

Two of Them Go to Cape Breton—For Mackerel.

Halifax, N. S.—Two large white whales, rare specimens in Atlantic Coast waters, are imprisoned in the Bras d'Or Lakes, Cape Breton. They are supposed to have entered the lakes in pursuit of mackerel schools, which have been plentiful there this spring.

Whales have been sighted at several points during the past few days. One of them ran ashore at Iona and remained aground two hours. In the meantime several rifle shots were fired into it by a couple of men, but apparently had little effect, as the whale leisurely moved off to sea on the rising of the tide. White whales are said to be very valuable, and Cape Breton fishermen are making great efforts to capture one of them and are keeping close watch along the shores of the lakes.

Bulgarian Prisoners Released.

It is officially stated at Constantinople, Turkey, that 400 Bulgarians, who were arrested at Salonica in connection with the outrages there, have been released. Twenty-five were held for trial.

Governor Hanged in Effigy.

Governor Lanham, Judge Talbott, County Attorney Vaughn and District Attorney Hart were hanged in effigy at New Boston, Texas, because of the hanging of Ed Shutt, a prominent white man. Governor Lanham refused to commute Shutt's sentence to life imprisonment. The other officials were conspicuous in the Shutt trial.

$2,400,000 Fire at Naples.

Fire has destroyed the state pawnbroking establishment at Naples, Italy. The damage is estimated at $2,400,000.

A SERMON FOR SUNDAY

AN INTERESTING DISCOURSE BY DR. LYMAN ABBOTT.

Subject: The Secret of Christianity—Not Fine Windows and Music, But Making the World Wiser and Better—A Christian's Duty Summed Up in One Law.

NEW YORK CITY.—At the Church of the Pilgrims, Brooklyn, Dr. Lyman Abbott preached Sunday morning on "The Secret of Christianity." He took for his text Luke ii: 11: "Unto you is born, this day, in the city of David, a Saviour, which is Christ the Lord," and said:

In the Anglo-Saxon version of the New Testament the word "Saviour" is rendered for the Anglo-Saxon word "helper." You know also that the word "Christ" is not a proper name, but a title equivalent to "The Messiah"—the Lord.

Every great movement has at the heart of it some secret, which if we can discover it, will disclose to us the secret of that great movement. What is the secret at the heart of Christianity, which has made it the great power that it is? In asking you to consider this question you will understand, of course, that I am not undertaking in half an hour to answer the entire question; I am only going to try in that half hour to indicate the essence of Christianity—the secret of its vitality. The Jewish people were in more than one sense "a peculiar people." Among other things in this: That their faces were turned toward the future. All other nations look backward for their golden age, but these "peculiar people" looked forward for theirs. They believed that a time was coming when there would be peace instead of war and for themselves prosperity instead of universal poverty. They believed that this great time would come through their own nation and that Jerusalem would become the holy city and the mistress of the world. And their prophets even pointed forward to this divine consolation, and they indicated that it would come through some deliverer. Sometimes they regarded the nation itself as that deliverer; sometimes a succession of prophets; sometimes single prophet; sometimes a single man, as a king or prince, as a teacher, as a priest, as a "Man of Sorrows, and acquainted with grief." However different or incongruous or inconsistent those prophesies might be, they pointed the minds of the people forward to a great delivery and delivered. So the shepherds perfectly well understood the angels when they said: "The deliverer has come; the helper is here. You will find Him cradled in the manger." When Jesus began His ministry His first sermon, of which we have a record, was preached in the synagogue at Nazareth. He went into the synagogue, a roll was open before Him and He read one of the prophecies of the great deliverer who was coming and then said: "This day is this Scripture fulfilled in your ears. I have come. I am that deliverer." Having begun His ministry in the way He went out to be a helper and fed the hungry, taught the ignorant and healed the sick and distressed the gospel of hope. Once John the Baptist, perplexed to know if this was the Messiah, for things went on much the same and no great thing seemed to be accomplished, sent Him a message saying: "Art thou the Messiah?" and Christ said to the messengers, "Wait here, see what you will see, and then go and tell your master." The waited and saw, and then Christ told them: "Go your way and tell John what things ye have seen and heard; how that the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached."

No man can undertake to help his fellow men really sincerely, on a large scale, without coming in contact with men who do not want the help, those who are making something out of the misfortunes of their fellow men. Christ came in contact with such, and they leagued themselves together to destroy Him. He was arrested and brought before the Jewish tribunal and asked, "Are You the Messiah?" And under a solemn oath He said, "I am." Pilate said, "Are You a king?" He said, "I am." To both the Jewish tribunal and the Roman He said, "I am," and for that He was condemned to die and for it He died. When He died the hopes of His disciples dissipated. They said, "We thought He was to be the great deliverer, but evidently He was not." Rumors of His ascension began to circulate, and, little by little they became convinced, and then they said, "Ah, He is the deliverer, after all." If you will turn to the Book of Acts and read one of the sermons there you will see that was the burden of all the apostolic ministry. No new theology, ethic or law. Their messages were all the same: "The deliverer is come; He is here; the deliverance has begun."

In the first century rule was by absolute despotism. Gradually government has been transformed, until now it is completely established, and there is no government in Europe west of Russia that does not at least recognize the fact that government is not for the government, but for the governed. All industry was servile. Half the Roman population were slaves, and the other half were on the edge of famine and only kept alive by the largess of others. Wherever Christianity has gone the chain has dropped from the slave and labor has been emancipated. There were no schools in Rome and none among the Jews, except those connected with the synagogue, but wherever Christianity has gone it has established schools and wealth has been diffused among the people. This is called an age of concentrated wealth. That is not so. There never was an age, and that is especially true of America, when wealth was more distributed. There are charities everywhere. The church has also changed the conception of punishment, so that punishment has become reformatory. The object of the old pagan religion was not to help man; it was to appease the wrath of God or to purchase the favor of a corruptible God. Christianity has altered all that with various degrees of success. The church of Christ is engaged in the work of lifting the burdens of men, in inspiring them with courage and nobler purposes. Christianity is not a mere sum of doctrines, a new method of worship or a new law of morals. It is a great historical movement.

Flowing down through the centuries with ever widening and deepening current, blessing every land it has touched and carrying with it some measure of helpfulness, Christianity has done, through the centuries, what Christ did in those four short years—He helped the helpless, fed the hungry, lifted the ignorant, given courage to the tiring and brought glad tidings to the The secret of Christianity, then, is ulness. This it is that distinguishes eology of the Christian religion from eology of all other religions. It is a ctrine respecting God—not absolute- but still new contrasted with the ings of other religions. Everywhere on the globe men believe in the aid of God and in the power of God. The distinction between the Jewish religion and Paganism was not that one called God Jehovah and the other Baal. It was that one worshiped justice and the other power. The message of the Pagan religion was of an omnipotent power back of the affairs of nature and life. The message of Judaism was that God is a righteous God and demands righteousness of His children. Still we need to understand that God expects righteousness from us, and nothing less will satisfy Him. In later Judaism there came the greater message. No longer God as a powerful, just God, but God as a God who will help you to be righteous. The message of the later prophet was mercy. Mercy, go back to Homer, Confucius, Seneca, Marcus Aurelius; do you find it there? No. Some time ago I made that statement and a professor said to me: "Are you quite sure of that?" I said: "I am not sure, but you are a student of the Orient and I wish you would look it up and tell me if I am wrong." Three weeks after I received a letter, saying: "The only revelation of the mercy of God in the old Hindoo religion is this: 'O, Veruna, art To-day in my country home they are suffering from drought, and yet, if I were to go on the hillside and run a tube down a little way into the ground, I should strike a spring full of water. So God is full of mercy. This is the revelation of the New Testament, and whatever your troubles, sorrows, sins, you can go to Him and find His loving kindness and tender mercy. You don't find that in any other religion. Thou not also merciful?'" Put that alongside "what can separate man from the love of God." The distinct characteristic of Christianity is this mercifulness of God.

A man falls into a pit and cannot get out. Presently Confucian comes along and says, "My dear fellow, I am sorry you have fallen down there. If you could only get out Confucius would show you how to walk so that you would keep out." Then a Brahmin sees him and says, "I am sorry, but there is no help for you; you never can get out. The only chance for you is to fall into an eternal sleep and forget your misery." Next comes a Mohammedan, who says, "I am so sorry to see you there, but Allah is just, and you deserve it. He is not merciful, and you will never get out." Last comes a Christian, who says, "I myself have been down there. I tumbled down there once. I know just how you can get out." And he gets a rope and pulls the man out of the hole and puts his feet upon a rock. That is the difference between the Christian and the pagan religions. The Christian religion is the only religion in the world that offers to help men out of the burden of their sins and the consequences of their misery. But, O, the pity of it, men don't want it. Napoleon said, "Scratch a Russian, and you will find a Tartar." Scratch a Christian and you will find a pagan. It seems to me that Christian congregations are full of paganism. I receive letters every week from men and women who never yet have learned that if they have made a blunder or committed a sin, and perhaps involved others in peril because of their mistake, God can take care of it all, and they can trust Him to help, if only they will turn from their evil ways.

Helpfulness is the secret of Christian theology. So it is the secret of our Christian ritual. It is at the heart of all worship. We come to church, not driven by fear or compelled by custom, and not by conviction. Why? Not to be entertained by an amusing lecture. Then, why? At the heart of it all is this: Some sense of the truth of that message that God is love and that, somehow or other, we are dependent on His love and have had something from His love, and we want to give Him something in return. I do not say that is true of all, but still if it were not for the sense of the love of God and the desire to be thankful the church would close its doors and the chimes cease to ring. What is the Roman Catholic service? First confession and then absolution. The same thing at the Episcopal service, and of the Congregational. We don't go into the confessional, we don't stand up as a priest pronounces an absolution, but D. L. Moody as truly preached absolution as any Catholic priest or Episcopalian rector. If you want to know what men believe, don't go to the creeds or catechism. Go to the hymn books. They express our faith and real experience; they are our creed, sung over and over and over again. And what does the hymn book say?

"Love divine, all love excelling." "Thanks be to God who giveth us the victory."

Imagine, this Sabbath morning, a citizen of Mars coming down and entering different churches. He would go into a Catholic church and see the altar and the candles and the robed priest and the incense, and he would say, "What are you doing here?" The answer would be: "We are here to worship the Lamb who hath redeemed us." In the Episcopal church he would see no candles and incense, and would again ask the question. The answer would be: "We have come to praise the Lord Christ, who hath redeemed us." In the Congregational, Baptist or Presbyterian church he would see no altar or candles or vested priests. "What are you doing here?" he asks, and the reply is: "We have come here to sing the praise of the Man of God who hath redeemed us." And in the Quaker meeting house he would see no choir or preacher or service and hear no singing, but they would all be sitting still doing nothing—absolutely nothing. And their reply to the same question would be: "We are giving our praise to Christ, who hath redeemed us by His blood. We cannot find any utterance which will express our gratitude, and we are simply speaking in the silence of our hearts." He would go back and say: "They were all drawn together by a sense of God's love that had given His Son for their redemption." It is the love of God that makes us one, and only that. I was once in a Catholic church in Paris and after watching the service for a time I walked around behind the altar and found there a service of deaf and dumb people. The service was the same at heart; the love of God inspiring the thanks of men.

I remember an old English divine beginning his sermon: "I can do all things——" and then saying, "That I deny. But let us see, what is this: 'through Him that strengthened me.' Ah, that is another thing; that I can do." It was a quaint way of putting it, but it made the text stick in my mind, and I have never forgotten it. This is the secret of the power of Christianity. You will find men say: "Thou shalt love the Lord thy God with all thy strength," is the summary of Christianity. That is a mistake. Christ gave that as the summary of the Jewish law. When asked, "What is the chief end of the Jewish law?" He said, "Thou shalt love the Lord thy God * * * and thy neighbor as thyself," but when He was about to die He left as a legacy to His disciples this: "A new commandment give I unto you; that ye love one another as I have loved you." How did He love us? He laid down His life for us. That is Christianity. Judaism is justice; Christianity is sacrifice. What makes a Christian nation? Not a creed written in a constitution, not an established church, an organ or music. What will make America a Christian nation? We have about us dependent and inferior races. Loving our neighbor and the Filipino and the negro and making them men—nothing else will make us a Christian nation. And what makes a Christian church? Not fine windows and music, but making the world wiser and better. What would Christ do for your employes and servants? Helpfulness and service is Christianity; the heart and the centre and circumference of it. All Christian theology is summed up in: "God so loved the world that He gave His only begotten Son," and all Christian ritual in the Psalm: "Blessing and honor and glory and power to Him that sitteth upon the throne and that hath redeemed us." All Christian power is summed up in: "I can do all things through Him that strengthened me," and all Christian duty is summed up in the one law: "Love one another as I have loved you."

Better and Better Before Us.

God's best gifts are always before us, never behind. Pleasures of memory are sometimes delightful, but pleasures of hope are ever yet richer and brighter, especially to the eye and thought of faith. Says one of God's dear ones, referring to a fresh blessing from God: "This sudden coming of a long expected blessing is the sweetest thing that ever came into my life. How good God is, and how tenderly He leads us! He changes always a great good into a greater. I have been happy all along, but now (since this experience) my heart keeps singing:

"'Rest, peace, and life, the flowers of fadeless bloom,
The Saviour gives us not beyond the tomb,
But here and now, on earth, some glimpse is given
Of joys which wait us through the gates of heaven.'"

And thus it ever is in youth, in maturity, in age and yet beyond—the best is yet to come. Let us look forward and upward, and ever hope and trust and praise.

SCIENTIFIC & INDUSTRIAL

Artificial camphor is now made in Germany for the trade, as chlorhydrate of terebinth. It has a peculiar value in lessening the dangers of nitro-glycerin and making gelatin dynamite more effective.

The venom of snakes contains only intermediary bodies, which alone would not be virulently poisonous; but the normal blood serum of susceptible animals contains the substances which, by conjoint action with the intermediary bodies of the venom, cause the deadly poisoning.

Mountain climbers who seldom eat sugar when at home are said to appreciate it highly when on their excursions. Guides are very fond of it, as it is a great source of muscular force. Experiments have been recently made abroad to demonstrate the value of sugar to those who perform hard labor. Muscular work done when natural sugar (cane or beet sugar) was used was found to be superior to that when saccharine formed a part of the diet.

It is seldom that anything but mulberry leaves are employed to feed silk worms in France. Very rarely the worms hatch before the leaves are out, and on such occasions they are fed young rose leaves for a few days. About 99,000 acres of land in France are planted in mulberries; 40,810 pounds of leaves are necessary to produce 2.2 pounds of cocoons. The production of fresh cocoons from one ounce of eggs in France varies from forty-five to 147 pounds.

A new acetylene burner has the distinct novelty of being installed in a horizontal, instead of a vertical direction. By doing so and drilling the orifice in a flat plate, instead of at the apex of a conical tip, it has been discovered that acetylene can be burned without the usual injection of air. During some early experiments it was noted that when the jet takes a horizontal position the graphite is deposited in the form of a tube which does not affect the shape of the flame, and which drops off from time to time.

S. R. Wright has patented an electrical device to connect telegraph instruments with a clock, whereby any telegraph key left open for two minutes will be automatically closed by the clock, at the same time striking a gong calling attention to the broken circuit. Leaving open the key is a frequent occurrence on railroads, and sometimes leads to serious wrecks. By the use of this new and clever device all operators on a line equipped with these instruments or clocks can be called by the gong, as it makes an alarm that can be heard much farther than a telegraph instrument.

A molecule of alcohol is composed of two atoms of carbon, six of hydrogen and one of oxygen; so synthetical alcohol is obtained by uniting these atoms accordingly. For a long time it has been known that by direct combination of carbon and hydrogen in the electric arc, acetylene can be obtained. Sufficient hydrogen must be added to the acetylene to produce ethylene, a constituent of illuminating gas. In combining water with the ethylene alcohol is obtained. Thus, alcohol is produced in France without the employment of vegetable matter.

The Costly Fourth of July.

Those useful persons, the statisticians, whose work usually makes us wiser, if not always happier, have figured up that our last Fourth of July celebration cost this country the lives of not less than 377 men, women and children, the wounding and maiming of about 2000 more, and a property loss estimated at about $3,689,000.

If this sacrifice of life, limb and property were really necessary in any sense, or if it contributed in the slightest degree to our National well-being, we might cheerfully submit to it as a patriotic duty; but when we realize, as all must, that this annual holocaust, with all the misery and suffering consequent upon it is only a concession made to the pure love of noise and hullabaloo which possesses small children and savages in common, it might well be asked whether it is not high time that a stop was put once for all to these barbaric and destructive proceedings.

In view of the actual results of our Independence Day orgies, we might well apply to it, in paraphrase, the saying of Madame Roland, "O patriotism, how many nuisances are committed in thy name!"—Leslie's Weekly.

How to Eat an Orange.

The following is the proper way to eat a Mexican orange—any old way will do for a poor orange. You pare it, except a bit at the two poles; you cut it in two in the diameter, and then (first adding sugar if you like) you eat the two cups thus formed, or a good portion of them. It is the only way to get the full flavor and the delicious coolness of the fruit at its best. To eat an orange with a silver spoon is most unscientific; silver is a good conductor of heat, and the medium of juice that is thus obtained has been rendered nauseatingly warm, and also lacks taste on account of its small amount.—Modern Mexico.

European Wheat Yield.

The average yield of wheat to the acre in Europe is thirty-eight bushels. Much more labor and fertilizer is given grain fields in the old country than in ours.

Chicken Rearing in England.

About nine years ago, when R. H. Rew wrote an account of the Sussex chicken rearing and cramming industry for the royal commission on agriculture, the profits were highly satisfactory. But it appears that through this and other public notices those who were engaged in it and comparatively few, have been followed by a great number of imitators. The cramming system has been extended to many counties beyond Sussex and Surrey, and the special advantages of a monopoly have been lost. Accordingly the profits of the poultry-cramming business have been greatly reduced and not a few of those engaged in it have been constrained to give it up. The rearers have not suffered equally, although they have had to accept lower prices than they obtained for chickens of the right size for fattening a few years ago. When it was first announced that rearers obtained 3s. 6d. each for chickens ten to twelve weeks old, outsiders imagined that to produce the birds must be highly remunerative, and so it would be if such a price lasted all through the season. As a matter of fact, however, it is paid for only a few weeks, and then for chickens hatched during the coldest portion of the year, when hens are not apt to sit, and great care is necessary to prevent heavy losses among the young chickens. The feeding, too, is expensive and the attention required arduous.—London Standard.

Her Limit.

"Cleanliness is next to godliness, I know," said the young matron whose mother-in-law lives with her, "but there is such a thing as carrying it too far, I think. Now, my husband's mother is fearfully and wonderfully neat. In fact, at times, I feel that to live in a pigpen would be a relief. From morning till night there is nothing but clean, clean, clean. Bits of carpet are laid in the places most likely to trip you up. These are intended to keep the floor underneath free from stain, and then the carpets are taken up and the floor underneath scrubbed as carefully as if it had not been protected all the time. You cannot imagine just how trying it is. But the other day she reached the limit. She came in, took off her shoes, carefully washed them and set them out to dry! Think of it! It's a wonder she did not wash her hat."—New York Press.

The necessity for special asylums for those addicted to the use of cocaine is being considered in British India.

REGISTER OF THE U. S. TREASURY USES PE-RU-NA FOR SUMMER CATARRH.

Summer Catarrh Afflicts Men and Women.

Hon. Judson W. Lyons.

HON. JUDSON W. LYONS, Register of the United States Treasury, in a letter from Washington, D. C., says:

"I find Peruna to be an excellent remedy for the catarrhal affections of spring and summer, and those who suffer from depression from the heat of the summer will find no remedy the equal of Peruna."—Judson W. Lyons.

No man is better known in the financial world than Judson W. Lyons, formerly of Augusta, Ga. His name on every piece of money of recent date makes his signature one of the most familiar ones in the United States.

Two Interesting Letters From Thankful Women.

Miss Camilla Chartier, 5 West Lexington St., Baltimore, Md., writes:

"Late suppers gradually affected my digestion and made me a miserable dyspeptic, suffering intensely at times. I took several kinds of medicine which were prescribed by different physicians, but still continued to suffer. But the trial of one bottle of Peruna convinced me that it would rid me of this trouble, so I continued taking it for several weeks and I was in excellent health, having gained ten pounds."—Miss Camilla Chartier.

Summer Catarrh.

Mrs. Kate Bohn, 1119 Willoughby Ave., Brooklyn, N. Y., writes:

"When I wrote you I was troubled with frequent headaches, dizzy, strange feeling in the head, sleeplessness, sinking feelings, faintness and numbness. Sometimes I had heartburn. My food would rise to my throat after every meal, and my bowels were very irregular.

"I wrote you for advice, and I now take pleasure in informing you that my improvement is very great indeed. I did not expect to improve so quickly after suffering for five long years. I am feeling very good and strong. I thank you so much for Peruna. I shall recommend it to all suffering with the effects of catarrh, and I consider it a household blessing. I shall never be without Peruna."

For those phases of catarrh peculiar to summer Peruna will be found efficacious.

Peruna cures catarrh in all phases and stages.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Modern Windmills.

Though superseded for all important work, windmills still find their uses in providing power for pumping the water supplies to country houses and farms. A number of modern windmills are now at work on the Royal Agricultural Society's grounds, near Ealing, undergoing a series of efficiency tests.—London Engineering.

GRIPPE HURT KIDNEYS.

The lingering results of La Grippe remain with the kidneys for a long time. They suffer from over exertion and the heavy drugs of Grippe medicines. Doan's Kidney Pills overcome this condition.

AURORA, NEW MEXICO.—I received the free sample of Doan's Kidney Pills which I ordered for a girl nine years old that was suffering with bed wetting, and she improved very fast. The pills acted directly on the bladder in her case and stopped the trouble. J. C. LUCERO.

BATTLE CREEK, MICH.—My husband received the sample of Doan's Kidney Pills and has taken two more boxes and feels like a new man. He is a fireman on the Grand Trunk R. R., and the work is hard on the kidneys. MRS. GEO. GIFFORD.

PLINY, W. VA.—The free trial of Doan's Kidney Pills acted so well with me, I wrote Hooff, the druggist, at Point Pleasant, to send me three boxes, with the result I have gained in weight, as well as entirely rid of my kidney trouble. My water had become very offensive and contained a white sediment and cloudy. I would have to get up six and seven times during the night, and then the voiding would dribble and cause frequent attempts, but, thanks to Doan's Kidney Pills, they have regulated all that, and I cannot praise them too much. JAS. A. LANHAM.

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs and dropsy signs vanish.

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness, dizziness.

FREE! Mail this coupon with your address for free trial box.

They Lunch Daintily.

"If we depended on the women who come in here for their midday luncheon we would not sell a piece of meat once in a week," said the proprietor of a restaurant on lower Broadway. "We have a great many women patrons, but unless they are accompanied by male escorts their orders are entirely different from those of men. A woman seldom orders a sandwich, and as for a steak at this time of day, they wouldn't touch it if they had all the time in the world at their disposal. They prefer something dainty. One will take chocolate eclaire and milk; another chicken salad, and another strawberry shortcake. Pie—they leave that for the men. Some of them are saleswomen in the shops, and they work as hard as men, but they don't seem to care for the same sort of food."—New York Press.

The Lass With a Glass
of Hires Rootbeer, brightens her eyes, deepens the rose in her cheeks, and acquires sound health and buoyant spirits from her favorite beverage.
Hires
Rootbeer
the great hot weather drink, is sold everywhere, or sent by mail for 25c.
A package makes five gallons.
Chas. E. Hires Co.
Malvern, Pa.

BROMO-SELTZER
CURES ALL
Headaches
10 CENTS--EVERYWHERE

Mind This.
It makes no difference whether it is chronic, acute or inflammatory
Rheumatism
of the muscles or joints
St. Jacobs Oil
cures and cures promptly.
Price, 25c. and 50c.

TORTURING DISFIGURING

Skin, Scalp and Blood Humours

From Pimples to Scrofula From Infancy to Age

Speedily Cured by Cuticura When All Else Fails.

The agonizing itching and burning of the skin, as in Eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurements, as in acne and ringworm; the awful suffering of infants, and anxiety of worn-out parents, as in milk crust, tetter and salt rheum,—all demand a remedy of almost superhuman virtues to successfully cope with them. That Cuticura Soap, Ointment and Resolvent are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy, have made them the standard skin cures, blood purifiers and humour remedies of the civilized world.

Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle. Dry, without rubbing, and apply Cuticura Ointment freely, to allay itching, irritation and inflammation, and soothe and heal, and, lastly, take Cuticura Resolvent, to cool and cleanse the blood. This complete local and constitutional treatment affords instant relief, permits rest and sleep in the severest forms of eczema and other itching, burning and scaly humours of the skin, scalp and blood, and points to a speedy, permanent and economical cure when all else fails.

Sold throughout the world. Cuticura Resolvent, 50c. (in form of Chocolate Coated Pills, 25c. per vial of 60), Ointment, 50c., Soap, 25c. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Boston, 137 Columbus Ave. Potter Drug & Chem. Corp., Sole Proprietors.

Send for "How to Cure Every Humour."

DROPSY NEW DISCOVERY: gives quick relief and cures worst cases. Book of testimonials and 10 days' treatment Free. Dr. H. H. GREEN'S SONS, Box B, Atlanta, Ga.

25 CTS. PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION 25 CTS.

If afflicted with weak eyes, use Thompson's Eye Water

BEST FOR THE BOWELS
Cascarets
CANDY CATHARTIC

GUARANTEED CURE for all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dizziness. When your bowels don't move regularly you are sick. Constipation kills more people than all other diseases together. It starts chronic ailments and long years of suffering. No matter what ails you, start taking CASCARETS today, for you will never get well and stay well until you get your bowels right. Take our advice, start with Cascarets today under absolute guarantee to cure or money refunded. The genuine tablet stamped C C C. Never sold in bulk. Sample and booklet free. Address Sterling Remedy Company, Chicago or New York. 502

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, JUNE 6, 1903.

Twelve Pages.

A SATISFACTORY ENDING.

It is to be regretted that so much strife and ill feeling has been stirred up over the street drain in the Park district of the Borough.

That it was the result of misunderstanding and perhaps undue haste on the part of some, will no doubt be admitted by all interested parties.

We have looked into this matter most carefully and are satisfied that while the drain is not the nuisance it has been claimed to be by some, still we believe it should be removed, and we have been assured by the Mayor that it will be just as soon as it is possible for workmen to do so.

We have talked to many interested people on the subject, and they are of the same opinion, namely: That while the drain is not and has not been much of a nuisance, yet in its present condition it is a constant menace to the people in that section, and it ought to come up.

Nothing more is wanted or expected by any one; and as the question has been so satisfactorily settled in such a short time, a system of congratulations should be extended to the original "kickers," the Board of Health and the Mayor.

A SPECIAL ELECTION.

Very little interest is manifested in the special election to vote on the proposed amendments to the constitution to be held in New Jersey in September, which is somewhat surprising in view of the importance of the matter.

The amendments seek to reform the judicial system. For years the lawyers of the State have realized the need of simplifying the system of the courts, and as a result of their earnest work in this regard, an election has been called to vote on the proposed reform.

The amendments propose:

1. To create a Board of Pardons consisting of the Governor, the Chancellor and Attorney-General. The Board is now made up of the Governor, the Chancellor and six special Judges of the Court of Errors and Appeals.

2. To create a separate and distinct Court of Errors and Appeals, to consist of a chief judge and four associates. The present Court of Errors and Appeals is composed of the Chancellor, the Chief Justice, and eight associate Justices and six special Judges.

3. To give to the six Vice-Chancellors the same powers as are now exercised by the Chancellor alone. Now the Vice Chancellors are little more than advisory masters, whose findings, to be effective, must be approved by the Chancellor.

4. Giving to the Legislature the power to decide how the Court of Common Pleas in the various counties shall be constituted and held.

5. Giving to the Governor, with the advice and consent of the Senate, the appointment of the Vice Chancellors. They are now appointed by the Chancellor.

BALLOT-BOX STUFFING POSSIBLE.

We have been of the opinion for some time that it is possible to 'stuff' ballot boxes under the present system of voting in this State.

Last Tuesday the report of the West New York (N. J.) election frauds case was made public. The report follows:

"Just before Judge Parker adjourned the hearing in the West New York election case, he created a genuine sensation when in an endeavor to learn the practical workings of the ballot box, he approached that on the counsel table which had been used in the first ward election. Though the box was supposed to be under lock and key Judge Parker succeeded in opening it so easily that both he and Counselors Edwards, Rich, Walscheid and Carey were astonished. By lifting the cover a hand could be put into the box and ballots could be placed in the box or extracted with ease.

"Judge Parker asked Town Clerk Tonn, who had the boxes in custody after the count on election night, how it was possible that he permitted a box in such poor condition to be used on election day, and Mr. Tonn said that he was not aware that the box was in such shape.

"The revelation thus far in the contest shows that fraud could be easily practiced at the election."

From this it would appear that not only is it possible to 'stuff' ballot boxes, but it has been demonstrated beyond any doubt that they can be and have been tampered with.

At Bayonne City last Fall charges were made on this line, but owing to purely local circumstances it was impossible to prove that actual fraud had been done, but enough was brought to light to show that the thing is possible.

The voting machine cannot get here too soon.

We are sorry to learn that Rev. Dr. Thomas O'Hanlon, who for twenty-six years has been the head of Pennington Seminary, has made an assignment to the Trenton Trust and Safe Deposit Company for the benefit of his creditors. His liabilities aggregate $57,000, all of which he says will eventually be paid. Dr. O'Hanlon's financial difficulties are the result of the depreciation in the value of farm lands of which he is a large holder and a long line of credit given to pupils. Dr. O'Hanlon is one of the most conspicuous figures in the Methodist Church. For years he has taught the Bible class at the Ocean Grove camp meeting.

The report of Collector E. B. Allen of the county of Somerset appears in this issue of the Review, and shows the same painstaking care which has characterized his previous reports. If you are interested in the financial condition of your county, a perusal of this report will repay you.

Forest fires to the north of us; floods to the west; cyclones to the south; the greatest drouth right here at home that the state has record of in over forty years; and another great coal strike almost in sight, are enough to make the average mortal begin to wonder "where he is at!"

The Suburbanite for June, the new magazine published by the Passenger Department of the New Jersey Central R. R. has several beautiful views of Plainfield scenery and houses.

LET STRIKES BE ABOLISHED.

In the transportation business, and in the building industries, the public has an exceptional stake, and it can no longer tolerate the strike methods. For that matter, strikes are fast becoming as obsolete a mode of regulating wages and securing the welfare of workmen as are wars in the establishment of just relations between the governments and peoples of the earth. When one looks beneath the surface, it becomes fortunately evident, in this country, that the strong tendency is toward the use of reasonable and conciliatory methods. The agency of such bodies as the Civic Federation, quietly exerting their influence for industrial peace, is steadily bringing about the hoped-for period when labor wars will be at an end. Mr. Carnegie, in a very felicitous speech, on May 7, as president of the British Iron and Steel Institute, urged the advantage of a closer partnership relation between employers and men, and pointed out the value of sliding-scale wage arrangements and analogous devices. A week later, Mr. Oscar S. Straus, as president of the American Social Science Association, made a notable address on industrial peace, at Boston. In many manufacturing industries, it has been found possible to justify high wages by bringing about a remarkable increase in the efficiency of labor. One of the great difficulties in the building trades, as in less skilled employments, is the tendency of unionism to keep everything on a dead level, and not only to prevent the exceptiodally able man from deriving any advantage from rendering valuable services, but to bring the average of efficiency down somewhere near the level of the comparatively slow and ineffective workman. This is not in accordance with the American spirit; and although remedies are not easy, some way must be found to give incentive to mechanics and ordinary workmen to improve results both in quantity and quality.—*Review of Reviews.*

Why We Say Bandbox.

"The collars worn by the English in the seventeenth century," said an old hat dealer, "were big, starched things a good deal like a ruff. Sometimes indeed they were bigger than the biggest ruff. They required a box of a good size to be carried about in.

"These collars were called bands. Ben Jonson in 'Volpone' says, 'This band shows not my neck enough.' Steele says, 'The next that mounted the stage was an under citizen of the bath, a person remarkable among the inferior people of that place for his great wisdom and his broad band.'

"Bands, you see, were collars, and by the same token bandboxes were collar boxes. They were big and round, just big enough to carry a clean, well starched band—just as big, in fact, as they are today.

"Whenever, therefore, you talk of bandboxes you are unconsciously referring to the collars as huge as ruffs that the English of the seventeenth century wore."

Chased by an Emperor.

Emperor Frederick William of Prussia sometimes would signify his rejection of what he considered an absurd petition by drawing on the margin an ass' head and ears. One day, a baron of ancient patent having complained of another baron taking precedence of him, the king wrote on the petition: "Mere folly. Whether a man sits above me or below me, my birth remains the same." Oftentimes he would ask people in the streets who they were, a peculiarity which made nervous people evade the royal presence. One day when a man saw the king approaching he took to his heels and ran, but Frederick William pursued him in hot haste and when he overtook him asked, "Why did you run away from me?" "From fear," answered the man, whereupon his majesty gave him a heavy thwack with his cane and said that he "wished himself to be loved and not to be feared."

Nice Little Love Story.

A dreamer and a man of action loved a woman.

The dreamer said: "I shall write verses in her praise. They will touch her vanity, and she will love me for them."

But the man of action said: "How old fashioned! I shall corner the stock market, and that will bring her."

So the dreamer wrote verses, and he induced a friend of his who ran a magazine to print them. And the man of action cornered something or other and became a billionaire.

In the meantime the girl married a man who inherited his money and lived happy ever after.

But the dreamer was so proud of his verses that he didn't care, and the man of action was so busy that he didn't care.

The only one to suffer was the man she married.—Smart Set.

A Nile Village.

A traveler of the upper Nile thus describes a typical native village: "The houses are built of Nile mud, each house accommodating a family of no matter what size, the inhabitants of each village almost all related to each other, comprising sometimes several hundreds of people.

"Their streets are littered with filth, animals of every kind obstruct one's path, dogs growl and snarl at the appearance and intrusion of a stranger, and women flee, hiding their faces in their yashmaks lest a white man should behold their features. Flies in swarms settle on the children and lay their eggs on their eyelids, unwashed, because they believe it to be contrary to their religion to wash or remove the flies from their eyes."—Chicago Record-Herald.

Fighters in London Streets.

The reign of George II. was a great fighting time. Every man who went abroad knew that he might have to fight to defend himself against footpad or bully. Most men carried a stout stick. When Dr. Johnson heard that a man had threatened to horsewhip him he ordered a thick cudgel and was easy in his mind. There were no police, and therefore a man had to fight. It cannot be doubted that the martial spirit of the country, which was extraordinary, was greatly sustained by the practice of fighting, which prevailed alike in all ranks.

The Real Thing.

"Tell me, Harold," she said as the gentle old horse they were driving along the country road dropped into a walk, "am I your ideal girl?"

"No," he said fervently. "You're my real girl!"

Whereupon the horse, finding himself totally neglected, stooped and began to browse.—Chicago Tribune.

An Unjust Aspersion.

"Yes, our society's new president certainly is a busy woman, but they say she is neglecting her duties as a wife and mother."

"That is not true. I know for a fact that she manages to see her family almost every day."—Brooklyn Life.

Confession.

"Pardon me, dear," said the village editor's bride, "for appearing at dinner in my wrapper, but"—

"Oh, that's all right," interrupted the knight of the paste pot; "some of our best thoughts come to us in wrappers."—St. Louis Star.

If You Want

If you want posters,
If you want bill heads,
If you want envelopes,
If you want statements,
If you want note heads,
If you want show cards,
If you want letter heads,
If you want calling cards,
If you want business cards,
If you want invitation cards,
If you want business circulars,

If you want job printing of any description done in a satisfactory manner, you can have your wants gratified by calling on The Review, 33 Somerset street North Plainfield, and leaving your orders or if preferable, use the telephone and our representative will call on you.

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the Review free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled, write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed, but it is necessary to have them properly vouched for.

THE AMERICAN MONTHLY REVIEW OF REVIEWS

How Can I Keep Up with the Times?

IT is pretty hard to keep well informed on the political news, the scientific news, the literary news, the educational movements, the great business developments, the hundreds of interesting and valuable articles in the hundreds of excellent magazines. About the only way it can be done by the average busy man and woman is to read a magazine like "The Review of Reviews," and, as it is the only magazine of the sort, it is a good thing to send $2.50 for a year's subscription.

PRESIDENT ROOSEVELT says:
"I know that through its columns views have been presented to me that I could not otherwise have had access to; because all earnest and thoughtful men, no matter how widely their ideas diverge, are given free utterance in its columns."

EX-PRESIDENT GROVER CLEVELAND says:
"I consider it a very valuable addition to my library."

ANNUAL REPORT

OF THE

Receipts and Disbursements

BY

E. B. ALLEN, Collector,

OF THE

COUNTY of SOMERSET

FOR THE

Year Ending May 13, 1903.

County Collector's Office,
Somerville, N. J., May 13, 1903.

Gentlemen of the Committee on Collector's Accounts:

I have the honor to submit herewith the annual report of moneys received and disbursed by me as Collector of the County of Somerset for the year ending May 13, 1903.

The amount of taxes as returned to the Board of Assessors to be raised for the year 1902 by each township and borough was as follows:

Townships	State School Tax	County
Bedminster	$2,181 91	$1,146 42
Bernards	3,124 54	1,641 56
Branchburg	1,240 10	1,103 87
Bridgewater	5,662 40	2,974 60
Franklin	5,566 78	2,924 54
Hillsborough	2,787 92	2,930 94
Montgomery	1,620 04	1,705 82
North Plainfield	1,654 54	1,740 56
Warren	911 71	2,005 52
Boroughs		
Bound Brook	196 65	4,555 23
North Plainfield	4,290 84	14,021 04
Rocky Hill	2 91	613 76
Millstone	1 06	61 50
	$32,284 39	$57,024 39

The following is the amount of State School Tax paid by each township and the amount received back in from the appointment for the Public Schools in the county for the year commencing July 1st, 1902:

Townships	School Tax Paid	Received Back
Bedminster	$2,181 91	$2,272 21
Bernards	3,124 54	3,662 23
Branchburg	1,240 10	1,147 87
Bridgewater	5,662 40	5,811 20
Franklin	5,566 78	5,715 54
Hillsborough	2,787 92	2,862 14
Montgomery	1,620 45	1,720 88
North Plainfield	1,654 54	1,918 58
Warren	911 71	1,921 56
Boroughs		
Bound Brook	2,290 85	2,554 23
North Plainfield	4,290 84	3,769 89
	$32,284 39	$33,784 39

The total amount of receipts from all sources was $57,024.39. Three hundred twelve thousand four hundred fifty dollars and eighty-five cents, and disbursements, $56,128.39. Three hundred eight thousand one hundred twenty-six dollars and thirty-nine cents, leaving a balance of $895.23 in favor of the county on the three thousand and three hundred twenty-four dollars and fifty-six cents which is on deposit at the banks to credit of the county collector.

Respectfully submitted,

E. B. ALLEN,
County Collector.

In Account with E. B. Allen, Collector, and Treasurer of the County of Somerset.

RECEIPTS.

The Wholesome Woman Is a Blessing to Man

"OH, who admires her?" remarked the youthful cynic.

The woman of experience laughed. "That's where you make your mistake, my dear girl," she said.

"Oh, men like girls who are sophisticated," the other retorted, with a wise air. "Girls who don't always say what they think, who are mysterious and elusive and hard to make out and yes, perhaps a little wicked—it lends such a charm—the subtle air of wickedness."

"The mistake of the very young—appreciated only by the very young man," went on the older woman, with her relentless little smile, "and it usually takes them several years to get over it. It belongs to the age when a girl thinks no one can understand her, when she deals in isms and wonders if she has the making of a genius in her because she is so unlike other girls. I don't know why it is, but the simple, admirable virtues are not appreciated by the very young and ambitious girl who wants to be termed attractive—more than that, fascinating. I dare say it is because she has been having an overdose of them during her recent childhood, just as she now enjoys late hours and highly spiced food because she has been brought up simply. Anyway, it usually takes her from one to two seasons to get over the idea, and during that time she usually loses a good man or two just by way of convincing her that her tactics are wrong."

"But do you mean to say"—

"I mean to say this: Men the men worth while, the men of the world of experience—don't care for half and half things. They admire a woman who does not pose, who has certain well defined ideas and who sticks to them, who is frank, who will not stoop to trickery and who is wholesome. These are the women who count for something in the world and who win in the long run, although the others may seem to score for a time."

"Well, but just what do you mean by a wholesome woman? a woman who washes her face with soap and goes about with it shiny?"

"Oh, dear, no! Powder is not inconsistent with wholesomeness if it is not carried to extremes. The wholesome woman, by her walk, by her frank, sunny smile, by her dress even, shows

LOVE OF HOME.

the beauty and truth of her character and makes you glad there are such women in the world."

"But how can she show her mental qualities by her dress?"

"Very easily. She avoids loudness and sloppiness; in fact, she can be capable of neither. She doesn't fuss and fret and worry over her dress, because she doesn't need to. It is simple and within her means. Rather than have three gowns over which she must scrimp and save, not to speak of sacrificing other things, she will have one *perfect in every detail*, useful, smart and appropriate. Her shirt waists will *be few and simple, if she cannot afford* elaborate ones, but they will be snowy and immaculate. In a word, her very clothes will be proof that she does not live under a pretense or a sham trying to make out that she is other than what she can afford to be. But it is by her sweet, sunny disposition, her patience, her constancy and her love of home that the wholesome woman can be distinguished from her morbid, affected, neurotic sisters. She is a blessing and a constant delight to the man she marries, and she is the woman who is loved and admired by the best kind of man." MAUD ROBINSON.

Waists For Summer.

Some unusually nice waists are made of silk in fine checks and trimmed with 1 line of tron tron insertion, through which is run narrow black velvet ribbon. Tussore silks and pongees in white, in colors and black make up into elegant waists, and skirts can also be made to match. Taffetas, plain and with stripes made of a heavy cord combining two or three colors, are lovely for these blouses. One had a white ground, with the cords showing green, pink and heliotrope at intervals. This is trimmed with shirrings and medallions of lace and a belt of velvet of the darkest shade.

The new woman is never found in an old woman's home.

HOUSE FURNISHINGS.

They Have Attained a Daintiness Never *Before* Known.

What would the world be without variety?

Soon half would die from sameness or satiety.

That is what the poet says, and it is true of things to have in one's house as well as of the clothes we wear. We would soon weary of ourselves if we were obliged to appear always in exactly the same kind of garments, and fortunately for us and our reason we are permitted to have changes in the fashions of our home decorations and furnishings too. I can remember when white marseilles bedspreads and ruffled pillow shams were considered absolutely necessary to the peace and happiness of the woman of the house.

NEW STYLES IN JARDINIERES.

Just now see what has currently displaced them. A round rod has made the old pillow lace in some forgotten *closet. While a lace spread* lined with satin of some preferred color covers the bed. This *lace cover is not very strong* and is everlastingly being sewed up, but it is the *style. When one has a* country house rooms are furnished with hangings of cretonne or chintz, and the bedspread and pillow roll and the cushions, bureau covers and dressing table covers in fact, everything which in times gone by was furnished with other fancies is now made to match with scrolled and lace edged chintz or whatever the material is. Each room is done in one tone, and to assist in carrying out this color scheme there are handsome fiber rugs of the different hues. Red and white, blue and white, green and, in fact, all the colors are represented. Table covers are shown to match the rugs.

In bedrooms, parlors, dining rooms and libraries there are from two to *half a dozen jardinieres, some on small* tables and some on their own stands. There is less effort made to cultivate flowers around country houses than heretofore, so plants are set in these to lend their green and freshness to the rooms. I do not know but this is a good plan for some reasons, but well, I love to fuss around flowers too well to be a dispassionate counselor.

There is a new thing in jardinieres and such things made of pottery. They are now oxidized with a silver finish and are particularly cool looking and pleasing when filled with green things. Ferns, which are set close and so planted that they hang over the outer edge a little, make beautiful ornaments for the table, the dark silver harmonizing admirably with the tender green of the ferns. The jardinieres are made in many sizes, so that *they may be* filled with any preferred plant. They may be left outside also without injury. Some of the jardinieres are so large that, with the pedestal, they can almost make a shade with the proper plant, that is and thus they are just what women have been wanting for porches. Some are bronzed, others are painted and still others are glazed. There is something for every one. But all are marked by soft and harmonious colors.

It is unprofitable to speak of the china for these luncheons, for each woman has her own, but I may say a word about the unusual amount of glassware that is added to all country services, to say nothing of the city requirements. Glassware has had two drawbacks—the cut glass is so very dear *and, unfortunately, so fragile*, and the pressed glass has been so clumsy and ugly. There is a new process of annealing and working the glass, so that now the pressed glass is as handsome as the finest cut glass and has a tougher quality, which makes it desirable from every point of view, and some of it is quite as elegant and artistic as cut glass, like tall vases for cut roses, great lemonade bowls and so many other things that I cannot mention them. But it seems to me a move in the right direction that fashionable women have taken to the general use of this glassware in view of the fact that it is so superior *from the hygienic* view point. Glass cups and other vessels do not crack like *china to admit the dreaded* microbes. Clear glass is beautiful to set out a *luncheon, tea or dinner table*, but colored side dishes for small matters are too pretty to leave aside.

There are fan, strawberry, chrysanthemum and thistle designs in annealed pressed glass, besides spoon trays, punch cups, coffee mugs quite new theses, nappies and drinking glasses of every kind, and as they cost little in comparison with the cut glass we can see why women have seized upon them for country use.

HENRIETTE ROUSSEAU.

A PINCH OF SALT.

As Necessary In Our Daily Life as In Our Daily Food.

How could we get on without salt? *In our daily food, as in our daily life*, a little of it is necessary, and the absence of it takes away from the *flavor of* everything we eat. The "salt of life" which we hear about signifies the health, vigor and wit which we find in life. There was a time in countries far from the sea when primitive man never used salt in his food, and it was only when nations advanced in civilization that salt became an absolute necessity.

But it was not alone as food that salt was valued. Among the ancients a salt spring was regarded as a gift of the gods, and it was believed that any salt found in the soil lent it a peculiar sanctity and made it a place where prayers were most readily heard. Every meal *that included salt had a certain sacred* character, creating a bond of piety and *friendship between host and guest*; hence the expression, "There is salt between us," meaning friendship, and to be "untrue to salt" means to be disloyal or ungrateful.

In the middle ages, when all classes and degrees sat at the same board, they were placed according to rank, above or below the great saltcellar, which always stood in the middle and marked the dividing social line. "Above the salt" meant "of high degree." Below the salt were the yeomanry, serfs and vassals of the feudal days. A good description of this custom may be found in "Ivanhoe" where Cedric, the Saxon, entertains his vassals and friends.

A pinch of salt is always considered *lucky in cooking. To take anything* "with a pinch of salt" means to excuse or make allowances *for* it. A "salt" is a sailor. To salt one's conversation means to make it sparkle. Salt is always employed in a sense of benefit or strength.

The Bible has many references to salt, among them being "Ye are the salt of the earth," Matthew v, 13, and St. Paul says, "Let your speech be always with grace seasoned with salt."

Salt is used by Catholics in baptism. They consider it a symbol of wisdom and put a few grains in the mouth of the person baptized.

DON'T GET ANGRY.

Fire in the heart sends smoke in the head.—German Proverb.

An envious man waxes lean at the fatness of his neighbor.—Socrates.

One of the very best of all earthly possessions is self possession.—G. D. Prentice.

The fire you kindle for your enemy often burns yourself more than him.—*Chinese Proverb.*

The envious man pines in plenty, like Tantalus up to the chin in water and yet thirsty.—T. Adams.

An irritable man lies like a hedgehog rolled up the wrong way, tormenting himself with his own prickles.—E. P. Hood.

Lamentation is the only musician that always, like a screech owl, alights and sits on the roof of an angry man. —Plutarch.

A man can easily be intoxicated with *anger as with wine; both produce* a temporary insanity, and during the paroxysm he *should be avoided as a* madman.—J. Bartlett.

Night Air.

One of the bugbears of old time people is night air, and there is little exaggeration in saying that the superstition against night air has killed more people than the free circulation of it has ever injured. There is abundance of proof that night air is injurious to no one. On the contrary, people who sleep outdoors under the mere protection of a tent are the healthiest of all people, and the practice has largely *gained in popularity* of late years under wider knowledge of hygiene for *people in delicate health to go in* camping parties and breathe the balsam of the night air. The *vigor gained* from a few weeks of such an outing is a marked proof that the old prejudice against night air is as foolish as most other old wives' whims.—Exchange.

Talent and Vocation.

Each man has his own vocation. The talent is the call. There is one direction in which all space is open to him. He has faculties silently inviting him thither to endless exertion. He is like a ship in a river. He runs against obstructions on every side but one. On that side all obstruction is taken away, and he sweeps serenely over God's depths into an infinite sea. This talent and this call depend on his organization or the mode in which the general soul *incarnates* itself in him.—Emerson.

Young Men and Maidens.

Life would become intolerable if girls could not be on frank and unconquettish *terms with men of their own age or* some years their seniors. The idea that because two *young people may* have a great deal in common they must also be in love is happily dying out. No one is hurt, no one is compromised, when a friendship does not lead to marriage.—John Oliver Hobbes in Pall Mall Magazine.

A Sorry Finish.

Kadleigh—Your wife is always out spoken, isn't she?

Henpeck—Yes, but I try to be that way, too, sometimes.

Kadleigh—Really?

Henpeck—Yes, but whenever I venture to be outspoken it ends in my being outtalked. Philadelphia Press.

Music beckons the human race on and is followed by the two great columns, the joyous, light hearted and happy and the sorrowful, wretched and despairing.

THE AMERICAN LAUGH.

It Is a Valuable Aid In Building Up Our National Greatness.

God's greatest gift to man was the laugh. Without it the human race would have wept itself to death or exterminated itself long ago. Pathos is beautiful; tragedy is absorbing. But both pathos and tragedy are instantly routed by the laugh.

Laughter has sunshine in it. It is warm. Learned men have searched *for the secret of life*. What is it but good humor? That's the secret of life being worth *living*.

What sunshine is to earth good humor is to man. Take the smile and the laugh away, and it would be the end of man.

Men can't fight while they enjoy a joke. Death himself recoils from the laugh. The man in a good humor has an enormous advantage over the man who is angry. Anger is dark. Bitterness is filled with shadow. Intolerance is grim and black. Prejudice is blind.

Good humor, with the smile and the laugh, is sunshine in which objects are plain and distortion disappears and wherein phantoms become nothing.

One reason for America's greatness is that, above all, it is a nation that laughs. There have been gay peoples and frivolous nations, but gayety and *frivolity are strangely akin to melancholy*. That gay Germany whose national happiness *is expressed in song* is clouded by melancholy. Sadness pervades the temperament of Germania.

And frivolous France—how tragic she becomes—how desperately tragic!

The great American laugh is another thing. Investigate the American national laugh, and there's a sound, practical something behind it. It is never a forced laugh. It is healthy, vigorous, spontaneous.

Empires and powers have crumbled and gone to pieces in solemn seriousness and gloomy grandeur, while Uncle Sam, with a joke on his lips, forges ahead.—Denver Post.

A COMMON CUSTOM.

Man's Habit of Running His Fingers Through His Hair.

"Why does a man always run his hand through his hair when he takes his hat off?" asked an observant man. "Did you ever notice that man will invariably do this very thing? Is it just a nervous habit? Is it vanity? It is an old habit. I have never known a man who did not indulge this habit. Even men who have no hair to run their fingers through, men whose heads are as bald as billiard balls, will brush their hands over their heads when they lift their hats. If the men simply wanted to smooth their tousled *hair*, of course this would afford ample explanation of the habit. But why *should a man who has no hair* on his head do the same thing? It is not a *sufficient answer to say that such a* man may have had a full suit of hair at one time and that it is *simply a* matter of habit contracted under different conditions. As a rule, men are unconscious of the fact. They do not know why, how or when they run their hands over their heads. But they all do it just the same. Go into a court room or at any place where men congregate and where it is necessary for them to remove their hats and watch them. You will observe that every man will go through the same performance. It seems to be a perfectly natural thing for them to do. My own conclusion is that it is an evidence of vanity. *A man* wants his hair to be just so. Originally probably it was simply *a matter of tidiness*. But it has grown into an act of vanity. The lawyer, for instance, *if he has enough hair* for the purpose, will want his head to have a tousled appearance. *It gives him a* studious appearance and leaves the impression that he has been struggling with the books. Whatever the reason, the habit is a curious one and one which seems to be deep rooted in the masculine nature." — New Orleans Times-Democrat.

Handel as a Child.

George Frederick Handel, the son of a Saxon barber and valet, was only five years old when his "fingers wooed divine melodies" from the spinet, which a good natured aunt had smug*gled for* him into an attic, so that no sound of it might reach the ears of his *father*. At *eight* his playing so astonished the elector of Saxony that his *father was compelled* to withdraw his opposition and allow the genius of the boy to have *fair play*. *And before* he had reached his twelfth birthday young Handel was known *throughout* Germany as a brilliant composer and virtuoso at the court of the emperor.

When Boys Wore Wigs.

A century and a half ago wig wearing was at its height, and little boys four or five years of age submitted to having their heads shaved preparatory to donning their false headdresses. A Leyden professor Rivers by name—shocked all churches by declaring that a Christian must necessarily wear a wig or be eternally lost. On the other hand, Dr. Thiers, a celebrated Catholic, assailed the wig wearing priests in a good sized volume.

Cranks!

Judge—Let us get this thing right. You say this man whom we are examining *is not insane and yet* he is not in his right mind. How is that?

Witness—*Lots of people, your hon*or, who are not insane are wrong minded about everything. *Chicago Tribune.*

An Aid to Memory.

Slopay—And, doctor, if you will, I wish you would give me *something to* help my memory. I forget so easily.

Doctor—Very well. I'll send you a bill every month.—Baltimore American.

THE BAY WINDOW.

How It May Be Draped In an Artistic Manner.

Excellent possibilities are afforded by a bay window for interior decoration, although it is one of the most difficult features of a room to treat satisfactorily. The light must not be obstructed, and the drapery or other adornment must not be heavy or cumbersome. Window seats may be intro-

EMPIRE STYLE DRAPERY.

duced effectively and a pleasant nook formed in which to read when the light is failing in other parts of the room.

For a reception room a bay window may be prettily draped with perfectly straight valance and curtains of salmon pink damask, with black velvet appliques outlined with gold embroidery. The sash curtains are sheer, with a small figure. The window seat is covered with velour and has a French plaited valance. This is an empire *mode of treatment* and should be used in a room furnished in the style of that period.—New York Herald.

Chamois Skin Doilies.

A person with an ordinary knowledge of painting can *make a handsome* set of the chamois skin doilies now in vogue for the polished bare top of the luncheon table. The common yellow skin is frequently used, but gray skins or those of a rich red hue can be purchased at house furnishing or art supply shops. A skin three-quarters of a yard square costs about $1. A few oil paints and a medium sized sable brush complete the necessary supplies. Colors should be carefully blended, as no shading is permissible. Mix the paint with turpentine to the consistency of cream and apply in broad, flat washes. Experiment on a little piece before beginning, as some skins absorb more *than others*. A rose design, with blossoms in soft pink and leaves and stems in *pale green, is effective on a gray* skin. Chrysanthemums in dull pinks or reds are good on a red skin, and nasturtiums go well on a terra cotta background.—New York Journal.

For Croupy Children.

On a small table beside my bed stand a lamp, two nails, a tin cup containing one tablespoonful of mutton tallow or lard, two tablespoonfuls of turpentine, a deep bib with strings and two safety pins, with which to pin on a piece of flannel the shape of the bib. As soon as baby coughs hard I light the lamp, put the tin cup over it on the two nails and heat the mixture until it smokes. I then rub baby's chest well, as hot as I can use the turpentine, and then put on the flannel pinned to the bib, tying the soft tape strings *around the neck*. It may sound like a fairy tale, but if the cough is not too *bad it absolutely disappears; if very* bad, it becomes so mild and the breathing so different that a distracted mother sleeps in peace. With this same remedy used not pneumonia has twice been averted in a neighbor's family.—Woman's Home Companion.

Women Now Look Younger.

A question which might elicit considerable interesting discussion is, Why are the typical modern women twenty and even thirty years younger in manners, dress and appearance than were their grandmothers at the same age? One might reply, says Mrs. Woodrow Wilson in the Cosmopolitan very pertinently, that, in the first place, they have decided not to grow old, and, believe me, it is largely a question of will. Having made this decision, they seek the means which shall enable them to retain their youthful appearance. They understand that beauty and ill health are not congenial companions; *consequently the women of* today live much in the open air, loving the sun and the breeze *far more than the easy* chair and the open fire.

Bare Floors and Rugs.

An eminent physician who has made a study of the germ theory is credited with saying that "when the American housewife becomes thoroughly educated in domestic sanitation she will never have a carpet in her home." No matter with what care folks enter a house they are bound to carry with them some dirt from the street. This, of course, settles into the carpet, and each time sweeping day comes round it is stirred up and the air of the room is filled with it. The chances are that such air is most unwholesome. Bare, clean floors and rugs are more wholesome.

Baked Milk.

Baked milk is an admirable food for consumptive people and invalids. It is made in the following manner: Put half a gallon of good milk into a stone jar and cover with writing paper, tied down. Leave it in a moderately hot oven for eight or ten hours till it has become the consistency of cream. The amount of nourishment to be derived *from* it is marvelous.

It Was the Wrong Bird

The irascible gentleman had ordered a chicken. But when he got it he wasn't satisfied. Some people never are.

"Waiter," he yelled, "bring a charge of dynamite and a hatchet and an extra double steam power coke hammer! This chicken's got to be carved, even if it is made of harveyized steel."

The waiter was desolate.

"Very sorry, sir," he said, "but that always was a peculiar bird. It even objected to be killed, though we always do everything with the greatest of kindness. But this bird, sir, actually flew away, and we had to shoot it, sir—yes, shoot it! It flew on to the top of a house, *and*"

"Say no more," said the irascible customer. "I see it all now. You shot at it and brought down the weathercock *by mistake. John, my friend, all is* forgiven."—Chicago Record Herald.

The Similarity.

"Can any of you fellows tell me," remarked the puzzle editor, "why trouble is like the banana?"

"Probably," replied the society editor, "because the worst of it is frequently on the inside."

"Or possibly," suggested the financial editor, "because the riper it gets the more disagreeable it is."

"You fellows make me tired," sighed the puzzle editor.

"Well, perhaps you can enlighten us," caustically rejoined the financial editor.

"Certainly; simply because it comes in bunches."—Colorado Springs Gazette.

A Fair Inference.

The woman was only about five feet tall, but very large in every other way. In fact, she had to hunt up a sofa in order to sit down with comfort.

The thoughtful man was observing *her critically*.

"Well?" suggested his companion inquiringly.

"I was thinking," returned the thoughtful man, "that if her mind conforms to her figure she must be a very broad minded woman."—Chicago Post.

Base Slander.

They chit chatted over the tea table, those girls. One was from Pittsburg and the other from New York. The game was to get acquainted.

"Don't you Pittsburg girls just love repartee?" asked the one from New York.

"Yes, it is good," returned the one from the city of wealth; "but, don't you know, I prefer oolong."—New York Tribune.

Understood.

Linzee—There's nothing I like better than hard work.

Morris—There's nothing you like better when somebody else is doing it.

Linzee—That's understood. I hope you didn't think I was such a fool as to like to do hard work myself, or any *other kind, for that matter!*—Boston Evening Transcript.

Hard Luck.

Weary Waggs—Durn it! I've lost me code book, an' I can't tell wedder dat means shotgun or pie.—New York Journal.

How to Do It.

"I would like to find out how many idle men there are in town."

"Well, just start some laborers to digging a sewer."

"But they won't be idle."

"No, but every idle man in town will *stand around and watch them.*"—Philadelphia Record.

So Candid!

Playwright—*My new play* was brought out last night. At the close of the first act there were loud and persistent call for the author.

Simpleton—You don't say! To the they could be so vindictive as tha Boston Evening Transcript.

Spoke From Experience.

Teacher—Give me a definition of "cable" and use the adjective in tence to illustrate.

Claude—"Operable," capable of worked. Example, "My father able."—Philadelphia Ledger.

A Perfect Dear.

Mildred—That English earl your sister married is a dear little fellow, isn't he?

Sadie—Dear? I should say so. Papa *paid half a million for him.*—Kansas City Journal.

This May Be True.

"Say, pa," piped up little Johnny Bumperknickle, "what's a double chin."

"A conversation between your mother and grandmother, my son," replied the old man.—Cincinnati Enquirer.

An Expensive Roast.

"Now that you have at last killed a rabbit, I will prepare it myself."

"Oh, don't, dear; let the cook do it! Just think, the rabbit has cost me almost $50."—Fliegende Blatter.

FROM UNDERSTUDY TO STAR

By RICHARD KANN

Copyright, 1902, By T. C. McClure

The understudy clause in her contract was its one redeeming feature. Without that she would never have survived the twelve weeks of "one nights." The hope that some night she would be given an opportunity to sing the prima donna role buoyed her up.

But mere ambition was not alone responsible for her wish to make an entrance with the full chorus dressed "up stage" to do her honor, to sing the "Moon Song" that was always encored and to get first mention in the newspaper criticisms next day. There was something else quite as potent as ambition. It was a promise that if she remained a chorus girl for another season she would return to Bond Hill and the man with the large acreage whom her parents had selected.

And so, with a week stand in Denver looming up two days ahead, the season half over and no nearer to the leading role than when she left the east, she was frightfully blue, so gloomy, in fact, that she decided to tell Ned. He was the leading baritone. He had no need to be gloomy, and, more than that, he was essentially resourceful. She called him to her side of the car.

"I haven't told you before," she began, "because I wasn't sure, but this is my last season."

"Wait until we begin to play the week stands," he said hopefully. "You'll feel better then."

He noticed suddenly that the leaves of the book in her lap were splotched with something. He looked up at her eyes. A rain clad smile greeted him.

"It is really true," she said. Then she told him.

"And the other man," he asked anxiously—"don't you care for him?"

"I have promised," she said tearfully. "He is very nice, but I don't love him. They didn't like me to go out this season, but you know how hopeful I was.

"OBSERVE," SHE SAID TO NED, "THE ONE CARRIAGE AT THE STATION."

I thought that something might happen so that I could sing Miss Burton's role at least once, and if I sang it well"—

"And if nothing does," he interrupted, "you will go back to Bond Hill and actually marry him?"

"I've given up hoping," she said. "Nothing will."

"Something might," he said. "Suppose something did?"

Her hand lay passive in his.

The next day they reached Drexel, the last "one night" before the week at Denver.

"Observe," she said to Ned, "the one carriage at the station."

"It is in Miss Burton's contract," said Ned, "that she is to have a carriage to and from her hotel to the stations at every stand. It is one of the advantages of being a prima donna."

As she looked somewhat enviously at the carrying out of the clause of the contract that stood in her way, so to speak, a bustling advance man hurried to the carriage and ordered the driver to be at Miss Burton's hotel in time to make the 10:20 train for Denver Monday morning.

"I shall walk," she said sadly, "and I shall carry a little brown bag. After I have walked to probably a hundred more trains I shall at last walk to a train to Bond Hill, where, ever after, I shall ride in carriages."

"You told me," said Ned, "that if you ever had a chance to sing the lead Bond Hill would be postponed. And then perhaps"—

"Little boy," she interrupted, "I'm not to have a chance to sing. And I've rehearsed it until I've more notes than I had at the beginning of the season."

"If you could sing it in Denver," he said soberly, "they might engage you for something better—if you sang it to please them," he added.

"If I sang it to please them indeed," she pouted. Then the tears welled up. "It isn't a question of singing it well, Ned," she declared. "It's a question of singing it at all. I only want the chance—only the chance."

"If you sang it tomorrow night," he began, "you would have been a prima donna, if only for a night. Then you wouldn't need to go back to Bond Hill, and there wouldn't be any reason why you and I"—

"If any dire thing happens to Miss Burton," she declared, "and I do sing tomorrow night, then there will be no reason why I shouldn't do anything."

"Then you promise?" he asked her.

"Doesn't Miss Burton look healthy and strong?" she answered.

There was confusion on the train carrying the company from Drexel to Denver before twenty-five miles of the 200 mile run over the mountains had been covered. No prima donna was on board, nor was there another train reaching Denver before 9:30 that night, which was too late to hold a curtain for any one. Miss Burton for the first time that season had missed a train. There seemed to be no other solution.

"I told the man to call for her with a carriage at 10:20," reiterated the advance man to everybody. "I couldn't do anything more."

"It begins to look," said Ned, "as if you might be forced to sing the part tonight."

The managers thought so too. She was taken by them to the baggage car, where trunks were hurriedly overhauled. Miss Burton's costumes, she knew, would not fit her. So they were ruthlessly cut up and cut down again to fit. In fact, she was so busy with the gowns and the music, which she ran over while she was not being fitted, that she was at the theater almost before she had time to think of anything, even of Ned.

Denver didn't know that the very pretty girl who got three encores for the "Moon Song" was not Miss Burton. Denver didn't know Miss Burton anyway, so why tell it that it was hearing an understudy? thought the managers. But somehow, when the dramatic men got back to their offices, they found that some one had telephoned during their absence that Miss Burton had missed the train at Drexel, and that they had heard her understudy.

"We trust," one of them wrote the next morning, "that Miss Bondhill, who appeared in Miss Burton's stead last night, will continue in the part during the week. It would be hardly possible to improve upon her work."

Miss Burton, greatly excited, arrived at the theater in time to see the last act.

"It seems to me," she said, "that that horrid cabman purposely missed the train. It wouldn't surprise me to learn that some one had bribed him to leave me behind," she finished.

"Ned, did you hear what she said?" the understudy whispered.

"It occurred to me at Drexel," replied Ned blandly, "that it might be possible to do what she suggested was done."

"Ned, you don't mean"— she began.

"I mean," he interrupted, "when you sign your next prima donna contract don't have inserted in it a carriage clause. Some one else who didn't wish to return to Bond Hill might do it to you, and although I can't offer you carriages and acreage I can offer you a"—

"I don't care for carriages anyway," she said.

The Word Grotesque.

"Grotesque" is derived curiously from the word "grotto." Ancient Roman families often had artificial grottoes in their grounds, and these were decorated with quaint paintings and whimsical figures, such as we should term "grotesque." Commonly, these were fanciful and incongruous combinations of parts of plants or animals.

Conspicuous examples of the grotesque in classical art were the centaur, a horse's body joined to a man's head and shoulders; the griffin, a monster combining a lion and an eagle, and Scylla, a sea monster, with woman's head and fish's tail, a peril, as ancient poets sang, to mariners sailing between Sicily and Italy. In mediæval times her place in grotesque art was taken by the mermaid, a more poetical fancy.

The middle ages used the grotesque chiefly in ecclesiastical gargoyles, the best of which are the "devils" of Notre Dame referred to in Victor Hugo's "Quasimodo." The idea of the devil as a man with horns, hoofs and a tail is probably drawn from grotesque art.

Hardy Meat Eaters.

Many races of men live entirely on animal food, and these are the most hardy and from all I have been able to gather on the subject the most free from diseases of all kinds. Sir Francis Head says of the Pampas Indians: "They are all horsemen, or, rather, pass their lives on horseback. In spite of the climate, which is burning hot in summer and freezing in winter, these brave men, who have never yet been subdued, are entirely naked and have not even a covering for their head. They live together in tribes, each of which is governed by a cacique, but they have no fixed place of residence. Where the pasture is good they are to be found until it is consumed by their horses, and they then instantly move to a more verdant spot. They have neither bread, fruit nor vegetables, but they subsist entirely on the flesh of their mares."—Gentleman's Magazine.

His Arduous Duties.

Captain Sigsbee tells of a conversation he once overheard between two marines who were arguing as to who had the least work to do on board a man-of-war.

"It's the chaplain," said the first.

"How'd you make that out?" asked the second.

"Because he ain't got no work to do and all day to do it in."

The second marine snorted his disgust. "You ain't got it right, Jack," said he. "It's the cap'n of marines."

"How's that?"

"Well, me boy, as you say, the chaplain's got nothin' to do and all day to do it in, but the cap'n of marines he ain't got anything to do and all day to do it in and a lieutenant of marines to help him do it."

Sick

Headaches and Dizzy Spells,

Weak, Nervous, Wretched, Tired,

Until Dr. Miles' Nervine Cured Me.

Are you in a "poor condition?" Are you almost ready to give up from exhaustion, nervousness, headaches, backaches, and dizzy spells? No need to mention the details of a run down or "poor condition" to those who are suffering. Better to tell you of Nervine, the remedy sold on a guarantee to help you, and restore your poor weakened nerves to life, strength and health.

"Dr. Miles' Restorative Nervine has done a great deal for me. In the fall of 1897 my health was in a very poor condition. Extreme nervousness, dizzy spells and sick headaches made me most miserable. I had been under the care of our local physician for some time, but got no better. I was on the verge of nervous prostration. Had no appetite, and could not sleep. I grew worse as the dizzy spells continued and lost flesh and strength. Oh! those awful days. A lady friend who had taken Restorative Nervine advised me to try it. I bought a bottle at the local drug store and when it was one-half gone I noticed that the medicine was helping me. I continued taking it according to directions until I had used three bottles when I felt so much better I stopped taking it. I feel that my present greatly improved health is all due to Dr. Miles' Restorative Nervine. I am grateful for the benefit I received and recommend the Nervine wholly on its merits as a nerve tonic and restorative."—MRS. P. M. HOGOBOOM, Dalton, Mass.

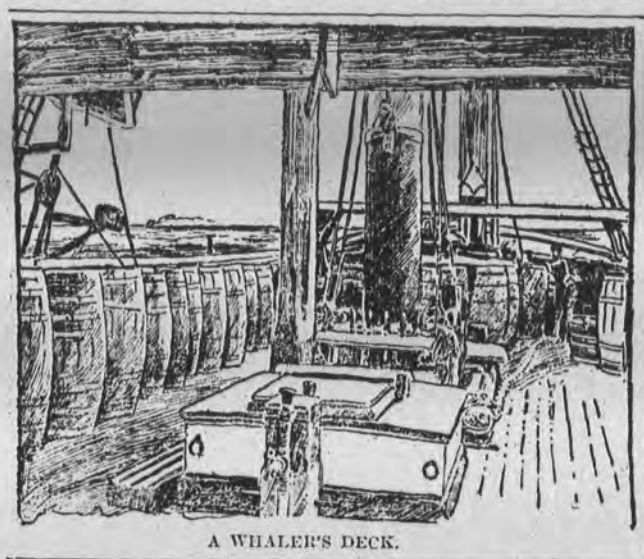
HARPOONING A WHALE.

One of the Oldest Forms of Big Game Hunting.

PLENTY OF DANGER IN THE WORK.

SO many American whalers are going to seek the big "fish" in Baffin Bay waters this season that the Canadian Government has decided to charter a sealing steamer to cruise there to prevent the Yankees from "violating Canadian customs laws." It looks as if the "prostrated American industry" were about to awaken to something akin to vigor.

Years of more or less desultory whaling have given the sea giants a chance to recuperate, and that they were not guilty of race suicide during their time of rest is proved by the fact that whales are plentiful in all the seas again.



A WHALER'S DECK.

For a rich American, eager to try real sport, there is a great chance now. Whaling, one of the oldest forms of big game hunting known, is the one field which has not been fittingly exploited by the amateur sportsman. In a time when lion and tiger shooting are mere routine sporting affairs to hundreds of wealthy men, the whale should appeal with great force.

To the man who has exhausted even the delight of the sixty-mile-an-hour automobile, there is an unlimited field. The chances are that if he once gets an opportunity to taste the unbridled and terrific pleasure of a "Nantucket sleigh ride" he will view his auto machine as a tame thing ever afterward.

The Nantucket sleigh ride is so common an experience with whalers that they are prone to speak of it in disappointingly matter-of-fact language. But, for all that, there isn't an old whaler of them all whose nostrils will not dilate with zest when he thinks upon it. And the landsman who ever has had the rare fortune to experience one is not likely to find anything else in all the rest of his life that will not seem tame compared with it.

Few landsmen ever have the opportunity. When a whaleboat lowers to fight a sixty-foot whale the business is too important to incumber the craft with unskilled passengers. And not many landsmen would really care to go into the whaleboat even if they could, when they behold, wallowing in the sea, the huge thing that is to be attacked.

The ride begins after the whale has been harpooned and when the boat-header considers it time to draw up alongside and begin lancing. The first thing that is done is to haul in upon the harpoon line until the boat is brought as close to the running whale as is consistent with the extremely delicate margin that the whaler allows for safety. "Safety" to the whaler really means to remain just about an inch or two beyond the reach of the vast flukes with which the big beast is beating the sea.

Having hauled as far up on the whale as possible, the boat-header reaches over the bows and lifts the line out of the chocks. Swiftly he brings it around the outside of the boat and passes it to the bow oarsman, who has faced around on his thwart so that he looks forward.

He at once lays back on the line and holds fast with all his might. And immediately the boat dragged like a railroad car by that mighty living locomotive, begins to run parallel with the side of the whale and just a few feet away from him, being prevented from running right on top of him by the oblique strain of the line.

Now, if the harpoon is well forward in the whale, the boat hangs in a precarious but sufficient arc of safety, for the swinging tail hammers the ocean behind it and the wildly sweeping jaw unavailingly searches the sea in front.

The boat-header braces himself in the bows until he is based firmly as the stem-post and begins to poise his long, keen, razor-edged killing lance waiting for the opportunity to thrust it into the whale's life. Sometimes the opportunity comes within a minute after hauling up on the big "fish." Sometimes it does not come until the boat has been towed for many miles. It does not require very much time to tow a mile when a sixty-foot whale is doing the towing.

As long as the whale runs in a fairly straight course the boat will hang to him like a terrier. He may champ and bite and hammer the ocean into acres of froth with head and flukes and tail and never shake it off. His only chance for retaliation is to run deep or to "mill." "Milling" is the act of turning suddenly and so bringing the boat within reach of flukes or jaws.

The position of the bow oarsman is no joy in a Nantucket sleigh ride. The chauffeur in a racing automobile is in a paradise of ease compared with him.

He must keep the boat in position by his unaided strength. From the time he gets the line until the ride is ended he drives into a smothering sheet of flying spray. When the sea is high every billow is hit by the boat with a smash that wrenches his arms. The strain on the wet line cuts and burns his hands. And if he lets a foot of it slip he is disgraced. Once he is in it, he is in it for good, with no chance of help or relief till the wild adventure is done.

Often the boat is hauled so close on a harpooned whale that the harpooner leans over and steadies himself by resting one hand on the butt of the harpoon that is sticking in the great sea mammal, while with the other he drives the killing lance. Again and again the long weapon is buried deep in the black sides, until suddenly thick, black-red clots of blood well from the wound, showing that the "life" has been reached.

Then it is "back," sometimes for dear life. A whale may take his death so quietly, so passively, that it is pitiable to see so mighty a swimmer killed thus easily by man. Or he may fight till the boat seems only a black atom in the sudden uproar that smites the ocean and sends tons of water rising till they seem high enough to wash the sky.

The danger from a fighting whale is not only in the whale itself. The boat is a perfect man-trap of keen deadly tools. Lances and harpoons, cutting spades, hatchets, knives and boat hooks, all sharpened to the finest edge the ship's grindstone can give them, fill the boat. If the whale gets at it and hurls it into the air, the men find themselves in murderous company when the weapons come raining down on them.

The harpoon line goes hissing out—a serpent of rope far more dangerous than any cobra, for let but kink in the least and catch a man and he will fly overboard with it and out of sight as if he were a mere splinter of wood.

So there are enough sporting chances in the whale to excite and content the most exacting of sportsmen. And the size of the trophy if he "bags" a whale certainly leaves nothing to be desired. —Washington Star.

A Folding Four-Armed Anchor.

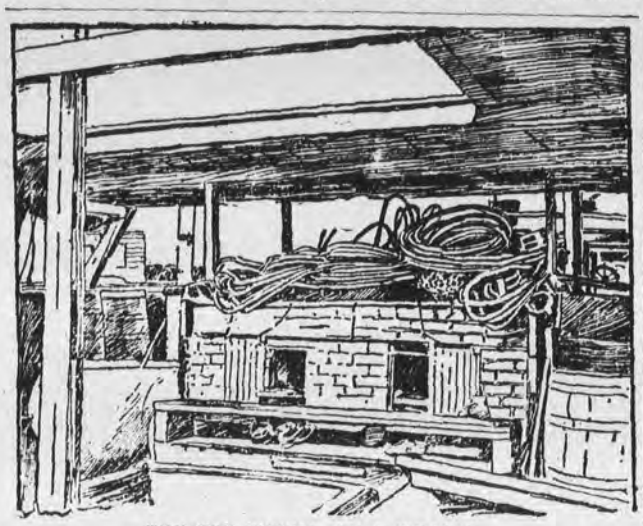
A new improvement in anchors is shown herewith. It is the invention of Henry James Brooke, a retired engineer of the Danish navy, and now residing at Svendborg, in that country. It is described as an automatic stockless four-armed anchor, in which one pair of arms is rigidly fastened to the shank, while the other pair is arranged so as to be capable of moving up the lower part of the shank, which is formed like a screw with a great pitch.

A FOLDING FOUR-ARMED ANCHOR.

The length of the screwed part of the shank and the pitch are arranged in such a manner that the movable pair of arms will shift from a cross position when resting on the fixed pair of arms, to a parallel position after having made one-fourth of a revolution in moving to the extremity of the screwed part of the shank. The advantage of this arrangement is that the anchor is capable of lying flat down on the deck and of automatically assuming the cross position when heaved overboard, so that at least two flukes must take hold.

Longevity in Paris.

There are at the present time five men in Paris over 100 years of age. It is noteworthy that none of these Methusalehs is married. There are 331 nonagenarians, eighty-five of whom are within a few months of completing their century of life. Of octogenarians there are no fewer than 10,617.



THE TRY WORKS ON A WHALER.

Evolution of the Potato.

Some of the Many and Varied Uses Which It Is Serving.

TO-DAY Germany fairly rivals Ireland with its potato crop and outdoes most other countries. Fully an eighth of the arable land of the empire is planted to this nutritious vegetable. Half the large yield is used directly as human food; a considerable other portion is given over to fattening stock. There still remains an enormous surplus after that, however, and it is the success with which the Germans have met in turning this surplus into manufactured products that is most remarkable.

Among these manufactured products are starch, glucose, potato flour, dextrin and starch-sugar, each of which appears prominently on the list of German exports, all together contributing large sums every year to the profits of German manufacturers and exporters. But the alcohol which the Germans make from the potato is the most valuable and wonderful product of all. This as a light producer fairly rivals the electric current, it is said.

The apparatus for its practical use includes lamps, chandeliers, street and corner lights, in which alcoholic vapor is burned like gas in a hooded flame, covered by a Welsbach mantle. So used, potato alcohol is described as burning with an incandescent flame equaling the electric light in brilliancy. Indeed, we are officially told now by our Consul-General at Berlin that potato alcohol is competing with gas and electricity with increasing success every year.

In the problems of heat and power production, too, the lowly potato has been brought into use, and the alcohol from it has been applied to warming and cooking stoves, to steam locomobiles, to threshing, grinding, fuel-cutting and other agricultural and mechanical appliances. The advantages said to be found in its use are immediate readiness for operation; dispensing with coal, water and firemen; freedom from odors and danger of fire, and greater economy of maintenance. Possibly there is some exaggeration in these claims. But figures given plainly show that the potato, as cultivated in Germany, has produced a real competitor for at least benzine and petroleum for motor purposes.—Providence Journal.

Demand For Railroad Ties.

The annual demand for railway ties is 400 to each mile of track and the average life of a tie is seven years. It is an unusual acre of forest that has 300 trees that will make three ties each, and it takes fifty years to grow a tree that will make three ties. Therefore, twenty-five acres of forest are necessary for every mile of track. Electric railways included, there are in the United States about 250,000 miles of road.

An Indian Legislator.

Bear Tracks, outside the five civilized tribes of the Indian Territory, is the only Indian legislator in the world. He is a member of the Legislature of South Dakota and resides at Hot Springs. Bear Tracks is an Ogalallah Sioux, and is an expert barber by trade—rather, perhaps, close to the old-fashioned habit of the Indian of taking the entire scalp. He has made and lost a fortune, but at this time is in very good circumstances.

Rejected For Stammering.

As stammering is a cause of rejection for military service its frequency is shown by the statistics of the examination of recruits in different nations. The number rejected as stammerers is 7.50 per thousand examined in France, 3.23 in Switzerland, 2.87 in England, 2.2 in Austria, .86 in Italy and but .19 in Russia.

LIGHT AND VENTILATION.

In general the sick room should be the lightest, most cheerful and best ventilated room in the house, as pure air in the sick room is of the utmost importance, but of course, anything like a "chill" should be avoided, and it is not well to allow a draught or current of air to pass directly over the bed of the patient. A good way to secure a supply of fresh air is to get a board five or six inches wide, and as long as the width of the window; raise the lower sash, place the board under it, and the fresh air will find its way in between the sash by an upward current. Absolute cleanliness should be observed, and no vessels that have been used as dishes with bits of food upon them allowed to remain in the room. If, as is often the case, the room has a "stuffy," disagreeable odor in the morning, put a spoonful of ground coffee into a saucer, and in the centre place a very small piece of camphor gum, and touch a match to it; as it burns keep pushing the coffee into it until the air is sweet and pure; it is wonderfully refreshing for both nurse and patient.—Philadelphia Record.

A NOVEL DUSTING CLOTH.

Take one yard of heavy shaker flannel and cut off ten inches for a double ruffle. Sew the remaining cloth up the sides, as in making a pillow slip, insert the double ruffle in one end, make a hem in the other end, and through this pass a shirring string. Slip the bag over the brush end of the broom, and draw the shirring string tightly around the broom handle. For wiping the tops of picture frames and dusting down walls, you will find this unexcelled. It is also convenient for brushing ceilings, though care should be taken not to press too hard, as the dust is apt to be rubbed in by so doing; use a light, quick touch.—American Agriculturist.

VEGETABLE TIME-TABLE.

It is averred by many noted teachers of domestic economy the average house wife does not know how to cook vegetables, and that this is the reason Americans as a rule do not care for vegetables.

If vegetables are not properly cooked and seasoned they, of course, lose much of their flavor. They are tasteless, watery, or else hard and indigestible. The following list may help inexperienced housewives to achieve success in this rather difficult task:

Asparagus	45 minutes
Young and fresh green peas	15 minutes
New onions	45 minutes
Spinach	10 minutes
Carrots, cut in dice and stewed	1 hour
New beets	45 minutes
String beans	45 minutes
Kale	45 minutes
To simmer a head of cabbage	2 hours

Another good rule worth remembering is that, in the main, the vegetables that grow under the ground should not be cooked in salted water, while vegetables that grow above the ground should have salt put into the water when they are put on to cook, a teaspoonful to each half-gallon of water. Underground vegetables, as a rule, are rich in woody fibre, which is made tough by salt water.—Philadelphia Telegraph.

Carrot Salad—Rather new is carrot salad. Cook the carrots in boiling water and after cutting them in strips sprinkle them with sugar and French dressing and place in lettuce cups. A garnish of sliced lemon is very effective.

Garnishing — The appearance of a salad has a great influence upon the appetite. Nasturtium blossoms make a pretty decoration and also add a flavor to green salads. Slices of tomato covered with the sieved yolk of eggs and the sieved whites placed round the edge of the bowl are attractive adjuncts.

Tomato Fritters—For tomato fritters stew a quart tin of the vegetable, or a quart of fresh ones, until they are reduced one-half. Set aside to get cold, then season with salt, pepper and celery salt. Add the beaten yolk of an egg and sufficient fine bread crumbs to make a mixture thick enough to hold together when dropped from a spoon into smoking hot lard.

Broiled Chicken—Only young chickens can be used for broiling. Split them down the back, wipe them clean, sprinkle with salt and pepper and rub with soft butter; place them on the broiler over a slow fire, the inside down; cover with a pan and let cook for twenty-five minutes; turn, let the skin side down when nearly done; put them on a hot dish and spread them with maitre d'hotel butter. Garnish with parsley or water cress and thin slices of lemon.

The Funny Side of Life.

ORIGINAL.

Behold the baby, precious pet!
He hasn't learned to talk as yet.
And, nevertheless, strange truth to tell,
He knows a splendid college yell.
—Washington Star.

ACCOMPLISHED.

Ethel—"Isn't Judy newsy?"

Mayme—"Isn't she, though? She tells so much I don't see how she gets time to hear anything."—Detroit Free Press.

HER TITLE TO IT.

Nell—"Is she a society woman?"

Belle—"Yes, indeed. She belongs to no less than eighteen societies for the suppression of as many things."—Philadelphia Record.

PROFESSIONAL.

The Alien—"Don't you like to stand in a great city street and feel the great pulse of humanity?"

The Citizen—"Yes; but I'm a physician, anyway."—Detroit Free Press.

IN DESPERATION.

Fan—"So she's engaged to Mr. Polk. I wonder how he came to propose."

Nan—"I don't believe he did come to do it, but she was determined not to let him go until he did."—Philadelphia Public Ledger.

GENEROUS HOST.

Tommy—"Ma, can I play makin' believe I'm entertainin' another little boy?"

Mamma—"Yes, dear, of course."

Tommy—"All right. Gimme some cake for him."—Philadelphia Press.

IN THEIR ABSENCE.

"That reminds me," said Barnes, at the height of the street fight, "why are the police like electricity?"

"Give it up," said the chorus.

"Because," said Barnes, "if it is an unseen force."—Boston Transcript.

THE INSUPERABLE DIFFICULTY.

"Why don't you take up golf?"

"What's the use?" inquired the indolent man. "I might learn to hit the ball, but I could never master the vocabularly necessary to tell my friends how it happened."—Washington Star.

MODEST YET PROVOKING.

"Bimler made the landlady dreadfully provoked at dinner the other day."

"What did he say?"

"All he said was, 'Just one more strawberry, please.'"—Cleveland Plain Dealer.

STRICTLY BUSINESS.

Mrs. Smick—"Why do you pay your maid such exorbitant wages?"

Mrs. Smack—"Oh, it pays in the long run. She never breaks those expensive vases any more for fear we will take it out at the end of the month."—Chicago News.

HIS INTEREST.

Gertrude—"You say you've only been there two weeks and have an interest in the business?"

Vansant—"Yes; I was two hours late this morning, and the boss told me I'd better take some interest in the business in the future."—Magazine of Humor.

NOT RESTING.

"I suppose you are resting, now that the Legislature is not in session."

"My friend," replied Senator Sorghum, "you don't understand this business at all. The work of making preliminary arrangements is the hard work. When the Legislature's in session all you have to do is to see that the goods are delivered."—Washington Star.

ITS CAPACITY.

Little Clarence—"Pa, what is a volcano?"

Mr. Callipers—"A volcano, my son, is a cramped and feverish mountain which belches forth fire, smoke, lava, statistics, adjectives and 'copy' for the magazines, for two years or more after the first eruption, and beggars description every time it is described."—Puck.

THE PENALTY.

Mr. Workhard—"My dear, I have lost my situation, and it just happens that I haven't a dollar ahead. We must go to the poorhouse for dinner."

Mrs. W.—"Surely some of the grocers with whom we have dealt for so many years will trust us!"

Mr. W. (sadly)—"No, I have no credit anywhere. We always paid cash."—New York Weekly.

VERY SENSITIVE.

"We must not look down on any one because of his humble circumstances," said the broad-minded citizen. "Let us remember that some of our ablest statesmen started out as rail splitters."

"Yes," answered the man who is painfully precise, "I don't object to a rail splitter in statesmanship, but I must confess that an infinitive splitter annoys me."—Washington Star.

SIMPLY IMPOSSIBLE.

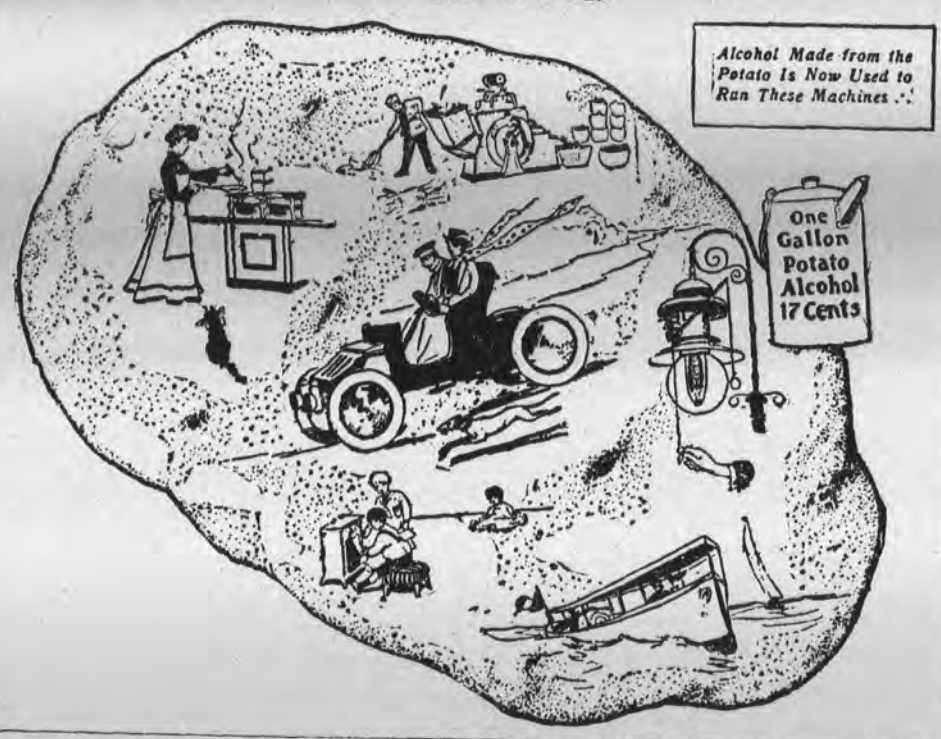
"Have you got the plans completed for your new house yet?" some one asked him.

"Not quite," he replied. "There is a difference of opinion between my wife and me as to the interior arrangements. She says the pantry is too large and that there are too many closets."

Without another word the medal for the biggest lie of the evening was awarded to him.—Chicago Tribune.

Are Now Extracting Fuel Power from the Potato

Germany Has Found that the Tuber Is Good for Something Else Besides Generating Human Energy.



Do Old Men Die From Idleness?

THERE is certainly far more evidence for the belief in the dreariness of old age after active work has been laid aside than from the shortening of life which results from the enforced inactivity. Two notable instances, and perhaps freer from doubt than most as to whether it is ennui alone that kills and not the disease of old age of a more specific malady, are those of Napoleon the Great and Bismarck. The one lived six years in St. Helena, the other eight years at Friedrichruh, each "eating out his heart." If ever there were men who ought on the supposition to have been killed by the total suspension of their activities these two ought to have been, but it would be extremely difficult to show that they were. Though Napoleon was no more than fifty-three, yet it was the specific disease of cancer of the stomach of which he died, and the connection between his exiled loneliness and the direct cause of his death does not seem very apparent. On the other hand, Bismarck, at the age of seventy-five, when he was dismissed from the Chancellorship, could not have had a likelihood of more prolonged years than he actually achieved out of office even if he had continued in office until the end. A wise man, if not too dyspeptic, will never lose touch with actual life. There are old men with young hearts, and the elder when he has a young heart is perhaps the most delightful type humanity can show us.—London Saturday Review.

Concerning Spinsters.

By Lilian Bell.

BUT my strong fortress for the unreconciled spinster is not built by the work of her hands, whether it be egg-gathering, planting seeds or picking flowers. It lies in the cultivation of her imagination and her sense of humor. If you have these two you may laugh at fate, for you are clad in an armor which never rusts nor disintegrates. If you are inclined to be bitter, to view yourself as the football of destiny, kicked from one discomfort to another; if you think people snub you; if you suspect your friends of growing cold toward you, or even of deliberate slights—if you are in the habit of sitting in the dark and brooding over these things, the fault of the whole matter lies within. It is your fault because you take a morbid point of view. Think how unwholesome and malarial your mind must be. Consider the stagnant state of your heart. Think of the microbes which are eating your soul away. Such a disagreeable person as you are determined to be deserves to be slighted and snubbed and left out of parties and picnics. Who wants such a walking funeral about?

Don't lay it to the influence of the hall bedroom. That would not be fair. But you may lay it to the influence of the boarding-house, which generally consists of hall bedrooms. If there is any one thing worse than the boarding-house habit, it can only be the wrapper and curl-paper habit of certain slovenly women. If a woman wears a wrapper mornings and keeps her hair in curl papers at breakfast, she deserves never to get a husband. And if a woman with a husband does it, she deserves to lose him.—Harper's Bazar.

America the Cradle of Asia.

By Prof. Stewart Culin.

OUR idea that America is a new world, not only from the viewpoint of European discovery, but actually, so far as concerns its inhabitants and their civilization, is one that has been accepted almost without question. It is, indeed, a fundamental notion, having back of it all the impetus of religious sentiment and historic tradition. Almost from the period of discovery, learned writers have endeavored to confirm the theory of an Asiatic immigration, adducing the resemblance of the arts, religions, and symbolism, and the supposed identities of the language and physical types of the Indians with those of the inhabitants of Asia.

Preoccupied with the notion that America is the new world, they have seemingly lost sight of the fact that these resemblances offer quite as good proof of American intercourse with Asia as they do of an Asiatic invasion of our continent.

In supporting the latter view the writer is aware that it premises the same, if not a higher, antiquity for man on the American continent as is revealed by the most remote historical perspective of Egypt or Babylon; that he is called upon to establish the American origin of the particular things to which he refers, their birth and subsequent development in America, and furthermore to demonstrate the probability of their transfer from America to other civilizations.

The games of the Eastern continent—and I speak now not so much of the present day, but from what we know of the remote past—are not only similar to, but practically identical with, those of America, and are not only alike in externals, but, if we may so apply the word, in their morphology as well. And, it may be added, they extend over into Asia from America as expressions of the same underlying culture. They belong to the same culture.

Man evidently wandered far and wide over the world before history began. Shall we, with our American explanations in mind—and they hold good not alone for games, which are but the "stalking-horse" of the student—shall we not assent to the claim that ancient America may have contributed, to an extent usually unimagined, her share of what is now the world's civilization?—Harper's Magazine.

Whither Are We Bound?

By Garrett P. Serviss.

AN importance which relatively few persons are aware of attaches to the expedition which has just gone to Chile from the Lick Observatory in California. Its object is to find out whither we are all bound.

Everybody has heard that the Solar System is flying swiftly toward the south. It is a plunging flight that carries us more than 43,000 miles straight through the ether every hour of the day and night. It is a motion that has nothing to do with the earth's annual revolution about the sun, except as it prevents that revolution from carrying the earth back turn and turn to the same spot in space.

In truth, we never get back to the same place. Every new year comes in with the globe at a point more than 300,000,000 miles nearer to a very bright northern star, named Vega, than it was a year earlier. As far as the evidence now in hand goes, the flight of the sun toward the north is as straight as that of an arrow, but the path described by the earth, since it is compelled all the while to circle round and round the flying sun, is a great spiral.

And thus we sweep onward, moving continually into new regions, running through what perils nobody can guess—perhaps none at all—and impelled by a force as mysterious as that which drew the unfortunate ship in the Arabian Nights to be wrecked on the Mountain of Adamant.

It is this strange voyage of the sun and its worlds through the unexplored ocean of immensity that the Californian astronomers have gone to South America to investigate.

The only way in which we become aware of the great flight of the Solar System is by watching the counter motions of the stars. We are like people on the deck of a ship moving swiftly through a crowded harbor. The direction and velocity of our motion are indicated by the changes in the apparent positions of the other craft and the shores around us. Ships ahead of us, which we are overhauling, loom continually larger; those behind, which we are leaving, dwindle in the distance.

This does not quite apply in the case of the stars, because they are almost infinitely far away, and the change in their brightness resulting from our approach to those in the north, and our retreat from those in the south, is too small to be noticed even from year to year. But, luckily, the waves of light do the work for us. The light of the stars, toward which we are going has its undulations practically shortened by our swift approach, and the light of those which we are leaving behind has its undulations practically lengthened, and the spectroscope not only detects these changes in the light-waves, but enables us by their means to measure the rate of our motion, and also to deduce its exact direction.

The problem is complicated by the fact that the stars also are in motion, like the sun, going in various directions, and with various speed, but that is a detail with which astronomers can deal.

Now, the precise object of the expedition to Chile is to examine the light of the southern stars from which we are flying away. They have been much less studied than have the northern stars, to which we are drawing nearer. It is as if the people on the bow of a ship, after watching for a long time the effects of their approach to objects ahead, should visit the stern in order to note the recession of objects behind. Through a combination of such observations the speed and direction of the ship's motion could be deduced.

But there are many other absorbingly interesting questions relating to the organization of the universe, and our place and rank in it, which will be brought nearer to solution by the success of the exploration of the southern heavens now beginning.

New York City.—Little jackets that can be slipped on whenever required are essential to a child's wardrobe and are shown in a variety of charming

CHILD'S JACKET.

materials. This dainty May Manton one is made of embroidered flouncing and is eminently well suited to the season, but the design suits flannel, cashmere, pique, linen and all the materials used for the purpose equally well. When straight edged goods are used the edges can be embroidered or trimmed in various ways.

The jacket consists of the yoke to which the pleated fronts and back, cut in one piece, are attached. Its neck is finished with a turn-over collar and the sleeves are the new full ones, that are tucked above the elbows, but form full puffs below, and are gathered into roll-over cuffs at the wrists.

The quantity of material required for the medium size [four years] is three and three-fourths yards bordered material eleven inches wide with one yard of plain material for sleeves; or three yards twenty-seven inches wide, or one and three-fourth yards forty-four inches wide when plain material is used.

AN EXCEEDINGLY SMART WAIST.

Woman's Waist.

Tucked waists are much worn and are exceedingly smart in all the materials of the season. The very smart May Manton one shown in the large drawing is equally well adapted to the entire gown and to the odd waist and is shown in white batiste with trimming of embroidery. It can be made from any of the washable fabrics or from silk or light weight wool, the trimming being embroidery or lace as best suits the material. Washable fabrics are made unlined. When silk or wool is used the fitted foundation is an improvement.

The waist consists of the lining, fronts and back. The back is tucked for its entire length at the centre, the fronts in a full length group at each side of the front, and again at the shoulders to yoke depth. Between these groups of tucks the trimming is applied. The closing is made invisibly at the front beneath the tucks. The sleeves are the new full ones and are tucked to fit snugly above the elbows and form drooping puffs at the wrists.

The quantity of material required for the medium size is four yards twenty-one inches wide, three and three-fourth yards twenty-seven inches wide, three and one-half yards thirty-two inches wide, or two and three-eighth yards forty-four inches wide.

Gingham and Dimity Petticoats.

Well dressed women are having striped ginghams and figured dimities made up into petticoats to be worn with their light morning frocks this summer. These skirts are cut on a regular circular pattern to the knees, from which point any amount of trimming in ruffles, insertions, tucks and lace is lavished upon them. Developed on alpaca, sateen, moreen or other simple and substantial goods, a full ruffle with bands of shirring at top and bottom and in the middle is a pretty and sensible finish.

An Economical Departure.

Detachable flounces on petticoats are a departure that tend at once to economy and variety, one foundation, be it of silk or lawn, being asked to serve for the support of numerous additions in this regard. Undoubtedly the best method of securing these firmly in place is that of a stitched band on the skirt itself, accorded buttons at regular intervals, and the destined flounce buttonholes to correspond, though many there are who prefer a threading or lacing together of the two component parts.

Chain Pattern Foulard.

The women who always wear black, or black and white at the utmost, will hail with delight the pretty new Louisines and foulards in which the graceful chain pattern appears in white on a black ground. It is surprising what a variety of designs is supplied from this "motif." Bracelet chains, distended or collapsed; arabesques of chains and various geometrical patterns are among the collection. The stripe effect is produced at intervals by a vertical chain pattern arranged between bars.

Hats With Tall Crowns.

The hats with the taller crowns, although now to be found in all the first-class collections, are still comparatively few in number beside those with low crowns, and while there is intimation that the vanishing note of the plateau hat is in contemplation, there is reason to believe that hats with low crowns and shapes more or less flat will rule the mode as long as the existing season continues.

For Lounging Gowns.

For lounging gowns a great deal of silk is being used, soft silk and glace in one plain color, such as bright rose du Barry pink, Delft blue, apple green, all made with some severity, having long hanging sleeves and deep falling collars, some with lace hoods at the back.

Belts For Summer.

Patent leather belts will be worn through the summer with cotton and linen shirt waist suits. For afternoon and evening wear soft silk and ribbon belts wrinkled about the waist are shown, to be fastened in front with curious silver pins or the newer enamel pins in rich, deep colors. Some of the art nouveau pins are extremely handsome, especially when developed in rose gold.

Panama Suitings.

Panama suitings in shades of biscuit, dark blue, gray and several lighter colors are admirably adapted for summer frocks.

Checked Louisine.

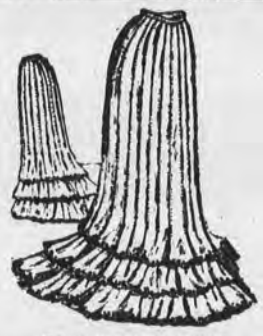
More serviceable ties are made of Louisine silk, woven in "shepherd's plaid," neat, small checks of brown or green, or black and white.

Woman's Tucked Triple Skirt.

Triple skirts make a feature of the season's styles and are exceedingly graceful. This very stylish May Manton one is made of cream colored canvas veiling with trimming of applique lace and is stitched with corticelli silk, but the design suits all the silk, wool, cotton and linen fabrics of fashion equally well.

The skirt is made over a foundation that fits snugly at the upper and flares at the lower edge and to which the two flounces are attached. The upper portion, or skirt proper, is gored, but the seams are concealed by the tucks. The fulness at the back is laid in inverted pleats.

The quantity of material required for the medium size is fourteen yards twenty-one inches wide, twelve yards twenty-seven inches wide, or eight yards forty-four inches wide, with eight and one-half yards twenty-one inches or five yards thirty-six inches for foundation.



TUCKED TRIPLE SKIRT.

DECKLED OR PLAIN.

A Question of Interest to Lovers of Books—Lovers of the Artistic in Books.

There are people of taste who still remain as strongly antipathetic to deckle edges in fine bound books as they do to deckle edges in tall collars, says the San Francisco Argonaut. They are continually putting the question to booksellers, "Why don't publishers finish books while they are about it, and not leave them all ragged?" And the booksellers are continually saying in weary voices — or perhaps condescendingly—"it's the style." The anti-deckle edge people have, however, at least one able champion. The New York Times says roundly that rough edges in bound books are a nuisance, and it defends its characterization with cogency. Originally the edges of books were left rough so that if rebound the leaves might be trimmed without making the page margin too narrow. In France, practically all books are issued in paper covers and rough edges, and the purchaser is supposed to have them bound according to his individual taste. In such a case the rough edges and wide margins are necessary and proper. But are they so where, as in this country, books are issued in permanent binding and are very rarely rebound? A rough edge is certainly a dust-catcher, as everybody knows who handles such books. To cut the pages requires a certain amount of labor, which, in large libraries, can ill be spared. If the rough edge is to make the reader think the paper is hand-made, then it is in most cases a deliberate misrepresentation. However, the publishers probably know their business, and are convinced that the generality of people want their fine books with rough edges. And until the majority of book buyers cease to clamor for deckle edges, deckle edges we shall probably have.

WISE WORDS.

To live long it is necessary to live slowly.—Cicero.

There are more men ennobled by study than by Nature.—Cicero.

An extreme rigor is sure to arm everything against it.—Burke.

Every man is a volume, if you know how to read him.—Channing.

An obstinate man does not hold opinions—they hold him.—Bishop Butler.

Never suffer the prejudice of the eye to determine the heart.—Zimmerman.

Great trials seem to be a necessary preparation for great duties.—E. Thomson.

We are immoderately fond of warming ourselves; and we do not think, or care, what the fire is composed of.—Landor.

Regard yourself as superior to the evils which surround you. Learn to dominate your environment, to rise above depressing influences. Look for the bright side of things, not the dark and gloomy side.—Success.

Whatever it be which the great Providence prepares for us, it must be something large and generous, and in the great style of His works. The future must be up to the style of our faculties—of memory, of hope, of imagination, of reason.—Emerson.

"I think as my land thinks," said a land owner; a saying full of meaning, that we may apply every day. Some, in fact, think like their land, others like their shops, others like their hammers, and others like their empty purses aspiring to be filled.—Joubert.

Knowledge is mental food, and is exactly to the spirit what food is to the body. It may be mixed and disguised by art until it becomes unwholesome; it may be refined, sweetened and made palatable until it has lost all its power of nourishment; and even of its best kind it may be eaten to surfeiting and minister to disease and death.—Ruskin.

Germantown's Extra Policeman.

If youthful tendencies count for anything there is a boy in Germantown who should one day be a captain of the mounted police or an officer in the cavalry. He is about thirteen years old and is the owner of a pretty and speedy pony. Every morning before breakfast he goes for a ride which is by no means the ordinary canter in search of an appetite. He has his regular rounds and has given himself specific duties which he performs just as though he were a member of the police force. He comes into Germantown by way of Upsal street. Some distance out he meets a mounted officer going to his post. There is a dignified salute on each side, a short parley, another salute and the two gallop away in true military fashion. At the corner of Upsal street and Germantown avenue the boy meets two officers returning from their rounds. They salute and gallop to Washington lane, where they salute again and part. Here the boy dismounts and waits for the patrolman to report at the box. The same military form is gone through with and after a few moments' conversation the boy gallops home to breakfast.—Philadelphia Press.

Tigers and Fallacies.

The great success of the Duke of Connaught in his tiger shoot will more than ever convince the world that India is so thickly infested with the striped beast of prey that the traveler takes his life in his hand when he ventures to this land of danger. Many people think that tigers and cobras are the inevitable business of a visit to India, with a dash of smallpox or cholera thrown in to keep the traveler from feeling dull.—Calcutta Journal.

Coroner's Inquest.

At a coroner's inquest on the case of a suicide held recently the foreman returned this remarkable verdict: "The jury are all of one mind—temporarily insane."—London Telegraph.

Progress of the Good Roads Idea.

THERE is no subject to which the Constitution has given more undivided attention than that of good roads, and we are highly gratified to see that the leaven of road improvement is working in almost every county in Georgia.

From day to day the Constitution has contained excerpts from the weekly press of the State telling how one county after another is directing its attention to improved highways, and it is evident that before many years the county in Georgia that hasn't a thorough system of modern, well-graded, macadamized or gravelled roads will be the exception and not the rule.

The frequent rains of the past winter have, as usual, made the roads almost impassable in a majority of the counties of the State, and this has helped to place the good roads idea uppermost in the people's minds. Farmers, whose hauling has been so seriously interfered with thereby, and merchants, whose trade has been correspondingly hurt, are coming together on the proposition that good roads are the cheapest in the end—that bad roads, in fact, as the Constitution has so often said, are about the most expensive luxuries that any community ever indulged in.

In connection with the good roads movement in Georgia it is both interesting and important to study what other States are doing in the effort to improve their highways. The Pennsylvania Legislature, for instance, has just appropriated $6,500,000 to be spent in road building throughout the State. New York and other States have a similar law providing for State aid for those counties that undertake to secure modern roads.

In Pennsylvania the State aid plan has taken firm hold. The plan now adopted is for the State, the county and the township to co-operate in the work of building and improving the roads. The State is to pay two-thirds of the expense and the county and township in which the work is done each one-sixth of the expense. The State has made available for this purpose $6,500,000 to be expended during the next few years.

The principle involved in the State aid plan is exactly the same as that involved in the scheme for National aid which has developed such popularity recently. The fundamental idea of both is that road improvement is not merely a matter of local interest and responsibility, but a matter of interest and concern to the whole people; or, to put it another way, road building is coming to be viewed as a species of "internal improvement" belonging in the same class as river and harbor improvements.

Another reason advanced why National and State aid are becoming so popular is the realization that, unless something of the kind is adopted, the burden of bad roads, like the poor, will be always with us. The bottomless roads of the country constitute a sort of "slough of despond," in which people are destined to flounder until some one comes along to help them out. In fact, the expense for improving the roads in many localities is a burden which the local population is wholly unable to bear. It is urged that whenever the State or the Nation reaches out a helping hand to such communities, they will grasp it and bend all their energies to the great work of improving their highways.

An Eastern man who has recently taken a trip through Texas says the enthusiasm with which the people have taken up the "good roads idea" is wonderful. In some counties they are in danger of "going wild" on the subject. Funds are being raised, mainly by the issue of county bonds, and a similar plan is being adopted in North Carolina.

All of these plans can be studied with profit by the people of Georgia, now that we have become aroused to the necessity of improving our highways. Too much attention cannot be given this all-important subject.—Atlanta Constitution.

Worthy of Emulation.

Judge W. A. Falconer, of Fort Smith, Ark., has applied the principle of State aid in a new way. As State aid is not yet forthcoming in Arkansas, though it will soon be provided for Judge Falconer put himself in the State's place, and offered to donate $2500 to that one of the four most important roads in the township which would raise the largest bonus to obtain it. One road raised $2350 in guaranteed cash subscriptions, in addition to the engineering work and unlimited quantities of stone. To the road coming next in this friendly contest the Judge offered one dollar for every dollar it would raise, provided it would raise as much as $2000 by April 1; that road had on March 8 in cash and in checks payable April 1, $1800, and expected to raise $700 or $800 more. Judge Falconer has done more than help Fort Smith to get good roads; he has set an example that may well be emulated throughout the Nation.—Good Roads Magazine.

Give a Rebate.

The council of Hammonton, N. J., has passed an ordinance allowing a rebate of $1 in taxes for each wheel on a wagon having a tire four inches or more in width.

Wild red deer are increasing so rapidly in Devon and Somerset, England, that special efforts are to be made to reduce their numbers.

WEATHER AND CROP BULLETIN.

Plowing and Planting of Corn Delayed by Drought.

New Brunswick, June 3.—Moderately warm days and cool nights, and local showers, heavy in places, on the 28th, 29th and 30th, have characterized the week. These conditions have favored all surface crops, and checked deterioration so noticeable during previous week, but the rain, generally, has been insufficient to break the long drought in many places. Plowing and the planting of corn have been resumed in Cape May county, and in places in Union, Hunterdon and Sussex counties, where the rainfall was sufficient to moisten the soil; but in many places this important work is at a standstill, owing to the dryness of the soil.

The following are the heaviest rainfalls reported, in inches: Cape May City, 1.01; Plainfield, 0.49; Lambertville, 0.49; Beverly, 0.37; Sussex, 0.35, and Trenton, 0.30. Remaining stations report measurements ranging from a trace to 0.12. The total rainfall, at the central office, for the month of May, was 0.41 inches. This amount is the last total for that month we have any record of.

Elizabeth—The long drought, with its very damaging effects to all crops, continues; much corn yet to plant; hay crop light. O. WOODRUFF.

CROPS IN BAD WAY.

Franklin Dye, secretary of the State Board of Agriculture, has just returned from a tour of the State, and of the condition of crops because of the drought he has said:

"In the strawberry secton, particularly in Cumberland county, the returns from the strawberry crop are very small. I believe one-half of this crop will be cut off. Last year was the best year that was ever experienced in New Jersey for strawberries, and great returns were expected this year from the crop, but the drought has dealt the product a severe blow.

"Sweet potatoes and tomatoes have also suffered in South Jersey. The dry weather has set the early crops of tomatoes away back, while, owing to the dryness, it has been almost impossible to keep the sweet potato plants alive. So thoroughly dry is the ground that no amount of wetting or sprinkling will suffice through good heavy rains would yet save the sweet potato sections and the early truck crops.

"The frost early in May, destroyed over 100,000 tomato plants. With the exception of light local showers, there has been no good rain since April 15, and the most disastrous effect of the dry weather is the nearly completed ruin of the hay crop. This product will be much less than one-fourth of an average crop. Hay cannot recover even by a generous downpour, and the daiy interests of the entire State will suffer.

"The wheat crop of State will also be greatly reduced. It is so near harvest time that wheat cannot recover from the effect of the drought.

"As to peaches, if the dry weather continues much longer there will only be about a half crop in the State. Cornalso has been greatly affected by the dry weather. The potatoes are affected in the same way.

"If heavy rain come we may recover on late potatoes, tomatoes and corn, and I hope, on rasberries and blackberries."

Emerson's Best Bequest.

The best thing that Emerson has left us is his spirit, fine and high, stern and sweet. He took life in a royal way, and bore himself toward the eternal mysteries with serene courage and dauntless hope. His essays, which are his most characteristic work, have their chief value not as revelations of the moral order of life, not as discoveries of the final meaning of things, but as disclosures of his own spirit. There is in these essays an immense mass of truth, uttered in picturesque and memorable words. There is in them also an immense mass that is not true. The Emersonian hit and miss are upon every page, and side by side with a golden and perfect sentence one finds sonorous eccentricity. The origin of this strange compound of oracle and imposition in Emerson lies in the confessional character of his writing. He speaks from within, and his generalizations hit or miss according as his personal experience embodies a law of humanity or a mere idiosyncrasy. That Emerson speaks so often and so royally for man is his great distinction. That he speaks so frequently for the idiosyncratic, the isolated and vain is his chief fault. We have a right to hold him at his best, and through the richness and majesty of the confession we are brought face to face with the confessor.—Rev. George A. Gordon, D. D., in Atlantic.

Corn Breeding Fields.

In breeding corn a small field usually an acre in size is used. The land is prepared and the seed bed treated as for the ordinary field. They are usually about 120 hills long and thirty rows wide. Each row is planted from a separate ear. The barren stalks, poor stalks and all undesirable stalks, such as suckers, are removed before the tassel appears. The field is protected or isolated, so that no mixture can take place from other varieties or from any source. In the fall these rows are husked separately, and the seed for the next year's crop is selected from the rows giving the highest yields per acre, of best composition, with the least barren stalks and of the best type. In this way the yield per acre of the variety is increased, the quality improved and the type preserved and developed. By this plan we are able to give personal attention and direct selection to the individual stalk and ear, which would be impossible in a large field.—Cosmopolitan.

The Fate of Hannibal.

Hannibal's life and fate were supremely great and sad. He was a patriot who had only the best interests of his country at heart. In the wars of Carthage against Rome he carried his armies across the strait of Gibraltar, over the Alps and into Italy to the very gates of Rome. For more than a score of years he remained there, supporting his forces upon the enemy and proving himself to be such a literal and lasting scourge that the Roman mothers would quiet their children with the sound of his dreaded name. Finally, when old in years and he was driven forth and defeated, he had made a record in its way unparalleled throughout the annals of ancient warfare.

Yet in his old age he became a fugitive, wandering from one country to the other and finding no rest, owing to the vindictive persecutions of the Romans, who were then all powerful. At last, discovering no spot on earth open to him as a refuge, deserted by his former friends, his country enslaved and his once Imperial native city in ruins, he gave way to despair and ended his life with poison.

Crafty M. Blanc.

Blanc, the founder of the Monte Carlo gambling resort, was well aware of the desperate character of many of his customers. Knowing that they included the scum and riffraff of the world, he took precautions against them. He never carried any money, which fact he announced so frequently and publicly that it was known everywhere along the Riviera that the millionaire Blanc never had a penny on his person. But he carried in a pocketbook a draft on red paper for several hundred thousand francs, payable to the indorsee. He feared kidnaping as much as robbery, and in case of abduction he intended to ransom himself with this draft. But the instructions at his office were not to cash a red draft with his signature unless a telegram was received from him ordering it to be done.

Too Personal.

"I want you to notify the paper man not to leave this Journal Recorder here in the future," said Mr. Lucky Strike to his life partner.

"Why?" inquired Mrs. Strike.

"Why, they've got a story here about that young chump who is going to marry Laura and refer to him as her financee."

"Oh, I see—a typographical error!"

"Typographical error! Bah! Error of fact. I have been her financee for the last twenty years, and, judging from the prospects of the young man she insists is the only one she will ever marry, I will continue to act in that capacity for the next twenty. Stop the paper."—Philadelphia Times.

A Good Place to Stop.

He really ought not to have gone into the Latin class that day. He was called up first and read as far as he had prepared. Then he skirmished on a little further. This is the way it went:

"I, Ulysses, saw her (Dido's) heavenly form advancing like a goddess in the sunlight. I sprang toward her, and she welcomed me. Her hair fell down upon her shoulders like the sunbeams on Olympus. Her eyes shone like two jewels of the sea. I threw my arms my arms about about her—her neck—neck, and and that's as far as I got, professor."—Exchange.

Remarkable Lakes.

On the Mangishlak peninsula, in the Caspian sea, there are five small lakes. One of them is covered with salt crystals strong enough to allow man and beast to cross the lake on foot. Another is as round as any circle and of a lovely rose color. Its banks of salt crystal form a setting white as the driven snow to the water, which not only shows all the colors from violet to rosy red, but from which rises a perfume of violets. Both the perfume and the color are the result of the presence of seaweeds.

An Elaborate Reasoner.

"You are base enough to confess that you love her for her wealth?"

"My dear sir," answered Count Fuscads, "that is not baseness. That shows my democratic breadth of ideas combined with consistent respect for tradition."

"You should love her for herself."

"My dear sir, beauty, intellect and refinement are mere accidents of birth, but money is an evidence of ancestral and possibly hereditary foresight and force of character."—Washington Star.

Queer Birds.

"I notice in this morning's paper," said the new boarder, "an advertisement about 'a good cotton duck.' What's a cotton duck?"

"Give it up," replied the star boarder. "Now, if it was an India rubber chicken Mrs. Starvem could tell us something about that."—Philadelphia Press.

He Was Willin'.

"You are granted a divorce," said the lawyer to a colored client, "but you'll have to give her alimony."

"All right, suh," was the eager reply. "She kin have Alimony of she wants him, but Lawd help him w'en he gits her!"—Atlanta Constitution.

The Superior Being.

Little Boy—Well, that's the queerest thing I ever saw.

Mother—What is?

Little Boy—I just saw our schoolteacher at the corner of the street a-laughin' just like other people.

Contradictory.

"I asked," moaned Raoul, "have zis man a good standing in ze community? You say, 'Yes, he has been sitting on ze bench twenty years.' Oh, zis language!"—Chicago Record-Herald.

Forgetful Father-in-law.

"I've had another quarrel with my son-in-law, Count Fuscads," said Mr. Cumrox gloomily.

"Have you refused him money?"

"Certainly not. But I forgot to take my hat off and address him by his title when I handed him the check."—Washington Star.

His Experience.

"Pa," said the boy, looking up from his book, "what does a man's 'better half' mean?"

"Usually, my son," replied his father from behind the evening paper, "she means exactly what she says."—Philadelphia Press.

Trains at Drowsyville.

"We used to miss that accommodation train every morning."

"What do you do now that they have taken it off?"

"Why, we miss it more than ever."—Chicago News.

An Appropriate Name.

Edna—I don't know whether to call my Boston bull terrier Pompey, Scipio or Cæsar.

Arthur (who has had a sad experience with the terrier)—I thing Agrippa would be a very suitable name for him.

Relaxation.

"I feel happy today," said the club woman. "I haven't a thing in the world to do, not a club to attend. I'm going to clean house and have a good time."—Pittsburg Dispatch.

You travel toward the grave fast enough at best. Don't take a fast train.—Atchison Globe.

Hard Luck.

"Did yer git anything?" whispered the burglar on guard as his mate emerged from the window.

"No; the chap wot lives here is a lawyer," replied the other in disgust.

"That's hard luck," replied the first. "Did yer lose anything?"

Proof Positive.

"I wonder if all men are fools!" snapped Mrs. Enpeck during a little domestic tiff the other morning.

"No, indeed, my dear," replied her husband. "I know a number of men who are bachelors!"

Professional Confidences.

The Broker—Don't you find it easier to shave some men than others?

The Barber—Yes; don't you?—Yonkers Statesman.

The Seven Sleepers

The Seven Sleepers were seven noble youths of Ephesus, who in the time of the Decian persecutions, it is said, fled to a certain cavern for refuge. They were pursued, discovered and walled in the cave, the perpetrators of the deed hoping to mete out a cruel and horrible death. However, according to the legend, they were made to fall asleep and were miraculously kept alive for nearly two centuries. Their names are given as Maximian, Malchus, Martinian, Denis, John, Seraplon and Constantine.

North Plainfield Weekly Review.

VOL. 4—NO. 12. NORTH PLAINFIELD, N. J., SATURDAY, JUNE 13. 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

Children's Day will be observed at the Park Avenue Baptist Church tomorrow (Sunday) afternoon.

Company K, of Plainfield, will take part in the celebration of the battle of Monmouth, next week.

Rev. Dr. Chamblyss, of Orange, will occupy the pulpit of the First Baptist Church, Plainfield, tomorrow.

A strawberry festival and social was held at the German Reformed Church, this borough, Wednesday and Thursday evenings.

Members of the W. C. T. U. gave their annual reception and entertainment Wednesday afternoon in their rooms on Madison avenue.

Miss L. May Conroy, daughter of W. J. Conroy, of Somerset street, will be graduated from the Trenton State Normal School next week.

Rev. J. O. McKelvey and Mrs. McKelvey were tendered a reception Thursday evening at Warren Chapel. Mr. and Mrs. McKelvey sail for Europe July 3 to be gone two months.

Have you anything to "swap?" Our Exchange column offers some decided bargains this week. If you don't see what you want, try a ten cent ad in that column. Cent-a-word.

Mrs. William Patterson, of Plainfield, has presented a baptismal font to Hope Chapel as a memorial to her son, Harry L. Patterson, who was killed in the railroad wreck at Westfield.

Consents for right of way for a trolley line from Metuchen to Plainfield are being secured by the New Brunswick Traction Company, with the expectation of building the road in the fall.

The Borough Council has been called upon by the Board of Education to turn over $2,450.00 due on taxes which have been running from 1898 to 1902, and which has not been received by the Board.

Mrs. C. P. Adams, formerly a resident of this borough, but now of Chicago, is visiting here and will remain until after the High School Commencement exercises. Her son Edgar W. Adams will be the valedictorian on that occasion.

Two calves belonging to W. E. Trimmer of Liberty Corner died recently of hydrophobia. The calves had evidently been bitten by a mad dog while in the yard a few weeks previous. They were registered stock and were valued at $50.

Officers elected by the Hillside Cemetery Association for the ensuing year are as follows: President, Mason W. Tyler; vice president, O. T. Waring; secretary and treasurer, Alex. Gilbert; trustees for three years, C. W. McCutchen, Mason W. Tyler and O. T. Waring.

The county jail at New Brunswick is so insecure that the Sheriff told the freeholders last week that he does not feel safe in his house at night, as it is impossible to hold prisoners in the jail under present conditions. Plans for a new jail were drawn some time ago but the Legislature failed to enact a law permitting the issuing of bonds to build the structure.

At midnight Wednesday while a car on the trolley line was turning a short curve on West Jersey avenue, Elizabeth, it left the track, struck a telephone pole and instantly killed the motorman, James Chrystie. The conductor, Joseph Dur. yea, Mrs. F. Stillman and her daughter Mrs. Frederick Lewis, of Plainfield were considerably bruised. Other passengers were badly shaken up but escaped any serious injuries.

John Manley, constable of the Second Ward of Plainfield, has been offered a large amount by the Pennsylvania Railroad Company for his equity in a tract of land in Long Island City, which the company desires to buy for its new terminal. The land, which was previously the property of Garret V. Manley, the father of John Manley, who died in 1880, was sold under foreclosure in 1885. John Manley's name was by an oversight omitted from the list of heirs, leaving him this claim upon the property. He has put the affair in the hands of V. W. Nash, Jr. a Plainfield attorney.

Successful Rendering of Cantata.

A large and appreciative audience listened to the rendering of the cantata, "Esther, the Beautiful Queen," Thursday evening, given at Vincent Chapel under the auspices of the Young Men's Brotherhood of the First M. E. Church.

The music was exceptionally sweet and the gorgeous costumes made a most pleasing background. Mrs. Thomas McDonald was Queen Esther, Raymond A. McGee, King Ahasuerus, Charles L. Lewis, Haman and Elmer D. Cutting, Mordecai. These were assisted by a large cast.

Borough Investigating Sewage Disposal

At the last meeting of the Borough Council a committee was appointed to confer with the Plainfield city council for the purpose of ascertaining upon what terms the borough can connect with the sewer disposal plant of the city.

The recent sewage commission recommended this plan as being the most feasible at present.

Funeral of William Newmiller.

The funeral services over the remains of William Newmiller, who was killed in the railroad disaster near Kansas City last week, took place at Warren Chapel, Wednesday afternoon. Benevolent Council No. 256 Jr. O. U. A. M. attended the funeral in a body.

Interment was made in North Plainfield cemetery.

Borough Family Troubles.

Trouble entered the door of a family in the borough this week and succeeded in separating a husband and wife, the latter leaving the home with her children and going to the house of a neighbor where she is making her home for the present.

It is claimed that the trouble arose from the husband objecting to the attention paid his wife by other men.

Neighbors have tried to bring the family together, and the husband has declared his willingness to forgive and forget, but his wife refuses to go back.

For the sake of all concerned, it is to be hoped that a reconciliation may soon be made, thus averting further publicity.

Among Our Advertisers.

New this week: The New York Bargain Store; The Paris Cloak Store; The Dime Savings Institution; Fowler, Manufacturing Confectioner; Mrs Becker, cesspools; George Dallel, dealer in blue stone; Chas. E. Vaile, optician and jeweler; John H. Tier, ice cream and confections, and James C. Hansen, painter and decorator. A perusal of these ads will be profitable.

Other recent additions to our advertising columns are the following: U. B. Crane, hats and furnishing store; Boston Cloak and Fur Co; Stiles & Co., eye specialists; Oriental Tea Rooms; Schreiner's pharmacy; W. W. Warnock, baker; Alex. Lusardi, fruits; P. Casey & Son, undertakers.

Attention is also directed to our old advertisers, namely: Alex. Thorn, groceries and meats; The Plainfield Trust Company; The Crescent Furniture Co.; Coleman's Business College; Nagle's Prescription Pharmacy; Gayle Hardware Company; Shaw's Pharmacy; De Mott & Lambert, undertakers; J. M. Cahart, painter and decorator; J. J. Heideloff, hardware, etc.; Power's Somerset Pharmacy; Wm. J. Couroy, carriages, wagons, etc; Menzenbach's shoe repairer: Rheaume, coal dealer.

Contract Let for Giraud Avenue Bridge

At a joint meeting of the committee of Somerset and Union counties Freeholders on Thursday afternoon, fifteen bids were opened for the Giraud avenue bridge, and the contract given to the Dover Boiler Works for $3,795, for the iron work, and the mason work to William Ferrier, of New Market, for $2,663, a total cost of $6,458.

The bridge will be of the iron girder and brick arch type, and must be completed by September 1st.

Liberty Bell to be in Elizabeth.

For the first time in the history of the United States the country's greatest and most sacred relic, the Liberty Bell is to be taken on a journey through some of the original thirteen States. Next Monday morning, June 15, the bell, accompanied by the Mayor of Philadelphia, John Weaver, and a joint special committee of City Council, acting as an escort, will be taken to Boston, there to form a conspicuous object on Wednesday, June 17, on the occasion of the 128th anniversary celebration of the Battle of Bunker Hill.

This will give every one an opportunity of seeing this most interesting relic, and children especially should take advantage of it.

This will be the first time that the old bell has been in New Jersey.

Commencement at Rutgers.

Commencement week at Rutgers College, New Brunswick opened yesterday. Entrance examinations were held at 10 o'clock for admission to the Classical and Scientific Schools and continued at 9.00 o'clock this morning. Tomorrow, the Rev. James I. Vance, D. D., minister of the North Reformed Church, Newark, will preach the baccalaureate sermon in the First Reformed Church.

On Monday evening the Glee Club will give a concert in the Ballaetine Gymnasium. Class Day exercises take place in the Kirkpatrick Chapel at 3.00 o'clock and a junior exhibition in the "gym" at 8.00. The annual meeting of the alumni will be held in Van Nest Hall at 10.30 o'clock, on Wednesday morning, and the dinner at 1.30. The one hundred and thirty-seventh commencement will be held Wednesday evening.

WASHINGTON VALLEY.

All The News From Watchung, and Springdale.

Arrival and departure of mails at Watchung.

Leave Plainfield	9 a. m.	5.35 p. m.
Arrive Watchung	9.30 a. m.	6.00 p. m.
Leave Watchung	12.30 p. m.	6.40 p. m.
Arrive Plainfield	1.00 p. m.	*6.40 p. m.

*This mail makes connection for all outgoing mail from Plainfield the same evening.

The schools will close here June 16.

Mr. and Mrs. W. Titus, who have been on the sick list are recovering.

Mrs. J. H. Koch, who has been visiting in Middletown, N. Y., has returned home.

A very enjoyable musicale was given at the house of Daniel Ackor last Wednesday evening. The program consisted of vocal and instrumental selections. Refreshments and a social time brought to a close an evening pleasantly spent.

If Freeholder Lutkins gets the county road through to Stirling, he will have not only the the satisfaction of knowing that he has accomplished a very necessary piece of work, but will receive the praise and thanks of the farmers who have long wished for it and to whom it will mean a blessing.

Congratulations are pouring in on Postmaster Schmidt for his successful efforts in securing another mail for Watchung. This extra mail is of great value to Watchung and will save many trips to Plainfield to mail letters, as the last mail from here at 6 p. m. connects at Plainfield for all outgoing mails in both directions that same evening. At the head of these items will be found a time table.

W. E. Bartle has signed a contract for all the stone work on St. Mary's Church, Perth Amboy. The main body of the church will be built of the celebrated gray rock quarried from Mr. Bartle's quarries on the Watchung mountains where twenty-five men are at present employed in getting it out. The trimmings will be of Indiana limestone. The church when completed will cost $75,000, of which $40,000 will represent Mr. Bartle's share.

SPRINGDALE.

This place was the scene of a brilliant wedding last Tuesday evening when Minnie, daughter of Mr. and Mrs. Fred Kirch and Peter W. Voorhees, of Plainfield, were united in marriage. The ceremony took place at the church where were gathered a large number of relatives and friends. The church was beautifully decorated with palms, roses and other flowers. A reception and supper followed at the home after which the newly wedded couple left for Washington, D. C. Upon their return they will make their home in Plainfield where Mr. Voorhees does a large business as contractor. Many handsome presents were received.

John R. Mundy, who claims he can walk from his place to Bound Brook, a distance of four miles, in forty minutes, has a rival in Peter Ackor, Jr., of Bound Brook. Peter and his dog Rubber covered the ground last Friday afternoon from Mr. Mundy's home to Mundy Bros. store Bound Brook in thirty-four minutes and three seconds.

Tried to Kill Himself.

Stephen Austen, a well known blacksmith of Somerville was found with his throat cut from ear to ear, at his residence in High street, at an early hour Saturday morning.

Austen lived with his aged mother, who was awakened by hearing her son moan in his room. She was horrified to find him lying on the floor in a pool of blood with a gaping wound in his throat. The furniture and the walls of the room were spotted with blood, and a large penknife was found on the floor. Mrs. Austen summoned Dr. William Long and Father Brogard, who struggled to save Austen's life. The knife severed the main arteries and punctured his windpipe. Austen was taken to the Somerset Hospital in a critical condition. He became violently insane Wednesday morning and escaped from the Hospital and started on a wild run across the open country. He was pursued by an attendant and Policemen Koch and Gulick, who caught him about a mile from the hospital and overpowered him after a desperate struggle.

Austen was again placed in the hospital under the care of a male attendant, and Policeman Gulick was left on guard outside while Koch went to summon a hospital physician, some distance away.

Austen again became violent and jumped from his bed. He overpowered the attendant, broke down two doors and got outside, where he encountered Gulick. The policeman grabbed him, but he escaped and started across the fields, with the policeman in close pursuit. After running a quarter of a mile, Austen turned on the policeman and a desperate struggle ensued.

The madman struck Gulick twice on the head with stones and tried to kill him. Gulick had his uniform almost torn from his body in the struggle. Austen, who is a powerful man, was clad only in his nightshirt, and the policeman was placed at a disadvantage in holding him. Gulick finally overpowered him, and with assistance returned him to the hospital. He was later removed to the county jail for safe keeping.

Austen's mother died Saturday afternoon, from the shock of seeing her son with his throat cut. He is not aware of his mother's death.

An Old Document.

The Hunterdon *Gazette* this week says: "While looking over some old papers the other day, Mrs. J. K. Lewis discovered an old document that is quite interesting. It is a deed to Robert Parkinson, of Basking Ridge, Somerset county, for 104½ acres of land at that place, and was executed June 8, 1761—142 years ago last Monday. The deed is written on parchment and is remarkably well preserved, every portion of it being legible. The deed was given by Richard Peters and Lynson Lardner, of Philadelphia, attorneys and agents of Thomas Penn and Richard Penn, proprietors of the Province of Pennsylvania.

Missing Pluckemin Boy Has Been Found.

Ten-year-old John Jankowski, of Pluckemin, has been lost in the Watchung Mountains since Tuesday. The boy started for school Tuesday morning. He passed the school house and strayed into the mountain. He was seen by a mountaineer on the second range of the Watchungs, many miles from his home on Tuesday night. The little fellow had a club foot, and he was traced by a searching party for several miles by means of his peculiar footprints in the dusty roads. Janowski has an aunt who lives at Harrison, twelve miles over the mountain. It is feared that he started out to visit her, and became lost.

Since the above was put in type it has transpired that the boy was found Wednesday morning by overseer of the poor, Bowers, who turned him over to Judge John C. Cooper, who cared for the boy at his home until his father was notified.

Hoboes Fought and Stole.

A desperate fight took place in an Hungarian saloon at Raritan Monday night between Policemen Hickey and Farrel and a gang of eight thieves who have recently committed many depredations in that region. The thieves were all armed and used the butts of their revolvers and beer bottles to fight off the police. The police realized that the odds against them were so great and the character of the men so desperate that they would be riddled with bullets if they opened fire. One man was captured and placed in the County Jail, and the others escaped.

After making their escape several of the gang stopped at the houses of John Myers and Bernard Myers, in the Bound Brook Turnpike, two miles from here. They carried off two gold watches and a considerable amount of money.

Two of the gang robbed the house of John Ayers, at Raritan, while the family was absent. Mrs. Ayers, on returning home early in the evening, found the house brilliantly lighted and the rooms in great disorder. The thieves fled at her approach and carried off a number of diamond rings and pins and two gold watches. The thieves also robbed the home of James McFarland, near Bound Brook, in the absence of the family, and secured all the family plate and jewels, amounting to several hundred dollars. The gang, which is the most desperate that has visited that region in years, is believed to be the band which was recently driven from New Brunswick after a fight with railroad detectives, in which one of their number was shot and captured.

In The Suburbs.

These are the days when the Suburbanite delights in tantalizing the cooped-up city man, for he points out the advantages of the green fields, the refreshing atmosphere, the fragrance of the flowers, and the delight of out-door life, and compares them with the dusty, paved streets, the absence of trees, and everything of nature and what man likes best—freedom. The suburban country has schools, fine walks, macadam roads, water and sewer systems, and every feature of the city but separation from its noise and humdrum. The New Jersey Central stands first as the commuter's road, and its towns are among the finest suburban places in the country. The General Passenger Department of the New Jersey Central, New York, has just issued an expensive booklet, known as "Within the Suburban Limits," and the book contains much of interest to those interested in suburban life. Send 4 cents in stamps for it.

Clinton avenue Strawberry and Ice Cream Festival was furnished by John H. Tier.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

An elm tree that was brought from England 130 years ago and planted along the creek at Paulsboro is now shading a quarter of an acre of ground.

Freehold will celebrate the 125th anniversary of the Battle of Monmouth on Saturday, June 27. The battle was fought June 28, 1778 but as the anniversary falls on Sunday the celebration will be held on the day previous. The state has appropriated $3,500 for a military display and there will be a grand parade. The old Tennent Church at Tennent into which the wounded soldiers were carried after the battle, is still standing.

Former Judge John D. Bartine, of Somerville, one of the executors of the will of Daniel Rice, the Texas millionaire, lost a pocketbook Monday containing $30 in cash, a certified check for $2,000 and important papers relating to the Rice estate. Mr. Bartine is uncertain whether his pocket was picked on a trolley car or whether he dropped the pocketbook in his haste to board one.

A young alligator, about a foot and a half long, was found last Monday morning in the Lackawanna depression ditch, in Roseville, Newark, by William E. Finan, of No. 22 First st., Newark. On his way home from the factory, where he had worked all night, he was attracted by a commotion in the water in the ditch, and, climbing down, he caught the alligator by the tail. There were three other young alligators, which were taken by another man.

The boy choir that went on strike at Holy Innocents' Episcopal Church, Hoboken, recently, has been engaged to sing in the future at the First Baptist Church, at Ninth and Bloomfield streets, Rev. R. Janisch Holmes, pastor. The choir will begin tomorrow morning and will sing morning and evening Sundays thereafter. C. Irving Valentine, the organist who resigned with the choir, will preside at the Baptist organ and will have full charge of the music.

Pending a decision as to what is the proper seal of the Prerogative Court of New Jersey the court is using a seal which is and for many years has been entirely illegible. An old seal of the court was discovered with the inscription, "The Earth is the Lord's and the Evenness Thereof." Chancellor Magie has been searching for more than a year to determine how the word "Evenness" was substituted for "Fullness." He has written to England and consulted scholars of that country and America, with the result that he has been advised that there is some authority for the use of "Evenness" in the translation of the original Hebrew. He has not yet succeeded, however, in securing the desired information as to the adoption of the seal in either form.

At the old Shurts homestead, near Potterstown, where Mr. and Mrs. Oliver Shurts now reside, a stove of Dutch manufacture of the year 1749 has been recovered. It is a box-like affair, thirty inches in height and twenty by twenty-seven inches in width and length. It is formed of very thick iron plates, with each side ornamented with three individuals—a royal personage, a living skeleton and a soldier—all in hostile attitude. Under them is this Holland Dutch statement: "Hir Fert mit mir DeK Biter tot Erbringt rukh in tots no 1749." The different parts of the old stove were found about the place and were put together in their original form by a son of Mr. Shurts. In the eighteenth century a family named Rodenbaugh came from Holland and settled on this farm, and it is supposed they brought the stove over with them.

The literal enforcement of an order of Superintendent Thomas Walsh, of the Middlesex and Somerset Traction Company, that all parcels carried on the cars must be charged for at the rate of ten cents for any parcel under five pounds and twenty-five cents for any parcel over that weight, is making trouble for New Brunswick conductors and motormen, and may result in a crop of damage suits against the company on the part of passengers who have refused to pay for small bundles or for hand baggage, and who have paid under protest or have refused to pay and have been put off the cars. The strict enforcement of the order will mean that a valise, suitcase or satchel cannot be carried by a passenger unless he pays a fee of twenty-five cents in addition to his regular fare. It will mean that a man going to his work will have to pay ten cents for the carriage of his lunch basket. Women who come to New Brunswick to shop will have to pay ten cents for every parcel they bring home. It is expected that the order will be modified. It is claimed that it was designed to break up the practice of the Hungarian and Polish brickyard laborers who insisted upon carrying their trunks with them, some of the trunks being so heavy that two men were required to get them aboard the cars. The climax was reached early this week, when a man living on the Bound Brook line had a truck back up to the trolley terminus and unload a small cabinet organ, which he insisted should be carried along with him on the car for a five-cent fare.

The movement of the local union of Retail Clerks of Morristown, to have all merchants close their business houses at 6.30 p. m. is said to be a failure. During the month of May the shoemen made a kind of verbal agreement to close early until the first of June. On the strength of this the clerks were expected to secure the consent of all other merchants, and the 6.30 p. m. closing hour was to be generally observed throughout the city. Last week the shoe dealers kept their stores open until late in the evening, and and propose to continue notwithstanding a renewed effort on the part of the clerks' association to have them close as last month.

John Riley, the tramp who was shot last Saturday night in the fight between Pennsylvania Railroad detectives and tramps at the Tramps' Camp, East New Brunswick, is still alive, but his condition is critical. The bullet pierced his left lung. The camp at East New Brunswick is frequented by the very worst type of railroad tramps. All the men who make it their headquarters go armed and it is known that of all the burglaries and holdups which occur within several miles of the camp are traceable directly to it. When the tramps are cleaned out the country is free from the nuisance. Because of the location of the camp, directly alongside the railroad, it is possible for men who are wanted by the police to jump a freight and get away, and the only way in which the nuisance can be kept under control is by frequent raids, such as was attempted Saturday night. Sometimes these are made by the county authorities and sometimes by railroad detectives.

MANHATTAN BEACH FIREWORKS.

A Gorgeous Production of "Last Days of Pompeii" This Summer's Attraction.

Pain's annual fireworks exhibition at Manhattan Beach, New York, will be a new and costly production of "Last Days of Pompeii," the spectacle that has startled two continents with its sensational realism in depicting the destruction of the Roman city by Mt. Vesuvius more than 1800 years ago. The Pompeii production has not been witnessed in New York for fourteen years and its repetition, on a new and enlarged basis, beginning June 24th, will celebrate the twenty-fifth anniversary of Pain's fireworks at Manhattan Beach.

In all, not less than 500 people will be employed in the performance, this number including performers who picture the ancient Roman carnival, games, chariot races, weird ballets, fire dance, athletic contests, circus acts, etc., and the large force of mechanics engaged in the operation of the mammoth spectacle. The plan of the exhibition is to show the manner of living in Pompeii at the time it was destroyed and finally the thunderous earthquakes and fearful eruptions of Vesuvius, which interrupts the carnival, drives the terror-stricken populace from their homes and destroys the city. Not only is the burning crater shown, but a vivid picture of the flowing lava is presented, with its terrific results. Unquestionably the Pompeii entertainment is the most elaborate of the Pain creations and visitors in New York should not miss the opportunity presented this summer.

In addition to "Last Days of Pompeii" the usual extravagant display of fireworks will be given each night, except Sundays.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Thomas J. Alcott, U. S. Marshal, to Wm. H. Conrad, $5000.

Chas. L. Moffett et ux to Levi D. Darby et al, $1.

Mary Ellen Dempsey and husband to Mary Trimble, $1.

Lucy D. Tomlinson to Anna Hoffman, $2750.

Wm. B. Smith to Walter E. Parker, $10,000.

Walter E. Parker to Mabel O. Smith, $10,000.

Wm. C. Stanbery to Mary P. Bettman, $1.

Order your Neapolitan, Harlequin, Vanilla, Strawberry and Chocolate Ice Creams and Water Ices from Tier.

A WOMAN'S AWFUL CRIMES

Gave Poison For Medicine to Brother, His Wife and Babe.

EIGHT OTHER STRANGE DEATHS

Mrs. Mary McKnight, of Kalkoska, Mich., When Speaking of Her Terrible Deeds, Said "I Didn't Mean Any Harm"—Victims Died Under Suspicious Circumstances While Living With Her.

Kalkoska, Mich.—Lizzie Holliday, the weird peasant of Boyne, who murdered nearly a score of victims before her mania for destroying life was brought to a halt, has a counterpart in Mrs. Mary McKnight, of this place, who freely and without fear of consequences, has just confessed to having killed her brother, his young wife and their baby, and who, it is also thought, may be able to lift the veil of mystery surrounding the deaths of at least eight other relatives and friends who have died suddenly.

For two weeks Prosecutor Smith has worked with untiring persistence to break down the brazen denials of the accused woman, who finally weakened and made a full confession to having killed her brother, John Murphy, and his little family.

In her first statement the woman admitted giving Mr. and Mrs. Murphy capsules of strychnine and quinine mixed, but denied killing the baby. She said:

"I didn't intend to harm any of them. I did give the baby the strychnine. It woke up and cried while its mother was gone, and I mixed up a little strychnine in a glass with some water, and gave a spoonful to the baby. I didn't mean to harm the little thing at all. I confessed all to the Lord this afternoon and I feel that He has forgiven me. I really didn't mean to harm any of them. When Gertrude came home and found that the baby was dead she got awfully nervous. She came to me and said: 'Mary, can't you give me something to quiet me—something that you take yourself.' I said that I would, and I really didn't think that it would hurt her if I gave her one of the capsules. She had spasms right after that, and I suppose that it was the strychnine that killed her. I really didn't mean to hurt her. John seemed to feel so badly about it, so broken up, that I often thought after Gertie died that it would be better if he were to go, too.

"John was feeling bad one night a couple of weeks after Gertrude died and wanted something to quiet him. I had two or three of the capsules on my dresser, and I told him to go and get one of them. I didn't mean to hurt him, but I thought it would be for the best if he were to go, anyway. He helped himself. I don't know whether he took one or two. Then he went to bed, and by and by he called me. Mother came, too, and he began to have those same spasms. I suppose that the strychnine was working."

The confession was given voluntarily, and Mrs. McKnight signed it.

Eight other persons, besides the three to whose murder Mrs. McKnight confessed, investigation now shows have died in the last fifteen years under circumstances that, in view of the woman's confession, are thought to be suspicious. All of the eight were either relatives or intimate friends.

They are: Ernest McKnight, the woman's last husband; James Ambrose, her first husband, who died in Alpena in 1887; Mrs. McKnight, the wife of James E. McKnight, who was the partner of Ambrose; Baby Teeple, Mrs. McKnight's niece; Eliza Chalker, another niece, who died in Grayling in May, 1892; Sara Murphy, Mrs. McKnight's sister, who also died in Grayling in February, 1893; a Mrs. Curry, who died in Saginaw in 1893 when Mrs. McKnight was visiting there, and Dorothy Jenson, a child, who died in Grayling under Mrs. McKnight's care during the absence of her mother. No motive for the crimes can be found.

BALFOUR SAVES MINISTRY.

Premier Averts the Threatened Crisis by a Clever Speech.

London.—By a dexterous and extraordinary speech Premier Balfour temporarily smoothed over the differences in the Cabinet, relieved Colonial Secretary Chamberlain of any necessity of resigning, and for the moment averted a crisis which threatened the Unionist Party. This Mr. Balfour accomplished without committing the Government either to protection or Free Trade, though his speech generally will be taken to mean that the tariff issue is to be shelved for the present.

Henry Chaplin's amendment, which gave rise to the most interesting debate of the present Parliament, was defeated by the overwhelming majority 421 votes to 28, the majority being composed of Unionists, Liberals and Irish members. The minority supporting Mr. Chaplin were almost all followers of the Government, while many others of the Conservative Party abstained from voting.

The amendment declared that the removal of the tax on grain "involves a needless and injurious disturbance of trade and a serious loss of revenue, without substantial relief for the consumer," and that if any taxes were removed it should be those levied on tea and other articles of general consumption.

Leather Market Light.

There is only a fair volume of business in the leather market, which is between seasons, and business in upper leather is rather light.

Four Men Killed by Lightning.

John Winkler, John Shook, S. E. Reham and Clark Fisher were killed by lightning near Sterling, Wayne County, Ohio. The men were carrying a heavy timber on their shoulders, when lightning struck the beam and tore it to splinters, killing the four men instantly.

British Embassy at Newport.

The British Embassy has been moved to Newport, R. I., for the summer, Sir Michael Herbert, the Ambassador, already being there.

SPLIT IN BRITISH CABINET

Chamberlain's Tariff Policy Repudiated in Parliament.

SENSATIONAL DEBATE IN HOUSE

All That Was Lacking in the Colonial Secretary's Bolt Was the Premier's Official Utterance That the Cabinet as a Whole Refused to Adopt His Views—Government Insured Against Defeat.

London.—The rumored resignation of Colonial Secretary Chamberlain is the most startling development of the proposal of the Chancellor of the Exchequer, Mr. Ritchie, to abolish the corn tax, the debate on which kept the House of Commons packed and spell bound until midnight. Even if Premier Balfour persuades Mr. Chamberlain to remain in the Cabinet the Colonial Secretary's preferential tariff program is hopelessly snowed under, and his influence as a political power in Great Britain at least temporarily eclipsed.

Premier Balfour ascertained from John Redmond, the Irish leader, that the Nationalist members of Parliament would support the Government as against Mr. Chaplin, who introduced the bill which denounces the removal of the corn tax as a needless and injurious disturbance of trade and a serious loss of revenue. The Liberal leader, Sir Henry Campbell-Bannerman, had already announced that his party would uphold the proposal of Mr. Ritchie to remit the grain tax. This practically secures the Government against defeat by its own supporters.

In the discussion in the Commons Sir Michael Hicks-Beach declared that the corn tax was successful, although unpopular. He had heard the proposed repeal with surprise and regret. The tax was necessary, because of the growth of expenditures against which he had protested.

"Had my protests been received with more sympathy," he said amid loud cheers from the Opposition, "I would not now be speaking from the Treasury Bench."

Chancellor of the Exchequer Ritchie announced that he would be unable to support Colonial Secretary Chamberlain's Zollverein scheme. He said:

"The question of colonial preference has been brought forward by the Colonial Secretary. The Prime Minister's attitude of suspended judgment in this matter is impossible. I am opposed to the principles and policy of the Colonial Secretary, believing they will do more to disunite than to unite the empire." (Loud Opposition cheers).

"Those members of the Government who have spoken for protection have spoken for themselves alone," continued Mr. Ritchie. "All that has been said on the subject was that it should be discussed and inquired into. I am an avowed free trader, and cannot conceive of any system in which a preferential tariff would be practicable as at present advised. I cannot be a party to a policy which in my opinion would be detrimental to both England and the colonies." (Great Opposition cheers).

Mr. Ritchie's marked opposition to Mr. Chamberlain's plan created a sensation in the lobbies, and gave rise to rumors that there would be an early dissolution of Parliament. Those best informed, however, think that this will not occur before the late fall.

It was the general opinion in the lobby of the House of Commons that the entire question of tariff preference will be submitted to a royal commission, which will be charged with testing the growth of popular opinion on the matter.

SALEM WITCHES' GRAVE FOUND.

Now Shown They Were Hanged on Small Plateau and Not on Gallows Hill.

Salem, Mass.—The grave has given up its secret after two centuries. The Salem witches were not hanged on the crest of Gallows Hill, where the tablet in their memory stands to-day, but on the small plateau at its base. Here their grave has been discovered, and, besides, a part of the natural monument to the martyrs, the butt of a locust tree set by one of the descendants of the proctors, has been unearthed.

Antiquarians hunted over Gallows Hill for years for the crevice in the rocks in which the bodies of Burroughs, the minister, and Willard and Carrier were said to have been thrown. The crevice is at the base of Gallows Hill, a peculiar formation of rock not noted anywhere else in the near vicinity. One of the proctors, who came in possession of the plateau, set out locust trees to mark the grave of his grandfather, a witchcraft martyr, and the stump, dug a few days ago from a crevice in the rock, is undoubtedly the remains of the memorial.

SLAYER, AT BAY, KILLS HIMSELF.

Youthful Murderer Faces Pursuers and Sends Bullet Through Heart.

Shoals, Ind.—Arthur Lyons, the slayer of his stepmother, who has been a fugitive for several days, pursued by a posse of several hundred, shot himself through the heart as he stood hemmed in by an armed band of enraged farmers. The members of the posse were within twenty feet of him before he fired.

Young Lyons was driven from the woods by the posse and in an instant was the target for a dozen guns. He returned the fire and made his escape round a turn in the road. Later, he was overtaken, and, turning toward his pursuers, who were but a short distance behind him, he fired the fatal shot.

QUEEN WILHELMINA ILL.

Shows Signs of Consumption and Must Go to Milder Climate.

Amsterdam, Holland.—It is stated on reliable authority that Queen Wilhelmina has been suffering for some time with general debility. In medical circle the impression exists that the symptoms are of a tuberculous nature. The doctors in attendance on Her Majesty have recommended a trip to Madeira or Cairo, where a year's residence, they say, might effect a complete cure.

SCORES DROWNED IN FLOOD

Damage to Property in South Carolina Estimated at $5,000,000.

HEAVY LOSS TO COTTON MILLS

The Governor Issues a Proclamation Calling For Aid—Hundreds of Persons Are Left Destitute—Thousands of Workers Made Idle by the Destruction of Plants—A Railroad Trestle Washed Away.

Columbia, S. C.—Eighty persons are dead as a result of the flood that swept through the Piedmont Valley, according to the latest returns from the devastated district. At Clifton alone 100 operatives were missing from the village, and all were believed to have been lost. The damage to railroads, cotton mills and other manufactories, telegraph and telephone companies, to houses and stores will make a grand total of about $5,000,000. Sixty thousand mill workers are idle and destitute, many of them homeless. The greatest loss of life and property was in Spartanburg County.

The Governor has issued a proclamation calling for aid.

At Converse thirteen dead are reported and forty-one at Clifton No. 2. At Clifton No. 2 twenty-six homes were destroyed, thirteen at Clifton No. 1, and twenty at Clifton No. 3.

The loss at Clifton's three mills will approximate $2,000,000. At Pacolet the loss is nearly $1,000,000.

The greatest want among the survivors is at Clifton, where 500 are destitute.

At Converse Mills, the newest of Clifton's cluster, the walls were washed away and the looms left standing. The engine bricks were carried three miles down stream, demolishing the operatives' houses on the way.

The railroad situation caused much uneasiness throughout the State. The Southern Railway annulled trains between Columbia and Spartanburg, 200 feet of the trestle at Shelton below Union having been washed away.

The flood was due to a mighty cloudburst along the headwaters of the Pacolet River, in Polk County, N. C. The crest of the flood, when it reached Pacolet, was sixty feet high. The mills were located along the banks of the stream in a deep valley, high hills rising on either side, and caught the full force of the flood. Mill men, conversant with the situation, say that the destroyed properties will be rebuilt on the previous sites, and probably will be in partial or complete operation again within twelve months. The Glendale mill probably will be in shape to resume work within sixty days.

Spartansburg, S. C.—A massmeeting of citizens was held here and $3500 was subscribed for the relief of the flood sufferers. Many generous offers of assistance have been telegraphed from other cities. Congressman Johnson left for Washington to see Secretary of War Root, with the purpose of securing Federal aid, if possible.

Washington, D. C.—Absolutely necessary relief in the way of rations, medicines, etc., will be given by the War Department to the sufferers by the disastrous flood in South Carolina. An appeal to Secretary Root from the local authorities resulted in orders being given to General Chaffee, commanding the Department of the East, to this effect. He will authorize an officer to proceed north from Atlanta with sufficient supplies to relieve immediate necessities, as was done in the case of the sufferers by the Gainesville (Ga.) catastrophe.

NEW PRIMARY ELEMENT.

Another Extraordinary Discovery by Professor and Mme. Curie.

Berlin, Germany.—At a session of the Chemical Congress Professor W. Markwald of Berlin showed the electrochemical and physical section a smudge of dark powder on a piece of paper, which was the first time that any of the eminent scientists present had seen the metal polonium, discovered by Professor and Mme. Curie, of Paris.

Its discoverers doubted whether polonium was a primary element or related to bismuth. But Professor Markwald demonstrated that it was indeed a primary element. He exhibited a bit of the metal, weighing 15-100 of a grain, which was produced from two tons of uranium at a cost of $75. It is more thinly distributed in uranium than xenon, the most rarified gas, is in the atmosphere.

Professor and Mme. Curie also are the discoverers of radium.

DYING, CONFESSED TWO MURDERS

Betts on Death Bed Admits Killing His Father and Another.

Frederick, Md.—Samuel Betts died in Meyersville from a pistol shot wound inflicted by himself. Just before dying he confessed that he and his brother Josiah murdered their father, Samuel Betts, seventeen years ago to get $9000 which he had accumulated.

Betts also confessed that he participated in the murder of Walter Long and buried the body secretly seven years ago. Long's disappearance had been a mystery.

Great Britain Protests.

The British Minister at Caracas, H. G. O. Bax-Ironside, has presented a protest to the Venezuelan Foreign Office against the recent suppression of Custom Houses at the ports on the Orinoco and the Gulf of Paria.

High School Girl Drowned.

While taking a ride in a boat on the Mississippi River with the graduating High School class, Nora Hilling, aged eighteen, was drowned at Eaton, Ind. She grabbed an overhanging branch of a tree, lost her balance and fell into the water. The swift waters quickly carried her beyond aid.

Gainesville's Death List.

The Mayor of Gainesville, Ga., estimated that the total number of deaths resulting from the tornado there would be more than 125.

STEAMERS CRASH IN GALE

The Liban, With Many Passengers Aboard, Sunk Near Marseilles.

MEN FIGHT WOMEN IN THE SEA

Scenes Such as Attended the Bourgogne Disaster Responsible For Much Loss of Life—The Accident Declared to Be Inexcusable—The Lost Vessel Bound For Corsica When Struck by Sister Ship.

Marseilles, France.—A terrible shipping disaster occurred at a little distance from this port when two passenger steamers, the Insulaire and the Liban, both belonging to the Fraissinit Steamship Company, of Marseilles, came into collision. The Liban sank and over 100 of her passengers and crew perished.

The Insulaire, which brought the news, had saved half a dozen of those who were not sucked down in the wreck, but it was a beggarly showing.

There is fierce denunciation of officers and crew, and from the stories told it would seem as if every one lost his head just as in the catastrophe attending the loss of the Bourgogne, when men passengers and crew attacked women and children, and with Pisensate fury drove them away from lifeboats and rafts.

The accident was inexcusable. There was a gale blowing and the seas were high. Both boats were laboring heavily, but there was no reason why they should have come together.

The Insulaire cut a huge hole in the side of the Liban, through which the water poured in a flood, and her destruction was a matter of moments only.

As the Liban heeled over there was a mad struggle on board the vessel. The men seemed to lose the last vestige of humanity, and attacked the women and children like demons, throwing them down, and in some instances fairly stamping on them, as they forced their way to the boats.

Their cowardice was ill repaid, for before they could get the lifeboats lowered the steamer began to roll wildly, and, amid the frightened screams and cries of all on board, she went down, drawing with her a few who had jumped overboard and were trying to swim toward the other steamer.

There was a panic also on board the Insulaire, but it quieted down when it was found that the boat was not in danger of sinking. After a long delay the lifeboats were lowered, but the crews were awkward and badly trained. They succeeded only in picking up one or two of those who were floating about clinging to bits of wreckage.

A LYNCHING IN ILLINOIS.

Negro Teacher Hanged For a While and Then Thrown Into a Fire.

Belleville, Ill.—W. T. Wyatt, a colored school teacher, was lynched here for shooting County School Superintendent Charles Hertel, of St. Clair County. Hertel had refused to renew the teaching certificate of Wyatt and was fatally shot as he sat in his office without any warning. Wyatt was arrested after a struggle with the police and taken to jail.

When the news of the shooting spread about a mob gathered at the jail. Sheriff Thompson, aided by twenty policemen and the Fire Department, held the mob at bay for more than two hours, when they were overwhelmed by sheer force of numbers.

The mob, with the use of sledge hammers, broke into Wyatt's cell and dragged him to a telephone pole in the public square. A noose was hastily adjusted around his neck and the long rope thrown over the cross-arm of a telephone pole. Without delay Wyatt was jerked into the air, his body turning and twisting hardly above the heads of the crowd.

Even while his body was jerking in the throes of death from the strangulation members of the mob began building a fire at the foot of the pole. The flames flared up and licked at the foot of the victim, but this did not satisfy the mob, and another and larger fire was started.

When it had begun burning briskly the negro, still half alive, was cut down, and after being covered with coal oil he was cast into the fire. Moans of pain were heard from the half-dead victim of the mob, and these served further to infuriate his torturers.

They fell upon him with clubs and knives and cut and beat the burning body almost to pieces, and not until every sign of life had departed did they desist and permit the flames to devour the body.

Feeling still runs high against the negroes. Many negroes had been warned to leave the city and scores of them have gone to St. Louis.

BONES OF MAN WITH MONEY.

Skeleton Believed to Be of American Sportsman Found in New Brunswick.

St. John, N. B.—A crew of fire fighters in the wooded hills of Cranberry Brook, in Charlotte County, have found the clothed skeleton of a man with a large sum of money on it.

The clothing was of good material, and in the pockets of the coat, in five and ten dollar notes, was the money. It is believed that the remains are of an American sportsman, but nothing was found to indicate identity.

Earthquakes in Ecuador.

Two slight earth shocks were felt at Guayaquil, Ecuador.

Massachusetts Church Destroyed by Fire.

The Unitarian Church in Northampton, Mass., the Rev. Frederick H. Kent, pastor, was practically destroyed by fire, all that remains being a portion of the outer walls. The loss is placed at $15,000, with an insurance of $10,000. The fire is thought to have been incendiary.

France and Morocco.

Premier Combes has explained that France has no territorial designs on Morocco.

UNDER WATER FOR MILES

Citizens of Mississippi River Towns Driven Out by Floods.

MANY SAVED FROM HOUSE TOPS

Widespread Havoc Around St. Louis—Volunteers Worked on the Embankments to Prevent Further Disaster—River Forty Miles Wide at One Point—Damage to Property Enormous.

St. Louis, Mo.—The flood has claimed everything on the east side of the Mississippi here except East St. Louis. Only a few inches more of water and the flood would top the row of sandbags, plastered with mud, that stood the sole barrier that protected the city from ruin.

Every able-bodied man in East St. Louis at Mayor Cook's command worked with might and main strengthening the barrier as much as he can. It was feared that East St. Louis might suffer the same fate that overtook Venice, Madison and Granite City when the Madison levee broke.

There are at least seventeen dead in the tri-cities, and two dead in East St. Louis if accounts received are reliable, but there have been no bodies recovered and it is possible that some of those supposed to have perished have simply been unable to communicate with their friends. Twenty-five thousand persons are homeless and railroad traffic is paralyzed.

Several hundred refugees were brought to St. Louis on flat cars across the Merchants' Bridge. Several hundred more were rescued from housetops and carried to places of safety in Granite City, where some of the land is still above the flood level.

Opposite Carondelet and lower down the river has spread many miles over the lowlands. In the vicinity of Cape Girardeau it is forty miles wide.

The damage is extremely hard to estimate, and few persons have undertaken the task. But from all accounts the property losses are as follows:

	Loss.
St. Charles	$200,000
Alton	100,000
Mitchell	50,000
Tri-cities	4,000,000
East St. Louis	1,000,000
St. Louis	50,000

The loss to farmers in the bottoms, where the crops have been completely ruined, is at present beyond computation, but certainly will amount to many hundreds of thousands of dollars.

The damage in St. Louis itself is slight, because it is confined entirely to the river front, and there was ample time for preparation to remove stocks from buildings in danger of flooding.

Kansas City, Mo.—The loss to the State of Kansas and to this city as the result of the recent flood was over $17,000,000. Of this $5,000,000 is the estimated damage to crops in Kansas, $8,000,000 represents the damage done in this city and the suburbs and the other $4,000,000 is distributed among Kansas towns, as follows:

North Topeka, $250,000; Lawrence, $700,000; Saline, $200,000; Manhattan, $150,000; Wamego, $10,000; St. Mary's, $40,000; Blue Rapids, $2000; Clay Centre, $30,000; Enterprise, $20,000; Concordia, $35,000; Junction City, $100,000; Solomon, $50,000; Abeliene, $220,000; Elsworth, $20,000; Lindesburg, $100,000; Hutchinson, $100,000; Minneapolis, $160,000; Emporia, $45,000; Florence, $50,000; Lincoln Centre, $50,000; Atchison, $20,000; Burlington, $20,000; Hill City, $30,000; Beloit, $30,000; Argentine, $2,000,000.

No account has been taken of the smaller towns, although nearly 200 of those were affected by the floods.

The estimate of the loss to crops is considered conservative. Owing to the lateness of the season and the condition of the soil it is very doubtful if any profit will be drawn during the remainder of the year from the farms which were inundated. As a consequence there will be a great deal of individual want and suffering among farmers upon whom the blow fell heaviest.

The extent of the damage to the railroads operating in and out of Kansas City caused by the flood can scarcely be estimated. Beside the very considerable loss of freight in cars and buildings, nearly all lines out of Kansas City suffered severe losses in washedout track and destroyed bridges. The loss in freight flooded, burned or lost down the river may amount to two or three million dollars.

TO RESCUE ENGLISH PRISONERS.

Another Expedition Goes Out Against the Mad Mullah.

Aden, Arabia.—The commander of the Abyssinian force co-operating with the British Somaliland expedition states that there are several English prisoners in the camp of the Mad Mullah, against whom the expedition is directed. These prisoners are principally wounded officers who belonged to Colonel Plunkitt's column, which recently met with a severe reverse at the hands of the Mullah.

HANNA ON ROOSEVELT.

Says the President Will Probably Be the Only Candidate For the Nomination.

Cleveland, Ohio. — In an interview Senator Hanna again says that he is not a candidate for the Presidency. The Senator is quoted as saying:

"There will be but one candidate for the nomination in all probability."

"Will that be President Roosevelt?" he was asked.

"Certainly."

H. C. Burlingame, Aged 102, Dead.

Hiram C. Burlingame died at Westfield, Mass. He was 103 years old on September 7 last. On August 1, 1897, an attempt was made upon his life, and as a result of the assault he carried to the grave two bullets in his body. He rallied from the effect of the shooting, but always suffered inconvenience from a wound in his abdomen.

Yellow Fever in Mexico.

Yellow fever has appeared at Progresso, Mexico.

BALTIMORE BANK FAILS

Salaries of Teachers of Five Public Schools Tied Up.

President Wheatley, of the Closed City Trust and Banking Company, Says Depositors May Be Paid.

Baltimore, Md.—A distressing result of the closing of the doors of the City Trust and Banking Company of the city is the depriving of 100 teachers of five public schools of their salaries for May. The Principal of this group of schools received a check from the City Register Saturday for $1325, and deposited it in the City Trust Bank. Later in the day receivers were appointed and the teachers' salaries are now tied up. The Merchants' National Bank, acting as a clearing house for the trust company, cashed the check. The city is protected, and the loss, if any, falls upon the teachers.

A number of the 2800 depositors in the savings department of the company gathered about the bank anxiously inquiring about the situation. President Wheatley issued this notice:

"This bank has been placed in the hands of Campbell Carrington and George Dobbin Penniman, receivers. I believe all depositors will be paid in full. Depositors can file their claims in the office, and it will not be necessary for depositors to go to the expense of placing their claims in the hands of attorneys."

It appears that as recently as last Saturday week the company had only $15,889.68 in cash on hand to take care of demand deposits of $280,415.71, and time deposits of $111,650, or nearly $500,000.

During the day rumors were afloat that some of the embarrassment of the company had been caused by the alleged mismanagement of Frank J. Kohler, present Vice-President and recently Treasurer. Kohler made this statement:

"During the entire time I have been with the City Trust and Banking Company all my operations have been fair and above board. If any mismanagement is attributed to me it was a mistake of the head and not of the heart. We are all human, and mistakes are not beyond the range of possibilities."

GEORGIA NEGRO LYNCHED.

He Had Shot and Killed a Farmer to Whom He Owed Some Money.

Macon, Ga.—W. Hope Winslow, Jr., whose father was one of the leading members of the Georgia bar, was killed instantly by a negro named Banjo Peavy on the former's farm near Fort Valley. The negro owed Winslow a small sum of money and was asked to work out the debt. He refused impudently and shot Mr. Winslow through the forehead. Before Winslow died he fired twice at his fleeing assailant without effect.

A posse was organized and Peavy was soon captured and turned over to the Sheriff. At night the officer and guard were overpowered, and the negro taken to a grove within the corporate limits, where he was hanged and his body riddled with bullets.

Winslow was the main support of his widowed mother and three sisters.

FRENCH PUNISH THE MOORS.

Bombard Zenega in the Oasis of Figuig For Six Hours.

Paris, France.—The French bombarded Zenega, in the Figuig Oasis, not the town of Figuig, where the French Governor of Algiers was attacked. It was almost wholly a demonstration by long range guns, which threw hundreds of melinite shells. They destroyed a number of houses and a mosque that was greatly venerated by the natives.

The Moors made only a trifling resistance. They attempted to snipe the artillerymen, but did not wound one. The losses of the Moors are unknown. Neither is it known what their future intentions are.

General O'Connor withdrew his troops after six hours. He expects that a deputation bearing the submission of the Moors will come to him shortly. The only French casualty was a native despatch rider killed.

MORE POSTAL INDICTMENTS.

Grand Jury Returns True Bill Against the Groff Brothers.

Washington, D. C.—Indictments were returned against the Groff Brothers by the Federal Grand Jury. They are accused of offering bribes to A. W. Machen, former Superintendent of Free Delivery in the Postoffice Department. The bond of Samuel A. Groff was increased at once to $10,000 from $5000, and that of Diller B. Groff was maintained at $10,000.

The Groff Brothers will be tried under Section 5451 of the Revised Statutes, which make it an offense to promise money to any Government officer with a view to influencing his action or decision on any question or matter which may be pending before him.

DOUBLE TURRETS CONDEMNED.

French Naval Experiments Decide Absurdament of Deadly Device.

Cherbourg, France.—The system of superimposed turrets on warships has been condemned by the Naval Commission, which had been experimenting with the battleship Henry IV. The final trials were to test the possibility of men occupying the lower turret while firing was going on from the upper turret.

Four sheep were tied up in the lower turret to represent gunners, and after ten shots had been fired three of the sheep were found to be dead. The fourth had broken away and had sought refuge in the captain's cabin.

Payne to Probe to Bottom.

President Roosevelt instructed Postmaster-General Payne to go to the bottom of every charge affecting the Postoffice Department. A special meeting of the Cabinet was held, at which the postal scandals were the principal subject of discussion.

Chicago Students Drowned.

While trying to climb aboard one of the Spanish caravels in Lake Michigan at Chicago, Ill., Jesse Miller and Miss Frances E. Moore, University of Chicago students, were drowned.

Macedonian Songs.

In a former letter, writes a correspondent of the London Daily News, I made some allusions to patriotic songs, to which I often listened of an evening in some Macedonian village—songs of lament for slain patriots and in which Mount Pirin is personified, as if in sympathy with the victims of the Turks. The songs of these village dancers in Krutino are of quite another sort. Their favorite themes are love and marriage. They are a picture of rustic society. Some of them are cynical in a good humored sort of way. In one song Petre, leaning on the fence, chaffs Callina, who is cleaning out the garden. "Don't you wait for me," says Petre; "do go and marry somebody." And off the fellow swaggers. "From the hills there comes a shepherd," the dancers sing; "he drives before him two hundred sheep and a hundred goats." And he wears a fur cap. In his hand he carries a bouquet. He goes to "the maidens are washing their linen. To each of them he gives a flower; but to me (sings Callina) also a little spindle." "Tell me, mother," sings Callina, "shall I take the young shepherd?" "No, you shan't," the mother sings; "I shall take him myself. The shepherd will become your father; he will buy you nice new shoes, so that you may no longer run about as unshod as a goat." Poor Callina!

Study of Volcanic Eruptions.

When a volcano vomits forth streams of lava some very curious, as well as remarkable, freaks of nature are observable. It requires scientific research of the lava beds months and even years after an upheaval before all the reliable data can be collected to reveal the whole story of the explosion. The eye-witnesses of such events are not always the most reliable reporters. Fear and excitement make them exaggerate and distort phenomena, and scientists are averse to accepting their stories unless verified by subsequent appearances of the rocks, ashes and lava beds. Every volcanic action, however, leaves indelible marks of its rise and progress, and geologists can read the story, chapter by chapter, as they unearth the different parts of it. It is impossible, however, to make a thorough examination of the lava beds until a long time after the explosion because of the slow process of cooling off. The top crust of the lava cools within a short time, but underneath the heat is retained for an extraordinary time. This top crust of lava is a poor conductor of heat, and it does not permit of rapid evaporation from below.—New York Times.

Animal Surgery.

The science of animal surgery and medicine is thus proving of the widest benefit to our valuable cage animals and birds and to those which are kept in our homes as pets. The drugs and medicines which are given to man to combat diseases can in a modified way prove of immediate benefit to the animals under our charge. The study of the symptoms of sick animals has always been interesting and more puzzling than those which the doctor observes among his human patients, because there is no way for the animals to explain their pains. Yet, in a way, there is an intelligent animal language which animal doctors are quick in interpreting. Through their sympathy and observation they are quick in discovering what the trouble is with the creature—whether it is a stomach or headache or pain in the throat or leg. In short, they have learned to enter in such close sympathy with the animals that there is almost human intercourse between them.

Immense Banyan Tree.

In one of the Howe Islands off Australia a banyan tree has been discovered the branches and trunks of which cover nearly seven acres.

The Mexican of average size wears a No. 6 boot. N. Y.—24

TESTED BY TIME.

Mrs. Robert Broderick, who resides at 1915 Virginia St., in San Antonio, Texas, tells an experience that will interest every reader; it shows as well that Doan's cures are lasting cures. She says: "Up to the early part of the year 1902 I had been a sufferer from kidney troubles for many years. The pain in my back became worse and worse until it was a daily burden that interfered with every duty. I was much afflicted with headaches and dizzy spells and was unable to rest well nights. In May, 1902, after using Doan's Kidney Pills I made a statement for publication declaring that they had entirely relieved me of the pain in my back. I have since then had a year's time in which to study the effects of the medicine, and while I have had slight touches of the trouble since, the use of the pills has always driven away all signs of the disorder, and I have become convinced of the fact that the first treatment was practically permanent in its effects, and I know that a box of Doan's Kidney Pills kept on hand is a sufficient guarantee against any suffering from the kidneys or back. I should advise every sufferer to take Doan's Kidney Pills, and I know that they will be surprised and pleased with the result."

A FREE TRIAL of this great kidney medicine which cured Mrs. Broderick will be mailed on application to any part of the United States. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

New York City.—Fancy waists that close in the back are much in style and are exceedingly attractive in the season's materials. This very pretty May

TUCKED BLOUSE.

Manton one is equally well adapted to the entire costume and to the odd waist, to the long list of washable fabrics, and all soft and simple silks and wools, but, as shown, is of handkerchief lace with trimming of Valenciennes lace and is unlined.

The waist consists of a fitted lining, the front and the backs. The front is tucked to form a deep pointed yoke, below which it falls in soft and becoming folds and is trimmed with lace. The backs are tucked in groups from shoulders to waist on lines that give a tapering effect to the figure. The sleeves are the fashionable ones that are tucked above the elbows and form puffs below. At the neck is a regulation collar.

The quantity of material required for the medium size is four and one-half yards twenty-one inches wide, four yards twenty-seven inches wide, three and three-fourth yards thirty-two inches wide or two and one-fourth yards forty-four inches wide.

Woman's Tucked Eton.

Loose fitting Etons are much in vogue and are always satisfactory to the wearer, inasmuch as they can be slipped on and off with far greater readiness than any tighter garment. The very stylish May Manton model shown in the large drawing includes a fancy stole collar with shoulder strap extensions, and is adapted both to the suit and to the odd wrap. As shown, it is of black taffeta, stitched with corticelli silk, and is trimmed with a tole collar of white peau de soie edged with fancy braid in black and white.

The Eton is made with fronts and back and is shaped by means of shoulder and under-arm seams. The fronts are laid in box pleats at their edges, and in backward turning pleats from the shoulders, but the back is elongated to form a postillion and is laid in box pleats that give a tapering effect to the figure. Beneath these pleats is attached a shaped belt which is brought round and fastened under the loose fronts. The neck is fastened with a fancy collar whose extensions fall over the shoulder seams. The sleeves are pleated for their entire length, but stitched above the elbows only and form frills below that point.

The quantity of material required for the medium size is four and three-fourth yards twenty-one inches wide, two and one-half yards forty-four inches wide, or two and one-fourth yards fifty-two inches wide.

A Dainty Lace.

Teneriffe lace is the charming novelty of the season. Just how much of it is made by the natives of the cliff-bound island, which is the largest of the Canary group, is a question. It is a fact, though, that the most characteristic pattern of this lace suggests the conical peak of Teneriffe. In fact, the last has much the look of very fine drawn work. One of its peculiarities is that it looks equally well on a soft silk evening dress and on a linen morning rig. On certain lovely new dresses of white crystalline this lace figures in a maze of needlework and two other sorts of laces. Mechlin and the heaviest Irish lace combine well with this attractive lace. Many of the most desirable stock ties of linen show insets of this Teneriffe lace. The most notable pattern in this lace, now one thinks of it, suggests a cobweb, or a cart-wheel, done in thread, quite as much as it does its namesake peak.

Beautiful Hats.

Hats trimmed with fuchsias increase in favor. Nothing could be lovelier than a white lace straw, with black velvet ribbon bows on the outside, and a cluster of coral and purple fuchsias hung under the left side of the brim, and encircled by a fringe of lilies-of-the-valley. As regards hats, there are so many becoming shapes and such lovely materials and at all sorts of prices that no one need go unsuited in this important part of the summer outfit.

Flowers Grow in Favor.

Flowers of ribbon work, for millinery use, for hair ornaments and gown decoration, grow in favor and are of exquisite beauty. The latest in this ribbon work is made from sombre and shaded ribbons of very narrow width, which come out in lovely relief in Noisette roses, snowballs, marigold, daisies, violets and wistaria. The crimpled and knotted ribbon "dangles" and fringes are as lovely as they are unique.

Garnitures of Black Spangles.

Very handsome garnitures of black spangles are much seen in Paris. They are designed for the adornment of black or white toilettes.

Misses' Sailor Blouse.

No style suits young girls more perfectly than the simple sailor one. This very charming May Manton blouse is adapted to linen, to cotton and to wool, and can be made absolutely plain or

A POPULAR TUCKED ETON.

elongated with band trimming as preferred. The orginal, however, is made from blue linen with embroidered dots, and is trimmed with a band of plain white which matches the shield, collar and cuffs. With it is worn a tie of soft silk.

The waist consists of the fronts and the back and is fitted by means of shoulder and under-arm seams. Both fronts and back are gathered at the waist line, but the backs are drawn down tightly while the fronts blouse slightly and becomingly. The neck of the blouse is cut away and finished with a big sailor collar. The standing collar is joined to the shield and together they close at the centre back, the edges of the shield being held in place by buttons and buttonholes worked in the blouse beneath the collar. The sleeves are full at the wrists but snug at the shoulders and finished with straight cuffs.

The quantity of material required for the medium size is three yards twenty-seven inches wide, two and three-fourth yards thirty-two inches wide, or one and seven-eighth yards forty-four inches wide, with seven-

MISSES' SAILOR BLOUSE.

eighth yards twenty-seven or five-eighth yards thirty-two or forty-four inches wide for shield, collar and cuffs.

SCIENCE & MECHANICS

The sterilization of meat is much practiced in Belgium. It returns to the trade, under the form of a wholesome product, meat which otherwise would be unfit for consumption.

In 1902 the olive oil production of the little Island of Mytilene amounted to no less than 7200 tons, which realized the sum of $1,080,000. Most of the oil was shipped to Italy, France and Germany. The Mytilene olive oil is said to be the finest in the world.

The largest cold storage plant in the world will soon be opened in Buenos Ayres, Argentine Republic. The plant will have accommodation for 15,000 slaughtered sheep and 4000 head of cattle. Every day there will be slaughtered 5000 sheep and 250 head of cattle.

Carborundum melts only at a temperature far above that ordinarily generated for smelting ores and metals. It is therefore proposed as a coating for fire-bricks, to be applied as a paste with sodium silicate, and tests have shown that a twelve-inch coating protects the bricks from the greatest heat of ordinary work with metals.

A Siberian engineer, by the name of Galai, of Irkutsk, is said to have invented a garment absolutely bullet and shot proof. It is reported that the Chief of the Irkutsk police force made experiments with the new fabric; that every bullet shot from a large caliber revolver rebounded without making the slightest impression upon the stuff. Trials are now being carried on by the Russian military authorities of the Department of Irkutsk.

The curious phenomena of "symphilism" are being investigated by E. Wasmann, a German zoologist. This is the harboring of foreign species of insects, etc., in the nests of ants and termites, and it is found that more than 100 species of arthropods, or creatures with jointed legs, are thus associated with the ants, at least eighty-five to ninety species being beetles. All are recognized easily by certain peculiarities. Most notable among the characteristics of these beetles are their oily reddish brown color, and special exudation organs or pores with brownish hairs, but there are also modifications of the mouth and other parts.

A Symposium.

"What is the secret of success?" asked the Sphinx.

"Push," said the Button.

"Take pains," said the Window.

"Never be led," said the Pencil.

"Be up to date," said the Calendar.

"Always keep cool," said the Ice.

"Do business on tick," said the Clock.

"Never lose your head," said the Barrel.

"Do a driving business," said the Hammer.

"Aspire to greater things," said the Nutmeg.

"Make light of everything," said the Fire.

"Make much of small things," said the Microscope.

"Never do anything offhand," said the Glove.

"Do the work you are suited for," said the Flue.

"Get a good pull with the ring," said the Doorbell.

"Be sharp in all your dealings," said the Knife.

"Find a good thing and stick to it," said the Glue.

"Trust to your stars for success," said the Night.

"Strive to make a good impression," said the Seal.—Life.

Workhorse Parade.

Boston is the first city on this side of the Atlantic to adopt the workhorse parade, which is a famous event in London. Valuable prizes are offered for the best butcher carts, grocery and express wagons, delivery vans, trucks, etc., and the rosette which is awarded to the winner is valued above rubies by the London driver who is fortunate enough to win it. The Royal Humane Society takes much interest in the competitions, recognizing in them an incentive for the kind treatment of the horse. However unworthy the motive may be, it is powerful, as results have proved. If the Boston show is a success there is no reason why the idea should not be adopted by many other cities, among which Toronto might be included.—Toronto Mail and Express.

A Horticultural Gem.

Not very long ago an agent purchased some imported plants of Odontoglossum crispum at the rate of 1s. 6d. each. Finding no buyers for his remaining dozen or two of plants, he placed this remnant, the Gardeners' Magazine says, in the hands of a grower. One of the plants turned out to be a horticultural gem of the first water. It had flowers of the finest form and size, and the pure white ground color had vivid blood-red markings. Large sums of money were refused for it. At last a city gentleman, well-known in connection with one of the wholesale markets, added it to his already fine collection of orchids, paying over £1000 for the privilege of so doing.

Rather Forgetful.

"My father is the most absent-minded man," said the daughter of a college professor. "Why, when he goes upstairs to dress for going out, some member of the family is obliged to go up and knock on his door every ten minutes, for fear he'll forget what he's doing and undress and go to bed."—New York Times.

Birds Absolutely Fearless.

When the white man first visited some of the islands of the Southern Hemisphere, he found that many of the animals, especially the birds, were absolutely fearless. Penguins, albatrosses and others paid no attention to the men as they walked along, and when it was desired to photograph a nest and eggs it was frequently necessary to push the nesting albatross from the nest, the bird merely pecking at the intruder. Darwin describes doves at one island he visited as apparently unable to comprehend that man was an enemy. The birds could be shoved from the limbs before they moved, and even attempted to alight upon the heads of the men. In Kerguelen land the birds in some of the extensive rookeries refused to move as the men strode along, holding their ground and pecking so violently at the invaders that they were forced to beat a retreat. These birds had never seen a man before, and failed to recognize him as an enemy.—Scientific American.

Snowstorm in Miniature.

At an evening party in a Stockholm (Sweden) residence the heat became almost intolerable. The window sashes were found frozen and a pane of glass was shattered. A current of cold air rushed in and at the same instant flakes of snow were seen to fall to the floor in all parts of the room. The atmosphere was so saturated with moisture that the sudden fall in temperature produced a snowfall indoors.

TO WORKING GIRLS

FREE MEDICAL ADVICE

Every working girl who is not well is cordially invited to write to Mrs. Pinkham, Lynn, Mass., for advice; it is freely given, and has restored thousands to health.

Miss Paine's Experience.

"I want to thank you for what you have done for me, and recommend Lydia E. Pinkham's Vegetable Compound to all girls whose work keeps them standing on their feet in the store. The doctor said I must stop work; he did not seem to realize that a girl cannot afford to stop working. My back ached, my appetite was poor, I could not sleep, and menstruation was scanty and very painful. One day when suffering I commenced to take Lydia E. Pinkham's Vegetable Compound, and found that it helped me. I continued its use, and soon found that my menstrual periods were free from pain and natural; everyone is surprised at the change in me, and I am well, and cannot be too grateful for what you have done for me."—Miss JANET PAINE, 530 West 125th St., New York City.—$5000 forfeit If original of above letter proving genuineness cannot be produced.

Take no substitute, for it is Lydia E. Pinkham's Vegetable Compound that cures.

CUTICURA SOAP

The World's Greatest Skin Soap.

The World's Sweetest Toilet Soap.

Sale Greater Than the World's Product of Other Skin Soaps.

Sold Wherever Civilization Has Penetrated.

Millions of the world's best people use Cuticura Soap, assisted by Cuticura Ointment, the great skin cure, for preserving, purifying and beautifying the skin, for cleansing the scalp of crusts, scales and dandruff, and the stopping of falling hair, for softening, whitening and soothing red, rough and sore hands, for baby rashes, itchings and chafings, for annoying irritations, or too free or offensive perspiration, for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, as well as for all the purposes of the toilet, bath and nursery.

Cuticura Soap combines delicate emollient properties derived from Cuticura, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap ever compounded is to be compared with it for preserving, purifying and beautifying the skin, scalp, hair and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath and nursery. Thus it combines in one soap at one price the most effective skin and complexion soap, and the purest and sweetest toilet, bath and nursery soap ever compounded.

Sold throughout the world. Cuticura Resolvent, 50c. (in form of Chocolate Coated Pills, 25c. per vial of 60), Ointment, 50c., Soap, 25c. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Boston, 137 Columbus Ave. Potter Drug & Chem. Corp., Sole Props.

SATURDAY, JUNE 13 1903.

NO ANNEXATION FOR MONTCLAIR.

Our attention has been called to the above heading over an article in the Newark *Evening News*, and so analogous are the circumstances to those in North Plainfield that we are led to make several extracts from it, namely:

"Montclair as It Was, as It Is, and as It Should Be" was the topic of a sermon suggested by the thirty-third anniversary of the organization of the First Congregational Church, that place, and preached Sunday morning by the pastor, Rev. Dr. Amory H. Bradford, before a large congregation.

It was founded Scripturally on the text found in the prophecy of Isaiah 54:14: "I will set thy stones in fair colors and I will make thy pinnacles of rubies, and thy gates of carbuncles; and all thy border of pleasant stones. And all thy children shall be taught of the Lord, and great shall be the peace of thy children. In righteousness shalt thou be established."

After reviewing the history of Montclair, and showing how it had grown in those years, the pastor said:

"In those days Montclair consisted chiefly of a beautiful landscape and a small group of the noblest and most enterprising young people who ever settled in any community. Social conditions at that time were somewhat peculiar. Society was distinctly divided between natives and suburbanites, who were all supposed to be aristocrats. The former had the land, and the latter had the vision and public spirit, although when I remember what prices some of the old residents expected for their land, it is evident that they had faith if not vision. There was an irrepressible conflict for years between the natives and the suburbanites, but even the echoes of the strife have now died away."

Which reminds us of our own difficulties at one time between the "Swallow Tails" and the "Dinner Pails," now happily past an almost forgotten.

Continuing Mr. Bradford said:

"Does the glamour of youth still surround my legs? or am I correct in thinking that few cities have had such noble and public-spirited citizens when its institutions were in the formative period? Here were broad-minded, liberal-hearted, enthusiastic men and women; many had fine culture, most of them either directly or indirectly came from New England, and they set themselves to the task of founding here a Christian city with all the enthusiasm that distinguished our Pilgrim fathers when they laid the foundations of our American institutions at Plymouth.

"Here is an almost matchless community—one which I once heard called a university town without a university; a place in which men and women are seldom measured by money, but rather by ability and character; a place of schools, of homes, of culture, of friendships; an ideal locality in which to rear a family and to spend one's days. A place more like old New England than most parts of New England to-day, a suburban city where God is worshipped and brotherhood is prominent in the social and religious creed, but a city whose population and whose conditions are swiftly changing. Thus am I led to ask: What about the future of Montclair?

DANGERS OF CORPORATE GREED.

"The future depends on the vision and fidelity of those now living. Are we to retain our characteristics or to be swallowed up in a larger city? Are we to maintain our autonomy, or are absentee plutocrats, trolley magnates, brewers and liquor dealers to compel us to become a part of Newark in futherance of their selfish schemes? Shall we not continue to furnish schools for all without regard to creed, color or nationality, and thus help to make a wiser and a better nation? Shall we not still more rigidly limit the traffic in intoxicating liquors? Are we to remain a God-fearing Christian people, not bigoted, but liberal, truth loving, consecrated and zealous in our purpose to make Montclair a part of the city of God?

"Surely the children of such men as those who laid the foundation of our municipal life will not be unworthy of their ancestry. But there are dangers in our path, and I ask you to consider a few of them.

"First. There is danger that outside corporations, like the trolley, water and lighting companies may act as if we have no rights which they are bound to respect.

"Second. There is the likelihood that selfishness will keep constantly on the watch to combine us with Newark—that we shall thus become a mere annex to a larger municipality—an annex whose money shall be spent by the political rounders who infest the city halls of most large cities.

"Third. There is danger that we may be swamped by foreigners, and thus the whole character of our life changed; and

"Fourth. There is the still more insidious peril that with the increase of wealth there may follow less sensitive consciences, and the lowering of moral ideals.

"Concerning these perils, I have somewhat to say.

"First—We ought to cultivate the habit of knowing well the community in which we live. Do you know how Montclair is growing? Do you know whether there are few or many open spaces where the children of the poor can play? Do you know how laws are enforced? Do you know whether there is need of a larger hospital? Do you know the city in which you live—which makes the environment of your family—as you know your business? Cultivate the habit of knowing Montclair—keep in touch with its various forms of life—it will make you more accurate in your judgments and wiser in your actions.

BEWARE OF ANNEXATION.

"Second—We should be on our guard, in season and out of season, that we be not surprised by some scheme for annexation to Newark. Now I have no objection to Newark. Among manufacturing cities it is unsurpassed for public spirit and good order; but its ideals are not ours, and its administration is not ours. Newark does not need us and we do not need Newark. As neighbors we may be friends, but tied together we should be enemies. No one, unless impelled by personal greed or political ambition, will ever press annexation upon us. He who suggests such a proposition should be suspected and watched at once. He may not be dishonest, but the chances are against him.

"Third—We should also be on our guard against the encroachments of the liquor power. A drunken man is now seldom seen. Crimes of violence are not often reported. * * * * We shall need no more licenses for years to come. 'Limit the saloons, enforce the laws, be total abstainers' ourselves' ought to be the watchword of all good citizens of Montclair.

"Fourth—We should re-emphasize the ideals of our Puritan ancestors. I do not say we should be Puritanical, but we should exalt those Puritan principles which make good citizenship a part of religion, which honor the Lord's and will not allow it to be made a day of unnecessary work or undue levity, which put integrity and virtue above wealth or popularity. Our fathers had iron in their blood; they could not be bought. The best way to honor their memory is by being like them.

AN UNJUST LAW

THE Supreme Court of New Jersey has just decided that in this State a married woman cannot maintain an action at law for the alienation of her husband's affections.

This is a case wherein Alphine Hodge brought suit against Lena Wetzler to recover damages for the enticing away of her husband, and the judge ruled that in common law, no such right is conferred upon a wife, although the right of a husband to maintain such an action has been long established.

This is all wrong and is a matter for the legislature to remedy, for under the marriage vows the duties of both parties are equal and justice demands that such should be the case. Law is or should be, justice; and it is not justice for the law to protect one party to a contract and give no satisfaction whatever to the other party.
